In my opinion, they will yield their judgment to the caucus of Republicans and vote for the bill. But everyone has known that this is a delicate and difficult question. We have been told here that Senators have been sitting up nights and have been consulting with the committee for a long time about the bill. If you have not been able to settle it either in caucus or in committee, then the place to settle it is here in the Senate.

I am opposed, Mr. President, to any further delay. I believe that this bill should have fair discussion. But I understood from some member of the Senate it was stated by members of the committee this morning that if this schedule could not be taken up it would be practically impossible to proceed with the bill to-day, and that we would have to take a recess or adjourn.

I am anxious that the bill shall pass. I do not expect to vote for the bill unless it shall be very materially amended. Unless certain objectionable features are taken out of it, it will not secure my vote, and yet I am anxious to see it passed. I know that a great number of people in the United States have been led to believe that there is nothing needed or required but the passage of the bill, and they are waiting and looking with interest for its passage to bring about that restoration of confidence, that return of prosperity of which we heard so much a year ago, after the St. Louis convention.

I want to see the bill perfected; I want to see it as perfect a bill as can be made, but I am particularly anxious that the bill shall be such a bill as the Administration says it wants. I shall not interfere in any way to embarrass the Administration in securing a bill in accordance with its ideas. If it is not in accordance with mine, I can reserve my right either to vote against it or to refrain from voting. The people of the State I represent are particularly interested in the wool schedule, as are all the Western people. It is about the only thing we have in the bill that touches or affects our interests. We have had free wool, and we have had cheap wool and cheap sheep, and the people in the Western country attribute somewhat their present embarrassed condition to a failure to receive the old price for wool and the old price for sheep.

I want the bill to become a law. I do not believe myself that the wool schedule as proposed by the committee is a fair one, and I doubt very much, after looking over the schedule of woolen goods, whether the reduction made by the committee this morning, as I understand it, is a proper reduction, if they reduce the rate proposed by the House on wool. But I am just as ready to meet that question now as later. I am not to be consulted, of course, in caucus. I am to present my objections to the bill here, and if the Senators who represent wool States, who differ with me in political views as to some things, can not do that, they can retire to the secrecy of the conference room, or somewhere, and arrange it, while the rest of us are trying to perfect the bill. When the bill is perfected, when I know what the bill is, I shall take a short time to express my views upon the measure, and state what I regard as some of the defects of the bill.

Mr. MANTLE. As gentlemen are discussing the proposed amendment, I wish now to say that I shall offer no objection myself to the passing over of the wool schedule, especially if such

action shall hold out the slightest possibility of a greater degree of justice being done to the woolgrowers of the country. I have given this matter of the wool schedule a good deal of consideration, and I am one of those who believe it is full of loopholes, designedly put there for purposes of fraud and evasion. I believe that it is full of snares for the unwary feet of the woolgrowers of the country. I do not believe that there is another schedule in the bill bearing upon any subject that is so weak in its construction, so careless of the interests of the people nominally intended to be benefited, as the wool schedule. I think if I were to search through the whole domain of poetry and prose I could not find anything that more fitly characterizes the pending bill than those famous lines from Bret Harte:

Yet the cards they were stocked
In a way that I grieve,
And my feelings were shocked
At the state of Nye's sleeve,
Which was stuffed full of aces and bowers,
And the same with intent to deceive.

I think the bill, in so far as it relates to the woolgrowers, is "stocked with aces and bowers" with the full purpose and intent of deceiving the woolgrowers of the country.

If the proposition to postpone is insisted upon, I shall favor it, with the hope that something better may come out of a postponement.

Mr. TURNER. Mr. President, I have been edified, as I have no doubt everybody else in the Chamber has, by the beautiful state of concord and harmony which has prevailed heretofore in the discussion and consideration of the bill on the other side of the Chamber. That condition arose, I have no doubt, because hitherto we have been considering schedules in which Massachusetts, Connecticut, Maine, New Hampshire, and other New England States are specially interested, and it was really pleasant to watch our Western Republican Senators rally with a look of patience on their faces the other day, pursuant to the agreement which we had heard about, and vote against the proposition to put grain bags on the free list.

Now that we have reached these schedules that involve the interests of the West, I am not surprised to find a want of agreement and a want of harmony among our Republican friends. I am quite certain if they could get our recalcitrant Western Republican Senators into the caucus they could whip them into line again, as they did on grain bags and as they propose to do on lead, leather, and other questions which have been reserved for consideration here. I am certain it would be much more pleasant to have that done, because we could again have the beautiful state of concord which has edified us all so much.

The VICE-PRESIDENT. The reading of the bill will be resumed.

The SECRETARY. Paragraph 360——

Mr. PLATT of Connecticut. What became of paragraph 357?

Mr. VEST. Paragraphs 357, 358, and 359 were not passed over. I objected.

Mr. CULLOM. No; they were not passed over.

Mr. VEST. There has been no such action as that taken by the Senate.

Mr. CULLOM. The clerks made a mistake.

Mr. VEST. I objected specifically.

Mr. ALLISON. Has paragraph 353 been read?

The VICE-PRESIDENT. Paragraph 356 was the last one read.

Mr. ALLISON. I offer an amendment, to come in line 23, page 115, paragraph 353, after the word "unwashed."

Mr. JONES of Arkansas. Before that amendment is offered, I should like to have paragraph 356 read as amended. It was passed over.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

356. The duty upon all wools and hair of the first class shall be 10 cents; upon all wools or hair of the second class, 11 cents per pound.

Mr. ALLISON. Now I ask that the amendment I send to the desk to paragraph 353 be read.

The VICE-PRESIDENT. The Secretary will read the amendment to paragraph 353.

The SECRETARY. Amend paragraph 353, in line 23, page 115, after the word "unwashed," by inserting the following:

The duty on wools of the third class, if imported in condition for use in carding or spinning into yarns, or which shall not contain more than 8 per cent of dirt or other foreign substance, shall be three times the duty to which they would otherwise be subjected.

Mr. GRAY. May I ask the Senator from Iowa a question?

Mr. ALLISON. Certainly.

Mr. GRAY. I understood a while ago that the discrimination against what are called skirted wools had been abandoned by the committee. Does not this, in a measure, restore what was aimed at by that discrimination?

Mr. ALLISON. It does not, I will say to the Senator. I read in the hearing of the Senate the definition of scoured wool. This is intended to be a definition of scoured wool of the third class and eliminates from the definition all the wools that I have described as being washed in the rivers of Russia and other countries.

Mr. GRAY. Then I understand that the amendment proposed by the Senator from Iowa raises the duty on certain wools of the third class which come to this country in a better condition than the ordinary wools of that class?

Mr. ALLISON. If they come into this country in a condition fit for carding or spinning, or if they contain 8 per cent or less of impurities, they shall pay three times the duty—in other words, they shall pay the duty upon scoured wool.

Mr. GRAY. Now, why not say if they come in a condition to be carded, spun, or woven they shall pay the higher duty, and not use language which will only prohibit a certain class of cheap wools from coming in because they happen to be in a little better shape than the dirtiest and most slovenly prepared wool?

Mr. ALLISON. Of course I am not an expert as to the way in which these wools come in. I am told that none of them come in unless they contain at least from 12 to 20 per cent of dirt. The Senator from Wyoming [Mr. WARREN] is more familiar with that subject than I am, but I understand that to be the fact.

Mr. GRAY. I understand from an article here——

Mr. JONES of Arkansas. Will the Senator from Delaware allow the amendment to be read again? I do not understand the exact point.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The amendment submitted by the Senator from Iowa will be stated by the Secretary.

The SECRETARY. Add at the end of paragraph 353, line 23, page 115, the following:

The duty on wools of the third class, if imported in condition for use in carding or spinning into yarns, or which shall not contain more than 8 per cent of dirt or other foreign substance, shall be three times the duty to which they would be otherwise subjected.

Mr. GRAY. I understand that the amendment proposed by the Senator from Iowa is as I stated, that the wools which contain the greater percentage of dirt are to be so far favored by the tariff that they will come in at a less rate of duty, but when they come in with less than 8 per cent of dirt, they are to be excluded with reference to their being fit for spinning or carding.

Mr. ALLISON. No; that is not precisely it. There is a specific duty of 7 cents a pound on these wools.

Mr. PLATT of Connecticut. Four and 7.

Mr. ALLISON. Four and 7. If they should come in a scoured condition fit for use in carding or spinning, of course their value is added to, and the duty is increased accordingly. It is to cover the difficulty suggested by Senators this morning who criticised the committee's report. I think the amendment will cover the difficulty without in any way impairing the importation of wools of this class.

Mr. GRAY. I find here a statement made by the carpet manufacturers, who are entitled to be heard, I think, on this occasion. It is to this effect:

Nearly one-half of the present supplies of carpet wool reach the market in the washed condition, or they have at least gone through some manipulation which might compel appraising officers to classify them as washed, under any reenactment of the definition of washed wools contained in paragraph 382 of the act of 1890. A double duty—

Thus imposed—

upon these wools would at once absolutely shut us—

That is, the carpet manufacturers—

off from their use.

While that is not the exact language of the amendment proposed by the Senator from Iowa, it seems to me that it is going to accomplish measurably that effect.

Mr. ALLISON. It does not.

Mr. GRAY. The amendment reads thus:

The duty on wools of the third class—

That is the duty the carpet people are speaking of, is it not?—

if imported in condition for use in carding or spinning into yarns—

That is one branch—

or which shall not contain more than 8 per cent of dirt or other foreign substance—

Thereby putting a premium on dirt, so to speak—

shall be three times the duty to which they would be otherwise subjected.

So that any manipulation, whether washing or otherwise, no matter what it is, that reduces the amount of dirt below 8 per cent or to 8 per cent, that reduces it to 7 per cent, imposes a duty of three times the duty to which the wools would otherwise be subjected. If they had 9 per cent of dirt, they would come in at one duty; if they had 7 per cent of dirt, they would come it at three times that duty. That is what I understand the carpet manufacturers object to in substance, although that suggestion was not before them when this protest of theirs was printed; but they say in reference to the proposition which was made that—

A double duty upon these wools would at once absolutely shut us off from their use. As many of them are manipulated, the duty might be construed to be three times the single duty, thus placing a tax of 24 cents a pound upon wools which are often not worth 10 cents a pound in European markets.

Mr. WARREN. Mr. President, the proposition under discussion is no new departure in the matter of wools. When there was an ad valorem duty on carpet wools, it of course regulated the amount of duty imposed, whether washed or unwashed, according to price. Wools as they are grown shrink all the way from 20 to 90 per cent.

Mr. GRAY. If they shrink 90 per cent, they would shrink a good deal. You do not mean to say that they would shrink 100 per cent, do you?

Mr. WARREN. I presume the Senator does not doubt the statement that a shrinkage of 90 per cent might occur in some particular fleece.

Mr. GRAY. With entire respect to my friend, I doubt the statement that they shrink 90 per cent.

Mr. WARREN. I have seen a fleece taken off that weighed nearly 50 pounds. Does not the Senator suppose that a fleece weighing nearly 50 pounds would shrink 90 per cent, producing far less than 10 pounds by the removal of the impurities in the wool?

Mr. GRAY. That would not be 90 per cent.

Mr. WARREN. But when I say to the Senator that the wools of the United States, taken all together, shrink an average of 66⅔ per cent in scouring, my statement is not so extravagant that in extreme cases a fleece may shrink even 90 per cent. I will say to the Senator, if he doubts my statement, I can telegraph and before to-night get a reply giving returns from clips where upon the whole clip from some one owner there has been a shrinkage in scouring of about 80 per cent. Upon carpet wools that are washed there is in this bill no more duty imposed than upon those that are brought in in the grease; but where they are scoured, and scoured so clean that there is but about 8 per cent of impurities left, then they take this triple duty. But when that is done, all the labor has been performed. It has always been the policy, as I understand it, in importing wool, to provide so as to bring it here in the state that gives the most opportunity for labor in preparing the wool, so it is preferable to have it come in grease. No wool was ever known to be so light as to bear a shrinkage of only 8 per cent, unless it had been scoured with soap and chemicals in an expensive and elaborate way.

Mr. GRAY. Of course I defer to the Senator from Wyoming in regard to all these matters which concern the expert in husbandry, but there are certain things that even the uninitiated may be expected to understand. We are not talking about the condition in which the American shepherds send their fleeces to market. If they choose to send them in a slovenly condition, that is one thing; that is pretty hard perhaps on those who have to deal with them, and I suppose the price is made to adjust itself to the conditions; but we are talking about the fleeces that come into the country; and because the woolgrowers of the United States, under protection, or expected protection, have fallen so far behind the industry in other parts of the world as to think that they are able to send their fleeces in this exceedingly slovenly and improper condition to market is no reason why we should put a premium on the dirt in the fleeces that come from abroad; not at all. You invite, then, the dirty fleeces from Australia and from the Argentine Republic, and put, as I said, a premium upon dirt, because you get protection on the dirt and because you get a duty on the dirt.

I was going on to read, when the Senator interrupted me, what this Wool Manufacturers' Association say. They say:

> We can conceive no circumstances—

These men are writing as protectionists, so they say—

> under which such taxation upon a raw material can be justified. In the present instance it could have but one object and but one result, viz, to embarrass, hamper, and partially destroy a home industry. We do not conceive this to be among the purposes you have in view in framing a new tariff law.

Mr. WARREN. Will the Senator permit me a moment there?

Mr. GRAY. Certainly.

Mr. WARREN. That is shooting over the subject now before the Senate. There is no proposition now to change washed-wool rates and no proposition to impose any more duty upon washed than unwashed as to third-class wools.

Mr. GRAY. There is that very proposition in this amendment, unless I totally misunderstand it.

Mr. WARREN. The Senator does misunderstand it.

Mr. GRAY. I think I will show the Senator that I do not misunderstand it.

Mr. WARREN. Very well.

Mr. GRAY. Here is a proposition to put a tax of three times the duty to which they would otherwise be subjected upon all wools which shall not contain more than 8 per cent of dirt or other foreign substance. Is not that an attempt to raise the duty upon the wools as they come from South America or from whatever part of the world they come, where the cheaper wools are shorn from the backs of the sheep, and to put a higher duty upon such wool as has had a portion of the dirt taken out so as to reduce it to 8 per cent?

Mr. WARREN. Not at all.

Mr. GRAY. Why not?

Mr. WARREN. The manufacturers of carpet do not make that statement. They show by their statement that they desire to import wools in the dirt or washed, as they may prefer.

Mr. GRAY. No; they desire to import wools as clean as they can get them, but not to be punished by a tax.

Mr. WARREN. How would the Senator prevent that except by the imposition of a specific tax that would be just and at the same time prevent fraud?

Mr. GRAY. I do not, in the first place, believe that the Senator is quite accurate about the extent of the shrinkage. Of course he believes it.

Mr. WARREN. I desire to state to the Senator that I can furnish indisputable evidence as to the correctness of my statement.

Mr. GRAY. I am talking about the shrinkage of foreign wool.

Mr. WARREN. Furthermore, the Senator is in error when he assumes that washed wool and scoured wool mean the same. In wool circles, and amongst those who handle wool, the word "washed" and the word "scoured" are as different in their meaning almost as the difference between the colors white and black. The Senator would probably say that scouring his face and scouring mine would be washing, or that to wash would be to scour, in a way, but the terms, as technically applied to wools, are absolutely and entirely different. They mean two different things.

Mr. GRAY. Mr. President, without going into the technical meaning of "scoured" and "washed," all I want to say is that I do understand, I think, and after listening to the Senator from Wyoming I am sure that I understand, the amendment and the object and effect of the amendment offered by the Senator from Iowa. It is to raise the price of these carpet wools to the carpet manufacturer, and it does that by providing that all wool imported which shall not contain more than 8 per cent of dirt or other foreign substance shall have three times the duty imposed upon it to which it would otherwise be subjected.

Mr. MILLS. Instead of twice the amount.

Mr. GRAY. Instead of twice the amount. If that does not raise the price of the raw material to the carpet manufacturer and is not intended to raise it, I should like to ask the Senator from Wyoming what it is intended to do?

Mr. WARREN. No, it is intended to have the carpet men bring it in unscoured, either in green or washed, as heretofore.

Mr. GRAY. Then this is a great fraud upon the carpet manufacturers.

Mr. WARREN. Not at all.

Mr. GRAY. It is certainly a fraud upon the carpet manufacturers, and in order to subsidize one industry you are going to paralyze numberless industries.

Mr. President, this brings me to make one remark, and I shall not interrupt the quiet progress of this bill further, and that is, that as constructed now it seems to me it is full of pitfalls for the manufacturers and for the consumers of wool and the woolen goods in this country. Its inevitable effect is to enormously raise the price of manufactured woolen goods to the consumer. You can not get away from that. It must do it. It must double the price to the consumer of the necessary commodities made of wool.

If you are going to put any duty upon wool at all in which you can be fair and can avoid all these covert steals, which are made under the cover of classification and of such amendments as have just been proposed, the proper way would be to place a duty upon the scoured wools, and let us know how much duty a pound of scoured wool would pay, for all wool must be scoured before it is fit for spinning and weaving. Let us place it so; and then we shall know where we are, and we shall be relieved from all this cloud of obscurity which now hangs around the whole subject of classifications or amendments such as are now before the Senate.

Mr. MANTLE. Mr. President, there can be no doubt whatever but that the Senator from Delaware [Mr. GRAY] is right in many of the propositions that he lays down. This amendment will increase the cost of clean wool; it will increase its cost to the manufacturer of carpets. The value of all wool depends upon the amount of clean wool which can be gotten from a pound of wool in the grease. It is well known that the wools of this country, on an average, shrink about 66⅔ per cent; that is, after being scoured they yield about 33⅓ per cent of clean wool.

It was with that knowledge, and understanding of the situation, knowing full well what the character of the wool grown in this country was, that the law of 1867 was enacted, which placed a specific duty upon wool in the grease; that is, upon unwashed wool. Taking into account the condition of the wool industry in this country, with a knowledge of this shrinkage, and desiring to protect the American woolgrower upon this basis, a duty of whatever it may have been—I think 10 or 12 cents—was levied upon that character of wool, and it was intended that the American

woolgrower should derive that protection upon his unwashed wool. That was the purpose, the object, and the aim of the law, looked at from the protective standpoint.

Mr. President, in respect to third-class wools, they were always subject to a triple duty for scoured wools until the enactment of what is known as the McKinley law, the law of 1890. When that law was passed, an ad valorem duty was substituted for the specific rates upon third-class wools. Hence there was no necessity of placing a triple duty upon scoured wools of the third class, because the duty depended entirely upon their value, whether they might be washed or unwashed or scoured. This bill, however, proposes to return to specific rates; and therefore it becomes necessary, keeping in mind all the time the protective idea—the Senator from Delaware, of course, is talking from the other standpoint altogether, and I am talking from the protective standpoint—keeping in mind that idea, it becomes necessary from this change in the character of the duty that an additional duty, a higher duty, should be placed upon scoured wools.

Mr. GRAY. May I interrupt the Senator for a moment?

Mr. MANTLE. Certainly.

Mr. GRAY. The passages that I read from this association of carpet manufacturers are written from the protective standpoint. The members of that association are all protectionists.

Mr. MANTLE. But what they stated was from the manufacturers' standpoint.

Mr. GRAY. Yes; certainly. And the manufacturer ought to have something to say, ought he not?

Mr. MANTLE. Certainly; but it is an entirely different standpoint from that of the woolgrower.

Mr. GRAY. Of course; but the manufacturers ought to be heard, ought they not?

Mr. MANTLE. Certainly; and justice ought to be done.

Mr. GRAY. While I am on my feet, let me ask the Senator what objection is there to laying all the duty, so far as raw wool is concerned, upon the basis of so much a pound on the clean wool?

Mr. MANTLE. If that could be done, it would be by far the most satisfactory method of levying the duties upon wool. I agree entirely with the Senator from Delaware in that. But we find this bill arranged upon a different basis, making these classifications and distinctions upon blood lines and upon geographical lines, and hence it becomes a very difficult task, and at this moment a hopeless one, to attempt to remodel this whole structure, so far as the wool schedule is concerned.

All that the Senator from Delaware has said about putting a premium upon dirt really has no weight in this discussion, I say, with all respect and deference to the Senator, because we are levying these duties upon the conditions as they exist with relation to the domestic wool. Therefore, starting in with the unwashed wool, bearing in mind its known shrinkage and fixing a specific rate upon that, it becomes necessary, in order to carry out the idea of protection, to increase the duty upon washed wool, because washed wool shrinks so much less; and if it were to come in at the same rate of duty it would naturally destroy a large part of the protective benefit intended to be conveyed by a duty upon unwashed wool.

Mr. GRAY. Why, then, not have an ad valorem duty to solve all this difficulty, and have the duty based upon a pound of clean wool?

Mr. MANTLE. If an ad valorem duty could be honestly enforced with respect to wool, or with respect to anything else, it would be the very best method of arriving at and determining the duty, if we could but do away with the fraud and undervaluation which exists under the ad valorem system, and especially with reference to wool, which is always availed of, as the Senator from Wisconsin [Mr. SPOONER] suggests to me. It is indisputable, from investigation of the statistics of imports and valuations under the ad valorem duty upon third-class wools under the McKinley law, that that provision immediately resulted in wholesale fraud and undervaluation, and the price of wool immediately ran down—that is, at the custom-houses of the country.

The prices did not run down in the markets abroad, in the countries whence the wool came. The reduction in price was simply stimulated and brought about by these ad valorem duties, and especially upon the price of third-class wool, which began to decline under the operation of the ad valorem duty of the McKinley law. It is necessary to create these distinctions; it is necessary to put an additional duty on washed wool; it is necessary to put an additional duty on scoured wool; it is necessary to continue adding to the duty upon wool which has passed beyond the scoured point into the manufactured condition if it is our purpose to carry out the protective idea and to give it effect in practice. This idea constitutes the burden of the complaint which I have made here upon the part of the woolgrowers. Looking at it always from the protective point of view, the bill is so framed that, while it nominally gives to the woolgrower a specific rate upon the different classes of wool produced in this country, yet it is so worded, and there are so many loopholes for evasion of the actual purpose and intent of the law, that as a result the woolgrower does not get in practice 50 per cent of the benefit which the law nominally gives to him.

It is for this purpose that I have striven to amend this bill so that the woolgrower might get what he is justly entitled to, that he might no longer say that the wool schedule as it was in the McKinley law and as it is now proposed to be enacted here is a legislative lie upon its face, for that is exactly what the woolgrowers of the country say. They say that heretofore it has resulted in defrauding them of the protective benefit intended to be given them and the protective benefit with which the woolgrower has been charged, but which he has never received.

Mr. STEWART. The worst of it is that it is made an excuse for raising the duty on woolen manufactures and putting larger duties on woolens, while the woolgrower gets nothing.

Mr. MANTLE. Yes, Mr. President, that view of the case, of course, presents itself. I think that the suggestion of the Senator from Nevada is quite correct, that the manufacturer gets his compensatory duty based upon the nominal duty given to the woolgrower upon unwashed wool, whereas I have shown, and it is a fact, that the woolgrower does not receive more than 50 per cent of that nominal duty, while the compensatory duty of the manufacturer is based upon the nominal duty, and therefore he gets the benefit of that duty, while the woolgrower, who is charged with it, in effect and in practice only gets one-half of it or less.

In Document No. 36, presented by myself on April 14, being the memorial of the National Wool Growers' Association, there is a table prepared by Mauger & Avery, wool merchants in New York, in which it is shown—and their showing is sustained and borne out by statements from the Treasury Department—that the actual benefit accorded to the woolgrowers of Ohio upon XX fine washed Ohio wool was only 6¼ cents per pound, while it should have been three times that much.

That illustrates, Mr. President, the operation of the law as it is now framed. There should be unquestionably an added duty for scoured wool of the third class if we are to carry out the protective purpose and intent of this law. It will add to the cost of the wool to the wool manufacturer, undoubtedly; but you can not build up the woolgrowing industry in this country without adding to the cost that the manufacturer must pay for his wool until we have reached that period of protection upon wool when we shall be able to produce all the wool we require for our own use.

The cost of this third-class wool is found upon page 70 of this Senate Document No. 36, in the London market, and from this it appears that the prices of these higher grades of third-class wools run all the way from 14 cents up to 21 cents a pound in the London market. These are the finer grades, such as Russian Donskoi and East India wools. They are used, I believe, in the manufacture of the finer grades of carpet.

Therefore, viewing the matter from the protective standpoint, there is no reason in the world why these wools should not pay an additional duty. The higher grades of carpets approximate what might be called a luxury; and even from the revenue standpoint, laying aside the question of protection, there is no good reason why they should not be subject to a higher rate of duty.

Not only that, Mr. President, but the third-class wools do come in competition with wools of a similar character that can be used for largely the same purposes grown in our own country.

I am one of those who believe that if an adequate protective rate of duty was placed upon third-class wools it would stimulate the growth of that class of wools in this country, and would probably result after a while in the production of a great amount of that class of wool by our own woolgrowers. We have a great deal of territory especially adapted to the growth of this character of wool.

I am not in favor of the amendment proposed by the committee. I believe that it allows too much latitude, that it gives away too much to the manufacturer as between him and the woolgrower. There ought to be a simple proposition such as is contained in the law of 1867 and the law of 1883, placing a triple duty upon third-class wools.

There is a wide distinction between washed and scoured wool, and there is no difficulty whatever in determining what is washed and what is scoured wool. The distinction ought to be made, and the line ought to be drawn, as has always been done, between washed and scoured wools. It can be done by a simple amendment, providing that wools of all classes in their scoured condition shall be subject to a triple duty.

The PRESIDING OFFICER. The question is upon the amendment submitted by the Senator from Iowa [Mr. ALLISON] in behalf of the committee.

Mr. TURPIE. Mr. President, this is a very important discussion, and I think a quorum of the Senate should be here during the consideration of this subject. I therefore suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Indiana suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Gallinger,	Morrill,	Shoup,
Allison,	Gray,	Murphy,	Spooner,
Bacon,	Hale,	Nelson,	Stewart,
Berry,	Hansbrough,	Pasco,	Teller,
Burrows,	Hoar,	Penrose,	Thurston,
Butler,	Jones, Ark.	Perkins,	Turpie,
Carter,	Lodge,	Pettigrew,	Vest,
Clay,	McBride,	Pettus,	Walthall,
Cockrell,	McEnery,	Platt, Conn.	Warren,
Cullom,	McLaurin,	Platt, N. Y.	Wellington,
Davis,	Mallory,	Pritchard,	Wetmore,
Elkins,	Mantle,	Proctor,	White,
Fairbanks,	Mason,	Quay,	Wilson.
Faulkner,	Mills	Rawlins,	
Foraker,	Mitchell,	Roach,	
Frye,	Morgan,	Sewell.	

The PRESIDING OFFICER. Sixty-one Senators have answered to their names. A quorum of the Senate is present. The question is upon the amendment proposed by the Senator from Iowa [Mr. ALLISON] in behalf of the committee.

Mr. MANTLE. Would an amendment to the amendment be in order?

The PRESIDING OFFICER. The Chair would so rule.

Mr. MANTLE. I suggest an amendment to the amendment of the committee. In lieu of the committee amendment, in line 21, after the word "second," insert "and third" and strike out the word "and;" so that it would read:

And the duty on wools of the first, second, and third classes which shall be imported scoured shall be three times, etc.

The PRESIDING OFFICER. The Chair would suggest to the Senator from Montana that that is not properly an amendment to the amendment proposed by the committee, the committee amendment being simply an addition to the paragraph.

Mr. MANTLE. The purpose of the committee amendment is to put a treble duty upon scoured wools of the third class, provided they contain less than 8 per cent of dirt. The amendment I propose strikes out the qualification as to the per cent of dirt.

Mr. PLATT of Connecticut. Is that in order?

The PRESIDING OFFICER. The Chair would rule that it is not in order, and would venture to suggest to the Senator from Montana that if the committee amendment should be adopted he might then move a substitute for the paragraph so as to embrace his view. But the Chair would rule that his amendment to the amendment is not now in order.

Mr. JONES of Arkansas. What is the proposition of the Senator from Montana?

The PRESIDING OFFICER. The amendment proposed by the Senator from Montana will be stated.

The SECRETARY. It is proposed, in line 21, page 115, paragraph 353, to insert the pending amendment, and after the word "first" strike out "and," and after the word "second," in the same line, to insert the words "and third;" so that it shall read:

On wools of the first, second, and third classes which shall be imported scoured shall be three times the duty, etc.

Mr. BURROWS. What is the difference between that and the amendment which has been offered? Does it not accomplish the same thing?

Mr. PLATT of Connecticut. There is a very great deal of difference.

Mr. BURROWS. I asked to ascertain the difference.

Mr. PLATT of Connecticut. The difference is that if the same definition of scoured wools in the bill is applied to the third class that is applied to the first and second, it will prevent the importation of a single pound of third-class wool. The bill provides that wool washed in any other manner than on the sheep's back or on the skin shall be considered as scoured wool. Now, all or most of the wools of the third class come in now having been subjected to some degree of washing other than on the sheep's back or on the skin. If no amendment were offered, and they were subject to a triple duty, they would all come in under the definition given to scoured wools in paragraph 354; and to impose a triple duty upon these wools in the condition in which they are now imported would be simply to prohibit their importation and to shut up every carpet factory in the United States.

The Senator from Montana can not wish to do that, certainly. The object of the committee is to make a definition for scoured wool of the third class which will prevent those wools from being thoroughly scoured and cleaned abroad and so imported at the 4 and 7 cent rates of specific duty. I trust I have made myself clear.

Mr. JONES of Arkansas. But if the Senator from Connecticut will permit me, does not the amendment of the committee propose to levy the same tax on these wools not thoroughly scoured that would be imposed on them if thoroughly scoured, under the succeeding section?

Mr. PLATT of Connecticut. No, sir. The amendment of the committee does not propose to subject them to the triple duty unless they shall be so far scoured that they are suitable for carding and spinning or unless they shall have been so far scoured that they do not contain over 8 per cent of impurity.

Mr. JONES of Arkansas. Under the succeeding paragraph they would not be subjected to the triple duty unless they had been scoured.

Mr. PLATT of Connecticut. The committee proposes to amend the next paragraph so that in line 3 it will read:

Wools of the first and second class washed in any other manner than on the sheep's back or on the skin shall be considered as scoured wool.

It does not propose to change the definition of scoured wools as to first and second class wools, but only with regard to third class.

Mr. JONES of Arkansas. Then, if I understand the purpose of the committee, it is, with the amendment proposed to be made hereafter, to define as scoured wools wools which have not been scoured.

Mr. PLATT of Connecticut. It is to define wools of the third class which have been commercially scoured so that they are fit for use.

Mr. STEWART. The operation of that would be to allow wools which were scoured, approximately, much cleaner than the ordinary unwashed wools, to come in on the same level with the other.

Mr. PLATT of Connecticut. I do not think any woolgrower, if he agrees to the rate of 4 and 7 cents a pound upon third-class wools, objects to the importation of wools as they are now imported of the third class at that rate, but the fear is that if we do not impose some provision whereby if scoured commercially they shall pay an additional duty, a triple duty, they will come in as scoured wools, commercially scoured, very greatly increased in value and practically ready for use, and only pay 4 and 7 cents a pound, as imposed in this bill. It is to obviate that, to make sure that hereafter there shall not be such a change in these wools in the state in which they are imported that they shall evade the duty which we put in the bill of 4 and 7 cents a pound.

Mr. MANTLE. Mr. President——

The PRESIDING OFFICER. The Senator from Arkansas is entitled to the floor. Does he yield to the Senator from Montana?

Mr. JONES of Arkansas. Certainly.

Mr. MANTLE. I will say to the Senator from Connecticut that I have no desire to close up the carpet manufactories, nor have I the slightest apprehension that the operation of my amendment would bring about that result. The slight additional cost which would result to them upon a certain line of carpet certainly could not have any such wholesale and disastrous effect as to close up their business. The provision which I propose to insert is that of the law of 1868 and 1883, and which was superseded by the ad valorem duties in the McKinley law. The great bulk of carpet wools until 1890 came in under those provisions with triple duties upon scoured wools, and they came in at a valuation below 12 cents a pound. The valuation, in fact, was 10.1 on third-class wool from 1884 to 1890; that is, for the great bulk of them. A very small amount came in above 12 cents a pound with a specific rate of duty of 5 cents a pound.

During the three years of the McKinley law 90 per cent of all the carpet wools imported, and they have grown enormously in amount, came in at the valuation of 8½ cents per pound without any restriction as to scouring or washing, under a straight ad valorem duty. Ninety per cent of them came in at the valuation of 8½ cents per pound. There can be nothing which could indicate more clearly what the effect of this would be in operation. Under the provision submitted by the committee of a fine of value of 10 cents, it is absolutely certain, in the light of past experience, that the great bulk of third-class wools of all kinds will come in at an average value of less than 10 cents per pound. They have come in before, and they will come in again.

Now, if it is possible to save any part of that fraud, for it is a fraud, as the value of a great many of them is more than that in the market in which they are bought, by imposing a straight duty of three times upon scoured wool of the third class, it certainly ought to be done. There is an element of the protective policy in this proposition, although it is denied by the wool manufacturers. As a matter of fact, there is a good deal of carpet wool grown in this country, and if the protective theory is extended to this class of wool there can be a great deal more of it produced. In any event these third-class wools, and especially those of the higher grade, supplant to a very great extent the use of domestic-grown wool, and that is another good reason why the duty should be increased. As a matter of fact, with the amendment just submitted by the committee, I venture to assert that there will be scarcely any, perhaps no third-class wool which will come within the scope of that provision. In other words, the shrinkage of all the third-class wool which comes to this country will be more than 8 per cent.

Mr. JONES of Arkansas. Mr. President, if I understand the

amendment, it seems to make a very radical departure from what has ever been the law heretofore as to carpet wools, third-class wools.

The duty on wools of the third class, if imported in condition for use in carding or spinning into yarn, or which shall not contain more than 8 per cent of dirt or other foreign substance, shall be three times the duty to which they would otherwise be subjected.

The theory upon which the compensating duties are levied in the tariff is certainly that a larger amount of raw wool is consumed in the manufacture of the fabric than is bought. That is to say, when a compensating duty equivalent to 2 pounds of raw wool is provided, it certainly is done on the theory that it requires 2 pounds of raw wool to make 1 pound of wool in the condition in which it is used. This is the only ground upon which any defense of the compensating duties can be placed. The theory must be, and it is constantly reiterated, that it requires 3 pounds of unwashed wool to make a pound of scoured wool—of wool in condition to go into the fabric. If, as a matter of fact, it does not require 3 pounds of the one to make one of the other, there is no justification for placing the compensatory duty of three to one in the bill. If it does not take two to one, there is no justification for a compensatory duty of two to one.

The very terms of the amendment preclude the possibility of its taking 2 pounds of this wool to make 1 of fine wool, because it specially provides that if there is more than 8 per cent of foreign substance in it, then there shall be a tax of three times the tax which would otherwise be levied. So when a hundred pounds of this wool comes in, if there are 92 pounds of wool and 8 pounds of dirt, then the amendment will allow of the charging of three times the rate of taxation levied on ordinary raw wool, to compensate for the degree of fineness at which the wool has arrived when imported. It is impossible that it shall take a pound and a half of wool in this condition to make a pound of fine wool, and yet the proposition is to charge three times as much for the importation of the wool, on the theory, of course, that it would require three pounds of this wool to make a pound of that wool.

Mr. President, there are some criticisms in the Bulletin of the National Association of Wool Manufacturers, from which my friend the Senator from Delaware read a few moments ago, on the question of skirting wools, which apply specifically and expressly to this very question. This is written by an expert in the woolen business, and of course what he says will be accepted by the Committee on Finance as being absolutely true. He is a trusted friend of theirs. They rely on him in all these matters. They follow his judgment in all these questions. Here is what he says about the question of skirting wools, and it applies with equal force to the question of compensatory duties:

It has been stated before your committee that the skirting of Australian wools is a fraud, resorted to for the purpose of evading the American tariff. Nothing could be farther from the truth. Skirting marks a distinct advance in the preparation of wool for the markets of the world, and has been done for many years in response to the demand of manufacturers in England and on the continent of Europe. Practically all Australian wools are now skirted before shipment. Progress in methods of preparing wools for the market is no more to be prevented or deprecated than progress in the mechanical methods of their manufacture. The objection of the American woolgrower to skirting springs primarily from his unwillingness to put up his clip in proper marketable condition. In this particular he has made no advance in thirty years. On the contrary, his wools, as marketed, grow heavier and dirtier. Fifteen years ago our fine washed wools lost in scouring 48 per cent, and sometimes less. The average present loss in Ohio and Michigan wools is nearer 55 per cent. They are so poorly washed that they shrink as much as Australian wools, unwashed and unskirted.

Mr. WARREN. Will the Senator from Arkansas allow me for a moment?

Mr. JONES of Arkansas. Certainly.

Mr. WARREN. The writer from whom you quote states that fifteen years ago our fine washed wools lost in scouring 48 per cent. For the benefit of the Senator from Delaware [Mr. GRAY] and in reference to his remarks a few moments ago, I wish to make a note of that to show the difference between washed wool and scoured wool. I will say further, while I am on my feet, that in carpet wools the compensatory duty is based, I assume, just as it is upon first and second class wool, i. e., upon wool in the grease. They have taken wool in grease as the unit of value, so to speak. The three times duty is based upon wool in the grease, and not scoured.

Mr. JONES of Arkansas. The reason why you charge twice for washed wool what you charge for wool in the grease is upon the theory that it takes 2 pounds of one to make a pound of the other; that there is 50 per cent of foreign substance in the wool which has to be washed out of it; and the theory upon which you charge three times the rate on scoured wool that you do upon wool in the grease is that it consumes 3 pounds of greasy wool to make a pound of scoured wool. But when I show that there is absolutely no foundation for this theory, that it does not take 3 pounds to make 1 pound of scoured wool, that it does not take a pound and a half to make a pound of scoured wool, that it does not take a pound and a quarter to make a pound of scoured wool, under this provision what justification can there be for tripling the rate of tax on the raw wool?

Mr. WARREN. The Senator has not shown that.

Mr. JONES of Arkansas. The amendment itself shows it. The amendment provides that where wool is in a condition so that it does not contain more than 8 per cent of grease, 8 per cent of dirt or foreign substance, then the rate shall be triple what it is in the grease.

Mr. MANTLE. Will the Senator from Arkansas permit me?

Mr. JONES of Arkansas. Certainly.

Mr. MANTLE. I desire to state that in my own opinion there is no just or proper relation between the duties upon washed and unwashed wool. I do not believe that the washing of wools increases their value double. Just why that provision was originally included in the law I do not know. However, there is no second-class wool imported in unwashed condition. So it is practically a dead letter upon the books. The second-class wool all comes in in washed condition, because of the strange and inconsistent fact in the law that there is no additional duty upon washed wool of the second class, which there ought to be.

Mr. JONES of Arkansas. I think the Senator from Montana is right when he says there is no practical relation between the conditions existing and the theory on which the law seems to have been framed. What could have been the justification for providing for a double tax on washed wool except on the theory that it takes 2 pounds of unwashed wool to make a pound of washed wool? There could be no reason for it except that. The belief must have existed when that provision was made that that was the fact. It may have been the fact at the time, but it certainly is not true now, and if it is not true there is no justification for doubling the tax because wool has been washed.

The very same argument applies to scoured wool. The only theory which will justify the imposition on scoured wool of three times the duty on greasy wool is that it takes 3 pounds of wool in the grease to make a pound of scoured wool. We know it is not a fact; that it does not do it.

Mr. MANTLE. I will have to differ with my friend the Senator from Arkansas on the proposition of scoured wool. It is generally conceded that wools of the Merino breed in this country shrink 66⅔ per cent. Many of them shrink much more. Montana merino shrinks more. Generally the far Western wools of that character shrink more. Combing wools there produced shrink less. It is a fact that the general average of merino wools shrink about 66⅔ per cent, which would give 33⅓ per cent of scoured wool. Therefore it would take exactly 3 pounds of unwashed, greasy wool to make 1 pound of scoured wool. So I think the proposition of three times is correct, but I do not think that the same relation is true between unwashed and washed wools.

Mr. JONES of Arkansas. If we were to import the wools that come from Arizona and Montana and New Mexico, what the Senator from Montana says would be true, but we do not import those wools; they are grown in this country; and we import no such wools from abroad. The wool generally imported here, the class of merino that comes to this country, is Port Phillip wool, from Australia. It is very much the larger part of the wool that comes in. It is the same wool which enters into consumption all over this country, and that wool shrinks 50 per cent. It is a recognized fact everywhere, and I presume it will not be denied by anybody who knows anything about this trade, that the shrinkage of Port Phillip wool is two for one, and not three to one, from grease to scoured.

Mr. MANTLE. Will the Senator permit me?

Mr. JONES of Arkansas. Certainly.

Mr. MANTLE. The Senator is absolutely correct in that proposition, and it sustains the argument I made for a correction of the law. Of course I am looking at this matter from a protective standpoint and the Senator from Arkansas is looking at it from an entirely different point of view. The protective duty is levied upon the shrinkage of domestic wool, and of course when the importer brings in a wool which shrinks less than 66⅔ per cent in competition with class 1 wools raised in this country, he becomes the beneficiary of the difference, because by bringing in a lighter wool he evades the payment of that much duty. Thereby, according to my contention and my point of view, the American producer is injured and deprived of his protective benefit to the extent of one-third to one-half. The Australian wools shrink, in their skirted and what is oftentimes practically sorted condition, 50 per cent. Many of them shrink less than that, as low as 44 and 46 per cent.

Mr. JONES of Arkansas. If the Senator is correct in stating that it is the theory of protection that the compensation should be made in proportion to the shrinkage of American wools, then protection has another iniquity with which I never charged it heretofore. My impression has always been that whenever there was provision made for a tax upon any grade of wool in the grease and a provision that there should be a double tax on washed wool of that variety, it was because of the theory that it took 2 pounds of wool in the grease to make 1 pound of washed wool,

and when there was a threefold duty placed upon scoured wool, it was on the theory that it took 3 pounds of wool in the grease to make 1 of scoured wool.

There can be no justification in common sense that does not rest upon that theory. Now, when you are providing for the importation of Port Phillip wool, and provide that the proper tax upon it is 8 cents or 10 cents or 11 cents or 15 cents or 24 cents in the grease, the proper tax to levy upon a pound of scoured Port Phillip wool would be twice what the tax would be in the grease, because it takes just 2 pounds of wool in the grease to make 1 pound of scoured.

Mr. STEWART. Will the Senator allow me? I wish to get some information.

Mr. JONES of Arkansas. Certainly.

Mr. STEWART. Do not scoured wools always shrink more than 8 per cent? Scour any wool, and will not there be a larger shrinkage than that?

Mr. JONES of Arkansas. If the wool to be imported under the amendment as in the bill contains less than 8 per cent of foreign substance, to scour it will not decrease it 8 per cent. It depends upon how much foreign substance there is in it.

Mr. STEWART. Does the Senator from Arkansas know of any that will not lose more than 8 per cent?

Mr. JONES of Arkansas. I do not know of any; that is, wool that has not gone through any process.

Mr. STEWART. The Senator does not know of any?

Mr. JONES of Arkansas. No.

Mr. STEWART. That is my difficulty about it. In the first place, the provision in the bill is that it shall be 4 cents a pound if the value is under 10 cents. Of course the value will be under 10. It was before, under the McKinley Act. That is certain. So there will be no third-class wool that will be taxed higher than 4 cents a pound, and then it will be a very high grade of wool, because if it has more than 8 per cent of dirt in it, then it can come in at 4 cents. He can scour it and then have that amount of dirt in it very easily, and it would be very high grade wool and would come in at 4 cents, and it will come in.

Mr. WARREN. The price of scouring is a cent and a quarter a pound under the most favorable conditions.

Mr. STEWART. A cent and a quarter a pound? You get your wool in at 4 cents here and you will practically have scoured wool with only 8 per cent of dirt. That is the trick of this thing. You fix this up, and when you come to put it into practice you will have, as you did under the McKinley Act, really no practical benefit to the sheep growers of the West. I do not expect to get a measure that will be of any practical benefit to the sheep growers of the West. I should like to see some straight work about it. If you put a duty of 7 cents on third-class wool, it might do some good. Now you get only 4 cents. Under the McKinley Act, if you will look at the schedule, look at the prices, you will see that it fell below 10 cents, because they had an ad valorem duty. It came in that way, and the farmers all complained that they got practically no protection under the McKinley Act. It is denounced now by all the farmers of the country as having been of very little use, and the price of wool continued to fall, as everything else did under the McKinley Act.

Mr. GEAR. Wool was 20 cents a pound in Iowa when the Wilson bill passed, and it fell after that time.

Mr. STEWART. Did it not fall under the McKinley Act, and has it not been getting lower?

Mr. JONES of Arkansas. Mr. President, the question asked me is running at a considerable length.

The PRESIDING OFFICER. The Senator from Arkansas is entitled to the floor.

Mr. PLATT of Connecticut. Will the Senator from Arkansas allow me a moment?

Mr. JONES of Arkansas. Certainly.

Mr. PLATT of Connecticut. I wish to say a word in reply to what the Senator from Nevada has said. I do not suppose, when he says this is a trick, that he intends to impute any motives of trickery to anyone who has been engaged in the preparation of the bill.

Mr. STEWART. No; not at all.

Mr. PLATT of Connecticut. I want to say, in reference to the amendment which the committee has offered, that the object of that amendment is to prevent the introduction of scoured wool under the 4 and 7 cents duty proposed on third-class wool. It had to be prepared in haste this morning, and by persons who are not experts. I assure the Senator from Nevada that the intention to do that is an honest intention, and if this language will not do it, we shall endeavor hereafter to put the amendment in such form as that it will do it.

Mr. STEWART. I simply wish to say that of course I do not reflect upon the Senate committee, but the experts connected with the woolen trade and the manufacturers know how to take care of themselves better than any other class of people who ever lived. They were raised at it, they live by it, and they take care of themselves. The farmers are not here to take care of themselves. The manufacturers can impose upon the committee, they can deceive, and they will generally get language put in which will bring about a different result from what we anticipated. I think that will be the case with the language proposed here by the committee.

I do not reflect on the committee, because they get the very best information they can; but the experts at their elbows, the brightest of all human beings and the sharpest ever born on earth, know how to fix it. A fellow who plays three-card-monte would not begin to stand with them at all. A three-card-monte sharp would not have any show with these fellows who have lived all their lives in this business. They are here, and the farmers are not here. As it turned out before, when the bill was passed, the farmers had the worst of it. I am afraid it will be that way this time. It is not that the committee intends to do it, but the committee will be deceived if it is done.

Mr. JONES of Arkansas. I will not trouble the Senate to hear it read, but will have printed in the RECORD a table showing the shrinking qualities of the different classes of wool which are generally in use. The first one is, of course, Port Phillip, and all others are made up from trade tables, which I believe are reliable, and which show the condition of this theory.

The PRESIDING OFFICER. Without objection, the table will be printed in the RECORD.

The table referred to is as follows:

Statement of the average prices of the different classes of foreign greasy wools entered at the port of New York, with the average percentage of shrinkage in scouring, their equivalent price in the scoured state, and the number of pounds of greasy wool necessary to make 1 pound of scoured wool.

Description of wools.	Price per pound grease.	Shrinkage in scouring.	Equivalent price scoured.	Pounds of greasy to pound scoured.
Merino wools—class 1:	*Cents.*	*Per cent.*	*Cents.*	*Pounds.*
Port Phillip	18	50	36	2
Sydney	16½	52	34.4	2.083
Adelaide	14	55	31	2.20
New Zealand	16	53	34	2.125
Cape of Good Hope	11½	57	26.75	2.32
Montevideo	10½	58	25	2.38
River Plate and mestiza	8½	65	24.3	2.86
Crossbreds—class 1:				
Port Phillip	18½	40	30	1.66
New Zealand	18	37	28.6	1.59
Montevideo	14½	47	27.4	1.88
Carpet wools—class 3:				
Donskoi	9	55	20	2.20
Valparaiso and Cardova	10	52	20.8	2.083
White Highland	12	40	20	1.66
Oporto	7	65	20	2.86
Syria	8	55	17.8	2.2
China	8	45	14.6	1.82
Smyrna	9	52	18.75	2.083

Mr. JONES of Arkansas. When Judge Lawrence appeared before the Ways and Means Committee of the House, he said that we in this country grow the best wool in the world. It is a recognized fact everywhere that the wool which comes in competition with our wool is the Australia wool. That wool has to come half around the globe and incur the risks in transportation of storm and fire, and the expenses necessarily connected with such transportation.

Mr. GEAR. Can the Senator state what it costs to bring foreign wool from Australia to New York City?

Mr. JONES of Arkansas. Whatever it may cost, it has to be brought from Australia to this country before it can enter into competition with what Judge Lawrence assures us is the best wool in the world. If his statements are true, then there can be but one or two reasons why that wool shall come here and go into this market at all. One is, that there is not a sufficient amount of wool grown in this country for the consumers. The other is, that the Australians are willing to sell their wool, after paying the expenses of transportation, incurring the risks of transportation and delivering it in our market, for less money than we have to pay our own woolgrowers for their wool, and it must be sufficiently under the price of American wools to make up for the difference in the quality of the wools or else it would find no market at all.

With the natural protection we have, it seems to me that it ought not to require a very exorbitant rate of taxation to prevent the importation of this class of wool; and yet the tax which this committee proposes, the tax which the House proposes, is 100 per cent on this article, on this raw material, which must be handled by our manufacturers before it can enter into this class of manufacture at all.

Mr. WARREN. May I ask the Senator a question?

Mr. JONES of Arkansas. Certainly.

Mr. WARREN. To what natural protection does the Senator allude?

Mr. JONES of Arkansas. The natural protection of bringing wool half around the globe, of preparing it for shipment, of baling

and packing it so that it can be transported. It must be packed in hydraulic presses which require a considerable amount of labor and power. It must be loaded on shipboard, and it must be brought half around the globe. It must be discharged and presented in the American market before the American buyers will want it.

Mr. WARREN. Owing to the cheapness of ocean transportation, all that is done at a cost of but a fraction of what it costs to freight wool by rail from the interior of the United States to the manufacturers of wool in this country.

Insurance, railroad transportation, pressing and handling, etc., cost in this country two or three or even four times as much as to transport by sea from foreign ports. So there is no natural protection, but it is quite the reverse.

Mr. JONES of Arkansas. I presume the Senator would have some argument to prove that the transportation of Canadian wools would also cost very much less than would the transportation of our own wools. Whatever points of this sort are made, a shrewd and ingenious man will be able to find out some causes for the difficulty with which he has to contend.

But, Mr. President, the naked fact stares us in the face that we are proposing a tax of 100 per cent on a raw material which must enter into the manufacture of a class of goods which must be used by all of the 70,000,000 of our population. It is an absolute necessary of life. From the cradle to the grave it has to be used, all classes of people everywhere must have it, and you can not increase the cost of the raw material that enters into the manufacture without proportionately increasing the cost of the manufacture. So you are levying a tax, you are putting a burden upon the masses of the people of the country, men, women, and children, old and young, and for what purpose?

The chairman of the Ways and Means Committee of the House, in making a statement about the effect of the bill as he proposed it, stated that roughly the amount of revenue to be raised from the tariff on wool and woolens would be $67,813,013. He estimated that $87,000,000 would go into the Treasury as the result of the tax on raw wool and the manufactures of wool. Here is an enormous amount of money to be raised on an absolute necessary of life. What is the purpose in levying that tax of $67,000,000? Is it for the purpose of raising revenue? Judge Lawrence, the man who stood for the woolgrowers in insisting on this tax being levied, said plainly and distinctly that it was his purpose to exclude wools, to prevent them from coming into the country; that it was not for the purpose of revenue at all; that he had no such intention. I presume when the committee, although they did not follow his wishes to the full extent, levied a tax amounting to 100 per cent, their purpose was not one of revenue, but it was one of protection.

Mr. WARREN. Mr. President——

Mr. JONES of Arkansas. If the Senator will pardon me until I finish this statement, I wish to call the attention of the Senate to the fact that when we propose to levy a tax on wool and woolens of $67,000,000, Judge Lawrence himself stated that the value of all the sheep in the United States at this time is a fraction over $61,000,000. Yet we are to have an annual tax levied upon the men, women, and children of this country amounting to $67,000,000 for the purpose of protecting $61,000,000 worth of sheep all over the country, in the sagebrush deserts of the West——

Mr. GEAR. I wish to suggest one fact to the Senator from Arkansas. When the so-called Wilson bill was passed we had 47,000,000 sheep in this country, worth $125,000,000. At the present time that number has declined to 38,000,000 sheep, worth $61,000,000.

Mr. MILLS. And the very next year after the Wilson bill was passed, as is shown in the official report, 309,000,000 pounds of wool were sheared from sheep in the United States—the most wool that ever had been sheared in the United States.

Mr. GEAR. And at the same time we imported 47½ per cent of our wool, wool that should have been grown in America.

Mr. MILLS. It was all used up by our manufacturers, and gave employment to our people in the United States.

Mr. WARREN. I ask the Senator from Arkansas to yield but a moment. I assume the Senator does not want to make an untruthful or unfair statement. He has made a statement here that the carpet wools under this bill are to be taxed 100 per cent. Is that correct?

Mr. JONES of Arkansas. Yes.

Mr. WARREN. I have in my hand the current market rates of wool for Saturday, June 19, and I ask that they may be read at the desk.

Mr. JONES of Arkansas. I do not want a newspaper article read in my speech. I am willing to yield to any reasonable interruption, but I object to having a newspaper article injected and read at the desk. The Senator can have his own time when I get through, and read as many of those things as he chooses.

Mr. WARREN. I will not embarrass the Senator further. Facts are stubborn things to get around, and the Senator is in a close place, I admit.

Mr. JONES of Arkansas. You provide yourself for a tax of 4 cents on carpet wool, and I have stated what the tax on carpet wool would be.

Now, Mr. President, before the Senators interrupted me I was endeavoring to call attention to the fact that we were providing, according to Mr. DINGLEY's statement, for the levy of $67,000,000, levied every year, which was intended to go into the Treasury, and which was to protect $61,000,000 worth of sheep, and that the wool clip from those sheep each year was worth $20,800,000. So the American people are to be saddled with a burden of $67,000,000 a year to increase the price of $20,000,000 worth of wool owned by a handful of American citizens.

Mr. MILLS. And the capital was yielding 33 per cent.

Mr. JONES of Arkansas. And, as my friend the Senator from Texas states, the capital yielding nearly 30 per cent. In view of this statement, will anybody doubt the truth of Judge Lawrence's statement when he said more than once before that committee, "It is protection that we are after?" He certainly meant what he said when he declared that it was protection the woolgrowers are after.

When the taxes are levied upon raw wool and the $17,500,000 which Mr. DINGLEY estimated would be put into the Treasury yearly on raw wool is paid by the manufacturers, everybody in the Senate and in this country knows that when the manufacturers spin that wool into fabrics, the price of those fabrics must be increased by this amount of money at least in addition to the profit in the business which must come into the account. They will at once, and without any hesitation, add the total amount of the tariff paid, and nobody will question the right of the men in a business way to add to the price of the fabric the cost of the material. The $17,500,000 is a part of the cost of the raw material; they have to pay it: they are out that much money, and when they make their goods, it must increase the price of the goods. And when this additional tax increases the value of American wool in the same proportion, you begin to see to what point the tax goes and how Judge Lawrence was gratified in being after protection.

About two-fifths of the wool consumed in the United States, on an average, is imported; about three-fifths is domestic wool. Whatever the tariff may be on wool is intended to increase the price of wool by just so much as the tariff puts on. If the price of foreign wool is increased to the manufacturers by $17,500,000, if two-fifths of the wool consumed costs the manufacturers $17,500,000 more than it would cost before the passage of the bill, then there must be the three-fifths costing between $25,000,000 and $26,000,000 more. So here is the tariff, a tax put upon the manufacturers and charged on the product, to be ultimately paid by the people—$17,000,000 going on the raw wool that comes from abroad, and $25,000,000 to $26,000,000 being paid upon the domestic wool; $17,000,000 going into the Treasury, and between $25,000,000 and $26,000,000 going into the pockets of the woolgrowers—a tax levied for a private purpose, a tax levied by the power of the Government on the consumers all over the country to swell the private fortune of the men engaged in this industry; an exercise of power which this Congress has not; an exercise of power that was never intended to be given to any Congress and which can not be rightfully exercised here now.

Here is an incidental tax of $26,000,000 upon raw wool, while raising $17,000,000 for the Treasury. But that is the raw-wool feature of it, and that alone. We manufacture, according to the census of 1890, about $380,000,000 worth, I believe—possibly it is $320,000,000—of woolen goods in the United States. All these goods have to be increased in price by the increased price of raw wool that the manufacturers consume. When we were proposing to put wool on the free list, I remember that I had a careful estimate made at the time to show how much the burden upon the people would be lightened by putting raw wool on the free list and allowing the tax of 40 per cent on woolen goods instead of the rates that prevailed before. There was then an average of about 45 per cent on the woolen goods. Under the McKinley bill it was 98 to 100 per cent, and the estimate that we made at the time was that there would be a saving to the people of the country of $150,000,000 in the aggregate on woolen goods by the reduction in the amount of the tariff that we paid then.

Mr. GRAY. Every year.

Mr. JONES of Arkansas. Every year. Now we propose to reimpose these high rates, and make them higher than they ever were before in the history of this country. We are to impose the most infamous burden of taxation ever conceived for the purpose of burdening the masses of the people. I have not had the time to go into a full calculation, but I have shown a reasonable inference that the incidental taxation, the taxation for private benefit which goes on the raw wool, will amount to $25,000,000 or $26,000,000 a

year. The increased tax on woolen goods will be infinitely more; I believe it will be $150,000,000 a year, conservatively stated.

Mr. President, when a short time ago we had under discussion Schedule E of the bill and were proposing to raise something like $50,000,000 on sugar, facts and arguments adduced in this Chamber showed that certain interests in this country would receive an incidental benefit by the passage of that schedule which amounted to five or ten million dollars, and that excited the indignation of men everywhere. It was constantly reiterated here that if we did thus and so it would increase the profits of the sugar refiners and the sugar producers one, two, three, four, or five million dollars, they perhaps getting from five to ten million dollars incidental benefit by the levying of $50,000,000 taxes on the people. But here we have a proposition in this woolen tax, $67,000,000 according to Mr. DINGLEY's account, which will result in a tax on the people, which does not not go into the Treasury, of not less than $150,000,000 a year. And yet Senators sit quietly in their seats. The feeling of indignation that one should feel would naturally stir men's hearts, but it seems to make no impression on those who contemplate these enormous taxes.

All through this tariff bill there run provisions which are called compensatory duties which it is proposed to levy. We have not reached that part of the bill, but its iniquities are so completely interwoven with each other that they may as well be taken up one after another. Yes, it is in that part of the bill we are on. Paragraph 353 provides that—

> The duty on wools of the first class which shall be imported washed shall be twice the amount of the duty to which they would be subjected if imported unwashed; and the duty on wools of the first and second classes which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed.

That runs through the bill everywhere. It can only be done on the theory that it will take 2 pounds of unwashed wool, as I have already said, to make a pound of washed wool; and that it will take 3 pounds of unwashed wool or wool in the grease to make a pound of scoured wool. If it does not require that quantity to do it, there can be no justification for this increase of taxation.

I have just sent to the desk to have printed in the RECORD a table which shows that the Port Phillip wool, the wool which all the wool men admit constitutes three-fourths of all the wool we import, shrinks only 2 for 1; that is, 2 pounds of Port Phillip wool in the grease will make 1 pound of scoured wool. Yet we are constantly providing for three times the duty on scoured wool that will be levied on the wool in the grease. Where is the justification for it? Where can any man say it is right? Nobody will deny that 2 pounds of Port Phillip wool in the grease will make a pound of scoured wool. That being the case, if there is any excuse on earth for compensation, the tariff ought to be doubled on scoured wool instead of being made three times what it is on the other.

When we get further along we find that this system continues to climb up. When we go to the item of yarns we find that they provide that the tariff on 1 pound of yarns shall be three and one-half times the tariff on the raw wool of which it is made. On what theory? Two pounds of the raw wool make the yarn. Why do you put a tariff of three and a half times the tax on the raw wool? When we get to the cloth we find that instead of being 2 to 1 or 3 to 1, as it was before, it climbs up higher and higher, increasing the burden of taxation as it goes, and they provide for four times the tax on raw wool for every pound of woolen cloth, on the theory, it must be, that it takes 4 pounds of unwashed wool to make a pound of wool in the cloth. This statement will show, as I have said again and again, that 2 pounds of wool will make 1. But that is not all.

Following it down to ready-made clothing, making it from the cloth into clothing, a man would think there was some great loss in wool somewhere, for the bill provides that there shall be on clothing a tariff for each pound of four and one-half times what the tariff was on 1 pound of unwashed wool. That is not the whole tariff. If it was, there might be some reason for it; but in addition to this, a tariff is put on, as you call it, for compensation, and then in addition to that you levy a tax of 50 per cent ad valorem.

Mr. President, there can be no doubt what all this results in. I have taken the trouble to send and have prepared by a competent man samples of ladies' dress goods, giving their cost in England. The one I hold in my hand [exhibiting] is numbered 1. It is 27 inches wide, it is black luster Orleans, used for making men's summer coats. It is cotton warp and worsted weft. It costs 3⅞ pence per running yard; it weighs under 4 ounces to the square yard. The present duty would be 2.70 cents. Under the Senate bill it will be increased before we get through with it. We have already raised the tax on raw wool 25 per cent above what the Senate committee solemnly told us only a few weeks ago it ought to be.

We have raised it 25 per cent this morning. But taking the same article in the bill, the specific duty is 4.13 cents a yard instead of a total of 2.70 cents under the present law, and in addition to that there is a tariff of 50 per cent, which is 3.37 cents, making a total tax of 7.50 cents instead of 2.50 cents as the difference between the present law and the bill as proposed by the Senate committee. That is the tax, without counting the price.

I hold in my hand a sample of similar goods [exhibiting], cotton warp and worsted weft, costing 3¼ pence per running yard, weighing under 4 ounces to the square yard. Under the present tariff the duty is 3.10 cents; under the bill of the Senate committee the specific duty is 4.13 cents per square yard, and the ad valorem is 50 per cent, or 3.87 cents; making 8 cents tax instead of 3.10 cents per yard on these goods.

I shall not detain the Senate by going over all of these, and Senators who have a desire to look at them may see them here. They are, it seems to me, very instructive.

Then, Mr. President, I have samples of goods used for making men's clothes. The best class of goods of which I have samples here cost $2.90 a yard. It is valued at 12s. 6d. abroad. Under the Senate bill as it at present stands the total tax would be $2.18 on a cost of $2.90, or 75 per cent tax on these high-grade goods.

Then another specimen I have here costs $2.36 a yard, and the total tax is $1.71, making 72 per cent tax on these high-grade goods. But I have frequently called attention to the fact that every Republican tariff always provides for the lowest rate of taxation on the highest priced goods and the highest rate of taxation on the lowest priced goods.

Here are two articles [exhibiting] that cost $2.90 and $2.36, respectively, which are taxed at 72 and 75 per cent. When we come to the lower class of goods, here is an article [exhibiting] that costs 46 cents a yard—a nice grade of goods, but cheaper than the others—and the tax on that is 111 per cent. I have another here that costs 50 cents a yard, and the tax on that is 110 per cent. When we get to one that costs 32 cents a yard, the tax runs up to 128 per cent. Here is another [exhibiting], costing 66 cents a yard, and the tax is 132 per cent. When we get down to an article that costs 22 cents a yard, the tariff changes to 159 per cent; on an article that costs 31 cents a yard, the tariff is 185 per cent.

Mr. GRAY. That is $185 of tax on $100 worth of goods.

Mr. JONES of Arkansas. Yes; $185 of tax upon what costs $100.

Mr. President, three years ago the Congress of the United States in lowering taxation put these goods on the free list. I had printed in the RECORD the other day a table which showed the steadily increasing volume of wool in this country and the number of pounds of wool produced here and retained for home consumption. In 1890 there was produced $275,000,000 worth, and we imported $105,000,000 worth. In 1895, instead of $105,000,000 worth, there was imported $305,000,000 worth, and during that time we produced of the home clip $206,000,000 worth instead of $275,000,000. This shows the change in the amount of wool produced and brought in from abroad.

I have in my hand a table showing the importations, by months, of all-wool woolens and worsted cloths fit for men's wear, the heavier class of woolen goods, which is carefully made up. I desire the attention of the Senate to what this statement shows. In January, 1895, the month that free wool began, there was imported from the United Kingdom $1,666,345.70 worth of these goods. In January, 1896, one year afterwards, there was imported $1,321,766.30 worth, a decrease of nearly $300,000. In January, 1897, there was imported $542,286.01, a steady decrease in the volume of these all-wool woolens and worsted cloths. I will print the table in the RECORD, and I am satisfied that all gentlemen who are interested in this question will be very much impressed in seeing the steady decrease in the volume of these goods imported into this country from England, Germany, France, Belgium, and Austria.

The table referred to is as follows:

Importations of all-wool woolens and worsteds (cloths) entered at the port of New York from January 1, 1895, to May 1, 1897.

Period.	United Kingdom.	Germany.	France, Belgium, and Austria.
1895.			
January	$1,666,345.70	$358,023.18	$133,529.92
February	1,279,270.29	144,523.71	95,171.93
March	1,213,045.83	151,563.12	55,085.05
April	891,951.58	116,410.83	56,534.48
May	891,050.12	95,728.62	30,662.40
June	1,064,807.92	213,954.56	85,719.19
July	1,283,203.11	257,293.33	84,870.41
August	1,235,994.27	194,446.88	63,283.36
September	883,633.40	149,224.64	64,474.31
October	1,303,129.81	100,882.61	38,329.91

April	1,242,409.26	266,959.36	84,140.88
May	981,409.87	216,031.86	54,431.05

Wool consumed in United States:

1894	346,712,000
1895	509,159,000
1896	538,989,000

Mr. ALLEN. Will the Senator permit me a question at that point?

Mr. JONES of Arkansas. Certainly.

Mr. ALLEN. Does not the Senator believe that the constant decrease in the importation of wool and woolen products during the last two or three years is due largely, if not wholly, to the fact that money has been so scarce, its volume so small, and prices so low in this country that there has been practically no market for goods of that character?

Mr. JONES of Arkansas. I fully believe that that accounts very largely for the shrinkage of the volume of goods consumed in this country, and, although the prices were low, although the prices had come down to a level the like of which never had been seen before for such goods, the financial condition of the people was such that they were utterly unable to buy and use and consume these goods. I believe when you succeed in raising the prices of these goods, as it is the intention to do by the passage of this bill, that the result will be a still greater decrease in the quantity of these goods consumed by our people. You can not make the people rich by taxing them, and you can not make them prosperous by making them pay higher prices for what they have to buy without giving them increased facilities for doing so.

Mr. ALLEN. It is said, if the Senator will permit me, that after this bill is disposed of, and next winter we are to revise our currency laws, retire the greenbacks and legal-tender notes and have an inflated national-bank currency, a very large expansion of national-bank issues, and that therefore we shall have more money to purchase goods and the prices will come back.

Mr. JONES of Arkansas. We have been promised prosperity in more ways than one. We have been assured that it was coming, and we have been told that it had come. The information that prosperity had arrived has even gone into the pages of the RECORD of this body since we have been in session, but the people are not deceived by that sort of thing. I am one of those who believe that the people of this country are capable of self-government. I believe that they have sense enough and patriotism enough to know what their rights are, and that they have nerve enough as men to assert those rights, and I believe that the solution of all these questions will come in God's own good time. I believe that all these things have to be gone into and examined as they arise, one by one, and when they have been fully and fairly understood, I believe there will be no doubt about the people of this country doing what they ought to do.

Mr. ALLEN rose.

Mr. JONES of Arkansas. If the Senator will permit me to finish this sentence, one of the strongest characteristics of the Anglo-Saxon people everywhere is conservatism. I believe that the great body of the American people are moved by the same feeling that inspired Davy Crockett when he said, "Be sure you are right, and then go ahead." I believe what our people first want to know is that there is no mistake about the course they ought to pursue, that it is the proper thing, that it is right, and then I believe they have manhood enough to carry it out.

Let them try this bill, if the friends of the measure of high protection are sufficiently strong in this body to put it upon the statute book, but when it has become the law of the land and the promised prosperity fails to come, as I am sure it will fail to come, then the question will be asked at once of these gentlemen, "You promised us prosperity by the passage of the tariff bill, and what do you propose to do now? How do you propose to give us prosperity now?" The people will be doubtful in their belief of what is promised them because of the failure at this time.

Mr. ALLEN. With the permission of the Senator, I should like to make this suggestion, that our Republican friends propose to bring about prosperity by international bimetallism, and they have already started by appointing a commission to go to Europe to negotiate. What does the Senator say as to the probability of that being a means of bringing prosperity?

Mr. JONES of Arkansas. Mr. President, I am a firm believer in bimetallism. I believe that prosperity will follow its adoption, and I look forward with pleasure to its coming from any source it may. If the efforts made by the present Administration are sufficient to bring it about, I will be thankful when it shall come. I confess that I have no faith that it will come in that way. I believe that Great Britain will stand like a lion in the path. We have been told again and again that it is to the interest of Great Britain to have payments made in gold. We know that when the interest upon the debts that we owe to Great Britain and when the interest upon the debts that are due to Great Britain from Australia, from South America, and from the Capes is paid that it will require twice as much of the fruit of the labor of those men to pay a given amount of interest as it did when the debts were contracted.

A narrow, selfish view would be that this would be beneficial to her. She shuts her eyes to the fact that the man who killed the goose that laid the golden egg did not advance his own interest. When the failure of the Argentine Republic to meet its obligations absolutely wrecked it financially, the losses that were entailed upon British capitalists were such as to shake her financial system to its foundations. If she continues to press the advantage she has in this country and in Australia until prices are lowered so that the same thing takes place here, the result will be that, instead of paying tribute of all we possess, of turning over all that the labor of these people is able to make to liquidate her debts, there will be destruction of the principal as well as of the interest, brought about by her own rapacity.

Mr. President, we have recently witnessed a spectacle in the East that ought to satisfy all of what we are to expect. We have seen Christians in arms struggling for life and liberty and for the right to govern themselves against the infidel Turks, and we have seen Great Britain, in defiance of public sentiment, in utter disregard of the traditions and history of her own people, standing on the side of tyranny and oppression and wrong rather than on the side of Christianity and right. It shows her course was inspired by the reason that was given in this very aisle by the junior Senator from Massachusetts [Mr. LODGE] when he said that the value of the Ottoman bonds would determine the course of Great Britain in that struggle. Great Britain will look after her own selfish interests; she will do as she has done in the past, until the time shall come when the American people are ready to say, "We are willing to do right, and we intend to do right; we shall be glad to have Germany, France, and Great Britain join us in an effort to do right; but whether they go or not in the right direction, we appeal to high Heaven and the sense of right which inspired our fathers a century ago, and we will go forward and do what the best interests of this country and of mankind require."

I have in my hand a table of the imports of manufactures of wool and cotton, goat hair and cotton, and other mixed goods, showing the quantity imported each month since the woolen schedule under the Wilson law went into effect down to last month. It makes an astonishing showing. I shall not detain the Senate by reading it now, but I shall insert it in the RECORD as showing what the effect of the lower rate of taxation on woolen goods has been.

The PRESIDING OFFICER. Without objection, the table will be inserted in the RECORD.

The table referred to is as follows:

Importations of manufactures of wool and cotton, goat hair and cotton, etc. (cloths), entered at the port of New York from January 1, 1895, to May 30, 1897.

Period.	United Kingdom.	Germany.	France, Belgium, and Austria.
1895.			
January	$216,797.88	$32,055.89	$30,520.80

May	665,775.27	133,014.88	74,101.31

Mr. JONES of Arkansas. I also have a table showing the value of woolen dress goods, women's and children's, imported into the United States for the three years 1895, 1896, and 1897, which is equally interesting with the other, and which I am sure Senators will find interest and profit in carefully examining.

The PRESIDING OFFICER. Without objection, the table referred to will be inserted in the RECORD.

The table referred to is as follows:

Imports of dress goods, women's and children's (wool), into the United States.

Month.	1895.	1896.	1897.
January	$2,918,548	$2,406,971	$1,452,946
February	2,022,933	2,367,229	1,007,535
March	1,851,647	1,334,572	1,109,040

Imports of raw wools, May, 1897.

Class I	26,865,080
Class II	4,778,323
Class III	12,300,282

Mr. JONES of Arkansas. Mr. President, the wrongs I have pointed out in this bill and in the system it proposes are not all that are proposed, and while I am summing up some of the iniquities of this bill I will call attention to some others. As a sample, I will read the first few lines of paragraph 365:

365. On blankets, and plain flannels, composed wholly or in part of wool, valued at not more than 40 cents per pound, the duty per pound shall be the same as the duty imposed by this act on 1¼ pounds of unwashed wool of the first class, etc.

I desire to call especial attention to the fact that I have pointed out to the Senate already that whenever there is a pound of goods made in each process there shall be a tax of four or four and one-half times the tax on the raw wool that enters into the goods, on the theory, of course, that it takes 4½ pounds of raw wool to make a pound of cloth. I have shown you how monstrous that was. I have shown that 2 pounds of unwashed wool will make a pound of scoured wool, and that will go through the balance of the operations of manufacture practically without loss, and that these provisions for the imposition of three, and four, and four and one-half times the tax on scoured wool as compensation for the manufactured product is an effort to compensate people for money they do not pay out, and it is not just or fair.

But there is another thing you will notice. Go to the flax schedule, for instance, and you will find a provision levying a tax on articles composed wholly of jute or of flax, or of which these are or either of them is the component material of chief value, so that if jute or flax shall constitute less than one-half the value of the article, they shall pay the tax on the other article and not on the jute and flax. Our friends on the other side do not propose to levy the taxes in the woolen schedule in that way. They do not propose to levy these compensatory duties in proportion to the amount of wool absolutely entering into the manufacture of cloth; but they provide:

365. On blankets, and plain flannels, composed wholly or in part of wool, valued at not more than 40 cents per pound, the duty per pound shall be the same as the duty imposed by this act on 1¼ pounds of unwashed wool of the first class, and in addition thereto 30 per cent ad valorem.

These goods may be composed of nine-tenths cotton and one-tenth wool, and yet the compensatory duty is three times the tax on 1 pound of the wool that is used in the manufacture of the fabric—not in proportion to the wool that is in the fabric, but three times its whole weight, whether it is flax or silk or cotton or what not, it makes no difference. When that paragraph is reached, I propose to offer an amendment to provide that this wool compensation shall be in proportion to the wool that enters into the composition of the fabric; that if it is one-half wool, the compensation shall be made for the wool that is in it; if it is all wool, that they shall have twice as much compensation; but if it is one-fourth wool, they shall have compensation for the amount of wool actually in it, and not compensation for the pound of cotton that is put in each pound of wool, and then charge three times the amount levied upon the wool as compensation for this tariff.

In this connection, Mr. President, it may be well to call attention to another thing. I mentioned in the Senate some days ago, when I made some remarks on this subject, that here is a provision to levy these taxes of two, three, four, and four and a half times the rate on the raw wool to compensate the manufacturer. This is upon the theory that the wool has paid the tariff; that, for instance, on a suit of ready-made clothing, for each pound that has been used in the manufacture of it, 4½ pounds of raw wool have been used, and that the tax has been paid upon that 4½ pounds of raw wool.

I wish to call attention to the fact that there is undoubtedly at this time in this country, already imported, wool enough to run our woolen mills for the next twelve months. There is no justice and no fairness in allowing a compensation to woolen manufacturers for a tariff on wool which has come in without paying any tariff at all.

In 1893, when we were undertaking to frame a tariff bill, the woolen manufacturers came before the Committee on Ways and Means of the House of Representatives, and I distinctly remember that one man stated: "I have $400,000 worth of woolen goods piled up in my warehouses; it has been impossible for me to sell it; I have paid the tariff required by the McKinley law on the wool that enters into this fabric, and I ought not to be compelled to sell these goods in competition with goods woven with free wool."

It seemed right and fair that there should be an opportunity for men so situated to sell their goods before the provision of the law making wool free went into effect; and hence a provision went into the bill, by the consent of everybody, I think, that the woolen schedule should take effect on the 1st day of January following the passage of the bill. The wool came in free, and the tariff on the woolen goods went into effect at a subsequent time; so that the market was left to these people.

Now, this same class of manufacturers, these same men, are here. They are wanting this tariff bill to be framed justly and equitably for them, but the conditions are exactly reversed. They have a supply of free wool on hand, which they have brought in without paying tariff duties. There is no justice or sense in allowing them a compensatory duty of one, two, three, or four, or four and one-half times the amount of the duty upon wool upon which they have not paid a cent of tariff. There ought to be in this bill—and I propose to move an amendment to that effect before we get through with it—a provision that the specific rates provided for in this bill shall not go into effect until twelve months after the bill has passed.

There has been a great deal said, Mr. President, about the relative rates of taxation under the present law, under the pending bill, and under the McKinley law. The McKinley law proposed a tax of 11 cents a pound on wool of the first class. I have a statement from a London dealer giving the value of the average wool from the provinces in the London market for a number of years past, and the price of a bale of 400 pounds of wool was given as £14¼ for the year 1890. This would give a price of 18 cents a pound in the London market for the average provincial wools. In 1895 the same authority gives the value of a bale of 400 pounds of wool at £11, and in 1896 at £12.

A tax of 11 cents a pound, as proposed by the Dingley bill, would be the same amount of money specific that 11 cents a pound was in the McKinley law. But the 11-cent-a-pound tariff is a protection against wool worth 13.4 cents, and would be a much higher rate of taxation than the 11-cent tax on wool worth 18 cents. The rate under the McKinley law was 61 per cent; the rate under the Dingley bill, assuming the value of wool to be 13.4, would be 89 per cent, or nearly 50 per cent higher, although the apparent tax is exactly the same; or if a tax of 8 per cent was levied on that at 13.4 cents, it would make 59 per cent, almost the same ad valorem rate that was levied by the McKinley law.

When Judge Lawrence was here before the committee as the special representative of these people, he insisted on a tax of 24 cents on Australian wool, and stated that it was necessary to have that protection. That tax, if he could have had it, would have amounted to 274 per cent.

Mr. President, I do not think I have seen the iniquities of this

bill anywhere better stated than they are in this Bulletin of the National Wool Growers' Association. The statements are made by competent men, by wool men whose word certainly the majority of the Senate committee ought to accept as being authority. I read from the June number, page 122. They state:

The wool duties of 1890 were, in a large degree, a departure from the principle laid down in 1867, and they were the subject of severe and proper public criticism in consequence. They were fixed so high in relation to the then prices of wool that they necessitated duties on woolen goods equivalent to about 98 per cent ad valorem on the actual importations. Thus the wool and woolen schedule of that tariff became the central point of attack, and was largely responsible for the political revolution which resulted in the repeal of the tariff of 1890 and the passage of a law placing wool on the free list.

Mr. President, if this warning of the woolen manufacturers is true to-day; if their criticisms of the McKinley Act and the reasons they give for its appeal are true, I ask in the name of common sense how can the friends of this measure hope that it can remain on the statute books for any length of time, for the rate of woolen tax is not only as high as under the McKinley Act but higher. It is higher on the raw wool, higher on the manufactured wool, and higher clear through.

Mr. HOAR. What is the date of the article from which the Senator has read?

Mr. JONES of Arkansas. June, 1897.

Mr. HOAR. Who is the author of it?

Mr. JONES of Arkansas. I think the expert of the Finance Committee on the Republican side, Mr. North, is the editor. It is an editorial, and I presume he wrote it. It seems to be good authority, and I hope that Senators will heed it. If they do not, they will hear from it later, I am sure.

That legislation has been followed by a decline in the prices of domestic wools to a level with the world's prices, a decline practically equivalent to the former duty, resulting in a slaughter of sheep and a loss to the woolgrowers which the manufacturers deprecate and are anxious to see remedied.

But if it was a political blunder for the Democratic party to transfer this industry suddenly from high protection to free wool, it would be an equal blunder, and, in an economic sense, a greater blunder, for the Republican party, with equal suddenness, to impose upon this necessary raw material duties much higher than have ever before been fixed, higher than are asked or expected upon any form of manufactured product, and avowedly intended to be prohibitory in their operation.

Mr. WARREN. I suggest to the Senator, in justice to himself, that the observations which he is reading refer to a bill that is not before the Senate and one which was very much higher. The strictures he is reading are directed to a bill that has never been before the Senate or the House, but was one proposed by a society of woolgrowers. I say that in justice to the Senator.

Mr. JONES of Arkansas. My impression was that it was a criticism of the House bill. The Senator may be right. I am not positive about it. It seems to be a memorial addressed to the Ways and Means Committee. But I will continue to read it. The observations are right striking, and this is about the McKinley Act and its effect and the rate of taxation, 100 per cent. It is certainly applicable now, because the rate under the proposition, as you are going back to the House bill, will certainly be higher than under the McKinley Act:

The enactment of these rates of duty would exclude us from foreign wools of a character grown only to a limited and constantly diminishing extent in the United States, and absolutely necessary at the present stage of manufacturing development to enable us to maintain competition with foreign fabrics.

They are asked in the expectation that in the course of time, by the process of exclusion, we shall come to grow all these varieties of wool in the United States. We are justified by the world's experience and by the universal judgment of wool experts in saying that it is impossible that legislation based upon such expectation would be purely chimerical. In pursuit of this chimera you are asked to shut out foreign wools at a time when our domestic wool clip supplies less than one-half our actual requirements in the way of clothing for our people. If more moderate duties on wool, such as will add, say, 50 per cent, to the present domestic price—

Mr. Lawrence, who appeared before the committee here, gave 8 cents as the price of American wool, and we have put on 10. That exceeds 50 per cent on the American price—

will not encourage efforts to make up this enormous deficiency, it is clear that from an economic point of view the whole policy of taxing wool is a national blunder.

That the proposed duties are prohibitory, and intended to be prohibitory, was frankly admitted by Judge Lawrence before your committee; but it remains to demonstrate this fact by a detailed analysis of them, in their application to the world's wools. To this end we submit herewith (Appendix B) a statement that covers practically the whole range of prices of the world's wools of Classes I and II.

Mr. MANTLE. Would it interrupt the Senator from Arkansas for me to make a suggestion?

Mr. JONES of Arkansas. Not at all.

Mr. MANTLE. The writer talks about the present duty being prohibitory. I offer the suggestion that it is impossible to put a prohibitory duty upon wool, because we do not raise half as much as we consume. We must import the wool at any event.

Mr. JONES of Arkansas. I do not agree with the Senator that it is impossible to prohibit the importation of wool.

Mr. MANTLE. We can not prohibit its importation by duties.

Mr. JONES of Arkansas. I believe the financial distress of the people, with even the extremely low prices on woolen goods, has made it impossible for them to consume anything like the normal quantities of woolen goods, and that when the duties are increased the consumption will be decreased, and the higher you increase the prices the more and more you decrease the consumption until you can absolutely make it impossible for the people to buy woolen goods.

Mr. GRAY. Then, if I understand the Senator from Montana, the suggestion is that the woolgrowers have the consumers of the country in a measure at their mercy. They can not take refuge in prohibition—that is, refraining from importing at all—but are bound to stand the tax and pay the exaction that the woolgrowers choose to place upon them. They are bound to do it or freeze.

Mr. MANTLE. I do not look at it in that light at all. We are discussing the proposition of a protective tariff. I think it may be fairly said that the country has passed upon that question and has decided that there shall be a protective system. Of course the suggestion of the Senator from Delaware would go to everything else upon which we impose a duty with the ultimate purpose in view of producing the article at home.

The same objection would lie. There is no industry in which all the people of this country are engaged. We must protect them and foster them, if we are going to do it at all, one at a time as we come to them, by sufficient rates of duty to do it.

Of course the suggestion of the Senator from Delaware brings up the whole question of a protective tariff, or a tariff for revenue, or free trade, as the case may be. Whatever I may say I say from the standpoint of a protectionist. Looking at it purely from that point of view, I believe we can stimulate the production of wool in this country by proper protective rates of duty. Of course the other part of the argument, as to the wisdom and justice of a protective-tariff policy, has been gone over and over and over again.

Mr. PLATT of Connecticut rose.

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Connecticut?

Mr. JONES of Arkansas. Certainly.

Mr. PLATT of Connecticut. I simply wish to ask the Senator if he would not before he closes state in what respect the duties in the House bill and in the Senate bill are higher than those under the McKinley Act?

Mr. JONES of Arkansas. I have just endeavored to state that.

Mr. PLATT of Connecticut. The rates per pound on wool are not higher on first and second class in the House bill and are lower in the Senate bill than they were in the McKinley Act.

Mr. JONES of Arkansas. They are 1 cent lower, I believe, than the McKinley Act, but wool is decidedly cheaper now than it was then.

Mr. WARREN. Under the Wilson Act.

Mr. JONES of Arkansas. The ad valorem tax equivalent to 11 cents duty under the McKinley Act is less than the ad valorem tax equivalent to 10 cents under the pending bill. So the rate of taxation is higher in this bill than under the other. That a tax of 11 cents levied on wool that is comparatively high is not a lower rate than one of 10 cents levied on lower priced wools can not be defended for a moment.

Mr. PLATT of Connecticut. Then, if the effect of the proposed law should be to get rid of the lower prices which have prevailed under the Wilson Act and carry the price of wool back to its price under the McKinley law, the duty would not be higher.

Mr. JONES of Arkansas. This authority says that was not the effect of the McKinley law; that the effect of the McKinley law was that the price kept going down. That is the fact, as the Senator knows.

Mr. MANTLE. May I call the attention of the Senator from Arkansas to one fact?

Mr. JONES of Arkansas. Certainly.

Mr. MANTLE. It is in respect to the price of Port Phillip wool. I have learned from tables which I have just received from Mr. Justice that the price of Port Phillip wool—Australian wool—which is the character of wool most largely imported into this country under a protective tariff——

Mr. JONES of Arkansas. Or any other.

Mr. MANTLE. A great deal more of other kinds of wool were imported under free wool. It has been South American wool, Cape wool, more of what we call the heavier shrinking wools than the light shrinking wools.

Mr. JONES of Arkansas. A larger proportion, but the Port Phillip wool is the largest.

Mr. MANTLE. I agree with the Senator, but still much more of other kinds of wool came in.

Mr. JONES of Arkansas. That is true. There is no doubt about it.

Mr. MANTLE. The price of Port Phillip wool, according to that statement, in eleven years has not varied more than two-tenths of a cent.

Mr. JONES of Arkansas. Mr. Lawrence, before the Ways and Means Committee, gave the price of Australian wool at 9 cents a pound.

Mr. MANTLE. In Australia.
Mr. JONES of Arkansas. In Australia.
Mr. MANTLE. At Melbourne.
Mr. JONES of Arkansas. The tax is levied on the value of the article in the principal market from which it comes. So the tax is levied on the Australian price of the wool.
Mr. MANTLE. I am simply stating what I find in Mr. Justice's table, received by me the other day, in which he states that the price of Australian (Port Phillip) wool has varied less than two-tenths of a cent in the last eleven years.
Mr. JONES of Arkansas. It is very remarkable that Port Phillip wool should have maintained its value all this time. The general average of wool prices has not been maintained. If the peculiar character of Port Phillip wool is such as to have maintained its price notwithstanding the general decline, I am not aware of the fact. Mr. Justice, however, is doubtless an expert in this matter, and his statement may be true, but there is nothing in my hands that has led me to think so.
Replying to the former position taken by the Senator when he and the Senator from Delaware had their colloquy, I should like to read some comments in the same article from which I was reading a few minutes ago. It says:

The proposed duties, then, would double, or more than double, the average cost of our raw materials. In this way they would enormously restrict the consumption of all kinds of wool fabrics.

Here, from this wool expert, is the consequence of the proposed high rate of taxation. He says:

The poorer people of the United States will not wear woolen clothing if its cost is carried by such legislation so far beyond the cost of cotton clothing.
It is apparently not understood by the woolgrowers to what an extent cotton fabrics have superseded woolens in men's wear, and correspondingly affected the prices of their product. There are certain goods—corduroys, Bedford cords, cottonades, Camelot jeans, and cotton cassimeres—which are used chiefly for these purposes, and which are remarkably good substitutes for woolens, being durable, warm, sightly, and hardly distinguishable from woolen when worked into garments. The striking advance in the manufacture of this class of cotton cloths has been somewhat checked during the past three years by the cheapness of woolens. But it is clear that you will give it a tremendous stimulus if you attach a duty of 15 cents a pound to wool at a time when cotton is selling for 7¼ cents, and thus make necessary a compensatory tax of 60 cents a pound upon woolen cloths, when these competing cotton cloths can be made and sold for 20 to 25 cents a pound.

It will not materially affect the proposition to say that wool is worth 10 cents and not 15 cents, and that the compensatory duties are 40 cents instead of 60 cents. Forty cents a pound would as much render impossible the use of these goods when you can buy the cotton substitutes for 20 and 25 cents a pound as would 60 cents.
Mr. MANTLE. May I inquire what the Senator from Arkansas is reading from?
Mr. JONES of Arkansas. From the same article in the Bulletin of the National Association of Wool Manufacturers of June, 1897.
Mr. MANTLE. If the Senator will permit me, I will say that it is pretty generally understood, I think, that the manufacturers are universally agreed that it is much better for them that they should have free wool; that it gives them a wider range to select from, and, of course, gives cheaper raw material. But it must be manifest that we can not have a protective system that does not protect all interests.
Mr. JONES of Arkansas. All except the 70,000,000 consumers.
Mr. MANTLE. They are part of the 70,000,000 consumers.
Mr. JONES of Arkansas. They are the foraging ground for the favored few.
Mr. HOAR. May I ask the Senator a question?
Mr. JONES of Arkansas. One at a time. I would prefer that the Senator from Montana should get through, and then I will hear what the Senator from Massachusetts has to say. I am a slow man.
Mr. HOAR. I wish to ask only one question.
Mr. JONES of Arkansas. I can not keep up with two at a time.
Mr. HOAR. I wish to ask only one question.
Mr. JONES of Arkansas. Oh, go ahead.
The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Massachusetts?
Mr. MANTLE. I always yield to the Senator from Massachusetts.
Mr. HOAR. I desire to ask the Senator where he finds in this country those 70,000,000 consumers who do not produce anything.
Mr. JONES of Arkansas. I have not said there are 70,000,000 people who do not produce anything. On the contrary, the 70,000,000 consumers have produced what by unjust and unfair legislation has been taken away from them and put into the hands of a favored few, who have grown to be bloated millionaires, men having millions which they never worked for; men who have pocketed the gains of the laboring millions by and under the forms of law, not just; men who have pocketed what ought to belong to the masses of men, and it would make millions of homes now if the wealth of this country were distributed and put into the hands of the men who have made it.
Mr. HOAR. May I ask the Senator one more question?
Mr. JONES of Arkansas. Certainly.
Mr. HOAR. Has the Senator any particular reason for saying or affirming that the class of men he describes are manufacturers to any extent? Is it not true that for the last ten or fifteen years the average earnings of the manufacturers of this country, in the protected industries, have been about 4½ per cent?
Mr. JONES of Arkansas. I have no doubt that a great many manufacturers who have not been especially provided for in tariff bills and who have had no special representatives looking after their interests here whenever tariff bills were under consideration have had difficulty in getting along.
Mr. HOAR. May I ask the Senator a question?
Mr. JONES of Arkansas. Let me answer one question before the Senator asks another. They have had some difficulty in getting along. I will admit all that. But the men who have had special advantages under the legislation of the country have grown enormously rich, whether they are manufacturers or whether engaged in other business.
Mr. HOAR. I should like to ask the Senator in reference to the particular matter he is talking about, to wit, the woolen manufacturers of this country, whether it is not true that none of them are to be found among the list of persons who have become rich in this way, and whether for the last fifteen years their earnings have averaged more than 4½ per cent? Further—I will put all of the question in at once and let the Senator answer it—whether it is not true that the large majority of these bloated men of wealth are Democrats and free traders?
Mr. JONES of Arkansas. If the woolen manufacturers are making 4½ per cent now on their capital, when no other class of large investments in this country is making anything like such a profit——
Mr. HOAR. I said for the last fifteen years.
Mr. JONES of Arkansas. Why in the name of high Heaven do they come here and ask Congress to enable them to levy greater tolls on the people of this country to increase their fortunes? They have enough already.
Mr. HOAR. I said in the last fifteen years. Since the Democrats got into power they have not been making any money at all.
Mr. JONES of Arkansas. If they are not making any money at all, they are in about the condition of the balance of the country.
Mr. HOAR. Since the Democrats got into power, I suppose.
Mr. JONES of Arkansas. The men with whom I am familiar and whose condition I know are not only not making money, but they are not holding their own. The great agricultural masses of this country are losing money year by year. I know from personal observation. I was raised on a farm. I was raised among farming neighbors. I know the men now with whom I grew up. I know the homes they live in. I see them now and go amongst them, and I state what I know to be the sober truth when I say their condition is harder than ever before in their lives. I refer to men who have been honest, sober, and industrious; men who are living on the farms which they inherited from their fathers; men who can not be blamed for not doing their duty as good citizens.
They have mortgages on their homes, and they are suffering under incumbrances now as they never have before. Their condition is growing harder and harder all the time, and if the woolen people have not been making any money, I ask in the name of common sense if that is any reason why the policy of the Government should be reversed to enable them to compel the consumers of this country to pay higher prices for woolen goods and to enable the manufacturers to make money when nobody else is making any?
Mr. HOAR. It would seem to me, if the Senator will pardon me, that if what he says is true (and I dare say it is true ever since he got into power and tried his hand at making a tariff bill), it is a very good reason why the policy of the Government should be reversed, in order that all the people may be relieved of this difficulty.
Mr. JONES of Arkansas. The policy of this bill will result in taxing the great masses for benefits to a favored few and to nobody else.
Mr. ALLEN. I should like to call the attention of the Senator from Arkansas to a matter which I think he has overlooked. The Senator from Massachusetts seems to think he has made a point against the Senator from Arkansas upon the statement that the woolen manufacturers have earned only about 4½ per cent upon their capitalization. The woolen manufacturers in this country have been constantly watering their capitalization for thirty years, until the investment of a few thousand dollars has gone up into hundreds of thousands and millions of dollars, and it is upon the latter capitalization that the Senator from Massachusetts bases his estimate.
Mr. JONES of Arkansas. I think the point made by the Senator from Nebraska is a good one, and it is a proper answer to the suggestion of the Senator from Massachusetts.
Mr. HOAR. I desire to put on record my absolute denial of the fact of any such thing.

Mr. JONES of Arkansas. I wish to call attention to the fact——

Mr. GRAY. Before we leave the subject, I should like to understand the proposition made by the Senator from Massachusetts. If, according to his theory, there are a class of men, to wit, the woolen manufacturers, who for the last fifteen years—I think that was the period he assigned—have not been making over 4½ per cent, it is right and just and in accord with political ethics that they should recoup their losses or retrieve their depressed condition by levying upon the great mass of their fellow-citizens, and compel them by the exaction of a protective tariff to pay something more for the product which the producer has to sell. That is the proposition as I understand it, and that is a proposition upon which I am quite willing to go to the country or to submit to any tribunal whatever.

Mr. HOAR. I have made no such proposition. The woolen manufacturers——

Mr. GRAY. I did not say that the Senator verbally made it; but it seemed to me that was the proposition when it was reduced to its last analysis.

Mr. HOAR. It does not seem so to me at all. The woolen manufacturers, as can be shown by abundant statistics for the last fifteen years, down to the time of the passage of the Wilson Act, the fifteen years preceding that, did not make a profit averaging more than 4½ per cent on their capital. Since that law went into effect, most of them have made substantially nothing. But during that time in which the independence of the woolen manufacture of this country was achieved largely, its independence in the matter of manufacture and raising of wool, they were able to give support at good wages to thousands upon thousands of American citizens, who otherwise would have been compelled to remain idle or in squalid homes, and to purchase and use up the materials produced by thousands and thousands of American woolgrowers. And the policy which enabled them to do that was a policy which also was constantly lightening the burden of the price of their product to the American people.

The Senator from Delaware has been repeating over and over and over again the old familiar fallacy which is involved in this statement. It has been argued before the American people. They have been led to try the experiment. It was found to be a bitter, costly, and reckless experience, and it is hardly worth while now to be constantly answering that old argument, when the American people have answered it, after trying the experiment practically, after hearing it discussed theoretically in the campaign of 1896, and when the doctrine of protection has got so far into his own party that there are hardly three original free traders left in it.

Mr. GRAY. I never claimed any patent for originality in the statement I just made, but such as it was, and imperfect as it was, it was only in answer to the argument which has been repeated over and over and over again by the Senator from Massachusetts, until we have heard it so often repeated that we began to think there might be some merit in it. Therefore I produced, perhaps, the reply which has been repeated over and over again. That is all. The only point is that whatever that class may be—the wool manufacturers in this case—for whom the Senator is speaking, and the men they employ in their factories, they are infinitely small in comparison with the great body of the people upon whom they levy their exactions.

Mr. CHILTON. Some allusion has been made to the effect of the much-abused Wilson Act on the manufacture of woolens in this country. I am reminded of a statement made by Representative COCHRAN of Missouri, which I noted among others, in which he said that one of the largest woolen factories in the United States, located in the city of St. Joseph, Mo., was at work during the entire year 1896 for the first time in eight years. So the Wilson Act can hardly be claimed to have had a very destructive effect upon that industry.

Mr. GALLINGER. If the Senator from Texas will permit me, I will state that almost every woolen manufactory in the State of New Hampshire has been absolutely closed during the last two years.

Mr. GRAY. The woolen manufacturers here have filed a protest with the Senate of the United States against the proposed duties that are said to be made in their favor.

Mr. GALLINGER. I think not.

Mr. WARREN. The protest is not against the bill before the Senate or the bill as it came from the House, but a bogy man's bill to which they refer as being one presented by an association.

Mr. JONES of Arkansas. I do not propose to engage in any general discussion of the matter, but I desire to call attention to what seems to be a singular construction of a paragraph which I believe has already been read. I am not sure about it. Paragraph 355 says:

> The duty upon wool of the sheep or hair of the camel, Angora goat, alpaca, and other like animals, of class 1 and class 2, which shall be imported in any other than ordinary condition, or which has been sorted or increased in value by the rejection of any part of the original fleece, shall be twice the duty to which it would be otherwise subject.

I read to the Senate a few moments ago the comment of the manufacturers about the slovenly method of American woolgrowers in putting up their fleeces. It seems that the policy of the pending bill is not only to prevent improvement, but to make it a crime to improve the condition. You propose to visit a penalty by doubling the tax upon anybody who undertakes to bring wool into this market in a little more decent shape than it would otherwise come. I will read it again:

> In this particular—

Speaking of the dirty condition of American wools, the manufacturers say—

> he has made no advance in thirty years. On the contrary, his wools, as marketed, grow heavier and dirtier. Fifteen years ago our fine washed wools lost in scouring 48 per cent, and sometimes less. The average present loss in Ohio and Michigan wools is nearer 55 per cent. They are so poorly washed that they shrink as much as Australian wools, unwashed and unskirted.

And yet it would seem that the intention of the bill is to make the preparation of the wool in a somewhat more merchantable condition a crime, and double the tax for bringing wools in in any other than the ordinary condition.

Mr. President, there are a number of other provisions in the bill which are equally objectionable, but I shall not detain the Senate by discussing them at this time. I may have something more to say on the subject as we go further into the bill.

Mr. WARREN obtained the floor.

Mr. HALE. Will the Senator from Wyoming yield to me for a moment?

Mr. WARREN. Certainly.

DRY DOCK AT NEW YORK NAVY-YARD.

Mr. HALE. I ask the Chair to lay before the Senate a joint resolution which was received from the House of Representatives.

The joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard, was read the first time by its title and the second time at length, as follows:

> *Resolved by the Senate and House of Representatives of the United States of America in Congress assembled*, That the sum of $100,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, and to be immediately available, to enable the Secretary of the Navy to execute pressingly needed repairs upon Dry Dock No. 3, at the New York Navy-Yard, as follows: For constructing and removing cofferdam, $48,000; for repairs to dock as recommended by board of survey, $30,000; for contingencies, $22,000; and the Secretary of the Navy is hereby authorized to expend said sums or so much thereof as may be needed for the purposes indicated in this resolution.

Mr. HALE. I ask for the present consideration of the joint resolution.

There being no objection, the joint resolution was considered as in Committee of the Whole.

The joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TRANSMISSISSIPPI AND INTERNATIONAL EXPOSITION.

Mr. ALLEN. I ask the Chair to lay before the Senate the joint resolution which has been returned from the House with amendments.

The VICE-PRESIDENT laid before the Senate the amendments of the House of Representatives to the joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits.

The amendments of the House of Representatives were:

On page 2, line 12, strike out "as may be or may be deemed" and insert "as the Secretary of the Treasury may deem."

On page 3, line 25, strike out "or proper" and insert "by the Secretary of the Treasury."

On page 3, lines 35 and 36, strike out "one year" and insert "three months."

Mr. ALLEN. I move that the Senate concur in the amendments of the House of Representatives.

Mr. CHANDLER. I do not think I shall oppose the motion, but I should like to have the joint resolution read in full as it will read if amended.

The VICE-PRESIDENT. If there be no objection, the Secretary will read as requested.

The Secretary read the joint resolution as proposed to be amended by the House of Representatives, as follows:

> Whereas the Transmississippi and International Exposition Company, of Omaha, Nebr., has extended invitations to various foreign nations to make exhibits at the Transmississippi and International Exposition to be held at said city A. D. 1898, which invitations have been accepted and space for installing foreign exhibits has been applied for and duly awarded, and concessions and privileges have been granted by the exposition management to the citizens and subjects of foreign nations; and
>
> Whereas for the purpose of securing the production on the exposition grounds of scenes illustrative of the architecture, dress, habits, and modes of

life, occupation, industries, means of locomotion and transportation, amusements, entertainments, and the like, of the peoples of foreign countries, it has become necessary for the Transmississippi and International Exposition Company to grant concessions and privileges to certain firms and corporations of the right to make such productions: Therefore,

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the act of Congress approved February 26, A. D. 1885, prohibiting the importation into the United States of foreigners under contract to perform labor and the various acts of Congress prohibiting the coming or bringing of Chinese persons into the United States, and all acts of Congress amendatory of said act or acts, shall not be construed to prohibit the bringing into the United States, under contract to labor, such mechanics, artisans, agents, or other employees or persons, natives of their respective foreign countries, as the Secretary of the Treasury may deem necessary for the purpose of making preparation for installing or conducting foreign exhibits, or preparing for installing or conducting any business authorized or permitted by virtue of any concession or privilege which may have been or may hereafter be granted by the Transmississippi and International Exposition Company of Omaha, Nebr., in connection with such exposition. Nor shall any such act or acts of Congress operate to prevent, hinder, or in any manner restrict any foreign exhibitor, representative, or citizen of a foreign nation, or holder of a concession or privilege from the Transmississippi and International Exposition Company, from bringing into the United States under contract any such mechanic, artisan, agent, or other employee deemed necessary by the Secretary of the Treasury for the purpose of making preparations for installing or conducting foreign exhibits, or preparing for installing or conducting any business authorized or permitted under, or by virtue of, or pertaining to a concession or privilege which may have been or may be granted by the said Transmississippi and International Exposition Company in connection with such exposition: *Provided, however*, That no alien shall, by virtue of this resolution, be permitted to enter the United States to perform labor therein, except by express permission, naming such alien, and then not for a longer time than three months after the close of the Transmississippi and International Exposition; and thereafter such person shall be subject to all the processes and penalties applicable to aliens coming into the United States in violation of any act of Congress prohibiting alien contract labor from being brought or coming into the United States.

SEC. 2. That all articles and property of any kind that may be brought to the United States from any foreign country to be placed on exhibition at such Transmississippi and International Exposition, as well as all tools and implements necessary or proper to be used in preparing for an exhibition and the equipment and paraphernalia of the exhibitors, artisans, laborers, and the like, shall be admitted to the ports of the United States free of duty, under such rules and regulations as may be prescribed by the Secretary of the Treasury: *Provided, however*, That said articles shall be removed from the United States within six months after the close of said exposition. If not so removed, and the same shall be sold or disposed of in the United States, they shall be subject to the customs laws thereof: *Provided further*, That the Secretary of the Treasury is hereby authorized and directed to make such rules and regulations as may be necessary, in his judgment, to carry into execution the provisions hereof and to prohibit the infraction of existing statutes, except as the same may be temporarily modified and changed by this resolution.

Mr. CHANDLER. The joint resolution seems to be sufficiently well guarded and it ought to pass.

The VICE-PRESIDENT. The question is on concurring in the amendments of the House of Representatives.

The amendments were concurred in.

RELIEF SUPPLIES FOR INDIA.

The VICE-PRESIDENT laid before the Senate a communication from the Acting Secretary of the Navy; which was read, ordered to be printed, and referred to the Committee on Naval Affairs, as follows:

NAVY DEPARTMENT, *Washington, June 21, 1897.*

SIR: Referring to public resolution No. 8, "Authorizing the Secretary of the Navy to transport contributions for the relief of the suffering poor in India," approved April 7, 1897, and to public resolution No. 12, amending the same, approved on the 1st instant, I have the honor to submit the following statement:

Immediately upon the passage of the amendment above referred to, this Department entered into negotiations for the charter of two steamers for the transportation of supplies from New York to India. On the 4th instant, however, a telegram was received from Mr. Louis Klopsch, proprietor of the Christian Herald, New York City, who was one of the parties most instrumental in collecting contributions of grain from various parts of the country, in which he stated that information had been received from three authoritative sources in India, declaring that it was now too late to send grain without great risk, and advising that the cargo be sold and money contributed instead. In view of this information, Mr. Klopsch asked that no further action be taken in the matter of chartering vessels.

On the 5th instant the Department addressed a communication to the collector of customs at the port of New York, who was, under the terms of public resolution No. 8, charged with certain duty in connection with the transporting of supplies, and asked for his views regarding the matters mentioned in the telegram of Mr. Klopsch. A letter has been received from the special deputy collector at New York, in which, acting for the collector, he concurs in the wisdom of sending money to India instead of chartering vessels for the transporting of grain.

I deem it proper to inform the Senate that, in view of the foregoing, this Department has abandoned its efforts to charter a vessel or vessels under the authority conferred by the resolution and amendment hereinbefore referred to.

Very respectfully, T. ROOSEVELT,
Acting Secretary.

The PRESIDENT OF THE UNITED STATES SENATE.

THE TARIFF BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States, the pending question being on the amendment of Mr. ALLISON, to add to paragraph 353:

The duty on wools of the third class, if imported in condition for use in carding or spinning into yarns, or which shall not contain more than 8 per cent of dirt or other foreign substance, shall be three times the duty to which they would otherwise be subjected.

Mr. WARREN. Mr. President, I do not intend to consume the time of the Senate with any extended speech. I intend only to take up a few of the most glaring misstatements, conscientiously made, no doubt, by the Senator from Arkansas [Mr. JONES] who has just closed his remarks.

It is said, and I think truthfully, that a chain is only as strong as its weakest link, and I conclude that an argument is only strong as it is truthful; that an argument based upon statistics and figures misquoted is wrong in just the percentage that the figures are wrong. If the figures are not correct, it is fair to presume that the opinions expressed are also incorrect.

The Senator from Arkansas has stated, and I think the RECORD will show that he repeated it, that the proposed duty on carpet wools is 100 per cent or more. I have here, first, a witness from the Finance Committee on the Democratic side. I have in the CONGRESSIONAL RECORD of May 26 a statement introduced by the Senator from California [Mr. WHITE]. He states:

At this point I desire to insert in the RECORD certain tables regarding the pending bill which have been prepared under the direction of the minority of the committee.

Composed, I assume, of the Senator from Arkansas as one of its members. He says:

I think, in view of the information which they contain, it would be well to insert them here.

Passing along through the table submitted, we find that certain articles are quoted as those upon which the proposed duty is from 50 to 75 per cent; we find those from 75 to 100 per cent, those paying more than 100 per cent, and those that are higher than the McKinley Act. There certainly was room enough under those various tables submitted by the minority of the Finance Committee to have introduced wool in all its phases and to have stated whether higher or lower. Wool of the first class is not introduced in this table at all, which, inferentially, proves that it is less than the McKinley Act, and also less than 50 per cent ad valorem, the minimum which the Senator establishes in his table. Turning, however, to wools of the second and third class, we read the following:

Wool.

	Per cent.
356. Class 2, camel's hair	51.40
358. Hair of the goat, alpaca, etc	50.43

So it seems that the minority of the Finance Committee, of which the Senator from Arkansas is one, only claimed that third-class wool was taxed a trifle over 50 per cent ad valorem, while upon the floor to-day it is stated that it is taxed more than 100 per cent.

I have here the Commercial Bulletin, of Boston, dated Saturday, June 19, in which are given the market values of wools. I think the Senators upon both sides of the Chamber will admit that the Commercial Bulletin, of Boston, is a reliable sheet, and has the most reliable quotations of wool that are obtainable. I send to the desk and ask to have read the current prices upon wools.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

[From the Commercial Bulletin, Boston, Saturday, June 19, 1897.]

Mr. MILLS. I notice by the statement of imports here that 96,661,663 pounds were imported into the United States last year, worth 9.6 cents a pound.

Mr. WARREN. That was last year. We are legislating and debating to-day upon the market prices of to-day. I am introducing the market prices of the 19th of June.

Mr. MILLS. This is the market price on imported wool, which we have in our tables here, and which is taken as the basis of the action of the majority in framing the bill.

Mr. WARREN. If I have computed correctly the percentage proposed by the Senate committee's bill upon carpet wools, according to the Bulletin table just submitted, it does not exceed in a single particular on a single wool in any grade of the carpet-wool class 44.4 per cent ad valorem, while, on the other hand, it goes as low as 20 per cent ad valorem. So, when the Senator from Arkansas makes the statement that the rate proposed on carpet wools is 100 per cent or more ad valorem, he states a proposition or figure five times as high as the truth upon some classes of wool, as the market of to-day shows, and nearly two and one-half times upon other classes.

Mr. President, the American people are not at this time accepting vehemence, emphasis, and assertion. They accepted that in 1894. They accepted the statement that free wool would raise the value of wools to the woolgrower and reduce the cost of the finished product to the wearer. But the people to-day are looking for facts.

As I said in opening, I do not propose to consume the time of the Senate to comment upon any of the argument that is based upon figures so distorted as those that have been introduced. I simply submit the figures and let them go in the RECORD, and the American people of to-day will take the figures and facts rather than unproven assertions.

Mr. CHILTON. I offer an amendment to the pending bill, which will be presented at the proper time.

The VICE-PRESIDENT. The amendment will be printed. The pending question is on the amendment proposed by the Senator from Iowa [Mr. ALLISON]. The amendment will be read.

The SECRETARY. Insert at the end of paragraph 353 the following:

The duty on wools of the third class, if imported in condition for use in carding or spinning into yarns, or which shall not contain more than 8 per cent of dirt or other foreign substance, shall be three times the duty to which they would otherwise be subjected.

Mr. MANTLE. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. PENROSE (when his name was called). I am paired with the junior Senator from Delaware [Mr. KENNEY]. If he were present, I should vote "yea."

Mr. PROCTOR (when his name was called). I am paired with the junior Senator from Florida [Mr. MALLORY].

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA].

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. In his absence I withhold my vote.

Mr. WELLINGTON (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. BUTLER], and therefore withhold my vote.

The roll call was concluded.

Mr. PLATT of New York. I am paired with my colleague [Mr. MURPHY], and therefore withhold my vote.

Mr. BURROWS. I am paired with the senior Senator from Louisiana [Mr. CAFFERY]. I transfer my pair to the Senator from Nevada [Mr. JONES], and vote "yea."

Mr. PENROSE. I transfer my pair with the Senator from Delaware [Mr. KENNEY] to the junior Senator from Illinois [Mr. MASON], and vote "yea."

Mr. PASCO. I wish to announce that the Senator from Tennessee [Mr. BATE] is necessarily absent from the city, and that he stands paired with the Senator from Connecticut [Mr. HAWLEY].

The result was announced—yeas 29, nays 26; as follows:

YEAS—29.

Allison,	Fairbanks,	McBride,	Shoup,
Burrows,	Foraker,	Nelson,	Spooner,
Carter,	Frye,	Penrose,	Warren,
Chandler,	Gallinger,	Perkins,	Wetmore,
Clark,	Gear,	Platt, Conn.	Wilson.
Cullom,	Hale,	Pritchard,	
Davis,	Hoar,	Quay,	
Elkins,	Lodge,	Sewell,	

NAYS—26.

Bacon,	Harris, Kans.	Morgan,	Teller,
Berry,	Jones, Ark.	Pasco,	Turpie,
Chilton,	McLaurin,	Pettigrew,	Vest,
Clay,	Mantle,	Pettus,	Walthall,
Cockrell,	Martin,	Roach,	White.
Gorman,	Mills,	Smith,	
Gray,	Mitchell,	Stewart,	

NOT VOTING—34.

Aldrich,	Faulkner,	Kyle,	Proctor,
Allen,	George,	Lindsay,	Rawlins,
Baker,	Hanna,	McEnery,	Thurston,
Bate,	Hansbrough,	McMillan,	Tillman,
Butler,	Harris, Tenn.	Mallory,	Turner,
Caffery,	Hawley,	Mason,	Wellington,
Cannon,	Heitfeld,	Morrill,	Wolcott.
Daniel,	Jones, Nev.	Murphy,	
Deboe,	Kenney,	Platt, N. Y.	

So Mr. ALLISON's amendment was agreed to.

Mr. MANTLE. I desire to submit a substitute for paragraph 353, with some little changes in my amendment as heretofore stated. I ask that it be read.

The VICE-PRESIDENT. The amendment proposed by the Senator from Montana will be stated.

The SECRETARY. It is proposed to strike out paragraph 353, and in lieu thereof to insert:

The duty on wools of the first and second class which shall be imported washed shall be twice the amount of the duty to which they would be subjected if imported unwashed; and the duty on wools of the first, second, and third classes which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed.

Mr. MANTLE. Mr. President, the amendment which I have just submitted proposes to double the duties upon washed wools of the second class as well as upon those of the first class, and to treble the duties upon all classes of wools.

I regret that the friends of the woolgrowers here should have accepted the amendment which has just been adopted. In my judgment, it will do absolutely no good whatever, so far as the exclusion of third-class scoured wools is concerned, for I believe there will be none, or scarcely any, scoured wools of the third class coming into this country which will not contain more than 8 per cent of impurities. So the amendment heretofore adopted, if I am correct, simply amounts to nothing. The scoured wools will come in without the payment of additional duty.

So far as second-class wools are concerned, there was a reason when the law of 1867 was passed for the admission of those wools without the imposition of an additional duty. Those reasons are stated in the woolgrowers' memorial briefly, as follows:

The acts of 1867 and 1883 imposed less duties on combing wools—

That is, wools of the second class—

than on clothing wools, especially less in view of the lighter shrinkage in scouring of the former than of the latter. There were reasons for this at the time the act of 1867 was passed:

(1) The world's production of the long wools of the mutton breeds of sheep—the combing wools—was relatively small, so small in this country that they are not found in the price quotations until 1869. (Tariff Hearings, 1449.)

(2) The worsted manufacturing industry, then in its infancy in this country and requiring these wools—unable then to use merino wools—needed encouragement.

(3) The demand for large protection came chiefly from those engaged in the production of merino—

That is, wools of the first class—

the principal clothing wools—and

(4) Hence the relatively low duties on the long wools were adopted. But all these reasons and conditions have ceased to exist. All these wools are now clothing wools; all can be carded, all can be combed.

(1) The worsted manufacturing industry now can and does use the improved grades of merino wool equally with the long wools of the mutton breeds;

(2) This branch of manufacturing is as firmly established as any other.

This is shown by statistics which I shall not stop to quote.

There is absolutely no reason which can be advanced here in support of the proposition for permitting second-class washed wools to come in without the payment of additional duty, just as in the case of wools of the first class.

In the first place, in their unwashed condition they shrink much less than wools of the first class, which gives them a decided advantage to begin with; that is to say, they produce so much more clean wool to the pound of unwashed wool that it makes the duty relatively small in their unwashed condition as compared with the duty on the first-class wool. As they now come in, they shrink from 15 to 25 per cent, as compared with domestic wool of the same character, which shrinks from 50 to 55 per cent. So in this way it will be readily seen that the growers of the second-class or combing wools in this country have their protection practically cut in two by the admission of those wools in their unwashed condition without the payment of additional duty.

It was well enough, it was wise enough, when this law was originally framed making these classifications, that this discrimination was made in favor of the combing wools; but, as is well stated in this memorial, the necessity for that discrimination no longer exists. All wools can now be combed, no matter how short the staple may be. The improvement in machinery is of such a character that the necessity for these distinctions no longer exists, and I have yet to hear a single good reason offered for permitting this part of the law to remain in this condition. The duty on second-class washed wools ought to be doubled just as it is upon wools of the first class.

Mr. PLATT of Connecticut. Mr. President, when the Senator from Montana [Mr. MANTLE] was speaking before the last vote was taken, he alluded to the fact that in the act of 1883 scoured wools of the third class were included, as if that were a reason why they should be included in this bill at triple duties. That, as stated, was true, but it is not an argument why they should go into this bill, for the reason that then there was no such definition in the act of 1883 of scoured wools as is contained in the McKinley law and in this bill. Scoured wools had no definition in the act of 1883, and great troubles arose in administering the law as to what scoured wools were, and then in 1890, for the first time, scoured wools received a definition.

> Wool washed in any other manner than on the sheep's back shall be considered as scoured wool.

And that has been carried into the pending bill, so that the wool that is washed at all in any way, except on the sheep's back, is now considered as scoured wool in the pending bill and under the McKinley law. That was not so in 1883. Therefore the fact that scoured wools of the third class—indeed, of all classes in the act of 1883—were subject to a triple duty is no reason why, with this new definition which has been introduced, the scoured wools of the third class should pay the triple duty.

Mr. MANTLE. Mr. President, the necessity for that change in the law undoubtedly grew out of the fact that washed wools and scoured wools under the old definition were being brought into this country in practically a scoured condition, because no limitation was placed upon them. You can scour wool upon a sheep's back almost as well as after the wool is taken off. So it became necessary to put some definition, some limitation, to the point at which washed wool should be admitted—that is, as to what shall constitute washed wool. As I say, wool can be sufficiently scoured upon a sheep's back, and without this limitation, without this definition, the scoured wool would have come in under the washed-wool clause. But it seems to me that the rate proposed in the bill is low enough, so far as third-class wool is concerned, without making this additional concession.

As I have before stated, 98 per cent of all the carded wools which came in under the operation of the McKinley law came in at the valuation of 8½ cents per pound, notwithstanding the much higher prices which we have heard read and which the Senate has placed in the RECORD, from the Boston Commercial Advertiser, I believe it is. That is the dividing line, and the great bulk of those third-class wools will come in at the valuation of 10 cents or less. That has been the operation of that law heretofore, and unquestionably the same practice will be indulged in in the future. So the imposition of a triple duty upon scoured wools of the third class is absolutely necessary, if there is to be any further protection at all in respect to this class of wools.

Mr. CARTER. Let the amendment be again stated, Mr. President.

The VICE-PRESIDENT. The amendment will be read.

The Secretary read the amendment proposed by Mr. MANTLE as a substitute for paragraph 353.

Mr. CARTER. My colleague [Mr. MANTLE] will observe that the latter part of the amendment has been disposed of practically by the amendment previously adopted, that amendment being the sense of the Senate relative to third-class wools in an improved condition. I therefore suggest the propriety of a subdivision of the amendment, to the end that the Senate may vote directly on the question as to the insertion of the words "and second class," in line 18, after the word "first." If this separation can be made, I shall then ask the committee to accept the amendment.

Mr. MANTLE. In deference to the wishes of my colleague, I am willing to divide the proposition and take a vote upon either question, upon imposing a double duty upon washed wools, the second class, and next on, including all the classes in the treble duty on scoured wool.

Mr. JONES of Arkansas. What is the proposition of the Senator from Montana?

Mr. CARTER. My proposition is that the amendment proposed be divided, to the end that we may vote separately upon the proposition to add "and second class" after the word "first," in line 18, page 115, and subsequently vote upon the question as to the triple duty on the third class of wool.

With reference to this treble duty, it is alleged as a fact that the imposition of three times the duty would absolutely annihilate the carpet industry of the country. I am sure it is not the disposition of anyone to involve this bill in any such inconsistency as that, nor am I prepared at this moment to say that such an unfortunate result would not be the necessary consequence of trebling the duty. It is admitted that these third-class wools shrink much less than the first and second class wools, and it is doubtless true that the amount of duty to be imposed upon scoured wools of the third class should be less proportionately than the amount of duty imposed upon first and second class scoured wools.

In reference, however, to the proposition that the duty should be doubled on second-class wools when washed, as well as upon first-class, it seems to me there can be little or no debate. In view of the separation of the amendment, I ask the committee to accept the amendment proposed, to wit, that the words "and second" be added after the word "first," in line 18, paragraph 353, page 115.

Mr. ALLISON. Mr. President, I appreciate the suggestion made by the Senator from Montana [Mr. CARTER]. My understanding is, as to wools of the second class, that they are generally washed on the sheep's back. There has been a very small importation of those wools from year to year, even under the free-wool provision. There were only 9,000,000 pounds imported last year. Under the law of 1890 there were only imported about 5,000,000 pounds of those wools. For the purpose of further examination, I am willing myself—and so far as I have been able to consult the members of the committee, they are willing—to insert tentatively the amendment suggested by the Senator from Montana who has just taken his seat, but I want to be more sure of the ground upon which we stand later on in the consideration of the bill. I am willing to accept it for the present in order that we may make progress with the bill.

Mr. QUAY. It seems to me there are differences of opinion in regard to paragraphs 353, 357, and 358 which, upon a little examination and consultation, may probably be adjusted. I think those paragraphs had better go over until to-morrow morning.

Mr. ALLISON. I will suggest to the Senator from Pennsylvania that so far as those paragraphs are concerned there is no difference, as I understand, respecting them.

Mr. QUAY. I understand there exists quite a difference of opinion between the two Senators.

Mr. JONES of Arkansas. How would the paragraph read if agreed to as proposed to be amended by the Senator from Montana, whose amendment, as I understand, has been accepted by the Senator from Iowa?

Mr. CARTER. It would read as follows:

> The duty on wools of the first and second class which shall be imported washed shall be twice the amount of the duty to which they would be subjected if imported unwashed.

Otherwise the paragraph would remain unchanged. The words "and second" are the only addition.

Mr. JONES of Arkansas. I thought there was some proposition to change the remaining words in the paragraph.

Mr. CARTER. My colleague has an amendment pending to treble the duties.

Mr. JONES of Arkansas. I should like to have the paragraph read as it will stand if the amendment proposed by the Senator from Montana and accepted by the Senator from Iowa be adopted.

Mr. ALLISON. I will read it as it is proposed:

> The duty on wools of the first and second class which shall be imported washed shall be twice the amount of the duty to which they would be subjected if imported unwashed.

Then the remainder of the paragraph would stand as it is in the text, except the addition which has already been imported into it by a vote of the Senate.

Mr. JONES of Arkansas. It would read:

> And the duty on wools of the first and second class which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed.

Is not that a repetition of what is in the first part of the paragraph?

Mr. CARTER. One part relates to washed and the other to scoured wools.

Mr. ALLISON. I am willing that the words suggested by the Senator from Montana may be inserted for the purposes of more careful examination, and if it is found that I am mistaken in what I believe, which is that these wools are all now imported in a washed condition, we can recur to it.

The VICE-PRESIDENT. Does the Senator from Montana [Mr. MANTLE] accept the suggestion of his colleague [Mr. CARTER] as to the modification of his amendment?

Mr. MANTLE. I am perfectly willing to withdraw the amendment.

Mr. ALLISON. I understand the Senator from Montana farthest from me [Mr. MANTLE] withdraws his amendment.

Mr. CARTER. He accepts the amendment made with reference to second-class wools, and leaves the remainder of the amendment pending.

Mr. JONES of Arkansas. Let the paragraph be read as it will stand if this amendment is agreed to.

The VICE-PRESIDENT. Does the Senator desire to have read the clause as it will stand as modified by the Senator from Montana, who moves to strike out and insert a new paragraph?

Mr. JONES of Arkansas. No, sir. I meant the amendment proposed by the Senator from Montana. If that amendment be accepted by the Senator from Iowa, then how will the entire paragraph read?

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

353. The duty on wools of the first and second class which shall be imported washed shall be twice the amount of the duty to which they would be subjected if imported unwashed; and the duty on wools of the first and second classes which shall be imported scoured shall be three times the duty to which they would be subjected if imported unwashed; and the duty on wools of the third class, if imported in condition for use in carding or spinning into yarns, or which shall not contain more than 8 per cent of dirt or other foreign substance, shall be three times the duty to which they would otherwise be subjected.

Mr. CARTER. I suggest that the word "class" should be made plural in line 18.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Montana, inserting the words "and second" after the word "first," in paragraph 353, line 18, and to strike out the word "class" and insert "classes." Is there objection? There being no objection, the amendment is agreed to.

Mr. ALLISON. Now I propose on page 116, line 3, to make the text correspond with the amendment voted in some time ago. In line 3, after the word "wool," I move to add an "s," so as to read "wools," and then to insert "of the first and second classes;" so that it will read:

Wools of the first and second classes washed in any other manner than on the sheep's back or on the skin shall be considered as scoured wool.

The amendment was agreed to.

Mr. MANTLE. I wish to offer an amendment to paragraph 355. I move to strike out the words "Angora goat," in line 7, and insert after the word "animals," in the same line, the words:

And goats of all varieties and their crosses, other than the common goat.

Mr. ALLISON. I will ask the Senator from Montana if it would not suit his convenience to offer the amendment to the substitute for the entire paragraph? These are the amendments which are involved in the substitute which is already pending.

Mr. MANTLE. The substitute I offered this morning was, as I stated, prepared by the Wool Growers' Association. It covers everything and is a complete change. It covers all the clauses relating to wool. The amendment which I now propose is a slight amendment to the paragraph.

Mr. ALLISON. Let it be stated.

The SECRETARY. It is proposed to strike out the words "Angora goat," in line 7, paragraph 355, page 116; and after the word "animals," in the same line, to insert the words "and goats of all varieties and their crosses other than the common goat;" so as to read:

The duty upon wool of the sheep or hair of the camel, alpaca, and other like animals, and goats of all varieties and their crosses other than the common goat, of class 1 and class 2, which shall be imported in any other than ordinary condition, or which has been sorted or increased in value by the rejection of any part of the original fleece, shall be twice the duty to which it would be otherwise subject.

Mr. MANTLE. I desire to say briefly in support of the amendment that I learn from parties well informed upon this matter that there are a number of other classes of goats which are grown in the same locality as is the Angora goat. They are not exactly Angora goats, but are crosses of that goat. As the language now stands in the paragraph, the belief is that by specifically mentioning the Angora goat the other grades and classes of goats belonging in the same variety will inferentially be excluded and will be included in the third class. This is the judgment of those who have given the matter considerable consideration, and in order to cover that, to the end that goats of like character, the same variety of goats, producing nearly as good hair, shall be included in that paragraph and subject to the duties of the second class, the amendment is proposed.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Montana.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 367, page 117, line 20, before the word "cents," to strike out "thirteen" and insert "ten;" in line 21, after the word "pound," to strike out "including charges, and on common goat hair;" and in line 22, after the word "be," to strike out "32 per cent ad valorem" and insert "4 cents per pound;" so as to make the paragraph read:

On wools of the third class and on camel's hair of the third class, the value whereof shall be 10 cents or less per pound, the duty shall be 4 cents per pound.

Mr. QUAY. I now renew my request that this and the succeeding paragraph may go over until to-morrow morning. They are very important to my constituents, and I do not care to proceed to their consideration this evening. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After fourteen minutes spent in executive session the doors were reopened, and (at 4 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, June 23, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 22, 1897.

CONSUL-GENERAL.

John Goodnow, of Minnesota, to be consul-general of the United States at Shanghai, China, vice Thomas R. Jernigan, resigned.

CONSULS.

L. Edwin Dudley, of Massachusetts, to be consul of the United States at Vancouver, British Columbia, vice William F. Peterson, resigned.

William Jarvis, of New Hampshire, to be consul of the United States at Milan, Italy, vice Diovol B. Spagnoli, resigned.

Horace W. Metcalf, of Maine, to be consul of the United States at Newcastle-on-Tyne, England, vice William S. Campbell, resigned.

ATTORNEY.

J. Otis Humphrey, of Illinois, to be attorney of the United States for the southern district of Illinois, vice William E. Shutt, resigned.

MARSHALS.

James M. Shoup, of Idaho, to be marshal of the United States for the District of Alaska, vice Louis L. Williams, to be removed.

Charles P. Hitch, of Illinois, to be marshal of the United States for the southern district of Illinois, vice William B. Brinton, resigned.

COLLECTOR OF INTERNAL REVENUE.

Richard Yates, of Illinois, to be collector of internal revenue for the eighth district of Illinois, in place of Joseph L. Wilcox, removed.

COMMISSIONER FOR ALASKA.

Philip Gallaher, of New Whatcom, Wash., to be a commissioner in and for the district of Alaska, to reside at Kadiak, vice Alphonso C. Edwards, resigned. The nomination of Philip Gallinger for said office, which was sent to the Senate on the 19th instant, is withdrawn.

JUSTICE OF THE PEACE.

Robert E. L. White, of the District of Columbia, to be justice of the peace in the District of Columbia (to be assigned to Brightwood), vice Robert W. Best, deceased.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 22, 1897.

CONSUL-GENERAL.

Charles E. Turner, of Connecticut, to be consul-general of the United States at Ottawa, Canada.

CONSUL.

George F. Lincoln, of Connecticut, to be consul of the United States at Antwerp, Belgium.

PROMOTION IN THE NAVY.

Ensign Edward Moale, jr., to be a lieutenant (junior grade).

COLLECTOR OF INTERNAL REVENUE.

Albert B. White, of West Virginia, to be collector of internal revenue for the district of West Virginia.

COLLECTOR OF CUSTOMS.

Joseph W. Ivey, of Oregon, to be collector of customs for the District of Alaska, in the Territory of Alaska.

POSTMASTERS.

Charles V. Hoffman, to be postmaster at Oskaloosa, in the county of Mahaska and State of Iowa.

Moses N. Harshaw, to be postmaster at Lenoir, in the county of Caldwell and State of North Carolina.

John M. Long, to be postmaster at Clay City, in the county of Clay and State of Indiana.

Charles W. Warner, to be postmaster at Hoopeston, in the county of Vermilion and State of Illinois.

Leroy L. Brinkley, to be postmaster at Edenton, in the county Chowan and State of North Carolina.

A. M. Lee, to be postmaster at Huntingdon, in the county of Carroll and State of Tennessee.

Lewis Signs, to be postmaster at North Manchester, in the county of Wabash and State of Indiana.

SENATE.

WEDNESDAY, *June 23, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. TELLER, and by unanimous consent, the further reading was dispensed with.

PACIFIC RAILROADS.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, with the accompanying papers, referred to the Committee on Pacific Railroads, and ordered to be printed:

To the Senate of the United States:

Senate resolutions dated May 17 and 25 ultimo, requesting information concerning the Union Pacific and Central Pacific railroads, having been referred by me to the Attorney-General, I transmit herewith his replies thereto, dated the 19th instant.

WILLIAM McKINLEY.

EXECUTIVE MANSION, *June 23, 1897.*

PETITIONS AND MEMORIALS.

Mr. HOAR presented a memorial of sundry citizens of Massachusetts, remonstrating against any increase in the present rate of duty on tanned skins for morocco, or a duty on raw goatskins; which was ordered to lie on the table.

Mr. SEWELL presented memorials of Dodge, Bliss & Co., of Jersey City; of Chandley & Maps, of Long Branch, and of George Spottswood & Co., of Orange, all in the State of New Jersey, remonstrating against the imposition of a duty of $2 per thousand feet upon lumber; which were ordered to lie on the table.

He also presented memorials of G. & L. Becht, of Newark; of William Dorsett & Sons, E. E. Hogan, the Miller & Oler Shoe Company, Thomas Cart & Co., Harry Chandler, Johnston & Merchon, and John R. Potts, all shoe manufacturers in the State of New Jersey, remonstrating against an increase in the duty on tanned skins for morocco, or a duty on raw goatskins; which were ordered to lie on the table.

He also presented the petition of Thomas A. Kirkman and 26 other citizens of Trenton, N. J., and the petition of Linda M. Elmer and 23 other citizens of Seabright, N. J., praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

He also presented the petition of Walter Rice and 8 other citizens of Bloomfield, N. J., and the petition of J. W. Eller and 48 other citizens of East Orange, N. J., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

He also presented memorials of Charles Smith and 1,240 other citizens of Newark, of sundry citizens of Jersey City and Bayonne, of John Ganty and 739 other citizens of Newark, of Robert Simonson and 24 other citizens of Newark, A. W. Snyder and 24 other citizens of South Orange, John Lambert and 24 other citizens of Newark, Neil O'Donnell and 408 other citizens of Bayonne, Frederick Gebhart and 11 other citizens of Elizabeth, and of M. J. Kohler and 68 other citizens of Newark, all in the State of New Jersey, remonstrating against an increase of the tax on beer; which were ordered to lie on the table.

Mr. FAIRBANKS presented memorials of W. S. Webb and 51 other citizens, of H. C. Clark and 21 other citizens, of C. B. Smith and 51 other citizens, H. E. Kirsel and 51 other citizens, N. A. Gordon and 51 other citizens, M. Engleman and 52 other citizens, W. Schoppenhorst and 51 other citizens, Holtzman & Leathers and 52 other citizens, I. J. Brown and 51 other citizens, X. Feibel and 51 other citizens, and of W. Furbush and 52 other citizens, all in the State of Indiana, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. QUAY presented a petition of Branch No. 451, National Association of Letter Carriers, of Johnstown, Pa., praying that an appropriation be made for the payment of the judgment rendered by the Court of Claims in favor of letter carriers; which was referred to the Committee on Appropriations.

Mr. THURSTON presented sundry memorials of citizens of Nebraska, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. MILLS presented the memorial of A. C. Mills and 52 other citizens of Texas, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. BURROWS presented sundry memorials of citizens of Michigan, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. CHILTON presented sundry memorials of citizens of Texas, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. VEST presented sundry memorials of citizens of Missouri, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. GORMAN presented sundry memorials of citizens of Maryland, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. McENERY presented sundry memorials of citizens of Louisiana, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. FORAKER presented sundry memorials of citizens of Ohio, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

He also presented sundry papers to accompany the bill (S. 1064) for the relief of Harry S. Kellogg, administrator of the estate of Lyman M. Kellogg; which were referred to the Committee on Military Affairs.

REPORTS OF A COMMITTEE.

Mr. TELLER, from the Committee on Claims, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 1067) for the relief of the estates of Daniel Woodson and of Ely Moore;

A bill (S. 2177) for the relief of Mrs. Julia A. Humphries; and

A bill (S. 1166) for the relief of John L. Rhea, executor of Samuel Rhea, deceased, and John Anderson, administrator of Joseph R. Anderson, deceased.

BILLS INTRODUCED.

Mr. FAIRBANKS introduced a bill (S. 2262) for the relief of Thomas F. Ryan; which was read twice by its title, and referred to the Committee on Claims.

Mr. MORGAN introduced a bill (S. 2263) to provide for and to regulate the annexation of the Hawaiian Islands as a Territory of the United States; which was read twice by its title, and referred to the Committee on Foreign Relations.

Mr. COCKRELL introduced a bill (S. 2264) to authorize W. W. Wheeler to prosecute a claim; which was read twice by its title, and referred to the Committee on Claims.

Mr. COCKRELL. In the early part of the session I introduced a bill (S. 254) for the relief of W. W. Wheeler. I move that the Committee on Claims be discharged from the further consideration of the bill and that it be indefinitely postponed.

The motion was agreed to.

Mr. GORMAN introduced a bill (S. 2265) for the relief of the legal representatives of Thomas H. Whaland, deceased; which was read twice by its title, and referred to the Committee on Claims.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. CHANDLER submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Military Affairs, and ordered to be printed.

Mr. MORGAN submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Indian Affairs, and ordered to be printed.

Mr. KENNEY submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Commerce, and ordered to be printed.

CLAIM OF CHICKASAW NATION.

Mr. PLATT of Connecticut. I present two documents relating to the claim of the Chickasaw Nation with reference to the freedmen. One is the statement of a member of the Chickasaw Nation, and the other a statement in behalf of the freedmen. I move they be printed as a document for the use of the Senate.

The motion was agreed to.

INTERNATIONAL BIMETALLISM.

Mr. CHANDLER. I move to have printed as a document for the use of the Senate the report of the meeting of the French National Bimetallic League at Paris, May 28, 1897, and the report of the meeting of the English National Bimetallic League at Manchester, June 2, 1897.

The motion was agreed to.

THOMAS WILLIAMS.

Mr. TELLER submitted the following resolution; which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay to Thomas Williams the sum of $1,500 for injuries received while in the discharge of his duties as an employee of the Senate in the year 1892, the same to be paid out of the contingent fund of the Senate.

INVESTIGATIONS BY COMMITTEE ON INDIAN AFFAIRS.

Mr. PETTIGREW submitted the following resolution; which was referred to the Committee on Indian Affairs:

Resolved, That the Committee on Indian Affairs be instructed, as now constituted, either by full committee or such subcommittee or committees as may be appointed by the chairman thereof, with the full power of such committee to continue during the coming recess of Congress the investigations authorized by the resolutions of May 13, 1890, and February 27, 1891, with the authority and in the manner and to the extent provided in said resolutions, and in the pursuance of such investigations to visit the several Indian reservations, Indian schools supported in whole or in part by the Government, and the Five Nations in the Indian Territory, or any reservation where, in the opinion of said committee, it may be necessary to extend their investigations.

Second. That said committee or subcommittee shall have power to send for persons and papers, to administer oaths, and to examine witnesses under oath touching the matters which they are hereby empowered to investigate, and may hold their sessions during the recess of the Senate at such place or places as they may determine; and the necessary and proper expense incurred in the execution of this order shall be paid out of the contingent fund of the Senate, upon vouchers approved by the chairman of said committee.

PERSONAL EXPLANATION.

Mr. ALLEN. Mr. President, in yesterday morning's Washington Post I observed the following press dispatch sent from Lewiston, Me.:

BATEMAN'S SHOT AT BRYAN—HE DECLARES THE RECENT CANDIDATE GUILTY OF BRIBERY AND FORGERY.

LEWISTON, ME., *June 21.*

Prof. I. C. Bateman, of Auburn, who was the candidate of the People's Party of Maine for governor last year, and who is a leader of the middle-of-the-road forces in this State, to-day published an attack on William J. Bryan. Professor Bateman says that Populist Congressman FREEMAN KNOWLES, of South Dakota, while on his recent trip to his old home in Skowhegan, Me., gave out the information that Mr. Bryan's recent gift of $1,500 to the Populist national committee was made with the distinct understanding that no action against fusion should be taken by the People's Party before the next national convention.

This, Professor Bateman says, is nothing more nor less than direct bribery. Professor Bateman also says that Bryan has appended his (Bateman's) name to Senator ALLEN's letter of notification given out last September. Bateman was secretary of the notification committee, but did not sign the letter in question. He says that Bryan's action in printing his name on the letter in his new book is an act of political forgery. Professor Bateman is a delegate to the middle-of-the-road national conference at Nashville, Tenn., July 4. He says he will bring these matters before that body.

Perhaps I should not notice the contents of this dispatch in a public way, and I would not but for the fact that a distinct charge is made that Hon. William Jennings Bryan, of Nebraska, late a candidate for the Presidency of the United States, is charged by an irresponsible individual with having given me $1,500, "with the distinct understanding that no action against fusion should be taken by the People's Party before the next national convention." Bateman is also reported as having said that "Mr. Bryan appended his (Bateman's) name to Senator ALLEN's letter of notification given out last September." Each of these charges is false.

Some months ago Mr. Bryan conceived the idea that it was his duty to divide the royalty of his recently published book, The First Battle, to be used in support of the cause of bimetallism, and in doing so he allotted $1,500 to the Populist party. I did not desire that this money should be accepted by the party, and so advised the national chairman, who, I am informed, declined to receive it. Before I knew, however, of his declination, I received a dispatch from Mr. Bryan saying that a draft had been sent me for $1,500. The draft reached me almost concurrently with the message. I did not think it good manners to peremptorily return it, and I immediately notified him that I would hold it until he came to Washington. When he did come, which was within a few days, I undertook to persuade him that the money belonging to him should be kept by him, but this he declined.

In the conversation with me, however, Mr. Bryan said that as a friend and, to some extent, a representative of the Populist party, I ought to hold the money and use it at the proper time and under proper circumstances to promote the cause of bimetallism. I finally consented to do so on the condition that before it should be used he should say the intended use was a proper one, and that I would disburse the money only when he consented. Under the circumstances I asked the Hon. R. B. Nixon, financial clerk of the United States Senate, to invest the money in interest-bearing convertible securities, to the end that the money might accumulate and be used at a time when some great emergency in the cause of bimetallism should arise. That I did so is manifest from the following letter from Mr. Nixon, which I will read:

UNITED STATES SENATE, OFFICE OF THE SECRETARY,
Washington, June 22, 1897.

SIR: In answer to your verbal inquiry of this date, I have to say that the sum of $1,500, placed in your hands by Hon. W. J. Bryan some time ago, was at his and your request invested by me in interest-bearing, convertible securities, and they are now in my steel chest for safety. From a conversation had with me at the time, I understood that it was your purpose to hold these securities and the accumulating interest until some emergency in the cause of bimetallism might make its use desirable and necessary.

Respectfully,

R. B. NIXON.

Hon. W. V. ALLEN,
United States Senator.

Bateman's statement that there is or ever has been the slightest conversation or communication, direct or indirect, between Mr. Bryan and myself, or any other person or persons, for that matter, on the subject of fusion of the Populist and Democratic parties, is an absolute and unqualified falsehood. No conversation, agreement, or understanding has ever been had with me on the subject, nor has there ever been, to my knowledge, an attempt to fuse the parties, either nationally or locally.

The statement of Bateman that Mr. Bryan forged his name to the list of names appended to the letter of notification issued by me as chairman of the committee on notification is equally false. The committee consisted of a member from every State and Territory of the Union. It was a cumbersome affair at best and impossible to get together. It became apparent to me that it could not be done, and the precedents of the party in this respect being to notify the candidate by letter and not in person. I took it on myself, at the suggestion of several prominent members of the committee, to write the letter of notification. I wrote each member of the committee for his consent to issue the letter, and I asked for his advice as to the tenor and drift the letter of notification should take. I received, I think, letters from all, or substantially all.

I received several from Bateman, who was perniciously conspicuous in the affair, although he was not secretary of the notification committee as he asserts. I have never known of the letter being condemned by anyone except by Bateman, and possibly one or two others whose action he can control. I signed Bateman's name to the letter of notification at his express request.

Perhaps I ought to stop here with this bare statement of facts, but I may be permitted, without trespassing on the time of the Senate, to express my utter contempt for a rabid, irrational person, occupying no place of consequence in the party, who rushes into print and makes charges the truthfulness of which he knows nothing, thus creating the impression that something is radically and inextricably wrong in Populist circles. To put it mildly and admit that he is a good citizen, which I presume he is, as a politician he would wreck any party of which he was a member if his advice were to be followed. Impulsive to a high degree, irrational, excitable, and inconsiderate, he crazily seeks self-notoriety by assailing a man whom the people love. He has made himself conspicuous only in the small segment of the party to be found in Maine.

This assault on Mr. Bryan is inexcusable. There are no circumstances under which any honorable man could make it, for, whatever may be said of him and the cause he advocates, he is a superior man in every conceivable respect, and one acting from a high and lofty sense of public duty, and not from a selfish motive or a motive of self-aggrandizement.

I may also say within the bounds of propriety that I am not

afflicted in the slightest degree with Bateman's kind of Populism. If his opinions, policies, and "isms" were adopted and acted on by the party, I would find it necessary myself to retire from active connection with the organization. The Batemans, irrational, impracticable, and inconsiderate dreamers and fanatics, are the men who cling to the skirts of a new party like a night moth to a lighted taper, and becoming disappointed because they can not shape its course, desert it usually for its good.

Mr. President, the cause of bimetallism is the cause of the people, and the cause of the people is the cause of God; and no treachery in the ranks of the party will check its growth or mar the good name of its greatest advocate and leader.

Mr. BUTLER. Inasmuch as the matter referred to by the Senator from Nebraska has been brought before the Senate—a matter, however, which I think is hardly of sufficient consequence to have been brought before the Senate, if the Senator will pardon me—it is probably proper for me to say that the statement made by the Senator from Nebraska that this money was offered to me as national chairman to be used in the cause of financial reform is correct, and that I felt impelled to refuse to accept it. However, I thoroughly appreciated the motives that prompted Mr. Bryan to make the offer. It was not offered with any condition or proviso either express or implied, and I should have felt free to have accepted it and used it as the national People's Party committee might direct had it not been that such an act would be liable to be misconstrued.

In view of that fact and also the fact that the cooperative movement between the Populists and Democrats was only for that campaign and that future conduct would be guided by circumstances, upon the whole it was deemed best, not only for the People's Party, but also for the cause of reform, not to accept the contribution. When I declined, Mr. Bryan was put in an awkward attitude, he having publicly announced that he would distribute the money, and he therefore asked Mr. ALLEN to take it in trust for the present at least. He could not keep it without being criticised. I wish to say that I fully appreciate Mr. Bryan's motives and action in this matter, and think that he pursued the honorable and proper course.

THE INITIATIVE AND REFERENDUM.

The VICE-PRESIDENT. The Chair lays before the Senate, as a part of the morning business, the resolution submitted yesterday by the Senator from North Carolina [Mr. BUTLER].

The resolution was read, as follows:

Resolved, That the Committee on Privileges and Elections be, and is hereby, instructed to inquire into the feasibility of applying the principle of direct legislation, through the initiative and referendum, to the legislation of the Federal Government, and report to the Senate at the opening of the regular session of Congress in December, or as soon thereafter as practicable, by bill or otherwise, the result of said inquiry.

Mr. BUTLER. I had intended to speak at some length this morning upon the resolution, and to show that direct legislation is the essence of democracy and that our representative form of government might be improved and brought nearer the people by the application of the methods of direct legislation known as the initiative and referendum to Federal legislation. I intended to show how the ancient right of petition could be made effective by the initiative—how a given per cent of the voters could by petition command Congress or the legislature to heed their petition. I intended to show how through the referendum a certain per cent of the voters could demand that a law passed by Congress or the legislature deemed to be oppressive or grossly unjust be submitted to a popular vote.

I intended to enumerate a number of laws passed by Congress and the various State legislatures which the people would now repudiate and repeal if they had the opportunity to pass upon them. I intended to show how the referendum would destroy the pernicious influence and effects of the trust and monopoly lobby that infests legislative halls and too often influences the people's representatives to vote for measures against the public welfare. I intended to show how the system works in the Swiss Republic, and how in a modified way it is now employed to a greater or less extent in nearly every State in this country. And finally I had intended to show that the principle of the initiative and referendum could not be opposed by any Democrat who indorses the declaration of Jefferson that the people are capable of self-government, nor could it be opposed by any Republican who holds to Lincoln's idea that this should be a government of the people, by the people, and for the people.

However, I shall not take the time of the Senate this morning to discuss these matters, but will be content that the resolution be adopted and go to the Committee on Privileges and Elections. I will reserve my remarks until the regular session next December, when the committee named in this resolution makes its report. I do this, in view of the discussion on yesterday about efforts being made to delay the tariff bill, in order that the People's Party may not be responsible in the least for such delay. I am anxious for the Republicans to pass their tariff bill and have an opportunity to start up that promised wave of prosperity.

I ask that the resolution be acted upon now.

The VICE-PRESIDENT. Does the Senator from North Carolina move that the resolution be referred to the Committee on Privileges and Elections?

Mr. BUTLER. No, Mr. President. The resolution instructs the committee to inquire and report how far the principle of direct legislation can practically be applied to Federal legislation. The Senate must pass the resolution in order to instruct the committee to do this work. I ask that the resolution be now adopted by the Senate instructing the committee to make the report.

The VICE-PRESIDENT. The question is, Will the Senate agree to the resolution?

The resolution was agreed to.

POSTAL SAVINGS BANKS.

Mr. BUTLER. I submit the papers on postal savings banks, which I had selected from consular reports, and also the papers to which the Senator from New Hampshire [Mr. CHANDLER] referred yesterday morning as having been sent to the Committee on Post-Offices and Post-Roads, and move that they be printed as a document.

The motion was agreed to.

THE TARIFF BILL.

The VICE-PRESIDENT. The morning business appears to be closed. It is closed.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The VICE-PRESIDENT. The pending amendment of the Committee on Finance will be stated.

The SECRETARY. In paragraph 357, page 117, line 20, before the word "cents," strike out "thirteen" and insert "ten;" so as to read:

On wools of the third class and on camel's hair of the third class the value whereof shall be 10 cents or less per pound, etc.

The VICE-PRESIDENT. Without objection, the amendment is agreed to.

The next amendment of the Committee on Finance was, in paragraph 357, page 117, line 21, after the word "pound," to strike out "including charges, and on common goat hair;" and in line 22, after the word "be," to strike out "32 per cent ad valorem" and insert "4 cents per pound;" so as to make the paragraph read:

357. On wools of the third class and on camel's hair of the third class the value whereof shall be 10 cents or less per pound, the duty shall be 4 cents per pound.

Mr. QUAY. Do I understand that the first amendment, in line 20, was adopted?

The VICE-PRESIDENT. The first amendment was agreed to.

Mr. QUAY. Then I move to reconsider the vote. My attention was distracted at the time it was passed.

Mr. ALLISON. By unanimous consent it may be reconsidered.

Mr. QUAY. I propose to move to lay all the committee amendments on the table. If there is to be discussion, I will postpone the motion until it is over. As I propose to call for the yeas and nays on the amendments, probably they had better be voted upon together.

The VICE-PRESIDENT. The question is on agreeing to all the amendments of the committee to the paragraph.

Mr. VEST. Mr. President, I have no disposition to enter into the controversy between the woolen manufacturers and the woolgrowers. It is an old quarrel. It was patched up in 1867 and then broke out again in 1883, and it has been raging to a certain extent ever since.

I have before me this morning a copy of the Cotton and Wool Reporter, published in Boston, New York, and Philadelphia, containing a letter from Mr. Lawrence, the shepherd king of Ohio and president of the Wool Growers' Association of the United States, in which he criticises very severely the position of the woolen manufacturers and the last amendments proposed by the majority of the Committee on Finance.

I do not propose to insert this communication in the RECORD, nor to read it, but I will state that the effect of it is what Mr. Lawrence has repeatedly said for the last five years in regard to the wool duties. In Executive Document No. 17, printed by the Senate, will be found the statements of Mr. Lawrence to the effect that the McKinley Act was a failure so far as the interests of the woolgrowers were concerned. As a matter of course he denounced the Wilson Act, which puts wools upon the free list, and he states that it caused an enormous decline in the price of wool, which is not the truth, as shown by the official report. He now reiterates his statement that the proposed duties will not benefit

to any great extent the woolgrowers of the United States, and demands still higher duties than any that have been proposed.

Upon the other hand, Justice, Bateman & Co. declare that this increase upon third-class wools amounts to nothing; that there are virtually no carpet wools raised in the United States; that there are only 15,000,000 pounds of these low-grade wools used in the manufacture of clothing, which, compared with the large amount of wool used in the United States, is almost infinitesimal. They also assert that one month's delay in the passage of this tariff bill will work more injury to the woolen manufacturers and the woolgrowers than a double increase of the amount proposed as an increase by the Finance Committee upon the third or low class wools.

This is a very remarkable communication. I do not know why it was sent to me; my views are very well known on the subject of wool; but I will ask the attention of the Senate to it. I do not think it is a waste of time to learn what these representatives of the woolen manufacturers of the United States, this great firm of Justice, Bateman & Co., think in regard to this very important question. I ask the Secretary to read it.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

Hon. GEORGE G. VEST,
United States Senate, Washington, D. C.

DEAR SIR: There is a vast amount of misapprehension as to the influence of third-class or so-called carpet wools upon the American wool industry, which has evidently led to the increase of 1½ cents per pound by the Finance Committee in the duties on third-class wools (which grade or quality constitutes not over 1 per cent of the domestic production) as a suitable compensation or equivalent for a decrease of 3 cents a pound in the duties on wools of the first and second classes (which constitute 99 per cent of the wools produced in this country).

By the following table of class 3 wools (valued at 13 cents and under, imported during the only three full fiscal years of the McKinley law, dutiable at 32 per cent, and constituting 98 per cent of the total imports of this class), you will observe that the entire imports of this division during that period were 254,138,004 pounds. The average value was 8¼ cents. The average specific equivalent of the ad valorem duty of 32 per cent collected was 2½ cents.

The duty of 4 cents on these wools proposed by the amendments of the Finance Committee provides for an increase of 1½ cents above the old McKinley rates in the House bill on about the only kinds of third-class wools that were extensively imported when wools were dutiable, as will be seen by the following table:

Importations under the McKinley law of class 3, or carpet wools.

[Wools valued at 13 cents and under and dutiable at 32 per cent ad valorem.]

Year.	Pounds.	Per cent of all.	Average value per pound.	Duty per pound.
			Cents.	*Cents.*
1892	88,326,823	97½	9½	3
1893	130,145,464	97½	7½	2½
1894	35,665,717	98	9½	3
Total	254,138,004	98	8¼	*2½

*Average.

	Cents.
Duty proposed by the Senate amendments to the Dingley tariff bill, per pound	4
Duty in the bill (McKinley rates) as it passed the House...per pound	2½
Increase in duty by Senate amendments on wools costing 13 cents and under.....per pound..	1½

Since the McKinley law was passed in October, 1890, the average value in foreign markets of such third-class wools as were at that time valued above 13 cents has declined nearly 3 cents, and the average value of such wools imported during the three fiscal years, shown in the above table, was only 8¼ cents, proving that the lowering of the dividing line by the Finance Committee to 10 cents from the House value of 13 cents places consumers on the same basis as that existing in October, 1890, and that in no way will importers and manufacturers of third-class wools be embarrassed by this change. This increase in the duty proposed by this amendment is less than the periodical market fluctuations often taking place in the brief period of a few months, fluctuations which never disturb the business of the manufacturer, proving that this increase in the rate is a matter of no importance to him.

Therefore the average increase of 1½ cents per pound in the duties on the bulk of the carpet wools likely to be imported is a matter of such insignificance as to be of no appreciable benefit to the woolgrower nor serious inconvenience to the carpet manufacturer. It is a matter of far less importance to the domestic wool industry or to the carpet manufacturer than the injury that both will sustain by only one month's delay in the final enactment of the bill, especially since the retroactive clause has been expunged. So long as that feature remained in the bill, it was equivalent in practical effect to the actual enactment of the law on April 1. Since it has been eliminated, our ports have been thrown open to the unrestricted competition of foreign wools, which are 10 per cent cheaper than they were before the Senate amendments were reported.

So much importance has been given to third-class wools by astute friends of the woolgrowers with but limited knowledge of the actual practical workings of a tariff bill that the Finance Committee have evidently been convinced that an increase of 1½ cents per pound in the duties on the kinds of wool not produced in the United States would be a "quid pro quo" for the lopping off of over 25 per cent of the old McKinley rates which Mr. Dingley's committee had reestablished in the House bill, a change not likely to be of much benefit to domestic sheep husbandry, as the increase in the protective benefits of 1½ cents is not sufficient to encourage the woolgrower to reestablish the now almost extinct industry of producing third-class or carpet wools.

The importations of third-class wools during the six fiscal years 1891 to 1896, inclusive, were 588,799,080 pounds; about 15 per cent of this quantity, or 88,319,862 pounds, is the estimated quantity used for purposes other than carpets, making the annual use for clothing purposes of imported third-class wools about 14,719,997 pounds. While it is true that this class of wool is not grown to any important extent in the United States (and owing to the low cost of foreign carpet wool never will be), the annual consumption of 14,719,997 pounds for purposes other than carpets displaced to that extent a like quantity of the common grades of domestic wool.

If it were the intention of the Finance Committee to protect the American woolgrower by the increase in the duties on third-class wools, that would be indirectly accomplished to a limited extent, and therefore the Senate Finance Committee amendments to the House bill in this unimportant particular are better for the grower than were those of the old McKinley law; but the gain is so trifling as to make it a matter of indifference to him whether the Senate or the House rates on wools of the third class ultimately prevail, especially if any controversy is thereby brought up on this issue that may postpone the final passage of the bill or cause its defeat. The failure to make a new tariff now would shock the business and agricultural communities to their foundations. The effect upon the industries involved in the trifling changes in third-class duties is not worth fighting for. The interests of the American woolgrower are almost entirely limited to the protective benefits arising from the duties upon wool of the first and second classes, as they are about the only kinds of wool produced here.

As stated above, only 1 per cent of the American clip, or, say, 2,720,000 pounds, is used for carpet purposes, and it is even doubtful if any of it is any longer so used, for the roughest and coarsest wools produced here are capable of being used in the manufacture of the now fashionable rough goods.

The National Association of Woolen Manufacturers estimate the yield in clean scoured wool of the domestic clip at 115,000,000 pounds, and 1 per cent of this quantity would be 1,150,000 pounds, which is just about the amount of scoured wool that 2,720,000 pounds of the commonest of the American clip would produce in the fleece condition in which it is marketed by the farmer, with an estimated shrinkage in the process of scouring of 57½ per cent.

Importations under the McKinley law of class 3, or carpet wools.

[Wools valued at over 13 cents and dutiable at 50 per cent.]

Year.	Pounds.	Per cent of all.	Average value per pound.	Duty per pound.
			Cents.	*Cents.*
1892	2,233,262	2.5	14.5	7.5
1893	3,052,117	2.5	15	7.5
1894	264,867	.75	15	7.5
Total	5,550,186	2	15	*7.5
Duty proposed by Senate amendments to Dingley tariff bill				7
Decrease in duty by Senate amendments on wools costing over 13 cents				.5

*Average.

From the above table it will be seen that during the three full fiscal years of the McKinley law only 5,550,186 pounds of the finer grades of third-class or carpet wools costing over 13 cents were imported, which is an annual average of 1,850,000 pounds. The average importations of the wool dutiable at 50 per cent was only 2 per cent of all of the third class, the average value being 15 cents. The specific equivalent of the 50 per cent duty collected upon this wool was 7½ cents per pound, or half a cent more than the new duties of the Senate bill. These wools of the third class that cost over 13 cents under the McKinley law probably entered almost entirely into the manufacture of textiles other than carpet and came into more direct competition with the common grades of domestic wool than the third class wools that cost under 10 cents, and yet the committee has reduced the duties below the House rates on these finer grades of carpet wools, which we can produce, and increased them on the coarser grades, which we never did and never will produce.

The motive that actuated or the principle that guided the committee in reducing the duty below the House rates on the only kinds of carpet wools that America can produce, while consistent with their reduction of 3 cents a pound in the duties upon wools of the first and second classes, is incomprehensible, either from the standpoint of a tariff for revenue with incidental protection, or a tariff for protection to American industries, for all the wools of the first and second classes are those which directly displace American wools, and are those upon which the duties have been reduced; and those third-class wools, which take the place of the common domestic grades only and to the smallest extent, are those upon which the duties have been increased.

We commend to your respectful consideration the exposition of the facts of this unaccountable change from the excellent House bill. Viewed from the standpoint of a tariff for revenue only, or from the standpoint of a tariff for protection, there is no logical defense for the amendments made by the Finance Committee of the Senate. They are a direct stab at the American wool industry, the one which suffered the most severely at the hands of the last Administration. The unimportant changes made in the third-class wools from the House bill (such as the lowering of the dividing line from 13 to 10 cents, and the changing of the character of the duties from ad valorem to specific rates) are changes which to a limited extent will help the American woolgrower, and which will be of no inconvenience to the carpet manufacturer, as shown above; therefore, these changes should be retained.

The restoration of the McKinley rates upon wools of the first and second classes as passed by the House are the vital points, however, to the domestic industry. The interests of the growers are limited to the protective benefits arising from these alone. There will be no more nor no less foreign wool imported at the reduced duty of 8 cents than if the old McKinley rate of 11 cents that was in the House bill had been retained. Every Republican Senator and Representative for the past several years has upheld the excellence of the wool schedules of the McKinley law. It has not only been defended as a model, but has been upheld because under it both woolgrowers and manufacturers were prosperous. The McKinley rates on wools of the first and second classes were no experiment, and for this reason should be restored.

Very respectfully,

JUSTICE, BATEMAN & CO.

Mr. VEST. Mr. President——

Mr. QUAY. Before the Senator from Missouri proceeds, I wish to state that I have not seen the letter of Mr. Justice which he has just had read at the desk, but I should be glad to have, as a supplement to the letter of Mr. Justice, an extract read, which I

take from the Washington Post of this morning. It is in support of his statement as to the importance of the early passage of this tariff bill. If the consignees have been made aware of what was passing in the Senate on last Saturday, on Monday, and yesterday, they need not have expedited the departure of their vessels.

The VICE-PRESIDENT. In the absence of objection, the Secretary will read as requested.

The Secretary read as follows:

BIG CARGOES HURRYING TO 'FRISCO.

SAN FRANCISCO, CAL., *June 22.*

The expectation of a new tariff law in early operation has resulted in the rushing of cargoes of oriental goods to this port. The British freight steamers *Glenavon*, *Hupeh*, and *Cluden* have arrived, and the *Glenshiel* is under way. These four steamers have a joint capacity of nearly 20,000 tons.

Mr. VEST. Mr. President, if anyone will take the trouble to read the communication of Justice, Bateman & Co., representing the woolen manufacturers, and then this long and elaborate statement made by Judge Lawrence, the president of the Wool Growers' Association of the United States, it will be easily seen how difficult it is for a layman to arrive at the truth in regard to this controversy. It is the old story of interested parties seeking their own interests, without the slightest regard to the consumers of the country. Justice, Bateman & Co., the highest authority upon the wool manufacturers' side in the United States, emphatically assert that there is a very small portion—fourteen million seven hundred and seventy-odd thousand pounds—of these low-grade wools brought in as carpet wools and used in the manufacture of clothing.

Here is Mr. Lawrence's statement that at least one-half of all the so-called carpet wools brought into this country are used in the manufacture of cloths. What are we to believe about this? Justice, Bateman & Co. assert that we never can produce in the United States carpet wools to compete with the foreign carpet wools; that the foreigners will be always able to undersell us under any tariff. Mr. Lawrence asserts over and over again that if the woolgrowers obtain their tariff, as he calls it—the woolgrowers' tariff—they will soon in a very few years produce all the wool of all three classes which is necessary for consumption in the United States.

But let either party prevail, and what will be the result? An increase in the price of woolen goods to the people of the United States, an article of prime necessity, an article absolutely needed from climatic conditions. No matter which prevails, whether we listen to our friends who declare that we can soon produce all these low-grade wools or to Justice, Bateman & Co. and the manufacturers of Philadelphia, in either event there will be an enormous increase in the price, and the people of the United States must pay the cost created by this advance.

Mr. President, as I said, it is not my purpose to enter into this controversy, because I say "a plague on both your houses." I believe in free wool, and intend at the proper time to move to strike out all these paragraphs and insert a provision for free wool, no matter what may be the result of the vote in the Senate; and I think I can prove by official data that the decline in the price of wool was never stopped for one instant until the passage of the so-called Wilson law in 1894, and that every high tariff you have put upon wool has resulted in a decline in the price of domestic wool.

Mr. RAWLINS. Will the Senator from Missouri yield for a question?

Mr. VEST. Certainly.

Mr. RAWLINS. I understand the Senator to be in favor of free wool?

Mr. VEST. Yes.

Mr. RAWLINS. The inquiry I wish to propound to the Senator is simply to get his position upon the question—because he is our leader on this side—in respect to protection to the manufacturer of woolen goods. Does the Senator favor high duties upon the manufactures of wool in order to give a monopoly to the woolen manufacturers and increase the cost of those goods to the consumer? I propound the question because I do not think the Senator does favor that policy, but I want an expression from him on that subject, if he will be kind enough to give it.

Mr. VEST. Everything I have said and done since I have been in the Senate would go for nothing if I could not answer that question in the negative. I am opposed to high duties. My reason for opposing this tax upon wool is because it does not increase the price of wool to the woolgrower, even if that were the object in view; and, in the second place—and that with me is an unanswerable argument—I want free wool, because when you put a duty on wool you immediately furnish an excuse for what they call compensatory duties to the manufacturer.

Mr. RAWLINS. Now, do I understand the Senator to concede the right to compensation in the shape of taxation upon articles to the consumers of those articles other than such compensation as results in the administration of the Government and the protection afforded alike to all citizens? In other words, does the Senator favor a specific compensation, giving increased power to charge higher prices to the people because an article is composed of a raw material upon which a duty is placed?

Mr. VEST. Mr. President, I favor free raw material; I favor the lowest possible revenue duty upon manufactured products. That is my position. I do not believe in this new doctrine that when the Government does not need revenue you are still to equalize taxation, whether it is necessary or not. I say the first inquiry that should be made is, How much money does the Government need in order that it may be conducted economically?

Mr. RAWLINS. I simply want to understand the Senator's position correctly, so that my people may understand it. He favors exempting from taxation what he calls raw material, such as wool, iron and lead ore, and coal, and things of that description.

Mr. VEST. Yes.

Mr. RAWLINS. That is, exempting them from taxation to the consumer of these articles. Is that right?

Mr. VEST. Certainly; that is my opinion.

Mr. RAWLINS. To impose a revenue duty upon the finished product of which these materials are the ingredients, so as to enable the producers of those articles to charge higher prices to the consumer.

Mr. VEST. Oh, no.

Mr. RAWLINS. In that way it operates as a protection, does it not?

Mr. VEST. No, Mr. President. I beg the Senator not to put me in the position of saying that I want an increase of cost on anything to the consumer.

Mr. RAWLINS. Very well.

Mr. VEST. The tariff I would impose would be a tariff from necessity to raise revenue. If it happens to effect an increase of cost to the consumer, that is something I can not avoid. I would put the higher duties on luxuries.

Mr. RAWLINS. The Senator will pardon me one moment further. If the necessary effect of a tariff is to increase the burden upon the consumer, including the producer of the raw material, and that benefits only the manufacturer of those products, do you not thereby destroy the uniformity of taxation?

Mr. VEST. Is the Senator through?

Mr. RAWLINS. I am.

Mr. VEST. I have stated my position upon these questions so often that I hardly feel like taking up the time of the Senate by going into an abstract discussion of the tariff.

The Democratic party, as I understand its position, holds to a tariff for revenue only. If there is protection provided, it is because we can not help it; but we do not want to put direct taxes upon the people of this country. If we are compelled to go to import duties in order to collect money to carry on the Government, I would say, impose those duties so as to make them just and equitable, and so as to bear as lightly as possible upon the poorer classes of the people of this country. All this is a matter of adjustment; all these matters must be attended to as each paragraph comes up. One Senator may hold that it is unjust to leave out articles in his State while others are being protected, as it is called, and another may hold that certain articles in his State should be exempt. All these questions must be determined in the adjustment and formation of the different schedules in the paragraphs of a tariff bill.

In so far as I can do so, without regard to my own State or my own people, I shall vote for a tariff for revenue only, so adjusted as to bear as lightly as possible upon the poorer classes of people in the country. I would not impose a tariff for protection; and if anybody gets protection, he gets it because I can not help it, for I am not seeking to give it to him. I would not put one dollar of taxation upon any man, woman, or child in the United States unless the Government of the United States needed it.

Mr. President, I had this communication from Justice, Bateman & Co. read because it shows the position of the wool manufacturer. Upon the other hand, Judge Lawrence holds that the statements made by Justice, Bateman & Co., whom he severely criticises in his last communication to the Woolen and Cotton Reporter, are absolutely unfounded, and he declares that any except higher duties than those imposed in the McKinley Act will not avail the woolgrowers of the United States.

What are we to do? Who are we to believe? Who is right in regard to this matter—this great house of Justice, Bateman & Co. or the shepherd king of Ohio? For myself, I prefer to follow the light of experience, and I do not propose by any vote of mine to put higher duties upon wools or upon woolen fabrics, and I believe I can prove mathematically that the high duties of the past have not resulted in benefiting the woolgrower nor the woolen manufacturer.

Mr. MANTLE. Mr. President, I have heretofore read the letter which the Senator from Missouri has just had read from Justice, Bateman & Co., and while I concede that they know a great deal about the wool business from the wool merchant's point of view, yet I think that there is much connected with the business of woolgrowing from the practical standpoint that Mr. Justice is not familiar with and upon which he is not to be regarded as first-class authority. Many of the propositions which he suggests in his letter, notably those wherein he quotes from statistics relating to the importations of wool, valuations of importations, etc., are absolutely correct and in themselves have a direct application, and a most important application, in the discussion of this measure. There are others, however, when he approaches the realm of conjecture, where, in my judgment, he makes a great mistake, and especially in reference to the amount of what is termed carpet wool which is grown in this country. He puts it at 1 per cent in his letter.

There is plenty of proof, Mr. President, to show that there is a great deal more of that character of wool grown in this country than is estimated by Mr. Justice. It is asserted by men familiar with the business—woolgrowing men, who are very familiar with the character of sheep grown in this country and the character of wool they produce—that of what are known as the mutton breeds of sheep, the sheep growing the long wools, at least one-eighth of every fleece is of a character which would be designated as coarse carpet wool. That is Judge Lawrence's estimate, and that is the estimate of very many other practical woolgrowers with whom I have talked upon this particular phase of the question. This would mean that out of every hundred sheep of that character, eight were producing a wool which would come into competition or which would be brought into competition with these imported third-class carpet wools.

I believe it is estimated that nearly 50 per cent of the sheep of this country are cross-bred sheep—that is, they produce a combing wool not of the same quality as that which is imported from Canada and Great Britain, but still largely of the same character, and therefore there must come from this number of sheep a great deal of wool with which this third-class wool would naturally come into competition.

Mr. President, I prefer to accept the statements of practical woolgrowers, men who have given their lives to this business, rather than to take the statement of Mr. Justice, well informed and intelligent as he undoubtedly is, upon that phase of the wool business with which he is familiar and directly in contact—the business of buying and dealing in wool. I think I may say, however, that he lacks in practical knowledge and information, which can only come by association and by years devoted to the business of woolgrowing. Therefore Mr. Justice is not competent to speak for the woolgrowers upon that particular view of the subject.

The question of how much of these carpet wools enter into the manufacture of clothing and of textiles other than carpets is a very important question to be considered in this connection, because if any considerable quantity of them do go into the manufacture of clothing and of textiles other than carpets, then, if we view the matter from the protective standpoint, it becomes essential, in order to carry out the protective idea and to do justice to the woolgrowers of the country, that a sufficiently protective duty should be levied upon those wools to encourage and protect the growth of the same wools by our own people. I think that proposition can not be denied.

The question is, How much of these wools go into the manufacture of clothing and textiles other than carpets, and this is a most difficult question to determine. The manufacturers themselves can not, of course, be expected to surrender any information they may have, as they would be working against their own interests, if it be true, as I assume and as I believe, that a very large percentage of this character of wool is so used.

There has been some investigation of this matter. I have talked with a great many wool merchants, and I have endeavored to ascertain from them, believing that their information, based upon their dealing with the woolen manufacturer, would indicate more or less clearly and definitely what proportion of wools was so used. I discovered, however, a great reluctance upon their part to give information bearing upon this question; but I have gathered knowledge from different sources. There are gentlemen living in Philadelphia, and others interested in the subject, who have tried to find out something bearing directly upon this point. I have found some information in Mr. North's Wool Book—Mr. North is the secretary of the National Wool Growers' Association—a publication which was read from very extensively here yesterday, representing the manufacturers' side of the controversy as to what is a just and proper duty upon wool.

Mr. North's Wool Book for 1892 gives the total amount of wool, noils, and camel's hair which was used in the manufacture of carpets for that year as 58,426,635 pounds. The total running yards of carpet manufactured in 1890, as I discover from the statement contained in the tariff hearings, was 74,770,910.

This would give about three-fourths of a pound of wool to each running yard of carpet manufactured. The average annual importation of third-class wools from 1891 to 1896 was 92,000,000 pounds, with an average value of about 9 cents per pound.

Allowing three-fourths of a pound of wool to each running yard of carpet, and assuming that all the third-class wool imported went into the manufacture of carpets, we should have had an annual manufacture of carpets of 115,000,000 yards, which is a great deal more than the capacity of our looms to turn out.

It is estimated that the carpet looms of Pennsylvania have a capacity of about 45,000,000 yards, of which more than two-thirds is of the cheapest grade, known as ingrain carpets. The capacity of the rest of the country is about 27,000,000 yards, making a total of about 72,000,000 yards, of which it is safe to say that fully two-thirds is devoted to the manufacture of the cheaper grades, consuming the least quantity of wool.

Thus if the carpet looms had been working at their full capacity from 1891 to 1896 they could have turned out but 432,000,000 yards. Allowing three-fourths of a pound of wool to each running yard would give 324,000,000 pounds of wool consumed in the manufacture of carpets during the period named, leaving 228,000,000 pounds of imported carpet wool which must have gone into the manufacture of clothing and textiles aside from carpets.

But in this connection it must be borne in mind that many of the carpet looms of Pennsylvania and of the country at large have been idle a great portion of the time during the past four years, or running on reduced time, so that their output has not averaged more than two-thirds their normal capacity, thus again lessening the amount of wool consumed.

It should also be kept in mind, in this connection, that a great deal of material other than wool is used in the manufacture of the cheaper grades of carpets—such as cotton, cattle hair, shoddy, rags, and cheap camel's hair, all of which are cheaper than most wools. It is therefore safe to assume that for the past six years fully 40 per cent of the cheap third-class wools brought to this country have been used outside the manufacture of carpets, and when it is recalled that these wools are mainly imported in a washed and scoured condition, thus reducing their shrinkage to a minimum, it becomes apparent to what an enormous extent they have supplanted wools of the first and second class, taking away the demand and lowering their price, to the direct injury of the American woolgrower.

Mr. President, if we make a still more liberal allowance for the amount of wool which goes into each yard of carpet, it still leaves an enormous discrepancy between the carpet manufactured and the amount of third-class wool imported.

There can be no question, in the light of these figures, but that an enormous amount of these so-called carpet wools have been imported at these extremely low rates of duty, and have been imported in a washed and scoured condition, at a valuation of 10 cents or less per pound, and have entered into direct competition with the domestic wools produced by the American woolgrower.

I have another statement here from the Philadelphia American bearing upon the same question, going into the matter very fully. I shall ask to have it printed as a part of my remarks. I shall not stop to read it, as it embraces very largely the same matters of which I have spoken.

The VICE-PRESIDENT. The paper referred to will be inserted, in the absence of objection.

The paper referred to is as follows:

A gentleman living in Philadelphia, probably the highest authority, says that 164 pounds of dyed yarn are used in each piece of 133 yards of extra super carpet, divided as follows:

	Pounds.
Worsted	38
Double reel	86
Gray yarn	40
Total	164

In carpets known as "union carpets" probably less than 1 pound of wool is used in each yard of carpet. How the rates of duties proposed in the Senate tariff bill could increase the cost (as Mr. Dornan says) of ingrain carpet by 20 cents a yard, we are, in view of the fact that not more than 1 pound of wool goes into a yard of carpet, on the average, and that the proposed rate of duty on carpet wools is but 4 cents per pound, unable to understand.

The extent of the present use of carpet wools in the manufacture of clothing and upholstery will be made clear by a perusal of the following bald facts. They need no comment.

When looms of all kinds in Pennsylvania are run to full capacity, the annual production of carpets of all kind is about 43,000,000 yards, and in the rest of the country about 27,000,000 yards, a total of 70,000,000.

Imports of class 3 wools (carpet wools) for the fiscal year ending June 30 were as follows:

	Pounds.		Pounds.
1891	90,405,699	1895	105,405,649
1892	92,581,282	1896	97,921,715
1893	122,386,072		
1894	42,918,594	Total	551,618,992

Here we have a total amount of carpet wool imported in six years of 551,618,992 pounds, an average of 91,936,499 pounds. Now, if it takes but a pound

of wool on the average to make a yard of carpet, our carpet mills running full time would consume but 70,000,000 pounds of carpet wool, or nearly 22,000,000 pounds less than the average importation. But the carpet looms have not been running anything like full time, and the wool used in the past two years for making carpets probably did not exceed two-thirds of the normal, say 47,000,000 pounds. Therefore, of the annual importations of wools classified as carpet wools and averaging 91,936,499 pounds, an average of more than 44,000,000 pounds must have been used during the past two years for other purposes, to wit, clothing and upholstery, or have remained unused.

Mr. MANTLE. As to some other matters contained in Mr. Justice's statement, I do not believe that the Senate amendment raising the duty upon third-class wools averaging 10 cents or below in value to 4 cents per pound will amount to an increase of 1½ cents per pound, as stated by Mr. Justice. It is true that the average import value of third-class wool during the McKinley period was only 8½ cents. That low valuation was induced very largely by the system of ad valorem duties under which fraudulent undervaluations were made, and hence the real value of the wool was not shown. However, last year under free wool the importations of third-class wool came in at a valuation of 9.6 cents. This would give something over 3 cents a pound, reduced to a specific basis. So that the increase made by the Senate committee is less than 1 cent per pound on third-class wools of the value of 10 cents or less, and not a cent and a quarter, as stated by Mr. Justice.

I do agree with Mr. Justice, however, in this, that placing a duty of 4 cents upon wools valued at 10 cents or less and placing a duty of 7 cents per pound on wools valued at over 10 cents will certainly result in all of these wools, or practically all of them, coming in at a valuation of 10 cents or less in order to escape the additional duty of 3 cents per pound.

In my judgment, Mr. President, that is an unwise method of levying the duty, because the sudden jump after reaching 10 cents in value, from 4 cents to 7 cents duty, must inevitably and necessarily lead to fraudulent undervaluations. The result will be, as it has been in the past, that the great bulk of these wools will come in and they will pay but 4 cents per pound duty. That is certain to be the result.

Mr. GRAY. May I ask the Senator a question at that point?

Mr. MANTLE. Certainly.

Mr. GRAY. Is the Senator's proposition in regard to the specific tax to be laid upon these carpet wools to abolish the classification of price as the dividing line, 10 cents or 13 cents a pound, and make a uniform specific duty upon all?

Mr. MANTLE. Whose proposition?

Mr. GRAY. The Senator's proposition.

Mr. MANTLE. I think, Mr. President, that by far the most equitable proposition would be to levy a specific rate upon all carpet wools.

Mr. GRAY. Without distinction as to price?

Mr. MANTLE. To levy a specific duty upon all of the carpet wools.

Mr. GRAY. Without distinction as to price?

Mr. MANTLE. Without any distinction, because I believe when you introduce the ad valorem system, by making a dividing line of value, you will induce undervaluations.

Mr. GRAY. Then what does the Senator think would be the proper specific duty?

Mr. MANTLE. The woolgrowers themselves have agreed that the duty should be 7 cents per pound, and they believe that the same advances should be made with reference to third-class wools as are made with reference to first and second class wools; that is, that there should be an added duty for washed wools and a trebled duty for scoured wools. I believe that any other system, under all the circumstances and with the other classifications, than a single specific rate must necessarily lead to fraud.

In connection with this particular class of wools, so far as the duty of 7 cents upon third-class wools valued at over 10 cents per pound is concerned, I agree with Mr. Justice that the recommendation of the committee is a lowering instead of a raising of the duty, because what few wools of the third class came in heretofore at the higher rate of valuation averaged 7½ cents per pound. So that 7 cents is practically a lowering of one-half cent a pound upon the better grades of carpet wool. However, this is a very small matter; it is almost insignificant, because only 2 per cent of all the importations of third-class wools come in at the higher rate of duty.

So far as the McKinley law is concerned, the woolgrowers of the country, notwithstanding Mr. Justice's statement to the contrary, were not satisfied with the measure. It did not give them in practice the protective benefit which they had anticipated from it, because of these faults in the act itself, these failures properly to guard the classification, these loopholes, such as admitting second-class wools without an additional duty and permitting skirted wools to come in without additional duty. Through these faults and failures the woolgrowers of the country assert, and they prove it absolutely, that they were deprived of the protective benefit which was intended to be given them by the McKinley law. The protective benefit was cut down, as I said before, from 50 to 40 and in some instances 30 per cent.

Mr. GRAY. Let me ask the Senator, for he is familiar with these matters, what was the protective duty given the woolgrowers under the McKinley Act and what was its character, as to whether it was specific or ad valorem?

Mr. MANTLE. The McKinley law gave on wools of class 1—clothing wools—11 cents per pound, double on washed, and triple on scoured; on wool of the second class, known as combing wool, 12 cents on unwashed and washed and triple duty on scoured; and on third-class wool it gave an ad valorem duty of 32 per cent on a valuation of 13 cents or less and 50 per cent above 13 cents in value, with no distinction as to washed or scoured, because under the ad valorem duty it was unnecessary to make that distinction.

Mr. GRAY. I understand, if the Senator from Montana will pardon me, that he says under the duty the woolgrowers did not receive the benefit they expected to receive.

Mr. MANTLE. They certainly did not. That is their contention.

Mr. GRAY. That means that the price of the wool grown in this country was not raised in the proportion they supposed it would be raised.

Mr. MANTLE. That is one reason. Of course it is well known that the price of wool all over the world went down during those years. There was panic everywhere and general depression. It began, I believe, in Argentina, at the time of the failure of the Baring Bros. That country went all to pieces and wool went away down, and it did not recover and has not recovered yet, and I believe the shock then suffered by the woolgrowing interest has never been recovered from. It brought down the prices of wool the world over.

Mr. GRAY. The McKinley Act was not an equivalent for that reduction?

Mr. MANTLE. It was not an equivalent.

Mr. GRAY. It did not raise the price of wool.

Mr. MANTLE. It did not make the difference. That is generally acknowledged by all who have written on the subject. Mr. Justice himself, in the very elaborate tables he has prepared, shows that the protective duty of 11 cents as applied to the higher class wools resulted in a protective benefit of only about 8 cents, while on far Western wools it resulted in a protective benefit of only 5 or 6 cents. Of course, when we take into consideration the enormous distance our wools have to be transported to get it into market and consider upon the other hand the low rate of freight obtainable by ocean transportation for the Australian and South American wools, we begin to see to what extent the protective benefit to the domestic woolgrower was reduced.

I wish to offer a substitute for this paragraph whenever we arrive at the proper time for offering it.

Mr. MILLS. Mr. President, it has always been an incomprehensible thing to me why it is that our woolgrowing people will persistently demand a tax on wool, when the whole record for more than two generations shows that wool under all tariffs has been constantly falling. It is one of the articles that can not be protected any more than cotton can be protected. Cotton can not be protected because its price is fixed in England, and because we export largely infinitely more than we import. The tariff can not affect cotton in the United States. We do import largely of wool, but wool for forty or fifty years has been abnormally high. It was high because its production was not in keeping with the demand for it.

The growth of wool has been stimulated all over the world for the last forty years. It has been increasing in amount vastly disproportionate to the demand for it for consumption, and in addition to that the fact that wool was so much higher than the substitutes which could be used in lieu of it has stimulated the ingenuity of manufacturers all over the world to use in place of wool other things which are cheaper than wool. The use of cotton is largely increasing in the manufacture of wool. The use of shoddy and rags and hair is increasing, and as substitutes for wool articles worth 7 and 8 and 9 cents a pound and cotton at 5 cents a pound have been put into the manufacture of wool and have displaced a pound of wool, and wool has been falling and falling for forty years.

I have the tables before me, and I have examined them from 1860 down. I have here the tables from 1890, and I wish to give to the Senate the price of XX Ohio wool, a standard by which we examine the prices of wool in the United States, in order to see what effect the tariff has had on wool. The McKinley Act went into operation in October, 1890, and XX Ohio wool was worth in the Philadelphia market 32 to 34 cents a pound. Let us see what it was in 1894, when the act was repealed. In August, 1894, it was worth 20 to 23 cents a pound. It had fallen from 32–34 to 20–23 cents a pound with a protective tariff of 11 cents a pound to prevent it from falling, and to make it rise. In August, 1894,

when wool was put on the free list, this Ohio wool was worth from 20 to 23 cents a pound. Then I will give what it is at the present time. In May last (the quotations are not brought down further), it was 21 to 23 cents a pound. With no protection it has risen since it was put on the free list. What do these facts show? Incontestably that the tariff can not affect the price of wool.

Now, let us look at the Texas wool, because I am interested in the Texas woolgrowers, and they are interested in me, making their interest manifest on all proper occasions. Texas wool, "coarse, six and eight months," in October, 1890, when it was protected by a duty of 11 cents a pound, was worth in the Philadelphia markets from 14 to 17 cents a pound. In August, 1894, when it was put on the free list, it was worth 10 to 11 cents a pound. It is now worth 11 to 13 cents a pound. It, too, has increased. The Montana wool has increased. All the wool in the United States has increased since it was put on the free list—not much, but little. It has not fallen.

If the tariff had protected it to the extent of 11 cents a pound, when that 11 cents was subtracted from it the wool would not have been worth 1 cent a pound.

Mr. WARREN. Will it disturb the Senator from Texas if I ask him a question?

Mr. MILLS. Oh, no.

Mr. WARREN. I notice the Senator dates his prices of wool from the time the law went into effect making wools free. Is not the Senator willing to admit that the effect of the Wilson law was discounted before its actual passage and as soon as it was known that the law would be passed, and does he not know that prices had fallen while there was yet a tariff upon wool, because it was known that before the wool could be manufactured and disposed of there would probably be free wool? In taking the later rate he quotes, I presume the Senator will admit that the prospect of a tariff on wool has raised the price in the same way, before we actually have protection and while we are yet under free wool, in the same way that prices for wool were reduced in price by the prospect of free wool.

Mr. MILLS. Mr. President, how is it that the wool has been falling from 1860, 1870, 1880, straight down from 40 to 50 cents a pound, and has got down to the point I mentioned, in 1890, when the McKinley bill was enacted, and has continued with unbroken current right downhill?

Mr. WARREN. It falls in spite of the tariff, but not because of the tariff.

Mr. MILLS. That is precisely what I said, that it was in spite of the tariff, and I certainly have been unfortunate in the use of the English language if I do not convey that idea to the mind of my friend the Senator from Wyoming.

Mr. MANTLE. May I interrupt the Senator from Texas?

Mr. MILLS. Certainly.

Mr. MANTLE. The Senator from Texas will not deny, however, that generally the imposition of a tariff upon wool has raised the price to the American woolgrower.

Mr. MILLS. I have never been able to discover it anywhere.

Mr. HOAR. Then what harm does it do?

Mr. MANTLE. I am prepared to make the statement direct and very emphatic that, so far as the woolgrowers of Montana are concerned, a protective tariff, when in force, generally did enhance the price of their wool. I think it is susceptible of proof beyond contradiction.

Mr. VEST. What tariff?

Mr. MANTLE. Up to the enactment of the McKinley law, and even under the McKinley law, for a portion of the time the price of the domestic product was higher than the price of wool in the foreign market. I do not think there is any disputing that proposition.

Mr. MILLS. I believe it is a principle of the law of evidence that verbal testimony shall not be admitted to vary, add to, contradict, or explain a record. I am speaking from the official record, and not from anybody's memory in the States. Here is the official report made to the Government by an officer of the Government. I take his figures. The price of wool in the Philadelphia and Boston markets, and in the New York market, and in all the manufacturing markets in the United States is precisely the same that it is at the sheep ranch, with the addition of the cost of transportation and handling between the producer and the consumer.

Now, I have shown from these figures that wool has been falling and falling, in spite of the tariff, and not by reason of the tariff. I never said that the tariff led to the fall. I think the tariff may have had some incidental effect in helping the fall of wool, but I started out by saying that it was the increased production of wool all over the world and the increased consumption of cheaper substitutes for wool, taking the place of wool in all the manufactures of the world, such as cotton and shoddy and rags and hair. That is what I said. Here are the figures, and I am going to have them put into the RECORD, so that everyone can examine them. They are sent from the Treasury Department to us. They show that wool since it has been free has risen from 1 cent to 2 cents a pound.

Now, Mr. President, why is that? Not only has wool risen, but we have had the most remarkable increase in the importation of foreign wools into this country that we have ever known. Two hundred million pounds and over last year, and nearly 200,000,000 pounds the year before, far in excess of what we had with the tariff. All this wool has been wrought up by American labor, and our people have consumed it, or very nearly all of it, very little woolen goods being exported from the United States. The price of wool has gone up with that enormous increase of importation.

Why is it? Because the decreased cost of woolen goods from 100 per cent by the McKinley tariff down to 40 per cent increased the amount of their consumption and increased the demand for them, and it carries out the argument which we on this side have been making and which our predecessors have been making for the last half century, that in proportion as you decrease the cost of an article the consumption is increased and there is an increased demand for the things that make both work and material. This increased importation of wool has been a blessing to the workmen of this country, and it has been a blessing to the people who buy the woolen goods.

Who, then, gets the benefit of the duties on wool? The people who pay the taxes have the taxes to pay that you put on wool, not to the woolgrower, but they pay them to the wool manufacturer. Look at your schedules in the bill, look at them in the McKinley Act, and you see a compensatory duty of 11 cents a pound on every pound of wool. Notwithstanding that the pound of wool has not been increased but decreased, the manufacturer gets that 11 cents, and our tariff bills are constructed upon the hypothesis that 3 pounds of wool in the grease make 1 pound of clean cloth. So the manufacturer gets 33 cents a pound for every pound of scoured wool that goes into the cloth, and the sheep grower gets nothing. He has never got anything. Never one solitary cent has he ever received by reason of the tariff.

How much does it amount to? Let us look at the census report of 1890, and this is made by a wool manufacturer. It shows that we consumed, in the manufactures in 1890, 197,763,698 pounds of scoured wool, 7,684,804 pounds of camel's hair, 2,136,244 pounds of mohair, 42,996,248 pounds of cotton, and 73,678,066 pounds of shoddy and alpaca, making altogether 324,259,060 pounds, on every pound of which he got the compensatory duty of 33 cents for what he alleges he pays by reason of the increased tariff on 1 pound of scoured wool, but not one cent did he ever pay on one pound of scoured wool produced in the United States. He did pay on the wool imported into this country, but he never paid it on the wool produced in the United States.

How much does it amount to? I have figured a little on this. On 197,763,698 pounds, at 33 cents (some of this is at three and a half times and some at four times, but I have made a calculation at three times), it amounts to $65,262,020, which we pay to the woolen manufacturers in the United States upon the assumption that they have paid it in addition to the domestic price of their wool. But I have shown when the tariff was taken from wool it did not take 11 cents a pound from the pound of grease wool, but it has increased in value. Not only did they get the compensation for that on wool, but they got, on 42,996,248 pounds of cotton in 1890, for which they paid 7 or 8 cents a pound, 11 cents a pound, as though it had been in the grease, and they got 33 cents a pound when it was scoured and combed and ready to go into the cloth. But the cotton grower did not get anything and the woolgrower did not get anything. The manufacturers got it, and then they got for 73,678,066 pounds of shoddy, at the same rate, $24,000,000. Here is $104,000,000 specific duties, compensatory duties, compensation for what the woolgrower thinks he gets, but what the manufacturer *knows he* gets.

The whole duty in the woolen schedule goes to the manufacturer, nothing goes to the woolgrower, and hence we have been trying to put wool upon the free list, not that we want to discriminate in the bestowal of bounties between the woolgrower and the wool manufacturer, but because in a reduction of the taxes on wool we are enabled to reduce the taxes on woolen goods, and that was the argument made when, in the House, we passed the bill of 1888. It was stated in that report:

> The repeal of all duties on wool enables us to reduce the duties on the manufactures of wool $12,332,211.65. The largest reduction we have made is in the woolen schedule, and this reduction was only made possible by placing wool on the free list.

This has been our argument, and this is the reason why we now ask to put wool on the free list instead of piling up duties on wool for the benefit of the woolen manufacturer.

I ask to have these tables printed as an appendix to my remarks.

The VICE-PRESIDENT. If there be no objection, the tables will be printed in the RECORD.

The tables referred to are as follows:

Philadelphia quotations of prices of wool.

Mr. CARTER. Mr. President, the Senator from Texas properly called attention to the fact that the number of sheep in the State of Montana had increased during late years. That fact can not be controverted. The increase, however, did not occur because of the decrease in the price of wool. The increase of sheep in that State arose from the fact that the increase of the various flocks could not be sold at any price whatever. They would not pay the freight to the seaboard for export purposes. There was no one in the interior of the country foolish enough to purchase stock upon which the loss was continuous, and therefore the increase occurred naturally and inevitably, not adding, however, to the wealth of the persons who owned the flocks, but rather increasing their burdens and cares.

I care not what the figures collected from New York may show. The fact known of all men and disputed by none conversant with the case is that in the State of Montana during the last two years we have been receiving about 6 cents per pound for wool, whereas under the much-berated McKinley Act we received from 14 to 20 cents per pound. The difference between 14 cents and 6 cents is the difference between destruction and prosperity.

Mr. MILLS. Will my friend permit me? Montana wool, unwashed fine, by this official statement sent from the Treasury Department, was worth from 18 to 20 cents in October, 1890, when the McKinley bill was passed, and it was worth from 8 to 10 cents in August, 1894, when the act was repealed.

Mr. CARTER. That was in contemplation of the free importation of wool under the tariff bill then under consideration, precisely as is the case to-day.

Mr. MILLS. Then in October, 1895, it was 10 to 12 cents; in October, 1896, 7 to 9 cents, and now it is from 11 to 13 cents.

Mr. HOAR. When did it get up in price?

Mr. CARTER. Permit me to explain to the Senator that after the election of 1892, the triumph in both branches of the legislative assembly of a party pledged to free wool and the election of a candidate to the Presidency whose cardinal principle of faith hung around this particular item, importers, manufacturers, persons interested in purchasing wool at the lowest possible price, discontinued their purchases in the protective market, contemplating the purchase of wool under a free-trade tariff at a much lower rate than that which they had been compelled to pay under the protective system.

Mr. GRAY. They did not get a much lower rate.

Mr. CARTER. Again, it is suggested by the Senator from Texas that the price has recently been increasing; and why? Because it is believed that the present Congress will place a protective tariff upon wool, and that the free-wool markets of the world will ere many days be shut off from the purchasers in the United States.

Mr. JONES of Arkansas. Mr. President, in confirmation of the position taken by the Senator from Texas, and as clearly demonstrating, as it seems to me, the absolute correctness of his position, I wish to present a paper prepared for me on the question of the condition of the wool trade of the world, which I will ask to have go into the RECORD.

The statement shows that the increase of sheep in Australia from 1860 to 1895 was from 20,000,000 sheep in 1860 to 119,000,000 in 1895; that the wool shipments from that country were 187,000 bales in 1860, and in 1895, 1,835,000 bales of wool, weighing 400 pounds on the average; that while the flocks had increased sixfold in number, the wool shipments had increased tenfold. The improvements in the sheep, the improvements in the wool on the sheep, had been such as to bring about that result.

While there were 16,000,000 sheep in Argentina in 1860, there were 80,000,000 in 1895, and while there were 40,000,000 pounds of wool shipped from Argentina in 1860, there were 495,000,000 pounds shipped in 1895; that while the sheep had increased fivefold, the wool shipments had increased twelvefold. This is the case as to the Capes and every other locality where, with almost unlimited pasturage, with a climate admirably adapted to sheep growing, sheep increase in number and increase in productiveness of wool at such a rate as to produce enormous quantities of wool from year to year. It has sent down the price of wool, and this can not be arrested, in my opinion, by tariff laws in any country.

The paper referred to is as follows:

The great changes that, since the outbreak of our civil war, have taken place in the wool situation of the world, and in manufacturing conditions likewise, have been nothing short of a revolution.

I wish to call attention to some facts that have a most important bearing upon the conditions as they present themselves to us now, and briefly to illustrate the influence which the wool situation has on the manufacturing conditions by directing the demand for goods. In 1860 the supply of wool for manufacturing purposes was still largely covered by the home production of the different countries. Combing wools were produced mainly by England and Canada. These wools were, however, and are to the present day, principally of the coarser and lustrous kind. Since then Australasia, South America, and the Cape to a smaller extent, have been extending sheep farming at a rate of almost overpowering dimensions, and it can not be predicted where the limit of growth may set in.

In 1860 the number of sheep raised in Australasia was about 20,000,000 and the exports were 187,000 bales of wool, at 400 pounds to the bale. By 1892 the number of sheep had grown to 119,000,000 and the exports to 1,835,000 bales. Argentina in 1860 had 16,000,000 sheep and in 1895 the number stands at 80,000,000.

For 1895 the Statesman's Yearbook of 1897 reports the exports of wool as 201,000 tons and of sheepskins as 33,000 tons. Adding the wool on the skins at the rate of computation adopted at this office as 75 per cent of the weight of the sheep skin and say 225,000 tons for the total of wool and wool exported on the skin, we have 495,000,000 pounds of wool. This is an extra large product. But it was overtopped in 1895 by fully 7½ per cent. This is more than a twelvefold increase in the wool production over 1860, when it was 40,000,000 pounds.

Nearly the same ratio of increase is found in the Cape Colonies. But not alone is the number of sheep increased as stated, but the sheep themselves have been improved and carry far more wool on their backs than they did in the sixties. Australia shows for 1860 3.74 pounds of wool per sheep, and in 1892 6.16 pounds. Nearly the same increase is visible in almost all the flocks of the different countries that supply most of the clothing and combing wools of the day; otherwise the proportion of increase in wool supply could not have been greater than the proportion of the increase in sheep. The wool supply of Australasia has grown tenfold, while the number of sheep has only increased sixfold. The same holds good, as shown in the above computation, for Argentina. The English sheep at the beginning of the period here under review average about 4½ pounds of wool, while now the average is over 6 pounds.

But the peculiar feature affecting the situation in manufacturing is that almost all the vast supplies of wool coming from the Antipodes are fit for combing, although they are entirely merino wools, which, under former classifications, prior to the war, were not used for combing purposes. All this tremendous supply of extra-European wools necessarily dominates the wool situation and determines the materials that are to be manufactured from it. Demand does not here dominate the raw material, but the raw material dominates the demand, and dictates as well as follows a complete change in manufacturing. The wonderful improvements that have been made in combing machinery, by which even very short staples can be used for combing purposes, have made it possible to make use of these new opportunities, and enable the trade to manufacture a variety of materials which formerly were all but unknown in the wool-manufacturing industries. Soft-wool effects are produced in worsteds now, and all wool-worsted articles are put on the market at a cost far below anything formerly produced in carded woolen goods.

Cheapness and durability of fabric has been given the consumer as the result of the invention and this change in wool production. This, more than anything else, has made a great deal of mill property of the old type obsolete. A limited supply of combing wools formerly gave to England a monopoly of all the trade that existed in worsteds and stuff goods for which English wools were particularly adapted. The inventions of the last twenty years and the new supplies of soft wools fit for combing have extended worsted manufacturing over all manufacturing countries. England, however, with its great start and historical position in wool manufacturing, and peculiarly aided by its own excellent breeds, leads the world easily in worsteds and stuff goods, and in any goods where the harder textures are a pronounced feature. Germany and France also largely employ combing machinery in the softer manufactures for which Australasian and South American fleeces are so well adapted, and have produced remarkable effects at prices which make goods accessible to the slenderest purse which formerly could be reached by the wealthiest classes only. The question arises how the United States in their breeds are able to supply wools to answer the demand of fashion so largely directed by the world's supply of wool. It is well known that the sheep east of the Mississippi have been decreasing since 1870 under all wool tariffs.

I append tables of the number of sheep in the principal sheep-raising States east of the Mississippi that were raising in about 1870 most of the wools of the United States. I also give in separate tables statements for the transmississippi States and for Western Territories that have lately become the chief woolraising States. Starting with Table No. 1, the aggregate of sheep raised in 1868 in the northern group of States east of the Mississippi was 28,564,000, according to the report of the Bureau of Agriculture, from whose reports, and later on from the reports of the Department of Agriculture, all these figures relating to wool in the United States are taken. Eighteen hundred and seventy-one shows a very large decrease. This decrease may be partly due to a system of collecting data not entirely free from doubt, but still the decrease from the high state of sheep cultivation of the preceding years is a noted fact, supported by the evidence in the outfall of the wool production.

According to the Bureau of Statistics of the Treasury Department in its report on wool and manufactures of wool (1887), the product for 1863 was 123,000,000 pounds; in 1864, 142,000,000 pounds, and from then on it reaches its highest point in 1868, when it amounts to 180,000,000 pounds. From then it decreases rapidly. It falls to 162,000,000 pounds in 1869, to 160,000,000 in 1870, and 150,000,000 in 1871.

Although the years down to 1894 were favored with very high protective duties, still the decline from 1871 on is a continuous one, and shows in 1891 that the sheep in these States had fallen in number to less than one-half of the figures quoted for 1868 and nearly one-third below the smaller figures of 1871. In the southern group of old States east of the Mississippi River the rate of production has changed but very little in the twenty-five years from 1870 to 1895. It is shown that the change in the tariff from a protective tariff to free wool has little altered the state of sheep farming. This would prove that here the sheep are considered a by-product of agriculture and not considered in the light of a wool-raising industry.

Table 3, comprising the States of Missouri, Texas, and California, points out at least in the last two mentioned States a very rapid rise and an almost equally sudden decline. This phenomenon can not possibly be ascribed to tariff changes because the great falling away took place within the years of high-tariff protection, when free wool was not at all considered a possible contingency. The decline in the older Northwestern States, which I call group No. 4, shows in equal force the same phenomenon of a rapid decline within certain years, marking a certain phase of development, and also at a time equally unmenaced by any change in the fiscal law. On the other hand, group 5 comprises the far Western States, the Territories up to late years, which, with the exception of Nebraska and Oregon, show a most remarkable increase in sheep raising. In 1880 this vast stretch of land harbored 5,456,000 sheep, and in 1896-97, 17,860,000, or more than a threefold increase. What makes this most impressive is the fact that the abolition of the tariff on wool did not stem the tide of increase.

In 1895 the number of sheep over 1891 was increased by about 10 per cent, and the year 1896 to 1897 shows an increase of 5 per cent over the preceding year, and this in the face of the fact that 1896 was perhaps the most depressed year in price of wool, a year in which considerable shipments of wool were made to Europe and sold in the English market at better prices than could be obtained in America. The conclusion is irresistible that wool production in these new States—Territorial grounds in 1870 and 1880—can not be an unprofitable occupation under more favorable conditions, when it shows such records as here appended under the lowest prices for the staple on the free-wool basis and under otherwise most forbidding trade conditions. This, however, is nothing more than the experience of the world from the days of mythical antiquity to the time of Russian, Australian, and Argentine experience. The wool-raising center is moving, in obedience to an unalterable law, to regions of most favorable conditions.

In times when population is sparsely distributed over vast territories, the shepherd alone can find profitable occupation, and the only marketable commodities are wool and the skin. They alone bear transportation where roads are deficient and communication with the outer markets must consume considerable time. Unless employed by the shepherd or the herdsman, the land would lie waste and barren. When population becomes dense, the agriculturist encroaches on these precursors of civilization and drives them to their inevitable doom. No laws, no resolves, can change the inevitable logic of events.

But what is the effect of all these facts and of the shifting of the wool-raising center of 1870 to the center of 1890 on the wool supply for manufacturing purposes of the United States? It is well known that even of the fleeces raised in the old sheep-raising States, only a part classified in table 1 are able to compete with Australian and South American wools which go into our worsted and dress-goods mills. Experts tell me that hardly more than one-half of these wools could be used for combing purposes in competition with Australian and South American wools.

We are therefore reduced to a supply of fifty to sixty million pounds of wool, on a liberal estimate, that could possibly compete with the twelve to fourteen million pounds that are raised in the Southern Hemisphere, which supplies chiefly the raw materials for the outer garments of the Western nations of Europe and the people of North America. The people of the United States certainly are the largest consumers, proportionately, of these wools, either in ladies' dress goods and cloths or in wool. How this change in the character of the raw material and the variations of fashion subsequent thereto and consequent thereon have dominated the trade of the United States can be seen by an examination of the importations of wool of class No. 1 from the year 1885 to 1895:

Imports of wools of class 1 in the years 1885 to 1895.

Year.	Pounds.	Year.	Pounds.
1885	13,472,000	1891	32,230,000
1886	23,320,000	1892	50,262,000
1888	23,039,000	1893*	30,778 000
1889	29,224,000	1894*	32,533,000
1890	16,649,000	1895*	125,435,000

* Calendar year.

A steady increase in importation took place under highest rates of wool duty. The year 1892 shows an increase of 27,000,000 pounds over the 23,000,000 pounds imported but five years before, although the numbers of sheep in the United States had increased between 1888 and 1893 from 43,500,000 to 47,000,000. The years 1893 and 1894 show a decline. The panic would be sufficient to explain the decline for 1893, and the pending changes in the tariff in 1894 suffice to explain the falling off in 1894. But the importations for 1895 equal the amount of the total importations of five years, 1886 and 1888 to 1891, and aggregating 124,000,000 pounds, and show plainly the appreciation which our manufacturers give to these foreign wools. They have undoubtedly learned that these wools are a necessary ingredient of the materials for clothing which they must be able to supply if they wish to keep abreast with the demand.

The wools raised in America, outside of what limited quantity is serviceable for combing purposes in the competition with wools of class 1, are serviceable only for blankets, flannels, cheviots, kerseys, cassimeres, overcoatings, knit goods, and the great variety of cloths and ladies' dress goods made of carded wools in all-wool and in cotton and wool fabrics. But, as said before, the large demand heretofore existing for outer clothing of men and women has been seriously cut into. Even the former large demand for flannels has decreased on account of the remarkable development of the American knit-goods industry, due to great improvements in manufacturing processes and the application of inventions of a more intense character than found in any other country in the world.

But this increase does not fully compensate for the decreasing consumption of wool in the flannel line on account of the large amount of cotton and of wool substitutes entering into the composition of the materials for knit underwear. The greater limitation of applicability set to our wools for the States named in Table 1 by recent industrial development might easily disappoint expectations if a high wool tariff were to effect a large increase in our flocks, without due regard to breeds, answering present industrial demands.

Wool, however, is a product of the soil upon which the sheep feeds, as it takes the characteristics imparted to it by the nature of the soil and the climate. It is a well-known fact that the best breeds of fine wool change in a short time on sheep transplanted to Western soil, chiefly the old Territories recently made into States. These wools, it must be borne in mind, are as different from carpet wools as Botany wool is from English wool. The carpet maker wants, of course, a fleece that fills out, and can not be served with the fleeces that are grown in the Territories, as can be easily demonstrated by an examination of samples of wools from the different countries and from our own growths under different classifications, viz, clothing, combing, and carpet wools.

J. SCHOENHOF,
Assistant Appraiser, Sixth Division, New York.

Mr. GRAY. Mr. President, if I had ever been a believer in the protection doctrine, I should, I think, have been cured of that belief by my experience since I have been a member of this body, and notably at this very session. The impossibility of arranging the business of the country and a large part of the business of the world by the wisdom of 300 or more gentlemen who assemble here from all parts of the country better than the people who have that business in hand can manage it for themselves I think has been here perfectly demonstrated. We have seen, in the course of the discussion on the wool tariff in the last two days, no agreement between the parties who represent the great controlling interests, the producers of wool and the manufacturers of woolen goods. They are as much at outs now as they were in the beginning, and I do not know whether there is any hope of reconciling them. Their statements as to facts upon which agreement could be had are entirely different. They do not agree upon any of the essential propositions which should govern a wise settlement of this question by legislation.

Now, how much better to leave all this to the commercial activities of a free, intelligent, and enterprising people? Let them

settle it for themselves, and do not put the interfering hand of the Government into that business in order to disturb the relations that naturally would grow up, and have grown up under natural and normal conditions.

I only rose for the purpose of bringing that conflict out with a little more distinctness, a natural conflict, to-day exploited on this floor, between the carpet manufacturers and the woolgrowers as to what the proper adjustment of this legislative partnership in their business ought to be.

We are told by the statement that was read from Justice, Bateman & Co., who have been known to most members of the Senate for many years as advocates of high protection, that it is impossible to grow in this country the raw material for carpet manufacture. That is what I understood to be the purport of his statement; I could not hear it all. We are told by no less respectable authority, both Senators from Montana, that if you will give them legislative protection, if you will make the Government a partner in their business to a sufficient extent, the woolgrowers will be able at some time to produce all the carpet wools that this country needs for the supply of its domestic manufacture.

Mr. CARTER. Mr. President, will the Senator from Delaware yield at this point for one moment?

Mr. GRAY. Certainly.

Mr. CARTER. I understand the contention to be relative to third-class wools upon this state of facts. Certain portions of the wools imported as third class under reduced rates of duty have been diverted from the purpose originally intended for use as carpets, and instead of being applied to the legitimate use intended, they are used in the manufacture of clothing, thus displacing to a great extent wools that we do produce and can produce ultimately in unlimited quantities to supply our own market.

The fact is that the growth of the so-called carpet wools can be continued in this country indefinitely. But the question of profit in the matter of production intervenes. It is more profitable upon the average to produce the better grades of wool, and we therefore undertake the production of the better grades. What we do object to is the importation of wool as third class under a low rate of duty, displacing the wools we grow, without paying the proper rates of duty as contemplated by the law.

Mr. GRAY. I think I understand the Senator, and I want to say to him that upon that very proposition there is as much difference as there has been exhibited in every other statement of facts here in regard to what should be the basis for imposing these protective duties.

I was about to say, when the Senator rose, that in the circular of Justice, Bateman & Co., Judge Lawrence is quoted as saying what I attributed to the Senators from Montana, that with what he calls a woolgrowers' tariff we can soon produce all the carpet wool needed in this country.

What does that mean, Mr. President? Now, just think of it for a moment. We are told that the carpet wools are so much feared by the woolgrowers of the West because they are the cheaper sorts of wool that it is not profitable to raise in this country and they come from abroad. They come from those countries where the sheep are not cultivated, not crossed, not blooded, but roam over great areas of wild and uncultivated land and are herded by men of a low stage of civilization, and that they come in here and are useful—indeed, necessary—for the coarse texture of our carpets.

The carpet manufacturers can not use the high-priced wools. And yet Judge Lawrence tells us that if you will only give him a woolgrower's tariff they will develop, not a higher industry, not a better and more skillful production of wool, but they will produce an inferior article; and that this nursing of a protective tariff is not, as we usually hear on this floor, to succor and foster an infant industry up into higher and more efficient grades of production, but to bring them down from the profitable production of fine wools to the production of the coarse wools that are now relegated to the inferior countries of the world and those in a lower stage of civilization.

Is that what gentlemen on the other side want to produce by this high protective tariff, and nursing this infant industry of production of inferior carpet wools? Mr. President, the obvious interest of this country, of all its people, is that we should avail ourselves of what the world offers in the low-priced wools and the coarser fabrics produced by inferior civilizations, in order that we may make them, not into luxuries, but into the very necessaries of life for all our people.

Mr. President, I said that there is a difference of opinion, a very decided difference of opinion, as to the proposition made by the Senator from Montana who last spoke; and what they complain of is not that these inferior wools should come in for carpet purposes, but that under that name there would be imported a large quantity of so-called third-class carpet wools that go into the manufacture of clothing and other fabrics. That is what I understood him to say.

Now, high as his authority is, I produce here the statement made by the woolen manufacturers this month, or in the magazine published this month, a magazine called the Bulletin of the National Association of Wool Manufacturers, who have a right to be heard as opposed to the National Association of Wool Growers. What they say in regard to this very proposition is as follows:

Nevertheless, the impression—

That is, the impression that a large part of these carpet wools come into this country and are used in the manufacture of clothing and other articles finer than carpets—

Nevertheless, the impression is profoundly mistaken; and we have taken the pains, in order that your committee may act with the fullest information, to ascertain the real facts in the case, which we present to you herewith in such form that no question can arise as to their authenticity.

The affidavits—

This was addressed to the Ways and Means Committee—

The affidavits submitted are transcripts from the private books of the principal importers of Class III wools, and are therefore of a nature that forbids their publication. They are given confidentially to your committee for your information and investigation. These returns enable us to trace over 70,000,000 pounds—

I should like to have the attention of the Senator from Montana to this statement, for whatever it is worth:

These returns enable us to trace over 70,000,000 pounds of the carpet wools imported into this country in the calendar year ending December 31, 1896. The total imports of that year were 74,325,529 pounds, according to the official statistics of the Treasury Department. There is no reason whatever to doubt that what was true of 70,000,000 pounds was true of the small remainder, 2,679,722 pounds.

These affidavits justify the statement that not to exceed 5 per cent of the importations of the last calendar year went to other uses than carpets. The actual requirements of the carpet mills are so well known to us, through our knowledge of their products, that we are warranted in saying that 95 per cent of the imports of carpet wools of the last six years have gone into carpets.

Mr. CARTER. If the Senator will permit me at this point, I should like to explain that the period over which this experience extended is largely a time when wools of all classes are admitted free of duty, when first and second class wools come in without the imposition of duty, and third-class wools as well. There exists no motive whatever to attempt to pervert from the natural channel the wools of any particular class. When, however, the duty on second-class wool is 10 cents and on third-class wool only 4 cents a pound, a powerful motive is shown for the introduction of all the wool possible at the lower rate of duty. It is a fact statistically sustained that upon the passage of the McKinley law the importations of third-class wools promptly and greatly increased.

Mr. GRAY. I could not hear the Senator. When was it that the importations greatly increased?

Mr. CARTER. After the passage of the tariff act of 1890; and a corresponding decrease occurred in a comparative sense in the importation of first and second class wools. The deficiency in the importation of first and second class wools was made up by the increase in the importations of wools of the third class under the lower or ad valorem rates of duty.

Mr. GRAY. I want always to understand accurately the proposition made by so able a disputant as the Senator from Montana. In reply to this statement of the wool manufacturers in regard to the proportion in the importations of 1896 of the carpet wools that went into other than carpet manufactures, I understand the Senator's statement to be that owing to wool being free a careful classification was not made of third-class from first and second class wools, and therefore I can not depend so properly upon the returns for that year; that where first and second class as well as third-class were brought in free there was no motive to carefully distinguish the classes. That is a statement that is worth considering.

I think we have a test of the accuracy of these returns for 1896, stated to be 74,000,000, of which two million and a half were used for other purposes than carpet manufacture. To test the accuracy of that statement, the report goes on to say that by the returns of the Eleventh Census—the census made in 1890, the year the McKinley Act was in operation, but of course before it went into operation—the "returns show that the actual consumption of third-class imported wools in the census year, by carpet mills and carpet worsted spinners, was 75,853,832 pounds," very nearly the same amount which was stated to have been the importation of 1896.

That was a year in which there was a tax upon and a classification of wools. It was a year in which there was a motive to distinguish the carpet wools, the third-class wools, from the others. We find, in the first place, that the carpet wools imported in that year agree remarkably in the amount of importation with those given as the importation of 1896. The importation by the carpet mills was 75,000,000 pounds, without reading the odd thousands, and the total imports of these wools were 80,851,000 pounds.

Mr. MANTLE. What year was that?

Mr. GRAY. That was the year 1890, when there was a classification of wool, when there was a necessity and a motive for distinguishing between the different classes. So this statement, which seems to be a careful one, of the carpet manufacturers is supported by the returns of the census, and gives me the greater

confidence in asking the attention of the Senate to other statements that they make, for it appears to be a careful and an honestly drawn paper. If this be so, and I am inclined to think that notwithstanding the statements of the Senators from Montana, whose information upon this subject I very cheerfully admit, and whose conscientious desire to represent the interests of their State in woolgrowing I respect——

Mr. MANTLE. Does the statement from which the Senator has been reading give the amount of carpet manufactured?

Mr. GRAY. Yes.

Mr. MANTLE. The number of yards for 1896?

Mr. GRAY. No.

Mr. MANTLE. It does not give that anywhere?

Mr. GRAY. I do not think it does. I can not tell now. It is a long statement. But it shows that for 1896 there were 74,000,000 pounds in round numbers imported of carpet wools and not over 5 per cent was used for other purposes than carpet manufacture. It is a quantity, this writer says, too insignificant to have any influence whatever upon the price or the consumption of domestic wool or one that will make it necessary to legislate against.

Mr. MANTLE. If the Senator will permit me, I want to call attention to at least one inaccuracy in that statement. I find by a reference to the comparative statement, and it is borne out by the other Treasury statistics bearing upon this matter, that the imports of third-class wool for 1896, instead of being 72,000,000 pounds, as stated in that communication, were 96,661,663 pounds, an apparent discrepancy of something over 24,000,000 pounds, which is quite an item in the consideration of this subject.

Mr. GRAY. That is another illustration showing how hard it is to get at the proper basis of facts.

Mr. PLATT of Connecticut. May I inquire of the Senator from Delaware whether the figures are not the amount withdrawn for consumption rather than the amount of entry?

Mr. GRAY. It may be the amount withdrawn for consumption, but here is the statement made by this intelligent and worthy class of our people, to wit, the carpet manufacturers, many of whom live very close to my own home. In the city of Philadelphia I think one-half the carpet manufacturers of the country are found.

Mr. MANTLE. Nearly two-thirds in Pennsylvania.

Mr. GRAY. Nearly two-thirds, the Senator from Montana says, and they are greatly interested to gather, and employ those who can skillfully gather, accurate statistics of this matter. I present them for what they are worth; and I think they are worth a great deal. I think they are entitled to great consideration as against the ex parte statements of the National Association of Wool Growers, of which Judge Lawrence is the distinguished president.

Mr. MANTLE. May I suggest to the Senator that that is an ex parte statement?

Mr. GRAY. Certainly, I say it is an ex parte statement, and I read it for what it is worth. I think it is worth a great deal, and I think it ought to be taken in connection with what Judge Lawrence says in behalf of these people. What I am trying to do now is not to support either side, for I do not know how to support either side, but I want to show the absolute futility of attempting in the Senate or in the Congress of the United States to legislate wisely upon this subject when we can not ascertain with certainty a proper basis of facts, when the statements upon which we are called to legislate differ so widely, as I have shown these statements differ as to the statistics that have been cited here and produced and which are necessary to be considered before we can wisely legislate.

Mr. President, I differ, of course, in my point of view from that of my friend from Montana, as stated the other day. He approaches it from the protectionist point of view, and so does Judge Lawrence. There ought to be some curb even upon the appetite of a protectionist. I think Judge Lawrence and the woolgrowers ought to get upon higher ground and get a wider horizon. They ought to take a broader view of this subject than they do, even from the protectionists' standpoint. I do not believe that even all protectionists would indorse the extreme and extravagant demands made by this gentleman and the statements of what he calls the principles of protection. He says in one place in his statement before the Ways and Means Committee, in speaking of the Wilson Act, in regard to free wool:

> There has never been such a cruel blow inflicted upon any industry in the American Republic from its foundation up to this time.

And yet the statistics read by the Senator from Missouri and the Senator from Texas just now show that the price of wool coming to the woolgrower has not been materially affected by the passage of the Wilson Act and the substitution of free wool for highly taxed wool. I will not pause now. There is a reason for that. I understand that a tax adds to the cost of the material where it is not all produced in the country. There is a reason given for that which is, it seems to me, not only a plausible one, but an absolutely conclusive one. With free raw material and with free wool the manufacturers of wool were so stimulated in this country, and they were so encouraged, that the amount of production and the amount of wool manufactured were such that of course the quantity of domestic wool and imported wool consumed was increased.

Furthermore, there is a fact that ought to be taken into consideration, and is stated by those who are expert in these matters. There are certain foreign wools which are necessarily imported in order to mix with domestic wool. There are certain grades of domestic wool or certain portions of domestic wool that can not be used profitably unless they are mixed with the foreign wool; and the free importation of foreign wools will enable a larger consumption of domestic wool. But that is aside from my purpose. I merely refer, in passing, to that which has been often stated and is very well known by Senators.

I do not think the American people will consider that a very cruel blow that has been struck at this industry after they understand the case, even though Judge Lawrence does say so. He says further:

> In view of all these and other considerations, woolgrowers may justly ask—

What?—

> "indemnity for the past and security for the future"—

What does that mean, Mr. President? We have been told that the woolgrowers must fix the tariff to suit themselves and afterwards the manufacturers will claim their very generous cooperation to help them. And they are to do it upon that principle, not only to raise the price to a profitable point "for the future," but they say they justly ask "indemnity for the past"—

> and that, too, in a measure so full—

Says Judge Lawrence—

> as to inspire confidence that they will be safe from the attacks of open enemies or the stabs of professed friends, even acting honestly, but with erring judgment.

When you once give way to the proposition that any man or set of men or class of men have a right to use the taxing power of this Government for their own benefit, see what sort of men it breeds. Otherwise honest and intelligent men come to think that they have a privilege, and that they are a privileged class and have a right to levy exactions upon the whole of the rest of the people.

Mr. JONES of Arkansas. A vested right.

Mr. GRAY. A vested right, as Judge Lawrence says somewhere else. They think that it may be used for their benefit and that no one has a right to complain. What a perversion of all just ideas of social economy and of social life or civilized life anywhere!

Mr. MANTLE. I wish to suggest to the Senator that in the light of the experience for the last three or four years every industry which has been the beneficiary of the protective tariff is here to-day in exactly the same attitude as the woolgrowers, asking indemnity for the past and security for the future.

Mr. GRAY. I am inclined to think that the Senator is right, but the woolgrowing industry is one of such wide importance that the tariff on wool is sometimes called the key to the whole protective system, and it assumes an importance on that account, on account of its magnitude and on account of its relation to the comfort and well-being of all the people of this country. It may be selected as the sample tyrant of them all.

Now, look at what language they get accustomed to use, without thinking, perhaps, so easily do power and privilege pervert the heart and mind.

> And that, too—

He says—

> in a measure—

That is, indemnity for the tariff—

> so full as to inspire confidence that they will be safe from the attacks of open enemies or the stabs of professed friends.

He uses the terms of warfare. The whole thing, the business of this country and the whole interference of legislation, is here a part of warfare of classes, and here, instead of enjoying the natural opportunities that this country gives of that peaceful trading which means the upbuilding of the commonwealth, he puts himself in the attitude of hostility to large classes of his fellow-citizens and wants to be put by legislation in a place where he can make bare his right arm and smite hip and thigh those whom he regards as the enemies of the woolen industry.

Mr. President, there are no enemies of the wool industry so dangerous and insidious as these friends who demand these unreasonable exactions from the American people. There must be a revolt. If the rest of the people, or a large portion of them, are to be considered enemies by the Wool Growers' Association, they will take the position of enemies, and they will not be lacking in resources to make their hostility felt and their opposition to these extortionate demands effective.

It is rather interesting to observe some of the things said by

this representative of the Wool Growers' Association. Here is what they demand in conclusion, as stated by Judge Lawrence:

We now approach the question—

Says he to the Ways and Means Committee—

What is the most ample protection for the wool industry? It is not difficult to define. It can be given only by such protective duties as will secure the most ample protective benefits.

Two results.—It is that protection which will bring two results:

1. Secure to American woolgrowers the most ample prices for their wools, and

2. Whenever they are able to supply all needed for American consumption, then such duties as will exclude the import of all foreign wools so long as American wools command no more than the most ample prices to reward capital invested and services rendered in wool production.

Mr. President, it is hard to conceive that an intelligent man, as Judge Lawrence is known to be, can bring himself, can gain his own consent, to utter such a proposition as that; that, in the first place, the measure of protection is to be the most ample price for the wools; and second, when they are enabled to supply the domestic markets, the exclusion of "all foreign wools so long as American wools command no more than the most ample prices to reward capital and services rendered in wool production."

Mr. President, that leaves out of sight all other interests in this broad land of ours. It leaves out of sight everything but the woolgrowing industry. I know that he makes a mistake. I know he will find that this result will not follow this law; but that is what he holds out to those he represents with an amazing and a brutal unconcern for the masses of the people, who are to be taxed in order to produce these "most ample prices" for the benefit of the woolgrower.

Wool products, woolen cloths, blankets, flannels, and all that go to make up not the luxuries, but the necessaries of our modern life do not come from the sky like manna. They come out of the pockets of the people, and what comes out of the pockets of the people is the result of their labor. It means that a man must labor a little harder, that he must work a little longer, two days or a day and a half instead of one, to buy the necessary woolen cloth or woolen blanket that are the absolute essentials of the poorest citizen of this country.

Mr. President, that is not right, and you can not defend it upon any ground of fairness and justice between man and man. There is no reason why the labor of the great consuming masses of this country should not be protected by making that labor as remunerative as possible, by making that labor mean to the man who toils as much as possible in all the comforts and necessaries of life; translate his wages into woolen cloth, woolen blankets, flannels, and woolen shawls, and the other articles that go so far to make up the comforts of life; let those wages mean as much as possible; but at all events do not try with the interfering hand of legislation to reduce those wages by diminishing their power to supply the comforts and to promote the well-being of the man who earns them.

Mr. President, carpets are no longer a luxury. Advancing civilization has made a great many changes in the lives of the people of the world, and perhaps in none more conspicuously than in the abundant and diffused use of the manufactures of wool in their multiform character. Carpets are now a necessity; and there is no man who labors with his hands so poor as not to be entitled to buy them without exaction and without unnecessary toll being paid to his fellow-man in order that he may enjoy this necessary of life. There is no reason why the thousands and hundreds of thousands of men who toil for their daily bread in this and the other greater cities of the land should have to pay toll to the woolgrowers of Montana, respectable and worthy as they may be as a class, in order that they may turn their hard-earned wages into these comforts of daily existence; none at all. There can not be any reason for it.

This bill was brought in here, and we were called in extra session to enact it into law. Why? The one reason that justified the President in issuing his proclamation was that there was a deficiency in the Treasury, that the receipts were less each day than the expenditures; and we were called here to properly perform the duty of creating a larger revenue.

Mr. President, it is infamous, it seems to me, that in order to take revenue from the pockets of the people—and which they are willing to pay, hard as it may be, if it honestly goes into the Treasury—I say it is nothing less than infamous that before the revenue can be raised certain favored classes in this country must levy toll upon every dollar that goes into the Treasury two or three times the amount.

You say practically to us, when we say we are here to cooperate with you in this worthy act of producing an adequate revenue, adequate for the wants of the Government, "You shall not raise a dollar of that needed revenue until you have paid tribute to the protected manufacturers of this country, and it is only after having paid that unjust exaction of many, many millions that you will be allowed to place the comparatively few millions necessary to make up the chasm between the receipts and expenditures of this Government."

Now, you can not raise this tax on raw wool without raising the tax or making a pretext for raising the tax on the manufactures of wool. You can not increase the duty on carpet wools without raising or creating the pretext for raising the duty on carpets and thus raising the price of carpets.

I think it was said a while ago—perhaps by one of my friends from Montana—that a large proportion of these carpet wools were made into ingrain carpets; but such is the fact, at any rate. I think that two-thirds, perhaps, of the carpet wools that are imported, those very wools we are talking about, are made into the cheap ingrain carpets, those that are used now by the poorest man who labors with his hands, to cover his floors, and thus make decent and comfortable habitations for himself and his family. He has to pay this stipend to the woolgrowers of Montana; he is asked to do it.

Now, what is the condition of those people that justifies such a request on their part from the great mass of the poor people of this country? Grant that they are worthy, grant that they are honest and good citizens, yet they are no more worthy and their industry is entitled to no more consideration than that of the numerous millions upon whom they ask to make this levy.

Let me read just a few lines from the Philadelphia Ledger, published in the chief seat of the carpet industry of this country, and a very fair-minded paper, not of Democratic or free-trade tendencies that I was ever able to discover. The Philadelphia Ledger published an interview with Robert Dornan, the great carpet manufacturer. Of course the Senator from Montana will say that this is an ex parte statement. Of course it is; but if he knows Mr. Dornan by reputation as well as I do, he will think it worthy of consideration; at least as worthy of consideration as the ex parte statement of Judge Lawrence on the subject:

The Philadelphia Ledger publishes an interview with Robert Dornan, the great carpet manufacturer of that city, on the subject of the Senate committee's report on carpet wool. The mischief of the change made from the Dingley rates consists in fixing 10 cents as the dividing line between low-grade and high-grade wools. Under the Senate committee's rates all wools costing between 10 cents and 13 cents per pound will bear the highest rate of duty—that is, 7 cents per pound. "In a normal year," says Mr. Dornan, "the importation of carpet wools amounts to $10,000,000 in value. Under the Dingley bill the duty would have amounted to about 3 cents a pound, but under the Senate bill it will average 6 cents. The difference of about $3,000,000 would have to be borne by the purchasers of the carpets; woolgrowers would not be affected in any way. It would amount to a direct tax of that amount principally on the users of ingrain carpets. The tax would increase the cost 20 cents a yard. Such carpets sell to-day for 40 cents a yard. Half the carpet wool imported goes into ingrain carpets." The effect of raising the cost of ingrain carpets 20 cents per yard would be to increase the demand for straw mattings.

And there we go. Here comes the selfishness of the carpet manufacturer. He says raising the price of carpets is going to increase the importation of straw mattings; and we tried to hedge that off by putting a protective or a prohibitory duty on straw mattings, which happily the good sense of the Senate has seen fit to discard. But just look at what the attempt was. They seemed to be pursuing the unhappy consumer, who represents the millions in this country, and when you have raised the duty on the carpet so that he can not afford to buy it, and turns to the cheaper matting, you raise the duty on matting, or attempt to do it, and drive him back to carpet. So you go, until after a while you will exhaust this source of bounty, and you will perhaps make men so poor that they can buy neither carpet nor matting.

Mr. MANTLE. I just want to make a comment upon the communication just read from Mr. Dornan.

Mr. GRAY. If it is not too long, I shall be glad to hear the Senator.

Mr. MANTLE. Mr. President, I want to call attention to the evident inaccuracy in the statement of Mr. Dornan that it will raise the price to 6 cents. I have just stated from the statistics that 98 per cent of all those carpet wools came in at a valuation of less than 10 cents for the years beginning 1891 and running down to 1896. It is therefore impossible that the duty proposed by the Senate Finance Committee could raise the duty to 6 cents per pound; it is simply impossible, in view of our past experience.

Mr. GRAY. There is just what I started out to comment upon, the absolute impossibility of ever arriving at an agreed state of facts upon which we can wisely legislate. Here is Mr. Dornan, who is engaged in carpet manufacturing, and he tells us that the average duty, taking the two classes together, will be 6 cents a pound, and it will add $3,000,000 to the price of low-grade carpets, the ingrain carpets, which are one-half of the carpets consumed composed of these low grades of wool.

Mr. MANTLE. I say that, in the light of the record and of all the facts and all the statistics bearing upon importations, that statement is manifestly inaccurate.

Mr. GRAY. Of course when the Senator from Montana makes a statement of that kind, I am bound to treat it with respect, and I do; but I only want to say that I am in the position of a judge and of a sworn judge in this matter, and with all the evidence before me it is impossible for me to arrive at a satisfactory conclusion in reference to it, and I do not believe any person here can

arrive at a satisfactory conclusion in regard to it, so as to make a safe basis for legislating these high protective duties. What the Senator states may be true, but let us hear what Mr. Dornan says:

The carpet manufacturers thought that they had erected a Chinese wall against Chinese mattings in the Dingley bill, but they find that this is a bill that two can play at, Judge Lawrence being the other member of the duet. The whole quarrel over wool duties resolves itself into a question of nerve. If the manufacturers are willing to fight à outrance, as the wool-growers evidently intend to, they will win the game. If not, they will lose it and their money besides.

Mr. President, I confess that it is somewhat shocking to me to hear in the halls of legislation of the Congress of these United States these unseemly contests going on. Instead of having their representatives here fighting over an advantage on this item or that item of a tariff bill, tell them to go home, tell them to return to their business, and seek to build up the prosperity of this country whilst we hold the great power of taxation so high that it can not be reached by the greedy and avaricious hand of the privileged classes. Keep the great powers of Government for public purposes, and do not prostitute them for private gain or for private purposes, and you will produce a contentment and harmony and agreement among all these great enterprising business classes of this country which will never be produced by the attempt to go into a Government partnership with any of them by tariff legislation.

Mr. President, I had something more that I wanted to read from the Bulletin of the National Woolen Manufacturers, if I could lay my hand upon it, but I do not know that I ought to consume more of the time of the Senate, which I am anxious to economize in order that we may get through with this bill. I want to read nothing that I find here, taken from the Boston Herald, bearing upon this very subject of carpet manufactures, and then I shall leave this subject:

[From the Boston Herald, April 21, 1897.]

KEEPING UP PRICES.

The difficulty in the way of coming to a compromise with the woolgrowers in the matter of the tariff tax is found in the theory entertained by some of them, of which the following is an authoritative statement:

When Mr. McKinley reported his bill, April 16, 1890, it proposed a duty on the better grades, third-class wool, of 8 cents per pound specific; no ad valorem duty. In view of the decline in the world's price of wool since 1890, higher duties are now required.

It ought to be noted in passing that the lowering of the world's price of wool has made this specific duty a much higher ad valorem duty than it was when the McKinley law was passed.

This formulates a notion of Government function that is so entirely at variance with the past conceptions of even the protectionists that it is not at all singular that a good many of our Eastern manufacturers are dismayed when brought face to face with the logical conclusions which must be the outcome of its application. The idea is this, if we assume, for purposes of illustration, what may be a somewhat exaggerated statement of conditions, as in this way the point at issue can best be brought out: Carpet wools, let us say, for the purposes of this argument, were selling abroad in 1890 at 10 cents a pound, and it was considered at that time by the framers of the tariff that an 8-cents-a-pound duty was the proper thing. This would carry the American price up to 18 cents.

Since then, still assuming the price in the world's market, for carpet wool has gone down to 5 cents a pound, and the argument made by the woolgrowers, who are now largely controlling action in Congress, is that the duty upon this carpet wool should be 13 cents a pound, so as to still maintain the American price at the old figure of 18 cents a pound. In other words, when, in consequence of better methods of transportation and cheaper methods of production, reductions in price take place in wool, these should be offset by advances in the rate of duty, so that the American consumers of wool should never be allowed to obtain any of the advantages which modern discovery and the use of improved methods bring about.

The underlying theory of this notion is that it is the duty of the Government to put in a peg, as it were, to prevent a reduction in prices from any cause whatsoever. If the Western farmer can thus force the Government to keep the price of carpet wools at 18 cents, he can also, on the same ground, compel Congress to take such action as will keep the price of wheat at $1 a bushel, or compensate the raiser of it for any deficiency. This assumption, which seems to underlie probable tariff action, starts our country on a scheme of socialistic change which can not fail to revolutionize what have been considered in the past to be the principles of our Government.

Mr. President, it seems to me that is a thoughtful and correct statement of some of the heresies which underlie this whole proposition. We want at every turn to deny to our people and to the consumers of this country the benefits of the great improvements which civilization and progress have wrought in the world. If there are better methods of transportation, if there are larger areas of production on the world's surface, which bring down the prices of these commodities, such as wool, an absolute necessary of life, why should not our people avail themselves of them?

Why should not the millions of people who toil, who rise up early and go to bed late, and do not eat the bread of idleness, avail themselves of the bounties of nature that have been developed by the progress of the world in enterprise and in civilization? Why, as soon as some great boon is discovered, should we want to erect a wall between the people of this country and the enjoyment of that boon? What right have we to do it? The world is none too big. You would make it smaller. You say that it would be better if there were no other land except that comprised between the lakes and the Gulf and the two oceans, and if all the rest of the earth's surface were a wild waste of waters.

That is the ultimate logic of the protective theory, that the United States would be better off, and the people who live in it would be better off, if north of the Canadian line was a frozen zone, uninhabitable and unproductive. Should we be better off? No. We enjoy the benefits that God has given by this variety of climate and the variety of races on the face of the earth. We aer better off, and those on the other side of the Canadian line are better off, for the association, and every profitable trade we make with them benefits not only them, but also benefits those on this side of the line who are thus associated with them.

No, Mr. President, the world was given to man to be enjoyed, and all its products and all its fruits should be made available for all the people in this country, and at least no legislative obstruction ought to be placed between them and that enjoyment.

Mr. MANTLE. Mr. President, I have listened with a great deal of pleasure to the very able and eloquent speech of the Senator from Delaware [Mr. GRAY], as I have listened upon many other occasions. Of course he and I differ radically upon the basic principle involved in this discussion, and that is the question of protection versus what we usually term free trade. I believe in the principle of protection, but even if I were a believer in the policy of a tariff for revenue only, I think that all fairness and equity would require that I should insist that even a tariff for revenue should be imposed as equally as it could possibly be imposed, for you can not levy a tariff for revenue even upon manufactured products which will not bring with it some incidental protection to the manufacturer and to the disadvantage of the producer of the raw material.

I do not think this proposition can be denied; and hence I think my distinguished friends upon that side who talk so eloquently in favor of free wool and other free raw material are somewhat inconsistent from my point of view.

If there is to be any benefit derived by any class of our people engaged in any industry from the imposition of any sort of a duty it ought to be made general and uniform, and ought to bear equally upon all the people and all classes and all interests and all industries. That is my idea of it, even looking at it from a revenue point of view.

One would suppose, to listen to these discussions and arguments made in behalf of cheapness by the advocates of a revenue tariff, that the sole end and aim and purpose of existence was cheapness; to secure everything cheap. Mr. President, I do not agree with that view. I do not believe that it is the part of wisdom, of statesmanship, or of common sense to place the people of this country upon equal terms of competition with the people of every other country in the world. I do not believe that it is wise to do it, and hence I am a believer in the protective principle. I do not believe that the woolgrowers of this country ought to be placed in competition with the cheap and degraded labor of other countries. The cheapest lands in the world are the countries whose people are the most degraded, where they are the least advanced in civilization. China is the cheapest country upon the face of the earth, but I do not believe that we want to emulate the conditions which exists in China. Cheapness is not the sole end and aim and purpose of human existence.

What the people of this country want to make them happy and prosperous and contented is work. They want something to do; they want employment; and I believe we had better devote our energies and our legislation, in so far as it can be done, to providing means for sustaining and aiding and encouraging them in doing their own work, in producing the things that they need for themselves to eat and to wear, rather than to adopt a system which will encourage their production in countries outside of our own.

Mr. President, this briefly is my opinion with respect to a protective duty. I think Daniel Webster once said something bearing directly upon this point. Speaking of this idea of giving the people employment, he said it was the great purpose and idea to be constantly borne in mind, to give the people work, to give them something to do. He said if they have employment for their hands they will have employment for their teeth, and when men have employment for both hands and teeth, then they will be happy, contented, and prosperous. That I concede to be true theory from my way of looking at it. The aim and purpose and general intent of the protective system is to give to the laboring men of this country the work to do at home in prefereuce to having it done abroad.

Mr. President, I concede that under a protective system injustice is liable to creep in. It has crept in. I believe that certain sections of our country have in the past been somewhat favored, overfavored, in the arrangement of protective tariffs; and that is why I am here to-day raising my voice in behalf of the producers of what is called raw material, because I believe that in former tariffs their interests have been neglected, and I believe their interests are entitled to just as much consideration in the framing of this tariff as are the interests of the manufacturers who have so many here to speak for them so ably and so eloquently. I do not believe there is the slightest danger of the manufacturers being illtreated or unfairly treated in the framing of this tariff bill. They have never been in the past, and they will not be at this time.

I must beg leave to differ with my honorable friend from Texas [Mr. MILLS] as to what has been the effect of the tariff laws with relation to wool. I think, and I say it with all due respect, that the opinion of the woolgrowers themselves carries, naturally, more weight than the quotation of any statistics or any figures given; and they are united, so far as I know, in the agreement that under the tariff of 1867 the wool industry of this country did prosper beyond doubt, and the number of sheep increased greatly.

I have before me a table, which I find in the tariff hearings, in which it is shown that from 1873 to 1884, the period during which the law of 1867 was in effect, the increase of sheep and of wool in the United States was greater than in any other country, and the increase was very large in Australia, in Africa, and in Argentina; but the percentage of growth in the United States was greater than it was in any of these countries, showing conclusively the benefit which had been derived from the duty upon wool.

Speaking, Mr. President, with reference to the communication read by the Senator from Delaware contained in the Wool Book, the organ of the National Association of Wool Manufacturers, I agree entirely with my colleague [Mr. CARTER] in his comment and criticism. The year 1893 is not a good year for comparison. We were under free wool during that year, and, as my colleague has said, there was no inducement to bring in wools at a lower valuation; there was no duty, and hence other wools could be secured—the wools from South America, where wool is very cheap, but it is of a coarse, heavy, shrinking character, and there is a great deal of it there that never reaches the United States under a tariff, and never will; but with free wool it is brought in largely.

I suggest, too, that the statements of these manufacturers ought to be taken with many grains of allowance, just as well as the statements of the woolgrowers.

The woolen manufacturers are very expert in figures, and I should have been disposed to have attached much more importance and to have given a more respectful hearing to their statement had they given us all the details with reference to carpet manufacturing. It would have helped us very much in the solution of this question of how much carpet wool goes into the manufacture of clothing had they given the number of yards of carpet made each year. Surely this information was in their reach, and it would have helped us very much in arriving at a correct understanding; but for reasons best known to themselves did not do it.

I believe, Mr. President—and I have seen no reason to change my mind—that a very large proportion of these wools do go into the manufacture of textiles other than carpets. There has been nothing adduced to show that there has been a corresponding amount of carpet manufactured in the United States to consume the enormous amounts of third-class wools which have been imported. In 1893, under the operation of the McKinley law, there was imported nearly 130,000,000 pounds of third-class wools. Under the low ad valorem duty in that year, the value of third-class wool had been reduced to 7.6 cents per pound.

During all the years from 1883 to 1890 the average value had been 10.1 cents, but under the ad valorem clause in the McKinley law, with its opportunities for undervaluation, the value of these wools immediately began to go down, so that, as I have said, in 1893 they were brought down to 7.6 cents per pound. No sooner had we free wool than the value of these wools immediately began to rise, because there was no inducement for undervaluation, and for 1896 the imports of third-class wools came in at a value of 9.6 cents per pound, being 2 cents per pound more than in 1893 under the McKinley law.

There has been nothing produced by any of the manufacturers to show that the 130,000,000 pounds of third-class wool imported in 1893 went into the manufacture of carpet. It can not be shown. We have not to-day, so far as my information goes, the capacity to use and manufacture that much carpet wool.

Mr. GRAY. Will the Senator from Montana allow me?

Mr. MANTLE. Certainly.

Mr. GRAY. It does appear here from what I read that in 1896 the manufacturers were able to trace out of eighty-odd million pounds——

Mr. MANTLE. Seventy-two million pounds, the Senator read for 1896.

Mr. GRAY. No; 80,000,000 pounds. I have not the book here at present. It is 80,000,000 pounds. However, I am subject to correction. They were able to account for 70,500,000 pounds of wool used in the carpet industry, leaving the difference unaccounted for.

Mr. MANTLE. Seventy million pounds the Senator read and 2,000,000 pounds unaccounted for that went into something else.

Mr. GRAY. They go on to say—I do not know whether I read it—that they are able to show that the percentage not used in carpet manufacture was largely used in the manufacture of such fabrics as coarse and cheap horse blankets, such as sell for a very low price and that everybody can buy, and which are very necessary, of course, to the farmers and others who can not afford to buy high-priced blankets, and also into the wool tops of shoes; that a large number of gaiters are made with wool tops, and those wool tops are made out of these coarse third-class wools. They account very largely for that difference in that way. I have now the book at hand, and I want to verify the statement. I will not interrupt the Senator longer.

Mr. MANTLE. My recollection is that the Senator read seventy-two million and some-odd thousand pounds, and that 70,000,000 pounds——

Mr. GRAY. The Senator from Montana may be right.

Mr. MANTLE. Went into the manufacture of carpets, and that 2,000,000 pounds went into something else. So we have the discrepancy between the amount quoted and the amount given in the comparative statement, 97,000,000 pounds imported in 1896.

Mr. GRAY. Neither of us is quite right. The total imports in the year were 74,325,529 pounds, and the proportion that did not go into the carpet industry was 2,679,722 pounds. Those are the figures I used.

Mr. MANTLE. I have just a word more to say in connection with this matter. In my humble judgment, the woolgrowers of the country are entitled to all the consideration that any manufacturing industry is entitled to. The whole protective theory is based upon the idea that we shall enact a protective law that will fully protect every interest to which it applies. The aim and object and purpose of a protective tariff are to encourage and foster the industry at which it is directed to the point that it will become self-sustaining.

Looking at it in this light, with the purpose and intent of so encouraging the industry as to make it self-supplying for this country, I say the proposition presented by the woolgrowers, although I know there is not the slightest possibility of its being adopted here, is entirely defensible upon protective grounds.

So far as the language of Judge Lawrence is concerned, he is "amply" justified in using that language, because he finds it in the national Republican platform, where "ample protection" is promised the woolgrowing industry in this country. Therefore no criticism can lie against Judge Lawrence for having used that term.

I find here a few reasons, very tersely and briefly set forth, why there should be a sufficient protective duty upon wool. I get it out of the Tariff Hearings, from the statement made by Mr. Wallace. It is as follows:

[From a statement by Hon. George H. Wallace, Tariff Hearings, page 1602.]

WHY THE WOOLGROWER WANTS PROTECTION.

The woolgrower asks for protection for reasons which are generally understood, but may be briefly summarized as follows, viz:

First. The climatic conditions in the United States are not as favorable to the industry as in other lands.

Second. Our civilization places many burdens upon him which his foreign competitor does not bear.

Third. Land transportation, which he is compelled to pay, is a great deal higher than ocean freight, which his foreign rival has to pay.

Fourth. The labor he employs costs very much more than similar labor in other countries.

Fifth. This is the only means of meeting or of offsetting the governmental aid given woolgrowers in other lands.

Sixth. It is unjust to tax him for the support of other industries while he is left to struggle unaided against these adverse circumstances and conditions.

Seventh. He needs protection that he may be encouraged to utilize rough, mountainous sections and arid portions of our country which could not otherwise be made of service.

Eighth. That the industries of our country may be diversified, to the end that all may be employed, and competition—degrading, grinding competition—may be lessened.

Ninth. Because patriotism demands a domestic supply of wool, to clothe our soldiers in time of war and our citizens in time of peace.

Tenth. Past legislation has invited his efforts in this direction, promising him rewards for his investments of capital, time, labor, and study, and it would be wrong to repudiate the contract.

Those seem to me to be very good reasons to advance from the protective standpoint in support of adequate, equitable, and just rates of duty for the woolgrowers of this country.

Mr. JONES of Arkansas. Mr. President, several Senators have already called attention to the very great difficulty in getting the facts about these contested points. The Senator from Montana [Mr. MANTLE] who has just taken his seat stated that he believed a very large part of the wools imported into this country as carpet wools were used for other purposes. I have in my hand a statement from a man who I believe is as competent to speak about it as anybody in the United States; a man who has no interest in it, a man disconnected with it, but whose position is such as certainly to make him as competent to judge, in my opinion, as anybody, and he states that he does not believe 2 per cent of the wools imported as carpet wools are used for any other purpose. Of course I can not tell whether that is true or not, but it is to be considered, and it impresses me as strikingly as anything else. I am sure the Senator believes firmly what he says and that he has arrived at his conclusion after the best investigation he can make.

There is one other point to which I wish to call attention. It is a striking one. The Senator from Delaware [Mr. GRAY] called attention to the fact that, according to the statement of a gentleman who is a large manufacturer, and who, it seems to me, would

not be willing to make a statement of that sort to go to the public unless it was borne out by the facts, the prices of ingrain carpet would be increased 20 cents a yard by the imposition of these provisions in the tariff—that is, the compensatory duty. It will increase the cost of ingrain carpet to the consumers just that much, I understood him to say. If that be the case, it does seem to me that the Senate ought to hesitate before imposing such a tax.

The price of ingrain carpet now is about 40 cents a yard, and an increase of 20 cents a yard means what? Ingrain carpets do not find their way into the homes of the rich. They are the carpets of the poor; and carpets, as stated by the Senator from Delaware, are no longer a luxury. The laboring men of this country believe that they are entitled to carpets to add to the comfort of themselves and their families.

Now, as the law stands, a man proposing to put a carpet on a floor containing, say, 30 square yards, would pay $12 for it. When the bill goes into effect, the price of that carpet, if the manufacturer's statement is true, instead of being $12 will be $18. That man must do $6 worth more of work; there must be $6 more of his perspiration coined and turned over to somebody before he can have the privilege of putting a carpet on one of his floors.

If he has five rooms in his house, there is a tribute of $30 that he is compelled to pay to somebody in the increased cost of a necessary of life to make somebody's business more profitable. Is there any natural right, is there any legal or constitutional right vested in Congress to take any part of that man's labor for the benefit of some other class of men? It seems to me to be entirely monstrous; a naked, unmitigated outrage.

Judge Lawrence, when appearing before the Ways and Means Committee, in discussing this question, used the language read by the Senator from Delaware. When Congress saw fit to take off this very burden that is proposed now to be imposed, when we proposed to lighten the burdens that rest upon the shoulders of the poor to the extent of $6 on an ingrain carpet for a room, when we proposed to remove the burdens which had been imposed upon the poor for years past by the legislation as it stood there on the statute books, that relieving of the masses, that taking off of these burdens, simply because it took from some favored classes in this country the right to impose these burdens on the masses, was denounced by Judge Lawrence in this language:

> There has never been such a cruel blow inflicted upon any industry in the American Republic from its foundation up to this time.

A cruel blow in taking away from the manufacturer the power to levy this tribute on the homes of the poor! A cruel blow that the hand of taxation levied for private purposes should be taken off by operation of law! That is considered by this man an outrage, while we believe it was a blessing that went to all the poor everywhere.

Mr. President, one would think, from hearing a statement made by him, that Judge Lawrence would be opposed to anything being allowed to come free into this country, and I presume he would be if the importation was to be of any benefit to the masses of the people, if there was to be any benefit to the rank and file, to all the men, women, and children of the country; but when Judge Lawrence prepared a bill and went before the Ways and Means Committee and wanted it enacted into law, here is one of the provisions that appeared in it:

> *Provided also*, That for a period of two years from and after the passage of this act native Mexican ewes shall be admitted free into this country.

So that the woolgrowers would be able to produce coarse carpet wools that are unfit for any purpose except manufacturing carpets. When he said if you would give them proper protection they will produce all the low-grade, inferior sheep and comparatively worthless wools that the markets can consume, in order to enable them to begin to levy this tribute as rapidly as possible and to carry it out, he invoked free trade in Mexican ewes, for the purpose of enabling the woolgrowers to increase the burden on the people as rapidly as possible.

Such inconsistency illustrates clearly the purpose of this whole business. I believe the great body of the people are of very much more consequence than the interest of any few manufacturers; but beyond and above all that, I do not believe Congress has the right to levy any tax, no matter how small, that is not levied for the purpose of putting revenue into the Treasury, and that taxes levied to make one business profitable at the expense of the great masses of the people are absolutely undemocratic. They are un-American; they are in violation of all principles of civilization and enlightenment.

Mr. STEWART. Mr. President, I can not understand these arguments. When we are considering a protective tariff, as all tariffs are protective, I do not appreciate an argument that is in favor of discrimination between the labor producing one article and the labor producing another. I can not appreciate an argument in favor of protecting labor in the cities, which produces manufactured cloth, and not protecting the labor on the farms raising sheep. If we are to have a protective tariff upon competitive articles, it seems to me we ought to follow the Democratic platform of 1896 and have no discrimination in favor of one kind of labor or one set of laborers against another set of laborers. It should be fairly distributed.

If gentlemen were free traders and proposed to raise the revenue by direct taxation, if that were the position taken, I could understand the plea to put articles on the free list similar to those which are produced by American labor, but I see no argument in favor of putting an article of one kind produced by American labor on the free list and an article produced by American labor in another place upon the protective list. If woolen manufacturers had cloth on the free list, there would be less argument in favor of putting wool on the protected list. But if we are to raise revenue on competitive articles, which is the established policy of all parties, it should be, according to the Democratic platform of 1896, equally distributed. There should be no discrimination. That is all I ask.

Now, I undertake to say that the woolgrowing interest is very important. There are a very large number of people engaged in it. There is a vast region of country capable of raising sheep. Certainly there is enough for that purpose to raise all we want in the United States, and if we are to have revenue raised on competitive articles, there is no article upon which it can be more equitably levied than wool, because there are a large number of people engaged in it and the benefits are more generally distributed. There are ten times, perhaps a hundred times, more people engaged in producing wool than there are in manufacturing cloth. They are out in the country, and I undertake to say that the country population is much more desirable than the city population.

If we are to pursue the course of giving the manufacturer a free-trade market in which to buy, and destroy our rural population, you will do very much to sap the foundation of our institutions. It seems to me the rural population is absolutely essential to the preservation of our Government. Cities are not the homes of the Republic. It was one of the questions seriously discussed in the formation of our Government, whether we would ever have large cities which would disturb the Republic. The Republic could not live without the aid of the country. Can you say that those in the country shall work in competition with the cooly labor of Asia or the miserably paid labor of Mexico and South America, while those in the city are protected?

In regard to third-class wool, whatever may be the real fact, there is a general belief among all woolgrowers that a vast amount of the third-class wools are used in manufacturing cloth and for other purposes than carpet manufacture. That is the general belief, and any tariff that does not provide against the possibility of importing wool for carpet purposes and using it for manufacturing cloth will be very unsatisfactory and will be very unpopular. The reason why tariff agitations are so easily got up is on account of the sense of injustice which exists. If a tariff could be equitably adjusted, it would hardly ever be disturbed. Consequently, the importance of having a sense of justice. Woolgrowers think that under the ad valorem provision in the McKinley law third-class wool got in and was used for other purposes and came in competition with the home product; that it was unfair; and they have complained of it, and if you do not remedy it in this tariff bill you will not satisfy them. Of course it is very easy to remedy it now.

Under the amendment the tariff on carpet wool, a large part of which will be used as it has been before for other purposes, will be but 4 cents. It is not enough. It is more than it was under the McKinley Act, but not enough. It will all come in at 4 cents because it will all come in under a rating of 10 cents. There is no doubt about that. Everybody understands it will be that way. It was so rated under the McKinley Act, and it will be so rated again in the custom-house, and it will come in at 4 cents. Then the provisions which will make it possible to get in practically scoured wool will create a great temptation to import and use that wool for clothing purposes, because 8 per cent of dirt is a very small percentage. Scoured wool, I am told, often shrinks that amount. It will practically bring in scoured wool. You can have a little dirt with it, 8 per cent of dirt, and it will be much finer than the ordinary wool, which shrinks sometimes two-thirds.

Take merino wools. It will enable them to bring in really a higher grade wool than formerly. It will get in as third-class wool, and it will be a severe competitor of the American wool. I hope it will be remedied so as to meet that condition of things. Let us have as fair a tariff as it is possible, at least. If we are going to have it on the protective list—and it is unanimous on both sides that we are going to have a protective tariff; no suggestions to have any other kind of a tariff have come from this side or the other side—let us have one that is as nearly equitable as you can make it.

You will see in the schedules, if I am not very much mistaken, that carpets are very highly protected. There is a large protection to carpets. Let it go around. Do not make your blanket so short that it will not reach around and will not cover the whole family. I appeal to the committee to correct it and fix it so that the carpet

wool shall not come in and be used for other purposes, and that it shall pay a fair duty. Then put your tariff on carpets to equalize the thing and have it equitable. I do not think the Senate amendment is quite the thing. I am not satisfied with it, and I am sure the woolgrowers will not be.

Mr. QUAY. I insist upon my motion.

Mr. MANTLE. I wish to say merely a word.

Mr. QUAY. Very well; I yield.

Mr. MANTLE. I rise to reply briefly to the last statement made by the Senator from Arkansas. He quoted, I think, from Mr. Dornan, a very large carpet manufacturer of Philadelphia, a statement that if the duty as recommended by the Finance Committee of the Senate should be adopted it will increase the cost of ingrain carpet 20 cents per yard. A good deal has been said here to-day and yesterday about inaccuracies of statement and about the inability to understand it upon the part of the advocates of a protective duty on wool. I venture to say that there has been nothing so absurd mentioned in this debate as the statement of Mr. Dornan that the difference proposed by the Senate committee will increase the cost of ingrain carpet 20 cents per yard. If I believed that this proposition would increase the cost of a carpet ordinarily costing 40 cents a yard 20 cents, I would not favor it myself.

Let us examine the statement for a moment. The House bill provides a duty of 32 per cent ad valorem upon wools of a value of 13 cents or less. That is modified by the Senate amendment to a specific rate of 4 cents per pound on a value of 10 cents or less. Assuming that the wools would come in at a value of 10 cents, an ad valorem duty of 32 per cent would be 3.20 cents per pound. Increasing it to 4 cents would simply be increasing it eight-tenths of 1 cent per pound. I have already read a statement here showing that it is estimated that it takes three-quarters of a pound of wool to make a running yard of ingrain carpet. Assuming that it takes a pound of wool to each yard of ingrain carpet, the increase proposed by the Senate committee would only be eight-tenths of 1 cent, and here again I repeat that 98 per cent of all third-class wools imported for the past six years have come in at a valuation of 10 cents or less per pound.

Now, how it is possible for this slight increase of eight-tenths of a cent on a pound of carpet wool to increase the cost of a yard of ingrain carpet in which it is used 20 cents is certainly beyond my comprehension, and I should like very much to have the method explained by which that conclusion is reached. I know the Senator from Arkansas can not show it. Neither can any other Senator upon this floor. I think if the objections of the carpet manufacturers generally possess no more merit than the one in question, they are entitled to very little consideration at the hands of the Senate of the United States.

Mr. HOAR. Will the Senator from Pennsylvania allow me to make one or two observations very briefly before the question is put?

Mr. QUAY. Certainly.

Mr. HOAR. I can not myself disregard the judgment of the carpet manufacturers, some of whom I know personally, those in my own city and State, men of very large business experience and of unquestionable integrity. They have been building up their carpet establishments, and have sacrificed, under the varying policies which have prevailed in this country, an amount in interest and in principal more than the entire capital. I suppose the persons who now own the carpet establishments at Clinton, Worcester, and other places in Massachusetts have sunk, in the endeavor to establish a carpet manufacture in this country, more than the entire value of their present plants. So when they tell me that the arrangement now proposed by the committee is inadequate for their protection and that it will compel them either to go out of business or to continue their business hereafter at a loss, hoping for future correction of this inequality, I believe them. At the same time, believing them, I expect to vote with the committee.

I can not disregard existing conditions in regard to this bill. There is a necessity for a protective tariff in this country. A necessity for other arrangements for raising revenue is admitted by all parties in the country, and a large majority of the American people demand that that shall be done by a discriminating tariff which shall revive again the American manufactures. We have not a majority in the Senate of that way of thinking. There is a majority composed either of Democrats who profess to be opposed to the protective principle unless so far as it affects rice, or cotton, or lumber, or sugar, and gentlemen like the Senator from Montana who has just addressed the Senate, who, whatever may be their theoretical opinions on this subject, have within the last six months voted to make protection on wool in this country impossible by voting for a candidate for the Presidency who would veto such a policy; and I suppose if they get a chance they mean to do the same thing again hereafter.

Mr. MANTLE. May I interrupt the Senator? I know of no proposition of that character. I did not know that the candidate of the Silver party was pledged to veto a protective-tariff bill.

Mr. HOAR. If the candidate of the Silver party did not pledge himself by his speech in the House of Representatives in March or April, 1892, to that policy, I do not know what human language means.

Mr. MANTLE. There was certainly nothing in the platform, if the Senator will permit me, upon which he ran that pledged him to any such policy, nor was it ever my intention in supporting him.

Mr. HOAR. He was supported by nearly all the free traders in the country, and if the platform did not pledge the candidate the candidate pledged the party, as I understand it. But let that pass.

Mr. MANTLE. However that may be, I have never surrendered my views upon the protective theory.

Mr. HOAR. I understand.

Mr. MANTLE. I gave my support to that candidate believing that the money question was the paramount issue.

Mr. HOAR. I do not question that the Senator gave his support to that candidate honestly and conscientiously. I did not make the observation except to point out to the gentlemen who think with me that we can not get any tariff bill at all without the help of the gentlemen who were of that way of thinking, as I understand it, a few months ago, and who expect to stick to that policy with their votes in the future, so far as I understand them. So we must get the best we can now.

Mr. MANTLE. I will say to the Senator from Massachusetts that it never has been my intention, even holding the views I do upon the financial question, to lay any obstacle in the pathway of this protective-tariff measure. I am as anxious as is the Senator to see it enacted into a law.

Mr. HOAR. Except the obstacle of a President who would veto it; that is all.

Mr. MANTLE. That is not the question now. What I am trying to do now is to make the bill equitable so far as I can do it.

Mr. HOAR. That is what the Senator is trying to do, and I am very grateful that he is trying to do it. He is trying to do it honestly and sincerely. The point of my remarks is that it seems to me quite desirable to take advantage of what seems to be a lucid interval in my honorable friend's position and that of the gentlemen who act with him to get a tariff bill if possible before they get back where they will vote, if they do not get one now, for a President who I suppose would veto it. That is my point.

No carpet manufacturer or any other manufacturer can be prosperous unless this country becomes prosperous enough to buy their manufactures, and that will not happen within the next two years, in my judgment, unless we get through a measure of general protection, even if it has a good many defects, which will revive the manufacturing industries of the country, which will revive the industry of agriculture, and the industry of raising wool as well, and lumber, and all the other industries which depend upon protection for their new life, and in that way give a people able to buy the products of the mills.

The Senator from Delaware just now talked about the burden on the American purchasers of the carpets and carpet wools. He reminded me of something which happened three or four years ago in my own State, which I had from the mouth of a man who was a party to the dialogue. An Englishman was over here, and he undertook to preach his doctrine of free trade to an old neighbor of his, I think from Bradford, in Yorkshire, who was established as a workingman, I think the foreman of a room in a factory in Massachusetts. He was telling this workingman, who had been a near neighbor of his (I believe he was a brother, at any rate a relative), how these protected manufacturers oppressed the workingmen. "Why," said he, "you have to pay a very large per cent more to these men for all the things you have in your room here than you did at home." The man asked what things. "Well," said he, "brother," looking around the room, "the sewing machine, the carpet, the piano." The naturalized American replied, "We did not have them in England." Now, that is the whole answer to the Senator from Delaware in a nutshell.

Mr. President, dealing with the amendments of the committee is but one step toward a result which is to be matured in the Senate. There will be another vote on everything; and if the committee find a more just and equitable provision, they will propose it before the bill is over. If there is found a common ground which, giving our friends who raise wool all they desire, will still save the carpet manufacturing industry, that will be proposed. If even that is not accomplished to the entire satisfaction of either party in this body, there will be still an opportunity to compare views by the wisest and most experienced men in both Houses of Congress, who have the interests of both of these classes absolutely at heart.

So I think I would embarrass very seriously the accomplishment of what I want, both for this particular class of manufacturers and for all the people of the country, by undertaking to

antagonize the committee at this point. Therefore, although I agree with my honorable friend from Pennsylvania in thinking that this particular clause as it now stands is defective, I shall give my vote with the committee.

The PRESIDING OFFICER (Mr. BURROWS in the chair). The question is on the motion of the Senator from Pennsylvania to lay on the table the amendments of the Committee on Finance to paragraph 357.

Mr. QUAY. On that motion I call for the yeas and nays.

The yeas and nays were ordered.

Mr. ALLEN. Mr. President, I think it is my duty to correct the remarks of the senior Senator from Massachusetts made a moment ago respecting the attitude of the late silver candidate for the Presidency. I do not profess to utter his views upon the subject further than to say that there was nothing and is nothing in what he has said that would lead anybody to the conclusion that he would veto a tariff bill.

Mr. HOAR. For protection?

Mr. ALLEN. I presume if a bill was originated for the exclusive purpose of protection and not for the raising of revenue a bill that would be properly denominated a bill for confiscation——

Mr. HOAR. May I read two sentences from his speech in the other House?

Mr. ALLEN. I presume that gentleman would have vetoed it, as any other President ought to veto it. But for the Senator from Massachusetts to say that Mr. Bryan was pledged to veto a tariff bill for any particular reason is going further than the fact will warrant. There was nothing said by him during the late campaign to that effect. There was nothing in any platform that called for any action of that kind upon his part in the event of his election.

What Mr. Bryan may have said while in the House of Representatives I do not know, nor do I care. I presume the honorable Senator from Massachusetts does not want to be held responsible to-day for all of his public utterances.

Mr. HOAR. I do. I expect to be.

Mr. ALLEN. Very well; if the Senator were held responsible for all his public utterances, I think a search of the RECORD would find a great many contradictions in what he has said.

I may be permitted to say that I believe if Mr. Bryan had been seated in the White House, he would have held to the doctrine that it was his duty under the Constitution to permit Congress to legislate, and either to approve or disapprove their legislation. I do not believe he would have undertaken, as has been the practice since I have been here, to reach his arm into the Senate Chamber or into either branch of Congress and undertake to influence its action in advance of the time when he should properly act.

I believe, and I think the late candidate for the Presidency upon the Populist ticket believes that the Constitution charges Congress with the duty and responsibility of legislating, and that it charges the Executive with the duty of examining the legislation after it is presented to him and either approving or disapproving it, as his judgment may dictate. So I think the Senator from Massachusetts is going a little too far when he says that anything has been said or done by Mr. Bryan that would lead to the conclusion that he was pledged to veto a tariff act.

My attention is called to the Chicago platform, from which I read the following:

> We hold that the tariff duties should be levied for purposes of revenue, such duties to be so adjusted as to operate equally throughout the country and not discriminate between class or section, and that taxation should be limited by the needs of the Government honestly and economically administered. We denounce as disturbing to business the Republican threat to restore the McKinley law, which has been twice condemned by the people in national elections, and which, enacted under the false plea of protection to home industry, proved a prolific breeder of trusts and monopolies, enriched the few at the expense of the many, restricted trade, and deprived the producers of the great American staples of access to their natural markets.

That is the position, I understand, of the late candidate for the Presidency, usually denominated the fusion candidate, and I think nothing can be found in any public utterance of his in the other branch of Congress or elsewhere to the contrary.

There are two distinct parties in this country upon the question of tariff, the party which believes that you have a right under the Constitution to confiscate the property of one class of citizens for the benefit of another class under the guise of taxation, and who call that kind of taxation a protective tariff, who seem to believe that there is no limit to the power of taxation that may be rightfully imposed upon the people of the country; and the class who hold to the doctrine that a tariff should be levied for the purpose of revenue and for no other purpose.

Mr. President, permit me to say that in my humble judgment there is no difference between robbery committed upon the highway and that kind of tariff legislation which takes out of the pockets of the citizens of this country their hard earnings for the exclusive and sole purpose of turning those earnings over to a select class.

Mr. HOAR. Mr. President, the Senator from Nebraska answers what I said in passing merely by what seems to me can have no other meaning than to say that Mr. Bryan was not responsible for his public utterances. I do not know that the Senator exactly used the phrase in that connection, but he said that I would not like to be held responsible for all my public utterances, and he did not know what Mr. Bryan might have said in the House of Representatives. Now, what Mr. Bryan did in the House of Representatives was to vote for the Wilson bill putting wool on the free list. What he further did was to help carry out bodily and in triumph the Democratic speaker, Mr. Wilson, of West Virginia, who had denounced protection as a robbery and unconstitutional. What he further did was to make a speech in which he denounced it as unconstitutional himself. I have before me now his statement:

> Protection has been our cannibal tree, and as one after another of our farmers has been driven by the force of circumstances upon that tree and has been crushed within its folds his companions have stood around and shouted, "Great is protection!"

Another proposition in the speech which I have before me is the following:

> The Democratic party, so far from being hostile to the home industries—

The party which was pledged in its platform, on which he had stood, to the doctrine that it was unconstitutional and a robbery—

> is the only champion, unless our friends here, the independents, will join with us, of the real home industry of this country.

And the Senator himself reads from the Democratic platform at Chicago, with all these other gentlemen denouncing the doctrine, the Senator from Texas, the Senator from Missouri, and the Senator from Arkansas.

Mr. ALLEN. If the Senator from Massachusetts will permit me, let me ask what is there in the statement he has just quoted that would lead him to the conclusion that Mr. Bryan would have vetoed a tariff act——

Mr. HOAR. For the protection of wool.

Mr. ALLEN. Simply because he voted for free wool?

Mr. HOAR. Simply because he voted for it and helped to carry out the man who denounced its protection as robbery, and because he supported the platform and the party that were committed to that doctrine.

Mr. President, I have a good deal of respect for Mr. Bryan. He is a man whose nature and behavior have impressed me very agreeably. I have never joined in anything which would be personally disrespectful to him, as far as I know. But this I have to say: That if Mr. Bryan, having said what he said in the House of Representatives and stood on the platform and supported the party he acted with, would not as President veto a bill for the protection of wool, I should cease to have any respect for him in the future, and especially if he put it on the ground that he was not responsible for his public utterances.

Mr. STEWART. Mr. President, I think that the criticism which has been made on Mr. Bryan is very unjust. I can give an illustration of its injustice. When the Bland Act was under consideration in 1878 in the House of Representatives in its original form, it was a free-coinage act pure and simple, and it passed the House by an overwhelming majority, without any qualification, before the Allison amendment was attached to it. Mr. McKinley voted for free coinage pure and simple by the United States alone, independent of other nations, without any qualification whatever. After the Bland Act came to the Senate and was amended, he voted for it as amended. Then it was vetoed, and he voted to pass the Bland-Allison Act over the veto of the President. He voted for it on every vote. During that contest he voted with the most radical silver men. Further, since 1890 he made a speech at Toledo, Ohio, which I have not before me, in which he denounced President Cleveland for discriminating between the two metals. He denounced President Cleveland's policy.

In the Republican convention of 1888, the last Republican convention I ever attended, I was upon the committee on resolutions. Mr. McKinley was chairman of that committee. After a whole night's discussion, we adopted unanimously an amendment which I drew and proposed, Mr. McKinley voting for it, the amendment declaring that the Republican party is in favor of the use of both gold and silver as money and condemns the action of the Democratic Administration for its effort to demonetize silver. He stood on that plank. Then when the St. Louis convention met and he became a candidate, he accepted the nomination on a very different platform, one declaring that the Republican party will adhere to the present gold standard until we can get an international agreement.

Upon the theory of the Senator from Massachusetts, if Mr. McKinley follows the logic of his former position, he would sign a free-coinage bill, and he would aid in its passage so far as giving it his general approval. He would be as good a free-coinage man as he was in 1878, and as good a free-coinage man as I am. He was as radical in his votes and actions then as I am to-day or my friend from Missouri or anybody else.

If that is the principle, if free coinage once it is free coinage always; if it is impossible to be a backslider from that doctrine, then it may be impossible that there shall be backsliders from extreme free-trade doctrine. There are many men of extreme free-trade notions and they may believe it yet, but they have been forced to modify their opinions, because we are obliged to have a tariff to put the products of our labor in a condition to compete with foreign articles.

Mr. ALLEN. Will the Senator permit me to ask him if it is a fact that the present President of the United States advocated and voted for the passage of the Sherman Act?

Mr. STEWART. He did; and he afterwards referred to and boasted of it in a speech.

Mr. TELLER. He voted for the Sherman law.

Mr. ALLEN. The Sherman law of 1890?

Mr. STEWART. Yes; he voted for the Sherman law and the Bland-Allison Act.

Mr. ALLEN. As I recollect from reading his speech, he advocated strongly the passage of that act in the other branch of Congress.

Mr. STEWART. He advocated the passage of that act in Congress, and spoke of it and denounced Mr. Cleveland when he was President for the position he occupied on the money question, as late as 1891 or 1892. I read a great deal of his speech the other day, and if anyone doubts my statement I can bring it in and read it again, to show how very denunciatory Mr. McKinley was of Mr. Cleveland's gold policy. Now it is claimed by our Republican friends that he is par excellence. These changes do occur.

So far as Mr. Bryan is concerned, he made speeches on the tariff when he was in the other House. But his party declared that the silver question, the money question, was paramount. He was, however, in favor of a tariff which did not discriminate. He accepted the platform of his party and went before the country, and if any man can find in his speeches anywhere one sentence in conflict with the principles laid down in the Chicago platform upon the tariff and money questions, I should like him to present it. It can not be found.

If we are to get men who are perfect during all their career, from their infancy up, who do not grow by circumstances, we shall have to take very young men to be Presidents, younger than Mr. Bryan and younger than Mr. McKinley. After they perform one public act, they may find it necessary to diverge from it the next day. You can not find men who are perfect, if you study their political history.

It seems to me there is nothing in the question. It is not strange, however, that Mr. Bryan should be criticised, because it is very well known that he is going to be the next President of the United States [laughter], and, of course, the opposition have commenced to criticise him.

Mr. HOAR. Then had we not better hurry and get the tariff now?

Mr. STEWART. Yes; you had better hurry and get the tariff now, and you had better make it a good and honest tariff, or the people will want it changed. You had better have it honest and fair if you want to have it stand.

Mr. HALE. If the Senator is through, I rise to a question of order. I inquire what is before the Senate?

The PRESIDING OFFICER. The question before the Senate is on the motion made by the Senator from Pennsylvania, on which the yeas and nays have been ordered.

Mr. CHILTON. I want to know what the motion is. I do not understand it.

The PRESIDING OFFICER. The question is on the motion of the Senator from Pennsylvania [Mr. QUAY] to lay on the table the amendments proposed by the Committee on Finance to paragraph 357.

Mr. TELLER. Will the Chair have the amendments read?

The PRESIDING OFFICER. The Secretary will state the amendments.

Mr. QUAY. The effect of the motion is to reinstate the House provision in paragraph 357.

The PRESIDING OFFICER. The amendments will be stated.

The SECRETARY. In paragraph 357, page 117, line 20, before the word "cents," the Committee on Finance propose to strike out "thirteen" and insert "ten;" in line 21, after the word "pound," to strike out "including charges, and on common goat hair;" and in line 22, after the word "be," to strike out "32 per cent ad valorem" and insert "4 cents per pound;" so as to make the paragraph read:

357. On wools of the third class and on camel's hair of the third class the value whereof shall be 10 cents or less per pound, the duty shall be 4 cents per pound.

The PRESIDING OFFICER. The Secretary will call the roll on the motion of the Senator from Pennsylvania.

The Secretary proceeded to call the roll.

Mr. HANSBROUGH (when his name was called). I am paired with the Senator from Virginia [Mr. DANIEL], but will transfer that pair to the junior Senator from Ohio [Mr. HANNA], and vote "nay."

Mr. McLAURIN (when his name was called). I am paired with the Senator from North Carolina [Mr. PRITCHARD], and therefore withhold my vote.

Mr. PASCO (when Mr. MARTIN'S name was called). The Senator from Virginia [Mr. MARTIN] is paired on this question with the Senator from Illinois [Mr. MASON].

The roll call was concluded.

Mr. GRAY (after having voted in the affirmative). I ask whether the senior Senator from Illinois [Mr. CULLOM] has voted?

The PRESIDING OFFICER. He has not voted, the Chair is informed.

Mr. GRAY. I have a general pair with that Senator, and therefore withdraw my vote.

Mr. MORRILL. I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. JONES of Arkansas. My colleague [Mr. BERRY] is detained from the Senate. He is paired with the Senator from Minnesota [Mr. NELSON], as I understand. If he were present, my colleague would vote "yea."

Mr. NELSON. I have transferred that pair to the Senator from Illinois [Mr. MASON], and voted "nay."

Mr. ELKINS (after having voted in the negative). I have a general pair with my colleague [Mr. FAULKNER]. I think he would vote "yea" on this question if present, but I am not certain, and therefore withdraw my vote.

Mr. NELSON (after having voted in the negative). I understand from the Senators who have the matter of pairs in charge that the Senator from Illinois [Mr. MASON] is paired with the Senator from Virginia [Mr. MARTIN]. Under those circumstances I will withdraw my vote and stand paired with the Senator from Arkansas [Mr. BERRY].

The result was announced—yeas 19, nays 41; as follows:

YEAS—19.

Bacon,	Kenney,	Murphy,	Smith,
Chilton,	Mallory,	Pasco,	Turpie,
Cockrell,	Mills,	Penrose,	Vest,
Gorman,	Mitchell,	Pettus,	Walthall.
Jones, Ark.	Morgan,	Quay,	

NAYS—41.

Allen,	Frye,	Perkins,	Thurston,
Allison,	Gallinger,	Platt, Conn.	Tillman,
Burrows,	Gear,	Platt, N. Y.	Turner,
Butler,	Hale,	Proctor,	Warren,
Carter,	Hansbrough,	Rawlins,	Wellington,
Chandler,	Heitfeld,	Roach,	Wetmore,
Clark,	Hoar,	Sewell,	White,
Davis,	Lodge,	Shoup,	Wilson.
Deboe,	McBride,	Spooner,	
Fairbanks,	McEnery,	Stewart,	
Foraker,	Mantle,	Teller,	

NOT VOTING—29.

Aldrich,	Daniel,	Hawley,	Morrill,
Baker,	Elkins,	Jones, Nev.	Nelson,
Bate,	Faulkner,	Kyle,	Pettigrew,
Berry,	George,	Lindsay,	Pritchard,
Caffery,	Gray,	McLaurin,	Wolcott.
Cannon,	Hanna,	McMillan,	
Clay,	Harris, Kans.	Martin,	
Cullom,	Harris, Tenn.	Mason,	

So the Senate refused to lay on the table the amendments of the Committee on Finance to paragraph 357.

Mr. TELLER. Mr. President, I do not believe it will help us in determining what should be the tariff on wool to determine the question raised by the Senator from Massachusetts [Mr. HOAR] as to how the recent Democratic candidate for the Presidency would have treated it if he had been elected provided we had sent such a bill to him. It seems to me that that is a subject which is hardly worthy of our attention at this time. The fact that Mr. Bryan did not think that there ought to be a duty on wool, at least a protective duty on wool, does not seem to me to sustain the assertion of the Senator that he would have vetoed a bill containing such a duty. He might have concluded that it was a proper subject of revenue, as we have heard that sugar is a proper subject of revenue, and he might have thought it was not a duty for protection, and therefore was not objectionable.

Mr. President, the temptation is very great when the Senator from Massachusetts introduces in this discussion a political feature and political questions——

Mr. HOAR. Will the Senator pardon me one moment?

Mr. TELLER. Yes.

Mr. HOAR. What I said was not in the least intended as a temptation to the Senator from Colorado or any other Senator. I wished to state, for the information of certain persons in my State who are interested in this question, the reasons for my vote; and I stated that we were at this time making a tariff under great difficulties, for there is no Republican majority in the Senate, and that we had to depend for our majority upon the votes of Senators who, whatever might be their own opinion on protection, thought other matters of so much more importance that they

voted for a free-trade candidate for the Presidency, and, I suppose, desire to repeat that three years hence.

I did not make the remark for the purpose of stirring up anybody or offending anybody, but simply for the purpose of pointing out, in a single sentence or two, why I felt bound to follow the committee, although in this particular I thought the committee were in error.

Mr. TELLER. I am not complaining of the Senator. He had a right to make that statement. What I was complaining of and what I intend to complain of was of another thing.

Mr. ALLEN. Will the Senator permit me to suggest right there, in the same connection, that the Senator from Massachusetts said that, according to the utterances of the late candidate for the Presidency, he would have vetoed a protective measure?

Mr. HOAR. I said that I believed so. I do not know how he could honestly do otherwise.

Mr. GRAY. I hope so, if he calls himself a Democrat.

Mr. TELLER. Whether he would or not would be a moot question. Whatever may be the opinion of the Senator from Massachusetts, my opinion is quite different. Other Senators may differ with me, but I do not propose to discuss that question.

What I want to complain of is that the Senator introduces what is calculated to bring on a political discussion here. He challenges—for that is what it is—our position because we voted for a candidate who was not in full accord with all of us upon all economic questions. We believed there were other and greater questions. The Senator challenges our consistency, and he intended to do that, of course, because he must be presumed to have so intended.

Mr. HOAR. I utterly deny that.

Mr. TELLER. The Senator must be presumed to have expected that a challenge of that kind would be resented. Thereupon, when that is done, before we have any opportunity to reply, a motion is made to table.

What I got up to say is this, and I mean to say it with emphasis, so that it will be understood: I want this bill passed. I do not believe that this bill will bring the relief that the Senator from Massachusetts professes he believes it will and does undoubtedly believe. I am here to see, if I can, that it is a decent bill. I am not here to cause any delay. I want the bill to pass as speedily as possible, and if there is relief to come to the distressed business of this country, I want it to come at once.

I want to say to the Senator from Massachusetts, and to every other Senator who sits on the Republican side of the Chamber and who believes with him, that if they want to delay this tariff bill by bringing up political questions now, we shall be delighted to put the burden upon them, and then the discussion can go on ad infinitum, but they can not discuss their view of the bill and then deny to us the same right upon the theory that we are protracting and delaying this promised relief to the country.

Mr. President, I repeat I do not believe that this bill will bring to the country any relief whatever, and yet I know a great number of people in the country, and good people, too, who believe that it will. I believe that the Republican party, having come into power with the promise to bring prosperity, are entitled to pass this bill. I think myself that they might have passed it thirty days ago if they had been in earnest. I do not believe that the Republican party in this Chamber or anywhere else believe that the bill will bring prosperity. Neither do I believe that the leaders of the Republican party are anxious to pass this bill speedily and summarily, because, when it is passed, if prosperity does not come, they will have to hunt for some other excuse, as they have been hunting excuses for the last year, why prosperity has not come.

They told us through the press that when Mr. McKinley was nominated at St. Louis on the gold-standard platform prosperity would come at once; that it was not to wait for his election; and the great Republican papers proclaimed that in every issue, both before the nomination and after. When it was discovered that there was a contest to be made and not a walk-over, then the Republican papers said, "Only wait until Mr. McKinley is elected, and the minute he is elected prosperity will come; business will revive, and the industries that are now depressed will be on the high road to success." Prosperity did not come when he was elected. Then they said prosperity would come as soon as he was inaugurated. He has been inaugurated three months, and it has not come yet.

Now they tell us it will come when you pass this bill. Why do you not pass it? Why did you keep it six weeks in committee? You are following your committee. The committee did not have the Democratic members present to antagonize them; and they might have made as good a bill as this is in six days, if not in six hours. You have taken plenty of time; and why is it that every time a Senator rises to speak on the Democratic side of the Chamber, or a Senator who is not in full accord with this Administration, he is charged with delaying the prosperity you have promised?

If the Republican party in this Chamber, now in control of the executive department of the Government and of the other House, are honest in believing that prosperity is to come from the enactment of this bill, it is absolutely criminal for them to delay an hour more than is necessary; and they ought to know, when they challenge those of us who have not been in accord with them upon the question as to who should be the Chief Executive of this nation, and charge us with inconsistency, that we are very likely to resent it and very likely to insist that our people are quite as patriotic and quite as intelligent as theirs.

I have only said this, Mr. President, because I feel if this debate is to go on in the way it has been going on for a little while, that I shall be justified in taking two or three hours, and my colleagues will be justified in doing likewise, and we should be recreant to our duty to ourselves and our constituents if we did not do so.

With this notice to the Senators who are conducting this bill, I shall wait to see what the developments may be.

Mr. QUAY. Mr. President, the Finance Committee seems to have pulled itself together since yesterday into something like its pristine vigor, and therefore, with some trepidation, I submit to the Senator in charge of the bill an amendment which I propose to offer to paragraph 357, which, it seems to me, ought to meet the approbation of the Finance Committee, and which would certainly be a fair adjustment of the question in controversy; that is, in line 20, to strike out the word "ten" and insert the word "twelve," making the dividing line 12 cents instead of 13 cents.

I suggest to the Senator from Iowa in charge of the bill that I do not think there can be any practical opposition to that amendment amongst those who are supporters of the woolgrowers. If it meets his approbation, I shall be very glad to have the proposition submitted to the Senate.

Mr. ALLISON. I regret that I can not accept the suggestion of the Senator from Pennsylvania. The whole paragraph is in conference now. If we have made a mistake, that mistake can be easily corrected. I hope we shall make progress now with the other paragraphs of this schedule, and that whatever political discussions there may be will be postponed at least for this day.

Mr. QUAY. I will, then, pro forma and without the intention of calling for the yeas and nays, make the motion to amend the committee amendment by striking out "ten," as reported by the committee, and inserting "twelve."

The PRESIDING OFFICER. The amendment proposed by the Senator from Pennsylvania will be stated.

The SECRETARY. In paragraph 357, on page 117, line 20, before the word "cents," it is proposed to amend the committee amendment by striking out "ten" and inserting "twelve;" so as to read:

357. On wools of the third class and on camel's hair of the third class the value whereof shall be 12 cents, etc.

The amendment was rejected.

Mr. MANTLE. I desire to offer an amendment. I propose to strike out paragraph 357 and insert in lieu thereof what I send to the desk.

The PRESIDING OFFICER. If the Senator from Montana will pardon the Chair for a moment, the amendments proposed by the Senate committee to paragraph 357 will first be acted upon. In the absence of objection, the amendments will be agreed to.

Mr. MANTLE. Will my amendment then be in order?

The PRESIDING OFFICER. Certainly.

Mr. MANTLE. I was met yesterday, after accepting a similar statement of the case, with the suggestion after the committee amendments had been adopted, that the matter had been disposed of, and therefore there was some question as to whether my amendment was in order.

The PRESIDING OFFICER. The Chair understands the amendment proposed by the Senator from Montana to be a substitute, which is in order.

Mr. ALLISON. I inquire of the Chair if the amendments of the committee to paragraph 357 have been agreed to?

The PRESIDING OFFICER. In the absence of objection, the amendments were agreed to. The Senator from Montana proposes to amend the paragraph by inserting a substitute, which will be read.

The SECRETARY. It is proposed to substitute for paragraph 357 the following:

On wools of the third class, and on camel's hair of the third class, the current value whereof in the last seaport whence exported to the United States shall be 10 cents or less per pound, the duty shall be 5 cents per pound; and on wools of the third class, and on camel's hair of the third class, the current value whereof in the last seaport whence exported to the United States shall exceed 10 cents per pound, there shall be an additional duty of one-half of 1 cent per pound for each increase of 1 cent per pound in the value thereof.

Mr. MANTLE. In support of that amendment, I desire to state that the only change in the rate is in increasing the Senate committee's amendment from 4 to 5 cents, which would be equivalent to a 50 per cent ad valorem duty upon that class of wools.

I regard the language "the value whereof in the last seaport whence exported to the United States" as being the most important part of the amendment.

I do not know definitely what the rule is, but I am told that in estimating the values of these wools, the invoices are frequently made in the interior of the country, possibly in the interior of Africa, or Asia, or China, and that no allowance is made for the cost of exporting or carrying those wools to the last seaport whence exported to the United States.

The matter, therefore, is in a chaotic condition, and it is impossible to know whether or not the valuation is correct under these circumstances, because there is no definite point at which they can be located, there is no definite point to start from, and this phase of the case, perhaps, is most responsible for the fraudulent undervaluations which have been practiced in respect to the importation of these wools, because of the fact that they are imported from countries that are only half civilized, and they come from remote points, where the value is practically unknown and can not be determined.

If my amendment is adopted, it will fix a definite point, fix a place where the value of these wools is known, where the invoices will be made, and it will have the effect of rendering much less frequent, if not impossible, the fraudulent practices which have heretofore obtained, and of which the woolgrowers largely complain.

I think, Mr. President, in all justice, those who desire an honest administration of the laws, and really want honest valuations, and who do not desire that the law shall be evaded, ought to vote for this amendment.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Montana [Mr. MANTLE], in the nature of a substitute for paragraph 357.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 358, on page 117, line 25, after the word "exceed," to strike out "thirteen" and insert "ten;" in line 1, on page 118, to strike out "including charges," and in the same line, after the words "shall be," to strike out the words "fifty per cent ad valorem" and insert "7 cents per pound;" so as to make the paragraph read:

358. On wools of the third class, and on camel's hair of the third class, the value whereof shall exceed 10 cents per pound, the duty shall be 7 cents per pound.

The amendment was agreed to.

Mr. MANTLE. I desire to offer a paragraph, following paragraph 358, to be known as paragraph 358½, which is the paragraph in the amendment I sent up a while ago referring to cattle hair. I ask that it be read.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Montana, to insert a new paragraph to follow paragraph 358, which will be read:

The Secretary read as follows:

On cattle hair and calf hair and other animal fibers not herein nor elsewhere specified, the duty shall be 5 cents per pound.

Mr. MANTLE. In support of the amendment, I desire to say that there is a great deal of hair imported on which no duty is collected. I think last year there were about 1,000,000 pounds—I have forgotten just the exact amount—aggregating a half million dollars in value, which came in free. It enters largely into the manufacture of cheap carpets and blankets and articles of that sort, and is used practically for the same purposes that much of the cheaper grades of third-class wools are, and there ought to be a duty levied upon it for revenue purposes, if for nothing more.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Montana.

The amendment was rejected.

The SECRETARY. It is proposed to strike out paragraph 359 and insert in lieu thereof the following:

359. The duty on wools on the skin shall be 1 cent less per pound than is imposed in this schedule on other wools of the same class and condition, the quantity and value to be ascertained under such rules as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

Mr. VEST. I move to strike out all of the schedule from the beginning down to paragraph 360, in order hereafter to move——

Mr. ALLISON. I ask the Senator to wait until the amendments are adopted.

Mr. VEST. I thought the amendment had been adopted.

Mr. ALLISON. There are one or two other amendments.

The PRESIDING OFFICER. The next amendment will be stated.

The SECRETARY. It is proposed to strike out paragraph 360 and insert in lieu thereof:

360. Top waste, slubbing waste, roving waste, ring waste, and garnetted waste, 30 cents per pound.

The amendment was agreed to.

The SECRETARY. It is proposed to insert a new paragraph, as follows:

360½. Shoddy, 25 cents per pound; noils, yarn waste, thread waste, and all other wastes composed wholly or in part of wool and not specially provided for in this act, 20 cents per pound.

The amendment was agreed to.

Mr. VEST. I now renew my motion to strike out all down to paragraph 360, for the purpose of moving hereafter, if that motion prevails, to put the articles embraced in these paragraphs upon the free list, as they are in the existing law.

The PRESIDING OFFICER. From what paragraph, the Chair inquires?

Mr. VEST. Commencing at the beginning of the schedule, from paragraph 347 and extending down to 360. I wish it understood that it does not include shoddy, which is in another paragraph.

I move to strike out all down to paragraph 360, for the purpose of moving to put the articles on the free list.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to strike out all of the paragraphs from 347 to 359, both inclusive.

Mr. VEST. This motion places face to face free wool and protected wool, and without entering into any general discussion as to the tariff for protection, I desire to present facts from official sources, and none of them from the party to which I belong, showing that the high protective duties upon raw wool and the enormous duties that we have heretofore placed under tariff laws upon manufactures of wool benefit neither the woolgrower nor the woolen manufacturer.

I make the distinctive statement as emphatically as I can make it, and I challenge contradiction and discussion, that high duties upon raw wool have not increased the price to the woolgrower in the United States, but, on the contrary, have diminished prices. The Wilson Act, so called, the existing law, it is hardly fair to take as an illustration of the effect of free wool, because it has been in existence for so short a time and under such peculiar and adverse circumstances. That law took effect in October, 1894, and as a matter of course has been in existence but a very few years and under financial and business depression such as has never before been seen in this country.

I shall not stop to go into a discussion of when this depression commenced, but I take it that the testimony of the President of the United States, Mr. McKinley, will be accepted by our political opponents as conclusive upon that subject. In 1890, in his report upon the tariff bill which bears his name, he spoke then, as I had occasion to read at the beginning of this debate, of the existing depression, and especially of the depression resting upon the agriculture of the country, which he and his colleagues proposed by the tariff bill to remove. I admit that it is hardly fair to take the McKinley Act as an illustration of the effect of high duties upon wool and woolen manufactures, because that act was in existence only a very few years before it was superseded by the Wilson Act, which took its place.

But the act of 1867, which went into effect on May 2 of that year, was in operation for sixteen years, and I submit in all candor that if high duties upon wool would have increased the price and benefited the wool producer, that result ought to have been obtained in those sixteen years. In 1866 commenced the contest between the woolen manufacturers and the woolgrowers of the United States which exists to-day. It was attempted then, as it has been attempted now, outside of this Chamber and inside of it, to reconcile the conflicting interests represented by the woolen manufacturers and the woolgrowers. I have alluded to-day to the statements of Mr. Lawrence on behalf of the woolgrowers, and of Justice, Bateman & Co. on behalf of the woolen manufacturers, absolutely irreconcilable, so antagonistic that there can be no sort of question that one party or the other is egregiously mistaken or perverting the facts.

In 1866 this contest was raging, and the friends of protection brought forward the representative men of the two interests. They met in caucus or convention or conference, or whatever you please to term it, and framed the act of 1867. They agreed upon the rates to be imposed upon wool and then the compensatory duties upon manufactured woolen goods. They brought the bill to Congress as a compromise necessary to the safety of the Republican party. With the exception of the duty upon dress goods for women and children and of men's wearing apparel, that compromise was adopted, word for word and letter for letter, as brought by the conflicting and warring factions to the Capitol. It imposed from 10 to 12 cents per pound upon the raw wool, with an additional duty of 12 per cent ad valorem. David A. Wells, who two years afterwards was the Commissioner of Revenue, stated the effect of the act of 1867 as follows: "That the duty on raw or unwashed wools and hair other than wools adapted for carpets should be fixed at rates varying from 10 to 12 cents per pound and from 10 to 11 per cent ad valorem. In order, then, to compensate the manufacturer for such a prospective enhancement of the price of his raw material, it was agreed, in consideration of the fact that 4 pounds of the cheapest imported wool, paying an aggregate duty of 46 cents, were sometimes employed in the fabrication of a pound of finished cloth," to compensate the manufacturer by giving him the increased duties mentioned in the act upon his manufactured product. After this compensatory duty, it was agreed to give to the manufacturer 10 per cent in addition, in order to meet the tax

upon the chemicals that went into his manufacture and to pay for transportation if any expense in that regard should be incurred; and in addition over all, 25 per cent ad valorem for the difference in labor here and abroad.

Those were the duties solemnly elected to be placed upon raw wool and manufactured goods by the raisers of the raw wool and the manufacturers of woolen goods. It was their own bill. It was given to them by Congress. It is held up to-day as the ideal of the woolen interests of this country both as to the production of wool and the manufacture of goods. Mr. Lawrence alludes to it as the great act of 1867 for the protection of the woolgrowers and the woolen manufacturers. Justice, Bateman & Co. allude to it in the same way. The act of 1867 applied to nothing but wools and woolen manufactures, no other article being included in it.

It remained upon the statute books sixteen years. I submit it is a fair test of the system to which I adhere and the system to which our opponents adhere, as to whether one or the other is correct. If I show by the official reports of the manufacturers themselves that wool went down in price during those sixteen years; if I show that the manufacturers languished; if I show from their own months that their own bill, putting these enormous duties upon raw wool and manufactured goods, did not bring prosperity, but adversity, I take it the case is conclusively made out in favor of free wool and against the protection that is sought to be put upon it.

I have before me a bulletin issued by the National Association of Woolen Manufacturers in December, 1890, upon pages 362 and following giving the result of the act of 1867 from the time of its enactment down to the day of its repeal. It is a record, with the exception of 1871 and 1872, of falling prices, depressed manufactures, complaints from year to year of their own act. In 1871 there was phenomenal and abnormal speculation in wool. It lasted eighteen months, and then, as is always the case, there came a reaction and prices resumed their downward tendency. Any Senator who will take the trouble to look at this record—which I shall not endeavor to read in detail—will find all through it such entries as "lower prices," "lower prices," "enlarging consumption of manufactured product," "depression in manufacture." In 1869, two years succeeding, "failures in the woolen trade."

In 1872, for instance, there was "wild speculation." Then comes the next year, 1873: "February—overproduction of goods; market overstocked with wools; manufacturers lessen production. March—continued depression; money scarce. October—panic in the money market," etc.

In June, 1874, we find there were "numerous failures in England in the worsted and iron industries, the result of overproduction; partial recovery in general business;" and in the year 1875, "manufacturing of woolens in England unprofitable;" depression in business, and so on, down to the enactment of the act of 1883. I shall not exhaust my strength nor weary the patience by reading all these pages, but here is the record, made out by the woolen manufacturers themselves from month to month and year to year, showing that the increased duties in 1867 did not put up the price of wool nor bring prosperity to the manufacturers.

What was the result of the enactment of 1883, which slightly reduced the duty upon wools and woolen goods? The first effect of it was to increase the price of wool, but the increase lasted only a very short time, and then the decline began again. Wool continued to decline till 1890, when the demand became universal on the part of the woolgrowers and the wool manufacturers for the reenactment of higher duties upon raw material and the finished product. What has been the result of the act of 1890?

I hold before me—and I said I would quote only those opposed to me, those on the other side—a table embraced in the testimony of Mr. Lawrence, the president of the Wool Growers' Association, the most persistent and determined of all the advocates of a high duty upon wool. It is found on page 1483 of the hearings before the Ways and Means Committee of the House, and it is the official record of the prices of wool in the Philadelphia market from 1890 to 1896. I take it for granted this will be accepted by our opponents upon the other side, because it comes from the very head and front of the party that advocates the high duty upon wool. What is that record under the increased duties imposed by the act of 1890? I will take XX Ohio, as was done by the Senator from Texas [Mr. MILLS], admitted to be the test grade of wool.

The equivalent of it abroad is the Port Phillip wool, an Australian fleece, which is nearer the XX Ohio wool than any other foreign product. In December, 1891, XX Ohio wool was worth, in the Philadelphia market, 30 to 32 cents a pound. In 1892, after the enactment of the McKinley Act, it fell to 26–28 cents, a fall of 4 cents a pound. In December, 1893, it fell from 26–28 to 22–25. In October, 1894, in which month the Wilson bill was enacted, it fell from 22–25 to 18–19. If high duties would stop the decline in the price of wool, why was it not done in the three years of the operation of the McKinley Act? What was the result of the enactment of the Wilson law, putting wool upon the free list? In 1895 it rose from 18–19 to 19–21; in 1896, from 19–21 to 20–21. On June 17, 1897, which is the last official report, it sold from 21 to 22 cents.

But we are met with the statement that the Port Phillip wool, which is the equivalent of this amongst foreign wools, went up in value or did not keep pace in price with the XX Ohio wool in this country. Therefore they say that the tariff imposed here has nothing to do with it. I hold in my hand the gold prices of Ohio XX wool and of Port Phillip fleece, its equivalent, commencing in 1866 and running to 1891, and it shows that these wools ran almost together. For instance, in March, 1879, XX Ohio was worth in our markets 35 cents a pound and Port Phillip was worth 40. In the next month XX Ohio was 34, Port Phillip 42; in the next, XX Ohio 38, Port Phillip 40; in the next, 43 and 43. In February, 1880, Ohio XX wool was 54 and Port Phillip 46, and then 48 and 43. First one wool would advance a few cents above the other, and then it would recede and the other would advance. But there was no such difference in price as could furnish any argument against my assertion that the tariff taxes in the United States do not serve to put up the price of our domestic wools. I will put this table in the RECORD without reading it, to show the truth of what I have stated.

Average price in Boston of Ohio medium wool and average price in London of Port Phillip fleece, in American currency, 1866 to 1890—both washed wools.

[London quotations from Windeler & Co. American prices from Mauger & Avery, Boston.]

*The prices reduced to a gold basis were calculated upon the value of currency at the dates indicated as given in the quarterly report of the Chief of the Bureau of Statistics of the Treasury Department for the fiscal year ending June 30, 1879.

S. N. D. NORTH,
Secretary National Association of Wool Manufacturers, Boston, Mass.

Before coming to 1893, I wish to read a remarkable piece of the history of the wool question. In 1885, after the enactment of the

tariff law of 1883, Mr. Manning, of New York, was Secretary of the Treasury, and he issued an official circular to all the wool manufacturers and wool producers in the United States, asking them to give their views as to the effect of free wool and as to the propriety of changing the existing tariff. In reply to this circular of Mr. Manning I have before me the answer of the Wool Manufacturers' Association, of which Mr. William Whitman was then the president, and I call the attention of Senators to the remarkable statement then made by the same association which framed or partly framed the act of 1867:

We are aware—

Says the Manufacturers' Association—

We are aware that there is a difference of opinion among wool manufacturers as to the desirableness of a duty upon wool. Waiving that question, as we have in the response to Secretary Manning, and assuming that the continuance of a wool duty for the present is a political necessity, we presume that every intelligent wool manufacturer in the country will admit that the principle of the existing woolen tariff—a compensatory duty for the raw material and a further protective duty—is the best system that can be devised.

What does Mr. Whitman mean by a political necessity? Why did he make that statement to the Secretary of the Treasury? He meant that in order to get votes and to save the Republican party it was a political necessity to put a duty on wool and to give a compensatory duty to the manufacturer. He meant that it was necessary to do what is attempted now in this Chamber, to bring together the two interests and tie them with a ligament of greed which could not be broken.

Who ever before heard from a trade organization the open and avowed and stupendous proposition that a political necessity should dictate the taxes of the people of the United States?

That is not all. Mr. Whitman then proceeded to argue the question of free wool, and although he admitted that this political necessity existed, he goes on to show that free wool is absolutely necessary to the manufacturers of the United States. He makes an argument which I shall insert in my remarks, unanswerable, it seems to me, in behalf of the position that those of us have assumed in favor of free raw material. He says it is absolutely impossible to make a tariff to enable the manufacturers of this country to compete with foreign manufacturers who have free wool, although, as a Republican, he admits the political necessity exists for feeing the 1,000,000 voters represented by Mr. Lawrence with a duty upon wool, bad as it is and wrong as it is, in order to bring them to the polls in solid phalanx for the Republican organization. There it is. Anyone can read it.

The letter referred to is as follows:

[Circular letter of William Whitman, president of the National Association of Wool Manufacturers, dated Boston, Mass., October 28, 1885.]

THE WOOL TARIFF A POLITICAL NECESSITY.

We are aware that there is a difference of opinion among wool manufacturers as to the desirableness of a duty upon wool. Waiving that question, as we have in the response of Secretary Manning, and assuming that the continuance of a wool duty for the present is a political necessity, we presume that every intelligent wool manufacturer in the country will admit that the principle of the existing woolen tariff—a compensatory duty for the raw material and a further protective duty—is the best system that can be devised.

This system is now in deadly peril. Nothing can save it but the individual efforts of the manufacturers whose interests are imperiled.

We ought to be able to present to Congress at least a thousand individual protests against a change of the existing system.

Foreign manufacturers' advantages from free wool.—It is necessary for us to enlarge somewhat upon a peculiarity of our manufacture before alluded to, namely, its subjection, upon grounds of public policy, to a high duty on the raw material. The American manufacturer is engaged in a perpetual struggle with the manufacturers of Europe for the possession of the markets of this country. As before said, the advantages of our competitors are our obstacles. In this strife the European manufacturer possesses the advantage—which would be overwhelming if not counteracted by special legislation—of having the raw material of his manufacture free from duty, no duties on wool existing in Great Britain, France, Belgium, and the Netherlands, and very slight duties, if any, in other manufacturing nations.

Our European competitors are exempt from the direct enhancement by a duty of the cost of wool, thus requiring less capital to supply their mills and no cost of interest on the duty required in carrying their stocks of wool and goods. They are free from the apprehension of changes in the value of wool, such as have taken place in this country in consequence of no less than seventeen changes in the tariff on wools within the memory of living manufacturers. They are exempt from the duties on wool substitutes so usefully employed to mix with wool in the manufacture of the cheaper and heavier cloths—duties which with us are absolutely prohibitory. They are able, from the lower cost of their raw material, to relieve themselves from overproduction by consigning their surplus stocks at comparatively slight sacrifice to foreign markets, to which their cheapness has already introduced them. They are not compelled, as we are, to discriminate in their choice of wool to avoid the effect of the duty, and are able to select their wools in any condition, whether unwashed, washed, or scoured, with reference only to their desirable qualities.

Through freedom of importation they have near markets, as at London, Havre, Antwerp, and Berlin, offering vast assortments and a steady supply of all kinds of wool—advantages especially favorable to the small manufacturer. This exemption from all restrictions in the selection of raw material, together with the facilities for supply and the certainty that values will not be disturbed by legislation, is believed to be the chief cause of a characteristic of the European woolen industry, namely, that the manufacturer abroad obtains success by adhering with steady attention to the special fabrics he has undertaken to make, and in which he has acquired excellence; while diversification of manufactures, so necessary to prevent overproduction, is encouraged by the equal availability of all varieties and conditions of raw material. The effect of this policy upon the agricultural interests and labor of the countries which adopt it we are not at present called upon to consider.

Domestic manufacturers' disadvantages.—On the other hand, the protection to wool adopted in this country upon grounds of public policy involves disadvantages to the domestic manufacturer, which would be insuperable if not neutralized by the compensation to be hereafter referred to. In making a comparison with European manufacturers it is not sufficient to consider the rates of duty only, but the expenses attending the importation of wool from the great wool markets of the world, from which the foreign manufacturer is exempt, and which constitute an additional protection to the woolgrower.

In order that the existing duties of wool may be thoroughly understood, we append a table prepared in 1884 by wool experts in whom we have entire confidence, exhibiting the prices at which wools of all classes could then be bought in some of the world's markets—and the conditions are not now materially changed—the existing duty upon them, the cost of importation (including commissions) from the port of shipment to Boston, the total cost at Boston, the percentage of duty upon their cost, and the percentage of duty and cost of importation upon their cost. Selecting class 1, clothing wools, as an illustration, an examination of this table will show that on class 1, unwashed wool, the duty ranges from 34.48 per cent to 100 per cent on the cost, and that the duty and cost of importation range from 48.45 per cent to 117.80 per cent on the cost.

PAYING DUTY ON GREASE AND DIRT.

This high duty is not the only difficulty with which our manufacturers requiring foreign wools have to contend. It is held that complete protection to the most important branch of our woolgrowing industry, the Merino sheep husbandry, requires that washed wools in class 1 should be subject to double the duty of unwashed wool, and the duty on scoured wool should be three times the amount upon the unwashed wools—an arrangement which compels the importations of class 1 wools to be in the greasy state, necessitating the transportation charges on from 2½ to 3 pounds of grease and dirt in the wool required for a pound of cloth.

The effect of the compulsion to buy greasy wool and pay a heavy specific duty on its impurities is that the American manufacturer is thereby obliged to give undue preference to light condition over fineness and the other valuable qualities of wools offering in foreign markets. Our manufacturers, moreover, are obliged by this restriction to concentrate their competition in foreign markets upon the always small proportion of the lightest unwashed wools; while our foreign competitors, having to pay duty neither upon wool nor upon grease and dirt, can buy the heavy wools in the market to much better advantage.

DIFFICULTIES INCREASING.

To these considerations it should be added that the high specific duty on clothing wools, a duty irrespective of the cost, practically excludes the cheap and abundant clothing wools of South America, and, by freeing them from our competition for their purchase, makes them much cheaper than they would otherwise be to the manufacturers of France, Belgium, and Germany, who work them up into cloths and stuffs by the cheapest labor in Europe.

Another matter, though comparatively of less importance, should not be omitted. The classification of wools under each class, indispensable as it is for the objects aimed at in the wool tariff, is subject to the difficulty of excluding the doubtful classes of wool, or those on the uncertain line of division between two classes, however desirable and valuable they may be, the importer being unwilling to incur the risk of such wools being subjected to the duty of the higher class. This is another considerable restriction in our selection of imported wools, and has been a source of serious loss and inconvenience to our importing manufacturers.

Necessity for counteracting disadvantages.—It will be seen from the above that we are subjected, in consequence of wool duties deemed necessary for the protection of the domestic wool industry, not only to an enhancement of the cost of our raw material, but to stringent limitations in choosing the best sources of supply for our various wants—disadvantages from which our foreign competitors are wholly exempt, and to which no other branch of domestic industry is subjected to any material extent. We dwell upon these restrictions and limitations, not with the object of urging their removal, for we have already expressed our assent to the system by which they are retained, but because a frank statement of these difficulties is required to show the indispensable necessity of neutralizing them, if the woolen industry is to be preserved in this country together with the protection to wool, which public policy seems to require and the supremacy of agricultural constituencies makes imperative.

These conditions require to be fully stated, because they are not generally appreciated. It needs to be better known that the admittedly high duties, and, on a cursory view, unduly high duties, on woolens are made necessary by the assumed necessity of protecting the domestic woolgrowers and providing for them a profitable home market; and that the manufacturers, exempted from the wool duties, would be amply content with the much lower range of duties provided for other branches of the textile industry.

Necessity for importations of wool.—It may be said that a remedy for these difficulties is to be found in the exclusive use of the domestic wools, which will be abundantly supplied under due protection. To this we reply that neither our own country nor any other in the world does or can produce to advantage wools of all kinds and grades. Experience under high protection of wool in this country for over thirty years has demonstrated that our domestic woolgrowers find it to their advantage to produce only the staple wools required for the ordinary range of woolen fabrics; and as these fabrics will always be in demand, they build up their flocks, a work of time, for the production only of the fleeces which will be profitable for a long series of years.

This system, although providing admirable raw material for common goods, is incompatible with the variety required for the diversified and highly advanced manufacture which should be our aim. The American manufacturer, to compete with the fabrics of other nations in the endless variety demanded by our times, must have the power of selecting a portion of his raw material from all the world's sources of supply. The sudden and exceptional demand for more or new raw material must be supplied by importations.

Mr. VEST. My friend from Delaware spoke of class interests dictating to Congress at the expense of the consumer; but this goes beyond all that was ever before known in American politics. This tax, they say, upon the people of this country is dictated by political necessity, although it is a wrong and an outrage and should not be tolerated for any other reason.

Now, what has been the result as to the woolen manufacturers? I have spoken of the woolgrowers as hurriedly as possible, because I did not want to impede the prosperity which is coming, and

which our Acting Chaplain told us the other day God should be thanked for sending upon the country.

What has been the result as to these duties upon wool as to the woolen manufacturer? Some one has said here that the woolen schedule is the citadel of protection. It is. Under the McKinley Act, to show its practical operation, we imported into this country, in 1893, $36,943,700 worth of woolen goods, appraised at the custom-house. We paid in duties at the custom-houses upon these goods $36,457,582, within half a million dollars of the value of the goods. In other words, if I have on a coat that is worth $10, it costs me $20, because there is a duty of $10 paid upon it. Under the McKinley law, upon some articles of wearing apparel for men and dress goods for women and children the duty is 225 per cent. The average duty under the woolen schedule in the McKinley Act is 91.61. Under the act of 1867 it was 61.37, showing an enormous increase. Look at the increase proposed now. It is largely in excess of the McKinley Act.

Under paragraph 362, wool and hair which have been advanced in any degree in manufacture, even to the extent of 1 cent, have a duty of 113 per cent ad valorem.

Under paragraph 363, the next paragraph, yarn is increased from 40 per cent under the existing law to 90 per cent.

Under paragraph 364, on cloths, knit goods, etc., when not over 50 cents per pound in value, the duty is 154 per cent; when it is less than 50 cents per pound, the duty is 94.45 per cent.

Under paragraph 365, on blankets and shawls the duty is 71.75 per cent. On those worth from 30 to 40 cents a pound the duty is 63.48 per cent; above 50 cents per pound, 84 per cent. On blankets 3 yards wide the duty is 125 per cent.

Mr. GRAY. By this bill?

Mr. VEST. Yes, sir; by this bill, under paragraph 365.

Mr. GRAY. I did not carry it out accurately. It is 125 per cent?

Mr. VEST. Yes; 125 per cent.

Mr. GRAY. On every hundred dollars' worth of blankets there is to be a tax of $125?

Mr. VEST. Of course, 125 per cent; that is just what it means; and 3 yards wide. If a man undertakes to cover himself all over or any portion of his family, he pays 125 per cent.

In paragraph 367, on women's and children's dress goods, the duty is 135 per cent. On shawls valued at not more than 40 cents a pound the duty is 171 per cent. On knit fabrics valued at not more than 40 cents a pound the duty is 140 per cent. On hats valued at not more than 40 cents a pound the duty is only 203.48 per cent.

In paragraph 369, on webbings and gorings, etc., the duty is 80 per cent.

In paragraph 371, on carpets, the duty ranges from 69.67 to 80.22 per cent; and they have put the duty so high upon Turkish and oriental rugs and carpeting that the American citizen is compelled to do without them and to take the carpets manufactured in this country at the prices I have named.

Mr. WHITE. If the Senator from Missouri will permit me, as to the item of oriental rugs, I will state that the duty is so high that it has brought here a very vigorous and well-worded protest from the most extensive dealers in carpets in the United States.

Mr. VEST. Mr. President, these are only a few of the enormous duties that are imposed under the woolen schedule. The point I make in this whole discussion is that, under the sixteen years of the act of 1867, with the duties selected by the woolgrowers and the wool manufacturers, according to their own official report kept from day to day and published in one of their bulletins, there was no increase in the price of wool to the American raiser and no prosperity came to the manufacturer.

Now, what was the result upon the manufacturer of the enactment of the Wilson bill, so often and so much derided? I had occasion some time ago in this Chamber to produce the statements made by the Cotton and Wool Reporter, a paper that does not belong to my political faith, in regard to the effect of free wool upon the woolen manufacturing establishments in the United States. I ask leave to insert in my remarks extracts from this paper. I will endeavor to give a synopsis of the result of one year of the enactment of the Wilson law with free wool.

In 1895, under a year of the Wilson law, there were constructed in the United States 61 woolen mills, against 45 in the last year of the McKinley law. This paper goes on to state that it has been a year of unexampled prosperity to woolen manufacturers and enormous quantities of foreign wool have been brought into this country. What was done with it? Were all those pounds of wool for spectacular purposes? Could they have been eaten up? Were they burned? Or were they manufactured by these mills into cloths that were sold to the consumers of the United States? The price of domestic wool went up because it was necessarily mixed with the foreign wool in making cloths to be bought and worn by our people. Here are the statements made by this paper, the organ of the cotton and woolen manufacturers of the United States, showing that in the first year after the enactment of the Wilson law the price of wool not only remained steady from the beginning of the time when that law was enacted, but increased:

BOSTON, *December 24, 1895.*

The American Wool and Cotton Reporter will say, December 26, of the wool trade:

"The year which five days hence will have rounded out its course has been, on the whole, a signally eventful one. In the volume of sales it has broken all previous records. The amount of foreign and domestic wool disposed of in the three principal markets up to December 12, 1895, amounted to 347,060,105 pounds, as compared with 261,667,229 pounds December 13, 1892. It will be also memorable for an unprecedented development of the worsted industry and for the lead which combed yarn fabrics have held in the woolen dry goods trade, notably in cloths for men's wear. And, finally, it has seen some tardy recovery in values of the staple from the depression of two years ago.

"Some idea of the recovery in values of domestic wool during the year may be obtained by a comparison of prices December 21, 1895, with rates January 1. At the earlier date, Ohio XX and above was quoted at 17 to 18 cents; at the latter, 19 to 20 cents, a XXX selling at 21 cents; Ohio and Michigan X, in January, 15 to 17 cents; in December, 16 to 18 cents; No. 1 wools, at the commencement of the year, 18 to 20 cents; at the close, 20 to 22 cents; one-half and three-eighths unwashed combing, 15 to 16 cents in January; 16 to 18 cents in December; three-eighths and one-fourth blood combing, 16 to 17 cents early in the year; 17 to 19 cents at the close. Fine medium Wyoming and Utah, in January, 10 to 12 cents; in December, 12 to 13 cents; eastern Oregon, in January, 11½ to 12 cents; in December, 12 to 13½ cents. Stocks of domestic wool December 21, 1895, in the three principal markets, amount in toto to 53,726,588 pounds.

"Stocks of foreign wool at the same points aggregate 27,241,200 pounds.

"The total supply of domestic wool in all the markets of the country, together with unreported lots, will amount to 101,725,248 pounds, which, combined with the quantity of foreign wool in the three great seaboard markets, will make the grand total (about) 129,937,438 pounds."

I challenge any Senator upon the other side to show me where the price of wool ever stopped after the enactment of the McKinley law, or under the law of 1867, except for the two years 1871 and 1872, when there was abnormal and phenomenal speculation. There may have been two or three or four months when there was what they call a spurt in the market as to wool, but the grade was downward from the enactment of the law, except in 1871 and 1872, and always downward from the enactment of the McKinley law in 1890.

I repeat, that the Wilson law came into existence under the most disastrous and gloomy circumstances. A great panic was upon the country. The people were demanding relief, and it could not be given to them by any legislation of Congress. There were causes at work beyond our control. Every interest besides wool was depressed. Yet under the Wilson Act the fall in the price of wool stopped. From 18 to 19 cents, when the law was enacted, it went up to 20, and then 21, and to-day it is quoted in the market at from 21 to 22 cents for XX Ohio wool. Who can answer these figures except by denunciation and ridicule and the statement that the Democratic party promised prosperity to the country and did not bring it?

Mr. President, coming events sometimes cast their shadows before. Our Republican friends propose now to put back the high duties upon wool and upon woolen goods. When the people of this country find that experience in the past has been verified as to results in the future, when they know that these promises have been kept to the ear and broken to the hope, there will come a day of reckoning. The Republican party, mark it, will come back to this Capitol broken and shattered with the irresistible logic of having made promises which they have not kept.

I ask for the yeas and nays on my motion.

The PRESIDING OFFICER. The Senator from Missouri asks for the yeas and nays on his motion to strike out the paragraphs named.

The yeas and nays were ordered.

Mr. WARREN. Mr. President, the Senator from Missouri [Mr. VEST] seems to believe, and I credit him with sincerity in the belief, that free wool is alike a boon to sheep growers, to wool manufacturers, and to the consumers. I want the RECORD to-day to again give him credit for his statement of a year ago on this subject. I have in my hand a speech made by him January 7, 1896, in which he said:

Mr. President, I believed then, and can prove now, that free wool has done more for the woolgrowers of the country and for the woolen mills of the country than any legislation that the Republican party has ever enacted.

And in the same speech, in referring to the manufacturers, he said:

I say that the woolen mills are prosperous, and that they have had a year's prosperity such as they never had before, notwithstanding the statement made the other day by the Senator from New Hampshire [Mr. GALLINGER] that the mills of New England were on the verge of bankruptcy.

I submit to that great jury, the public, the statements he then made, together with his views on the same subject to-day, and I am willing to accept the verdict of the people. The woolgrower knows, and so does the manufacturer, whether free wool has been a boon and a blessing.

In discussing the prices of wool there is one fact of which I challenge contradiction. There never was a time until the second election of Mr. Cleveland, and the woolgrowers were in consequence threatened with free wool, when first-class Ohio washed wool brought less than 60 cents a pound scoured. There might have been a day at a time when it had descended to 58 cents, 57 cents, etc., but except for a few days at a time it never went lower than 60

cents, and I am not certain that it ever went lower for even a day. Since the passage of the Wilson law, and until later elections demonstrated that there was a change of sentiment and that there would probably be a change in legislation, there never was a day when scoured wool reached 40 cents a pound.

Now, it is all very fine to say that wool is higher and to undertake to figure out that wool is higher, etc., but I challenge a contradiction of the statement I make that 60 cents, or about 60 cents, was as low as scoured Ohio wool ranged, averaged, or ever reached, excepting perhaps for a few days at a time, until the wool industry was threatened by a Democratic President and Congress; and furthermore that since the passage of the Wilson law it never reached 40 cents until, as I said before, there had been an election which showed that the Republicans were again to be in power.

Mr. VEST. At what date does the Senator fix his 60-cent rate? Prior to 1893?

Mr. WARREN. I bring it down to 1892.

Mr. VEST. Does he say that was the price of XX Ohio wool?

Mr. WARREN. I said scoured wool. I have the Senator's own figures—given in his former speech—if he wishes to see them, which show the truth of the statement I make.

Mr. VEST. I was talking about XX Ohio wool. I took that as a test.

Mr. WARREN. You can talk about wool and you can make figures, perhaps, to prove any kind of a statement, if the figurer is right slick with his figures, but the cold fact remains that under a tariff scoured wool was 60 cents per pound and above, and that under free wool, or threatened free wool, it has been 40 cents. I do not think it ever reached 40 cents under free-wool conditions.

I wish to say, in this connection, that no wool is used, to my knowledge, in the manufacture of cloth or any other fabric that is not first scoured. The whole basis of wool prices, so far as its use in manufacturing is concerned, is upon the scoured condition and value of this commodity. Therefore the price of scoured wool is the price by which we must judge whether it is high or low. It is the only real test.

There has been a great deal of talk about the consumer and how much it was going to cost him. This is right and proper, of course. The Senator from Delaware [Mr. GRAY] grew eloquent and pathetic over the wearer of woolens. I take the speech of the distinguished Senator from Missouri [Mr. VEST], his speech of January 7, 1896, and read again. He undertook to prove that the manufacturers of woolens were never as prosperous as under the Wilson law, and in endeavoring to prove this, he said:

> The official reports show—and I have a volume of them—that we have consumed, in 1895, 540,000,000 pounds of wool, more than was ever consumed in the most prosperous wool year in the history of this country.

I well remember how he raised himself upon his tiptoes and what emphasis he put upon 540,000,000 pounds of wool as a total that had been consumed in this country in 1895. Now, if the Senator will take 540,000,000 pounds of wool and divide it by 70,000,000 people, he will find that the per capita consumption of wool is slightly over 7 pounds and is less than 8. Therefore, for all uses to which wool is put, not only for clothing, but for carpets, for cushions in carriages, for draperies at home, for the coverings of furniture, and for all other uses, the American people used in that year, which he says was a remarkably prosperous year, less than 8 pounds of wool in grease per capita.

How much does that amount to upon a tariff similar to that in the McKinley bill, where the rates ranged from 1 cent per pound on cheapest carpet wools up to and not exceeding 12 cents per pound on the best wool? What does it amount to under the bill that is now proposed? A simple matter of forty-odd cents to 75 cents per capita as the highest possible tax that you could prove, by figures or by argument, could fall upon the consumer of wool because of the tariff, even if we allow that the consumer pays the tariff, which I do not admit.

Is there a man in the Senate, is there a man in the State of Missouri, the State of Wyoming, or any other State who would not pay 40 cents or 75 cents per annum to build up an industry that would employ a million American people, that would save the payment of one to two hundred millions of gold to other countries from this country for a product we can as well produce ourselves? If so, he will vote probably for free wool and he will probably be a Democrat. A great hullabaloo is made here upon this floor now and always about the consumer of wool and the vast amount that it is costing him. There is not a man within the sound of my voice who has upon his back in a suit of clothes 5 pounds of wool.

Mr. GRAY. You will not have that much if we pass this bill.

Mr. WARREN. Possibly not. I presume I could safely say that upon the Senator's back there is not now, in his clothing, to exceed 3 pounds of wool. Would the Senator decline to pay 6 cents or even 10 cents a pound upon these 3 pounds of wool if he could thereby maintain an industry that could employ a million men and women and that would absorb and pay fair returns upon many hundreds of million dollars of capital and save one to two hundred million dollars a year in gold that would otherwise go out for wool?

Mr. GRAY. If the Senator will allow me, let me point out to him, without at all subscribing to his very delusive figures about the per capita taxation, that even admitting the fact, he must remember that he has divided the amount by the whole population of the United States. I suppose, to get that per capita, he takes 70,000,000 people, and he says it would not amount to more at the outset than 75 cents per capita. But he must recollect that the person who pays a per capita pays on an average, according to the census, for about five head. So each man who pays—the real taxpayer—pays the per capita for his wife and children, and pays five times 75 cents, even if that were true.

Mr. WARREN. Mr. President, I take it that every patriotic person expects to support the government of which he is a citizen. To support the government means to pay a tax. I presume that the Senator from Delaware, like myself, would feel more comfortable if he had no taxes to pay, but in some form taxes must be paid, either by ourselves or by those who come in to enjoy this market. I claim that we do not pay these impost duties, but they are paid by those foreign nations who wish to come in and enjoy our market.

Mr. GRAY. Nobody objects to paying the tax, even though it may be a heavy tax, if it all goes into the Treasury; but I think a great many people object to paying taxes, not into the Treasury, but into the pockets of a class of people who claim that use of the taxing power for their own benefit. That is what I object to.

Mr. WARREN. I suppose the Senator from Delaware feels like the man who writes the following, over in a country where they have free trade:

> Birth is taxed, marriage is taxed, death is taxed. Commodities are taxed, manufactures are taxed, trades are taxed, houses are taxed, incomes are taxed. We are taxed for our butler, if we are prosperous enough to keep one. We are taxed for our footman, groom, and gardener. The carriage we keep is taxed, the omnibus we take is taxed, the cab we hire is taxed, the railway train we travel in is taxed. The house dog is taxed, and so also is the heraldic device on our note paper.
>
> Everything we drink is taxed—beer, spirits, wine, tea, coffee—and even for the water we drink there is the water rate. Light is taxed through the medium of the gas rate. The land we walk upon is taxed, the tobacco we smoke is taxed, the gold or silver jewelry we wear, the eau de cologne perfuming our handkerchiefs, the figs we eat on Palm Sunday, the Christmas plum pudding, these are all taxed. Even our antibilious pills are not free.

There is the plaint of an Englishman who lives in a country which floats the banner of monometallism, Cobdenism, and free trade.

Mr. President, I did not rise to enter into any extended discussion or to unduly occupy the time of the Senate, but I want to repeat, that the statement so often made here that wool has been higher under free trade than under a protective tariff, or as high, is absolutely untrue in every particular and absurd as well, as proven by the prices of scoured wool, which is the only reliable standard of prices and always gives exactly the true price of wool ready for manufacturing.

Mr. VEST. No such statement has been made, and the Senator has no right to say that it has been.

Mr. WARREN. I am alluding to what has been said here in debate.

Mr. VEST. I never said that in my speech. I said then, and I repeat it—and the Senator can not disprove it—that under the Wilson law, for the first time, the fall in wool stopped; that is, the XX Ohio wool, which is the grade taken in all markets as the best grade. I did not speak about scoured wool, but the XX washed wool, which is equivalent to the Port Phillip wool of Australia; and the two are always compared together in the market. I say that after the enactment of the Wilson law, for the first time, the fall of that wool stopped, though it had been going down under the law of 1867 and under the McKinley law.

Mr. WARREN. It stopped falling just as a man falling from the top of a building stops when he strikes the ground. He can fall no farther, and his brains are dashed out by the force of his last fall.

Mr. VEST. Commencing at 18 cents and going up to 21 and 22 is not dashing its brains out.

Mr. WARREN. But the statement is made that he believes that he can prove now that free wool has done more for the wool-growers of the country than a tariff. I deny the statement, if the Senator means that that has made them more prosperous, and I ask how he has made them prosperous by lower prices for their product?

Mr. VEST. It stopped falling in price.

Mr. WARREN. If that has made them more prosperous, in what way has it made them more prosperous? When there has been a reduction in the price of their product of nearly 100 per cent, has that made their condition better?

Mr. GRAY. A reduction of 100 per cent?

Mr. WARREN. A reduction of one-half, I should have said.

Now, Mr. President, I assume that the Senator from Missouri is one of those who supported and voted for the Wilson bill, and I suppose that those who supported the Wilson bill based their arguments then, as they do now, on the ground that they were trying to protect the wearers of woolen goods. How did they protect them? They made a tariff that increased the importation of that unclean, contemptible article, shoddy, and they made a tariff under which shoddy could come into this country more freely and delude the poor who bought that character of clothing. Shoddy importations increased 1,700 per cent, if my figures are right, in ten months after the passage of that law. That is what the Wilson law did. Under it old rags from all countries, hair and refuse, were brought over here and worked into clothing, because, under the operations of the Wilson law, the workingmen of this country were made too poor to buy decent clothing, and they sought to buy the cheapest thing they could get. The Wilson law had opened the door to that adulterant, just as it opened the door to every other adulterant and fraud from abroad.

Mr. GRAY. Only one moment. I do not want the ingenious speech of the Senator from Wyoming [Mr. WARREN] in regard to this per capita taxation to go out without a single word of comment, for that is one of the most delusive forms of putting a tax to tax-ridden people.

I said a moment ago that, even according to the statement of 75 cents, dividing the whole population into the value of the wool imported would not give that result, because there are not 70,000,000 taxpayers. We have got to divide that number by five at least in order to get the number of taxpayers.

If we take the head of a family—the man who pays the tax—he represents about five others. But let that go; that is small. All that tax goes into the Treasury; that is the tax actually paid at the custom-house; but that does not represent the tax that is paid by the American people by reason of this imposition. The tax you are voting is not the tax that goes into the Treasury of the United States, but the tax that goes into the pockets of the people who are seeking to frame this tariff law in their own interests.

Mr. WARREN. What becomes of the duty we impose?

Mr. GRAY. That goes into the Treasury, so far as it is collected at the custom-house; but the other is a tax on the people, and it is a much larger tax than the tax that goes into the Treasury.

I have in my hand a communication which was published in the New York Journal of Commerce during this month. It is long, and I only intend to read a single line from it. It is from a wool manufacturer:

Prices of woolen fabrics—

Says he—

are 40 per cent less than those current in 1892, and the conditions of the retail trade throughout the country, as well as that of wholesalers, have been readjusted to this new scale of values.

"Forty per cent less?" What does that mean? It means 40 per cent off of the burden on the head of a family. However poor, he has to buy blankets and dresses for his wife and children and woolen clothes and woolen hats for himself. How much is that? Suppose a man buys only $100 worth of fabrics, including blankets and carpets and clothing, for himself and children, there is $40 right off that he has been relieved from paying by the Wilson law of 1894; and you propose to reimpose that $40 on that $100 of expenditure, and how much more has not yet been calculated.

Here was one article that was spoken of by the Senator from Missouri, blankets, which are taxed in this bill 125 per cent. He has reduced—I have not—the specific tax to an ad valorem. That means $125 of tax for every $100 worth of blankets that are bought. And you call that a per capita of 75 cents, so small that nobody but a very mean man would consider it.

Mr. President, those who impose this tax know that it can not go into the pockets of the beneficiaries of the tax unless it comes out of the pockets of somebody else, whether that per capita be what the Senator says or what I have said.

Mr. WARREN. I should like to ask the Senator whether he has experienced a fall of 40 per cent in the purchase of his wardrobe, in buying clothing, etc.?

Mr. GRAY. Yes; certainly I have.

Mr. WARREN. That is not my experience.

Mr. GRAY. That is my experience; but I do not buy, perhaps, such expensive clothes as the Senator from Montana. People who are expecting such large rewards should live upon a scale that is commensurate with these levies upon the people at large, and perhaps buy better clothes than I do. But the clothes that the millions wear are more than 40 per cent cheaper than they were prior to 1894; and those who have bought blankets, the wives of the men of this country who shop for their families, will tell you a different story if you ask them about their weekly and monthly expenditures.

Mr. WARREN. I presume the Senator will allow me to state that I do not subscribe to the assertion that clothing is 40 per cent lower under the Wilson bill than ever before.

Mr. GRAY. Oh, yes.

Mr. WARREN. Mr. President——

Mr. GRAY. One word more, Mr. President, and then I will yield the floor to the Senator.

Mr. WARREN. I do not care to have the floor.

Mr. GRAY. Go ahead.

Mr. WARREN. What I want to say to the Senator is this, that even though there had been a shrinkage of 40 per cent—which is not true—and even though there had been one of 50 per cent, there has been no time when the workingmen of the United States could so well afford to pay even 50 cents for an article under the Wilson law as they could afford to pay a dollar before the passage of that law, because you took away from them, by that bill, their employment at remunerative wages.

Mr. GRAY. That is a confession and avoidance, and that is an argument I have often heard before.

One word about this matter of clothing, and then I think I shall have nothing more to say that will obstruct the passage of this bill, which is going through to its inevitable conclusion, I know.

The Senator has spoken about the introduction of shoddy and of adulterants in clothing. There is this to be said about it, that under the condition of comparative freedom of trade, or greater freedom of trade, a citizen of this country, however poor or whatever his condition may be as to wealth, has the choice between a cheap woolen suit and perhaps a still cheaper shoddy adulterant, and you take away that choice and compel him to buy, if he is a poor man, the cheap adulterated article and shut him out entirely from the wholesome and satisfactory woolen fabric which he otherwise could buy.

I do not know so much as the Senator from Wyoming does about the technicalities of this bill or about the art of sheep raising or about the business of wool producing, but I understood the Senator from Missouri to be speaking of a grade that came from the farmers of washed wool, and not of scoured wool. I do not understand that the producer of wool scours it at all. I may be wrong about that. He is not a scourer of wool, and we are talking about the benefit to the farmer, and the prices that have been given by the Senator from Missouri were as to washed wool and not at all as to scoured wool.

Mr. WARREN. All kinds of wool are based on scoured wool.

Mr. GRAY. One moment, and I will be through, and give the Senator the floor.

As to scoured wool I do not know, but when it goes into the hands of those who scour it, the manufacturers or whoever they may be, who put it in condition to be put into the spindle or the loom, there may be and undoubtedly have been improvements in the process; undoubtedly the art has advanced, and it may be more cheaply done, and that may account for a good deal of the difference between 40 and 50 per cent. I do not know, but if there is that difference I do not understand why the people of this country should not be allowed to enjoy it.

Mr. WHITE. There is one feature of this matter to which I desire to very briefly direct the attention of the Senate. It has been suggested by several arguments which have been recently made on the other side of the Chamber. What is the purpose of this wool schedule? To benefit the wool producer; yet the expert representing the wool producers declared to us that this bill is no good for that purpose, that it is absolutely valueless, that it is a fraud, and, to use the expression of the day, "it is a fake."

Mr. Lawrence, who has often been quoted here, says of the act of 1883:

(2) In the midst of prosperity, the wool industry in the house of its professed friends—

And we have the authority of the Senator from Montana—and I think he is right—for the statement that those who to-day are suggesting this bill are simply the professed friends of the wool industry—

received a cruel, unjust, unnecessary, ruinous blow in the reduced wool tariff of March 3, 1883.

Now, listen, Senators, to this statement. You declare that the enactment of this bill will arrest the declination of the sheep industry; listen to this:

Under it—

To wit, the act of 1883—

Under it sheep declined in number from 50,626,626 in 1884, with a wool clip of 308,000,000 pounds, to only 43,431,136 in 1891, producing 285,000,000 pounds.

Witness that tremendous decline. Then Mr. Lawrence continues:

(3) Then came the McKinley Act of October 1, 1890, moderately protective as it came from the hands of its author, but (1) by the introduction of the so-called "skirting clause," and (2) ad valorem duties on third-class wools, and in part (3) by conditions arising after its passage—the decline in the world's prices of wools—it became ineffectual to afford adequate protection. Under it wool prices went down and down until they would no longer repay the cost of production; and even in Texas, where the expenses of caring for sheep were less than in most States, sheep declined in numbers and value. (As to Texas, see Senate Document No. 17, 1895, pages 181, 209-211; as to wool prices, see Senate Document No. 17, pages 25, 134-142, 164, and appendix hereto.)

There is the statement, Mr. President, that the McKinley tariff, because, among other things, it contained the provision in regard to skirted wools which is incorporated in this bill and which you propose to enact again, the same provision which Mr. Lawrence points out as detracting from the merits of that bill, and in fact invalidated it as a protective measure, is here retained, ostensibly for the benefit of the wool producer.

Now, we have the testimony of Mr. Wallace, a sheep man of experience—George H. Wallace, of Sante Fe, N. Mex.—a statement made before the Committee on Ways and Means of the House of Representatives, to the same purport. He says, on page 1605 of the Tariff Hearings:

Third. That the act of 1890 afforded no protection, although at first appearing to do so, because it was found not to maintain the relative value of domestic scoured wool. This invites a glance at the acts of 1883 and 1890. In the first of these there was really but little change from the previous law. In the first and second classes the dividing line was lowered from 32 to 30 cents, but this was offset by dropping the ad valorem rates. In the third class the duties were lowered 16½ per cent. But the most remarkable change was the addition of the words "excluding charges in such port," which had the effect of placing nearly all wools under the dividing line in their class and thus materially reducing duties; but, as before stated, there is little in the law to explain why it was ineffective.

The act of 1890 contains much new matter and some new paragraphs which were intended to make the law explicit and effectual, but the most noticeable and extraordinary addition is the proviso, in paragraph 353, excepting both skirted wool and scoured sorted wool from the penal clause. This alone is enough to account for the failure of the act. It appeared there in this manner: The writer was one of a committee of woolgrowers which met a committee of manufacturers in conference on this bill in the Ebbitt House, at the city of Washington, in 1890, in which meeting the manufacturers insisted upon the insertion of this proviso. The woolgrowers would not consent, but the manufacturers stubbornly insisted, and finally their chairman asserted, "Such has been the practice heretofore," and demanded its insertion as the price of their support of the bill.

The witness gives the detailed reasons, which appeared conclusive to the woolgrowers, that under no circumstances can an act framed upon the principles of the law of 1890 be of any substantial benefit to the woolgrowers.

Mr. Catron, a former Delegate in Congress from New Mexico, and also a sheep grower, testifies likewise before the committee, and gives his views to the same purport. They can be found on page 1583 of the Tariff Hearings. We have also a statement of Mr. Smith, late of Utah, on page 1585, in which he says the woolgrowers of Utah think if they can get 15 cents a pound for their wool they can get along and improve their flocks.

So, whatever theory you may adopt, this tariff, like the tariff upon wheat and other things, is inserted in this bill for the purpose of deluding and deceiving all those who believe they are going to get what they call protection from it. From the standpoint of one who believes in free wool it is not justified, of course, upon its face; from the standpoint of one who believes he is going to afford so-called protection to an American industry, so as to enable those who follow it to build it up, it is ineffectual.

For the reasons I have given, I am opposed to the amendment of the Senator from Pennsylvania [Mr. QUAY], because I believe if this schedule is to be adopted at all, it ought to be as nearly as possible uniform in its operation. I was unwilling to take part in an attempt to reduce to a minimum the tariff on the third-class wools and leaving it high upon a class of wools which least needed protection. For that reason I voted against the provision, and so I expect to vote for the amendment of the Senator from Missouri [Mr. VEST].

Mr. WARREN. I have in my hand a publication of the 19th of June, called Textile America, a nonpartisan business sheet, and it happens to give a knowledge which seems to be lacking here in the Senate, certainly as to a number of Senators, the technology of wool. It is a very short article, and will occupy but about a column or column and a half in the RECORD. I ask consent that it may be printed in the RECORD without reading.

The PRESIDING OFFICER. In the absence of objection, it will be so ordered.

The article referred to is as follows:

TECHNOLOGY OF WOOL.

FOURTH AND FIFTH ARTICLES.

On account of the press of matter relating to the Fall River Industrial Exhibition the fourth article on the "Technology of wool" was omitted last week. To make up for its omission the fourth and fifth articles are printed in this issue. The series will be continued as usual every other week until finished. Subsequent articles will be on "Dy ing and drying," "Picking and carding," "Combing and drawing," "Spinning," "Dressing and weaving," "Designing and finishing." They are written by Edward F. Whitmore, superintendent of the Putnam Woolen Company, Putnam, Conn.

SCOURING.

Wool as it comes from the sheep contains many foreign substances, and before it can be used in manufacture these must be completely removed. Fast and even colors can be obtained only on clean fiber, and it is impossible to properly card, spin, weave or finish a fabric made from imperfectly cleansed wool.

These impurities consist of matter adhering to the fiber, such as dirt, sand, leaves, grass, and the like. The natural grease or yolk of the wool also impregnates or covers the fibers, and this, too, must be removed in the scouring process.

The value of wool is based upon the shrinkage or percentage of loss in weight which the wool sustains in the scouring process.

Wool yolk.

Wool yolk consists of two substances: First, the wool perspiration. This is soluble in water, is partly removed by the first washing of the sheep and is mainly composed of potassium compounds of fatty acids. Second, the wool fat. This is insoluble in water, is composed of fat-like bodies and acids, and can only be removed by alkaline solutions. The potash salts or carbonates, which are component parts of the wool yolk, are of material aid in cleansing the fiber. These salts are sometimes found in the wash water to the amount of 4 per cent of the weight of the raw wool, and constitute one-half of the yolk.

The shrinkage of wools.

The shrinkage of different wools will vary, being from 40 to 80 per cent, according to the amount of dirt and richness of yolk. The percentage of yolk is from 10 to 30 or 40 in heavy fleeces of full-blood sheep, and the percentage of dirt varies from 10 to 50. A high authority gives the following as the composition of merino wool: Earthy matter, 28 per cent; yolk, 41 per cent; clean wool, 31 per cent.

In some cases the wool is passed through a dusting machine to remove the loose dirt and open out the locks preparatory to the operation of scouring. It is tossed and shaken by the projecting spikes on the cone-shaped cylinder of the duster as it rapidly revolves.

Chemicals used in scouring.

To get the best results in scouring, it is necessary that the nature and amount of alkali used be carefully considered. Not only is it important that the wool be freed from impurities, but the scouring process must not be carried too far or the fiber itself injured and sustain loss from using too powerful or too highly concentrated scouring agents or at too high a temperature.

The chemicals most generally used as detergents in scouring wool are carbonates of sodium, potassium, and ammonium, salt and soda, or potash soaps. These, when used in diluted solutions at the proper temperature, will not act injuriously upon the fiber. Caustic alkalies, either soda or potash, are dangerous even in small quantities, and a strong, hot solution will entirely dissolve the wool.

Sodium carbonate is much used in various forms, as soda ash of 36, 48, and 58 degrees (the last known as pure alkali), containing, respectively, 61.5, 82, and 91.1 per cent of sodium carbonate. Lower grades contain many impurities, with more or less caustic soda.

Sal soda is crystallized carbonate, and as the water of crystallization is evaporated, it crumbles to a white powder, is very pure, free from caustic, and easily soluble in water. Soda ash is produced by the old Leblanc process, which consists essentially of treating common salt with oil of vitriol, heating with coal and limestone, and the product purified, crystallized and dried. It is also produced by the later ammonia process, by which salt is acted upon by ammonia and carbolic acid gas; such soda ash is quite pure and free from caustic soda. Silicate of soda, soluble glass, so called, is sometimes made use of.

Potassium carbonate has about the same effect on the wool as the soda salt, but is more expensive and has the disadvantage of absorbing moisture from the air, thereby changing its nature. It acts in harmony with the natural yolk of the wool.

Ammonium carbonate has a mild effect on wool and leaves it in a nice, soft condition, but its high cost prevents it being largely used.

Ammonia is used in small quantities with other chemicals, but its cost also hinders its free use. Sal ammoniac is often employed in connection with carbonate of soda or with common salt. While neither are alkaline salts, both have a cleansing action on the wool.

Use of soaps in scouring.

Soap used as a scouring agent gives excellent results. It should be neutral or slightly alkaline and free from caustic alkali. Two classes of soap are known in trade—hard, or soda soap, and soft, or potash soap. The last is preferred, as it leaves the wool white, soft, and lofty, while soda is inclined to make it harsh, brittle, and turn it yellow.

Chemically speaking, soap consists of one or more fatty acids, combined with soda or potash salts, the fatty part being supplied by grease, lard, tallow, or a vegetable oil, as cotton seed, olive, palm, or linseed.

Soap has a much milder action upon the fiber than the carbonate of soda or potash used alone, but has the disadvantage of being decomposed by hard water, containing the salts of lime and magnesia. An insoluble, sticky paste is thus formed which adheres to the fiber and is very difficult to remove. If the water is hard, it is necessary to neutralize the mineral salts by the addition of an alkali, and thus soften the water.

Scouring by hand.

Opinions differ as to the best method of scouring wool and the best mechanical means to employ. We shall describe the two principal processes in use. The hand process, which is the simplest and the oldest, consists of soaking the wool in a large box or tub containing the alkaline scouring liquor and having a perforated false bottom that prevents the dirt and settlings from becoming mixed with the wool.

The strength and temperature of the solution is varied according to the quality and condition of the wool; 100° to 140° of heat is the usual temperature.

The wool is moved about so as to become thoroughly saturated, and is allowed to remain in the liquor until the yolk and dirt have been acted upon and completely dissolved or neutralized. It is then lifted out upon a rack and passed between heavy rollers to squeeze out the surplus fluid, or it may be piled on slats and drained. After being partially dried it is thrown into a rinse box and washed in a strong current of clean water. The water enters the box at the bottom of one end and gives a rotary motion to the whole mass, thereby rinsing and cleansing the wool. After this process it is lifted out and allowed to drain, and is then dried upon a rack or by being passed between steam pipes upon an endless apron.

Machine scouring.

The method of scouring by machinery consists of passing the wool through successive bowls containing the alkaline solution in decreasing strength. The wool is moved about automatically by rakes or forks, or is carried along by a current of water. It is then rinsed in clean water and partially dried by being run through squeeze rolls.

Some forms of scouring machines are from 30 to 50 feet in length and shaped like a trough. They are made of cast iron and have various appliances to handle the wool and regulate the temperature. In some cases the soaking tank is first used and the rake system in the latter part of the process. Both systems have their advantages, and some use a combination of the two, or parts of each. In whatever way the desired result is brought about, the wool should be light and lofty after scouring; not rolled or felted. It should have a soft, clean feel, and the fiber should be uninjured. The less motion and pressure used to attain this end, the more satisfactory the result.

Utilizing the grease.

The liquor used in scouring is generally allowed to run to waste. From the wool raised in this country alone there is about 80,000,000 pounds of grease and oil thrown into the rivers annually. Experiments have been made in Europe to utilize this waste. By running it into cisterns, treating with acid,

and precipitating the grease, a marketable product can be obtained. The oil may also be squeezed out and used in making soap, or the matter pressed into cakes and used as fuel. It is not a paying process, but it is a convenient way of getting rid of the waste, and gives a return for the time and labor expended.

CARBONIZING AND BLEACHING.

Carbonizing.

Wool from some localities is so full of burrs, seeds, and other vegetable impurities, adhering with such tenacity that it is impossible to remove them by ordinary means without injuring the fiber. The process of carbonizing is consequently resorted to. By this agency the vegetable matter in the loose wool or manufactured goods is burned by acid. This process is founded upon the fact that dilute acids have little influence upon the wool fiber, while they act forcibly upon vegetable substances if allowed to dry upon them.

Method of procedure.

The wool is soaked in a weak solution of acid, usually sulphuric or muriatic. The acid absorbs the water from the vegetable substances, decomposing the vegetable fiber. After drying, the burrs and other vegetable matter, reduced to dust, may be beaten or shaken from the wool. Besides acids, acid vapors or gases are used, as are also the chlorides of aluminium and magnesium.

The details of the process and mechanical means used may be varied to suit the stock and conditions. The whole process requires extreme care, as wool is liable to lose something of its softness and curliness and its capacity for felting when carbonized.

The separation of wool from cotton in rags is effected by carbonizing, and the resulting product is known as "wool extract."

Mr. MILLS. Mr. President, I understood the Senator from Wyoming [Mr. WARREN] a few minutes ago to state that free wool had stimulated the importation of a large amount of shoddy into this country. Am I correct in that?

Mr. WARREN. I stated that in the first ten months after the passage of the Wilson law there were seventeen times as much shoddy imported as in the same months of the year preceding.

Mr. MILLS. But you do not know how much that was.

Mr. WARREN. I can give it to you in a moment. The importation increased during those ten months from 1,081,441 pounds the ten months before to 17,824,008 pounds.

Mr. MILLS. I have the official report here before me, which shows that in 1893 there were 35 pounds of shoddy imported into the United States. Of course that was under the McKinley law; but in 1896 there were 139,931 pounds of shoddy imported into the United States. So that if there was a large importation beginning after the enactment of the Wilson law, it has fallen enormously; and under the McKinley law the importation was cut off entirely, but with the domestic production being protected by the McKinley law it grew most enormously in this country.

If my friend is so much opposed to the introduction of shoddy into the woolen manufactures of the United States, let me direct his attention to the fact that I stated to him this morning that there were 73,678,066 pounds of shoddy in the alpaca manufactured in the United States in 1890, the domestic production in this country. Here is an enormous amount which that protective tariff has brought into requisition and brought into consumption in this country, displacing an equal amount of wool.

Mr. WARREN. If it has to be manufactured, I suppose the Senator would as soon have it manufactured in this country as to have it manufactured abroad.

Mr. MILLS. This is manufactured here in America, in this country.

Mr. WARREN. If it has got to be manufactured, it might as well be manufactured in this country as abroad.

Mr. MILLS. Then you do not object to shoddy?

Mr. WARREN. I do object to it, but I prefer, if such an article is to be used in manufactures at all, that it should be manufactured in this country, and thereby furnish employment to American laborers.

Mr. MILLS. Then the protective tariff is no protection to wool as against shoddy. We find the shoddy made here in the United States out of old rags picked up all around over the country and manufactured over and over again. I heard a shoddy manufacturer say some years ago that he manufactured the same old rags that he had manufactured before, and that he put a mark upon them so as to be able to identify them again, just to gratify his curiosity and to see how long the old rags could be knocked to pieces and still be put together again and put in for wool.

The Wilson law has not stimulated the importation of shoddy. It is American ingenuity that has stimulated its use in our manufactures, because it is cheaper than wool, and the manufacturers can put shoddy over the eyes of our woolgrowers instead of wool and fool them with the argument they make here, and make them believe that they are getting the benefit of it.

Mr. WHITE. Is it not necessarily true that the high price of wool is a great incentive to the manufacturer to use shoddy, whether domestic or foreign shoddy?

Mr. MILLS. Precisely; and I made that same argument here this morning, that the reason of the 73,000,000 pounds of shoddy and 42,000,000 pounds of cotton being incorporated into woolen manufactures is because it was cheaper than the wool, and the men who manufacture it had the ingenuity to mix it in with the wool and make it appear like wool, and we had to buy it and pay the compensatory duty to the manufacturer, for which the woolgrowers get no benefit, although they are made to believe that they do. That is all there is in regard to it.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST] to strike out paragraphs 347 to 359, inclusive, on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. DEBOE (when his name was called). I am paired with the Senator from Nebraska [Mr. ALLEN], and therefore withhold my vote.

Mr. GRAY (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. CULLOM]. I see he is not present, and therefore I withhold my vote. If he were present, I should vote "yea."

Mr. TILLMAN (when Mr. MCLAURIN'S name was called). My colleague [Mr. MCLAURIN] is absent from the Chamber. He requested me to state that he is paired with the Senator from North Carolina [Mr. PRITCHARD].

Mr. FAULKNER (when Mr. MURPHY'S name was called). I was requested by the Senator from New York [Mr. MURPHY] to state that he is paired with his colleague [Mr. PLATT]. The senior Senator from New York is necessarily absent from the Chamber.

Mr. NELSON (when his name was called). I am now informed that the Senator from Arkansas [Mr. BERRY] is paired with the Senator from Illinois [Mr. MASON], and so I will vote. I vote "nay."

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. He being absent, I withhold my vote.

The roll call was concluded.

Mr. GRAY. As I stated before, I have a pair with the Senator from Illinois [Mr. CULLOM]. I transfer my pair to the Senator from Virginia [Mr. MARTIN] and will vote. I vote "yea."

Mr. JONES of Arkansas. My colleague [Mr. BERRY] is absent from the Chamber on public business. He is paired with the Senator from Illinois [Mr. MASON]. If my colleague were present, he would vote "yea."

Mr. GEAR (after having voted in the negative). I desire to inquire if the senior Senator from New Jersey [Mr. SMITH] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. GEAR. I have a general pair with that Senator, and therefore withdraw my vote.

Mr. KENNEY (after having voted in the affirmative). I inquire whether the junior Senator from Pennsylvania [Mr. PENROSE] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. KENNEY. Then I withdraw my vote, being paired with him.

Mr. PASCO. I wish to announce that the Senator from Tennessee [Mr. BATE] is absent from the Chamber and stands paired with the Senator from Connecticut [Mr. HAWLEY].

Mr. HANSBROUGH. I suggest to the Senator from Delaware that we transfer our pairs, if it is agreeable to him. I am paired with the Senator from Virginia [Mr. DANIEL].

Mr. KENNEY. Very well.

Mr. HANSBROUGH. Then I vote "nay."

Mr. KENNEY. I vote "yea."

Mr. CLAY. My colleague [Mr. BACON] is paired with the junior Senator from Rhode Island [Mr. WETMORE]. If my colleague were present, he would vote "yea."

The result was announced—yeas 19, nays 33; as follows:

YEAS—19.

Chilton,	Harris, Kans.	Mitchell,	Turpie,
Clay,	Jones, Ark.	Morgan,	Vest.
Cockrell,	Kenney,	Pasco,	Walthall,
Faulkner,	Mallory,	Pettus,	White.
Gray,	Mills,	Roach,	

NAYS—33.

Allison,	Foraker,	Mantle,	Spooner,
Burrows,	Frye,	Nelson,	Stewart,
Butler,	Gallinger,	Perkins,	Teller,
Carter,	Hale,	Pettigrew,	Warren,
Chandler,	Hansbrough,	Platt, Conn.	Wellington,
Clark,	Hoar,	Proctor,	Wilson.
Davis,	Lodge,	Quay,	
Elkins,	McBride,	Sewell,	
Fairbanks,	McEnery,	Shoup,	

NOT VOTING—37.

Aldrich,	Deboe,	Lindsay,	Rawlins,
Allen,	Gear,	McLaurin,	Smith,
Bacon,	George,	McMillan,	Thurston,
Baker,	Gorman,	Martin,	Tillman,
Bate,	Hanna,	Mason,	Turner,
Berry,	Harris, Tenn.	Morrill,	Wetmore,
Caffery	Hawley,	Murphy,	Wolcott.
Cannon,	Heitfeld,	Penrose,	
Cullom,	Jones, Nev.	Platt, N. Y.	
Daniel,	Kyle,	Pritchard,	

So the amendment was rejected.

Mr. MANTLE. I have taken up a good deal of the time in the Senate in the discussion of the wool tariff, because from my investigation of the subject I have felt profoundly impressed with what I conceive to be the injustice done the woolgrowers by the bill under consideration in the rates fixed upon their product. I have already proposed some amendments which have been defeated. I know that the amendments which I have yet to propose will not meet with the approval of the protectionists of this body. Still I feel that it is my duty, undertaking as I have to some extent, the responsibility of trying to reach a conclusion in this matter which would be satisfactory to the wool producers, to present at least two other amendments.

I regret that I have not been able to convince enough of my protectionist colleagues of the correctness of my view upon these matters and to secure their active cooperation and assistance in getting for the woolgrowers what I conceive to be fair and adequate rates of protection. We are now at the end of the paragraphs relating directly to wool. I will therefore ask to go back to paragraph 355 for the purpose of submitting an amendment touching the matter of the importation of skirted wools. If there is no objection, I will offer the amendment now, and we will dispose of the amendment at this point, and I shall have nothing further to say respecting woolen manufactures.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "excepted," in line 13, paragraph 355, page 116, it is proposed to insert:

But such skirted wools shall pay 3 cents per pound in addition to the rates imposed by this act on unwashed wools: *Provided further*, That all wools shall be deemed skirted which are not imported in their natural condition of whole fleeces, without the removal or the rejection of any part thereof.

Mr. MANTLE. It is not necessary for me to renew or reiterate the argument I have already made here respecting the injury done the American woolgrower by the importation of these skirted wools, wools which, because of being skirted, are practically sorted wools.

The woolgrowers contend that this is a violation of every element or principle of fairness, and that its effect is to deprive them very largely of the benefit intended to be conveyed by the protective duty given to them. The effect of it is to bring wools in which are very light in shrinkage in order to avoid the payment of duty, and by doing this it necessarily results in lowering the protection which the woolgrower gets. I have already dwelt upon this phase of the question very largely, and it is unnecessary for me to repeat what I have heretofore said. On this amendment I shall be glad to have the yeas and nays, if enough Senators will second the demand.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Montana, on which the yeas and nays are demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I am paired with the Senator from Kansas [Mr. HARRIS]. As he is not present, I withhold my vote.

Mr. MCLAURIN (when his name was called). I have a general pair with the Senator from North Carolina [Mr. PRITCHARD].

Mr. NELSON (when his name was called). The junior Senator from Arkansas [Mr. BERRY] stands paired with the junior Senator from Illinois [Mr. MASON] on this question, and I will vote. I vote "nay."

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

The roll call was concluded.

Mr. PETTIGREW. The Senator from Utah [Mr. CANNON] is paired with the Senator from Rhode Island [Mr. ALDRICH]. If the Senator from Utah were present, he would vote "yea."

Mr. PASCO. I am paired with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "nay."

Mr. DEBOE. I am paired with the senior Senator from Nebraska [Mr. ALLEN], and therefore withhold my vote.

The result was announced—yeas 7, nays 41; as follows:

YEAS—7.

Butler,	Mallory,	Pettigrew,	Teller.
Carter,	Mantle,	Stewart,	

NAYS—41.

Allison,	Frye,	McEnery,	Sewell,
Burrows,	Gallinger,	Mills,	Shoup,
Chandler,	Gear,	Mitchell,	Spooner,
Chilton,	Gray,	Morgan,	Turpie,
Clay,	Hale,	Nelson,	Vest,
Cockrell,	Hansbrough,	Perkins,	Walthall,
Davis,	Hoar,	Pettus,	Wellington,
Elkins,	Jones, Ark.	Platt, Conn.	White.
Fairbanks,	Kenney,	Proctor,	
Faulkner,	Lodge,	Quay,	
Foraker,	McBride,	Roach,	

NOT VOTING—41.

Aldrich,	Deboe,	McLaurin,	Smith,
Allen,	George,	McMillan,	Thurston,
Bacon,	Gorman,	Martin,	Tillman,
Baker,	Hanna,	Mason,	Turner,
Bate,	Harris, Kans.	Morrill,	Warren,
Berry,	Harris, Tenn.	Murphy,	Wetmore,
Caffery,	Hawley,	Pasco,	Wilson,
Cannon,	Heitfeld,	Penrose,	Wolcott.
Clark,	Jones, Nev.	Platt, N. Y.	
Cullom,	Kyle,	Pritchard,	
Daniel,	Lindsay,	Rawlins,	

So Mr. MANTLE'S amendment was rejected.

Mr. MANTLE. I will now call up the amendment proposed by me at the beginning of the discussion upon this schedule. It is an amendment which embraces the bill drawn by the National Wool Growers' Association. It has already been read, so it will not be necessary to read it again, and neither do I desire the yeas and nays. I do desire, however, to repeat that this measure has the indorsement of every woolgrowers' association in every State of the Union, so far as they have met and discussed it, and is presented here as a measure desired by the woolgrowers of the United States.

Mr. JONES of Arkansas. Does this relate only to the wool schedule?

Mr. MANTLE. The amendment is a substitute for the paragraphs relating to wool, and does not relate to manufactured wools.

Mr. JONES of Arkansas. The wool schedule?

Mr. MANTLE. The wool schedule.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Montana, to strike out fifteen paragraphs of the present schedule and insert as an amendment that which has heretofore been read.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 361, page 118, line 10, before the word "rags," to strike out "On woolen" and insert "Woolen," and in the same line, after the word "flocks," to strike out "the duty shall be;" so as to make the paragraph read:

361. Woolen rags, mungo, and flocks, 10 cents per pound.

The amendment was agreed to.

The next amendment was to strike out paragraph 362, in the following words:

362. On tops made wholly or in part of wool, valued at not more than 24 cents per pound, the duty per pound shall be two and one-half times the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto 6 cents per pound; valued at more than 24 cents per pound the duty per pound shall be three and one-third times the duty on 1 pound of wool of the first class, and in addition thereto 8 cents per pound; if dyed, on all the above, 5 cents per pound additional; wools and hair of the camel, goat, alpaca, or other like animals, which have been advanced in any manner or by any process of manufacture beyond the washed or scoured condition, not specially provided for in this act, shall be subject to the same duties as are imposed upon manufactures of wool not specially provided for in this act.

And in lieu thereof to insert:

362. Wool and hair which have been advanced in any manner or by any process of manufacture beyond the washed or scoured condition, not specially provided for in this act, shall be subject to the same duties as are imposed upon manufactures of wool not specially provided for in this act.

The amendment was agreed to.

The next amendment was to strike out paragraph 363, in the following words:

363. On rovings, ropings, and yarns made wholly or in part of wool, valued at not more than 30 cents per pound, the duty per pound shall be two and one-half times the duty imposed by this act on 1 pound of unwashed wool of the first class; valued at more than 30 cents and not more than 40 cents per pound, the duty per pound shall be three times the duty imposed by this act on 1 p und of unwashed wool of the first class; valued at more than 40 cents per pound, the duty per pound shall be three and one-half times the duty imposed by this act on 1 pound of unwashed wool of the first class, and upon all the above additional duties shall be imposed as follows: On rovings, ropings, and yarns, made wholly or in part of wool, and not advanced beyond the condition of single yarn by grouping or twisting two or more single rovings, ropings, strands, or yarns together, the duty shall be 15 cents per pound on on all numbers up to and including No. 30; on all numbers finer than No. 30, the duty shall be 15 cents per pound, and in addition thereto three-tenths of 1 cent for each number in excess of No. 30; if advanced beyond the condition of single yarn by grouping or twisting two or more single rovings, ropings, strands, or yarns together, the additional duty shall be 18 cents per pound on all numbers up to and including No. 30; on all numbers finer than No. 30 and not finer than No. 50 the additional duty shall be 18 cents per pound, and in addition thereto three-tenths of 1 cent per pound for each number in excess of No. 30; on all numbers finer than No. 50, the additional duty shall be 18 cents per pound, and in addition thereto four-tenths of 1 cent per number for each number exceeding No. 50: *Provided*, That on all rovings, ropings, and yarns that may be genapped, bleached, colored, stained, or printed, in whole or in part, a duty of 5 cents per pound shall be imposed in addition to the foregoing duties: *And provided further*, That on all genapped yarns that may be bleached, colored, stained, or printed, in whole or in part, a duty of 5 cents per pound shall be imposed in addition to all the foregoing duties.

The numbers of rovings, ropings, and yarns shall be determined by the number of hanks of 560 yards each of a single yarn or strand which are contained in 1 pound.

And in lieu thereof to insert:

363. On yarns made wholly or in part of wool, valued at not more than 35 cents per pound, the duty per pound shall be two and one-half times the duty imposed by this act on 1 pound of unwashed wool of the first class; valued

at more than 35 cents per pound, the duty per pound shall be three and one-half times the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto, upon all the foregoing, 40 per cent ad valorem.

Mr. JONES of Arkansas. I move to amend the amendment by inserting the following:

Provided, That the specific rates provided for in this paragraph shall not become operative until twelve months after the passage of this act.

The first part of the paragraph provides that "on yarns made wholly or in part of wool, valued at not more than 35 cents per pound, the duty per pound shall be two and a half times the duty imposed by this act on 1 pound of unwashed wool of the first class." This, of course, is on the assumption that the manufacturer who makes the yarn out of the raw wool has paid the tariff on the raw wool from which the yarns are made.

The argument is easily understood, that if the manufacturer has paid a tariff on the raw wool, there ought to be a compensating duty on the yarns for the tariff paid on the raw wool. If 2½ pounds of raw wool enter into the manufacture of a pound of yarn, and the tariff has been paid upon the raw wool, a compensating specific duty on the pound of yarn equivalent to the tax paid by the manufacturer on the wool would be just as reasonable, if he has paid the tariff on wool.

But as is known to every member of the Senate now, there is a full supply, a twelve months' supply, of wool in the United States; and when any manufacturer makes a pound of yarn now he makes it out of wool on which he has paid nothing, and there is no fairness and no honesty in giving him a compensatory duty for tariff he has not paid and will not pay. Hence I move the amendment to the committee amendment, and on it I ask for the yeas and nays.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Arkansas to the amendment of the committee, on which the yeas and nays are demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. DEBOE (when his name was called). I am paired with the Senator from Nebraska [Mr. ALLEN].

Mr. GALLINGER (when his name was called). I am paired with the senior Senator from Texas [Mr. MILLS]. If he were present, I should vote "nay."

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH]. If he were present, I should vote "nay."

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

The roll call was concluded.

Mr. PASCO. I am paired with the Senator from Washington [Mr. WILSON]. I suggest to the Senator from New Hampshire [Mr. GALLINGER], who is paired with the Senator from Texas [Mr. MILLS], that we exchange our pairs, so that we both can vote.

Mr. GALLINGER. That will be agreeable to me.

Mr. PASCO. I vote "yea."

Mr. GALLINGER. I vote "nay."

The result was announced—yeas 19, nays 27; as follows:

YEAS—19.

Chilton,	Gray,	Mitchell,	Turpie,
Clay,	Harris, Kans.	Morgan,	Vest,
Cockrell,	Jones, Ark.	Pasco,	Walthall,
Faulkner,	Kenney,	Pettus,	White.
Gorman,	Mallory,	Roach,	

NAYS—27.

Allison,	Foraker,	McEnery,	Shoup,
Burrows,	Frye,	Nelson,	Spooner,
Carter,	Gallinger,	Perkins,	Stewart,
Chandler,	Hale,	Platt, Conn.	Teller,
Clark,	Hoar,	Proctor,	Warren,
Elkins,	Lodge,	Quay,	Wellington.
Fairbanks,	McBride,	Sewell,	

NOT VOTING—43.

Aldrich,	Davis,	Lindsay,	Platt, N. Y.
Allen,	Deboe,	McLaurin,	Pritchard,
Bacon,	Gear,	McMillan,	Rawlins,
Baker,	George,	Mantle,	Smith,
Bate,	Hanna,	Martin,	Thurston,
Berry,	Hansbrough,	Mason,	Tillman,
Butler,	Harris, Tenn.	Mills,	Turner,
Caffery,	Hawley,	Morrill,	Wetmore.
Cannon,	Heitfeld,	Murphy,	Wilson,
Cullom,	Jones, Nev.	Penrose,	Wolcott.
Daniel,	Kyle,	Pettigrew,	

So the amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on the amendment of the committee, to strike out paragraph 363 and insert a substitute.

The amendment was agreed to.

The next amendment of the Committee on Finance was, on page 121, after line 9, to strike out the following paragraph:

364. On cloths, knit fabrics not especially provided for in this act, and on all manufactures of every description made wholly or in part of wool, not specially provided for in this act, valued at not more than 30 cents per pound, the duty per pound shall be three times the duty imposed by this act on 1 pound of unwashed wool of the first class; valued at more than 30 cents and not more than 40 cents per pound, the duty per pound shall be three and one-half times the duty imposed by this act upon 1 pound of unwashed wool of the first class; valued at more than 40 cents per pound, the duty per pound shall be four times the duty imposed by this act upon 1 pound of unwashed wool of the first class; and in addition on all the foregoing there shall be imposed the following duties: Valued at not more than 30 cents per pound, 6 cents per pound; valued at more than 30 cents and not more than 40 cents per pound, 8 cents per pound; valued at more than 40 cents per pound and not more than 50 cents per pound, 15 cents per pound; valued at more than 50 cents per pound and not more than 70 cents per pound, 21 cents per pound; valued at more than 70 cents per pound, 21 cents per pound, and in addition thereto 8 cents per pound for each and every 20 cents per pound of value or fractional part thereof in excess of 70 cents per pound; and in addition to the foregoing duties there shall be imposed on all the articles mentioned in this paragraph a duty of 20 per cent ad valorem.

And to insert the following:

364. On cloths, knit fabrics, and all manufactures of every description made wholly or in part of wool, not specially provided for in this act, valued at not more than 40 cents per pound, the duty per pound shall be three times the duty imposed by this act on a pound of unwashed wool of the first class; valued at above 40 cents per pound and not above 70 cents per pound, the duty per pound shall be four times the duty imposed by this act on 1 pound of unwashed skirted wool of the first class, and in addition thereto, upon all the foregoing, 50 per cent ad valorem; valued at over 70 cents per pound, the duty per pound shall be four times the duty imposed by this act on 1 pound of unwashed skirted wool of the first class and 55 per cent ad valorem.

The VICE-PRESIDENT. The Senator from Iowa, on behalf of the committee, proposes an amendment to the amendment, which will be stated.

The SECRETARY. In line 19, after the word "unwashed," strike out the word "skirted," and in line 23, after the word "unwashed," strike out the word "skirted;" so as to make the paragraph read:

364. On cloths, knit fabrics, and all manufactures of every description made wholly or in part of wool, not specially provided for in this act, valued at not more than 40 cents per pound, the duty per pound shall be three times the duty imposed by this act on a pound of unwashed wool of the first class; valued at above 40 cents per pound and not above 70 cents per pound, the duty per pound shall be four times the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto, upon all the foregoing, 50 per cent ad valorem; valued at over 70 cents per pound, the duty per pound shall be four times the duty imposed by this act on 1 pound of unwashed wool of the first class and 55 per cent ad valorem.

The VICE-PRESIDENT. Is there objection to the amendment to the amendment? Without objection, it is agreed to.

Mr. JONES of Arkansas. I move to amend the committee amendment in line 13 by striking out the words "or in part" and inserting in the same line, after the word "wool," the words "or of which wool is the component material of chief value."

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. Page 122, line 13, paragraph 364, after the word "wholly," strike out "or in part;" and in the same line, after "wool," insert "or of which wool is the component material of chief value;" so as to read:

On cloths, knit fabrics, and all manufactures of every description made wholly of wool, or of which wool is the component material of chief value, not specially provided for in this act, valued at not more than 40 cents per pound, etc.

Mr. JONES of Arkansas. Mr. President, the purpose of this amendment is obvious. The amendment as proposed by the committee is that "on cloths, knit fabrics, and all manufactures of every description made wholly or in part of wool, not specially provided for in this act, valued at not more than 40 cents per pound, the duty per pound shall be three times the duty imposed by this act on a pound of unwashed wool of the first class."

If a fabric is made composed three-fourths of cotton and one-fourth of wool, when a pound of that fabric is taken into consideration, there is one-quarter of a pound of wool, and not a pound of wool. It is proposed to impose a tariff equal to three times the tariff on a pound of unwashed wool to compensate for the supposed pound of wool that is in the fabric, but when three-quarters of the fabric is cotton and only one-fourth is wool, if we allow three times the tariff on the raw wool we are giving twelve times the amount of tariff on the wool for every particle of wool there is in the fabric. This is not just, it is not fair, and I can not see how the committee could for one moment have consented that such should be the case.

Now, Mr. President, look back to page 112 of the bill. Lines 19 to 22, in the flax schedule, are as follows:

Woven fabrics or articles not specially provided for in this act, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value.

Then take page 113, in lines 11 and 12:

Woven fabrics of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value.

Take page 130, in the silk schedule:

383. Velvets, velvet ribbons, chenilles, or other pile fabrics, cut or uncut, composed of silk, or of which silk is the component material of chief value, not specially provided for in this act.

All through the bill whenever a mixed fabric has been under consideration the committee has provided every time that the component material of chief value shall determine whether it is a fabric belonging to that class or not. Why should not this be the same case here?

If we are dealing with a fabric that is three-fourths cotton and one-fourth wool, it should be considered a cotton fabric; it should be dealt with as a cotton fabric. Suppose it is nine-tenths cotton and one-tenth wool, the result is, if you are proposing to give a compensatory duty by allowing three times the tax on wool for every pound in it, when there is only one-tenth wool and nine-tenths cotton, you are making thirty times the tariff on wool as the tariff on this particular article. The injustice and unfairness of it is absolutely apparent. It can not be denied by anybody, and I can not see how the committee can refuse to accept this as an amendment.

There is one more suggestion which I wish to make in this connection. When the Wilson bill was being considered, the manufacturers came before the committee, as is well known to Senators here, and stated that they had fabrics made of wool upon which they had paid the high rates of duty then prevailing, and insisted that it was not right that they should be compelled to go into the market and sell the fabrics they had made of taxed wool in competition with fabrics to be made of untaxed wool. That was recognized by the Senate, and as the result of it a provision went into the Wilson bill, at the request of the manufacturers and as a matter of justice to them, that—

The reduction of rates herein provided for manufactures of wool shall not take effect until January, 1895.

This provision was manifestly just; no one could complain of it as not being right. But now when these same men propose to make fabrics out of wool which have not paid a tax, I insist that there should be no compensatory duty to them for tariffs they have not paid. That question was involved in the amendment that was made just now. It is not so relevant to the amendment as proposed at this time, but there can be no fairness and no justice in taking a pound of a fabric one-tenth of which is wool and nine-tenths of which is cotton, and putting a tariff on it amounting to as much as three times the tariff on the raw wool, on the theory that it is to compensate for three times the weight of the fabric in wool. I can not believe that gentlemen on the other side will insist that this shall remain as the committee proposes it, and I ask for the yeas and nays on my amendment to the amendment of the committee.

The yeas and nays were ordered.

Mr. GRAY. I hope, before the vote is taken, that the Senator from Iowa who is in charge of the bill, or some other Senator who is equally interested, will give us some explanation as to why the difference is made in the bill as read by the Senator from Arkansas. Where a mixed fabric of linen and any other substance is imported, a tax is adjusted by the rate upon the component part of chief value. That is found in two places in the linen schedule, as read by the Senator from Arkansas.

Mr. JONES of Arkansas. And in the silk schedule.

Mr. GRAY. And in the silk schedule there is the same provision. Now, his amendment is that the same provision shall be applied to the wool schedule. I can not for the life of me see why this discrimination should be made in the wool schedule, and why an article with one-tenth wool and nine-tenths cotton should be charged three times the duty that is imposed upon a pound of unwashed wool.

Mr. ALLISON. The Senator from Arkansas alludes to the linen schedule.

Mr. GRAY. And the silk schedule.

Mr. ALLISON. And also the silk schedule. The linen schedule is the schedule of articles composed of flax, hemp, or ramie. They are of about the same value, and therefore a mixture of the raw materials in those articles would be of no special value.

Mr. GRAY. Oh, no; it is quite possible to mix the linen with cotton. There is a cotton and linen mixture.

Mr. ALLISON. No; that is not in the flax schedule. It is flax, hemp, or ramie.

Mr. JONES of Arkansas. Will the Senator allow me a moment?

Mr. ALLISON. Certainly.

Mr. JONES of Arkansas. Paragraph 344 in the flax schedule provides that—

Woven fabrics or articles not specially provided for in this act, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, etc.

Showing that a mixed fabric, in which neither flax, hemp, nor ramie was the article of chief value, would not come under this paragraph, and if they composed one-fourth only, and three-fourths of it was cotton, it would be considered as a cotton fabric.

Mr. ALLISON. Undoubtedly; and that is the case here. As respects silk, it of course is a very valuable raw material. It is the object of paragraph 364, by providing for three times the duty imposed by this act upon a pound of unwashed wool, to include what is known as mixed fabrics of wool and cotton, being, perhaps, anywhere from 75 to 90 per cent of wool.

Mr. JONES of Arkansas. Suppose it contains only 10 per cent of wool?

Mr. ALLISON. Nine-tenths or three-fourths. Therefore the compensatory duty is fixed at three. Now, when you reach down to fabrics of a finer character, where they are all wool, the compensatory duty is four times, and so on.

I will say, further, that this is phraseology taken from every law that has been passed as respects wool and woolens since 1867 where there was a duty on wool; of course it does not include the free-wool schedule of 1894; and there has not been the slightest difficulty in administering it, as there would be a very great difficulty if the amendment suggested by the Senator from Arkansas were inserted in the bill making it the component part of chief value.

That is all there is about it. We followed in our amendment, as in the original text of the House bill, what has been the law since 1867 and every wool tariff, under which there has never been the slightest difficulty in administration.

Mr. GRAY. There may be no difficulty in administering the law, but there will be great injustice in administering it. That is plain, it seems to me, to any man's common sense.

Mr. ALLISON. It has never been shown.

Mr. GRAY. There are fabrics of wool and cotton in which the component part of chief value is cotton and not wool, and in that case three times the rate of a pound of unwashed wool is to be imposed upon the whole article.

Mr. ALLISON. I do not know that there is any such instance. I have never heard of any special instance of that character, at least. It is perfectly well known that for thirty years this exact phraseology has been used, and this is the first time I have heard it criticised. There has been no complaint from anybody.

Mr. GRAY. Why should it be any different from the linen schedule and the silk schedule in this respect? If the possibility of injustice exists, although there may have been no complaint of the law in twenty or thirty years, why should it not be corrected now?

Mr. ALLISON. I have never heard of anyone protesting against it.

Mr. GRAY. There may be protests.

Mr. ALLISON. I have never heard of an importer who made a protest against it; and it is only as respects a compensatory duty that this particular phraseology is required.

Mr. JONES of Arkansas. That seems to be the exact purpose of it. I should like to ask the Senator from Iowa if there is any difficulty in administering the law under the flax schedule, which provides that woven fabrics or flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, etc.? Is there any difficulty in the administration of that paragraph?

Mr. ALLISON. Not the slightest, because there is no compensatory duty there.

Mr. JONES of Arkansas. Exactly.

Mr. ALLISON. We have here a provision as respects the compensation for wool.

Mr. JONES of Arkansas. There is no difficulty in determining if the component material of chief value is flax or cotton. Then there can be no difficulty in determining whether the component material of a mixed woolen fabric is cotton or wool. If nine-tenths of the fabric is cotton and not wool, there can be no justice in allowing three times the rate of tax on raw wool as a specific compensation on every pound of that mixed fabric because there is cotton in it. There can be no pretense that wool has been used to any extent in the manufacture of the fabric.

Mr. PLATT of Connecticut. Will the Senator from Arkansas allow me?

Mr. JONES of Arkansas. Certainly.

Mr. PLATT of Connecticut. How does he suppose that in a yard of mixed fabric, cotton and wool, which will weigh a pound, it is to be determined in the custom-house how much wool enters into that pound?

Mr. JONES of Arkansas. Just as they do in the linen and in the silk schedules.

Mr. PLATT of Connecticut. They can not do it at all.

Mr. JONES of Arkansas. Just as they do in the linen and silk schedules. Any man can tell who chooses to examine it. Everybody knows whether the fabric brought in is cotton warp and wool filling, whether it is cotton warp and mixed cotton and wool filling, what amount of wool there is in the fabric, and how much is cotton. You levy this tariff on the pretense that every pound of goods has had consumed 3 pounds of wool in the manufacture, when you know that nine-tenths of it is cotton and only one-tenth of it is wool. You are consciously giving thirty times the tariff on the wool as compensation under a pretense that you believe it is 3 to 1 when you know that it is no such thing, that it does not enter into it.

It is simply a means of levying greater tariff on the people of the country for the purpose of giving rewards to the manufacturers that they have not earned. It can not mean anything else, and the statement of the Senator from Iowa that it has been the practice for thirty years does not justify it. An evil and a wrong because it is hoary headed has no more respect that if it was

young. If it is not right in itself, it can be no more defended now than it could have been defended when it was first started. There can be no justification for it. There can be no apology or excuse for it any more than there is in your allowing three times the tariff on wool for goods manufactured of wool where you know the manufacturers have paid not one cent of the tariff, as you propose to do by your report in a recent paragraph.

Mr. President, it is quarter past 5 o'clock, and I think the Senator in charge of the bill ought to allow us to adjourn.

Mr. ALLISON. The Senator does not seem to apprehend the point I am trying to make. Here we have a compensatory duty for the wool. As a matter of fact, the compensatory duty in a certain sense must be arbitrary—that is to say, you can not get it with absolute exactness. If the Senator will turn to the next page——

Mr. GRAY. Is there any duty on flax, the raw material?

Mr. ALLISON. Certainly there is. If the Senator will turn to the next page—line 2, page 123—he will see the duty imposed by this act on 1½ pounds of unwashed wool of the first class. That is intended to include fabrics where the warp is cotton. There never has been the slightest difficulty as respects this compensatory duty except that in a case of these goods, if it shall take only 2½ pounds of wool to make a fabric that is mentioned here, then there shall be a slight addition to the ad valorem duty. But suppose it turns out that it takes 3½ pounds to make the fabric, then, as a matter of fact, the manufacturer would lose in such a fabric.

Mr. President, the Senator says if this is a wrong it should be corrected. The experience of thirty years has shown that it has not been a wrong except in the case which I have named, where three times the duty upon washed wool is too much or too little. That is all there is to it. This is a criticism that I have never heard before in all my life as respects this question of compensatory duty. Manufacturers may here and there get some advantage—I have no doubt they do—in the pound duty, and they may sustain losses.

Mr. WHITE. Will the Senator from Iowa yield for a motion to adjourn?

Mr. FRYE. Let us have an executive session.

Mr. ALLISON. I would be very glad to have a vote taken on the amendment of the Senator from Arkansas to the amendment of the committee.

Mr. WHITE. I myself wish to make a few remarks on the amendment to the amendment.

Mr. ALLISON. If the Senator wishes to make some observations, I will consent to an adjournment, making myself the motion to proceed to the consideration of executive business.

Mr. WHITE. Very well.

The VICE-PRESIDENT. The Senator from Iowa moves that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After ten minutes spent in executive session the doors were reopened, and (at 5 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Thursday, June 24, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 23, 1897.

SECRETARY OF LEGATION.

Thomas C. Dawson, of Iowa, to be secretary of the legation of the United States at Rio de Janeiro, vice William Crichton, resigned.

CONSULS.

Walter J. Hoffman, of the District of Columbia, to be consul of the United States at Mannheim, Baden, vice Max Goldfinger, resigned.

Brainard H. Warner, jr., of Maryland, to be consul of the United States at Leipsic, Germany, vice Otto Doederlein, resigned.

Albert W. Swalm, of Iowa, to be consul of the United States at Montevideo, Uruguay, vice Edgar Schramm, resigned.

Edward H. Thompson, of Massachusetts, to be consul of the United States at Progreso, Mexico, an office created in lieu of Merida by the diplomatic and consular appropriation act for the year commencing July 1, 1897.

DEPUTY AUDITOR.

Edward McKitterick, of Iowa, to be deputy auditor for the Treasury Department, to succeed Robert M. Cousar, resigned.

REGISTER OF LAND OFFICE.

Charles Kingston, of Grover, Wyo., to be register of the land office at Evanston, Wyo., vice William A. Hocker, removed.

RECEIVER OF PUBLIC MONEYS.

Frank M. Foote, of Evanston, Wyo., to be receiver of public moneys at Evanston, Wyo., vice Frank Mills, removed.

POSTMASTERS.

Joseph W. Dale, to be postmaster at Mitchell, in the county of Lawrence and State of Indiana, in the place of Joseph T. Dilley, removed.

Henry A. Pease, to be postmaster at Edgartown, in the county of Dukes and State of Massachusetts, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1897.

Moses Emery, to be postmaster at Caledonia, in the county of Houston and State of Minnesota, in the place of Arthur J. Flynn, removed.

James W. Mills, to be postmaster at Versailles, in the county of Morgan and State of Missouri, in the place of John D. Bohling, resigned.

Charles L. Porter, to be postmaster at Plattsburg, in the county of Clinton and State of Missouri, in the place of Samuel Lowry, resigned.

Thomas L. Dunham, to be postmaster at Lestershire, in the county of Broome and State of New York, the appointment of a postmaster for the said office having, by law, become vested in the President on and after April 1, 1897.

James F. Wray, to be postmaster at Reidsville, in the county of Rockingham and State of North Carolina, in the place of Alexander H. Galloway, resigned.

John R. Wolfe, to be postmaster at Shelby, in the county of Richland and State of Ohio, in the place of Frank C. Schiffer, resigned.

Victor N. Wilson, to be postmaster at Britton, in the county of Marshall and State of South Dakota, in the place of Henry C. Hamilton, resigned.

Edward Blanchard, to be postmaster at San Angelo, in the county of Tom Green and State of Texas, in the place of James L. Phelan, resigned.

Fred. Read, to be postmaster at Newport News, in the county of Warwick and State of Virginia, in the place of Irwin Tucker, whose commission expired April 11, 1897.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 23, 1897.

CONSUL-GENERAL.

John G. Foster, of Vermont, to be consul-general of the United States at Halifax, Nova Scotia.

CONSULS.

Walter Schumann, of New York, to be consul of the United States at Mayence, Germany.

Hilary S. Brunot, of Pennsylvania, to be consul of the United States at St. Etienne, France.

William B. Dickey, of Louisiana, to be consul of the United States at Callao, Peru.

APPOINTMENT IN THE MARINE-HOSPITAL SERVICE.

Howard C. Russell, of Connecticut, to be an assistant surgeon.

PROMOTIONS IN THE NAVY.

Commodore Edmunp O. Matthews to be a rear-admiral.

Richard S. Collum, captain and assistant quartermaster, United States Marine Corps, to be major and quartermaster.

First Lieut. Thomas C. Prince, United States Marine Corps, to be captain and assistant quartermaster.

COMMISSIONER.

Philip Gallaher, of New Whatcom, Wash., to be a commissioner in and for the District of Alaska, to reside at Kadiak.

POSTMASTERS.

Charles H. Stilwill, to be postmaster at Tyndall, in the county of Bonhomme and State of South Dakota.

Ezra H. Ripple, to be postmaster at Scranton, in the county of Lackawanna and State of Pennsylvania.

James M. Henderson, to be postmaster at Etna, in the county of Allegheny and State of Pennsylvania.

James Blanning, to be postmaster at Williamstown, in the county of Dauphin and State of Pennsylvania.

Frederick W. Clemons, to be postmaster at Palmyra, in the county of Wayne and State of New York.

Benjamin F. Boyd, to be postmaster at Hillsboro, in the county of Montgomery and State of Illinois.

Walter S. Clark, to be postmaster at Aspen, in the county of Pitkin and State of Colorado.

Arthur B. Gibson, to be postmaster at Mercur, in the county of Tooele and State of Utah.

Wilfred W. Montague, to be postmaster at San Francisco, in the county of San Francisco and State of California.

Clarence A. Murray, to be postmaster at Waukegan, in the county of Lake and State of Illinois.

Frank C. Davidson, to be postmaster at Clinton, in the county of Dewitt and State of Illinois.

Robert N. Chapman, to be postmaster at Charleston, in the county of Coles and State of Illinois.

SENATE.

THURSDAY, *June 24, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. CHILTON, and by unanimous consent, the further reading was dispensed with.

PETITIONS AND MEMORIALS.

Mr. CHANDLER presented the memorial of H. A. Jandt and 51 other citizens of Iowa, of E. R. Spaulding and 50 other citizens of Iowa, of J. Commody and 52 other citizens of New Mexico, of B. J. Lohman and 52 other citizens of New Mexico, and of E. G. Ross and 52 other citizens of New Mexico, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. ELKINS presented sundry memorials of citizens of West Virginia, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. PLATT of New York. I present a petition of the Manufacturers' Association of Kings and Queens Counties, N. Y., in reference to the tariff bill. I should like to have the body of the petition read.

Mr. ALLEN. Is it proposed to place the petition in the RECORD?

Mr. PLATT of New York. It is very short; it will take but a moment.

Mr. ALLEN. I shall object to its going into the RECORD, unless it be a communication from some legislative body or an executive communication. It is contrary to the rule.

Mr. PLATT of New York. It is a petition urging the prompt passage of the tariff bill.

Mr. ALLEN. But it is contrary to the rule of the Senate to incorporate petitions and memorials of such a character in the RECORD.

Mr. GALLINGER. The Senator from New York can state the substance of it and get it into the RECORD in that way.

Mr. ALLEN. The Senator can of course make a brief statement of the petition, but he has no right to read it himself.

Mr. PLATT of New York. Mr. President, the legislative committee of the Manufacturers' Association of Kings and Queens Counties, N. Y., respectfully beg to call the attention of the Senate to the fact that the business interests of that community are seriously crippled by the uncertainty and delay in the enactment of a tariff law. They earnestly request that immediate and effective action be taken by the Senate, in order that the present uncertainty be removed and that the business of the country be permitted to revive.

The VICE-PRESIDENT. The petition will lie on the table.

Mr. PLATT of New York presented sundry memorials of citizens of New York, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. FAIRBANKS presented the petition of L. W. Vance and 80 other citizens of New Albany, Ind., praying for the enactment of protective-tariff legislation at the earliest possible date, such as will adequately secure American industrial products against the competition of foreign labor; which was ordered to lie on the table.

Mr. SMITH presented sundry petitions of citizens of Elizabeth, Hoboken, Jersey City, Newark, Kearney, Passaic, Rahway, and Hudson County, all in the State of New Jersey, remonstrating against the proposed increase of the tax on beer; which were ordered to lie on the table.

He also presented petitions of sundry citizens of Wareton, Seabright, Seaside, Paulsboro, and South Amboy, all in the State of New Jersey, praying for the enactment of legislation for a more rigid restriction of immigration; which were ordered to lie on the table.

He also presented memorials of John R. Potts, Johnson & Murphy, of Newark; the Middlesex Shoe Company, of New Brunswick; Harry Chandler, of Vineland; G. & L. Becht, of Newark, and the A. Lenz Company, all in the State of New Jersey, remonstrating against any increase in the present rate of duty on tanned skins for morocco or a duty on raw goatskins; which were ordered to lie on the table.

Mr. MURPHY presented a petition of 37 citizens of New York City, and the petition of 16 citizens of New York City, praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

He also presented the memorial of Peter A. Wilkinson and 7 other citizens of New York, and the memorial of F. W. Collom and 19 other citizens of New York, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. TURPIE presented a petition of sundry citizens of Kempton, Ind., praying for the enactment of protective-tariff legislation, at the earliest possible date, such as will adequately secure American industrial products against the competition of foreign labor; which was ordered to lie on the table.

Mr. TELLER presented the memorial of S. R. Crawford and 51 other citizens of Colorado, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. SPOONER. The Senator from Illinois [Mr. CULLOM] is absent, ill. I have just received a note from him asking me to present to the Senate, for him and on his behalf, a number of memorials, one of which I send to the desk, and the others are at the end of the desk, bearing the names of 103,079 citizens of Illinois, remonstrating against the proposed increase of the tax upon beer. I move that the memorials lie on the table.

The motion was agreed to.

Mr. LODGE presented a petition of sundry manufacturers of Massachusetts, praying for a continuance of the Hawaiian reciprocity treaty; which was referred to the Committee on Foreign Relations.

He also presented memorials of the United Shoe Company and 52 other manufacturing firms of Massachusetts; of P. S. Wentworth and 52 other citizens of Massachusetts, and of 101 citizens of Massachusetts, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. WELLINGTON presented the memorial of S. B. Smith and 52 other citizens of Maryland, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

BILLS INTRODUCED.

Mr. ELKINS introduced a bill (S. 2266) for the relief of Elijah M. Hart; which was read twice by its title, and referred to the Committee on Claims.

Mr. FAIRBANKS introduced a bill (S. 2267) removing the charge of desertion from the name of Pollard Anderson, of Burney, Decatur County, Ind., who served as a private in Company H, Nineteenth Indiana Infantry Volunteers, and also as a private in Company B, Tenth Kansas Infantry Volunteers; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

He also introduced a bill (S. 2268) granting a pension to Israel P. Hill; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Pensions.

Mr. ALLEN. I introduce a bill and ask that it may be read at length and referred to the Committee on Post-Offices and Post-Roads.

The bill (S. 2269) to further regulate the postal service of the United States, and for other purposes, was read the first time by its title and the second time at length, and referred to the Committee on Post-Offices and Post-Roads, as follows:

Be it enacted, etc., That beginning with the fiscal year A. D. 1897, it shall be the duty of the Postmaster-General to furnish all post-offices and subpost-offices in the United States with the necessary boxes, tables, chairs, and other furniture proper and convenient for the transaction of the business of such post-office or subpost-office, at the expense of the Government, and in doing so he is hereby authorized and directed to have appraised all such boxes, tables, chairs, and other furniture now in use in said offices, respectively, and purchase the same, if in condition suitable for use, at a fair price, for continued use.

Mr. CAFFERY (by request) introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Claims:

A bill (S. 2270) for the relief of the estate of Samuel N. White, deceased, late of West Feliciana Parish, La.;

A bill (S. 2271) for the relief of Lemuel Tanner, of Lafourche Parish, La.;

A bill (S. 2272) for the relief of the estate of F. O. Darly, late of Vermilion Parish, La.;

A bill (S. 2273) for the relief of Mrs. E. R. Allen, of West Carroll Parish, La.;

A bill (S. 2274) for the relief of Belote Auguste Donato;

A bill (S. 2275) for the relief of the estate of Jean Delille, late of Winn Parish, La.;

A bill (S. 2276) for relief of heirs of Auguste Donato;

A bill (S. 2277) for the relief of Mary C. Daigre, East Baton Rouge, La.; and

A bill (S. 2278) for the relief of the estate of Hypolite Chretien, deceased, late of New Orleans, La.

Mr. VEST introduced a bill (S. 2279) to increase the pension of

Mary B. Morgan; which was read twice by its title, and referred to the Committee on Pensions.

Mr. BAKER introduced a bill (S. 2280) granting a pension to Andrew M. Callaham; which was read twice by its title, and referred to the Committee on Pensions.

Mr. KENNEY introduced a bill (S. 2281) to remove the charge of desertion from the record of John R. Scaggs; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. LODGE (by request) introduced a bill (S. 2282) for the retirement of Government employees in the classified civil service; which was read twice by its title, and referred to the Committee on Civil Service and Retrenchment.

He also introduced a bill (S. 2283) granting a pension to Theophile A. Dauphin; which was read twice by its title, and referred to the Committee on Pensions.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. ALLEN, from the Committee on Privileges and Elections, reported an amendment intended to be proposed to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

Mr. MORGAN submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which, with the accompanying papers, was referred to the Committee on Appropriations.

PRIVILEGES OF THE FLOOR.

Mr. HALE. I present a notice proposing an amendment to Rule XXXIII, relating to the privileges of the floor of the Senate, which I ask may be read.

The Secretary read as follows:

Notice is hereby given that the following amendment will be proposed to Rule XXXIII of the Senate, relating to the privilege of the floor, to wit: In that clause of said rule which admits certain persons to the floor of the Senate while in session, relating to ex Senators and Senators-elect, after the word "ex-Senators," to insert the following:

"Who are not interested in any claim or in the prosecution of the same, or directly in any bill pending before Congress."

The purpose of the proposed amendment is to prevent ex-Senators from enjoying the privileges of the floor of the Senate for the purpose of urging or opposing claims or bills in which they are employed as attorneys.

Mr. HALE. Mr. President, it has always been a matter touching the dignity and reputation of this body that ex-Senators, who are entitled to the privileges of the floor, should not use that privilege for the purpose of advocating or opposing measures before the Senate, or, in other words, lobbying on the floor with members of the body. It has never been necessary until now to invoke any rule such as I have indicated, or any extension or limitation of the rule. The House of Representatives has had for years such a rule as I comprehend in the amendment which I propose, and I have embodied its features substantially in the amendment which has been stated.

It is a matter of satisfaction, as Senators know, to renew the acquaintance and association of those who have been members of this body; and such acquaintance and association have been a great charm in the life and in the intercourse of this body; but I do not think that it is compatible with the self-respect and the dignity of this body that the privileges of the floor should be used for the purpose of urging or opposing the passage of measures before the Senate by gentlemen who have been members of the body. If there are none such, then the amendment will apply to no one, and will do no harm, but I am afraid the time has come when such a rule is needed.

I ask that the proposed amendment go over one day, in accordance with the provision of Rule XL.

Mr. HAWLEY. May I make a suggestion before the matter goes over? I am not very much pleased at the direct pointing out of ex-Senators as being so employed. Suppose that, after defining the persons entitled to the privileges of the floor, the rule should provide that it shall be suspended as to any person who may be employed, etc.

Mr. HALE. I do not propose in any exact form to settle how it shall be done, or, indeed, that it shall be done, but I think I have seen enough to justify me in calling the attention of the Senate to it. All I shall ask to-morrow—it must go over a day—is that it be referred to the Committee on Rules.

Mr. TELLER. Let that be done now.

Mr. HALE. The provision of Rule XL is very specific that one day's notice must be given before any amendment to the rule shall be in order, and that the purpose of the amendment shall be stated in the notice. Under that rule it is clear that it must go over one day, and then I shall ask that it be referred.

Mr. ALLEN. I should like to ask the Senator what has taken place recently to call for this proposed amendment?

Mr. HALE. I hope the Senator will not ask me to particularize.

Mr. ALLEN. I do not desire to have the Senator point out any particular individual, but, if he will permit me, I will state that in my judgment lobbying is not going on to any greater extent around the Senate Chamber at this moment than it has been for the last four years.

Three years ago I introduced a bill and had it referred to the Committee on the Judiciary making it a crime punishable by imprisonment in the penitentiary for any man to come upon the Capitol Grounds for the purpose of plying the vocation of a lobbyist. Lobbying was going on then. At that time there was pending before this body a measure known as the pooling bill and other measures that called forth lobbyists from all sections of the country. It could not have escaped the attention of the Senator from Maine that lobbying of that character was going on. Why, not only amend the rule, but introduce a bill here and pass it making it a crime for any human being that is compos mentis to come upon these grounds and importune Senators or Representatives respecting the discharge of their duties.

Mr. HALE. I do not know that I would object to that. I am not seeking any such drastic measure. I have more in view the calling of the attention of the Senate to this subject than anything else. I do not say that I would oppose such a measure as the Senator suggests; or anything that will relieve us of the importunities of the lobby. I think it should be guarded.

I may say, and I think I may say with some confidence that I will be borne out by Senators, that the intervention, the solicitation, and the importunities of the lobby, whether on this floor or elsewhere, are of no avail to the interests that they claim to represent. The Senator himself knows that if a constituent of his has a measure here in which he is interested, the Senator will attend to it faithfully, early and late, and that that constituent is not in any way benefited, but is rather harmed, by the employment of an attorney to represent his case.

Mr. WHITE. Will the Senator from Maine allow me to ask him a question? Will it not be found in practice very difficult to limit the character of the conversation of ex-Senators who come upon this floor? If they are inhibited from talking about current business, I presume they will avoid it, but it seems to me that practically it will be rather difficult to limit the character of the conversation of an ex-Senator when he comes upon the floor, and in practice I fear that the rule will not be found very efficacious. The practice is no doubt reprehensible, but I fear that it can not be overcome by legislative methods.

Mr. HALE. All that will be left to the Committee on Rules to consider. I do not know that they will think it advisable to report anything, but I think it must be offensive to all Senators to see those who have been members of the Senate bring their docket into this Chamber and seek to influence Senators upon subjects-matter where they have been employed as attorneys. It ought not to be done.

Mr. ALLEN. I have never seen anything of the kind myself.

Mr. HALE. I do not know that that is so.

Mr. ALLEN. It occurs to me that the proposed amendment is rather an imputation upon the integrity of all ex-Senators who desire to visit the Chamber and renew their acquaintance, and that it puts them in an attitude where they can not possibly, as a matter of self-respect, come back, however innocent their motives may be.

Mr. HALE. I do not think that ex-Senators should feel sensitive on that point, as I should not after leaving this body, if I came here in a social way, or to discuss generally subjects of national interest. I do not think we should either of us feel sensitive if a rule of this kind, that was not intended to apply to us and never would apply, was in the list of our rules.

Mr. ALLEN. Why does not the Senator's proposed amendment go further and strike at the root of this evil? We can not go out into one of these corridors at any time when the Senate is in session without running up against an army of lobbyists who are besieging Senators and Representatives upon different measures. They inhabit these galleries as crows inhabit the tops of trees. They are here sending in cards and communications upon different subjects. Why not exclude the whole army of them, not only from the Capitol building but from the Capitol Grounds, except when they come here for legitimate purposes?

Mr. HALE. I ask that my amendment shall go over.

The VICE-PRESIDENT. The proposed amendment will lie over.

COST OF PRODUCTION IN LEADING INDUSTRIES.

Mr. CAFFERY. I submit a resolution and ask unanimous consent for its present consideration.

The resolution was read, as follows:

Resolved, That the Commissioner of Labor be, and is hereby, directed to collect from official sources, or otherwise, if necessary, information relating to the total cost and labor cost of production in fifteen of the leading industries common to this country, Great Britain, France, Belgium, and Germany and report the results of his inquiries to the Senate as soon after the meeting of the second session of the Fifty-fifth Congress as possible: *Provided*, That the inquiries hereby authorized shall be carried on under the regular appropriations made for the Department of Labor.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. CHANDLER. I ask that the resolution may go over.

The VICE-PRESIDENT. The resolution will go over, under the rule.

EXPENDITURES OF CIVIL SERVICE COMMISSION.

Mr. GALLINGER. I submit a resolution for which I ask immediate consideration.

The resolution was read, as follows:

Resolved, That the Civil Service Commission is hereby directed to furnish the Senate a detailed account, by years, of the expenditures of said commission from its organization to the present time, each item of expenditure (such as salaries, traveling expenses, examinations, printing, etc.) to be separately stated.

The VICE-PRESIDENT. Is there objection to the present consideration of the resolution?

Mr. GRAY. Let it go over.

The VICE-PRESIDENT. The resolution will lie over.

Mr. GALLINGER. As I shall be absent from the Senate for three or four days, I ask that the resolution may lie on the table subject to my call, if that course is agreeable to the Senator from Delaware.

The VICE-PRESIDENT. Unless there is objection, that will be the order. The Chair hears none.

THE HAWAIIAN ISLANDS.

Mr. WHITE. Some days ago I suggested and there was ordered printed a report of the Committee on Finance in reference to the Hawaiian Islands matter. Since that time my attention has been called to a report made in the Forty-ninth Congress, first session, by Mr. MILLS, from the Committee on Ways and Means of the House of Representatives. The report is practically out of print, and as it is a matter of great importance, to be considered later on, I suggest that it be reprinted as a document.

The VICE-PRESIDENT. Is there objection to the request of the Senator to reprint the report of Mr. MILLS in the Forty-ninth Congress, from the Committee on Ways and Means of the House of Representatives, on the Hawaiian matter? The Chair hears none, and it is so ordered.

Mr. WHITE. In this connection, I desire to insert in the RECORD, from page 584 of the Consular Reports, the census of the Hawaiian Islands. It is but a third of a page in length. I ask that it be printed as a part of my remarks.

The matter referred to is as follows:

[Consular Reports, April, 1897.]

CENSUS OF THE HAWAIIAN ISLANDS.

Consul-General Mills, of Honolulu, sends, under date of February 8, 1897, the official figures showing the result of the census of the Hawaiian Islands, which has just been completed. The statement is as follows:

The Hawaiians head the list with a total of 31,019. The Japanese colonization comes next, with the Chinese a close third. The official table, as prepared at the census office, is:

Nationality.	Males.	Females.	Total.
Hawaiians	16,399	14,620	31,019
Part Hawaiians	4,249	4,236	8,485
Americans	1,975	1,111	3,086
British	1,406	844	2,250
Germans	866	566	1,432
French	56	45	101
Norwegian	216	162	378
Portuguese	8,202	6,989	15,191
Japanese	19,212	5,195	24,407
Chinese	19,167	2,449	21,616
South Sea Islanders	321	134	455
Other nationalities	448	152	600
Total	72,517	36,503	109,020

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had on the 23d instant approved and signed the act (S. 2150) to amend an act entitled "An act to provide for the entry of lands in Greer County, Okla., to give preference rights to settlers, and for other purposes," approved January 18, 1897.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. VEST. I should like to have the attention of the Senator from Iowa. For the convenience of those of us upon this side who are taking part in the debate on the tariff bill, we would be very much obliged to the Senator from Iowa if he would indicate the order in which the schedules that have been passed over will be taken up after we have finished the wool schedule. It will facilitate matters very much, and we will then know exactly what to expect in the future, and prepare our papers and information accordingly.

Mr. ALLISON. It is the purpose of the committee having charge of the bill, as I understand it, to go on and complete the wool and woolen schedule, then to take up the silk schedule, and then the tobacco schedule. When that has been done, all the schedules will have been passed over once.

Mr. VEST. No; lead was passed over.

Mr. ALLISON. Lead is in Schedule C.

Mr. VEST. I know; but we have not taken it up.

Mr. ALLISON. It is a paragraph in the metal schedule and a paragraph in the chemical schedule.

Mr. GRAY. It is a paragraph, and not a schedule.

Mr. ALLISON. Several paragraphs. After we shall have completed these schedules it is our purpose to begin with the chemical schedule and take up the paragraphs passed over and complete that schedule, and then go on successively with the other schedules, taking the passed-over schedules in their order. If this will suit the convenience of Senators on the other side, that, I think, is the wisest and best way to deal with the bill.

Mr. JONES of Arkansas. The first item passed over, as appears by the recent print of the committee, is in the first clause of the bill, and is not a part of the chemical schedule, fixing the date at which the bill shall go into effect.

Mr. ALLISON. That is a mere formal matter. That of course will have to go over until after the whole bill is disposed of.

Mr. JONES of Arkansas. Then it is the intention of the Senator not to take up that amendment until the last thing.

Mr. HOAR. I suppose, practically, the operative date will have to be settled by the conference committee. It can not well be settled in any other way.

Mr. ALLISON. I have stated the purpose of the committee. I hope it will be satisfactory to Senators on the other side.

Mr. SMITH. I ask the Senator in charge of the bill whether it will be convenient for him to take up the hide and leather schedule, which was passed over at my request, after we get through with the wool schedule?

Mr. ALLISON. The paragraphs in relation to leather perhaps may be considered then, if it suits the convenience of Senators; but I think the best way after we have completed this schedule is to go back and take up, in their order, the paragraphs passed over, and dispose of them as we go along.

Mr. SMITH. I make a special request on that point because I am interested in the schedule, and I shall be obliged to be absent for a few days. If it can be so arranged, I hope the Senator in charge of the bill will pursue that course.

Mr. ALLISON. I will consult the Senator's convenience later in the day.

Mr. JONES of Arkansas. The point made by the Senator from Missouri is, I think, a correct one, that it is due to the Senate that we should know the order in which these matters are coming up. They ought not to be passed over irregularly without any sort of system. I think the Senator from Iowa should give notice to the Senate as to the order in which he intends to proceed. So far as I am concerned, I am perfectly willing for the convenience of any Senator that any item passed over may be taken up at any time. It is a matter of indifference to me, but I think the Senate ought to know. If it is the intention of the Senator from Iowa to take up hides after the wool schedule and before we proceed with silk, the Senate ought to know it at the earliest moment, so that we can be ready, and if not, then the Senator should indicate at what time he will be willing to take it up.

Mr. WHITE. I suggest to the Senator from Arkansas that there is a fact which has just come to my notice which has relieved me from a great deal of solicitude, and I have no doubt that it will relieve the Senator when I read it to him. We are assured by very high authority that Congress is passing a law that will be the most scientific and the best balanced tariff law ever enacted. I have had some doubt about this matter heretofore, but I now rest in peace.

Mr. ALLISON. I am glad the Senator from California is reassured upon that point.

Mr. CAFFERY. Mr. President, before entering on a discussion of the paragraph of the wool schedule under consideration, concerning which our friends on the other side appear to have some trouble, I propose to make some general remarks upon the pending bill.

Mr. WELLINGTON. As I have no doubt what the Senator is about to say will be of interest to the Senate, I suggest that he speak so that he may be heard on this side of the Chamber.

Mr. CAFFERY. I shall attempt to elevate my voice so that

the Senator from Maryland can have a chance to hear some good Democratic doctrines.

The VICE-PRESIDENT. The Senator from Louisiana will proceed.

Mr. CAFFERY. Mr. President, the formative period of the basis on which, and the purpose for which, tariff taxes should be imposed was between the adoption of the Constitution and the revenue act of 1828.

Gradually, by an evolution, resulting from the divergent views of government held by the followers of Jefferson and the followers of Hamilton, the great principle of "tariff for revenue only" and the opposite principle of "tariff for protection" were formed and crystallized.

Hamilton looked backward to the restrictive policy then prevailing in England. Jefferson looked forward to the application of the liberty-founded principles of the Republic of the United States. Hamilton was influenced by the smell of royalty which clung to his republican garments; Jefferson, by the awakened sense of broader liberty and clearer perception of economic truth, obtained from the teachings of Adam Smith and the French economists and our own Constitution.

The immortal author of the declaration that "all men are born free" and of that other declaration that "equal rights are for all and special privileges for none" could not have been a protectionist in the sense the term is now employed.

Sir, arguing from general principles, the conclusion irresistibly flows that protection is restriction of natural right, and therefore undemocratic; that protection is paternalism, and therefore undemocratic; that protection is larcenous, and therefore undemocratic.

The democratic theory of government may be traced to the Declaration of Independence and Magna Charta.

Life, liberty, property, and the pursuit of happiness are the inalienable right of men; liberty in all things, save when the public weal requires its restriction. Whoever advocates restriction must show its necessity. The burden of proof is on the protectionists to show that the freedom of contract is not necessary for the benefit of the social system. Primarily, the right to exchange with whosoever wishes to give another commodity for yours is perfect, free, and unrestricted. It flows from the right of the individual freeman to do as he chooses with his own, sell it where he can, for what he can, and with whomsoever he can, without burden or taxation on either or both parties to the exchange.

Among the ancients trade was spoliation and war was slavery. To impoverish a nation by trade and to enslave its population by war was the ideal of excellence. The idea survived the fall of the greatest and last of ancient civilizations, and descended by a chain of barbaric title to the nations of mediæval Europe. Exports were frequently prohibited and imports were always highly taxed, and as light penetrated the darkness of those ages the barbarism of modified slavery lingered, and still lingers in the idea of spoliation by one nation of another and by the classes of the masses. Just prior to the writings of Smith in England, and of Condillac in France, the then world, stimulated into intellectual activity by the Reformation and the rise of the school of economists, began to throw off some of the shackles descended from ancient ignorance and greed, and the doctrine of free trade gained a foothold in the thinking world. This doctrine was then accompanied with the twin errors that all wealth emanated from the soil, and that exchange was exactly equivalent, neither party making by it.

But mankind is selfish, and the battle commenced in the eighteenth century against protection is not yet finished, nor will it be until the intelligent masses of the world strike down the hand of governmental favor and privilege. To own human beings has been a strong propensity of the race. To own a part of man's labor is the last desperate effort of the selfish few against the toiling many. Humanity and enlightenment freed the slaves; humanity and enlightenment will free the toiling millions from tributes to the protected.

The devil is never so dangerous as when he quotes Scripture. Protection is never so insidious as when preaching in behalf of its victims.

> In law, what plea so tainted and corrupt but, being seasoned with a gracious voice, obscures the show of evil?
> In religion, what damned error but some sober brow will bless it and approve it with a text?

And so the protectionist plunders humanity in the name of humanity, exacts alms in the name of charity, and beseeches aid in the name of the needy. Truth is always plain, error is always complex. When the proposition is laid down that protection does not protect the masses, the answer is ready, "Why, we give you a larger home market; we give better prices to our employees; we give employment to the baker, the butcher, the carpenter, and the mason; and so everybody is benefited." The poor fellow who is answered thus finds that his co-toiler in the same line of industry in a neighboring State or district is getting more or less, according to the supply of laborers there; he finds that toilers in industries not protected get as much and frequently more than he does, and yet somehow he is half muddled by the specious argument of the oily factory owner.

He knows that the duty on sugar or woolen goods makes him pay more for his sugar or his clothes; the duty on white pine, more for his lumber; the duty on soap, more for his soap, and yet he is somehow puzzled about the matter. He finds a duty on wheat and cotton, and yet the price is not raised at home; he finds a duty on borax and hemp, and the price is raised at home. He finds a duty on nails and steel rails, and the price at home is higher than on the same article when shipped abroad and sold. What he does know is that the sugar refiner and the soap maker, the woolen manufacturer and the wheat and cotton grower, do not pay a farthing more for labor than they are compelled to. He finds trusts and pools controlling the price of things necessary to the consumer, and he commences to think, and he is now thinking, that the best way out of this perplexity is to place every tub on its own bottom, break up trusts and pools, and let every industry stand on its own merits.

He hears the clamor of the mill owner and the mine owner that they must be protected. He concludes that they are weak and want somebody to help them. His argument commences with himself. Who is going to protect me? If the well-fed, prosperous, rich mine owner is in danger of being destroyed, why am not I? Am I weaker, less able to work, than the half-fed Russian, or the starved Italian, or the lazy peon, or the stolid German, or the ignorant Portuguese? All of them come over here. I hold my place at higher wages than they get. They get more than they did at home. He finds the same man, clamoring for protection against the world, ready to employ a foreigner at less wages than he gets, provided the foreigner can do the work he does. He finds free trade in labor, and he concludes free trade ought to go all around. He is right.

He finds, when the whole subject is reviewed by him, that the corn grower, the wheat grower, the cotton grower, the rail and nail manufacturer, the bicycle manufacturer, the cotton manufacturer, and a host of manufacturers and produce raisers are not only supplying the home market, but the markets of the world. He finds that the home price of these articles is the foreign price, less freight, insurance, and commissions, in all exports not controlled by a trust, and he finds trusts mostly where the duty on the competing foreign article is too high to allow it to come in. He does not find a trust in wheat, cotton, or corn, because the foreigner has no competing article and trusts are impossible.

He finds that all the workers said to be included in the beneficent circle of protection—the carpenter, the blacksmith, the baker, the lawyer, the doctor, the merchant—get their pay according to their deserts, the demand for their services, and the supply of the human material. He finds the protective theory intricate and the application a sham, a delusion, invented to make him pay a quota of his hard-earned wages to swell the gains of the protected "weakling." He finds that the money levied out of his scant store does not go into the Treasury to "pay the debts of the United States, promote the general welfare, and provide for the common defense," but into the pockets of the "weaklings."

He is sorry for the poor, sickly things that ride in splendid carriages, give costly dinners, visit foreign shores, hobnob with nobility, come before the committees of Congress with piteous tales of woe, infest the corridors of the Capitol, have paid lobbyists to lay siege to Senators and Representatives, and make the air doleful with their begging requests for more and more and melancholy predictions of the untimely end of the benefactors of the race should largess and bounty, subsidy and tariff, be denied them. Yes, his honest soul melts with sympathy. "Was ever so much disinterested humanity!" he thinks to himself.

Truly the world is better! Human nature nobler and higher! Not for themselves do the weaklings make these efforts! Perish the thought that it is their own nests they are feathering!

The weaklings have achieved their purpose. Their demands have been granted. Their salt, their lumber, their woolens, their cotton, their coal and iron, and their hemp have all been protected. The fat was fried in season, and the reward comes in due time. All things work together for good for fat friers and good protectionists. Of such is the kingdom of protection.

But the poor fellow who has been holding this colloquy, thinking that the blessings to reach him by filtration from the weaklings—the vicarious system of benefaction—will percolate down to him from the principle of tariff gravitation, hears nothing more of the promised blessings. But behold! the heathen Chinese, or the fiery Jap, or the pauper German, or the horrid Englishman will dump his goods over the tariff wall; or the foolish home consumers cease to buy from the weaklings because they can not; or the jingoes will disturb trade by war talk; or the silverite by inflation talk, and a cut of 10 per cent in the poor fellow's wages is made.

He looks at his good wife, wearied by household cares; his blooming daughter, so close to his heart and hopes, deprived of the means to make a good appearance in society; his son, just ready to gain the education now denied to him, and his soul and brain rise in revolt against a system which has ever kept, and ever will keep, the word of promise to the ear, but break it to the hope.

Out of the curse denounced against the transgression of our first parents has come all the blessings of civilization. Human sweat, human toil, have built up the vast structure of modern advancement. Human brain and human muscle have transformed the Western Hemisphere into the most peaceful, the most enlightened, and the happiest abode for the toiling millions in its borders that Providence has ever given to man.

But the Old Adam lingers in the human breast. Centuries of labor will make it none the less a pain to labor, and the ordinary man is always altruistic when it comes to making his brother man do his work for him. In this happy land the grip of the law makes the poor pay tribute to the rich. Says the greatest economist that this century has produced (I quote from Frederick Bastiat):

Self-preservation and development are the common aspiration of all men, in such a way that if everyone enjoyed the free exercise of his faculties and the free distribution of the fruit of his labor, social progress would be incessant, uninterrupted, inevitable. But there is another disposition which is common to them. This is to live and develop at the expense of another. This is no rash imputation, emanating from a gloomy, uncharitable spirit. History bears witness to the truth of it by the incessant wars, migration of races, the universality of slavery, sacerdotal oppressions, the frauds in trade, and the monopolies with which its annals abound. This unfortunate disposition has its origin in the very constitution of man—in that primitive and universal and invincible sentiment which urges it toward its well-being and makes it seek to escape pain. Man can only maintain life and obtain enjoyments from a perpetual search and appropriation; that is, from a perpetual application of his faculties to objects, or from labor. This is the origin of property.

But yet he may live and enjoy by seizing and appropriating the productions of his fellow-men. This is the origin of plunder.

Now, labor, being in itself a pain, a man being naturally inclined to avoid pain, it follows, and history proves it, that wherever plunder is less burdensome than labor, it prevails; and neither religion nor morality can prevent it, in this case, from prevailing. * * * It is the nature of man to rise against the injustice of which he is the victim. When, therefore, plunder is organized by law, for the benefit of those who profit by it, all plundered classes tend, either by peaceful or revolutionary means, to enter in some way into the business of manufacturing laws.

These classes, according to the degree of enlightenment at which they have arrived, may propose to themselves two very different ends. When they thus attempt the attainment of their political rights, either they may wish to put an end to lawful plunder, or they may desire to take part in it. Woe to the nation when the latter thought prevails among the masses at the moment when they, in turn, seize upon the legislative power.

This long quotation, Mr. President, is justified by its application to the present condition of our country. From legislation in favor of special classes, the idea is fast gaining ground that legislation must be in favor of all classes. From the perversion of law, whereby a few favored individuals are made prosperous, the whole mass is seeking prosperity from legislation.

From paternalism for a few, paternalism is sought by the many. The transition from McKinleyism to Debsism is easy. The imposition of indirect taxes to make manufacturers rich justifies the imposition of direct taxes to make the farmer rich. The proposition of the Senator from Utah [Mr. CANNON] to place an export bounty on corn and wheat and oats is more logical and more justifiable than a bounty on imported sugar for the benefit of the greedy sugar trust.

A bounty for the man who has, from the foundation of the Government, been bled for the weaklings, is a just retribution on those who have fattened on his substance and fed from his table.

Governments were never instituted among men to make them rich. The province of government is limited to "protecting" each individual in his life and property. The province of government is to allow full play to individual energy and to protect individuals in all their gains and acquisitions. Governments were never instituted to restrain or hamper or embarrass individuals in any of their natural rights. Rather, Mr. President, to preserve, protect, and defend all natural rights. These rights existed before governments; and will survive their fall, if such a calamity should befall the race.

And now, sir, we are confronted with the condition that Bastiat deplored. Instead of putting an end to the plunder of the masses by the classes, the masses are keen to try their hand at the plundering. Then, sir, let universal plunder come! Then the revelation will follow that everybody will plunder everybody else, and the whole wretched system of spoliation will fall to pieces. Then the great money-making machine called government will be found empty handed and bankrupt; then the secret will be fully disclosed that the toilers are the bottom rounds of the ladder up which the fat friers and the fat friers have mounted to opulence and wealth.

When the Pilgrim and the Cavalier landed on the shores of the Western Hemisphere to attack and to conquer the obstacles of nature and to wrench wealth from her bosom, they did not dream of governmental help or aid. Strong, sturdy, and self-reliant, they toiled and they prospered. They were full of the spirit of liberty and individual independence. They knew that society was made to protect natural rights and not to foster individual interests. They knew that men followed those callings and pursued those industries which their talents and their surroundings indicated as profitable. They pleaded no baby act. There was no voice crying in the wilderness for aid, for help, for permission under the law to deprive any hardy inhabitant of a part of his gains to bestow upon some other.

No, sir; one of the causes assigned by the author of the immortal Declaration of Independence for separation from the mother country was the tyranny of George III, "for cutting off our trade with all parts of the world." And long before, at Runnymede, the ancestors of the hardy pioneers of England, of Virginia, of North and South Carolina, of Georgia, of New York, of New Jersey, and Pennsylvania wrung from reluctant John the concessions contained in the forerunner of our Declaration of Independence—the great Magna Charta of England—that "all merchants may safely and without molestation depart from England and come to England, as well by land as by water, to buy and to sell, free from all evil duties, in accord with our ancient and just usages."

Sir, the proposition has been boldly stated that Washington, and Hamilton, and Clay, and Jackson, and Madison were protectionists—such protectionists as we have to-day. I deny that the protection of to-day was ever advocated by any of the fathers, and I deny that it ever took form and shape until the act of 1890. The modern doctrine is not to encourage new industries, but to intrench and casemate the old ones; not to protect the infant, but to fatten the giant; not to help the weak, but to aid the strong. Sir, it is literally "to take from him that hath not and give to him that hath." Let us go, sir, to the great father, Washington, who, in his letter to Lafayette in 1796, wrote as follows:

As a member of an infant empire, as a philanthropist by character and, if I may be allowed the expression, as a citizen of the great republic at large, I can not avoid reflecting with pleasure on the probable influence that commerce may hereafter have on human manners and society in general. On these occasions I consider how mankind may be connected like one great family in fraternal ties. I indulge a fond, perhaps an enthusiastic, idea that as the world is evidently much less barbarous than it has been, its melioration must be progressive; that nations are becoming more and more humanized in their policy, and in fine that the period is not very remote when the benefits of a liberal and free commerce will pretty generally succeed to the devastations and horrors of war.

This does not sound like Chinese-wall principles. It has the ring of free trade. The great founder of the nation could not have entertained the narrow views, born of broad greed, that characterizes this bill. He poured forth his soul in this communication to him whom he loved; that chivalric, peerless, unselfish son of France, whose noble spirit drew kindred spirits to him as the magnet draws the needle. Washington was a free trader.

What says Jefferson, the philosopher and statesman, the founder of Democracy, the author of the democratic creed of government, the great apostle of individual liberty and natural rights, the exponent of the widest liberties of the citizen consistent with the great powers of a republican government. While Vice-President, in a letter to Elbridge Gerry, he said:

In confutation of these and all future calumnies, by way of anticipation, I shall make to you a profession of my political faith, in confidence that you will consider every future imputation on me of a contrary complexion as bearing on its front the work of falsehood and calumny. * * * I am for free commerce with all nations.

After the tariff of 1824, he wrote to Governor Giles, December 26, 1825:

Under power to regulate commerce they assume indefinitely that (power) over agriculture and manufactures, and call it regulation to take the earnings of one of these branches of industry, and that, too, the most depressed, and put them in the pockets of the other, the most flourishing of all.

Is it possible, sir, that protection run mad can, in the face of these declarations, class Washington and Jefferson as modern protectionists?

What was Hamilton's position? He was an advocate for centralism and prerogative, but not a protectionist of to-day. In his report on manufactures in 1791 he says:

If the system of perfect liberty to industry and commerce were the prevailing systems of the nations, it will not be affirmed that they might not be permitted, with very few exceptions, to serve as a rule of national conduct. If one nation were in a condition to supply manufactured articles on better terms than another, that other might find an abundant indemnification in a superior capacity to furnish the produce of the soil. And a free exchange, mutually beneficial, of the commodities which each was able to supply, on the best terms, might be carried on between them, supporting, in full vigor, the industry of each.

The continuance of bounties on manufactures long established must almost always be a questionable policy, because a presumption would arise in every such case that there were natural and inherent impediments to success.

The exemption of the materials of manufactures from duty. The policy of that exemption as a general rule, particularly in reference to new establishments, is obvious. It can hardly ever be advisable to add the obstruction of fiscal burdens to the difficulties which naturally embarrass a new manufacture; and when it is matured and in condition to become an object of revenue, it is, generally speaking, better that the fabric than the material should be subject to taxation.

It appears that Hamilton would have been an out-and-out free trader could he have disabused his mind of the idea that all must be free traders in order that the system should work. This was an error which his powerful intellect would have soon discarded. Whatever embarrasses or impedes free exchange hurts both parties to it. Trade is the exchange of product for product, or product for services, or services for services. Now, if an Englishman exports a commodity to America, he is met by a heavy import duty. He pays the duty and adds it to the price of the commodity. The consumer in America, who, in order to buy, must sell some of his produce or render some service, is handicapped precisely to the extent of the duty. This duty causes him to sell more produce and to render more service than he otherwise would. This hurts the American. The Englishman is hurt by the diminished exchangeable or purchasing power of the American consumer.

But in balancing the losses the American is hurt the most, for the Englishman may not only sell somewhere else, but at most he is only deprived of a gain which may or may not be large; but the American is subjected to a positive and irretrievable loss. It is evident that Hamilton had not outgrown the mercantile idea of trade, which meant to sell everything and buy nothing; to ruin your cotrader to your benefit. This doctrine is repugnant to sound economy and to the wise dispensation of Providence, whereby men are incited to exchange what each offers to the other, cheaper than either can produce. If they could each produce his cotrader's commodity as cheaply as he, there would be no exchange. If exchange were not equally beneficial, none would take place.

But what have our friends, the protectionists, to say of Hamilton's views about raw materials? Can the lumber, salt, hides, borax, chemicals, cotton, iron, and coal taxers say that Hamilton favored such taxes?

Mr. President, recklessness of assertion must stand rebuked before the utterances of this prophet of the creed of protection. Were Hamilton alive, and the wool and hides and lumber and salt interests were to ask him to help strangle our manufacturing interests and pile up a mountain of tariff, all to come out of the consumer, he would scorn the name of protectionist, and would rally to the Democratic bugle call of "tariff for revenue only," or further still, for unlimited free trade. His powerful mind and masterful patriotism would sweep away the barriers of protection, so that the articles and commodities hampered by them once would feel their strangling and deadening hand no more, forever!

And Old Hickory! what of him? In one of his messages he expressly declared that he was in favor of protection only on articles needed in war. He said as follows:

It is certainly our duty to diminish as far as we can the burdens of taxation and to regard all restrictions which are imposed on the trade and navigation of our citizens as evils which we shall mitigate whenever we are not prevented by the adverse legislation and policy of foreign nations or those duties which the defense and independence of our country enjoin upon us. * * * Those who take an enlarged view of the condition of our country must be satisfied that the policy of protection must ultimately be limited to those articles of domestic manufacture which are indispensable in time of war. Within this scope, on a reasonable scale, it is recommended by every consideration of patriotism and duty, which will doubtless always secure it liberal support. But beyond this we have seen the operation of the system productive of discontent.

And Madison is paraded as a protectionist. Listen to him:

In the first place, I own myself the friend to a very free system of commerce, and hold it as a truth that commercial shackles are generally unjust, oppressive, and impolitic; it is also a truth that if industry and labor are left to take their own course, they would generally be directed to those objects which are the most productive, and this in a more certain and direct manner than the wisdom of a most enlightened legislature could point out. Nor do I think that the national interest is more promoted by such obstruction than the interest of individuals would be promoted by legislative interference directing the particular application of industry. * * * The case is the same between the exercise of arts and agriculture, between the city and the country, and between the city and the town, each capable of making particular articles in abundance to supply the other; thus all are benefited by the exchange, and the less this exchange is cramped by the Government the greater the proportion of the benefit to each. The same argument holds good between nation and nation, and between parts of the same nation.

Why, Mr. President, Madison was a free trader!

I come now to the author of the American system, who is quoted as sanctioning the late monstrosity of tariff legislation. Listen to Henry Clay:

At present I would only say that I, too, am a friend to free trade, but it must be free trade of perfect reciprocity. * * * Now, give us time and cease all fluctuations and agitations for nine years, and the manufacturers in every branch will sustain themselves against foreign competition.

Clay believed in encouraging infant industries, but he gave his infants nine years to put off the baby garments and wear trousers. He never believed in taxing raw materials. A modern protectionist would call him a free trader.

But there appeared about that time a giant in intellect, a contemporary of Clay. When Mr. Clay was urging the claims of the infants, listen to the great Webster, who stood forth for the yeomanry of the land, and spake as man rarely ever spake:

And allow me, sir, in the first place, to state my regret, if indeed I ought not to express a warmer sentiment, at the names or designations which Mr. Speaker [Mr. Clay] has seen fit to adopt for the purpose of describing the advocates and the opposers of the present bill. It is a question, he says, between the friends of an "American policy" and those of a "foreign policy." This, sir, is an assumption which I take the liberty to deny. Mr. Speaker certainly intended nothing invidious or derogatory to any part of the House by this mode of denominating friends and enemies. But there is a power in names, and this manner of distinguishing those who favor and those who oppose particular measures may lead to inferences to which no member of the House can submit.

It may imply that there is a more exclusive and peculiar regard to American interests in one class of opinions than in another. Such an implication is to be resisted and repelled. Every member has a right to the presumption that he pursues what he believes to be the interest of his country with as sincere a zeal as any other member. I claim this in my own case, and while I shall not for any purpose of description or convenient arrangement use terms which may imply any disrespect to other men's opinions, much less any imputations upon other men's motives, it is my duty to take care that the use of such terms by others be not, against the will of those who adopt them, made to produce a false impression.

Indeed, sir, it is a little astonishing, if it seemed convenient to Mr. Speaker, for the purpose of distinction, to make use of the terms "American policy" and "foreign policy," that he should not have applied them in a manner precisely the reverse of that in which he has in fact used them. If names are thought necessary it would be well enough, one would think, that the name should be in some measure descriptive of the thing; and since Mr. Speaker denominates the policy which he recommends "a new policy in this country," since he speaks of the present measure as a new era in our legislation, since he professes to invite us to depart from our accustomed course, to instruct ourselves by the wisdom of others, and to adopt the policy of the most distinguished foreign states, one is a little curious to know with what propriety of speech this imitation of other nations is denominated an "American policy," while, on the contrary, a preference for our own established system, as it now actually exists and always has existed, is called a "foreign policy."

This favorite American policy is what America has never tried, and this odious foreign policy is what as we are told, foreign states have never pursued. Sir, that is the truest American policy which shall most usefully employ American capital and American labor and best sustain the whole population. With me it is a fundamental axiom, it is interwoven with all my opinions, that the great interests of the country are united and inseparable; that agriculture, commerce, and manufactures will prosper together or languish together, and that all legislation is dangerous which proposes to benefit one of these without looking to consequences which may fall on the others. * * *

Protection, when carried to the point which is now recommended, that is, to entire prohibition, seems to me destructive of all commercial intercourse between nations. We are urged to adopt the system upon general principles; and what would be the consequence of the universal application of such a general principle but that the nations would abstain entirely from all intercourse with one another? I do not admit the general principle; on the contrary, I think freedom of trade to be the general principle and restriction the exception. And it is for every state, taking into view its own condition, to judge of the propriety in any case of making an exception, constantly preferring, as I think all wise governments will, not to depart without urgent reason from the general rule.

Webster was a free trader. The reason that he gave for changing to protection, such limited protection as it was, was that his people had been induced to quit commerce by high tariff and go into manufacturing, and he had to go with them. But he never repudiated the reasoning in the speech quoted from. His great mind could not lower itself to stultification. The reasoning will ever remain as the legacy of a great man to posterity. The apostasy will stand as a memorial of the power of local interest to cause a great soul to humiliate itself. Thus, Mr. President, was the free-trade "falcon, towering in his pride of place," by the mousing owl of protection "hawked at and killed."

When Webster advocated free trade in the House, Calhoun was just commencing to see his way clear to the true Democratic doctrine, which he ever afterwards advocated. But it is futile to call the acts of 1792 and 1816 protection acts. The rates were low—from about 5 per cent in 1792 to about 20 per cent in 1816. The duties were levied for revenue, and although the manufacturing interests had been asking for protection, they received none of any consequence until 1828.

Professor Taussig says:

Much has been said in the course of the protective controversy about the views of the fathers of the Republic. But for nearly twenty years after the formation of the Union other subjects so absorbed the attention of public men that no distinct opinion appears in their utterances for or against protective duties. Considering the state of economic knowledge in those days, the example set by European countries, and the application of the colonial system before the days of independence, we can not be surprised that some disposition was shown to impose protective duties. It is curious that in the first session of Congress these were advocated most earnestly by the representatives from Pennsylvania, who took their stand from the first as unflinching advocates of a protective policy. On the other hand, the current toward more liberal views, which had set in so strongly after the writings of the French economists and the publication of the Wealth of Nations, had made its way to the United States.

One might expect to find its influence most strong among the followers of Jefferson, whose political philosophy led them in general to oppose Government interference. But both Federalists and Republicans were influenced in their attitude to the question of protection, most of all by its bearing on the other more prominent questions on which parties began to be divided.

Some signs of the gradual growth of a protective feeling appeared before the close of the war. It was natural that the patriotic fervor which the events of the period of restriction and war called out for the first time in our history should bring with it a disposition to encourage the production at home of a number of manufactured articles, of which the sudden interruption in the foreign supply caused great inconvenience. * * *

For some time after the close of the war and the enactment of the tariff of 1816 there was no pressure for a more vigorous application of protective principles. The general expectation was that the country would fall back into much the same state of things as that which had existed before 1808; that agriculture and commerce would again be as profitable as during the previous

period, and would as exclusively be the occupation of the people. Such an expectation could not in the nature of things be entirely fulfilled, but for a time it was encouraged by several accidental circumstances. The harvests in Europe for several seasons were bad and caused a stronger demand and higher price for the staple food products. The demand for cotton was large and the price high. Most important of all, the currency was in a state of complete disarrangement and concealed and supported an unsound economic condition.

Under cover of the excessive issues of practically irredeemable bank notes, the prices of all commodities were high, as were the general rates of wages and rents. The price of breadstuffs and provisions, the staples of the North, and of cotton and tobacco, the staples of the South, were high, not only absolutely, but relatively, and encouraged continued large production of these articles. The prices of most manufactured goods were comparatively low. After the war the imports of these from England were heavy. The long pent-up stream of merchandise from England may be said to have flooded the world at the close of the Napoleonic wars.

In this country, as in others, imports were carried beyond the capacity for consumption, and the price fell much below the normal rates. The strain of this oversupply and fall of prices bore hard on the domestic manufacturers, especially on those who had begun and carried on operations during the restrictive period, and many of them were compelled to cease production and abandon their works.

This abnormal period, which had its counterpart of feverish excitement and speculation in Europe, came to an end in 1818-19. The civilized world then settled down to recover slowly from the effects of a generation of war and destruction. In the United States the currency bubble was pricked in the latter part of 1818.

The country was practically on a free-trade basis up to the war of 1812. Prior to that our exports of breadstuffs to Europe to feed the armies contending for the mastery of the world made us prosperous, agriculturally and commercially. The embargo and war of 1812 dried up this prosperity. People turned to Government, as they always do in time of depression, for aid, and the poison of governmental interference in affairs lying outside of its functions was gradually injected into the blood of our industries. The struggle of manufacturers to get a part of the earnings of the balance of the community culminated in their triumph in 1828. From that period the protective principle languished and finally died in 1846.

From 1846 until the war the Democratic principle of tariff for revenue only prevailed. The Whigs were thoroughly vanquished. The nation accepted Democracy, and the testimony of men and figures is that from 1846 to 1861 the country went forward in prosperity with leaps and bounds. Mr. Blaine says in his book, Twenty Years in Congress, that the country had accepted the principle of Democratic tariff taxation. In 1840, 1844, 1848, 1852, and 1856 Democratic platforms rung out clearly the doctrine that the trend of Democracy was toward free trade.

No halting ground, no equivocal or partial utterances, no limitations whatever, but the bold declaration was written in the platform of 1848 that the country was to be congratulated—on what, sir? On a tariff for revenue only? No, sir! "On the fulfillment of the hopes of the Democracy of the Union in the noble impulse given to the cause of free trade by the repeal of the tariff of 1842 and the creation of the more equal, honest, and protective tariff of 1846."

In 1852 the platform announced that "the time had come for the people of the United States to declare themselves in favor of free seas and progressive free trade throughout the world."

In other words, sir, the Democracy of that day advocated the doctrine of free trade pure and simple; but it must be a progressive free trade, not a sudden, instantaneous free trade, but arrived at by due progress and due regard to existing conditions. They progressed rapidly, and in 1857 lowered the rates generally from 30 per cent to 24 per cent, and, as the Senator from Texas [Mr. MILLS] stated in his speech delivered on the 12th instant, placed a large number of articles on the free list.

Again came war. Debts were incurred. The nation was strained to the uttermost. War rouses patriotism to its highest pitch; it develops the lowest and meanest traits of humanity. It causes the patriot to peril his life and his property for his country; it stimulates human vampires to suck their fellows' blood.

War came, and with it came the cry for power to plunder. The Democratic organization was gone. A new party, flushed with victory, based on the absorbing principle of human freedom, cared little for tariffs except to get the sinews of war. The greedy, the unscrupulous, invaded the Capitol, and gradually, remorselessly, from the germ of the infant-industry idea, has been developed the Colossus of protection.

Sir, we hear Senators on this floor belonging to the Democratic party stating four propositions:

First. The doctrine of free raw material is not Democratic.

Second. That if one article is dutied, all ought to be.

Third. That if protection is going the rounds, Democrats might as well get the benefit of it by asking to be protected in home industries.

Fourth. That there is no principle involved in a tariff bill, but it is a mere question of schedules.

The first proposition may be answered by the declaration of the platform of 1892 declaring expressly for tariff for revenue only, the declaration of every platform from 1846 to 1892 declaring that the hopes and views of the party were for free trade. But casting aside precedent, we have the proposition that, conceding that it is wrong to protect manufacturers, and manufacturers are nevertheless protected, it is right to protect or to tax the raw materials used by them.

This proposition is doubly fallacious; fallacious from a logical standpoint and fallacious from a revenue standpoint. It is admitted that protection to manufactures is wrong. If this be so, it is a further wrong to inflict another unjustifiable tax upon the people. Can one wrong be remedied by perpetrating another? Can Democrats go before the country and complain of the exactions placed on the citizen by law, and then add to those exactions by further legislation?

It is fallacious from another standpoint. We want an export trade to give room for additional employment to our people and larger development to our industries. Conceding that the tax on manufactures is wrong, and legislation can not be procured to remove it at once, why cripple the manufacturer with such rates as will raise the home price so high as to be more burdensome on the people and prevent him from competing with foreigners in the outside markets? No enlightened nation on the globe taxes raw material used in manufactures. If revenue is sought, why seek it through a channel that cripples the manufacturing industry, prevents expansion, and denies labor an opportunity to work?

If revenue is wanted and not protection by a tax on manufactured articles, is it not absurd to tax the raw materials out of which they are made? Either the raw materials must be imported or they are produced at home. In the first case a compensating duty is necessary or you discriminate against the manufacturer by the amount of the duty on the raw material, and in the second the duty is useless.

A Democrat ought not to sustain a tax on raw material. If on the ground of protection, he violates his party creed; if for revenue, he doubles the tax on the people. The true theory is to tax neither the competing foreign manufactured article nor the raw material of the home manufacture. But if the selection is to be made for revenue purposes between a tax on the raw material of the home manufacturer and the competing foreign article, clearly the latter is to be taken. If the raw material is taxed, you must place an equivalent duty on the finished product or you unjustly discriminate against the home manufacturer.

If both the raw material and the finished product are taxed, and the principle is carried out all along the line, the burdens on the people are doubled, and in the name of revenue a wall of protection is built up around the country.

If the object is to bottle up the industries of the United States in our own borders, a tax on raw materials, added to a compensating duty, accomplishes it. Placing a duty on raw materials handicaps our manufacturers in foreign markets, even when a compensating duty is levied.

To recoup he must add the duty on the raw material to the selling price of the manufactured article. This he can not do in a foreign market, against a foreign competitor who has free raw materials. You place him on an equality with the foreigner in the home market by a compensating duty, and you destroy him in the foreign market. You invite competition at home, and you destroy his chance of competing abroad.

The propositions that duties must be levied all along the line; that if plundering is the order of the day we must join the gang; that no principle is involved in the tariff issue, but it is a mere question of arranging schedules, would seem to be refuted by their statement.

Sir, precedent and principle alike refute these propositions. Veteran Democrats who were born and will die with true Democratic faith in their minds and hearts repudiate them.

They look upon them as an attempt to crucify their creed. And like the Christian who embraces the image of his crucified Saviour as the last hour of mortality approaches, so will they embrace and cling to, with a love and fervor and faith which no sophistry can destroy and no temptation betray, the ancient doctrine of tariff for revenue only as the nearest approach to that free trade hoped for by the Democrats of old.

Sir, is it possible that we denounce plunder only to join the plunderers; that we point to the straight and honest path of Democratic duty and then tread the primrose path of Republican wickedness; that we abhor the sin and join the sinners?

Democracy may be wrong in political economy, but Democrats can not do conscious wrong in matters of public and private morality. Men have been burnt at the stake for conscience' sake. It is not a question, so far as individual action is concerned, of the verity of our political creed. The question to govern our conduct as citizens and individuals and members of a political organization is whether we conscientiously believe that protection leads to legal robbery. If we do—and I know I do—then under no circumstances will I, by my vote, rob one of my fellow-citizens.

Sir, not only is "tariff for revenue only" a Democratic tenet of the first magnitude, but it is grounded in human nature as deep as is the Decalogue.

Democratic doctrine, as contained in tariff policy, is that a man's property is his own; that while it is necessary to contribute a part of his gains to support the contrivance of government, in compensation for the protection it affords him in his person and property, and pursuits, anything beyond that is extortion and robbery. That doctrine is, that under the specious guise of protection the substance of the masses is taken and handed over to the classes.

Is not the robbery effected by arrangement of schedules? When the woolen schedule places 90 per cent on the wearer of a hat or a coat more than he should pay, and when more than half of this amount goes to the woolgrower and the woolen manufacturer, is it not a robbery?

When a poor man has to pay 50 to 110 per cent on the pane of glass in his humble windows, and all of it goes to the glass maker, is it not a robbery?

When a poor woman, God fearing, righteous, and industrious, wishes to adorn her cottage with a damask tablecloth and has to pay 90 per cent more than she would, and none of it goes to the Government, is it not robbery?

If, sir, the great and glorious principle that no man is of right bound to pay tribute to another is taken from Democracy, then Democracy is and has been a sham—an empty sound without significance or substance.

It is the essential principle of liberty.

It will survive parties and platforms.

It is engraved in the minds of freemen all over the world. It will survive when the Capitol itself is in ruins. It will be in the future, as in the past, the beacon of light to guide the path of patriots to honest government.

It will some time in the near future, I hope, be firmly installed as the prevailing governmental policy—the only policy that will give scope to enterprise, health to industry, employment to labor, contentment to the masses, and stability to our institutions.

Sir, I have dwelt thus long on the elementary principles of our creed because their truth has been questioned and their application denied.

Every Senator follows the dictates of his judgment and conscience. I surely will follow mine. I believe I am under the drippings of the sanctuary. I have sat in vain at the feet of the prophets of our faith, if I now err.

It has been charged that the panics of 1837, 1857, and 1873 were caused by low tariffs. Presidents Polk and Buchanan are quoted as stating that prosperous times existed under high tariffs and panics ensued immediately on the adoption of low tariffs. Mr. President, we have had panics under low tariffs, and we have likewise had them under high tariffs. But we had unexampled prosperity under the Walker tariff of 1846, the lowest since 1792, up to the panic of 1857. We had prosperity up to 1837 under the lower tariff, commencing in 1833. But what of the panic in 1893?

Sir, tariffs have not much to do with commercial crises. They come from causes lying in trade conditions. It is true that agitation of the question as to whether duty shall be kept high or low affects trade. If the proposed rates are lower than the prevailing ones, importations will be withheld, in order to come in under the lower rates. If the proposed rates are higher, importations will be rushed in to evade high duties. It may be successfully argued on general principles that high duties, preventing importations, which will eventually curtail and destroy exportation, as we must sell in order to buy, incite panics more than low duties.

A paralysis of trade is entirely distinct from overtrading. Overtrading, speculation, is the potent cause of panics. Values are boomed, enterprise is overstimulated, the drafts of the present on the future are too heavy, and when the day of liquidation comes, a collapse ensues; bankruptcy and ruin are the results.

The panics of the past have been largely caused by inflation of the currency. That of 1893 had its birth in the fear of repudiation and had no connection with the high tariff of 1890.

But, sir, we have an authority on this subject which can not be disputed.

I quote from the Hon. Hugh McCulloch, Secretary of the Treasury under three Administrations, and a financier of acknowledged ability. He says:

Of the reverses of 1837, I made the following remarks in my report as Secretary of the Treasury in 1865: "The great expansion of 1835 and 1836, ending with the terrible financial collapse of 1837, from the effects of which the country did not rally for years, was the consequence of excessive bank circulation and discounts and an abuse of the credit system, stimulated in the first place by Government deposits with the State banks, and swelled by currency and credits until, under the wild spirit of speculation which pervaded the country, labor and production decreased to such an extent that the country, which should have been the great food-producing country of the world, became an importer of breadstuffs.

"The balance of trade had been for a long time favorable to Europe and against the United States, and also in favor of the commercial cities of the seaboard and against the interior, but a vicious system of credits prevented the prompt settlement of balances. The importers established large credits abroad, by means of which they were enabled to give favorable terms to the jobbers. The jobbers in turn were thus, and by liberal accommodations from the banks, able to give their own time to country merchants, who in turn sold to their customers on indefinite credit. It then seemed to be more reputable to borrow money than to earn it, and pleasanter and apparently more profitable to speculate than to work. And so the people ran headlong into debt, labor decreased, production fell off, and ruin followed."

This was, of course, a panic sharp and terrific, but it was of short duration. It was soon followed by a lethargy under which all the springs of enterprise and hopefulness were dried up. To prevent the sacrifice of property under judicial decrees, stay laws and appraisement laws were enacted by many of the States, which only aggravated the trouble. For long, weary years the lethargy continued. There was no demand for anything except the necessaries of life, and all these, except clothing, were sold for scarcely enough, and in some cases not enough, to pay the expenses of taking them to market. I witnessed a sale in 1839, to the keeper of a hotel in Indianapolis, of oats at 10 cents a bushel and fine chickens at 50 cents a dozen. The same year I saw thousands of barrels of flour under the sheds of Suydam, Sage & Co., in New York, which they were offering at $3.50 a barrel.

Fat cattle were selling at so low a price—$10 and $12 a head—that my brother thought that he would pack a few barrels of beef at Fort Wayne for the New York market. He did so, and was drawn upon by his consignees for a part of the expenses of transportation not covered by the sales. From 1837 to 1841 there was nothing to break the stagnation but the political campaign of 1840, in which everybody became enlisted for want of something else to do. In the fall of 1841 a reaction began to appear. This became decided in 1842, before the tariff of that year went into operation, and in 1845 the country, chastened by adversity, was in the full tide of healthy and well-producing industry and enterprise. This continued until credit became again unwisely expanded and speculation became rife.

In 1857 I was the president of a bank in the State of Indiana, and this is a part of what I said about the financial troubles of that year in the report from which I have quoted:

"The financial crisis of 1857 was the result of a similar cause to that of 1837, namely, the unhealthy extension of the various forms of credit. But as in this case the evil had not been long at work, and productive industry had not been seriously diminished, the reaction, though sharp and destructive, was not general, nor were the embarrassments resulting from it protracted.

"Now, in both instances the expansion occurred while the business of the country was upon a specie basis, but it was nominally so. A false system of credits had intervened under which payments were deferred, and specie, as a measure of value and a regulator of trade, was practically ignored. Everything moved smoothly and apparently prosperously as long as credit could be established and continued; but as soon as payments were demanded and specie was in requisition distrust commenced and collapse ensued. In these instances the expansions preceded and contraction followed the suspension; but it will be recollected that while the waves were rising specie ceased to be a regulator, by reason of a credit system which prevented the use of it."

Now, with all due respect to Mr. Blaine, I expressed the opinion that the apparent prosperity which preceded the revulsion of 1857 and the real prosperity which preceded the crisis of 1857 were not caused by the tariff, and that the reverses which followed were not attributable to its reduction. If the tariff was in any measure instrumental in producing the changes, it was in stimulating the expansion which terminated in disaster. In 1857 I was a believer in the tariff, and it never entered my head to attribute the financial troubles of that year to the changes to which it had been subjected.

The most pressing duty which I had to perform when I became Secretary of the Treasury in 1865 was to provide the means to pay the soldiers, and to meet other pressing demands upon the Treasury. This was done in the only way it could be done, by the sale of temporary obligations which had proved to be attractive to investors. After this had been accomplished, the work of funding these obligations was commenced and carried successfully on until the whole amount—some thirteen hundred millions of dollars—was converted into bonds. While this work was going on, I was under constant apprehension of a financial crisis before it could be completed.

My apprehension was unfounded, but only as to time. The crisis was postponed, and for so long a period that the opinion generally prevailed that the vitality and productive power of the country were so great that the most expensive war that had ever been waged could be concluded, and great expansion of credit could be checked and abridged without financial disturbances. I have to confess that this was my own opinion, but the same causes which produced the crisis of 1857 were at work, and, as had always been the case, the revulsion came when least expected.

When I left London, in September, 1873, to come to the United States, the financial skies, if not cloudless, were not threatening. The letters which were received by the London firm from its New York partners were encouraging, and I had no reason to expect anything but a pleasant visit to my old home and a return to London under auspicious circumstances. But on the arrival of the steamship in the outer harbor, I was met by the stunning intelligence that my American partners and correspondents of the Fort Wayne banking house in which I was interested had failed; that all the banks except the Chemical Bank, which had weathered all storms, had suspended, and that one of the wildest panics which had ever occurred was raging throughout the country.

The crisis was a terrible one. Although it came unexpectedly, it was only the consummation of influences which had long been at work beneath the financial horizon. In extent, fierceness, and disaster it resembled the revulsion of 1857. It was not, as Mr. Blaine states, brought about by the losses sustained in the civil war, which had been terminated eight years before, nor by the destructive fires in Chicago and Boston. Great losses may bring about what are called hard times—not panics. It was produced by an expansion of currency and of credit, which fostered speculation, which rarely fails to terminate in financial troubles.

Even in the orderly march of trade there are times of activity and times of depression. If prices are high and industry and capital and labor are more remunerative in certain lines of production than in others, more capital and more labor rush into the best paying business. This brings about a reaction. Greater production occasions lower prices, and production is consequently lessened. The boom is gone, but no bad results flow if credit has not been strained and the industry or enterprise has a solid basis.

Not so in wild schemes or unprofitable industries where credit is lavishly given and recklessly used. Panics and tariffs do not go hand in hand, nor are they correlated to the extent of cause and effect. Slow or depressed or unprofitable trade is not cyclonic industrial disturbance, as panics are.

Mr. President, I turn now to the speech of the Senator from Rhode Island [Mr. ALDRICH] in opening this debate. He said:

The legitimate result of a protective policy is to give the American market to the American producers. When this becomes an accomplished fact, the revenue growing out of protective duties disappears. It must be evident, therefore, that we must look for other sources of revenue. Whether it shall always be along the line of an increase of internal taxes, such as we have suggested, or whether some other source of revenue should be sought, it is not necessary now to determine.

Here, sir, is a statement of three facts:

First. The legitimate result of protection is to dry up revenue;

Second. That that result has come; and

Third. That protectionists must look to some other line of revenue—internal revenue or some other.

McKinleyism has shouted itself hoarse over the revenue-producing bill which bears the name of our President. That bill actually produced a deficit, as I will show. And here is the ablest and most ingenuous of protectionists declaring that protection is a failure as a revenue measure. He says we must look somewhere else for money to run the Government.

Constitutionally, Congress can only lay duties on imports for the purpose of paying the debts of the United States, promoting the general welfare, and providing for the common defense. When protection ceases to bring in money to pay the debts, etc., it must fall. Otherwise the Constitution must be rewritten thus: "Congress shall have power to lay duties on imports to enable one class of citizens to live off the labor and at the expense of other classes of citizens."

Then, sir, the Senator from Rhode Island makes a bold plunge for sugar, tea, beer, and increased taxes on tobacco.

Under the free breakfast table cry, raised in 1890 by the Republican party, sugar, though it is a favorite article for Democratic revenue, was denied a tariff. The Republicans now want a revenue to stave off silver and advance beets, and not to protect sugar in Louisiana. It was especially declared by Senator ALLISON, in charge of this bill in the absence of Senator ALDRICH, that it was to protect beet sugar and not cane sugar that the duty is imposed. In point of fact, it was more to raise revenue than to protect beet sugar that the tax is in the bill. When the time comes, if it ever comes, when protection of sugar fails to produce revenue, what will become of the sugar interest? Will it be corralled like the manufacturers of the country, surrounded by a wall of protection, or will the free breakfast table cry be renewed?

Ah, sir, the Democratic Mede may besiege the Babylon of protection. The sugar barons, iron barons, wool barons, and all other barons may feast for a while in the royal chamber of the Belshazzar of protection. But, sir, is not the confession of the Senator from Rhode Island, that protection is dead for anything but protection, that of an unwilling Daniel, who sees the handwriting on the wall?

Sir, under the McKinley bill imports fell off from $830,150,318 in 1893 to $603,865,896 in 1894, a decline of upward of 27 per cent. This tendency was shown in the preceding year, when the imports fell off from $887,280,798 to $830,150,318. There was a steady decline in the imports during the last two years of the operation of the McKinley law.

Besides, there was in the Treasury when Mr. Harrison came in $230,348,916.12. When Mr. Cleveland came in there was $62,450,575.18. These balances were exclusive of the gold reserve. In order to create the above balance of $62,450,575.18 there was covered into the Treasury $54,007,975.75, a sum held in trust as a fund for the redemption of the national-bank notes.

As pointed out in the excerpt from Treasury Circular No. 128, herein inserted (Appendix No. 1), if the expenses of the year 1893, under the Cleveland Administration, had not been $15,952,674 less than the preceding year of the Harrison Administration, the receipts and expenditures would have been nearly equal. The Wilson law went into effect on the 28th of August, 1894. The receipts and expenditures that year, receipts being under the McKinley bill, were as follows:

Expenditures	$442,605,759
Receipts	372,802,498
Excess of expenditures over receipts	69,803,261

Besides, Mr. President, exports showed the same decline as the imports during the last years of the McKinley law. Exports in 1892 dropped from $998,226,775 to $876,332,434 in 1893, and from the last figure to $790,706,509 in 1894.

So, Mr. President, the Senator from Rhode Island is amply justified in saying that protection is a failure as a revenue producer. Will not candor go further when it has gone so far, and proclaim that not only is it a failure as a revenue producer, but as a prosperity breeder?

Does not the Senator know, do his enlightened colleagues not know, that the barrier to keep out imports will likewise bar our exports? Great Britain, the great purchaser and consumer of our cereals and a large portion of our manufactured products, may find other countries with which she can drive more profitable bargains than she can with us. Argentina, India, and Russia might supply her wheat and her cotton, and take in turn her manufactured product. The interiors of the countries named are being penetrated by railroads. Their productive capacity is enormous, and if we drive away our best customer by prohibitory tariffs we may find ourselves cabined, cribbed, confined; we may find ourselves without foreign markets for the exports of our cereals and raw materials, and with the keenest competition for our exported manufactures, handicapped by prohibitory rates on the raw material necessary in their fabrication.

The McKinley bill would have produced a deficit on the basis of the importation of the last two years of its operation. It is well known that Mr. Foster, Secretary of the Treasury under Mr. Harrison, had gone so far as to have the plates made on which to engrave bonds to provide for the deficit.

Though the Wilson bill was shorn of its principal revenue feature by the decision of the Supreme Court nullifying the income tax, the deficit will be less in its last year than that under the McKinley bill during its last year. The deficit this year from the daily Treasury statement of the 21st instant is $26,711,102.48. It can not much exceed this in the few remaining days of this fiscal year. The deficit under the McKinley bill was for its last year $69,803,261, exceeding that under the Wilson bill by $43,092,658.52.

The Treasury statement referred to shows $232,748,525.45, including the gold reserve of $100,000,000, now in the Treasury. The free gold and currency in the Treasury, amounting to $132,748,525.45, with the same expenditures and receipts as this fiscal year, would run the Government for four years. The great haste on the Republican side and the impatience on this side for the early passage of this bill shows that at least one of the parties does not think tariff is the burning issue. The Republican party is deceiving itself. "Conditions have changed since 1890," says Senator ALDRICH.

The ceaseless activity of the human mind in inventing new and applying old devices to every species of work multiplies production at diminished cost. Decreased cost of transportation follows the cheapening of production. New countries are being filled with the eager and pushing population of the Old World. The seas are literally bridged with moving iron. The primeval forests and plains of hitherto inaccessible regions are penetrated by the locomotive and united with the world by the telegraph. The dominion of man over nature was never so extensive or so secure.

Increased and increasing production creates more demands and desires, "which grow with that upon which they do feed." There is ceaseless energy and unrest. Though better and more cheaply fed and clothed and housed than ever before in the history of the race, the toilers, with more desires and demands and wants, engendered by intense activity in every department of human industry, are yet unhappy and discontented.

Disparity in wealth is inevitable where brain, not muscle, is the great motor of civilization. Disparity in intellect, in industry, in all natural conditions, is quite sufficient to create great gaps in the condition of men. The toiling masses, where equality of opportunity is offered them, have no envy of those who by superior intellect, or industry, or thrift have acquired more of this world's goods than they. But they do rebel when they think that law adds to the burdens of the poor and lessens those of the rich. Discontent and resentment against prevailing conditions arise.

Not having the time and the patience to analyze the complex condition of modern civilization, it is not to be wondered that whoever offers to solve the problem by a simple remedy is eagerly listened to. I will not, Mr. President, enter into any discussion of the monetary question. It is not germane to the tariff. My views on that question are well known, and I have no disposition to air them on this occasion. I allude to it only to draw attention to the fact that the application of the money cure to present conditions is evidence of an ailment or disease somewhere in the social body.

An article by Mr. Horace V. White in one of the popular magazines recently attracted my attention. The writer stated that it was not true that the French masses were in want or in a distressed condition at the outbreak of the French Revolution of 1789. On the contrary, they were never so well off. But society was profoundly stirred at the bottom from a sense of injustice and resentment against the privileges and oppression of the nobility. While the masses were well off materially, they could not brook the invidious distinctions created by law where nature had created none. Tyranny, insolence, and oppression followed in the wake of legal distinctions and favors.

So, Mr. President, a discontent of the mind is greater than the suffering of the body to work great social revolutions. We do know that protection creates privileges and monopolies and wealth. We do know that while our toilers, from their wonderful activity and industry, enjoy more of material blessing than their co-toilers throughout the globe, yet their minds and hearts are resentful of some wrong laid upon them by the law.

When we have a patent wrong, a known wrong, one recognized by Democracy from the time of its full and perfect organization, prudence would dictate its remedy first of all.

Rather let us remedy those wrongs we all do know than fly to the redress of others not so known of all of us.

I attribute the evils from which the social body suffers in this country to the unequal and unjust workings of tariff legislation. Strikes, lockouts, and tramps have their origin mostly in that legislation. In Europe, socialism is the result of class privilege and partial legislation.

In this country, in striking out for a remedy for ills that are felt, but the origin of which is not clearly seen, our people are looking to what Bastiat calls "universal spoliation as a remedy for partial spoliation." They are looking to socialistic remedies in various forms. But, sir, the tariff issue has been tendered by the Republican party. While I deprecate thrusting that issue on the country, knowing that another and a greater issue is ever present and can not be set aside by the Republican device of tariff, we must accept it.

Sir, "conditions have changed since 1890." The great intermountain States, where settlers from the East and immigrants from Europe obtained freeholds as a gift, have been settled up. Outside of Government reservations, nearly all the fertile lands in the United States are occupied. Rapidity and cheapness of communication over the seas and over the land bring the products of all lands to the consumers of the world. Keen competition in every branch of industry exists everywhere. Labor-saving inventions in every human industry multiply production at lower prices.

The United States can no longer claim supremacy as an agricultural nation. Though relatively the greatest of all producers of grain and meat, yet rivals are in the field and her supremacy is threatened. In the conditions of the world, and in view of the fact of the constant trend of prices to a lower level, where or how will the American wheat or cotton grower get higher prices for his product? All the great staples of agriculture must be cheap, with a tendency to lower prices. As an offset, everything that a farmer buys is cheaper and the purchasing power of his product rises in the inverse ratio of its decline in price.

The only commodity that does not decline and will not decline is human labor. It can not decline in view of its greater potency and efficiency. Just in proportion to the larger output of labor will wages rise. This is at once the wonder and the blessing of the age. The talk of cutting the price of labor, in view of its increasing productive capacity, is, in my opinion, ill considered and unfounded. Its greater production is met by greater and ever-increasing demand and desire. The masses of to-day are better clothed and fed, with more comforts generally, than the far-off royal progenitors and predecessors of that noble Queen whose loyal subjects of Great Britain, its colonies and dependencies, are now sending up prayers of gratitude to God for her long and prosperous and glorious reign.

Sir, the Senator from Rhode Island, in his opening speech, said:

> It was, I believe, thoroughly understood throughout the country in the last political campaign that if the Republican party should again be intrusted with power, no extreme tariff legislation should follow. It was believed that in the changed conditions of the country a return to the duties imposed by the act of 1890 would not be necessary, even from a protective standpoint. * * * Nothing could be so conducive to real prosperity in this country as the well-grounded belief that there was to be no violent changes in our revenue policy for some years to come. The true friends of a protective policy do not insist upon extreme rates or any that are not necessary to equalize conditions. * * * Without relinquishing one particle of our devotion to the cause of protection, we feel that we have the right to ask that the cause shall not be burdened by the imposition of duties which are unnecessary and excessive.

The Senator then goes on to say that with the proposed new duties on beer, tobacco, and tea a surplus of $2,725,028.72 might be looked for in the next two years, and without them a deficit of $29,175,000 would arise, which "would certainly be fatal to the hopes of future success of any political party responsible for such legislation."

So, sir, we have from this high authority the following statements:

First. If the Republican party was intrusted with power, no extreme tariff measure would be adopted.

Second. That the act of 1890 was to be discarded and its rates not retained.

Mr. President, the inference to be drawn from the prayerful appeal of the Senator to deliver his party from excessive rates is that there was a hungry set in his midst clamoring for excessive rates. My experience with clamorers is that nothing but the earth and its fullness will satisfy their craving. When Solomon typified the breed of importunates by the daughters of the horse-leech, the great republic beyond the seas, with its thousands yelling, "Give, give, or we perish!" had not come into being. May the Lord deliver the Senator from Rhode Island from the rush of them who thirst after their neighbors' contribution as the hart panteth for the water brooks.

Sir, it is difficult to tell what an excessive rate is, from a Republican standpoint. "It was believed," the Senator said, "that in the changed condition of the country a return to the duties imposed by the act of 1890 would not be necessary, even from a protective standpoint." We have here, by irresistible inference, that the rates of 1890 were excessive, as it was believed that a return to them, even from a protective standpoint, was not necessary.

The distinguished Senator, who is a sincere protectionist and a man of extraordinary ability in all matters concerning duties on imports from a Republican standpoint, must have been mistaken to a great extent by the effect of the partial reductions on the lines chosen and adopted by his committee. It is clear, however, from the action of the Senate in disagreeing to a number of amendments proposed by the Finance Committee, that the rates of the House bill will be practically adopted.

I have caused to be prepared a statement, the correctness of which I vouch for, showing "Duties collected on leading articles in the year 1892-93 under the tariff law then in force; also duties that would have been collected on same had House and Senate bills of 1897 been applied in ad valorem rates."

Only articles imported in 1892-93 exceeding $1,000,000 in value are embraced in the statement. I do not think that this exclusion will appreciably affect the result of the calculations. The ad valorem rates are those used by Mr. Worthington C. Ford in the comparative statement made by him for the Finance Committee and the Senate, showing the ad valorem rates of 1890 and 1894 and those of the House bill and Senate amended bill.

It appears from the statement, which I incorporate in my remarks as a part of the same (Appendix No. 2), that the rates of duty under the act of 1890, omitting sugar, are 30.34 per cent; including sugar, 36.28 per cent. The rate of duty under the House bill, omitting sugar, is 52.60 per cent; including sugar, 58.02 per cent. The rates of duty under Senate amendments to the House bill, omitting sugar, are 48.47 per cent; including sugar, 55.88 per cent.

So, sir, instead of avoiding the excessive rates of the McKinley bill, the House bill, without sugar, exceeds them, and the Senate amendments come near equaling them. With sugar, both the House bill and the Senate amendments exceed the rates of the McKinley bill averaged all around. Is this, sir, the moderate tariff which the Senator promised us? Was he, like Lord Clive, so surrounded by the precious gems of protection glittering before his eyes and inviting the fatherly hand of government to take them for its own to distribute among the wards of the government, infants and adults, that he was astonished at his moderation?

Sir, the Republican party went to defeat under the high tariff of 1890. That was but a skirmish compared to the battle that is to be in 1900. Then will come the Waterloo of Republicanism. The Napoleon of the tariff can then meditate on the ingratitude of the Republic and the blindness of them who fail to see the blessings of paying somebody else a part of their money to make them rich.

But, sir, the alleged reductions are illusory. They are made where either no duty is necessary to keep out imports or where lowering them slightly would not let them in.

Here are some examples showing the incorrectness of the statement that any material reduction has been, in point of fact, made from the McKinley rates.

The table herein inserted (Appendix No. 3) shows that the exports of pig iron in 1894 were worth $370,243; in 1895, $227,066; in 1896, $471,803. Duty in 1890, 26.66 per cent; in 1894, 15.87 per cent; proposed duty, 15.87 per cent. Now, when we are exporting pig iron to the extent of $471,803 per annum, and when we can manufacture it and sell it abroad cheaper than any other nation, is it not absurd to claim merit for reduction of duties on it? So with regard to bar iron, structural iron and steel, castings, unbleached cotton goods, cables and cordage, boots and shoes. There is either a pretended and delusive reduction of rates on these articles, or the old duties are retained.

Did time permit, it could easily be shown by a more extended examination of the schedules that no real reduction has been made in any one of them where the burdens of the people would be lightened.

The examples given show that the American is ready to take the field against all comers. He is ready to fight Europe on its own ground. Give him a chance. Do not destroy the export of shoes by a tax on hides.

An industry that has nearly doubled its exports in two years is worth your attention, gentlemen of the other side. If, by reason of a wholly unjust and unjustifiable tax on hides, the shoe manufacturers are unable to compete with foreigners in foreign markets, their enterprise will be dwarfed, their workmen thrown out of employment. The New England shoemaker may learn a lesson from this which he would not heed coming from a Democratic source.

Sir, look at these manufacturing industries of ours. The iron, cotton, and wool industries were established in colonial days. They all prospered. Wool, when the country ceased to be pastoral and became agricultural, commenced to languish. The others have grown and prospered much less than if they had been put upon their mettle. But natural advantages have at last worked out these results, and to protect them now is a sin against sense and justice. But what of wool?

Says Mr. Worthington C. Ford, in his report on wool and manufactures of, published in 1894, and ordered by joint resolution of Congress:

If there is any fact demonstrated by the experience of the United States in the sheep industry, it is the independence, in the long run, of this interest of artificial encouragement. It has survived the restrictions of the mother country in colonial times, the penalties and discouragements of hostile legislation, as well as the progressive settlement of the country. It has followed economic law, in spite of restrictions, bounties, and financial errors, and it is to-day still pursuing its natural course, regardless of low prices, destructive foreign competition, and unprofitable returns. (Appendix No. 4.)

Below is a table showing the relative production and consumption of wool in the United States from 1860 to 1892, during which period there was a high tariff on wool.

It appears from this table that the increase of production from 1860 to 1892 was 378.84 per cent, and the increased consumption during the same period was 414.98 per cent. (Appendix No. 5.)

Also a table showing the number of sheep in the United States from 1867 to 1896, and the number of pounds of wool. It will be seen that the sheep have about held to the same number as there were in 1867, and the wool has increased from 112,000,000 pounds to 309,000,000 pounds, according to the estimate of the Department of Agriculture.

Half of our wool must be imported. We can grow neither the coarse carpet wools nor the fine Australian wool.

Tariffs have failed because nature has failed. The sheep industry has drifted from the old to the new States with extensive ranches. Sheep are raised for mutton in the old States, and the fleece is secondary.

Turn from this table to the sheep of Australia. In 1854 there were 8,144,119 sheep in New South Wales; in 1892 there were 55,445,289. In Victoria there were, in 1854, 5,332,007 sheep; in 1892 there were 12,965,306. In South Australia there were 1,768,724 sheep in 1854; in 1892 there were 7,152,047. In Western Australia there were 173,243 in 1854; in 1892 there were 1,685,500. In New Zealand there were 990,985 in 1856, and in 1892 there were 18,520,752. In Queensland there were, in 1860, 3,449,350 sheep, and in 1892 there were 23,708,310. In the Argentine Republic there were, in 1857, 15,989,405 sheep; in 1892 there were 86,800,195.

There is no use going any further. The same law that has driven wheat from the old lands of the East to the new lands of the West has driven sheep culture from the old to the new countries. Not only is the climate better in the East and parts of the Argentine Republic, but the wool is of a superior quality in the East.

Sheep need pastures for woolgrowing. They can not grow and multiply on tariff bills. The American people are called on to pay tribute of millions—some estimate the amount at $25,000,000 annually—to support 85,000 persons. The ranch kings get free pasturage on the vast plains of the Northwest, New Mexico, and Arizona.

This industry is an object lesson of the futility of trying by legislation to override nature and economic law. It were infinitely better to place wool on the free list, without any duty on the manufactured product. The woolen manufacturers of the East and North ought to see that they will lose the home market by the folly of protection. The intermountain States, with the powerful aid of Ohio, are throttling the manufacturing interests by the enormous tariff they demand on raw wool—about 60 per cent on raw to over 100 per cent on the finished product. Our manufacturers are compelled to import the fine Australian fleece and the coarse carpet wools of China and South America. In spite of tariff, our sheep will not grow them.

Never was there so conspicuous a failure of protection. Never have a patient people borne a wrong so long.

I insert a table (Appendix No. 6), with comparative scale of prices, showing the tariff changes, with the market price of fine fleece wool for each year from 1847 to 1897. This table shows conclusively that during the low tariff of 1847 to 1855 and from 1855 to 1861, under practical free trade, wool was higher than under the high tariffs of 1867 and 1890.

It will be seen that the tariff from 1861 to 1867 was almost nothing, and that, excluding the years from 1872 to 1875, when there was a wool famine, the prices under practically free wool were higher than under highly protected wool from 1867 down to 1894. These tables ought to convince anybody that the tariff on wool is an abomination.

Sir, the industries that have flourished in the United States are those grounded on natural advantages. Our wheat and cotton and corn never needed and can not prosper under a tariff. It is so of the leading manufacturing industries—iron, cotton, wool, and wood.

There is no country on the globe comparable to ours in the extent and variety of its resources. We have more coal and iron, copper and lead, and lime, and cotton, and wood, than any other advanced nation. We have abundant and cheaper transportation. We have large cities on the seaboard and in the interior. We have the most industrious and most inventive population on the globe. Heretofore lands have been so cheap and so plentiful, notwithstanding the tributes paid by the farmers to the manufacturers, that they could pay tribute and still prosper. But agriculture, in the natural order of progress, is declining, and manufacturing increasing.

From the following excerpts from the Statistical Abstract of 1896 it will be seen that the value of our agricultural exports increased from $256,560,972 in 1860, to $569,879,297 in 1896. In 1860 they were 81.13 per cent of our total exports, and in 1896, 66.02 per cent. In 1860 our exports of domestic manufactures were $40,345,893, in 1896 they were $228,571,178. It is estimated that they will exceed $300,000,000 at the end of the fiscal year. The percentage to our total exports was 12.76 per cent in 1860, and in 1896, 26.48 per cent. In mining, other than the precious metals, the increase is more pronounced. In 1860 the value of the coal, etc., mined was $999,465, which was 31 per cent. In 1896 the value was $20,045,654, constituting 2.32 per cent of our domestic exports.

It is estimated that the value of domestic manufactures this year will be in the neighborhood of 30 per cent of the total export. It is therefore apparent that manufacturing is in the upward movement and agriculture in the downward. Mulhall says:

Nearly all American manufactures are produced by machinery, while in Europe more than half is hand work. The result is that the output per hand is much greater, namely:

Country.	Value.	Number of hands.	Pounds per hand.
United Kingdom	£876,000,000	8,125,000	107
France	596,000,000	4,480,000	133
Germany	600,000,000	8,830,000	79
Austria	328,000,000	4,470,000	73
Other States	1,076,000,000	12,435,000	86
Total	3,566,000,000	38,400,000	383
United States	1,952,000,000	5,400,000	360

If the American laborer turns out £360 sterling and the Englishman £107 sterling of work per annum, who is the cheaper man? Pauper labor may be able, by hand methods, to compete with intelligent American labor, which I do not concede, but can not contend against American machinery, run by American brains and skill.

Notwithstanding the fact that we are exporting coal, iron and products of iron, cotton fabrics, wood and wooden fabrics, and other manufactures to the extent of about $300,000,000 per annum, after supplying home demands, we are called upon to place heavy duties on all these articles. When driven to admit, from the comparative statement containing importations for 1893-1896, that the duties are prohibitory, the other side are either dumb or evasive.

Sir, the end of protection is at hand. The energy and industry, capital, and labor of this country must seek an outlet for their surplus product. We are shipping pig iron to England, our cotton fabrics to the East, our agricultural implements to the four quarters of the globe. Iron is king. Cotton has been dethroned. Our supply of that great material which transforms the earth, conquers the sea, and invades the secret places of the air is inexhaustible; so is our coal and lime and fiber. We are the masters of the trade of the world. In spite of tariffs our industries have overleaped their walls and by natural force are challenging all competitors on even terms.

Let everybody come to our shores with their wares and their produce and exchange them with our people in such terms as they may choose.

Sir, this bill will soon be a law. There have been brave words spoken of the coming prosperity. Prosperity does not come from wishes or from prophecy. Prosperity comes from the trade which the other side are trying to destroy.

Sir, lately a treaty of arbitration between Great Britain and the United States was pending before this body. The unhappy fate of that treaty is not yet forgotten by the nation. But, sir, as broader trade relations engender good will and mutual esteem among the nations of the earth, may we not indulge the hope that, after this saturnalia of paternalism is over, the silken tie of commerce will bind this with all the nations in profitable, healthy, independent, free intercourse, more potent to prevent bloody conflicts than the parchment obligations which while recognizing the danger of seek to defer the resort to arms?

Such, sir, is the hope that encourages me—springing eternal from a Democratic breast.

To sum up my position:

I believe in a tariff on luxuries.

I believe in excise taxes.

I believe in an income tax.

I believe in a tariff on imports placed so as to put money in the coffers of the Government and not in the pockets of individuals.

I do not believe in protection save for the purpose of protecting each citizen in the enjoyment of legal, constitutional, and natural rights.

APPENDIX No. 1.

MEMORANDA FROM THE RECORDS OF THE TREASURY DEPARTMENT.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., September 1, 1896.

During the fiscal year 1888—ended June 30, 1888—the revenues of the Government were $111,341,273 in excess of its expenditures.

During the fiscal year 1889—ended June 30, 1889—the revenues were $87,761,080 in excess of the expenditures.

During the fiscal year 1890—ended June 30, 1890—the revenues were $85,040,271 in excess of the expenditures.

The so-called McKinley tariff act took effect on the 6th day of October, 1890, and during the fiscal year 1891—ended June 30, 1891—the revenues were $26,538,541 in excess of the expenditures.

During the fiscal year 1892—ended June 30, 1892—the revenues were $9,914,453 in excess of the expenditures.

During the fiscal year 1893—ended June 30, 1893—the revenues were $2,341,674 in excess of the expenditures.

During the fiscal year 1894—ended June 30, 1894—the expenditures exceeded the revenues to the amount of $69,803,260.58, notwithstanding the fact that the expenditures of the Government were $15,952,674 less than in the preceding year. The McKinley bill was in force during the whole of the fiscal year 1894.

The so-called Wilson tariff act took effect on the 28th day of August, 1894, and the revenues for the fiscal year 1895—ended June 30, 1895—were $42,805,223.18 less than the expenditures; and during the fiscal year 1896—ended June 30, 1896—the revenues were $25,203,245.70 less than the expenditures.

Receipts from customs and total receipts from all sources.

UNDER M'KINLEY ACT.

Period.	Customs.	All sources.
Twelve months ending September 30, 1891	$196,794,357.80	$371,932,536.81
Twelve months ending September 30, 1892	185,838,859.19	364,847,501.72
Twelve months ending September 30, 1893	189,182,905.46	385,534,609.55
Eleven months ending August 31, 1894	112,590,939.77	292,078,342.91

UNDER WILSON ACT.

Twelve months ending August 31, 1895	$161,301,169.35	$295,061,022.16
Twelve months ending August 31, 1896	154,218,813.94	321,720,319.37

CONDITION OF THE TREASURY MARCH 1, 1889, AND MARCH 1, 1893.

On the 1st day of March, 1889, the beginning of President Harrison's Administration, the available funds in the Treasury, exclusive of the $100,000,000 gold reserve, were as follows:

Agency account	$64,502,445.02
Net balance in Treasury	165,846,471.10
Total	230,348,916.12

On the 1st day of March, 1893, the beginning of the present Administration, the available funds in the Treasury, exclusive of the $100,000,000 gold reserve, were as follows:

Agency account	$58,365,832.90
Net balance in Treasury	24,084,742.28
Total	82,450,575.18

In addition to the ordinary revenues received during President Harrison's Administration, there was covered into the Treasury $54,207,975.75, which had been held in trust under the law as a fund for the redemption of national-bank notes. This proceeding was authorized by the act of July 14, 1890, commonly known as the Sherman Act.

PUBLIC DEBT PAID BY THE TWO ADMINISTRATIONS.

From the 1st day of March, 1885, the beginning of Mr. Cleveland's first Administration, to March 1, 1889, the public debt was reduced $341,448,449.20; and from March 1, 1889, the beginning of Mr. Harrison's Administration, to March 1, 1893, the reduction of the public debt was $230,527,666.10.

The amount of free gold in the Treasury on the 7th day of March, 1893, when the present Secretary took charge of the Department, was $100,982,410.

Values of imports and exports of merchandise.

UNDER M'KINLEY ACT.

Period.	Imports.	Exports, domestic and foreign.
October 1, 1890, to September 30, 1891	$824,716,842	$923,362,015
October 1, 1891, to September 30, 1892	837,280,798	908,226,775
October 1, 1892, to September 30, 1893	830,150,318	875,332,434
October 1, 1893, to August 31, 1894*	603,865,806	700,706,509

*Eleven months.

UNDER WILSON ACT.

September 1, 1894, to August 31, 1895	$759,108,416	$806,670,050
September 1, 1895, to July 31, 1896	667,695,637	837,902,519

Excess of exports of merchandise alone and of merchandise and silver.

UNDER M'KINLEY ACT.

Period.	Merchandise.	Merchandise and silver.
October 1, 1890, to September 30, 1891	$98,645,173	$103,537,310
October 1, 1891, to September 30, 1892	160,945,977	175,091,707
October 1, 1892, to September 30, 1893	46,182,116	68,072,811
October 1, 1893, to August 31, 1894	186,840,613	219,546,927

UNDER WILSON ACT.

September 1, 1894, to August 31, 1895	$47,561,634	$86,960,538
September 1, 1895, to July 31, 1896	150,106,882	194,435,730

Annual average excess of exports of merchandise alone.

Under McKinley Act of 1890	$123,153,470
Under Wilson Act of 1894	98,834,258

Annual average excess of exports of merchandise and silver.

Under McKinley Act of 1890	$141,712,189
Under Wilson Act of 1894	140,698,134

APPENDIX No. 2.

Duties collected on leading articles in the year 1893-'93 under the tariff then in force, also duties that would have been collected on same had House and Senate bills of 1897 been applied, in ad valorem rates.

Article.	Ad valorem duty rate. Law 1890.	House.	Senate.	Paragraph.	Value of import.
	Per cent.	*Per cent.*	*Per cent.*		
Sugar not above 16, cane	F.	72	75	206	$1,019,514.31

All articles, including sugar not above 16	50.28	56.02	55.88		4,108,838.73

APPENDIX No. 3.

Statement showing increased exports of certain leading articles and corresponding decline of tariff rates.

Article.	Exports (fiscal years).			Duty.		
	1894.	1895.	1896.	Act of 1890.	Act of 1894.	Senate bill.
				Per ct.	*Per ct.*	*Per ct.*
Pig iron	$370,243	$377,060	$471,803	26.66	15.87	15.87
Bar iron	130,783	143,221	170,080	(26.39 to 61.77)		(27.23 to 59.32
Structural iron and steel:*						
Classified as "ingots, bars, and rods of steel"	29,294	95,471	125,151	74.64	45.44	41.47
Classified as "all other manufactures of iron and steel"	4,968,583	5,700,669	7,048,893			

* There is such a decided falling off in the imports of structural iron and steel as to indicate that the control of the trade is in the hands of the domestic producers. The imports for the fiscal year 1893 were $135,546, and for the fiscal year 1896, $14,036 (see page 52, Ford's Comparison), showing that the control of the trade is in the hands of the domestic producers.

Statement showing increased exports of certain leading articles and corresponding decline of tariff rates—Continued.

Article.	Exports (fiscal years).			Duty.		
	1894.	1895.	1896.	Act of 1890.	Act of 1894.	Senate bill.
				Per ct.	*Per ct.*	*Per ct.*
Castings	$491,928	$562,988	$794,314	19.81	8.24	8.79
Pipe				26.97	27.63	17.98
Vessels, etc				35.33	24.90	23.57
Hollow ware, etc						
Cotton, manufactures of:*						
Cloth, unbleached	7,039,851	7,084,678	9,539,199	(*)	(*)	(*)
Cables and cordage	6,225,063	6,585,328	8,556,333	(17.00 to 32.00	10.00 to 35.00	17.45 to 20.72
Boots and shoes†	777,354	1,010,228	1,436,626	25	20	25

* Duties in the main remain the same in the Senate bill as under the present law, and less than in the McKinley Act.

† It will be observed here that the Senate bill has not reduced the tariff rate in this case. The rate, however, is not an advance over the McKinley Act, and is a very small rate and evidently not intended to be protective. The imports in this line are very small, and there can be no dispute, I believe, but that we control the market in this line of goods.

APPENDIX No. 4.

1896	38,298,783		272,474,708

APPENDIX No. 6.

Showing the tariff changes, with the market price of fine fleece wool, for each year during fifty years, from 1847 to 1897.

[For convenience of comparison the specific tariff rates have been changed to ad valorem by assuming a probable value for wools imported. The market price is that given by James Lynch and George William Bond, up to and including 1883. Subsequent to that date, the prices are those quoted by Mauger & Avery, of New York. The currency values for period when gold was at a premium are reduced to gold.]

Year.	Duty.	Comparative scale of duties.-	Comparative scale of prices.	Price.

* This tariff admitted nearly all the fine wools of South America and Cape of Good Hope, and many of those grown in Australia, free. Wool costing over 20 cents was taxed 24 per cent ad valorem.

† Wool costing over 24 cents, 9 cents per pound. As under this clause only very high cost scoured wools would be selected, the duty might be less than 20 per cent.

The PRESIDING OFFICER (Mr. CARTER in the chair). The pending question is on the amendment of the Senator from Arkansas [Mr. JONES] to the amendment of the committee, which will be stated.

The SECRETARY. On page 122, line 13, paragraph 364, after the word "wholly," strike out "or in part;" and in the same line, after "wool," insert "or of which wool is the component material of chief value;" so as to make the paragraph read:

364. On cloths, knit fabrics, and all manufactures of every description made wholly of wool, or of which wool is the component material of chief value, not specially provided for in this act, valued at not more than 40 cents per pound, the duty per pound shall be three times the duty imposed by this act on a pound of unwashed wool of the first class; valued at above 40 cents per pound and not above 70 cents per pound, the duty per pound shall be four times the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto, upon all the foregoing, 50 per cent ad valorem; valued at over 70 cents per pound, the duty per pound shall be four times the duty imposed by this act on 1 pound of unwashed wool of the first class and 55 per cent ad valorem.

Mr. WHITE. I desire to inquire of the Senator from Iowa, who is no doubt well informed on this subject, whether it is his opinion that there is now on hand in this country a supply of raw wool sufficient to meet the manufacturing demand for the coming year. That assertion has been made several times on the other side of the Chamber. I inquire of the Senator from Iowa if he has any information in relation to that matter?

Mr. ALLISON. I have no special information, and can speak only in a general way. I have seen several letters from Mr. Justice, who is a large wool dealer in Philadelphia, and I have seen other letters, stating that there is probably now or will very soon be a year's supply, or nearly a year's supply, of raw wool.

Mr. WHITE. I am inquiring for information. If that be true, upon what ground can any compensatory duty for the next twelve months be justified? Compensation is given upon the theory, as was stated by the Senator from Arkansas very clearly yesterday, that the tariff tax will result in higher rates, and that therefore it is but just to give the manufacturers compensation; but if it be true that wool has been imported and is now here, and that no duty is to be paid upon it, is it not plain that an amendment such as the one suggested by the Senator from Arkansas, providing that this compensatory duty shall not go into effect for a year, is absolutely just? I can not see any argument to the contrary.

Mr. ALLISON. I was under the impression that that amendment was voted down yesterday.

Mr. WHITE. Exactly; but that does not prevent a renewal of the proposition upon other sections, and it is scarcely an answer to the interrogatory to say that the question was voted on yesterday. I am looking for light on the subject.

Mr. ALLISON. That is scarcely an answer, but another answer is as to what would be done at the end of twelve months. Of course there will be a constant supply of wool on hand, and there will be the same supply, probably, at the end of twelve months that there is now. That is the only answer I know of.

Mr. WHITE. That, I respectfully submit, is not an answer at all, because the wool is now in the country and has not paid duty; of course it will not pay it; but the wool brought in here twelve months hence must pay duty if this bill becomes a law.

Mr. HOAR. The price will be raised by the tariff before the manufacturer gets the wool.

Mr. WHITE. But the wool is already here. Presumably the

manufacturers, who look out for this enactment, have brought it here and have it now in stock. We have been informed in the Senate by Senators on the other side of the Chamber that the warehouses of the country are full of a stock of wool that was imported for manufacturing purposes. It was admitted at the time the statement was made that no duty would be paid upon that wool, but it was said that was one of the unfortunate circumstances which must always attend a revision of the tariff. But that is no answer, because here is a plain, adequate remedy in sight, the substitution of a few words in this paragraph.

Now, Mr. President, there is another point upon which I desire information. I desire to inquire of the Senator from Iowa whether the rates provided in paragraph 363 are not greater than in the McKinley Act? As I read the McKinley Act, the rates here are greater. Instead of 40, the rate of the McKinley Act was 35, and instead of 35 it was 30. The duty upon wool is not greater, and why should the compensatory duty be greater? Is it a fact that under the McKinley law the manufacturers were not treated fairly, and that it is necessary now to add something? I have the McKinley law here. The language is not absolutely identical, but very nearly so. Paragraph 391 of the McKinley Act, which, I take it, refers to the same subject, is as follows:

On woolen and worsted yarns made wholly or in part of wool, worsted, the hair of the camel, goat, alpaca, or other animals, valued at not more than 30 cents per pound, the duty per pound shall be two and one-half times the duty imposed by this act on a pound of unwashed wool of the first class, and in addition thereto, 35 per cent ad valorem.

Mr. ALLISON. That is the duty on yarns. This duty is on fabrics.

Mr. WHITE. No; I am referring now to paragraph 363 of the bill under consideration.

Mr. ALLISON. What is the paragraph of the McKinley Act?

Mr. WHITE. It is the paragraph on yarns made wholly or in part of wool.

Mr. ALLISON. What is the paragraph in the act?

Mr. WHITE. Paragraph 363 of the bill under consideration and paragraph 391 of the McKinley Act. The phraseology is not the same, but there is a difference in the rate in this, that the proposed bill provides a larger rate than the McKinley Act, and it can not be justified, because the rate on wool is, if anything, less than in the McKinley Act, while the suffering manufacturer is here compensated for something in addition to that which he received under the McKinley Act. I am inquiring as to the reason for it. The duty on wool under the McKinley Act was 11 cents a pound and here it is 10 cents.

Mr. ALLISON. The paragraph the Senator quotes from is paragraph 391 of the McKinley Act?

Mr. WHITE. Yes, sir.

Mr. ALLISON. Which provides that—

On woolen and worsted yarns made wholly or in part of wool * * * valued at not more than 30 cents per pound, the duty per pound shall be two and one-half times the duty imposed by this act on a pound of unwashed wool of the first class.

Mr. WHITE. The valuation here is 35 cents per pound.

Mr. ALLISON. Certainly it is a higher bracket than 30; instead of 30 cents, it is 35 in this bill; which shows that the rate is much lower.

Mr. WHITE. It has been stated to me that the rate is higher. The Senator may be better informed about it than I.

Mr. ALLISON. The Senator will see that it is on woolen and worsted yarns "valued at not more than 30 cents per pound, the duty per pound shall be two and one-half times the duty imposed by this act on a pound of unwashed wool * * * valued at not more than 35 cents per pound, two and one-half times." So that the rate is much lower.

Mr. WHITE. The Senator will observe that the ad valorem duty in paragraph 391 of the McKinley law on woolen and worsted yarns is 45 per cent, and here it is 40 per cent on all.

Mr. ALLISON. Very well. Then "valued at more than 30 cents and not more than 40 cents per pound, the duty per pound shall be three times the duty imposed by this act on a pound of the unwashed wool of the first class; and in addition thereto 35 per cent ad valorem."

Mr. WHITE. Yes.

Mr. ALLISON. Then it continues:

Valued at more than 40 cents per pound, the duty per pound shall be three and one-half times the duty imposed by this act on a pound of unwashed wool of the first class, and in addition thereto 40 per cent ad valorem.

The ad valorem is an increase of 5 per cent, and in the specific duty there is a reduction.

Mr. WHITE. The duty on wool is less.

Mr. ALLISON. The specific duty is less and the compensatory duty is less.

Mr. WHITE. I presume the dollar will have the same appearance, no matter what it comes in under. It is a decrease.

Mr. ALLISON. I do not think it is.

Mr. JONES of Arkansas. The immediate amendment under consideration is the proposition to insert, in line 13, the words "or of which wool is the component material of chief value," in paragraph 364; and after the word "wholly," in the same line, to strike out the words "or in part."

Mr. President, attention was called to the fact on yesterday that when the flax schedule was constructed, in every instance it was said as to certain fabrics of flax, hemp, or ramie, where the material of chief value in the mixed fabric of flax and cotton was cotton, that it should pay as a cotton fabric, and should not have the tariff that was intended to be put on the flax fabric. That is also the case in the silk schedule. Where there is a mixture of silk and cotton or other material, in every instance the paragraph provides that where a fabric is composed of silk or partly of silk, in which silk is the component material of chief value, then the rate of taxation put on the silk fabric shall stand; but if the component material of chief value is cotton, the material is not treated as a silk fabric at all, and the rates are put upon it as a cotton fabric.

In this wool schedule it seems to me that there is a singular disregard of the facts that enter into this schedule. When an American manufacturer manufactures a piece of cloth which weighs 10 pounds, Congress fixes a rate of protection on that, and this law proposes to give the manufacturer a tariff of 50 per cent to protect him in the manufacture of these woolen cloths. Fifty per cent goes into the manufacturer's tariff as the manufacturer's protection clear through this bill. If an American manufacturer manufactures a piece of cloth which weighs 10 pounds, he is satisfied, as we understand this bill, and its friends are satisfied, that he shall have a manufacturer's protection of 50 per cent; but when he has manufactured 10 pounds of cloth he says, "I manufactured this cloth, and while I am content with the 50 per cent protection I get as a manufacturer, yet I have been handicapped by being compelled to pay a tariff on my raw material, which I ought to be indemnified for."

Then you go about ascertaining what he is entitled to. His statement is that it requires 3 pounds of wool in the grease to make 1 pound of wool scoured or in the cloth, and that for every 10 pounds of cloth the manufacturer requires he has to buy 30 pounds of wool in the grease. That is under the paragraph as you propose it. If that be true, there must be 10 cents a pound paid upon the wool in the grease, and the manufacturer must have paid tariff on the amount of wool used in the manufacture of 10 pounds of cloth at 10 cents per pound on 30 pounds of wool, making $3, which he has paid as the tariff on his raw material. If these 10 pounds of goods are worth $10, 50 cents protection will be a protection of $5 as the manufacturer's protection. But he says he must have that without having it decreased by the $3 taken to pay the tariff on the raw wool. Hence he must have, in addition to the tariff, an ad valorem equivalent to the amount of tariff he has been compelled to pay on his raw material.

You say that, having used 30 pounds of wool in the grease to make 10 pounds of cloth, the 10 cents a pound paid by the manufacturer as a tariff on the wool in the grease must be allowed him. So we fix the tariff that for every pound of cloth in the manufacture there shall be a tariff amounting to three times the amount of the tariff that was paid upon a pound of raw wool. So there is a tariff of 30 cents a pound on the cloth, 10 pounds making $3, and the tariff is $3 specific, in addition to the 50 per cent tariff to compensate for the $3 paid on the raw wool when the manufacturer buys his wool.

Mr. President, if this were true, if the manufacturer actually used 30 pounds of raw wool in making 10 pounds of woven wool, the argument would be all right, and, from the standpoint of Senators on the other side, be just and fair; but suppose, as a matter of fact, that in that 10 pounds of cloth, instead of having 10 pounds of wool he only has 5 pounds of wool and 5 pounds of cotton, where, then, can be the justification of giving him $3 protection for a tariff when he pays but $1.50, all he has used being 5 pounds of wool in his manufacture of cloth—one-half wool and one-half cotton. There are 5 pounds of wool and 5 pounds of cotton in that 10 pounds of cloth, and the tariff he paid for the material he used in making the 5 pounds of cotton cloth and that he used in making 5 pounds of woolen cloth, one-half of the woolen fabric, would take, instead of 30 pounds of wool in the grease, but 15 pounds of wool in the grease; and when you propose to give him a compensation of $3 where he has paid but $1.50, you are treating the American public unjustly and unfairly, and increasing his protective tariff beyond what he himself says is necessary for him to have.

The argument is stronger still if there is but one-tenth of wool, and yet under the terms of this bill you propose that if there is one-tenth wool you shall pay the full amount as if the whole of it was composed of wool.

Mr. President, I submit that in a fabric where there is but one-tenth wool it is not fair that it should be treated in the same way as if it were composed wholly of wool; and that where wool is the material of least value, that that fabric should be considered as a

cotton fabric and treated as such, and these wool tariffs ought not to go on it. Take the 50 per cent, if you choose; but you have no right to give him a compensation for ten times as much wool as he puts into his fabric, or four times as much, or twice as much.

I respectfully submit that these facts can not be gainsaid or denied, and you can not get away from them. You are under the guise, under the pretense, of giving a compensatory duty to the manufacturer to compensate him for the wool he puts in his material, giving him ten times the amount of wool in some cases on which a tariff has been paid to the Government. In this particular case to-day you are passing this bill; and whenever it becomes a law the American manufacturer takes his 30 pounds of wool, upon which he has not paid one cent of duty, and yet you propose to put a tariff upon the fabric in addition to the 50 per cent that he says is all he wants, in addition to the 50 per cent which is all that the manufacturers claim they are entitled to.

In addition to that, you propose to put a specific duty, under the pretense of compensating him for the tariff he has paid upon wool, which he has not paid, and which you know he has not paid, and which you have admitted on the floor of the Senate that he has not paid, and yet you levy this tax upon the people to make woolen manufacture more profitable, and instead of giving him 50 per cent, you propose to give him 80 or 90 per cent.

The plain matter of fact in this case can not be evaded; it can not be dodged. If the words I have proposed, "or of which wool is the material of chief value," be inserted, and then these rates go into effect, they will be much less unjust and unfair than the terms of the bill as proposed by the committee.

The PRESIDING OFFICER (Mr. CARTER in the chair). The yeas and nays having been ordered on the amendment proposed by the Senator from Arkansas [Mr. JONES] to the amendment of the committee, the Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I am paired with the Senator from Oregon [Mr. MCBRIDE].

Mr. HAWLEY (when his name was called). I am paired with the Senator from Tennessee [Mr. BATE]. I believe he is still absent, and so I shall not vote. If he were here, I should vote "nay."

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA].

Mr. WELLINGTON (when his name was called). I inquire if the Senator from North Carolina [Mr. BUTLER] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. WELLINGTON. Then I withhold my vote, as I am paired with that Senator.

The roll call was concluded.

Mr. JONES of Arkansas. My colleague [Mr. BERRY] is detained from the Senate Chamber by public business. If he were present, he would vote "yea." He is paired with the Senator from Illinois [Mr. MASON].

Mr. GEAR. I inquire if the senior Senator from New Jersey [Mr. SMITH] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. GEAR. Then I withhold my vote, as I am paired with that Senator. If he were present, I should vote "nay."

Mr. MURPHY. I am paired with the Senator from New Hampshire [Mr. CHANDLER], and therefore withhold my vote.

Mr. MORRILL. I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. HANSBROUGH. I transfer my pair with the senior Senator from Virginia [Mr. DANIEL] to the Senator from Nevada [Mr. JONES], and vote "nay."

Mr. PASCO. I wish to announce that the Senator from Kentucky [Mr. LINDSAY] is necessarily absent from the city. He is paired with the senior Senator from Michigan [Mr. MCMILLAN].

Mr. SEWELL (after having voted in the negative). I inquire if the Senator from Wisconsin [Mr. MITCHELL] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. SEWELL. Then I withdraw my vote, as I am paired with that Senator.

The result was announced—yeas 23, nays 32; as follows:

YEAS—23.

Allen,	Gorman,	Martin,	Tillman,
Bacon,	Harris, Kans.	Mills,	Turpie,
Caffery,	Jones, Ark.	Morgan,	Vest,
Clay,	Kenney,	Pasco,	Walthall,
Cockrell,	McLaurin,	Pettus,	White.
Faulkner,	Mallory,	Roach,	

NAYS—32.

Allison,	Foraker,	Nelson,	Shoup,
Burrows,	Frye,	Penrose,	Spooner,
Carter,	Gallinger,	Perkins,	Teller,
Clark,	Hale,	Platt, Conn.	Thurston,
Davis,	Hansbrough,	Platt, N. Y.	Turner,
Deboe,	Hoar,	Pritchard,	Warren,
Elkins,	Lodge,	Proctor,	Wetmore,
Fairbanks,	Mantle,	Quay,	Wilson.

NOT VOTING—34.

Aldrich,	Daniel,	Kyle,	Pettigrew,
Baker,	Gear,	Lindsay,	Rawlins,
Bate,	George,	McBride,	Sewell,
Berry,	Gray,	McEnery,	Smith,
Butler,	Hanna,	McMillan,	Stewart,
Cannon,	Harris, Tenn.	Mason,	Wellington,
Chandler,	Hawley,	Mitchell,	Wolcott.
Chilton,	Heitfeld,	Morrill,	
Cullom,	Jones, Nev.	Murphy,	

So the amendment of Mr. JONES of Arkansas to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question recurs on the adoption of the amendment of the committee.

Mr. JONES of Arkansas. I move to amend the amendment, in line 17, after the word "class," by inserting "for each pound of wool contained in said fabric;" after the word "class," in line 20, by inserting the same words; and after the word "class," in line 24, by inserting the same words.

The PRESIDING OFFICER. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. In paragraph 364, page 122, line 17, after the word "class," it is proposed to insert "for each pound of wool contained in said fabric:" in line 20, after the word "class," to insert "for each pound of wool contained in said fabric;" and in line 24, after the word "class," to insert "for each pound of wool contained in said fabric."

Mr. JONES of Arkansas. Mr. President, the first paragraph will read, if my amendment is adopted, as follows:

364. On cloths, knit fabrics, and all manufactures of every description made wholly or in part of wool, not specially provided for in this act, valued at not more than 40 cents per pound, the duty per pound shall be three times the duty imposed by this act on a pound of unwashed wool of the first class for each pound of wool contained in said fabric.

I feel absolutely confident the Senator from Iowa [Mr. ALLISON] is so perfectly fair and just that he will accept this amendment. He does not want to give the manufacturers compensation for tariffs on wools which they do not pay. I am sure he is too fair a man to desire any such thing. When a fabric is made wholly of wool, then in 3 pounds of it there will be compensation for three times the tariff on a pound of unwashed wool; but if a fabric is made one-half of wool and one-half of cotton, then they will have a tariff on a pound of the mixed fabric for three times the amount of wool that is in the fabric; and the public will then pay the compensatory duty of 3 for 1 on every ounce of wool that goes into the fabric, and will pay a compensatory duty on wool for cotton that goes into the fabric, which would be 6 to 1 if it was half and half, and which would be 10 to 1 if it were nine-tenths cotton and only one-tenth wool under the bill as it stands at this time.

Mr. President, as I have pointed out already, and it was admitted by Senators upon the other side, it only takes 2 pounds of unwashed wool to make a pound of scoured wool; and nobody denies it. The wool that is imported in the largest quantity and which is consumed by the manufacturers does not take 3 pounds to make 1 pound of scoured wool; it only takes 2 pounds to make 1 pound of scoured wool, and the manufacturer pays a tariff on only 2 pounds of wool—that is, when he gets all wool in the fabric. This proposition will not even get rid of that evil, and it will let the manufacturer get 3 for 1, although he only pays 2 for 1 for every ounce of wool or for every pound of wool that enters into his fabric; and certainly nothing more ought to be asked.

Mr. ALLISON. How do you ascertain that?

Mr. JONES of Arkansas. You ascertain it like you ascertain anything else. There is not the slightest difficulty in figuring out the proportion of wool in the fabric. There is no trouble in ascertaining the amount of wool and the amount of cotton that is contained in the fabric, and the experienced custom-house officers can tell without difficulty the proportion of each.

The idea runs through the bill in numberless other instances, and the provision appears again and again. How can you determine about the value unless by weight? You put in the silk schedule everywhere and the flax schedule everywhere that if flax or silk is the component material of chief value—which is a question that is much more difficult to determine than to determine the question of weight—then the tax shall be governed by that. In this case you have only to determine as to the weight to determine the tax, which is a less complicated and difficult question than to determine the value. If in mixtures of flax or silk with other materials their values can be ascertained, how much easier would it be to ascertain the weight of wool that goes into a fabric.

Mr. ALLISON. Mr. President, I wish to say but a word respecting the amendments proposed by the Senator from Arkansas. The Senator from Arkansas calls attention to the amendment which has just been defeated, because he says the woolen manufacturer will receive an unjust compensatory duty, as we have provided here for three times the duty, although nine-tenths or three-fourths of the material may be of cotton. I do not intend to go into that this morning, having spoken briefly on the question last night; but the difficulty of dealing with that method as respects

woolen fabrics lies in the fact that if wool is not the chief component or measure of value these fabrics, if they contain a greater value of cotton, will be thrown over into the cotton schedule.

Mr. JONES of Arkansas. That, as the Senator suggests, has been disposed of, but the question now is one of weight and not of value.

Mr. ALLISON. Very well; and I am disposing of this question now. That was objectionable for the reason that then it would be a cotton fabric and come in at 45 per cent ad valorem, and those who manufacture such goods abroad would bring in in the form of free wool under the cotton classification and under the cotton schedule probably half the fabrics that are used, because all they would have to do would be to provide for 50½ per cent of cotton as the component material of chief value, and then they would bring in 49½ per cent of wool free of duty, and in that way use the foreign wool that we are trying in this bill to protect our farmers against.

It so happens that in this schedule at least the manufacturers and the farmers are united in interest, for the reason that unless our farmers who produce wool can find a market for it with our own manufacturers they will have practically no market at all. Therefore, if they are to produce wool in this country under the protective system, they must have it practically manufactured in this country under the protective system as against free wool abroad. I know that is not the purpose of our friends upon the other side. If we are to have a duty upon wool and woolens, we must correlate those duties so that our woolen manufacturers will be protected against the inundation of free wools from abroad under the guise of cotton fabrics.

Mr. JONES of Arkansas. I merely want to suggest that, admitting for the sake of argument—which I do not—the Senator's position to be exactly correct, then he can have no objection to this proposition, because this proposition is to make the compensation on the wool actually contained in the goods whether it be much or little.

Mr. ALLISON. The Senator proposes that this compensatory duty shall be upon the wool in a mixed fabric, and upon the weight of the wool. I should like to know by what method any expert or any appraiser can take a piece of goods with cotton warp, if you please, and know how much the wool in the fabric will weigh, and how much the cotton will weigh, unless he unravels it all. So it seems to me here is another indirect method whereby it is attempted to evade or avoid the very question in which our wool producers and woolen manufacturers are interested in common as respects these duties.

Mr. JONES of Arkansas. Will the Senator from Iowa permit me to ask him a question at this point? Paragraph 344 says:

> Woven fabrics or articles not specially provided for in this act, composed of flax, hemp, or ramie, or of which these substances or either of them is the component material of chief value, weighing 4 ounces, etc.

How is the custom-house officer to determine which is the component material of chief value? Say, for instance, the warp is cotton, the filling linen, or the warp half cotton and the filling mixed linen and cotton. How is the custom-house officer to tell which is the component material of chief value? If he can not tell how the woolen fabric is made, he can not tell how the flax fabric is made, and he can not tell how the silk fabric is made; and yet the Senator has brought propositions here which require him to do that in the silk schedule, and in the flax schedule, and if he is competent to do that in those cases, what is to prevent him from doing it in the woolen schedule? I should be glad to have the Senator explain how he can do it in the one and not in the other.

Mr. ALLISON. The Senator is mistaken wholly as to what is to be done. It is one thing to ascertain the component material of chief value, and another thing to ascertain how much the wool in a fabric weighs. The component material of chief value can easily be ascertained; but suppose he was required to ascertain whether ten threads of cotton in the fabric weighed an ounce or the fraction of an ounce, and the other material three-quarters or a whole ounce.

Mr. JONES of Arkansas. Must he not first ascertain how much flax there is in the fabric before he determines what is the component material of chief value?

Mr. ALLISON. No, sir; certainly not.

Mr. JONES of Arkansas. How does he find the value?

Mr. ALLISON. Because the flax is worth a great deal more than a cotton fabric.

Mr. JONES of Arkansas. But it is a question of the component material of chief value and not the fabric. It is the component material that makes the value.

Mr. ALLISON. Certainly; which is flax.

Mr. JONES of Arkansas. The flax thread. Then he has to find how many flax threads there are in the material and measure their value by the value of the flax, and determine whether it is the component material of chief value. So in silks. You are bound to analyze it. You must first find the weight, and then compare it with the whole, and it is easier to get the weight than the value, because the question of value is to be determined after you find the weight, and it is more a matter of opinion than is the weight. The weight can be determined by scales. The value is a matter of opinion, to some extent, and in a constantly fluctuating market it is much more difficult to determine what is the value of a thing after you find the weight than it is to find the weight. But you can not find the value until you first find the weight, either in flax or silk.

Mr. ALLISON. The Senator from Arkansas differs with all other experts on the subject. That is all I have to say.

Mr. JONES of Arkansas. I am not an expert. I think that is the plain common-sense view of the situation.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arkansas to the amendment of the committee.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I am paired with the Senator from Oregon [Mr. MCBRIDE].

Mr. CLARK (when his name was called). I am paired with the Senator from Kansas [Mr. HARRIS]. I do not see him in the Chamber, and therefore withhold my vote.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH].

Mr. HANSBROUGH (when his name was called). I again announce the transfer of my pair with the senior Senator from Virginia [Mr. DANIEL] to the Senator from Nevada [Mr. JONES], and I will vote. I vote "nay."

Mr. HAWLEY (when his name was called). I announce for the day my pair with the Senator from Tennessee [Mr. BATE].

Mr. MURPHY (when his name was called). I am paired with the Senator from New Hampshire [Mr. CHANDLER].

Mr. RAWLINS (when his name was called). I am paired with the junior Senator from Ohio [Mr. HANNA].

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER]. If he were present, I should vote "nay."

Mr. WELLINGTON (when his name was called). I have a general pair with the Senator from North Carolina [Mr. BUTLER]. As he is absent, I withhold my vote.

The roll call was concluded.

Mr. KENNEY. I inquire whether the junior Senator from Pennsylvania [Mr. PENROSE] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. KENNEY. Being paired with that Senator, I withhold my vote.

Mr. JONES of Arkansas. I again announce the pair of my colleague [Mr. BERRY] with the Senator from Illinois [Mr. MASON]. If my colleague were present, he would vote "yea."

The result was announced—yeas 22, nays 28; as follows:

YEAS—22.

Allen,	Heitfeld,	Mitchell,	Turpie,
Bacon,	Jones, Ark.	Morgan,	Vest,
Caffery,	McLaurin,	Pasco,	Walthall,
Clay,	Mallory,	Pettus,	White.
Cockrell,	Martin,	Roach,	
Faulkner,	Mills,	Tillman,	

NAYS—28.

Allison,	Frye,	Mantle,	Sewell,
Burrows,	Gallinger,	Perkins,	Shoup,
Carter,	Hale,	Platt, Conn.	Spooner,
Davis,	Hansbrough,	Platt, N. Y.	Teller,
Elkins,	Hoar,	Pritchard,	Thurston,
Fairbanks,	Lodge,	Proctor,	Wetmore,
Foraker,	McEnery,	Quay,	Wilson.

NOT VOTING—30.

Aldrich,	Daniel,	Jones, Nev.	Penrose,
Baker,	Deboe,	Kenney,	Pettigrew,
Bate,	Gear,	Kyle,	Rawlins,
Berry,	George,	Lindsay,	Smith,
Butler,	Gorman,	McBride,	Stewart,
Cannon,	Gray,	McMillan,	Turner,
Chandler,	Hanna,	Mason,	Warren,
Chilton,	Harris, Kans.	Morrill,	Wellington,
Clark,	Harris, Tenn.	Murphy,	Wolcott.
Cullom,	Hawley,	Nelson,	

So the amendment of Mr. JONES of Arkansas to the amendment of the committee was rejected.

Mr. JONES of Arkansas. I now offer, to come in at the end of the paragraph, the following proviso:

> *Provided*, That the specific duties provided for in this paragraph shall not become operative until twelve months after the passage of this act.

I shall ask for the yeas and nays on the amendment, and I hope the Senate will adopt it.

The Senator from Iowa has this morning distinctly admitted to the Senate that there is a twelve-months supply of wool now in the country; that it has been imported, and no tariff has been paid upon it. The specific duties provided for in this paragraph

are intended, or it is pretended that they are intended, as compensatory to the manufacturers for the tariff they pay on the wool they import.

Whenever, after this bill becomes operative, the manufacturer imports wool, he must pay the tariff of 10 cents a pound. When he imports enough to make a pound of cloth, upon the assumption on the other side, he must pay 30 cents, or 10 cents on each of the 3 pounds of wool out of which to make 1 pound of cloth. In addition, the 50 per cent—25 per cent more than has been the law since the Wilson bill was passed—which has been considered ample to protect the manufacturers, is already provided for in the bill, and it is not right that compensation should be allowed to them for tariff they have not paid. When a twelve-months supply, by the admission of the Senator from Iowa, has been imported into the country without paying any duty, there is no justice, there is no fairness, in allowing a compensation of 30 cents on every pound of manufactured cloth made out of this wool as compensation for tariff they have not paid.

As the Senator from Iowa has admitted that there is a year's supply of wool in the country, and as the manufacturers will use raw wool for twelve months upon which they have paid no duty, the amendment ought to be adopted, so that the people will not be compelled to pay the manufacturers an increased price because of duties they have not paid. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. COCKRELL. Let the amendment be stated.

The SECRETARY. At the end of paragraph 364 it is proposed to insert the following proviso:

Provided, That the duties provided for in this paragraph shall not become operative until twelve months after the passage of this act.

Mr. WHITE. I simply desire to call attention to the fact that the ad valorem duty in the paragraph is higher than under the McKinley Act.

Mr. VEST. In paragraph 364 the duties upon goods valued at not above 50 cents per pound amount to 154.30 per cent, and upon goods above 50 cents per pound, 94.45 per cent. It always happens that the higher duty is upon the cheap goods and the smaller duty upon the dear goods.

The statements of my colleague, the Senator from Arkansas, in regard to the injustice of this paragraph are unanswerable, absolutely so. We were told by the Senator from Rhode Island [Mr. ALDRICH], when he made his opening speech in this debate, that on account of the immense amount of wool which would be brought into this country, especially under free wool—to use his expression, which would be rushed into the country before the bill became a law—it would be absolutely necessary to find revenue for the immediate wants of the Government somewhere else, and for that reason our Republican friends propose to put a duty on beer and on tea, abandoning as to tea the time-honored arguments of the Republican party against any such duty, because that is a simple revenue duty, all of which goes into the Treasury without any protection to the individual manufacturer at all.

Yet with that very argument made here, it is now proposed, besides these enormous duties which I have named, to give to the manufacturers a simple, naked gratuity, out of the tax money of the people. It is nothing else. There is no pretense that they are entitled to the duties which are now proposed on the ground that they use this taxed wool. They have already got the wool. I saw a statement in a woolen journal yesterday that they had a two-years supply. Even if they have a one year supply, what is it but naked robbery, under the forms of law, to give them this enormous duty, when there is no basis in the world for it?

Mr. PLATT of Connecticut. What is the contention; that there is a year's supply of wool in the hands of the manufacturers?

Mr. JONES of Arkansas. There has been a year's supply of wool imported into this country, according to the statements of all wool men. It amounts to a full year's consumption. The Senator from Iowa admitted a while ago that such is the fact. Now, they have that wool without paying any tariff on it, and yet you propose to put compensatory duties in this paragraph to compensate them for tariffs never paid.

Mr. PLATT of Connecticut. Not that the manufacturers have got it. If it is in the hands of speculators, being held to charge the manufacturers the price to which it will be raised by the duty, then the manufacturers derive no advantage from it.

Mr. JONES of Arkansas. I presume the men who want the wool imported it, and the Senator from Rhode Island stated in his opening speech, as referred to by the Senator from Missouri, that this was being done and that the practical effect of it was to deprive the Treasury of the revenue, and to compensate for that failure and so that the Treasury might get the revenue that ought to have come from it, you propose to put a tax on beer and tea.

Mr. PLATT of Connecticut. I merely rose for the purpose of saying that as I understand the situation a very small proportion of this wool has been imported by the manufacturers, but it has been imported largely by people with the idea of speculating upon it. I do not like that, but at the same time I do not think their sins ought to be visited upon the manufacturers.

Mr. JONES of Arkansas. When the Wilson bill was being framed, the manufacturers came here and insisted that as they had paid tariff on the raw materials which they used in manufacturing their goods it was not right for them to be compelled to sell their fabrics in open market in competition with fabrics made from free wool, as we proposed to make it free. Recognizing the justice of that claim, the Wilson Act provided that the wool tariff should not go into effect as to woolen fabrics until January, 1895, to give them a market in which to sell the goods which they had made out of taxed wool, to compensate them for what they had done.

Now the same men are here, and they propose to manufacture goods out of free wool, and when we propose that they shall not be allowed to saddle the people with an expense they have not incurred, they forget the sense of duty which animated us then, and I am ashamed to say that the Senate seems not to appreciate the gravity of the situation.

Mr. WHITE. I merely desire to say that if the manufacturers of woolen goods have not imported the wool, and do not now possess it, they have displayed in that regard far less ability and attention to their business than has been manifested with reference to the preparation of the proposed act.

Mr. CAFFERY. I call the attention of the Senator from Connecticut to the fact that the Senator from Rhode Island, in his opening speech, stated that no considerable revenue could be expected for two years from the duty on wool, and he made his calculations of a surplus something over $2,000,000 only for the next two years, and limited the duration of the tea tax and the tax on beer to that period. Under any circumstances this tax is utterly indefensible, for if the wool has been imported by importers and not by manufacturers, and they ask a high price for it, the manufacturers can import wool without the payment of duty. It occurs to me, however, that it is an evasion to say that the parties interested in the importations were mere speculators, who might be crushed by the failure of the manufacturers to buy their imported articles.

Mr. PLATT of Connecticut. I did not say and do not say that there have not been, perhaps, unusual importations of wool by manufacturers, but the great bulk of it is in the hands of the wool merchants. The manufacturers buy in advance, of course.

Mr. CAFFERY. Who are the wool merchants?

Mr. PLATT of Connecticut. There may have been importations. I am only speaking of what I have been advised. I do not know how it may be.

Mr. JONES of Arkansas. They buy on commission, as a rule?

Mr. PLATT of Connecticut. I presume so.

Mr. JONES of Arkansas. When they buy on commission, they buy for their principals. Seventy million pounds of wool came in month before last.

Mr. WHITE. It is wholly unlikely that these people have not attended to their interests, and it is not at all probable that they are walking around, not knowing what to do, while other people are importing wool. I suppose the wool manufacturers have a vague idea that a wool schedule will probably be adopted some day, and they doubtless had such an idea soon after the last election.

Mr. PLATT of Connecticut. Senators on the other side seem to suppose—and I know that nothing I can say will change their opinion about it—that every wool manufacturer in the United States is a very rich man, who can buy a year's stock of wool in advance and carry it. The contrary is the fact. Most of the woolen manufacturers of the United States are not wealthy, and have no surplus cash on hand to invest in a year's supply of wool.

Mr. RAWLINS. Will the Senator from Connecticut yield to me for a question? I will ask the Senator if it is not the theory of the Republican party, frequently expressed by its leaders, including the President of the United States, that the foreigner pays the import duty, the tax; and if that is true, upon what theory does the Republican party justify the imposition of compensatory duties to make good the domestic manufacturer on account of the supposed increased cost of his raw materials?

Mr. PLATT of Connecticut. I must ask to be excused from entering into a discussion of the principles upon which the protective system is based. Unfortunately, the Senators who would like to explain it fully and at great length, and answer the very remarkable and wonderful statements which have been made on the other side for the last three or four weeks, are compelled to sit silent in order to secure the passage of the pending bill within any time that will satisfy the country.

Mr. MILLS. I think it is a creation of fancy on the part of the Senator from Connecticut that wool is imported into this country by speculators and then sold to the woolen manufacturers. The woolen manufacturers could not carry on their business in that way. They have to have experts to buy their wool. The wool is bought for a particular purpose, and a particular kind of wool is bought and a particularly skillful person is appointed to do the

work. I remember a few years ago being in New England and in one of the largest woolen manufacturing establishments, and they pointed me to a gentleman whom they said they paid $10,000 a year to purchase their wool for them, and they said he could shut his eyes and stick his hand into a bag of wool and tell what sort of wool it was. They have to have a high-priced man to do that business. They are importing wool for themselves.

Mr. ALLEN. Mr. President, I have been very highly edified for the last three days in listening to the discussion of the question whether there is 1 pound of pure wool in 3 pounds of wool in the grease, or whether there is 1 pound of pure wool in 4 pounds of wool in the grease. I think that is a subject which has been discussed largely and extensively here during the entire week.

This question assumes a greater range than the mere discussion of schedules or the arrangement of details. It involves the discussion of principles, it involves the discussion of consequences, and it occurs to me that the thing which ought to present itself most strongly to the mind of every Senator is whether the seventy-odd million people in the United States are to bear the burden of an enormous taxation upon woolen articles necessary to their life and their comfort.

I do not suppose there is a sheep in the United States to every inhabitant, and yet the question of wool, the question of sheep, has occupied the attention of the Senate now for the last week. It is a mere spectacular performance before the country. There is nothing else to it. Upon the one hand stand a few sheep growers and a few wool owners who have contributed largely to the campaign funds in the past and who are now demanding their compensation in the form of a prohibitory statute, and on the other hand stand the millions of lambs in this country to be shorn by the tax.

What difference does it make so far as the particular item now under discussion is concerned? The whole purpose and scope of the bill are not only to lay upon the backs of the people of this country additional burdens in the form of taxation, but it has a deeper significance, as expressed by the chairman of the Ways and Means Committee of the House of Representatives, and therein lies one of its secret and hidden purposes, and that is to create a fund so great, a surplus so great, that it can be used as a means of retiring the greenbacks and the legal-tender notes and the other forms of money which have been issued by this Government.

It is the first step in that direction. If the bill passes and produces, as I believe it will not, a surplus revenue, then the jackals and the cormorants who profit by it will hold up their hands and elevate their sanctified noses and demand at the hands of Congress legislation that will retire the greenbacks and legal-tender notes. Then, when that is accomplished, as doubtless it will be accomplished if things are to go on in the future as they have gone in the past few years, we will be informed that we have not sufficient money, which we all now know. We will have committed then the suicidal policy of retiring the greenbacks and legal-tender notes that are so dear and sacred to the common people of this country, and then we will be informed that the only remedy the people have, the only relief we can give them, will be relief in the form of an extension of the powers of national banks.

Then this country will have passed into the hands of the manufacturers, the national banks, and the great railway transportation lines of the country, and the people will be absolutely and unqualifiedly at their mercy. These consequences can not be escaped. Yet dignified Senators stand here and argue like boys at school upon the grave and solemn question whether there are 2 pounds of grease to 1 pound of pure wool or whether there are 3.

Mr. President, I want to see the bill pass. I want to see it pass as speedily as possible. In my judgment it will be the gigantic failure of the age. It will fall short of producing revenue. Although its purpose is as I said, I want to see the great body of honest American citizens who believe there is something in the tariff issue to learn by bitter experience, if they can not learn otherwise, that the tariff is a delusion and a snare, and that the only question for the American people to decide—the great question which they must decide correctly if the Government is to survive—is the question of the volume and character of our money.

I am perfectly willing, so far as I am concerned, to walk into this Chamber occasionally and vote upon these schedules. I do not say that I will or will not vote upon the measure as a whole when it is submitted. I do not know what course I shall pursue then, but I believe, and I believe the American people are becoming daily convinced, that the bill will be a failure the moment it is adopted. But if they want tariff, if nothing but tariff will do, if our Republican friends say the settlement of the tariff question will settle the question of prosperity, then let us have tariff, and let us have it speedily, and let it be high, Mr. President.

Let it be as high as it is possible for our friends on the other side to make it. Let it prohibit the importation of hundreds of articles. Then what will be the result? Where will prosperity come from? Oh, the mills will open, so say our friends; men will be set at work in the different departments of industry and in manufacturing. But there must be a market for the articles that are manufactured before you can set your mills to work. Where is that market to be found? It can not be found in the United States, because the people are too poor to purchase the articles manufactured. No man is going to manufacture an article without first knowing he is going to have a market for it. It is rot and nonsense to sit here day after day and discuss this simple question.

The VICE-PRESIDENT. The Secretary will call the roll on agreeing to the amendment of the Senator from Arkansas [Mr. JONES] to the amendment of the committee.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I am paired with the Senator from Oregon [Mr. MCBRIDE].

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH].

Mr. KENNEY (when his name was called). I announce my pair with the junior Senator from Pennsylvania [Mr. PENROSE], and withhold my vote.

Mr. MCLAURIN (when his name was called). I announce my pair with the Senator from North Carolina [Mr. PRITCHARD].

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA].

Mr. WARREN (when his name was called). I again announce my pair with the junior Senator from Washington [Mr. TURNER].

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER], and in his absence withhold my vote.

The roll call was concluded.

Mr. TILLMAN. Has the Senator from Nebraska [Mr. THURSTON] voted?

The VICE-PRESIDENT. He has not voted.

Mr. TILLMAN. I am paired with that Senator, and therefore withhold my vote.

Mr. MALLORY. I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were here, I should vote "yea."

Mr. JONES of Arkansas. I again announce the absence of my colleague [Mr. BERRY]. If he were present, he would vote "yea." He is paired with the Senator from Illinois [Mr. MASON].

Mr. HARRIS of Kansas. I am paired with the junior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

Mr. MARTIN. I am paired with the senior Senator from Montana [Mr. MANTLE]. I should vote "yea" if he were present.

Mr. GRAY. I ask if the senior Senator from Illinois [Mr. CULLOM] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. GRAY. I am paired with that Senator, and withhold my vote.

Mr. WARREN. By an arrangement with the Senator from Kansas [Mr. HARRIS], I transfer my pair with the Senator from Washington [Mr. TURNER] to my colleague [Mr. CLARK], so that the Senator from Kansas and myself can vote. I vote "nay."

Mr. HARRIS of Kansas. I vote "yea."

The result was announced—yeas 18, nays 27; as follows:

YEAS—18.

Allen,	Faulkner,	Morgan,	Vest,
Bacon,	Harris, Kans.	Murphy,	Walthall,
Caffery,	Jones, Ark.	Pasco,	White.
Clay,	Mills,	Pettus,	
Cockrell,	Mitchell,	Roach,	

NAYS—27.

Allison,	Foraker,	Nelson,	Spooner,
Burrows,	Frye,	Perkins,	Stewart,
Carter,	Gallinger,	Platt, Conn.	Teller,
Chandler,	Hale,	Platt, N. Y.	Warren,
Deboe,	Hoar,	Quay,	Wetmore,
Elkins,	Lodge,	Sewell,	Wilson.
Fairbanks,	McEnery,	Shoup,	

NOT VOTING—44.

Aldrich,	Gear,	Kyle,	Pettigrew,
Baker,	George,	Lindsay,	Pritchard,
Bate,	Gorman,	McBride,	Proctor,
Berry,	Gray,	McLaurin,	Rawlins,
Butler,	Hanna,	McMillan,	Smith,
Cannon,	Hansbrough,	Mallory,	Thurston,
Chilton,	Harris, Tenn.	Mantle,	Tillman,
Clark,	Hawley,	Martin,	Turner,
Cullom,	Heit'feld,	Mason,	Turpie,
Daniel,	Jones, Nev.	Morrill,	Wellington,
Davis,	Kenney,	Penrose,	Wolcott.

So the amendment to the amendment was rejected.

Mr. JONES of Arkansas. I move, in line 15, paragraph 364, to strike out the words "three times" and insert "twice;" so that the compensatory duty upon the manufactured material, instead of being three times the cost of a pound of unwashed wool, shall be twice the cost of a pound of unwashed wool. It was admitted yesterday in debate a number of times that Port Phillip wool, which, as nobody will deny, is the wool mainly imported and used by the manufacturers, shrinks at the rate of about 50 per cent,

or that 2 pounds of unwashed wool will make a pound of scoured wool. There is no reason for making larger the increases in favor of manufactures. They go exactly in the line of the other outrages we have been speaking about. I hope the Senate will adopt this amendment.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Arkansas [Mr. JONES] to the amendment of the committee.

Mr. JONES of Arkansas. I ask for the yeas and nays on the amendment to the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I am paired with the Senator from Oregon [Mr. MCBRIDE].

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH].

Mr. GRAY (when his name was called). I am paired with the Senator from Illinois [Mr. CULLOM] on this question. If he were present, I should vote "yea."

Mr. KENNEY (when his name was called). I am paired with the Senator from Pennsylvania [Mr. PENROSE].

Mr. MCLAURIN (when his name was called). I am paired with the Senator from North Carolina [Mr. PRITCHARD].

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA].

Mr. WARREN (when his name was called). By the same arrangement that was heretofore made I transfer my pair with the junior Senator from Washington [Mr. TURNER] to my colleague [Mr. CLARK], so that the Senator from Wyoming [Mr. CLARK] will stand paired with the Senator from Washington [Mr. TURNER], and thus relieve the Senator from Kansas [Mr. HARRIS] and myself. I vote "nay."

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER].

The roll call was concluded.

Mr. HARRIS of Kansas. Under the arrangement stated by the Senator from Wyoming [Mr. WARREN] I am at liberty to vote. I vote "yea."

Mr. MARTIN. I desire to announce my pair with the senior Senator from Montana [Mr. MANTLE]. I should vote "yea" if he were present.

Mr. JONES of Arkansas. I announce for the day the pair between my colleague [Mr. BERRY], who is detained from the Chamber by public duties, and the Senator from Illinois [Mr. MASON]. If my colleague were present, he would vote "yea."

The result was announced—yeas 19, nays 26; as follows:

YEAS—19.

Allen,	Faulkner,	Morgan,	Tillman,
Bacon,	Harris, Kans.	Murphy,	Vest,
Caffery,	Jones, Ark.	Pasco,	Walthall,
Clay,	Mills,	Pettigrew,	White.
Cockrell,	Mitchell,	Pettus,	

NAYS—26.

Allison,	Foraker,	Perkins,	Teller,
Burrows,	Frye,	Platt, Conn.	Thurston,
Carter,	Gallinger,	Platt, N. Y.	Warren,
Chandler,	Hale,	Quay,	Wetmore,
Deboe,	Hoar,	Sewell,	Wilson.
Elkins,	Lodge,	Shoup,	
Fairbanks,	McEnery,	Spooner,	

NOT VOTING—44.

Aldrich,	Gear,	Kyle,	Penrose,
Baker,	George,	Lindsay,	Pritchard,
Bate,	Gorman,	McBride,	Proctor,
Berry,	Gray,	McLaurin,	Rawlins,
Butler,	Hanna,	McMillan,	Roach,
Cannon,	Hansbrough,	Mallory,	Smith,
Chilton,	Harris, Tenn.	Mantle,	Stewart,
Clark,	Hawley,	Martin,	Turner,
Cullom,	Heitfeld,	Mason,	Turpie,
Daniel,	Jones, Nev.	Morrill,	Wellington,
Davis,	Kenney,	Nelson,	Wolcott.

So the amendment to the amendment was rejected.

The VICE-PRESIDENT. The question now is on agreeing to the paragraph as amended.

The paragraph as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 122, line 25, paragraph 365, after the word "blankets," to strike out the comma; in the same line, before "flannels," to insert "plain;" and in the same line, after the word "flannels," to strike out the comma and the words "for underwear."

Mr. ALLISON. I ask that the two amendments changing the text be disagreed to, so that the clause may stand as it came from the other House.

Mr. JONES of Arkansas. Does the Senator refer to the amendments striking out the commas, or the changes in the text?

Mr. ALLISON. The commas should remain.

Mr. JONES of Arkansas. There are four proposed amendments in line 25.

Mr. ALLISON. I wish the amendments of the committee inserting the word "plain" and striking out the words "for underwear" to be disagreed to.

The VICE-PRESIDENT. The question is on the amendments of the committee which have been stated.

The amendments were rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 122, line 26, paragraph 365, before the word "cents," to strike out "thirty" and insert "forty;" so as to read:

On blankets, and flannels for underwear composed wholly or in part of wool, valued at not more than 40 cents per pound, the duty per pound shall be the same as the duty imposed by this act on 1 pound and one-half of unwashed wool of the first class.

The amendment was agreed to.

The next amendment was, on page 123, paragraph 365, line 2, after the word "on," to strike out "1 pound and one-half" and insert "2 pounds;" so as to read:

The duty per pound shall be the same as the duty imposed by this act on 2 pounds of unwashed wool of the first class.

Mr. JONES of Arkansas. When was that amendment offered, Mr. President?

Mr. ALLISON. It is an amendment which I sent to the Secretary's desk.

The VICE-PRESIDENT. It is an amendment submitted by the Senator from Iowa.

Mr. ALLISON. Is the amendment agreed to, Mr. President?

The VICE-PRESIDENT. Without objection, the amendment will be considered as agreed to.

Mr. ALLISON. In line 3 of the same paragraph I move to strike out the words "5 cents per pound and fifteen" and insert "thirty."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 123, paragraph 365, line 3, after the word "thereto," it is proposed to strike out "5 cents per pound and fifteen" and insert "thirty;" so as to read:

And in addition thereto, 30 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 123, paragraph 365, line 4, after the words "ad valorem," to strike out "valued at more than 30 and not more than 40 cents per pound, the duty per pound shall be twice the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto 8 cents per pound and 20 per cent ad valorem;" in line 10, after the words "shall be," to strike out "three" and insert "two and one-half;" in line 13, before the words "per centum," to strike out "ten cents per pound and twenty" and insert "thirty-five;" in line 16, before the word "times," to strike out "and one-half;" and in line 18, before the words "per centum," to strike out "fifteen cents per pound and twenty" and insert "forty;" so as to read:

Valued at more than 40 cents and not more than 50 cents per pound, the duty per pound shall be two and one-half times the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto 35 per cent ad valorem. On blankets composed wholly or in part of wool, valued at more than 50 cents per pound, the duty per pound shall be three times the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto 40 per cent ad valorem.

The amendment was agreed to.

The next amendment was, on page 123, paragraph 365, line 20, after the word "pound," to insert "and all flannels other than plain;" so as to read:

Flannels composed wholly or in part of wool, valued at above 50 cents per pound, and all flannels other than plain, shall be classified and pay the same duty as women's and children's dress goods, etc.

Mr. ALLISON. I hope that amendment will be disagreed to.

The VICE-PRESIDENT. The question is on the amendment proposed by the Committee on Finance, which has just been stated.

The amendment was rejected.

Mr. JONES of Arkansas. On page 123, line 3 of the paragraph just read, after the word "class," I move to insert the words "for each pound of wool contained in said article."

This raises the same question that was presented by a similar amendment in a previous paragraph, that there shall be compensation allowed for the wool actually contained in the article, and not for the entire article, without regard to whether it be wool or cotton. There is no use to argue it any further.

There is another thing I wish to state that I had overlooked. I had printed in the RECORD day before yesterday, while I was discussing this paragraph, a statement which was published in the Bulletin of the National Association of Wool Manufacturers, and I had read this paragraph referring to the McKinley tariff:

The wool duties of 1890 were, in a large degree, a departure from the principle laid down in 1867, and they were the subject of severe and proper public criticism in consequence. They were fixed so high in relation to the then prices of wool that they necessitated duties on woolen goods equivalent

to about 98 per cent ad valorem on the actual importations. Thus the wool and woolen schedule of that tariff became the central point of attack, and was largely responsible for the political revolution which resulted in the repeal of the tariff of 1890 and the passage of a law placing wool on the free list.

I was calling the attention of Republican Senators to this fact, and undertaking to show them that the rates under the present bill would be higher on an average than the rates under the McKinley law. The Senator from Wyoming [Mr. WARREN] asked me a question as to whether I thought the tariff on carpet wools would be 100 per cent, and the RECORD shows that I replied "yes." My attention was directed to the wool schedule and not especially to this other matter. I know of course that the rate on the carpet wools under the McKinley law was only 50 per cent, and the increase under this bill can not reach 100 per cent. The point I proposed to make was that the rates on wool generally in the schedule would average 100 per cent. I had just exhibited specimens of manufactures that would carry a tax of 100 per cent in connection with others that would carry a tax of 185 per cent. I state this in justice to myself. It was an inadvertence when I said the tax on carpet wools would be 100 per cent.

I ask for the yeas and nays on the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I am paired with the Senator from Oregon [Mr. MCBRIDE].

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH].

Mr. GRAY (when his name was called). I am paired with the Senator from Illinois [Mr. CULLOM].

Mr. KENNEY (when his name was called). I again announce my pair with the Senator from Pennsylvania [Mr. PENROSE], and withhold my vote.

Mr. MCLAURIN (when his name was called). I announce my pair with the Senator from North Carolina [Mr. PRITCHARD].

Mr. MALLORY (when his name was called). I announce my pair with the Senator from Vermont [Mr. PROCTOR]. If he were here, I should vote "yea."

Mr. MORRILL (when his name was called). I am paired with the Senator from Tennessee [Mr. HARRIS], and so withhold my vote.

Mr. WARREN (when his name was called). I again announce my pair with the junior Senator from Washington [Mr. TURNER]. If he were here, I should vote "nay."

Mr. WELLINGTON (when his name was called). I announce my pair with the Senator from North Carolina [Mr. BUTLER].

The roll call was concluded.

Mr. HAWLEY. The Senator from Delaware [Mr. KENNEY] announced a pair with the Senator from Pennsylvania [Mr. PENROSE]. We have agreed to transfer our pairs, so that we may both vote. I vote "nay."

Mr. KENNEY. I vote "yea."

Mr. TURPIE. The Senator from Minnesota [Mr. DAVIS], with whom I am paired, is temporarily absent from the Chamber, and I therefore withhold my vote.

Mr. NELSON. I am paired with the Senator from Arkansas [Mr. BERRY], but that pair has been transferred to the Senator from Illinois [Mr. MASON], and so I am at liberty to vote. The Senator from Arkansas and the Senator from Illinois will stand paired until the return of the Senator from Illinois. I vote "nay."

Mr. THURSTON (after having voted in the negative). I am paired with the Senator from South Carolina [Mr. TILLMAN], and inquire if he has voted?

The VICE-PRESIDENT. He has not voted.

Mr. THURSTON. Then I withdraw my vote.

The result was announced—yeas 22, nays 28; as follows:

YEAS—22.

Allen,	Harris, Kans.	Mitchell,	Roach,
Bacon,	Heitfeld,	Morgan,	Vest,
Caffery,	Jones, Ark.	Murphy,	Walthall,
Clay,	Kenney,	Pasco,	White.
Cockrell,	Martin,	Pettigrew,	
Faulkner,	Mills,	Pettus,	

NAYS—28.

Allison,	Fairbanks,	McEnery,	Sewell,
Burrows,	Foraker,	Mantle,	Shoup,
Carter,	Frye,	Nelson,	Spooner,
Chandler,	Gallinger,	Perkins,	Stewart,
Clark,	Hale,	Platt, Conn.	Teller,
Deboe,	Hawley,	Platt, N. Y.	Wetmore,
Elkins,	Lodge,	Quay,	Wilson.

NOT VOTING—39.

Aldrich,	Gear,	Lindsay,	Rawlins,
Baker,	George,	McBride,	Smith,
Bate,	Gorman,	McLaurin,	Thurston,
Berry,	Gray,	McMillan,	Tillman,
Butler,	Hanna,	Mallory,	Turner,
Cannon,	Hansbrough,	Mason,	Turpie,
Chilton,	Harris, Tenn.	Morrill,	Warren,
Cullom,	Hoar,	Penrose,	Wellington,
Daniel,	Jones, Nev.	Pritchard,	Wolcott.
Davis,	Kyle,	Proctor,	

So the amendment of Mr. JONES of Arkansas was rejected.

Mr. JONES of Arkansas. I now move to insert after the word "class," in line 12, "for each pound of wool contained in said article;" and to insert the same words after the word "class," in line 17. This I do for the purpose of keeping the record straight, and without any hope of making an impression upon Ephraim, who seems to be joined to his idol.

The VICE-PRESIDENT. The amendment proposed by the Senator from Arkansas will be stated.

The SECRETARY. In paragraph 365, line 12, after the word "class," it is proposed to insert "for each pound of wool contained in said article;" and in line 17, after the word "class," to insert "for each pound of wool contained in said article."

The VICE-PRESIDENT. The question is on the amendment submitted by the Senator from Arkansas [Mr. JONES].

Mr. WHITE. Mr. President, I only wish to call attention to the very high ad valorems indicated upon the comparison before us upon this schedule. On pages 188 and 189 of the comparative statement it appears that the ad valorem rates range all the way from 63.48 to 125 per cent.

I desire to call the attention of the Senators from the manufacturing States, who have got, it seems to me, a discriminating duty in this bill, to the comments made by a very able and respected protectionist, formerly a member of this body and now Secretary of State. I refer to his comments—very brief, but pointed—upon the acts of 1883 and upon the McKinley law, and have no doubt, if he writes the obituary of the present bill, that he will similarly comment.

The real struggle—

Says Mr. Sherman in his Recollections—

The real struggle in tariff legislation is one of sections, or, as General Hancock truly said, it is "a local question." The Republican party affirms that it is for a protective tariff. The Democratic party declares that it is for a tariff for revenue only; but generally, when Republicans and Democrats together are framing a tariff, each Member or Senator consults the interest of his "deestrict" or State. It so happens that by the constitutional organization of the Senate two sections have an unequal allotment of Senators in proportion to population. The New England States have twelve able and experienced Senators, with a population, according to the census of 1890, of 4,700,745, or one Senator for less than 400,000 inhabitants.

The nine States west of the Missouri, commonly classified as the silver or Western States, have eighteen Senators, with a population of 2,814,490, or one Senator for less than 160,000 inhabitants. This representation in the Senate gives these groups of States a very decided advantage in tariff legislation. The average of Senators to the whole population is one for 712,000 inhabitants. This inequality of representation can not be avoided. It was especially manifest in framing the tariff of 1883, when New England carried a measure that was condemned by public opinion from the date of its passage.

Speaking of the McKinley law, the same author comments thus:

With respect to the principles that underlie the policy of protection, I have already stated my opinions in commenting upon the Morrill tariff law. No general tariff bill has passed during my service in Congress that met my entire approval. It is easy to formulate general principles, but when we come to apply them to the great number of articles named on the tariff list we find that the interests of their constituents control the action of Senators and Members. The McKinley tariff bill was not improved in the Senate. The compact and influential delegation from New England made its influence felt in support of industries pursued in that section, while the delegations from other sections were divided on party lines.

And thus does history repeat itself.

The VICE-PRESIDENT. The question before the Senate is on the amendment proposed by the Senator from Arkansas [Mr. JONES].

The amendment was rejected.

Mr. VEST. Mr. President, in addition to the general statement as to these rates made by the Senator from California [Mr. WHITE], I want to call attention to them specifically. These are the duties on blankets and flannels, articles of absolute and prime necessity, and I want to emphasize that fact.

Under the amended duties the duty on blankets and flannels—the word "plain" having been stricken out, it applies to them all—is, upon such articles valued at less than 30 cents per pound, 71.75 per cent, nearly two-thirds of the appraised value of the article. Upon such articles valued at from 30 to 40 cents, the duty is 63.48 per cent; valued at from 40 to 50 cents, the duty is 83 per cent; and upon flannels 3 yards in length, the duty is 125 per cent.

I move to strike out this paragraph 365, "Flannels and blankets," and insert the provision in the existing law, which is paragraph 282 of the Wilson Act. I should like to have them all put on the free list.

The VICE-PRESIDENT. The amendment proposed by the Senator from Missouri [Mr. VEST] will be stated.

The SECRETARY. It is proposed to strike out paragraph 365 and in lieu thereof to insert:

On blankets, hats of wool, and flannels for underwear and felt for printing machines, composed wholly or in part of wool, the hair of the camel, goat, alpaca, or other animals, valued at not more than 30 cents per pound (1), 25 per cent ad valorem; valued at more than 30 and not more than 40 cents per pound (2), 30 per cent ad valorem; valued at more than 40 cents per pound (3), 35 per cent ad valorem: *Provided*, That on blankets over 3 yards in length the same duties shall be paid as on woolen and worsted cloths, and on flannels weighing over 4 ounces per square yard, the same duties as on dress goods.

Mr. VEST. I ask for the yeas and nays on that amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I am paired with the Senator from Oregon [Mr. MCBRIDE].

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH].

Mr. HAWLEY (when his name was called). The Senator from Delaware [Mr. KENNEY] has authorized me again to announce the transfer of our pairs; so that the Senator from Tennessee [Mr. BATE] will stand paired with the Senator from Pennsylvania [Mr. PENROSE], and that will enable the Senator from Delaware and myself to vote. I announce that for the afternoon. I vote "nay."

Mr. KENNEY. Under that arrangement, I am at liberty to vote, and I vote "yea."

Mr. MCLAURIN (when his name was called). I again announce my pair with the Senator from North Carolina [Mr. PRITCHARD].

Mr. MALLORY (when his name was called). I again announce my pair with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA], and therefore withhold my vote.

Mr. WARREN (when his name was called). I again announce my pair with the Senator from Washington [Mr. TURNER].

Mr. WELLINGTON (when his name was called). I again announce my pair with the Senator from North Carolina [Mr. BUTLER]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. WARREN. By arrangement, with the Senator from Utah [Mr. RAWLINS], I transfer my pair with the Senator from Washington [Mr. TURNER] to the Senator from Ohio [Mr. HANNA]; so that the Senator from Utah and I will be at liberty to vote. I vote "nay."

Mr. RAWLINS. Under that arrangement I am at liberty to vote, and I vote "yea."

The result was announced—yeas 24, nays 30; as follows:

YEAS—24.

Allen,	Gorman,	Morgan,	Roach,
Bacon,	Harris, Kans.	Murphy,	Tillman,
Caffery,	Jones, Ark.	Pasco,	Turpie,
Clay,	Kenney,	Pettigrew,	Vest,
Cockrell,	Martin,	Pettus,	Walthall,
Faulkner,	Mills,	Rawlins,	White.

NAYS—30.

Allison,	Fairbanks,	McEnery,	Stewart,
Burrows,	Foraker,	Perkins,	Teller,
Carter,	Frye,	Platt, Conn.	Thurston,
Chandler,	Gallinger,	Platt, N. Y.	Warren,
Clark,	Hale,	Quay,	Wetmore,
Davis,	Hawley,	Sewell,	Wilson.
Debse,	Hoar,	Shoup,	
Elkins,	Lodge,	Spooner,	

NOT VOTING—35.

Aldrich,	Gear,	Lindsay,	Nelson,
Baker,	George,	McBride,	Penrose,
Bate,	Gray,	McLaurin,	Pritchard,
Berry,	Hanna,	McMillan,	Proctor,
Butler,	Hansbrough,	Mallory,	Smith,
Cannon,	Harris, Tenn.	Mantle,	Turner,
Chilton,	Heitfeld,	Mason,	Wellington,
Cullom,	Jones, Nev.	Mitchell,	Wolcott.
Daniel,	Kyle,	Morrill,	

So the amendment of Mr. VEST was rejected.

Mr. PETTIGREW. I desire at this time to offer an amendment to the bill which I ask to have read and printed, and give notice that I shall offer it later.

The VICE-PRESIDENT. The amendment intended to be proposed by the Senator from South Dakota [Mr. PETTIGREW] will be stated.

The Secretary read the proposed amendment, as follows:

Every contract, combination in the form of a trust, or association or corporation whose effect is to restrict the quantity of production or increase the price of any article, or any conspiracy in restraint of trade shall be deemed a trust within the provisions of this act.

There shall be levied, collected, and paid a tax of 10 per cent upon the value of all articles manufactured by a trust, as above described.

The Secretary of the Treasury shall make all the necessary rules and regulations to carry out the provisions of this act, and the tax shall be collected by the Secretary of the Treasury; and any person connected with or in the employ of any trust, as herein described, who shall sell any article, the property of said trust, upon which the tax has not been paid, shall be fined not less than $1,000 or more than $5,000, and be imprisoned for not less than one or more than five years.

And all goods sold without the payment of tax as herein provided shall be seized and sold and the proceeds of such sale turned into the Treasury of the United States.

The VICE-PRESIDENT. The amendment intended to be proposed by the Senator from South Dakota will be printed and lie over.

Mr. CHILTON. Some time ago I gave notice of an amendment to the free list of the pending bill, to be known as paragraph 536½, adding flannels, blankets, shawls, knit fabrics, women's and children's dress goods, and cloths, made wholly or in part of wool, and valued at not over 70 cents a pound. This covers the coarser woolen fabrics, which I thought and still think ought to go upon the free list. In passing over the bill and taking up its paragraphs I desire to reserve the right, if my amendment shall be subsequently adopted, to return so as to make the necessary corrections in the dutiable paragraphs.

From the demonstration which the frequent roll calls have afforded, I think future changes very doubtful and improbable. Nevertheless I make the reservation, so that I may be right on the record.

The VICE-PRESIDENT. The Chair will take notice of the statement of the Senator from Texas.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 366, line 1, page 124, after the word "similar," to insert "description and;" in line 2, after the word character," to strike out "and description;" in line 5, after the word "yard," to strike out "the duty shall be seven" and insert "six and one-half;" in line 7, to strike out "the duty shall be eight" and insert "seven and one-fourth;" and in line 8, after the word "addition," to strike out:

To the foregoing duties there shall be imposed on such goods valued at not exceeding 10 cents per square yard 2 cents per square yard; valued at more than 10 cents per square yard and not exceeding 12½ cents per square yard, 3½ cents per square yard; valued at more than 12½ cents per square yard and not exceeding 17½ cents per square yard, 5½ cents per square yard; valued at more than 17½ cents per square yard and not more than 22½ cents per square yard, 7½ cents per square yard; valued at more than 22½ cents per square yard, 7½ cents per square yard, and in addition thereto 2 cents per square yard for each and every 5 cents per square yard of value or fractional part thereof in excess of 22½ cents per square yard; and in addition to all the foregoing duties there shall be imposed on all the articles mentioned in this paragraph a duty of 20 per cent ad valorem.

And insert "thereto on all the foregoing, 50 per cent ad valorem;" so as to make the paragraph read:

366. On women's and children's dress goods, coat linings, Italian cloths, and goods of similar description and character of which the warp consists wholly of cotton or other vegetable material with the remainder of the fabric composed wholly or in part of wool, valued at not exceeding 15 cents per square yard, 6½ cents per square yard; valued at more than 15 cents per square yard, 7½ cents per square yard; and in addition thereto on all the foregoing, 50 per cent ad valorem: *Provided*, That on all the foregoing weighing over 4 ounces per square yard the duty shall be the same as imposed by this schedule on cloths.

The amendment was agreed to.

Mr. JONES of Arkansas. I should like to ask the Senator from Iowa what is the effect of the proviso at the end of the paragraph—

Provided, That on all the foregoing weighing over 4 ounces per square yard the duty shall be the same as imposed by this schedule on cloths?

Mr. ALLISON. They go in the above schedule instead of this schedule.

Mr. JONES of Arkansas. The purpose is to take everything out of the paragraph that weighs over 4 ounces a yard?

Mr. ALLISON. Four ounces to the square yard.

Mr. JONES of Arkansas. It takes out everything and practically abolishes the paragraph.

Mr. ALLISON. Oh, no. We take a few things out. Some of them may weigh more than 4 ounces to the square yard. These ladies' dress goods generally weigh less than 4 ounces to the square yard. That is the paragraph in the McKinley law, and it is all right.

The reading of the bill was resumed. The next amendment of the committee was, in paragraph 367, page 125, line 8, after the word "act," to strike out "the duty shall be eleven" and insert "ten and one-half;" and after the word "addition," in line 9, to strike out:

To the foregoing duty on such goods valued at not exceeding 12½ cents per square yard, 3½ cents per square yard; valued at more than 12½ cents per square yard and not exceeding 17½ cents per square yard, the duty shall be 5½ cents per square yard; valued at more than 17½ cents per square yard and not more than 22½ cents per square yard, 7½ cents per square yard; valued at more than 22½ cents per square yard, 7½ cents per square yard, and in addition thereto 2 cents per square yard for each and every 5 cents per square yard of value or fractional part thereof in excess of 22½ cents per square yard; and in addition to all the foregoing duties there shall be imposed on all the articles mentioned in this paragraph a duty of 20 per cent ad valorem.

And insert "thereto on all the foregoing 50 per cent ad valorem;" so as to make the paragraph read:

367. On women's and children's dress goods, coat linings, Italian cloths, bunting, and goods of similar description or character, composed wholly or in part of wool, and not specially provided for in this act, 9 cents per square yard; and in addition thereto on all the foregoing 50 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. Does that conclude the amendments of the committee?

The VICE-PRESIDENT. It concludes the amendments of the committee.

Mr. VEST. I wish to call attention to the duties imposed by the amendments to paragraphs 366 and 367. I have not been able to tell exactly what the duties are, but I can safely assert that they amount to between 80 and 100 per cent on all the goods mentioned. These are Italian cloths, women's and children's dress

goods, and the duties amount to from 80 to 100 per cent. Under paragraph 367 the duties range from 80 to 135 per cent. I move to strike out paragraphs 366 and 367 and insert paragraph 283 of the existing law, which covers all the articles named in the two paragraphs.

The SECRETARY. It is proposed to strike out paragraphs 366 and 367 and insert in lieu thereof the following:

On women's and children's dress goods, coat linings, Italian cloth, bunting, or goods of similar description or character, and on all manufactures composed wholly or in part of wool, worsted, the hair of the camel, goat, alpaca, or other animals, including such as have India rubber as a component material, and not specially provided for in this act, valued at not over 50 cents per pound, 40 per cent ad valorem; valued at more than 50 cents per pound, 50 per cent ad valorem.

Mr. GRAY. Mr. President, I do not think these very great increases ought to be passed without a word of explanation as to why they are made and how they are made and what the effect of them is to be. I have not before me the comparative tables which show the importations heretofore made of these particular goods under the present rate of duty, so as to ascertain whether this is purely a revenue tariff or is a tariff levied upon the demand of the manufacturers of these goods for protection to them, or a combination of both.

Mr. ALLISON. These duties are made necessary of course first by the duty on wool——

Mr. VEST. A compensatory duty.

Mr. GRAY. A compensatory duty.

Mr. ALLISON. And second to enable our home manufacturers to compete successfully with people who are manufacturing abroad the same class of goods; and in that respect it is a protective tariff with a view to revenue.

Mr. GRAY. Incidental revenue?

Mr. ALLISON. No; the reverse of that. The whole bill is a revenue bill.

Mr. GRAY. Oh!

Mr. ALLISON. And it is arranged so as to discriminate in favor of our own people against people in other countries. That is the theory of the bill, and I am not surprised that the Senator from Delaware has not ascertained that fact before this time. That is the general theory of it.

Mr. GRAY. I had not ascertained it. I am glad to get the information, and any information I can get, because we do not get a great deal of light from the other side. Of course we understand the reason. It is because of the determination to vote and to make no speeches.

Nevertheless, I think seriously that it is not a matter that ought to be passed—I do not say without debate, for I am not prepared thoroughly to discuss the reason and the mode of taxation and the rate proposed, but I do want to call attention to what it really is. We are raising taxes on the people of this country to a very large extent, I think a very onerous extent, one that will prove and be thought outrageous by a large class of very worthy people, and people whose interest we ought to regard as well as that of the manufacturers. We are to compensate the manufacturer for the increase on the price of raw wool caused by the duty, but there is no compensation, it appears, for the consumer. When you come to the consumer, then the compensation ends and the compensatory system seems to fail entirely.

Now, what does this really mean? It is on women's and children's dress goods, coat linings, Italian cloths, buntings, and goods of similar description. There is hardly a family in the land that will not have its yearly expenses increased by reason of this item. There is no head of a family, there is no wife or mother who goes shopping for her children, or for those for whom she must provide, who will not feel the pinch of this paragraph. I know Senators say it is trifling; as the Senator from Wyoming [Mr. WARREN] said yesterday, it is only so much a head; but this scheme of herding the great home market at so much a head does not commend itself to me as either benevolent or exactly in accord with those ideas of humanity which treat people in a different fashion than by the head. I do not like it. But, taking his statement, it would be a very serious per capita tax.

I have had sent to me at my request, and I have hardly had time to look at them, some samples of the goods that are to be taxed, and which being taxed means a graver burden to the people of this country. It means a little harder struggle for those who by their daily toil have to make their daily bread. Here [exhibiting] appears a sample of French cassimere, rather a modest article, but after all we all recognize it—those of us who have families—as something we have seen and something very necessary. The present rate is 50 per cent. The present price is 18½ cents. Fifty per cent added is a very good tax one would think. The proposed Senate rate of duty is 50 per cent and 10½ cents per square yard. Under the proposed duty the price per yard is 28½ cents. That is only very little per head, but 28½ cents per yard is 10 cents a yard more than the present price; and in buying a sufficient quantity for a dress—I do not know how many yards it takes; the Senator from Arkansas can tell me how many are necessary——

Mr. FAULKNER. Ten yards and over.

Mr. GRAY. The Senator from West Virginia knows. He says 10 yards and over. Suppose it takes 10 and over. That is more than a dollar tax on the article.

Here is another article [exhibiting] called German henrietta, whatever that may be. It is an article of women's dress goods. The present price per yard is 25 cents, and the price under the proposed duty will be 57 cents. That is a very onerous tax, and we ought not to be called upon to levy it unless there is some good reason for it, and it ought to be, as the Senator from Arkansas suggests to me, a public reason. We see here now the iniquity of commencing on the scheme of raising tariff taxes by raising the taxes on raw material.

The Senator from Iowa says it is largely compensatory; that it is made necessary in order that the manufacturers may not suffer because of the increased cost of their raw material. They are compensated, but who is going to compensate the woman who buys the dress? Nobody, I take it; and out of her pocket or that of her husband comes at last this enormous premium that is levied in the name of taxation, not to go into the Treasury of the United States, as the Senator from Iowa confesses—in that event we might bear the burden with some equanimity—but to go into the pockets of other citizens of the United States who claim that they have the privilege of using the taxing power for their benefit.

Mr. ALLISON. The present law is 60 per cent ad valorem upon that class of goods. The wool that enters into that class of goods is now free. Therefore it is conceded on both sides of the question that the manufacturers need 50 per cent ad valorem in order that they may successfully compete with people abroad making the same goods.

It must be evident that if we put a duty upon the raw material which enters into the manufacture of these fabrics, our manufacturers can not compete. I am sure the Senator from Delaware does not desire that all our woolen manufactories shall be closed and that all these goods shall be imported from other countries.

We propose a duty upon wool in order that we may produce our own wool in this country as soon as practicable. I believe that ancient Democrat, President Jackson, said that that was one of the essential things which ought to have a tariff, so that we might provide clothing for our soldiers, and so on. That is all there is to it. The duties we have proposed here in addition to the duty imposed in the act of 1894 are duties that will enable our manufacturers to compete with foreigners who manufacture these articles.

Mr. GRAY. As I said, the Senator from Iowa says this is by way of compensation to the manufacturer, and so it seems it is not necessary to say anything else at this stage of the debate. Having put the tax on raw wool, then everything else is plain sailing—go on and place compensatory taxes, without thought as to what is to be the effect of them or who is to pay the piper for this dismal dance.

At all events, although the Senator from Iowa says that is all of it, I think it is not all of it until the people in some way understand what it means. If this is the necessary consequence of putting a tax on raw wool, let us know it. Then the farmers and the farmers' wives, who have a hundred sheep, and who will get about 17 cents benefit out of protection, will know that they are to pay several dollars more on every dress pattern they buy to present a better appearance at church or at market or anywhere else they want to go.

A Senator from North Carolina once said if it was big enough to steal it was big enough to keep. I do not believe in stealing it, if you please, from those who have earned it and paying it to those who have not earned it. All I can do now is to call attention to what the tax really is. I shall not consume more time than is necessary to do that.

Here [exhibiting] is another sample, what is called French serge. I have no doubt the Senator from Iowa knows a great deal more about such things than I do. It is a thing no doubt very valuable and very much sought after as a dress goods. I do not see why the women, young and old, who want these goods should be fined for gratifying that want; why they should be punished for wanting something that will be dressy and as much of an adornment as it is. I should be very sorry to see them put in a position where they could not so adorn themselves.

Mr. WHITE. I hope the Senator from Delaware will not display that red garment to the other side. It may break up the caucus.

Mr. GRAY. What is the tax on this article? The present price is 28 cents, and under the proposed duty it will be 41 cents. Of course that is so much a yard. It would be a dollar or two on a dress pattern or a cloak pattern or whatever else you want; but when you come to multiply it in the course of a year by the number of times you want to buy it, and consider the many other articles

advanced in price in the same way, it is a considerable item, and it should not be imposed upon the people without due thought and without considering whether it is a just burden which they are called upon to bear.

Then here [exhibiting] is another article, called French check, which is now worth 30 cents a yard. Here it is. [Exhibiting.] We all recognize these things. We do not want to abolish them, and we ought not to make it harder for the people to get them. That is what the manufacturers want to do—to make it a little harder for the people to get those things, in order that they may charge an enhanced price for their product. The price of it is 30 cents, and you propose by your duty to make it 41 cents.

Here [exhibiting] is another, a German serge, which now costs 33 cents. You will make it 46 cents. There [exhibiting] is another, a German cheviot, which is 42 cents, and you propose to make it 72 cents, if this table is right. There [exhibiting] is another, a German cotton warp, fancy. It costs 24½ cents, and you propose by your duty to make it 31½ cents.

I only call attention to these in passing, that it may not be said that Senators who are in favor of the bill do not know what will be the real practical effect upon the masses of the people who pay the indirect tax—indirect, but nevertheless real.

You can not compensate illegally or unduly or unfairly one class of people without taking it from some others. Therefore, as I said in the beginning, we see what effect a naughty deed once indulged in produces. You have put these exorbitant taxes upon raw materials which ought to come in to give employment to American labor and stimulate their ingenuity in making these fabrics in competition with the whole world and increasing our export trade; you have shut them out practically, and you have enabled the manufacturers, in order to compensate them, to charge these increased prices to all the people of this country. That is the way this concealed tax, this masked burden and exaction is imposed upon the people.

Mr. WARREN. May I ask the Senator from Delaware a question?

Mr. GRAY. Yes.

Mr. WARREN. I should like to ask the Senator from Delaware if he is not one of those who voted for a tariff on woolen fabrics in the Wilson bill?

Mr. GRAY. I voted for a revenue tariff in the Wilson bill.

Mr. WARREN. Purely a revenue tariff?

Mr. GRAY. No; I will not say it was purely for revenue. That is what I wanted, but could not get.

I will tell the Senator what I did. I voted for the lowest tax I could get, because I recognized it as a practical question then. As has been said here before, the system of tariff protection had been in vogue for very many years; the poison of that false policy had got into the blood of the American people; and it had produced its legitimate effects.

Capital had gone into the protected industries, and while I and most of my associates were in favor of free trade and wanted to turn our faces in that direction, we still did not want to strike a disastrous blow to those who in good faith had embarked upon enterprises which were fed to some extent by protection taxes. So we proposed to go slowly. As the Senator from Arkansas said the other day, we proposed to take the edifice down by taking down one brick at a time from the top, and not by destroying it by dynamite or blowing it up from the foundation. That is the reason.

Mr. WARREN. May I ask the Senator from Delaware another question? If that is the case, and if he desired to take it down brick by brick, I will ask the Senator why, when he imposed taxes as revenue taxes or protective taxes or tariff, he put them all upon manufactures of woolens and none on wool? Was that taking off the protection from wool brick by brick?

Mr. GRAY. I think I have answered the Senator. Enough has been said here about free raw material. We proposed that the manufacturers of our country and the labor of our country should not be kept away from the raw materials of industry and enterprise wherewith to work. We did not propose to debar them from the opportunities that free raw material gave. We did not disregard the interests of the manufacturers and the men who labor in a protected mill, but we wanted to conserve them, and we desired to conserve them by giving them free raw materials wherewith to work.

Mr. WARREN. I should like to ask the Senator another question. Why is cloth a manufactured article and wool not? And why does he not protect and foster the laborer engaged in wool-growing as well as in cloth weaving?

Mr. GRAY. I am not a catechumen.

Mr. WARREN. I assumed that the Senator from Delaware would not answer the question, because he can make no answer. The man who produces wool produces the manufactured product of the farmer. The man who produces cloth produces the manufactured product of the cloth maker. They are both raw materials or they are both manufactured articles. There is no way around it. I challenge any man on this floor or anywhere else to show the American people why the farmer's product of wool, when it is sheared and delivered, is not as much a manufactured product as cloth is when it leaves the loom. The Senator does not wear the wool as it comes from the sheep, nor does he wear the cloth as it comes from the factory. You might just as well say that the only manufacturer is the tailor who takes the cloth and makes the clothes.

Now, then, there is another theory the Senator advances. He assumes that the tariff imposed upon articles manufactured abroad must make similar manufactured articles made in this country that much higher to the consumer in this country. Yet that Senator knows, and I know, that there have been articles made and sold in this country continually upon the market at a price much lower than the amount of tariff alone imposed upon similar articles when imported.

In the manufacture of woolen goods it does not matter if we should vote here five times the compensatory duties that are really necessary, it would not cost the consumer one penny more for one yard of cloth, unless it was some novelty sprung upon the market quick and sold for a short time before some competitor could make the same fabric.

Mr. GRAY. The Senator from Iowa says it would.

Mr. WARREN. So far as cloth making is concerned, there is not a piece shown by the Senator but that can be made in this country. The Senator knows just as well as I do that with the Yankee ingenuity that he sometimes alludes to, and with the capital in this country, just so soon as one manufacturer is making an article upon which the net profits are more than the proper interest of to-day, another manufacturer starts in to make the same article. So while we want to give every manufacturer an opportunity to make his goods by keeping out foreign goods of the kind, as a matter of fact the competition between manufacturers will protect the wearer of woolens, as it will every other article of consumption, where there is not an unlawful, illegal combination, or some trust that succeeds in cornering the market, to put up or put down the price of some product at will.

Regarding the commerce in wool and woolens, there has never been a suspicion of the manipulations of a trust or combination that I ever heard of. There has never been a time when wool or woolens have been sold upon futures and sold short and sold long. There has never been a time when they have been cornered or when any combination or any trust has controlled the product. So woolen goods, like wire nails and a great many other articles made of iron, may be sold, as those articles have been sold, at the lowest figure at which they can be manufactured here in this country and pay the workmen their price and pay a legitimate return upon the money invested.

So I say that while my constituency may not be interested directly in the manufacture of a single woolen article, yet I am ready to stand here and vote now and always to put a compensatory duty upon each and every article sufficient in the judgment of those who know—the manufacturers themselves if necessary—to exclude, to prohibit if necessary, if you will, foreign manufactures of the same kind, so as to afford employment at good wages to every American citizen desiring occupation.

Now, we do not propose to prohibit the import of wool. Until we raise enough, we have got to import it. We ask for no prohibitory duty. We should resent and repudiate any duty of that kind. But when it comes to a duty upon such manufactures as can be successfully produced here, so far as I am concerned, I am ready to vote a prohibitive duty, if you please, because I know that as a consumer I am protected by the laws of trade and competition here as between one manufacturer and another.

As to the duty that is required upon wool by woolgrowers, we have a long history to look back over. It has been demonstrated by the rise and fall in the number of sheep over and over again that on any duty less than the duty proposed in this bill the number of sheep and the value thereof have rapidly decreased in this country, and whenever there has been a duty of more or about what is proposed here there has been an increase in the number and value of sheep.

Before the Wilson bill was passed the statistics of the United States showed that the sheep in this country were worth over $125,000,000, or nearly $126,000,000. The same statistics show that after two years of the action of the Wilson bill, which the Senator from Delaware voted for, and which refused the woolgrowers a cent of protection, and refused to take revenue even from foreign wool that came in—preferring the foreign woolgrower to his own countrymen—sheep had decreased in price to a little over $66,000,000 in value, lacking but a few dollars of a loss of one-half in the value of sheep in two short years of Democratic misrule.

Thus we have shown, and the records show, and it takes no argument, and it need take no time to show that it is necessary in order to continue that industry to have a duty about such as is

proposed here, or perhaps a larger one. That has been demonstrated.

Now, sir, as to the duty upon goods, I repeat that the price of manufactured goods in this country has never been controlled for any length of time by the amount of duty that was levied on manufactured goods of like character. It has been regulated by the laws of trade and competition within our own land.

Mr. GRAY. Mr. President, I am very loath to occupy time, but really we ought to stop long enough just to know what we are doing and what this tax provision amounts to. The Senator from Wyoming has said that the number of sheep has very much decreased under the Wilson bill, I think. Was it not?

Mr. WARREN. Yes, sir.

Mr. GRAY. If the people of the United States submit to these outrageous exactions without protest and without a fight against them——

Mr. WARREN. The people expressed themselves on that question at the last election.

Mr. GRAY. We will find out that there are more sheep in the United States than I imagined.

Mr. WARREN. The people have expressed themselves.

Mr. GRAY. There are more sheep in the United States than I imagined. I do not believe there are that many.

Mr. President, I do not propose to go into the intricate subject (intricate only on the part of those who believe as the distinguished Senator from Wyoming) of free raw material or its philosophy, but what I do want to say, and I repeat, is that the number of sheep under the tariff act of 1867, as was stated by the Senator from Missouri the other day, steadily decreased, and the number of sheep under the McKinley tariff act steadily decreased, unless the Senator from Missouri is altogether mistaken.

Mr. WARREN. You must have misunderstood him.

Mr. GRAY. Unless I am mistaken in the source of his statement——

Mr. WARREN. If the Senator will allow me——

Mr. GRAY. I may be mistaken.

Mr. WARREN. I can not allow the Senator from Delaware to malign the Senator from Missouri in his absence in that manner. I do not think the Senator from Missouri stated anything of the kind, because it would be untrue if he did state it so.

Mr. GRAY. Whether it be the number of sheep or the price of wool, there was a steady decline. So the intimate relation between a tariff on this raw material, which I insist upon calling it, and its price is, it seems to me, demonstrated to be different from what the Senator from Wyoming thinks it. If we are to be taxed upon everything that grows from the ground, whether it be lumber, or cotton, or wheat, or the wool on a sheep's back, and then upon everything that is manufactured from them, of course we get into a very vicious circle, and I do not know that anybody is very much protected. The Senator has gone around that circle of protective argument until he has arrived at his starting point, and yet I do not see exactly how he is any better off than when he began.

What I insist upon is that we would be better off if we had no taxes—tariff or other—except those that are imposed for public revenue, and that no dollar be taken from the American people and that no industry be compelled to pay tribute except to defray the necessary expenses of the Government economically administered, and that not one cent of taxation ought to be allowed for other than public purposes.

I suppose the Senator understands that that is the position that we occupy, or many of us, on this side of the Chamber. It is very different from the one occupied by the Senator from Wyoming, who believes that even the primitive industry, the oldest in the history of the world, that of raising flocks and clipping the fleece, needs to rest upon the paternal support of legislation. I do not believe that a Government partnership in this very primitive and crude industry is necessary from any point of view. I would have, if I could, not a cent of protective tariff in any of these schedules, and then I would leave the manufacturers in this country, whose prosperity I desire and whose enterprise I am proud of, with the great advantage that you are taking from them, and that is, the advantage of access to the free raw materials upon which labor and ingenuity and skill can be exercised for the uplifting and the benefit of the whole human family.

That is the condition for which I am contending, and which I will approach; and if I am content to approach it gradually on account of the scare made by those who have lived so long on Government subsidy, I am not to be reproached for inconsistency because I have been somewhat influenced by the piteous appeals of those who think that they can not carry on the natural industries of the world without calling upon help from their neighbors and from the Government taxation.

Mr. WARREN. Will the Senator from Delaware indulge me a moment? I take that to be a sort of apology for insisting upon protection to manufacturers but no protection to the rural people, the agriculturists. I take it that his vote on the Wilson bill, which gave 50 per cent to the woolen manufacturers and nothing to the woolgrowers, shows very plainly, followed as it is by his observations, that he acknowledges an apology is due.

Mr. GRAY. Mr. President, the people who raise wool and the people who raise cotton do not need protection from the Government, and they have never asked it in any way that would indicate that they did. They are content by their industry to develop the resources of nature and trust to that sense of fairness and justice which ought to be found in a legislative assembly to prevent them from being unfairly burdened by taxation for the benefit of other industries no more worthy than their own.

But, Mr. President, the Senator says if they will give him what Judge Lawrence calls this ample protection, this indemnity for the past and security for the future—terms which a foreign enemy, if they had captured the capital, would use if they were turning around to loot it—indemnity for the past and security for the future, considering the rest——

Mr. WARREN. Mr. President——

Mr. GRAY. One moment. Considering the rest of the people of the United States as their enemies and speaking of the hostility that is developed against this great and new industry of raising wool. If that is to be the line of conduct, then we are to understand from the Senator that he is willing, as a largess to the manufacturer, whose raw material he has made more expensive and harder to get, that they shall levy also an additional subsidy out of the same people, out of the same home market, which means all the people of the United States who wear woolen clothes. He is willing to give them, from the pockets of these same people, a bounty which shall be as large as they demand, and then he says there will be no very great injury done by it, because, forsooth, the competition that takes place inside of the tariff wall is going to bring down the price of these commodities to a fair and reasonable rate.

Well, if that be so, when are we to expect it? When was it ever known that a protected interest was willing that the tariff wall should be lowered? When was it ever known that they came forward and said, "Now this industry in its struggling state has been nursed into strength and into manhood and we are willing to take a less exaction and to lower this protective wall?" Can the Senator cite me any interest in which that has been done? Has the wool interest? Has the wool interest, that has been protected for these many years, ever arrived at a state when it was willing to lower the rate on the clip?

Mr. WARREN. It has been lowered.

Mr. GRAY. Has it ever been done with the consent of the woolgrower? Does the Senator from Wyoming know of a single instance where they have come into the Halls of Congress and said, "After these long years and generations of protection, we are willing now, because our industry is established and the number of our flocks has increased, that this should come down in the interest of the poor people who have been paying us this subsidy all these years?" I pause for a reply, if the Senator has any reply to make to that question categorically. Has there ever been a time?

Mr. WARREN. Will the Senator repeat his question?

Mr. GRAY. I am sorry the Senator was not listening to me; I can not repeat it.

Now, Mr. President, the Senator says it will not increase very much the price of these goods—that is what I understood him to say—by reason of this competition. I should like to know how the manufacturers are going to be protected if they do not get an increased price. How are they going to be compensated for the increased price of the raw wool? Do you not expect the woolgrower to get more for his wool by reason of this tariff tax, I ask the Senator from Wyoming?

Mr. WARREN. As the Senator insists upon asking the question——

Mr. GRAY. I ask him a civil and respectful question, I hope.

Mr. WARREN. I ask the Senator not to put words in my mouth, but to quote me correctly.

Mr. GRAY. I have not quoted you. I have asked the question, and I desire an answer. If the Senator will answer my question, I will be obliged to him.

Mr. WARREN. What is the question?

Mr. GRAY. My question was whether he does not expect that the price of wool will be increased to the woolgrower by reason of this tariff.

Mr. WARREN. Yes.

Mr. GRAY. Well, that is all now. If the price is increased to the woolgrower by reason of the tariff, and the manufacturer is compensated by an increased tax on the manufactured article, then the consumer must pay an increased price, and nobody compensates the consumer, as I have said before.

Mr. WARREN. Now, will the Senator permit me to finish my answer?

Mr. GRAY. Oh, certainly.

Mr. WARREN. It is unquestionably true that the woolgrower will receive more by the tariff on wool, because we do not raise enough to supply the home market, and because there is not, and

without protection can not be, sufficient competition at home. As regards woolen goods, I stated then and repeat now, it does not matter in the protection against foreign importations whether you have placed your compensatory duty too high or just high enough, because the consumer gets the benefit of all the competition in manufacturing at home, and that regulates the price. We have in this country manufacturers enough. The case is quite different in regard to sheep.

Now, while I am on my feet, if the Senator will allow me——

Mr. GRAY. Please excuse me. I am very indulgent and I have great respect for the Senator from Wyoming, but I do not want him to put anything of his own in my speech, but just to reply in his own time.

Mr. WARREN. I should say——

Mr. GRAY. You have your own time, sir. Of course I do not want the Senator to put in my argument what he has to say. I asked him a question and I certainly have given him abundant scope for an answer, and now I propose to proceed.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). Does the Senator from Delaware yield to the Senator from Wyoming?

Mr. WARREN. The Senator declines to yield.

Mr. GRAY. No, sir; I do not decline to yield. I have yielded. The Senator knows I did not decline.

Mr. WARREN. I wanted to finish the question he had asked me.

Mr. GRAY. If I have——

Mr. WARREN. I will not embarrass him further. He knows he is traveling in close quarters.

Mr. GRAY. No, no.

Mr. WARREN. And it is getting closer.

Mr. GRAY. That is an old trick that the Senator may use on the stump in Wyoming, but you do not embarrass me, and never have, by any such argument.

The PRESIDING OFFICER. The Senator from Delaware is entitled to the floor and will proceed.

Mr. GRAY. Here we have it again, that there is competition which is to counteract the effect of the tariff. The tariff is to raise the price and competition is to lower it. I should like to ask how the manufacturer is to get this proposed benefit that is promised him in compensation for the high price that he has to pay for his tariff-taxed wool. It is very obvious that the tariff to the manufacturer creates with him precisely in principle what is created by a trust, those great institutions which are so much talked about now and so much denounced, and have been the theme of so much vituperative eloquence on this floor. The tariff creates a trust for the manufacturer just as surely as the combination of the manufacturers of sugar created a trust in the name of the American Sugar Refining Company. It does not differ in principle.

The Government of the United States is asked to stand and will stand guard along all the shores of this continent and keep off foreign competition and tell the manufacturers on the inside of those sacred precincts they may work their sweet will so far as they are concerned upon the American consumer. That is just what the trust does. That they are identical in principle, that manufacturers who have taken the Government into partnership in this way stand upon precisely the same ground that a trust stands, has been recently declared judicially by the supreme court of Germany, as stated in a paragraph that I noticed the other day in the New York Journal of Commerce.

From the Berliner Tageblatt of June 3 we translate the following:

"The supreme court of the German Empire, Leipsic, has rendered the following important decision concerning combines and trusts, which will be of great interest to other nations, and especially to the United States, where trusts play such a prominent part in commercial and industrial affairs. The above-mentioned court has distinctly declared that trusts and similar combines are perfectly legal. The motives given for this decision are as follows: When in certain industrial branches the prices of such products are sinking too low, thereby making impossible or endangering a successful business thereof, the crisis which necessarily follows is not only pernicious to the individual but also to political economy in general. It is therefor in the interest of the whole community that inadequate low prices shall not prevail too long in any industrial branch."

Just what the high-tariff protectionists claim that this Government ought to say.

"In accordance with this principle the legislative bodies have repeatedly and quite recently undertaken to bring about higher prices for certain products by establishing protective duties. It can, therefore, not be deemed absolutely and generally obnoxious to the interests of the community when the manufacturers of certain articles form a combination for the purpose of preventing ruinous competition and to mitigate the downward tendency of prices for their products. On the contrary, such combinations can be regarded not only as a warranted manifestation of the impetus of self-preservation, but also as a measure for the interest of the whole community, in cases where prices are so low that the manufacturers of them are threatened with financial ruin. For this reason the formation of syndicates and trusts has been designated by several authorities as a means which, when properly adapted, would prove remarkably expedient to prevent extravagant and detrimental overproduction."

Mr. President, I should like to ask what else the tariff is expected to do except to enter into a combination, in this case, for instance, with all the woolen manufacturers, and say, "We, by our legislation, by our fiat, by our supreme power and authority, will enable you to charge the American consumer more than you would otherwise be able to receive if it were not for that combination." It is to protect these manufacturers from any competition except that which is within the charmed circle of the protective tariff; and precisely that thing is done when you form a trust. So this is a great tariff trust. It is a trust of the sheep grower of Wyoming, and it is a trust of the woolen manufacturer, sanctioned by law, protected by law, encouraged by law, approved by the legislation of the Congress of the United States. Now, what are we to do? Competition inside of this circle is to produce these wonderful results and neutralize all that is promised these very people.

Mr. President, I can understand why the wool industry of the United States has developed out of its original and primitive state. The seat of sheep husbandry has gone beyond the Mississippi River. I know that in the great State of the Senator from Wyoming there is an enormous opportunity for that husbandry that does not exist in my State, that does not exist in the Atlantic States, and that is ceasing to exist in the States of Ohio, Illinois, and Indiana, in comparison with what is growing up in those far Western regions. Who is to protect the Ohio sheep husbandman from the competition of the Wyoming sheep husbandman, where you have a range over land never paid for, over the free land of the United States—those great sheep ranges and cattle ranges?

Can a man who lives in the State of Ohio or in Indiana or Illinois, and who pays anywhere from fifty to one hundred dollars an acre for his land, compete in the sheep-growing industry, with these natural developments which have been seized upon, the opportunities which have been afforded by nature and by the law of the United States in opening these great reservations? How are you going to compete with them? And yet the Senator from Wyoming, who has this great natural advantage, who lives in a country where these great flocks of sheep can range at the will of the owner over hundreds of thousands of acres, wants a protective tariff from all his less favored fellow-citizens in the East and in the Middle West in order that he and his people may have an increased advantage and an increased profit over what nature and opportunity have so abundantly given them.

Mr. President, if there is anything fair in that, if there is anything just in that, I want to hear some one explain what the fairness and what the justice is. We know that for years the farmers of the East and on the Atlantic Coast have been suffering from the competition of the West. There is no protective tariff that can help them. They have to submit to it. Then I should like to know how it is, and by what justice those who have captured this great industry, and who now control it with such remarkable advantages, come here and demand from the millions of the consuming public in the East, who must wear woolen clothes and work at some other industry just as worthy as theirs in order to get the wherewithal to buy them, and demand from them tribute to increase the price of the wool of the Wyoming sheep grower?

Mr. WARREN. Mr. President, only a moment. I do not desire to continue the argument with the able and courteous Senator from Delaware [Mr. GRAY], because official figures are stronger than argument, no matter how worthily made or by whom given.

I will just notice in passing that the Senator's estimate of the returns to the woolgrowers from the tariff on sheep and the consequent expense to the consumer is at the rate of 17 cents to 100 sheep. He already has that on record. I noted it in passing, and now I will ask consent to have printed in the RECORD the official figures of the United States from 1872 to 1895 as to the number and value of sheep in the United States.

The PRESIDING OFFICER. Without objection, the table referred to will be printed in the RECORD.

The table referred to is as follows:

January 1—	Sheep.		January 1—	Sheep.	
	Number.	Value.		Number.	Value.
1872	31,679,300	$88,771,197	1884	50,626,620	$119,902,706
1873	33,002,400	97,922,350	1885	50,300,243	107,960,650
1874	33,928,200	88,690,509	1886	48,322,331	92,443,867
1875	35,783,600	94,320,652	1887	44,759,314	89,872,830
1876	35,935,300	93,646,318	1888	43,544,755	89,279,926
1877	35,804,200	89,892,693	1889	42,560,079	90,640,369
1878	35,740,500	89,605,062	1890	44,336,072	100,659,761
1879	38,123,800	79,023,984	1891	43,431,136	108,397,447
1880	40,765,900	90,230,537	1892	44,938,305	116,121,200
1881	43,576,890	104,070,750	1893	47,273,553	125,909,264
1882	45,016,224	106,594,954	1894	45,048,017	89,186,110
1883	49,237,291	124,305,855	1895	42,294,064	66,685,787

Mr. CHANDLER. Mr. President, I ask unanimous consent that the vote may be taken on the pending motion.

Mr. JONES of Arkansas. Mr. President, in confirmation of what has just been said by the Senator from Delaware [Mr. GRAY], I wish to call attention to the distribution of sheep through the United States. I have a table made up in numbers by thousands,

giving the number of sheep in the different States and different sections of the Union from 1865 to 1896–97, from which it will appear that in 1865 there were 24,799,000 sheep in certain Eastern States—Maine, New Hampshire, Vermont, Massachusetts, New York, New Jersey, Pennsylvania, Maryland, Ohio, Michigan, Indiana, Illinois, and West Virginia—and that that number had decreased to 7,709,000 in 1896–97; that in the Southern States—Virginia, North and South Carolina, Georgia, Alabama, Mississippi, Tennessee, and Kentucky—there were in 1865, 2,297,000 sheep, and there were 2,807,000 sheep in 1896–97; that in Missouri, Texas, and California there were in 1868, 4,404,000 sheep, and in 1896–97 there were 6,063,000 that in Kansas, Iowa, Wisconsin, and Minnesota there were 2,351,000 sheep in 1865, and 1,890,000 in 1896; and that in the Western States, which are favored by the natural advantages so distinctly pointed out by the Senator from Delaware, there were in 1880, 5,456,000 sheep, and in 1896–97 there were 17,860,000, showing the movement of the sheep toward the localities with the best natural advantages, and of their falling off in the more settled parts of the Union, where the price is higher and the land more costly.

I will insert these tables in the RECORD.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The tables referred to are as follows:

I.—*Number of sheep in the sheep-raising States east of the Mississippi River and north of Virginia in the different years given below.*

State.	1865.	1868.	1871.	1876.	1881.	1886.	1891.	1895.	1896–97.
Maine	905,000	752,000	415,000	525,000	630,000	537,000	548,000	284,000	230,000
New Hampshire	655,000	530,000	220,000	242,000	246,000	195,000	183,000	108,000	77,000
Vermont	1,252,000	1,042,000	548,000	490,000	508,000	378,000	351,000	227,000	158,000
Massachusetts	202,000	175,000	72,000	76,000	65,000	64,000	56,000	50,000	42,000
New York	4,576,000	4,997,000	2,080,000	1,936,000	2,338,000	1,596,000	1,394,000	1,035,000	809,000
New Jersey	175,000	194,000	150,000	130,000	127,000	107,000	100,000	50,000	41,000
Pennsylvania	2,871,000	3,422,000	1,762,000	1,640,000	1,633,000	1,189,000	1,040,000	1,179,000	799,000
Maryland	250,000	276,000	135,000	141,000	153,000	169,000	157,000	148,000	125,000
Ohio	5,795,000	6,730,000	4,641,000	4,547,000	4,243,000	4,753,000	4,061,000	3,577,000	2,369,000
Michigan	3,020,000	3,948,000	3,078,000	3,451,000	1,930,000	2,269,000	2,263,000	1,982,000	1,342,000
Indiana	2,456,000	2,882,000	2,100,000	1,250,000	1,029,000	1,088,000	1,150,000	896,000	655,000
Illinois	2,062,000	2,736,000	1,424,000	1,311,000	1,155,000	1,005,000	771,000	867,000	604,000

Mr. JONES of Arkansas. Mr. President, I was very much interested in the part of the remarks of the Senator from Delaware relating to the cost of goods and the illustrations which he gave to the Senate. I have a number of similar samples. I have in my hand a fabric, "cotton warp worsted," the cost of which abroad is 32 cents a yard. Under the Wilson law the tariff on this article would be 12.8 per yard—less than 13 cents a yard. The tariff under the present proposed measure would be 25 cents specific and 50 per cent ad valorem, which would be equivalent to 16 cents. The foreign cost is 32 cents, and 50 per cent, the manufacturer's tariff provided in this bill, would be 16 cents, and the compensatory tariff for the next twelve months, to be given to the manufacturer for no consideration whatever, will be 25 cents on an article costing 32 cents.

I have already pointed out to the Senate that there is no tariff paid upon the wool out of which these goods will be manufactured and that we are giving a compensatory tariff for tariffs which are not paid and will not be paid for the next twelve months on this article costing 32 cents. We are paying 25 cents compensatory tariff, together with an ad valorem equivalent to 16 cents, to the manufacturers to protect them in their manufacture. This illustrates the outrage of giving a compensation, against which we have protested and against which we have again and again to-day voted. It shows the wrong in this matter, and it is not by any means a small matter.

I have here samples of another fabric, costing 21 cents abroad, on which the tariff under the present law is 8.4 cents per yard. The tariff under this bill would be 50 per cent ad valorem, equivalent to 10½ cents on a cost of 21 cents; and the compensatory specific tax intended to compensate for the tariff upon wool which has not paid is 21.6 cents a yard on an article that cost 21 cents. The specific compensatory tax paid on that fabric is more than 100 per cent of the foreign cost; and in addition to that there is a tariff of 50 per cent that is given to the manufacturer for protection.

This manifestly shows how this compensatory tax for a tariff never paid operates on the people of this country. When we buy abroad $100 worth of this article, we must pay not only the $50 for the manufacturer's protection, but we must pay more than $100 as a tax to compensate the manufacturers for tariffs they have not paid—a plain, naked robbery. There can be no more polite or civil word used in connection with such legislation.

I have another sample here of wool and cotton suitings, which cost 66 cents a yard abroad. The tariff under the present law is 26.4 cents. The ad valorem tariff of 50 per cent under the pending bill would be, of course, 33 cents a yard, and the compensatory tariff paid for the imaginary wool tariff is 54 cents. But it is scarcely necessary to multiply examples of this kind. I have here samples of another and lighter character of goods which cost 22 cents a yard abroad. Under the present law the duty is 40 per cent, which would be 8.8 cents, a little less than 9 cents. Under the Senate bill there is a duty of 50 per cent ad valorem, which, of course, would be 11 cents, the foreign cost being 22 cents; a d the compensatory tax, the specific tax placed on the fabric to pay the manufacturer for the tariff that he has not paid on this article costing 22 cents, is 24 cents—more than 100 per cent, in addition to the entire 50 per cent, which the manufacturers claim is all the protection they ask.

The manufacturers have lived under the general tax of 40 per cent in the Wilson law when they have had free wool; and now when you propose to tax the wool by a protective tariff of 50 per cent ad valorem, a rise of 25 per cent on the tariff theretofore existing, and in addition to that a specific tax of 24 cents a pound, under the false pretense of indemnifying them for tariffs that they have paid on the raw wool, when they have never paid one cent, you are putting a tax of more than 100 per cent on the goods which are used by our people. What is the use of saying that the purpose of this thing is not to raise the price of these articles to the people? If it does not mean that, why do you want this protection? Why would these people come here asking for these taxes if they did not believe that they would increase the cost?

It is a matter well known to all of us that it does increase and raise these prices by these amounts; and if they do not, the men who are asking for the passage of this bill will be worse fooled than anybody else.

Mr. President, I had not intended to detain the Senate longer, but my associates around me say, "Give us another sample." I have laid aside a number of these. Here [exhibiting] is a sample of heavy, coarse cloth used for the purpose of making coarse, cheap overcoats. It costs 31 cents a yard, and the duty on this under the present law is 12.4 cents a yard, making it cost 43.4 cents when brought in here. Under the present tariff it would be 15½ cents a yard. The compensatory tariff paid upon this article for wool upon which no tariff has ever been paid, while the fabric costs 31 cents, is 42 cents a yard, more than 125 per cent tariff upon this fabric to protect the manufacturers for a tariff not one solitary cent of which they have ever paid, but the whole of which is paid by the people

I have a number of pieces of these goods on my desk, and I shall not go over all of them. They include ladies' dress goods and goods for men's wear. I shall insert in the RECORD the statements accompanying these samples, so that Senators who are interested in the subject may examine them.

The statements referred to are as follows:

27-inch black luster orlean for men's summer coats, cotton warp and worsted weft, costing 3½ pence per running yard, weighing under 4 ounces to the square yard:

	Cents.
Present duty, 40 per cent	2.70
Under Senate bill the duty will be—	
5½ cents per square yard	4.13
And 50 per cent	3.37
Total	7.50

which, if entirely ad valorem, would be 111 per cent duty.

27 inch black luster orlean for men's summer coats, cotton warp and worsted weft, costing 4½ pence per running yard, weighing under 4 ounces to the square yard:

	Cents.
Present duty, 50 per cent	4.13
Under Senate bill the duty will be—	
5½ cents per square yard	4.13
And 50 per cent	4.13
Total	8.26

which, if entirely ad valorem, would be 100 per cent duty.

27-inch black luster sicilian for men's summer coats, cotton warp and worsted weft, costing 3½ pence per running yard, weighing under 4 ounces to the square yard:

	Cents.
Present duty, 40 per cent	3.10
Under Senate bill the duty will be—	
5½ cents per square yard	4.13
And 50 per cent	3.87
Total	8.00

which, if entirely ad valorem, would be 103 per cent duty.

32-inch colored italian lining, cotton warp and wool weft, costing 6½ pence per running yard, weighing under 4 ounces per square yard:

	Cents.
Present duty, 50 per cent	6.50
Under Senate bill the duty will be—	
5½ cents per square yard	4.88
And 50 per cent	6.50
Total	11.38

which, if entirely ad valorem, would be 87 per cent duty.

32-inch black italian lining, cotton warp and wool weft, costing 7½ pence per running yard, weighing 4½ ounces per square yard:

	Cents.
Present duty, 50 per cent	7.62
Under Senate bill the duty will be—	
32 cents per pound	7.50
And 50 per cent	7.62
Total	15.18

which, if entirely ad valorem, would be 99 per cent duty.

27-inch black cashmere for men's summer coats, cotton warp and wool weft, costing 7 pence per running yard, weighing under 4 ounces per square yard:

	Cents.
Present duty, 50 per cent	7.00
Under Senate bill the duty will be—	
6½ cents per square yard	4.87
And 50 per cent	7.00
Total	11.87

which, if entirely ad valorem, would be 84 per cent duty.

27-inch black cashmere for men's summer coats, cotton warp and wool weft, costing 8½ pence per running yard, weighing 4½ ounces per square yard:

	Cents
Present duty, 50 per cent	8.75
Under Senate bill the duty will be—	
32 cents per pound	6.37
And 50 per cent	8.75
Total	15.12

which, if entirely ad valorem, would be 86 per cent duty.

38-inch black mohair brilliantine dress goods, for women's wear, cotton warp and mohair weft, costing 9 pence per running yard, weighing under 4 ounces per square yard:

	Cents.
Present duty, 50 per cent	9.00
Under Senate bill the duty will be—	
6½ cents per square yard	6.86
And 50 per cent	9.00
Total	15.86

which, if entirely ad valorem, would be 88 per cent duty.

Cotton and wool (shoddy) melton, 54 inches wide, 14½ ounces weight; value, 11 pence; dutiable value, 21 cents:

	Cents.
Present duty, 40 per cent	8.4
Under Senate bill the duty will be—	
24 cents per pound	21.6
And 50 per cent ad valorem	10.5
Total	32.0

which, if entirely ad valorem, would be 150 per cent.

Union twill, cotton, wool, and shoddy, 56 inches wide, 16 ounces weight; value, 11 pence; dutiable value, 22 cents.

	Cents.
Present duty, 40 per cent	8.8
Under Senate bill the duty will be—	
24 cents per pound	24
And 50 per cent ad valorem	11
Total	35

which, if entirely ad valorem, would be 159 per cent.

56-inch mixture worsted coating for men's suits, worsted warp and weft, costing 27 pence per running yard, weighing 12 ounces per running yard:

	Cents.
Present duty, 50 per cent	27
Under Senate bill the duty will be—	
32 cents per pound	24
And 50 per cent ad valorem	27
Total	51

which, if entirely ad valorem, would be 94 per cent.

Cloakings, cotton warp, wool and shoddy filling, 54 inches wide, 22½ ounces weight; value, 1s. 4d.; dutiable value, 31 cents:

	Cents.
Present duty, 40 per cent	12.4
Under Senate bill the duty will be—	
24 cents per pound	42
And 50 per cent ad valorem	15½
Total	57½

which, if entirely ad valorem, would be 185 per cent.

Cotton warp worsted, 56 inches wide, 11 ounces weight; value, 1s. 4½d.; dutiable value, 32 cents:

	Cents.
Present duty, 40 per cent	1.28
Under Senate bill the duty will be—	
36 cents per pound	25
And 50 per cent ad valorem	16
Total	41

which, if entirely ad valorem, would be 128 per cent.

German cloaking, cotton and wool, 59 inches wide, 10½ ounces weight; value, 1.80 marks; dutiable value, 34.5 cents:

	Cents.
Present duty, 50 per cent	17.3
Under Senate bill the duty will be—	
36 cents per pound	24
And 55 per cent ad valorem	19
Total	43

which, if entirely ad valorem, would be 125 per cent.

Fancy worsteds, 29 inches wide, 12½ ounces weight; value, 2 shillings; dutiable value, 46 cents:

	Cents.
Present duty, 50 per cent	23
Under Senate bill the duty will be—	
36 cents per pound	28
And 50 per cent ad valorem	23
Total	51

which, if entirely ad valorem, would be 111 per cent.

Worsted trouserings, 29 inches wide, 8 ounces weight; value, 2 shillings; dutiable value, 46.5 cents:

	Cents.
Present duty, 50 per cent	23.3
Under Senate bill the duty would be—	
36 cents per pound	18
And 55 per cent ad valorem	25.6
Total	43.6

which, if entirely ad valorem, would be 94 per cent.

German cloakings, cotton and wool, 50 inches wide, 14 ounces. weight; value, 2.25 marks; dutiable value, 52 cents:

	Cents.
Present duty, 50 per cent	26
Under Senate bill the duty will be—	
36 cents per pound	31.5
And 50 per cent ad valorem	26
Total	57.5

which, if entirely ad valorem, would be 110 per cent.

Wool and cotton suitings, 27 inches wide, 12 ounces weight; value, 2s. 6d.; dutiable value, 59 cents:

	Cents.
Present duty, 50 per cent	29.5
Under Senate bill the duty will be—	
36 cents per pound	27
And 50 per cent ad valorem	29.5
Total	56.5

which, if entirely ad valorem, would be 95 per cent.

Wool and cotton suitings, 54 inches wide, 24 ounces weight; value, 2s. 10d.; dutiable value, 66 cents:

	Cents.
Present duty, 40 per cent	26.4
Under Senate bill the duty will be—	
36 cents per pound	54
And 50 per cent ad valorem	33
Total	87

which, if entirely ad valorem, would be 132 per cent.

Cheviot, all wool, 58 inches wide, 30 ounces weight; value, 4s. 6d.; dutiable value, $1:

Present duty, 50 per cent	$0.50
Under Senate bill the duty will be—	
36 cents per pound	.67½
And 50 per cent ad valorem	.50
Total	1.17½

which, if entirely ad valorem, would be 117½ per cent.

Covert cloth, 54 inches wide, 32 ounces weight; value, 9 shillings; dutiable value, $2.08.

Present duty, 50 per cent	$1.04
Under Senate bill the duty will be—	
36 cents per pound	.72
And 55 per cent ad valorem	1.14
Total	1.86

which, if entirely ad valorem, would be 89½ per cent.

Wool suitings, 56 inches wide, 18-19 ounces weight; value, 10s. 3d.; dutiable value, $2.36:

Present duty, 50 per cent	$1.18
Under Senate bill the duty will be—	
36 cents per pound	.41
And 55 per cent ad valorem	1.30
Total	1.71

which, if entirely ad valorem, would be 72 per cent.

Clay worsted coatings, 56 inches wide, 20 ounces weight; value, 12s. 6d.; dutiable value, $2.90:

Present duty, 50 per cent	$1.45
Under Senate bill the duty will be—	
36 cents per pound	.585
And 55 per cent ad valorem	1.595
Total	2.18

which, if entirely ad valorem, would be 75 per cent.

Mr. JONES of Arkansas. We have by our votes to-day undertaken again and again to remove this proposition to tax goods to compensate manufacturers for tariffs which they have not paid, but we have been met by a solid vote on the other side without regard to the facts, without regard to right. You have insisted on imposing these enormous taxes on the people to compel the masses of the people to pay this compensation for money that has not been invested in raw material by the manufacturers. We are powerless; we can not help ourselves.

Mr. President, the development of the United States in an industrial way is something remarkable. I presented some tables here the other day which showed that the people of this country consume to-day more raw cotton in manufactures than any other country on the globe; that we use more raw wool than any country in the world; that we are the largest producers of pig iron on the earth, and, indeed, in this great manufacture we have taken the lead of all the nations of the earth. There is no longer any room for the pretense that we are an infant; there is no longer any excuse for asking for the benefactions of the Government or to be asking Congress for protection against competition with the balance of the world.

I will put into the RECORD a statement which I have had made up by a very competent man, Jacob Schoenhof, a careful, painstaking, patriotic, intelligent man, a man who has no prejudices for or against any of these questions, and who looks at them, I believe, with absolute impartiality. The statement shows the industrial progress of the United States for the last ten years, as compared with Great Britain and Germany. I will insert it as a part of my remarks, and I commend it to the attention of Senators.

The PRESIDING OFFICER. Without objection, the paper referred to by the Senator from Arkansas will be printed in the RECORD.

The paper referred to is as follows:

INDUSTRIAL PROGRESS OF THE UNITED STATES FOR THE TEN YEARS PAST COMPARED WITH THE PROGRESS MADE IN GERMANY AND GREAT BRITAIN.

I start my comparison with a showing of the exports of manufactures of metals, chiefly those whereof iron and steel are the component materials, and articles in which the labor cost is vastly in excess of the cost of the material, even if we take the material as advanced in manufacture to the state of finished iron and steel. The totals of these highest finished articles of manufacture, chiefly machinery, implements, and apparatus, exported in 1886 amounted to $22,618,000; in 1891 to $40,618,000, and in 1896 to $63,516,000. This is an increase of eighteen millions, or 79.6 per cent, in the five years closing with 1891, and of $22,898,000, or fully 25 per cent, over the increase of the five years preceding the five years closing with 1896.

I.—*Value of exports of finished articles of manufactures of iron and steel progressed above the crude and half-manufactured state, and of other manufactures of similar character where metals are the component material of chief value, in 1896, 1891, and 1896.*

Article.	Fiscal year—		Calendar year 1896.
	1886.	1891.	
Agricultural implements:			
Mowers and reapers	$1,288,000	$1,567,000	$2,889,000

Cycles, and parts of	----------	----------	3,796,000
Instruments and apparatus for scientific purposes	490,000	1,576,000	2,717,000
Iron and steel manufactures:			
Cutlery	112,000	146,000	188,000
Firearms	1,779,000	859,000	734,000
Builders' hardware, etc	2,466,000	3,858,000	6,140,000
Sewing machinery	2,585,000	2,899,000	3,051,000
Other machinery	4,469,000	13,425,000	22,513,000
Nails	294,000	440,000	821,000
Scales and balances	281,000	318,000	377,000
Stoves and ranges	196,000	248,000	304,000
Wire	335,000	899,000	1,788,000
All other	2,284,000	3,987,000	8,193,000
Total	14,801,000	27,010,000	44,109,000
Lamps, chandeliers, etc	546,000	909,000	730,000
Musical instruments	871,000	1,326,000	1,269,000
Total	22,618,000	40,618,000	63,516,000

The wages paid in the census year in the principal industries contributing to these exports amounted to $189,646,000, which was distributed among 326,500 hands, making an average for each employee in these industries of $580. If we divide the year into 50 working weeks, which is certainly a liberal allowance in view of the idle time that runs in under the name of holidays or other causes of stoppage in the working year, this is equal to nearly $13 a week wages.

Counting German wages, at a liberal allowance, as 20 marks per week in these trades on the same computation of time for all employed in similar industries, which takes in minors and adults all at the same rate of pay, this gives near three times as high a rate of wages in the United States as is paid in Germany in the same occupations, if we take wages by the time.

It will be interesting to see now what one of the modern, progressive countries of Europe, availing itself of the scientific inventions of the time, and, besides, being benefited by a low rate of wages in these industries, as of 1 to 3 against the United States, has to show in progress and development when it comes to compete in the neutral markets of the world with the product of the mills of America, paying, under all considerations, the highest wages in existence.

I exclude from this comparison all articles of crude manufacture, such as common castings, bar iron, steel rails, wire, etc.

Exports of the special trade of Germany in manufactures of metals other than crude articles mentioned above as exempted from the tables relating to American exports, but other than machinery, instruments, and apparatus: 1886, $36,190,000; 1891, $48,218,800; 1895, $48,575,800.

Against this we set the following articles of American manufacture, taken out of the list of Table I:

Article.	Fiscal year—		Calendar year 1896.
	1886.	1891.	
Brass, and manufactures of	$150,000	$297,000	$1,026,000
Copper manufactures	109,000	190,000	819,000
Iron and steel manufactures:			
Cutlery	112,000	146,000	188,000
Firearms	1,779,000	859,000	734,000
Builders' hardware, etc	2,466,000	3,858,000	6,140,000
Nails	293,000	440,000	821,000
Stoves and ranges	196,000	248,000	304,000
All other	2,284,000	3,987,000	8,193,000
Lamps, chandeliers, etc	546,000	909,000	730,000
Total	7,940,000	10,534,000	18,955,000
Increase over preceding figures	----------	2,594,000	8,421,000
Increase ..... per cent.	----------	33.93	80

It will be seen that in these manufactures the German increase in the five years closing with 1895 was very small. Based on the average of the five years from 1886 to 1890, inclusive, they show smaller progress yet. The total increase of the average of 1891 to 1895 over the increase of the five years of 1886 to 1891 is but 7,000,000 marks, or $1,666,000, an increase of barely 3 per cent. The American increase in the exports of these manufactures has been prodigious. It is an increase of 82 per cent over 1891, i. e., $18,955,000 in 1896 against $10,534,000 in the former year. Germany shows no advance over the figures of the year 1891.

The German exports of clocks and watches and parts of watches, gold, silver, or any other material, amounted in 1886 to $1,808,800, in 1891 to $2,689,000, and in 1895 to $1,737,000.

The American exports in these, while lower in 1891 by $1,000,000 than those of Germany, in 1896 were but about $100,000 behind the exports of Germany for 1895, the last year accessible for full information upon German trade. America shows a progressive export, while Germany falls behind the exports of 1891 by nearly $1,000,000.

Carriages and cars and parts of cars have gone back from the figures of 1891 by over $2,000,000, but are still considerably ahead of the exports of Germany.

Eliminating these here-named articles from the general list counted up in Table I, we have machinery of all kinds, agricultural implements, instruments, and apparatus of all kinds left to set against German exportations classified under the heading of machines, instruments, and apparatus of all kinds. The amounts for these exported in 1886 is $27,203,000; for 1891, $36,509,000; for 1895, $47,147,000.

The American exports in the same lines present the following figures:

Article.	Fiscal year—		
	1886.	1891.	1896.
Agricultural implements	$2,367,000	$3,219,000	$4,644,000
Cycles, and parts of	----------	----------	3,796,000
Instruments and apparatus for scientific purposes	490,000	1,576,000	2,717,000
Sewing machines	2,505,000	2,899,000	3,051,000
Other machinery	4,469,000	13,425,000	22,513,000
Scales and balances	281,000	319,000	377,000
Musical instruments	871,000	1,326,000	1,269,000
Total	11,053,000	22,733,000	38,367,000
Increase over figures of preceding five years	----------	11,680,000	14,634,000
Increase ..... per cent.	----------	105	64.4

While 1891 shows yet a difference of $14,000,000 and of 38 per cent below the exports of Germany, the year 1896, but five years later, shows only $9,000,000 and 18½ per cent below the export figures of Germany, considerable as has been the increase in exports in Germany in these lines of goods. We have certainly reached in 1895 beyond the exports of Germany for 1891, and even for 1894, when they were only 4,000,000 marks more than in 1891, as a great increase over any of the preceding figures has taken place in German exports of this class in 1895.

An equal showing of industrial progress of the decade for the closing of which, to wit, 1895, comparative data are at hand from the United Kingdom and Germany, can be made by reference to the output of coal and pig iron.

II.—*Number of tons of coal and of pig iron produced in the United States, the United Kingdom, and Germany in the ten years from 1886 to 1895, inclusive.*

[2,240 pounds for the United States and United Kingdom, and metric tons of 2,200 pounds for Germany.]

*1885 to 1895. †1885 to 1894.

For Germany the output of coal takes in coal proper and lignites, a species of coal not made use of in the United States or the United Kingdom as extensively as in Germany, so far as I know.

A somewhat more marked and steady progress is shown from the German accounts from 1888 on, but still the progress is left away behind by the progress made by the United States.

A similar result do we get by a comparison of the quantities of raw materials consumed by the three countries in those textile industries which give the most employment to human labor—the cotton and wool industries.

I submit comparative tables of the number of pounds of cotton consumed in the mills of the United States, the United Kingdom, and Germany. This takes in all the cottons consumed for the United States, whether of American growth or foreign.

The comparison, starting with 1886, shows for the United States an increase of 39 per cent over 1886, Great Britain of only 2.4 per cent, and Germany of 65.9 per cent. But as Germany's start was from a base of 354,000,000 pounds, that of England from 1,517,000,000 pounds, and of the United States from 1,128,000,000 pounds, it is natural that a percentage increase is very much larger for Germany, although the increase in the pounds is not much over one-half of that of the United States.

Equally impressive are the figures relating to the number of pounds of wool produced and retained for home consumption, and the pounds of imported wools retained for home consumption by the three countries.

III.—*Quantity of cotton consumed in the United States, the United Kingdom, and Germany in each of the ten years from 1886 to 1895.*

Year.	United States.	Per cent of increase.	United Kingdom.	Per cent of increase.	Germany.	Per cent of increase.

1890	275,768,000	105,431,000	377,911,000	170,507,000	292,315,000	462,822,000	90,000,000	260,500,000	350,500,000
1891	284,708,000	129,303,000	411,373,000	184,471,000	335,789,000	520,260,000	87,000,000	311,130,000	398,130,000
1892	293,797,000	148,670,000	439,460,000	183,924,000	312,217,000	496,141,000	84,000,000	333,566,000	437,366,000
1893	303,061,000	172,433,000	471,276,000	174,601,000	331,578,000	506,179,000	81,000,000	291,604,000	372,604,000
1894	297,353,000	55,152,000	348,712,000	167,274,000	359,541,000	526,815,000	80,000,000	349,905,000	429,905,000
1895	305,468,000	206,033,000	509,159,000						
1895*	290,000,000	248,989,000	538,989,000	156,977,000	370,443,000	527,420,000	80,000,000	397,647,000	477,647,000

*Calendar year.

The data for this and the preceding comparative tables I have taken for the United States from the Statistical Abstract of the United States for the year 1896, for the United Kingdom from the Statistical Abstract for the United Kingdom for the year 1896, and for Germany from Statistisches Jahrbuch für das Deutsche Reich für 1896. For the United Kingdom and Germany I could not take the pounds of wool produced and retained for home consumption that were of domestic growth. The figures are not given in these compilations. But I took the nearest approach to correctness, by taking the number of sheep which is published in the abstracts for Great Britain for each year, and multiplied the number by 6, which is about the average of wool per sheep. This is not absolutely correct, and may be somewhere above the actual yield. It is below the yield for the United States per sheep, but it must be borne in mind that while in Great Britain the wool is washed on the sheep's back before shearing, American wool is mostly sold in the grease.

From these figures I deducted the number of pounds of wool of domestic growth exported, and so got the net result of wool retained at home for manufacturing purposes.

For Germany I had to make a similar estimate. Here, however, I had not the years specially given. The census of sheep and of all live stock is taken every ten years only. Now, it is not at all peculiar, though it is noteworthy, that though all other live stock has increased from the days of the sixties in Germany, sheep have decreased by more than 50 per cent. The sheep in the sixties for the territory that now comprises the German Empire were 28,000,000; in 1873 the first census of live stock shows sheep numbered 25,000,000, or, strictly speaking, 24,999,400. By 1883 they had fallen to 19,189,700, and by 1893, the census having been taken on December 1, 1892, the number showed 13,589,600.

Now, taking 1892 as my base, I found in the ten years a decline of 5,600,000, and figuring backward, I reduced for each year following 1892 the number by 500,000, and increased the number for the years back of 1892 to that extent.

For Germany I also included the net amount of wool tops imported, making due allowance for the difference in weight for tops to make them equal to the greasy wool that has been consumed in their production. For the United Kingdom this was not necessary, as the wool tops imported would be nearly balanced by the exports, and the United States do not figure in exports or imports of tops to any extent.

For the United States I have given the fiscal year ending with June 30, while in the United Kingdom and Germany the year ends with December 31. For 1895 I have taken, besides the fiscal year for the United States, an account of the calendar year ending December 31 in the wool tables. This, besides making the year equal to that of the two countries named, is necessary for another reason, because 1895 was the full year of twelve months within which the tariff of 1894 was operative in woolen goods and free wool.

I have the account of the wool produced and retained for consumption for the fiscal year in the Statistical Abstract, but for the calendar year I had no account, and I took into consideration the decrease of sheep reported for the year 1896 below that of 1895; and as that decrease was about 10 per cent, I reduced the wool produced and retained for consumption about 5 per cent, as 5 per cent would cover the six months that are not part of the fiscal year 8195.

It is shown from the tabulation that 1895, the calendar year, consumed more wool in the United States than was consumed in the United Kingdom or Germany, although the prosperity of the woolen trade in the United Kingdom in 1895 was of such a nature as had barely been seen within the memory of this generation in the Yorkshire district.

The saving clause has, however, to be borne in mind all the time, that these wool statements are all for the wools as marketed, and not as they yield in manufacturing. It is, therefore, impossible to make the comparison as correct as in cotton. A safer base would be, perhaps, to add to the domestic wool retained for home consumption for Germany and England a proportionate amount per sheep to bring the comparison to the American wool, but if we were to add, to bring it to that ratio, say, 1 pound per sheep, this would give an addition of 30,000,000, and allowing for the exports of domestic wools, an addition of about 25,000,000 to the amount would perhaps cover that difference. Even then the approach of the United States to the wool consumption of Great Britain is very close, making the excess of consumption of wool of the United Kingdom but 15,000,000 pounds over that of the United States.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST], to strike out paragraphs 366 and 367 and insert paragraph 283 of the existing law, which has been heretofore read.

Mr. VEST. On that I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. DEBOE (when his name was called). I am paired with the Senator from Nebraska [Mr. ALLEN].

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH]. If he were present, I should vote "nay."

Mr. HAWLEY (when his name was called). I am paired with the Senator from Tennessee [Mr. BATE].

Mr. McLAURIN (when his name was called). I am paired with the Senator from North Carolina [Mr. PRITCHARD].

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA], and therefore withhold my vote.

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER]. I see he is not in the Chamber, and I therefore withhold my vote.

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER].

The roll call was concluded.

Mr. HAWLEY. The Senator from South Carolina [Mr. McLAURIN] and I have agreed to transfer our pairs. He is paired with the Senator from North Carolina [Mr. PRITCHARD], and I am paired with the Senator from Tennessee [Mr. BATE]. This leaves the Senator from South Carolina and me at liberty to vote. I vote "nay."

Mr. McLAURIN. Under that arrangement I am at liberty to vote, and vote "yea."

Mr. PASCO (after having voted in the affirmative). I notice that the Senator from Washington [Mr. WILSON] with whom I am paired has not voted, and I therefore withdraw my vote.

The result was announced—yeas 22, nays 30; as follows:

YEAS—22.

Bacon,	Gorman,	Mallory,	Turpie,
Caffery,	Gray,	Martin,	Vest,
Chilton,	Harris, Kans.	Mills,	Walthall,
Clay,	Jones, Ark.	Morgan,	White.
Cockrell,	Kenney,	Pettus,	
Faulkner,	McLaurin,	Roach,	

NAYS—30.

Allison,	Foraker,	McEnery,	Sewell,
Burrows,	Frye,	Mantle,	Shoup,
Carter,	Gallinger,	Penrose,	Spooner,
Chandler,	Hale,	Perkins,	Stewart,
Clark,	Hawley,	Platt, Conn.	Teller,
Davis,	Hoar,	Platt, N. Y.	Wetmore.
Elkins,	Lodge,	Proctor,	
Fairbanks,	McBride,	Quay,	

NOT VOTING—37.

Aldrich,	Gear,	Mason,	Thurston,
Allen,	George,	Mitchell,	Tillman,
Baker,	Hanna,	Morrill,	Turner,
Bate,	Hansbrough,	Murphy,	Warren,
Berry,	Harris, Tenn.	Nelson,	Wellington,
Butler,	Heitfeld,	Pasco,	Wilson,
Cannon,	Jones, Nev.	Pettigrew,	Wolcott.
Cullom,	Kyle,	Pritchard,	
Daniel,	Lindsay,	Rawlins,	
Deboe,	McMillan,	Smith,	

So Mr. VEST's amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 126, paragraph 368, line 5, after the word "shawls," to strike out the comma; and in line 6, after the word "knitted," to strike out "underwear" and insert "articles;" so as to read:

368. On clothing, ready-made, and articles of wearing apparel of every description, including shawls whether knitted or woven, and knitted articles of every description, made up or manufactured wholly or in part, etc.

The amendment was agreed to.

The next amendment was, on page 126, paragraph 368, line 7, after the word "part," to strike out "felts not woven and not specially provided for in this act."

Mr. ALLISON. I ask that that amendment may be disagreed to.

Mr. JONES of Arkansas. What will be the effect of that?

Mr. ALLISON. To put those articles in the basket clause.

Mr. JONES of Arkansas. At what rate? Forty-five per cent?

Mr. ALLISON. At 45 per cent, I think.

The PRESIDING OFFICER. Without objection, the amendment will be disagreed to. The Chair hears none, and it is disagreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 126, paragraph 368, line 11, before the word "pound," to strike out "a" and insert "one;" and in line 12, before the words "per centum," to strike out "sixty" and insert "fifty-five;" so as to make the paragraph read:

368. On clothing, ready-made, and articles of wearing apparel of every description, including shawls, whether knitted or woven, and knitted articles of every description, made up or manufactured wholly or in part, felts not woven and not specially provided for in this act, composed wholly or in part of wool, the duty per pound shall be four and one-half times the duty imposed by this act on 1 pound of unwashed wool of the first class, and in addition thereto 55 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. Mr. President, I want to call attention to the effect of this amendment in paragraph 368. In the first classification on clothing, ready-made, and articles of wearing apparel of every description, valued at not over 40 cents per pound, the duty is 171.15 per cent; on the next classification, of knit fabrics, valued at not over 40 cents per pound, the duty is 140 per cent; and upon the last specification, upon hats, valued at not over 30 cents per pound, the duty is 203.48 per cent; in other words, if a hat costs $2 abroad and comes into this country, it is taxed $4.50, making it cost the American citizen, who wants to cover his head from the weather, $6.50 on a foreign article worth $2. It is 203.48 per cent upon an ordinary, common hat which can be bought abroad at $2, and that is a very good hat abroad. The duty would be within 2 cents of $4.50. I move to strike out the paragraph and to insert paragraph 284 of the existing law.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to strike out paragraph 368 and to insert in lieu thereof:

On clothing, ready-made, and articles of wearing apparel of every description, made up or manufactured wholly or in part, not specially provided for in this act, felts not specially provided for in this act, all the foregoing composed wholly or in part of wool, worsted, the hair of the camel, goat, alpaca, or other animals, including those having india rubber as a component material, valued at above $1.50 per pound, 50 per cent ad valorem; valued at less than $1.50 per pound, 45 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. DEBOE (when his name was called). I am paired with the Senator from Nebraska [Mr. ALLEN].

Mr. GRAY (when his name was called). I am paired with the senior Senator from Illinois [Mr. CULLOM].

Mr. PASCO (when his name was called). I again announce my pair with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "yea."

Mr. RAWLINS (when his name was called). The Senator from Iowa [Mr. GEAR] will transfer his pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Ohio [Mr. HANNA], with whom I am paired, and the Senator from Iowa and I will vote. I vote "yea."

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON].

Mr. WARREN (when his name was called). I again announce my pair with the junior Senator from Washington [Mr. TURNER].

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER].

The roll call was concluded.

Mr. DAVIS. I desire to inquire if the Senator from Indiana [Mr. TURPIE] has voted?

The PRESIDING OFFICER. He has not voted, the Chair is informed.

Mr. DAVIS. Being paired with that Senator, I withhold my vote.

Mr. GEAR. I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Ohio [Mr. HANNA], and will vote. I vote "nay."

The result was announced—yeas 20, nays 28; as follows:

YEAS—20.

Bacon,	Faulkner,	McLaurin,	Rawlins,
Caffery,	Harris, Kans.	Mallory,	Roach,
Chilton,	Heitfeld,	Martin,	Vest,
Clay,	Jones, Ark.	Mills,	Walthall,
Cockrell,	Kenney,	Pettus,	White.

NAYS—28.

Allison,	Foraker,	McEnery,	Quay,
Burrows,	Frye,	Mantle,	Sewell,
Carter,	Gallinger,	Penrose,	Shoup,
Chandler,	Gear,	Perkins,	Spooner,
Clark,	Hawley,	Platt, Conn.	Stewart,
Elkins,	Lodge,	Platt, N. Y.	Teller,
Fairbanks,	McBride,	Proctor,	Wetmore.

NOT VOTING—41.

Aldrich,	George,	McMillan,	Thurston,
Allen,	Gorman,	Mason,	Tillman,
Baker,	Gray,	Mitchell,	Turner,
Bate,	Hale,	Morgan,	Turpie,
Berry,	Hanna,	Morrill,	Warren,
Butler,	Hansbrough,	Murphy,	Wellington,
Cannon,	Harris, Tenn.	Nelson,	Wilson,
Cullom,	Hoar,	Pasco,	Wolcott.
Daniel,	Jones, Nev.	Pettigrew,	
Davis,	Kyle,	Pritchard,	
Deboe,	Lindsay,	Smith,	

So Mr. VEST's amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 369, page 126, line 23, before the word "cents," to strike out "sixty" and insert "forty;" so as to make the paragraph read:

369. Webbings, gorings, suspenders, braces, bandings, beltings, bindings, braids, galloons, edgings, insertings, flouncings, fringes, gimps, cords, cords and tassels, laces and other trimmings and articles made wholly or in part of lace, embroideries and articles embroidered by hand or machinery, head nets, netting, buttons or barrel buttons or buttons of other forms for tassels or ornaments, and manufactures of wool ornamented with beads or spangles of whatever material composed, any of the foregoing made of wool or of which wool is a component material, whether composed in part of india rubber or otherwise, 40 cents per pound and 60 per cent ad valorem.

Mr. ALLISON. In line 23 I move to amend the committee amendment by striking out "forty" and inserting "fifty;" and in line 24 by striking out "sixty" and inserting "fifty-five;" so as to read:

Fifty cents per pound and 55 per cent ad valorem.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. VEST. Without the amendment just adopted, as proposed by the Senator from Iowa, the duty upon the articles named in paragraph 369 is 80 per cent ad valorem. With the addition he has made of 10 cents it would be 100 per cent.

Mr. ALLISON. The committee reduced the ad valorem in line 24 to 55 per cent. The Senator from Missouri should take that into account.

Mr. VEST. I did not notice that. I did not catch the last amendment. The ad valorem is reduced from 60 to 55 per cent.

For the sake of argument, I will take it at the rate of 80 per cent ad valorem, which it unquestionably is. What is the practical result of this sort of taxation? This paragraph includes suspenders. I will take that because it is an article of ordinary use

by the male sex. For a pair of suspenders appraised at 50 cents the price is increased to 90 cents at 80 per cent. It would cost a poor man who wants to buy a pair of suspenders worth 50 cents 90 cents instead of 50. Of course the American manufacturer, because this is a protective duty—and unless it increases the price, there is no protection in the paragraph—goes just inside the tariff line and charges 85 cents, so that at the very lowest calculation the consumer pays 35 cents more by reason of the proposed legislation upon this article of ordinary and prime necessity.

I move to strike out paragraph 369 and insert paragraph 286 of the existing law; and upon that I call for the yeas and nays.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. It is proposed to strike out paragraph 369 and insert in lieu thereof the following:

On webbings, gorings, suspenders, braces, beltings, bindings, braids, galloons, fringes, gimps, cords, cords and tassels, dress trimmings, laces, embroideries, head nets, nettings and veilings, buttons, or barrel buttons, or buttons of other forms, for tassels or ornaments, any of the foregoing which are elastic or nonelastic, made of wool, worsted, the hair of the camel, goat, alpaca, or other animals, or of which wool, worsted, the hair of the camel, goat, alpaca, or other animals is a component material, 50 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri, on which the yeas and nays have been demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I again transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Ohio [Mr. HANNA], and will vote. I vote "nay."

Mr. GRAY (when his name was called). I am paired with the senior Senator from Illinois [Mr. CULLOM]. If he were present, I should vote "yea."

Mr. PLATT of New York (when his name was called). I am paired with the senior Senator from New York [Mr. MURPHY], and therefore withhold my vote.

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA], but my pair has been transferred to the Senator from New Jersey [Mr. SMITH], and I will vote. I vote "yea."

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL].

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER].

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. TILLMAN. I have a pair with the Senator from Nebraska [Mr. THURSTON].

Mr. JONES of Arkansas. I am paired with the Senator from Maine [Mr. HALE], and therefore withhold my vote.

The result was announced—yeas 23, nays 27; as follows:

YEAS—23.

Bacon,	Gorman,	Martin,	Roach,
Caffery,	Harris, Kans.	Mills,	Turpie,
Chilton,	Heitfeld,	Morgan,	Vest,
Clay,	Kenney,	Pasco,	Walthall,
Cockrell,	McLaurin,	Pettus,	White.
Faulkner,	Mallory,	Rawlins,	

NAYS—27.

Allison,	Foraker,	McBride,	Shoup,
Burrows,	Frye,	McEnery,	Spooner,
Carter,	Gallinger,	Penrose,	Stewart,
Chandler,	Gear,	Perkins,	Teller,
Davis,	Hawley,	Platt, Conn.	Wetmore,
Elkins,	Hoar,	Proctor,	Wilson.
Fairbanks,	Lodge,	Quay,	

NOT VOTING—39.

Aldrich,	Deboe,	Lindsay,	Pritchard,
Allen,	George,	McMillan,	Sewell,
Baker,	Gray,	Mantle,	Smith,
Bate,	Hale,	Mason,	Thurston,
Berry,	Hanna,	Mitchell,	Tillman,
Butler,	Hansbrough,	Morrill,	Turner,
Cannon,	Harris, Tenn.	Murphy,	Warren,
Clark,	Jones, Ark.	Nelson,	Wellington,
Cullom,	Jones, Nev.	Pettigrew,	Wolcott.
Daniel,	Kyle,	Platt, N. Y.	

So Mr. VEST's amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 370, page 126, line 26, after the word "plain," to strike out "carpets woven whole for rooms;" and in line 1, page 127, after the word "description," to strike out "and oriental, Berlin, and other similar rugs;" so as to make the paragraph read:

370. Aubusson, Axminster, moquette, and chenille carpets, figured or plain, and all carpets or carpeting of like character or description, 60 cents per square yard, and in addition thereto 40 per cent ad valorem.

Mr. ALLISON. In line 2, page 127, after the word "sixty," I move to insert "two and a half;" so as to read, "62½ cents a square yard."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. VEST. I desire to call attention to the fact that without the 2½ cents just added by the amendment of the Senator from Iowa the duty in this paragraph is 64.40 per cent. That is increased by 2½ cents under the amendment now proposed. I move to strike out "62½ cents per square yard, and in addition thereto," so as to leave the duty as it is under existing law, 40 per cent ad valorem; and on that I call for the yeas and nays.

The PRESIDING OFFICER. The amendment proposed by the Senator from Missouri will be stated.

The SECRETARY. In paragraph 370, line 2, it is proposed to strike out "62½ cents per square yard, and in addition thereto;" so as to read:

Forty per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri [Mr. VEST].

Mr. VEST. On that I call for the yeas and nays.

The yeas and nays were ordered.

Mr. WHITE. Can the Senator from Iowa state why 2½ cents is added? It seems that the amount in the McKinley law is somewhat less than that fixed in the present bill. Two and a half cents, I presume, has been placed in the bill as some kind of a compensatory duty. I do not know whether the Senator from Iowa is able to state just how the figures are made.

Mr. GRAY. I suggest that it sounds better, if there is no other reason for it.

Mr. WHITE. "Two and a half" sounds better than "three?" Perhaps the demand was for 5 cents, and there was a compromise. The words "and oriental, Berlin, and other similar rugs" are eliminated for the purpose of inserting the same in a separate paragraph, known in this bill as 376½.

I have here a letter from a very extensive and respectable establishment in San Francisco—the firm of W. & J. Sloane & Co. It is addressed to me, and is as follows:

SAN FRANCISCO, *May 14, 1897.*

We desire to call your attention to the proposed schedule on oriental, Berlin, and Axminster carpets (in one piece) introduced by the Finance Committee of the United States Senate, and we wish to enter our strong protest against such outrageous rates.

We are perfectly in sympathy with the tariff that will shut out a large amount of the cheap oriental stuff that has been flooding this country at the expense of the manufacturers and weavers of this country, but there is a large amount of oriental goods imported which does not interfere with anything made here, and therefore should be taxed no higher rate than other grades of carpet imported into this country.

We claim that the McKinley rate of 40 per cent ad valorem and 60 cents per square yard is adequate protection against all importations of cheap oriental stuff, and is a fair rate on Berlin and Axminster carpets.

We, here on the Pacific Coast, as dealers and consumers, have much at stake, and do not see why a prohibitory duty should be put on these goods, for that is what it would amount to were the proposed schedule adopted.

Trusting you will see to it and do all in your power to prevent the adoption of such unreasonable rates of tariff,

We remain, with much respect, W. & J. SLOANE & CO.

Mr. ALLISON. I will say to the Senator from California that I shall propose a substitute for the oriental rug paragraph which he is now discussing.

Mr. WHITE. I desire to ask the Senator from Iowa whether the substitute prepared by him will reduce the rates proposed in paragraph 376½, so that they will not be greater than the rates prescribed in paragraph 370?

Mr. ALLISON. Some of them will be a little greater, and I think some of them will be less.

Mr. WHITE. The average, I assume, is greater, or the Senator would not propose to make a separate paragraph of it. It is not for the purpose of lowering the tariff that the Senate suggests a separate paragraph.

Mr. ALLISON. I will state that the rates will be much lower than in the present paragraph as proposed originally by the committee.

Mr. WHITE. Yes, sir.

Mr. ALLISON. On the lower grades of oriental rugs I do not think the rates will be any higher, if as high, as they are in the paragraph. On the higher grades they will be higher.

Mr. WHITE. On the higher grades the duty will be higher.

Mr. ALLISON. Yes, sir; for the reason that the paragraph which I will propose later on provides really for 90 cents a square yard and 40 per cent ad valorem.

Mr. WHITE. I will defer further discussion of this matter until I hear the amendment which the committee propose to suggest. I will not say anything further upon this paragraph. The matter may be discussed when we reach that paragraph.

Mr. ALLISON. I will answer the former question of the Senator from California. The reason why we propose 2½ cents additional here is to adjust the matter with respect to the additional duty proposed upon wool of the third class.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri, on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I desire to announce my pair with the Senator from Kansas [Mr. HARRIS]. He is not present, and I withhold my vote.

Mr. DEBOE (when his name was called). I am paired with the Senator from Nebraska [Mr. ALLEN].

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Ohio [Mr. HANNA], and vote "nay."

Mr. PLATT of New York (when his name was called). I desire to announce that upon this particular vote and for all other votes to-day I am paired with the senior Senator from New York [Mr. MURPHY].

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA]. That pair has been transferred to the Senator from New Jersey [Mr. SMITH], with whom the Senator from Iowa [Mr. GEAR] is paired, and I am at liberty to vote. I vote "yea."

Mr. WARREN (when his name was called). I again announce my pair with the junior Senator from Washington [Mr. TURNER].

Mr. WELLINGTON (when his name was called). I have a general pair with the junior Senator from North Carolina [Mr. BUTLER]. I will transfer that pair to the Senator from Nevada [Mr. JONES], and vote. I vote "nay."

The roll call was concluded.

Mr. PETTUS (after having voted in the affirmative). The Senator from Massachusetts [Mr. HOAR] not having voted, I withdraw my vote.

The result was announced—yeas 20, nays 28; as follows:

YEAS—20.

Bacon,	Faulkner,	Mallory,	Roach,
Caffery,	Heitfeld,	Mills,	Turpie,
Chilton,	Jones, Ark.	Morgan,	Vest,
Clay,	Kenney,	Pasco,	Walthall,
Cockrell,	McLaurin,	Rawlins,	White.

NAYS—28.

Allison,	Foraker,	McEnery,	Quay,
Burrows,	Frye,	Nelson,	Shoup,
Carter,	Gallinger,	Penrose,	Spooner,
Chandler,	Gear,	Perkins,	Stewart,
Davis,	Hawley,	Platt, Conn.	Wellington,
Elkins,	Lodge,	Pritchard,	Wetmore,
Fairbanks,	McBride,	Proctor,	Wilson.

NOT VOTING—41.

Aldrich,	George,	Lindsay,	Sewell,
Allen,	Gorman,	McMillan,	Smith,
Baker,	Gray,	Mantle,	Teller,
Bate,	Hale,	Martin,	Thurston,
Berry,	Hanna,	Mason,	Tillman,
Butler,	Hansbrough,	Mitchell	Turner,
Cannon,	Harris, Kans.	Morrill,	Warren,
Clark,	Harris, Tenn.	Murphy,	Wolcott.
Cullom,	Hoar,	Pettigrew,	
Daniel,	Jones, Nev.	Pettus,	
Deboe,	Kyle,	Platt, N. Y.	

So Mr. VEST's amendment was rejected.

ENROLLED BILLS SIGNED.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the Speaker of the House had signed the following enrolled joint resolutions:

A joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits; and

A joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard.

DEATH OF REPRESENTATIVE COOKE.

The message also communicated to the Senate the intelligence of the death of EDWARD DEAN COOKE, late a member of the House from the State of Illinois, and transmitted resolutions of the House thereon.

The message further announced that the Speaker of the House had appointed Mr. FOSS, of Illinois; Mr. PRINCE, of Illinois; Mr. BELKNAP, of Illinois; Mr. UPDEGRAFF, of Iowa; Mr. ROYSE, of Indiana; Mr. PLOWMAN, of Alabama; Mr. HUNTER, of Illinois; Mr. DINSMORE, of Arkansas, and Mr. SPALDING, of Michigan, as the committee on the part of the House to take charge of the funeral arrangements.

The PRESIDING OFFICER. The Chair lays before the Senate resolutions from the House of Representatives, which will be read.

The Secretary read as follows:

IN THE HOUSE OF REPRESENTATIVES, *June 24, 1897.*

Resolved, That the House has heard with profound sorrow of the death of Hon. EDWARD DEAN COOKE, late a Representative from the State of Illinois.

Resolved, That a committee of nine members of the House be appointed by the Speaker to act with such Senators as may be selected, to attend the funeral of the deceased; that the Sergeant-at-Arms of the House shall take order for superintending the funeral of the deceased at his home; and that the necessary expenses attending the execution of this order shall be paid out of the contingent fund of the House.

Resolved, That as a mark of respect to his memory the House do now adjourn.

Resolved, That the Clerk communicate these resolutions to the Senate.

Mr. SPOONER. Mr. President, I have been requested by the senior Senator from Illinois [Mr. CULLOM], who is ill at his home, and whose colleague [Mr. MASON] is absent from the city, to state that on a later day he will ask the Senate to pay appropriate tribute to the worth and public services of his deceased colleague. I offer and move the adoption of the resolutions which I send to the desk.

The PRESIDING OFFICER. The resolutions will be read.

The Secretary read the resolutions, as follows:

Resolved, That the Senate has heard with deep sensibility the announcement of the death of Hon. EDWARD DEAN COOKE, late a Representative from the State of Illinois.

Resolved, That a committee of five Senators be appointed by the Presiding Officer, to join the committee appointed on the part of the House of Representatives, to attend the funeral of the deceased.

Resolved, That the Secretary communicate these resolutions to the House of Representatives.

The PRESIDING OFFICER. The question is on the adoption of the resolutions submitted by the Senator from Wisconsin.

The resolutions were unanimously agreed to.

The PRESIDING OFFICER. Under the terms of the second resolution, the Presiding Officer will appoint the Senator from Illinois [Mr. MASON], the Senator from Wisconsin [Mr. SPOONER], the Senator from Montana [Mr. CARTER], the Senator from Florida [Mr. PASCO], and the Senator from Washington [Mr. TURNER] as the committee on the part of the Senate.

Mr. SPOONER. As a further mark of respect to the memory of the deceased, I move that the Senate do now adjourn.

The motion was unanimously agreed to; and (at 5 o'clock and 3 minutes p. m.) the Senate adjourned until to-morrow, Friday, June 25, 1897, at 11 o'clock a. m.

HOUSE OF REPRESENTATIVES.

THURSDAY, *June 24, 1897.*

The House met at 12 o'clock m. The Chaplain, Rev. HENRY N. COUDEN, offered the following prayer:

Our Father who art in Heaven, we bless Thee for that kind care and protection which has brought us to the light and joy of this another day, and for all those silent yet mighty forces which are ever working for righteousness in our souls. Help us, we beseech Thee, to meet with patience all the sorrows and afflictions of this life and turn them to our good.

We recognize, O Heavenly Father, in the sudden death of one of the members of this House a great calamity; and we pray Thee that all those who are near and dear to him may be comforted by those blessings which are ever coming down from Thee and touching the souls of men. And help us all to learn the lesson that life is precarious and that death may be visited upon any of us at any time. May we be prepared at whatever hour it may come, that we may pass onward and upward to that larger life under the leadership of Jesus Christ our Lord. Amen.

The Journal of the proceedings of Monday last was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard; in which the concurrence of the House was requested.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits.

ENROLLED JOINT RESOLUTIONS SIGNED.

The SPEAKER announced his signature to enrolled joint resolutions of the following titles:

Joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits; and

Joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard.

ARBITRATION.

The SPEAKER. The Chair desires to announce that he has received a communication from the president of the Belgian Chamber of Deputies, inviting such members of the House as may be able to do so to attend the interparliamentary conference in favor of arbitration, which will commence its session on the 6th of August next. The Chair wishes to state that he has been supplied with blank invitations, which he will be glad to fill out and furnish to such gentlemen as desire to attend.

DEATH OF HON. EDWARD DEAN COOKE.

Mr. FOSS. Mr. Speaker, it becomes my sad duty to announce the death of one of the members of this House, the Hon. EDWARD DEAN COOKE, of the State of Illinois. At some future day I shall ask this House to set apart a time when fitting tributes may be paid to his memory. I ask the Clerk to read the resolutions which I send to the desk.

The Clerk read as follows:

Resolved, That the House has heard with profound sorrow of the death of Hon. EDWARD DEAN COOKE, late a Representative from the State of Illinois.

Resolved, That a committee of nine members of the House be appointed by the Speaker to act with such Senators as may be selected to attend the funeral of the deceased; that the Sergeant-at-Arms of the House shall take order for superintending the funeral of the deceased at his home, and that the necessary expenses attending the execution of this order shall be paid out of the contingent fund of the House.

Resolved, That as a mark of respect to his memory the House do now adjourn.

Resolved, That the Clerk communicate these resolutions to the Senate.

Mr. FOSS. Mr. Speaker, I ask that the vote be first taken on the first two resolutions.

The question being taken, the first and second resolutions were unanimously adopted.

The SPEAKER announced the appointment of the following-named committee in pursuance of the second resolution just adopted: Mr. FOSS, of Illinois; Mr. PRINCE, of Illinois; Mr. BELKNAP, of Illinois; Mr. SPALDING, of Michigan; Mr. UPDEGRAFF, of Iowa; Mr. ROYSE, of Indiana; Mr. PLOWMAN, of Alabama; Mr. HUNTER, of Illinois, and Mr. DINSMORE, of Arkansas.

Mr. FOSS. I now ask the adoption of the remaining resolutions.

The question being taken on the last two resolutions, they were unanimously adopted; and in accordance therewith (at 12 o'clock and 10 minutes p. m.) the House adjourned, in pursuance of its previous order, till Monday next, at 12 o'clock m.

EXECUTIVE COMMUNICATION.

Under clause 2 of Rule XXIV, a letter from the Acting Secretary of the Navy, transmitting the information that it has been decided not to transport contributions of wheat to India, and that the Department has suspended its efforts to charter a vessel, was taken from the Speaker's table, referred to the Committee on Naval Affairs, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. SHAFROTH: A bill (H. R. 3514) to provide for the coinage of gold and silver bullion upon equal terms—to the Committee on Coinage, Weights, and Measures.

By Mr. JOHNSON of North Dakota: A bill (H. R. 3515) to authorize the purchase of a site for a hall of records or other purposes—to the Committee on Public Buildings and Grounds.

By Mr. SUTHERLAND: A bill (H. R. 3516) amendatory of section 2 of the act of June 27, 1890, and for other purposes—to the Committee on Invalid Pensions.

By Mr. MAXWELL: A bill (H. R. 3517) to fix the term of office of the reporter of the United States Supreme Court and provide an annual salary therefor; second, defining the duties of the reporter, and providing that the copyright of the reports, so far as it applies, shall be in behalf of the United States, and books shall be printed, electrotyped, and bound by the Government; third, the price at retail shall not exceed $1.50 per volume, with a discount to dealers in law books—to the Committee on the Judiciary.

By Mr. GREENE: A bill (H. R. 3518) to regulate the service and fix the hours of service for persons employed as policemen and officers in the District of Columbia—to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. BREWSTER: A bill (H. R. 3519) for the relief of Cyrus Roberts—to the Committee on Military Affairs.

By Mr. CLARDY: A bill (H. R. 3520) for the relief of the Christian Church of Henderson, Ky.—to the Committee on War Claims.

By Mr. DORR: A bill (H. R. 3521) for the relief of the trustees of the Presbyterian Church, Frenchcreek, Upshur County, W. Va.—to the Committee on War Claims.

By Mr. GREENE: A bill (H. R. 3522) granting a pension to Samuel Smith, of Alliance, Nebr.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3523) to remove the charge of desertion from the record of Robert Ellison, in the War Department—to the Committee on Military Affairs.

Also, a bill (H. R. 3524) granting a pension of $30 a month to Gustavus A. Kindblade—to the Committee on Invalid Pensions.

By Mr. HENRY of Mississippi: A bill (H. R. 3525) for the relief of the Mississippi Manufacturing Company, of Wesson, Miss.—to the Committee on War Claims.

By Mr. LAMB: A bill (H. R. 3526) for the relief of Mary Diamond—to the Committee on Pensions.

Also, a bill (H. R. 3527) granting an increase of pension to William M. Wallice—to the Committee on Pensions.

By Mr. PETERS: A bill (H. R. 3528) to remove the charge of desertion against Marion M. Barton—to the Committee on Military Affairs.

Also, a bill (H. R. 3529) to remove the charge of desertion against Alfred Rebsamen—to the Committee on Military Affairs.

Also, a bill (H. R. 3530) to remove the charge of desertion against Benjamin F. Sauterbin—to the Committee on Military Affairs.

Also, a bill (H. R. 3531) to remove the charge of desertion against James Bennett—to the Committee on Military Affairs.

Also, a bill (H. R. 3532) granting a pension to Alexander Miller—to the Committee on Pensions.

Also, a bill (H. R. 3533) for the relief of John M. Fleming—to the Committee on War Claims.

Also, a bill (H. R. 3534) granting a pension to James M. Stewart—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3535) granting a pension to William D. Tanner—to the Committee on Invalid Pensions.

By Mr. RIXEY (by request): A bill (H. R. 3536) to give the Court of Claims of the United States jurisdiction of the claims of the Alexandria and Washington Railroad Company and others against the United States for compensation for the use and occupation of the railroad of said company by the United States or the military authorities thereof—to the Committee on War Claims.

By Mr. ROBINSON of Indiana: A bill (H. R. 3537) to remove charge of desertion now standing against James Hennessy on rolls of War Department—to the Committee on Military Affairs.

By Mr. SHOWALTER: A bill (H. R. 3538) authorizing and directing the repayment to Josiah B. Orbison, of Donegal Township, Butler County, Pa., the sum of $300, with interest, that he paid to avoid the draft in 1863—to the Committee on Claims.

By Mr. SIMPSON of Kansas: A bill (H. R. 3539) granting a pension to James K. Wiley—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3540) granting an increase of pension to Oliver S. Coffin—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3541) granting an increase of pension to Peter H. Dougherty—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3542) granting a pension to E. E. Harvey—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3543) to correct the military record of Charles V. Landegent—to the Committee on Military Affairs.

By Mr. SULLOWAY: A bill (H. R. 3544) granting an increase of pension to Stephen W. Berry—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3545) granting an increase of pension to Ezekiel Towle—to the Committee on Invalid Pensions.

By Mr. SUTHERLAND: A bill (H. R. 3546) to correct the military record of Stephen Rice—to the Committee on Military Affairs.

Also, a bill (H. R. 3547) to correct the military record of James H. Foland—to the Committee on Invalid Pensions.

By Mr. UNDERWOOD: A bill (H. R. 3548) for the relief of William M. Lindsay—to the Committee on Claims.

By Mr. ZENOR: A bill (H. R. 3549) granting a pension to John Hammond, late a pilot on the Government transport *Mellmot*—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3550) granting pension to Martha Brisco, widow of the late Capt. Andrew J. Brisco—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3551) granting a pension to John Stephens, of the city of New Albany, Ind.—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3552) granting a pension to John W. Daugherty, of New Albany, Ind.—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BARTLETT: Petition of the Commercial Exchange of

Chicago, Ill., asking for a duty on tea—to the Committee on Ways and Means.

Also, remonstrance of Jackson G. Smith, of Barnesville, Ga., against a tariff on hides—to the Committee on Ways and Means.

Also, petition of the American Rattan and Reed Manufacturing Company, of Brooklyn, N. Y., urging the enactment of a law to prevent manufacturing by convict labor—to the Committee on Labor.

By Mr. BREWSTER: Remonstrances of 16 leading shoe manufacturers of Rochester, N. Y., against an increased duty on tanned skins for morocco—to the Committee on Ways and Means.

By Mr. CONNELL: Protest of the Scranton Central Labor Union, of Scranton, Pa., against change being made in the present tariff on tobacco—to the Committee on Ways and Means.

By Mr. DAVIDSON of Wisconsin: Petition of the Grand Army of the Republic, Department of Wisconsin, for the establishment of a military park at Vicksburg—to the Committee on Military Affairs.

Also, petition of the Grand Army of the Republic, Department of Wisconsin, in favor of military instruction in public schools—to the Committee on Military Affairs.

By Mr. DORR: Evidence to accompany House bill for the relief of the trustees of the Presbyterian church at French Creek, Upshur County, W. Va.—to the Committee on War Claims.

By Mr. EVANS: Petition of John Searcy and other citizens of Louisville, Ky., praying for the repeal of the civil-service law—to the Committee on Reform in the Civil Service.

By Mr. HARMER: Petitions of sundry citizens of Philadelphia, Pa., in favor of the passage of a bill for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. OLMSTED: Petition of Joseph W. Sheaffer and sundry other citizens of Harrisburg, Pa., praying for the passage of a law to further restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. RUSSELL: Petition of citizens of New London, Conn., favoring a more rigid immigration law—to the Committee on Immigration and Naturalization.

By Mr. ZENOR: Papers to accompany House bill No. 3122, granting a pension to James H. Land—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 3118, granting a pension to Capt. Richard F. Fuller—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 2464, for the relief of James Colvin—to the Committee on Military Affairs.

Also, papers to accompany House bill No. 2768, for the relief of George Peyton—to the Committee on Military Affairs.

SENATE.

FRIDAY, *June 25, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. QUAY, and by unanimous consent, the further reading was dispensed with.

ENROLLED BILLS SIGNED.

The VICE-PRESIDENT announced his signature to the following enrolled joint resolutions; which had previously been signed by the Speaker of the House of Representatives:

A joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits; and

A joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard.

PETITIONS AND MEMORIALS.

Mr. MALLORY presented the memorial of C. Jackson and 50 other citizens of Florida, and the memorial of E. O. Locke and 51 other citizens of Florida, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. ALLEN presented a petition of sundry citizens of Exeter, Nebr., praying for the early enactment of a protective-tariff law; which was ordered to lie on the table.

Mr. QUAY. I have here a memorial from the Erie Central Labor Union, signed by the secretary of that organization, which he requests me to read in order that it may go into the RECORD. I will accede to his request, by permission of the Senate. He says:

I am instructed by the Erie Central Labor Union to inform you that we are unalterably opposed to House bill No. 30, introduced by Mr. SHERMAN of New York, which is intended to destroy ticket brokerage.

The discussion on this question showed that, while we admit the ticket-brokerage system to be an evil in principle, it is now practically the only avenue by which the public is able to profit by the competition between the railroads.

When the railroads abandon underhand methods, there will be small need for abolishing the "scalper."

Yours, respectfully,

LOUIS F. HEMSE,
Chairman Legislative Committee, Erie Central Labor Union.

The VICE-PRESIDENT. The memorial will be referred to the Committee on Interstate Commerce.

Mr. QUAY presented the memorial of W. A. Kresse and 52 other citizens of Pennsylvania, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. CHANDLER. In behalf of the junior Senator from New Jersey [Mr. SEWELL], I present the memorial of sundry coal companies in reference to the duty on coal. The memorialists state that the Dominion of Canada is our best and practically our only foreign market for coal, purchasing from us 4 tons for every ton sold us, the difference increasing to 20 tons purchased of us to 1 ton sold if British Columbia is excluded, the exportation to Canada for the year ending June 30, 1896, being 1,370,856 tons of anthracite of a total exportation of 1,374,331 tons, and 1,675,109 tons of bituminous coal of a total exportation of 2,246,284 tons.

If a duty of 75 cents, or even 60 cents, is placed upon coal, as proposed in the pending tariff bill, it is certain that the Dominion of Canada will adopt a like tariff on American coal, which will largely curtail our export trade on anthracite coal, which is now admitted to Canada free, and greatly reduce our exports of bituminous coal and have a paralyzing effect upon a wide and important range of employment, including the mining and carrying trade.

The memorial gives the number of men and mines interested, set opposite their names. In the computation they aggregate not less than 340,000 men and 1,700,000 people directly and indirectly dependent upon this interest. The point of the petition which the Senator from New Jersey desires to have called especially to the attention of the Senate is the prayer "that a reciprocal clause may be inserted in the pending tariff bill wherein same relates to coal to the effect that whenever the President shall be satisfied that the Parliament of the Dominion of Canada or other competent authority has fixed a rate of duty collectible on bituminous coal produced in and imported from the United States into Canada not exceeding 75 cents nor less than 40 cents per ton, he may make proclamation of the fact, and after the date of such proclamation the duty collectible on all coal imported into the United States from the Dominion of Canada shall not exceed the rate mentioned in said proclamation so long as said rate of duty is maintained by the said Dominion."

I ask that the memorial may be printed and referred to the Committee on Finance. It is possible that a duplicate memorial may have been presented by some other Senator. The Senator from New Jersey, for whom I act, desires that special attention may be called to the facts stated in this petition.

The VICE-PRESIDENT. The memorial will be referred to the Committee on Finance and printed, in the absence of objection.

Mr. HOAR presented a memorial of sundry citizens of Massachusetts, remonstrating against any increase in the present rate of duty on tanned skins for morocco, or a duty on raw goatskins; which was ordered to lie on the table.

He also presented a petition of 21 citizens of North Adams, Mass., and a petition of sundry citizens of Cumberland, Miss., praying for the enactment of protective-tariff legislation, at the earliest possible date, such as will adequately secure American industrial products against the competition of foreign labor; which were ordered to lie on the table.

Mr. TELLER presented sundry memorials of citizens of Colorado, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. NELSON presented sundry memorials of citizens of Minnesota, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. FRYE presented the petitions of C. H. Prescott and sundry other citizens, of Robert McArthur and sundry other citizens, of James G. Brackett and 16 other citizens, of Calvin H. Foss and 28 other citizens, and of Burton H. Winslow and 35 other citizens, all of Biddeford, in the State of Maine, praying for the early enactment of a protective-tariff law; which were ordered to lie on the table.

Mr. ELKINS presented a petition of sundry citizens of New Milton, W. Va., and a petition of sundry citizens of Gladewater, Tex., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

Mr. LODGE presented sundry memorials of citizens of Massachusetts, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. FORAKER presented sundry memorials of citizens of Ohio, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

REPORTS OF COMMITTEES.

Mr. GRAY, from the Committee on Foreign Relations, reported a bill (S. 2284) to authorize Admiral T. O. Selfridge, United States Navy; Capt. G. H. Wadleigh, United States Navy; Lieut. Commander E. H. Gheen, United States Navy; Lieut. Commander Raymond P. Rodgers, United States Navy; Paymaster J. B. Redfield, United States Navy; Lieut. J. J. Hunker, United States Navy; Surg. D. N. Bertolette, United States Navy, and Ensign R. L. Russell, United States Navy, to accept medals presented to them by the Russian Government; which was read twice by its title.

Mr. CHANDLER, from the Committee on Privileges and Elections, reported an amendment intended to be proposed in the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

BILLS INTRODUCED.

Mr. MALLORY (by request) introduced a bill (S. 2285) for the relief of Thomas W. Lund; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Post-Offices and Post-Roads.

Mr. PETTIGREW introduced a bill (S. 2286) to incorporate the Washington and University Railroad Company, of the District of Columbia; which was read twice by its title, and referred to the Committee on the District of Columbia.

Mr. McLAURIN introduced a joint resolution (S. R. 51) authorizing the Secretary of War to transfer certain papers from the War Department to the United States district court for South Carolina, at Charleston, S. C.; which was read twice by its title, and referred to the Committee on the Judiciary.

ACTS AND RESOLUTIONS RELATING TO PACIFIC RAILROADS.

Mr. GEAR. I submit a resolution, and ask for its immediate consideration.

The resolution was read, as follows:

Resolved, That there be printed for the use of the Senate as a document 1,000 copies of all and singular the acts and resolutions of Congress relating to the Union Pacific Railroad Company and the Central Pacific Railroad Company.

Mr. ALLEN. I suggest to my friend from Iowa the propriety of having all these publications in one document.

Mr. GEAR. That is the object of the resolution.

Mr. ALLEN. And to let it embrace also answers to inquiries of the different Departments.

Mr. GEAR. That is not germane, I think, to the resolution. The resolution simply provides that all statutes which have been passed by Congress in regard to these railroads shall be printed, in order that we may have them in a convenient form for the use of the committee and the Senate.

Mr. ALLEN. Why not also embrace the decisions of the various courts, so that we can have a complete history of these roads? It occurs to me that it would be very advisable to have the decisions included.

Mr. HALE. Let the resolution be read again.

The Secretary again read the resolution.

Mr. HALE. It ought to go to the Committee on Printing. That will be a very great work.

Mr. GEAR. Oh, no; it will not make a very large volume.

Mr. STEWART. Five hundred dollars will cover the entire cost.

Mr. GEAR. I have no objection to the reference suggested. Let the resolution be referred to the Committee on Printing.

Mr. ALLEN. Before it goes to the Committee on Printing it ought to be amended.

Mr. DAVIS. I move to amend the resolution by inserting after "Central Pacific Railroad" the words "and the Western Pacific."

Mr. HOAR. Let the resolution be read again.

The Secretary again read the resolution.

Mr. HOAR. I was going to suggest that there be inserted after "resolutions of Congress" the words "or of either House thereof." I think there have been some resolutions passed separately which might well be included.

The VICE-PRESIDENT. Is there objection to that amendment? The Chair hears none.

Mr. ALLEN. I move to amend the resolution by including also the decisions of the Supreme Court on the different acts herein mentioned.

Mr. MORGAN. That would make it very voluminous. The amendment suggested by the Senator from Nebraska would make it a book of 2,000 pages. There is no occasion to have those opinions reprinted, because a great many of them are not necessary to an understanding of the railroad question so far as the Senate is concerned.

What we want is a compilation of the statutes that bear upon the Union Pacific and the Central Pacific and the branch roads, so that by looking over the statutes we can understand what Congress has done. That is as far as the committee propose to go. Now, to incorporate all the decisions of the Supreme Court would make it so voluminous that it would require an editor to go through to see what was and was not pertinent, and it could not take less than 2,000 pages to include those decisions. Some of those decisions cover 50 pages in the reports. I hope the Senator will not embarrass the resolution with such an amendment, because if we want a book of that kind we can have it printed separately. It is very necessary to have these statutes before the Senate when we are considering any question that comes up about the Pacific railroads.

Mr. ALLEN. I move to amend the resolution by inserting, after the word "Congress," the words "and decisions of the Supreme Court."

Mr. GEAR. I suggest to the Senator from Nebraska, if he is going to move that amendment, that he add, "decisions of the Supreme Court relating thereto."

Mr. ALLEN. Yes, "relating thereto."

The VICE-PRESIDENT. Is the amendment accepted? It is accepted, the Chair understands. The Senator from Iowa moves to refer the resolution as amended to the Committee on Printing.

The motion was agreed to.

HARBOR AT PITTSBURG, PA.

Mr. QUAY submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of War is hereby directed to examine as to the means necessary to preserve the harbor at Pittsburg, Pa., from unauthorized encroachment and other damage, for the work of dredging, for marking harbor lines, and patrolling harbor, and the probable expense thereof, and to report to the Senate thereon on or before the first Monday in December next.

PRIVILEGES OF THE FLOOR.

The VICE-PRESIDENT. The Chair lays before the Senate the notice of an amendment to Rule XXXIII, submitted yesterday by the Senator from Maine [Mr. HALE].

Mr. HALE. It was read yesterday. There is no necessity to read it again. Let it be referred to the Committee on Rules.

The proposed amendment was referred to the Committee on Rules, as follows:

Notice is hereby given that the following amendment will be proposed to Rule XXXIII of the Senate, relating to the privilege of the floor, to wit: In that clause of said rule which admits certain persons to the floor of the Senate while in session, relating to ex-Senators and Senators-elect, after the word "ex-Senators," to insert the following:

"Who are not interested in any claim or in the prosecution of the same, or directly in any bill pending before Congress."

The purpose of the proposed amendment is to prevent ex-Senators from enjoying the privileges of the floor of the Senate for the purpose of urging or opposing claims or bills in which they are employed as attorneys.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

The Secretary resumed the reading of the bill on page 127, line 4, paragraph 371.

The next amendment of the Committee on Finance was, in paragraph 371, page 127, line 6, after the word "sixty," to insert the word "two;" so as to make the paragraph read:

371. Saxony, Wilton, and Tournay velvet carpets, figured or plain, and all carpets or carpeting of like character or description, 62 cents per square yard, and in addition thereto 40 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I simply want to call attention to the fact that this amendment is an increase over the rate in the McKinley Act. Before this increase was made, the rate of duty proposed under this paragraph was 80.22 per cent ad valorem upon the articles therein named. I move to strike out "62 cents per square yard, and in addition thereto," so as to leave the duty where it is under existing law, 40 per cent ad valorem, and upon that I call for the yeas and nays.

The VICE-PRESIDENT. The amendment of the Senator from Missouri will be stated.

The SECRETARY. It is proposed to amend paragraph 371 by striking out, after the word "description," the words "62 cents per square yard, and in addition thereto;" so as to make the paragraph read:

371. Saxony, Wilton, and Tournay velvet carpets, figured or plain, and all carpets or carpeting of like character or description, 40 per cent ad valorem.

The VICE-PRESIDENT. The Senator from Missouri demands the yeas and nays upon agreeing to the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS]. In his absence, I withhold my vote.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH]. If he were present, I should vote "nay."

Mr. GRAY (when his name was called). I am paired with the senior Senator from Illinois [Mr. CULLOM].

Mr. HAWLEY (when his name was called). I am paired with the Senator from Tennessee [Mr. BATE].

Mr. MARTIN (when his name was called). I am paired with the Senator from Montana [Mr. MANTLE]. I should vote "yea" if he were present.

Mr. MITCHELL (when his name was called). I am paired with the junior Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORRILL (when his name was called). I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. RAWLINS (when his name was called). I am paired with the Senator from Ohio [Mr. HANNA]. If he were present, I should vote "yea."

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. He being absent, I withhold my vote.

Mr. WALTHALL (when his name was called). I am paired with the junior Senator from Wisconsin [Mr. SPOONER]. Otherwise I should vote "yea."

Mr. WELLINGTON (when his name was called). I am paired with the junior Senator from North Carolina [Mr. BUTLER], and therefore withhold my vote.

The roll call was concluded.

Mr. BURROWS (after having voted in the negative). I have transferred my pair with the Senator from Louisiana [Mr. CAFFERY] to the Senator from Nevada [Mr. JONES]. I will therefore let my vote stand.

Mr. WALTHALL. I am paired with the Senator from Wisconsin [Mr. SPOONER]. The Senator from Connecticut [Mr. HAWLEY] is paired with the Senator from Tennessee [Mr. BATE]. By an arrangement with the Senator from Connecticut, we have exchanged our pairs. I vote "yea."

Mr. HAWLEY. Under the arrangement just stated by the Senator from Mississippi [Mr. WALTHALL], I am at liberty to vote. I vote "nay."

Mr. MORRILL. I will transfer my pair with the Senator from Tennessee [Mr. HARRIS] to the Senator from New Hampshire [Mr. GALLINGER], and vote "nay."

The Secretary recapitulated the vote.

Mr. VEST. Let the result be announced. We do not want to sit here for half an hour waiting to get a quorum. The country is suffering now for want of this bill.

The result was announced—yeas 17, nays 24; as follows:

YEAS—17.

Allen,	Jones, Ark.	Pettigrew,	Walthall,
Clay,	McLaurin,	Pettus,	White.
Cockrell,	Mallory,	Roach,	
Faulkner,	Mills,	Turpie,	
Heitfeld,	Morgan,	Vest,	

NAYS—24.

Allison,	Fairbanks,	Lodge,	Platt, N. Y.
Burrows,	Foraker,	McBride,	Pritchard,
Carter,	Frye,	Morrill,	Proctor,
Chandler,	Hale,	Nelson,	Quay,
Davis,	Hawley,	Perkins,	Stewart,
Deboe,	Hoar,	Platt, Conn.	Teller.

NOT VOTING—48.

Aldrich,	Elkins,	Kyle,	Sewell,
Bacon,	Gallinger,	Lindsay,	Shoup,
Baker,	Gear,	McEnery,	Smith,
Bate,	George,	McMillan,	Spooner,
Berry,	Gorman,	Mantle,	Thurston,
Butler,	Gray,	Martin,	Tillman,
Caffery,	Hanna,	Mason,	Turner,
Cannon,	Hansbrough,	Mitchell,	Warren,
Chilton,	Harris, Kans.	Murphy,	Wellington,
Clark,	Harris, Tenn.	Pasco,	Wetmore,
Cullom,	Jones, Nev.	Penrose,	Wilson,
Daniel,	Kenney,	Rawlins,	Wolcott.

The VICE-PRESIDENT. Forty-one Senators have voted.

Mr. VEST. That discloses the absence of a quorum.

The VICE-PRESIDENT. A quorum not having voted, the roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Frye,	Mallory,	Proctor,
Allison,	Gear,	Martin,	Quay,
Burrows,	Gray,	Mills,	Rawlins,
Carter,	Hale,	Mitchell,	Roach,
Chandler,	Hawley,	Morgan,	Stewart,
Clark,	Heitfeld,	Morrill,	Teller,
Clay,	Hoar,	Nelson,	Thurston,
Cockrell,	Jones, Ark.	Perkins,	Tillman,
Davis,	Kyle,	Pettigrew,	Turpie,
Deboe,	Lindsay,	Pettus,	Vest,
Fairbanks,	Lodge,	Platt, Conn.	Walthall,
Faulkner,	McBride,	Platt, N. Y.	Wellington,
Foraker,	McLaurin,	Pritchard,	White.

The VICE-PRESIDENT. Fifty-two Senators have answered to their names. A quorum is present. The Secretary will again call the roll on agreeing to the amendment proposed by the Senator from Missouri [Mr. VEST].

The Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I again announce my pair with the Senator from Kansas [Mr. HARRIS].

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH]. I will transfer that pair, by consent, to the Senator from Ohio [Mr. HANNA], which will leave the Senator from Utah [Mr. RAWLINS] and myself at liberty to vote. I vote "nay."

Mr. GRAY (when his name was called). I am paired with the senior Senator from Illinois [Mr. CULLOM].

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "yea."

Mr. MARTIN (when his name was called). I am paired with the Senator from Montana [Mr. MANTLE]. I should vote "yea" if he were present.

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORRILL (when his name was called). I transfer my pair with the Senator from Tennessee [Mr. HARRIS] to the Senator from New Hampshire [Mr. GALLINGER], and vote "nay."

Mr. RAWLINS (when his name was called). I have a general pair with the Senator from Ohio [Mr. HANNA]. That pair has been transferred, so that the Senator from Ohio [Mr. HANNA] will stand paired with the Senator from New Jersey [Mr. SMITH]. I vote "yea."

Mr. TURNER (when his name was called). I am paired with the Senator from Wyoming [Mr. WARREN].

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER], and withhold my vote.

The roll call was concluded.

Mr. WALTHALL. I desire to announce that on this question the Senator from Wisconsin [Mr. SPOONER] is paired with the Senator from Tennessee [Mr. BATE].

The result was announced—yeas 21, nays 27; as follows:

YEAS—21.

Allen,	Jones, Ark.	Pettigrew,	Vest,
Clay,	Kyle,	Pettus,	Walthall,
Cockrell,	McLaurin,	Rawlins,	White.
Faulkner,	Mallory,	Roach,	
Gorman,	Mills,	Tillman,	
Heitfeld,	Morgan,	Turpie,	

NAYS—27.

Allison,	Fairbanks,	Lodge,	Pritchard,
Baker,	Foraker,	McBride,	Proctor,
Burrows,	Frye,	Morrill,	Quay,
Carter,	Gear,	Nelson,	Shoup,
Chandler,	Hale,	Perkins,	Stewart,
Davis,	Hawley,	Platt, Conn.	Thurston.
Deboe,	Hoar,	Platt, N. Y.	

NOT VOTING—41.

Aldrich,	Elkins,	McEnery,	Spooner,
Bacon,	Gallinger,	McMillan,	Teller,
Bate,	George,	Mantle,	Turner,
Berry,	Gray,	Martin,	Warren,
Butler,	Hanna,	Mason,	Wellington,
Caffery,	Hansbrough,	Mitchell,	Wetmore,
Cannon,	Harris, Kans.	Murphy,	Wilson,
Chilton,	Harris, Tenn.	Pasco,	Wolcott.
Clark,	Jones, Nev.	Penrose,	
Cullom,	Kenney,	Sewell,	
Daniel,	Lindsay,	Smith,	

So Mr. VEST's amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 372, page 127, line 9, after the word "description," to strike out "forty-four" and insert "forty-five;" so as to make the paragraph read:

372. Brussels carpets, figured or plain, and all carpets or carpeting of like character or description, 45 cents per square yard, and in addition thereto 40 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. This is an increase also over the McKinley Act from 44 cents to 45 cents. Without this increase the equivalent ad valorem on the articles embraced in this paragraph is 82.56 per cent. I simply want to say that it is very obvious why these increases are made. Our friends upon the other side have put such duties upon the oriental matting, Japanese and Chinese and cocoa matting, not made in this country, as to practically exclude them. They now propose to put up the duties on the lower grades of carpeting, to exclude competition from abroad as to these articles and force the American people to use the common carpets, the lower grades of carpets. The intent is very plain to anyone who knows anything in regard to tariff legislation.

I move (and it is the only redress that we have upon this side) to strike out the duties proposed by paragraph 372. I move to strike out "45 cents per square yard, and in addition thereto;" so

as to leave the duty as under the existing law, that is, 40 per cent ad valorem, and upon that I call for the yeas and nays.

Mr. ALLISON. I wish to call the attention of the Senator from Missouri to the fact that these specific duties are in the nature of compensatory duties.

Mr. VEST. Oh, yes.

Mr. ALLISON. And have no relation to cocoa matting, which has been stricken out of the bill, I think on the motion of the Senator from Missouri, or some other Senator on the opposite side.

Mr. VEST. No, sir; it has not been stricken out. It has not been voted upon, but is reserved for a vote as to whether it shall go on the free list. I made the motion to strike out oriental, Chinese, and Japanese matting, and that motion was sustained by the Senate, but it is held up by the Senator from Iowa for a vote when we reach the free list. Cocoa matting was passed over at the instance of my colleague on the committee, the Senator from Arkansas [Mr. JONES], in order that the Senate might vote as to whether it should go upon the free list or not.

I repeat my proposition, that the whole object of these increases, after putting a prohibitory duty upon these cheap mattings from the East, is to put a sufficient duty upon the cheap grade of carpets to exclude competition as to them. So there will be no alternative for any man who wants to put a carpet on the floor of his house but to buy the American product.

Mr. ALLISON. I repeat, these duties are put on in compensation for the duty on wool.

Mr. GRAY. Mr. President, we all know that in the last ten or fifteen years Brussels carpets, both imported and domestic, have become articles of very common and widely diffused use. They can scarcely be called a luxury. There is hardly any man who is able to support a family in decency who does not wish to have, and does not have, a Brussels carpet somewhere in his house. It is very well to know as we go along what exactions we are making upon the people who buy these carpets.

All that I rose for is in some measure to expose the tax that is concealed in these combined specific and ad valorem duties, one of the great objections to which is that it does mask the tax so far as the statement of it goes. I have made, or had made, a calculation as to the amount of tax a man will have to pay for a Brussels carpet that is put on a room, say, 16 feet square. I find that upon the unit of value given in the comparative tables before us the tax imposed upon him for carpeting a room 16 feet square under the provisions of this bill is $24.31.

The VICE-PRESIDENT. The Senator from Missouri calls for the yeas and nays on agreeing to his amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. JONES of Arkansas (when Mr. BERRY's name was called). My colleague [Mr. BERRY] is paired with the junior Senator from Illinois [Mr. MASON]. If my colleague were present, he would vote "yea."

Mr. LINDSAY (when his name was called). I am paired with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I would vote "yea."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORRILL (when his name was called). I transfer my pair with the Senator from Tennessee [Mr. HARRIS] to the Senator from New Hampshire [Mr. GALLINGER], who is temporarily absent, and vote "nay."

Mr. RAWLINS (when his name was called). I transfer my pair with the Senator from Ohio [Mr. HANNA] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. WALTHALL (when his name was called). The Senator from Wisconsin [Mr. SPOONER], with whom I have a general pair, is paired on this question with the Senator from Tennessee [Mr. BATE], and I vote "yea."

Mr. CLARK (when Mr. WARREN's name was called). I desire to announce that my colleague [Mr. WARREN] is paired with the junior Senator from Washington [Mr. TURNER]. If my colleague were present, he would vote "nay."

The roll call was concluded.

Mr. GEAR. My pair with the Senator from New Jersey [Mr. SMITH] has been transferred to the Senator from Ohio [Mr. HANNA], and I vote "nay."

Mr. PASCO (after having voted in the affirmative). I notice that the Senator from Washington [Mr. WILSON] has not voted, and being paired with him, I withdraw my vote.

The result was announced—yeas 23, nays 28; as follows:

YEAS—23.

Allen,	Heitfeld,	Morgan,	Tillman,
Caffery,	Jones, Ark.	Murphy,	Turpie,
Clay,	Kyle,	Pettigrew,	Vest,
Cockrell,	McLaurin,	Pettus,	Walthall,
Faulkner,	Mallory,	Rawlins,	White.
Gorman,	Mills,	Roach,	

NAYS—28.

Allison,	Fairbanks,	Lodge,	Pritchard,
Baker,	Foraker,	McBride,	Proctor,
Burrows,	Frye,	Morrill,	Quay,
Carter,	Gear,	Nelson,	Shoup,
Chandler,	Hale,	Perkins,	Stewart,
Davis,	Hawley,	Platt, Conn.	Teller,
Deboe,	Hoar,	Platt, N. Y.	Thurston.

NOT VOTING—38.

Aldrich,	Elkins,	Lindsay,	Smith,
Bacon,	Gallinger,	McEnery,	Spooner,
Bate,	George,	McMillan,	Turner,
Berry,	Gray,	Mantle,	Warren,
Butler,	Hanna,	Martin,	Wellington,
Cannon,	Hansbrough,	Mason,	Wetmore,
Chilton,	Harris, Kans.	Mitchell,	Wilson,
Clark,	Harris, Tenn.	Pasco,	Wolcott.
Cullom,	Jones, Nev.	Penrose,	
Daniel,	Kenney,	Sewell,	

So Mr. VEST's amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 127, paragraph 373, line 13, before the word "cents," to strike out "forty" and insert "forty-one;" so as to make the paragraph read:

373. Velvet and tapestry velvet carpets, figured or plain, printed on the warp or otherwise, and all carpets or carpeting of like character or description, 41 cents per square yard, and in addition thereto 40 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. I call attention to the fact that this rate is an increase over the McKinley Act. In that law the duties were 40 cents and 40 per cent ad valorem, and this is an increase to 41 cents. The equivalent ad valorem upon the articles named in this paragraph, without this addition of 1 cent, is 69.67 per cent. I move, in line 13 of the paragraph, after the word "description," to strike out "41 cents per square yard, and in addition thereto," so as to leave the duty as under the existing law at 40 per cent ad valorem. Upon that I call for the yeas and nays.

The yeas and nays were ordered.

Mr. TILLMAN. Mr. President, it is with reluctance that I presume to differ with the experienced and eminent Senators in charge of this bill, but it seems to me that we are pursuing a wrong course in putting ourselves on record here interminably on these little minor items, when it is a fact, as apparent as the Capitol itself to every observer outside, that we will be beaten in every one of these votes. It is just simply wasting time. That is all.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I again announce my pair with the junior Senator from Kansas [Mr. HARRIS].

Mr. GRAY (when his name was called). I am paired with the Senator from Illinois [Mr. CULLOM].

Mr. HAWLEY (when his name was called). The pair between the Senator from Tennessee [Mr. BATE] and myself has been transferred by agreement with the Senator from Mississippi [Mr. WALTHALL] to the Senator from Wisconsin [Mr. SPOONER], and I vote "nay."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]; otherwise I should "yea."

Mr. MORRILL (when his name was called). Pairing as before the Senator from New Hampshire [Mr. GALLINGER] with the Senator from Tennessee [Mr. HARRIS], with whom I have a general pair, I vote "nay."

Mr. PASCO (when his name was called). I am paired with the Senator from Washington [Mr. WILSON]. In his absence, I withhold my vote. If he were present, I should vote "yea."

The roll call was concluded.

Mr. CLARK. I desire to transfer the pair with the junior Senator from Kansas [Mr. HARRIS] to the Senator from Nevada [Mr. JONES] and vote. I vote "nay."

I also desire to announce again the pair of my colleague [Mr. WARREN] with the Senator from Washington [Mr. TURNER].

Mr. GEAR. My pair with the Senator from New Jersey [Mr. SMITH] has been transferred to the Senator from Ohio [Mr. HANNA], and I vote "nay."

Mr. LINDSAY. I announce for the day my pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "yea."

Mr. BUTLER. I announce my pair with the Senator from Maryland [Mr. WELLINGTON], and therefore withhold my vote.

Mr. HANSBROUGH. I am paired with the senior Senator from Virginia [Mr. DANIEL].

The result was announced—yeas 19, nays 27; as follows:

YEAS—19.

Allen,	Heitfeld,	Morgan,	Turpie,
Caffery,	Jones, Ark.	Murphy,	Vest,
Chilton,	McLaurin,	Pettigrew,	Walthall,
Cockrell,	Mallory,	Pettus,	White.
Faulkner,	Mills,	Roach,	

NAYS—27.

Allison,	Foraker,	McBride,	Proctor,
Burrows,	Frye,	Morrill,	Quay,
Carter,	Gear,	Nelson,	Shoup,
Chandler,	Hale,	Perkins,	Stewart,
Clark,	Hawley,	Platt, Conn.	Teller,
Deboe,	Hoar,	Platt, N. Y.	Thurston.
Fairbanks,	Lodge,	Pritchard,	

NOT VOTING—43.

Aldrich,	Elkins,	Kyle,	Sewell,
Bacon,	Gallinger,	Lindsay,	Smith,
Baker,	George,	McEnery,	Spooner,
Bate,	Gorman,	McMillan,	Tillman,
Berry,	Gray,	Mantle,	Turner,
Butler,	Hanna,	Martin,	Warren,
Cannon,	Hansbrough,	Mason,	Wellington,
Clay,	Harris, Kans.	Mitchell,	Wetmore,
Cullom,	Harris, Tenn.	Pasco,	Wilson,
Daniel,	Jones, Nev.	Penrose,	Wolcott.
Davis,	Kenney,	Rawlins,	

So Mr. VEST's amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 127, paragraph 374, line 17, before the word "cents," to strike out "twenty-eight" and insert "twenty-nine;" so as to make the paragraph read:

374. Tapestry Brussels carpets, figured or plain, and all carpets or carpeting of like character or description, printed on the warp or otherwise, 29 cents per square yard, and in addition thereto 40 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. Mr. President——

Mr. ALLISON. If the Senator from Missouri will allow me to make a suggestion to him, I ask why not consider the three remaining paragraphs together as one amendment, if he proposes to have a vote on striking out all of these paragraphs, and taking but one vote, so as to save time? It would be just as impressive.

Mr. VEST. Because there are different rates imposed in these different paragraphs, the increase being greater in some than in others by the committee's amendment. I want to call attention to the fact that under this amendment, as in the preceding paragraph, the Senator from Iowa and the great majority of the Finance Committee have gone above the McKinley Act, making this duty 29 instead of 28 cents. Under the paragraph as it stood, without this increase, the equivalent ad valorem is 79.42 per cent. It is my purpose to move to strike out the words, in lines 17 and 18 of this paragraph, "29 cents per square yard, and in addition thereto," so as to leave the duty at 40 per cent ad valorem, as in the existing law. Upon that I call for the yea and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BUTLER (when his name was called). I am paired with the Senator from Maryland [Mr. WELLINGTON], and therefore withhold my vote.

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS], but transfer that pair to the Senator from Nevada [Mr. JONES], and vote "nay."

Mr. GEAR (when his name was called). My pair with the Senator from New Jersey [Mr. SMITH] has been transferred to the Senator from Ohio [Mr. HANNA], and I vote "nay."

Mr. GRAY (when his name was called). I am paired with the Senator from Illinois [Mr. CULLOM].

Mr. MORRILL (when his name was called). I again transfer my pair with the Senator from Tennessee [Mr. HARRIS] to the Senator from New Hampshire [Mr. GALLINGER], and vote "nay."

Mr. PASCO (when his name was called). I again announce my pair with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "yea."

Mr. TILLMAN (when his name was called). Present.

The Secretary again called the name of Mr. TILLMAN.

Mr. TILLMAN. I am here, sir, and have answered "present."

The roll call was concluded.

Mr. WALTHALL. I again announce that my pair with the Senator from Wisconsin [Mr. SPOONER] has been transferred to the Senator from Tennessee [Mr. BATE]. I vote "yea."

Mr. KENNEY (after having voted in the affirmative). I notice that the junior Senator from Pennsylvania [Mr. PENROSE], with whom I am paired, has not voted. I therefore withdraw my vote.

The result was announced—yeas 19, nays 28; as follows:

YEAS—19.

Allen,	Gorman,	Morgan,	Turpie,
Bacon,	Jones, Ark.	Murphy,	Vest,
Chilton,	McLaurin,	Pettigrew,	Walthall,
Clay,	Mallory,	Pettus,	White.
Cockrell,	Mills,	Roach,	

NAYS—28.

Allison,	Deboe,	Hoar,	Platt, N. Y.
Baker,	Fairbanks,	Lodge,	Pritchard,
Burrows,	Foraker,	McBride,	Proctor,
Carter,	Frye,	Morrill,	Quay,
Chandler,	Gear,	Nelson,	Shoup,
Clark,	Hale,	Perkins,	Teller,
Davis,	Hawley,	Platt, Conn.	Thurston.

NOT VOTING—42.

Aldrich,	Butler,	Cullom,	Faulkner,
Bate,	Caffery,	Daniel,	Gallinger,
Berry,	Cannon,	Elkins,	George,
Gray,	Kyle,	Pasco,	Turner,
Hanna,	Lindsay,	Penrose,	Warren,
Hansbrough,	McEnery,	Rawlins,	Wellington,
Harris, Kans.	McMillan,	Sewell,	Wetmore,
Harris, Tenn.	Mantle,	Smith,	Wilson,
Heitfeld,	Martin,	Spooner,	Wolcott.
Jones, Nev.	Mason,	Stewart,	
Kenney,	Mitchell,	Tillman,	

So the amendment of Mr. VEST was rejected.

Mr. WHITE. I will ask that the next two paragraphs, 375 and 376, may be read in connection, if there be no objection.

The VICE-PRESIDENT. That will be the order, in the absence of objection.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 375, page 127, line 20, before the word "cents," to strike out "nineteen" and insert "twenty-five;" so as to make the paragraph read:

375. Treble ingrain, three-ply, and all chain Venetian carpets, 25 cents per square yard, and in addition thereto 40 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 376, page 127, line 22, after the word "carpets," to strike out "fourteen" and insert "twenty;" so as to make the paragraph read:

376. Wool Dutch and two-ply ingrain carpets, 20 cents per square yard, and in addition thereto 40 per cent ad valorem.

Mr. WHITE. Paragraph 404 of the act of 1890, the McKinley Act, provides as follows:

404. Treble ingrain, three-ply, and all chain Venetian carpets, 19 cents per square yard, and in addition thereto 40 per cent ad valorem.

We find that paragraph 375 of the proposed law raises the rate from 19 to 25 cents per square yard. The Senator from Iowa stated that the respective rises of 2½ cents, 2 cents, 1 cent, 1 cent, and 1 cent, respectively, in paragraphs 370, 371, 372, 373, and 374 were made because of the increase in price of carpet wools—that is, the substitution of a specific rate for an ad valorem—but in each of those cases it appears that a very small rate was sufficient. Of course the manufacturer does not wish to lose any point, and so he would have a tax of 1 cent where he could get it; but here we have a rise of 6 cents, from 19 cents per square yard to 25 cents and from 14 cents to 20 cents. That is in paragraphs 375 and 376, which we find to be in the McKinley law as follows:

Wool Dutch and two-ply ingrain carpets, 14 cents per square yard, and in addition thereto 40 per cent ad valorem.

Now, we have a rise made by the committee over the House bill of 6 cents, from 14 to 20 cents. On examining the record to find whether there is any justification for these very material changes we find that so far as paragraph 375 is concerned the unit of value shown by the comparative statement for the year 1896 is 75 cents and the ad valorem rate as prescribed in this amendment is 73.45 per cent, and in paragraph 376 the ad valorem rate is 73.94 per cent.

The importations under paragraph 375 amounted in yards in 1896 to 23,737, and in value to $17,745; and the importations under paragraph 376 amounted in 1896 to 24,853 yards, of the value of $14,645, showing that under the rates prescribed in the Wilson law there was but a very light importation. Indeed, an inspection of the entire carpet schedule will demonstrate the fact that the American manufacturer virtually has the market.

For instance, if we look back to Brussels carpet, we find that the unit of value is $1.03, and yet we know that the American carpet manufacturer undersells any such rate, and the foreign cost is $1.03. Therefore we have absolutely the market.

Mr. GRAY. Right there I wish to state that I read the other day that the carpet manufacturers, those who use these carpet wools, stated that more than one-half of all the carpet wools imported into this country go into ingrain carpets.

Mr. WHITE. In the large pamphlets devoted to tariff hearings before the Ways and Means Committee in the House of Representatives you can not find a solitary word showing any argument or anything which could be called a reason for an increase of these rates. What will the effect be? Necessarily the absolute exclusion of importations. We have practically almost reached that point now.

Here is another of these cases found in the bill where the tariff, already prohibitive, is raised. Why is it raised? No wonder, Mr. President, that the carpet stores all over the country have signs now in their windows announcing that after thirty days the rate on carpets will be increased from 25 to 50 per cent. This is a mere matter of concession really, for the rates might be increased much higher. The tariff wall is constructed so massively and of such lofty proportions that they are able practically to exclude all importations. I deny, whatever may be the theory upon which this bill is framed, that there is any justification for the increases made by the Senate committee of 6 cents in each case upon these low-grade carpets.

It has been shown frequently throughout the debate on this bill that high-priced articles are admitted under lower rates and that low-priced articles are taxed very highly. I suppose, probably, in view of the sentiment expressed by the monk who said to Louis XIV, "Your people perish, but your court is splendid."

Mr. President, I move to strike out paragraphs 375 and 376 and substitute therefor the provisions of the Wilson law contained in paragraphs 293 and 295 of that law. There is no justification for any additional tariff in this instance.

The VICE-PRESIDENT. The amendment proposed by the Senator from California will be stated.

The SECRETARY. It is proposed to strike out paragraphs 375 and 376 as amended and in lieu thereof to insert:

Wool Dutch and two-ply ingrain carpets, 30 per cent ad valorem.
Carpets and carpeting of wool, flax, or cotton, or composed in part of either, not specially provided for in this act, 30 per cent ad valorem.

Mr. WHITE. I will ask to have the vote taken on the first paragraph read at the desk:

Wool Dutch and two-ply ingrain carpets, 30 per cent ad valorem.

The VICE-PRESIDENT. The amendment will be stated as now proposed by the Senator from California.

The SECRETARY. It is proposed to strike out paragraph 376 and in lieu thereof to insert:

376. Wool Dutch and two-ply ingrain carpets, 30 per cent ad valorem.

Mr. ALLISON. Just a word.

Mr. WHITE. I yield to the Senator.

Mr. ALLISON. The Senator from Delaware [Mr. GRAY] really indicated the reason for the changes in these two paragraphs. Ingrain carpets are made wholly of wool. There is no other fiber except wool in these carpets, whilst in the higher grade carpets there is a portion of hemp or cotton or jute.

Mr. GRAY. Backing.

Mr. ALLISON. But an ingrain carpet is all wool; and one-half of the third-class wool, or nearly so, is used in the manufacture of these carpets. We have increased the duty by this bill on the kind of wool used in the manufacture of ingrain carpets above the McKinley law; and as this is a great industry, especially in Philadelphia and its neighborhood, where large quantities of ingrain carpets are made by people who have not large manufactories, it is necessary to give them a compensation for the increased price of their wool from which they make carpets. The duty upon third-class wool, as compared with the duty provided in the McKinley law and the free wool in the Wilson law, so called——

Mr. GRAY. And the consumer gives it to them, of course.

Mr. ALLISON. I understand there is great competition in the production, and I have no doubt the profits from these carpets made by those who do the weaving are very small.

Mr. WHITE. I desire to ask the Senator from Iowa if it is not true that the present tariff, as well as the McKinley tariff, is practically prohibitive on these goods—substantially so; that the importations bear practically no relation of importance to the consumption? That must be apparent from an inspection of the record before us. I presume there is no denial of that.

Mr. ALLISON. I do not think it is prohibitory. This is rather a domestic industry which has grown up during a good many years in different portions of our country, and I do not think these ingrain carpets are very largely produced abroad. I think this country is rather adapted to their manufacture; there is a sharp competition in the production, and the profits are very small.

Mr. WHITE. If these carpets grow here naturally, and are products of the soil, and are not produced abroad, they do not need protection at all, I presume.

Before proceeding, I desire to call attention to the fact that I believe the Secretary has not read both amendments which I suggested. One is paragraph 292 of the present law, and the other 293, and they read as follows:

Treble ingrain, three-ply, and all chain Venetian carpets, 22½ per cent ad valorem.
Wool Dutch and two-ply ingrain carpets, 22 per cent ad valorem.

Those are the paragraphs I desire to have substituted for the paragraphs in the bill.

It is not necessary for the Senator from Iowa or anyone else to concede that there are practically no importations of carpet goods in any save one or two lines, because the record of 1896 under the Wilson Act demonstrates that fact. I deny that the addition of 6 cents is justified at all by the amendment of the paragraph regarding carpet wools, which simply proposes a specific rate, which we are informed by the committee is substantially the ad valorem rate. This is an instance where the manufacturer is making a profit, and is given an additional and concealed benefit, by reason of the compensatory duty, so called.

Mr. PLATT of Connecticut. May I ask the Senator from California a question?

Mr. WHITE. Certainly.

Mr. PLATT of Connecticut. If it be true, as has been stated, that the domestic carpet is sold at a price very much below the foreign carpet, what harm can it do to put on an additional duty?

Mr. GRAY. What is the necessity for it?

Mr. WHITE. The Senator from Connecticut is well advised in regard to these matters. I will ask him if it is not a fact that in all the lines of carpet specified in paragraph 371 now under consideration the domestic carpet is sold cheaper than the foreign article? Is not that the fact? The Senator is well advised as to this industry.

Mr. PLATT of Connecticut. It was so stated on the other side, and I suppose it is true.

Mr. WHITE. Yes, sir. Then I ask why does the committee engage in the business of raising rates? It is true, as stated by the Senator, that if the act is prohibitive now it can not be made more prohibitive in any event; but manifestly an opportunity is afforded within that prohibition wall to raise by means of trusts and combinations the domestic rates. Certainly upon no theory can a duty be justified which is really prohibitive, and I do not understand that the majority of the committee claim they are introducing here prohibitive measures, though, in fact, we know they are in many cases. But they claim they are simply making such changes in the tariff law as to protect the American manufacturer to the extent of equalizing the labor cost and certain other disadvantages under which perhaps he may labor. This is no such case, however.

Mr. PLATT of Connecticut. The Senator replies to my question as to what harm it would do by asking me what reason there is for doing it. Perhaps that is a fair way of replying to my question. I understand the fact to be that this industry has grown up in this country and has reached such development and such economies have been introduced in the manufacture that we have most of the trade and that we sell our carpets made in this country at very much less figures than most of the carpets of the same name imported from abroad.

I will answer his question by asking him another. Having put a duty on wool, having raised in the Senate the duty which the House put upon carpet wools, does he not think that if his motion prevails not to allow any compensatory duty whatever, by reason of the fact that the wool has been made dutiable, it would not cripple and destroy the carpet industry in the United States?

Mr. WHITE. I will answer that question no.

Mr. PLATT of Connecticut. I do.

Mr. WHITE. The Senator objected to the last answer I gave because it was not categorical, though in effect it was. I respond to the first question addressed to me by the Senator from Connecticut by saying that, although the present duty may be prohibitive, and I claim it is, an addition to that prohibitive rate, so to speak, if I may be allowed to phrase it in that way—an additional tariff affords an opportunity for domestic combinations to the disadvantage of the consumer and beyond the necessity of just reward to the manufacturers.

Now, to the other question I respond in this way: I base my negative reply upon the figures which we have here and the admissions which have been made on this floor, that we control the domestic market not only because we exclude the foreign competition by tariff, but because we actually produce and put down the same grade of carpet at 50 per cent the price which it costs in most parts of the world.

For instance, take Brussels carpet, under paragraph 372. The Senator from Connecticut knows that a Brussels carpet the foreign value of which is a little over a dollar can be produced in this country, and is produced, of equal quality for 70 or 80 cents, and there is a protection against which no one can compete. The reason for it may be this or that, but the fact remains, whether for climatic reasons, superiority of machinery or workmanship, or other reason, that we can manufacture the article cheaper in this country than it can be made anywhere else in the world, and where that is the case, no one claims or has heretofore claimed that any protection is necessary. If we have the domestic market, if we can make the article cheaper than it can be made anywhere else in the world, there is an end of it.

Mr. PLATT of Connecticut. I think the Senator will not claim that in this industry there is any combination or possibility of combination, nor will he claim that any undue profit is made by the manufacturers of carpet in the United States.

Mr. WHITE. Of course I am not familiar with the personal business of the various manufacturers, but I do understand that the prices at which carpets are sold in the United States to-day by the leading factories are regulated by an agreement; probably it is a gentleman's agreement, referred to so frequently in debate.

The VICE-PRESIDENT. The question is on agreeing to the amendment to strike out paragraphs 375 and 376 of the bill and insert paragraphs 292 and 293 of the existing law.

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to insert as a new paragraph the following:

376½. Oriental, Berlin, and similar rugs, and carpets woven whole for rooms, valued at not more than 40 cents per square foot, 20 cents per square foot and 10 per cent ad valorem; valued at more than 40 cents and not more than $1 per square foot, 40 cents per square foot and 20 per cent ad valorem; valued at more than $1 and not more than $2 per square foot, 75 cents per square foot and 25 per cent ad valorem; valued at more than $2 per square foot, 65 per cent ad valorem.

Mr. ALLISON. I propose to modify the amendment by inserting what I send to the desk in lieu of what is printed in the bill.

The SECRETARY. It is proposed to modify paragraph 376½ so as to read as follows:

Carpets of every description, woven whole for rooms, and oriental, Berlin, Aubusson, Axminster, and similar rugs, 10 cents per square foot, and in addition thereto 40 per cent ad valorem.

Mr. VEST. Without regard to value?

Mr. WHITE. I stated yesterday, when I read a communication from Messrs. W. & J. Sloane & Co., of San Francisco, that the elimination from paragraph 370 of the provision in regard to oriental, Berlin, and other similar rugs was accomplished for the purpose of so framing a subsequent paragraph as largely to increase the tariff upon those specific articles.

Paragraph 370, which included oriental, Berlin, and other rugs, is to be found in the McKinley Act, and the rate of duty was 60 cents per square yard and 40 per cent ad valorem. The Senator from Iowa added 2½ cents to compensate for the change from the ad valorem to a specific rate in the third-class wool paragraph. But assuming, for the sake of the argument, that addition to have been justified, there is no reason for the exclusion from that paragraph of these rugs. Will the Senator from Iowa tell me that the object he has in view is to reduce taxation upon those articles? Of course not. The object and purpose is to increase taxation upon them and practically to exclude them from the market.

The committee first proposed a higher rate, 20 cents per square foot and 10 per cent ad valorem. Perhaps that is a higher rate. It is a very complex paragraph, and in a moment it is impossible to tell the effect of the amendment now proposed; but, at all events, it is recognized everywhere that paragraph 376½ as first framed by the committee prescribed a rate absolutely prohibitive, and the present rate suggested by the committee is 10 cents a foot, which amounts to 90 cents a yard. The Senator from Arkansas will correct me if I am wrong about that. It amounts to 90 cents a yard, and in addition thereto 40 per cent ad valorem.

I have not before me the unit of value of these particular articles. In the comparative statement given us there is no unit of value and there is no estimate made as to the percentage, but I imagine it is largely over 100 per cent. The committee amendment as first prepared made the rate, as I am informed, over 200 per cent, and this is unquestionably more than 100 per cent, or not far from it. Under the amendment as put in here now—as I said, the phraseology of the original amendment is so complex that it is impossible in the moment to arrive at a rate—it is increased, and it is designed to exclude from the American market rugs which are manufactured abroad and which are not now made here at all. We certainly have a right to object to rates which can not increase the revenue, and will result in excluding an article which is valuable to those who can afford to purchase it, and substituting for a law which has been in existence for years under Republican dominancy, even in the McKinley Act, one which is far more prohibitive. Is this the mild taxation and the conservative rates that we were promised by the opening address of the Senator from Rhode Island [Mr. ALDRICH]?

Mr. ALLISON. These oriental and Berlin rugs, so called, are pure luxuries. Some of them sell as high as $5,000 and $10,000 apiece. They are not made in this country at all. If there is anything that can endure a good, stiff revenue duty, it is oriental rugs. Whilst the duty may be higher on some of these rugs, it is not nearly so high as the duty in this bill upon some essentials of life, like oranges and Zante currants, where the duty is very high.

Mr. VEST. I assert that the cheapest carpet that can be used in this country is the article named in this paragraph—the pure oriental rug. Those rugs are never worn out. They are never attacked by the moth. They can be taken up every summer and packed away with entire safety. They have been going down in the market for years, until you can attend an auction here in the city of Washington and furnish your fall house for a third less than you could go to an upholstery establishment and buy American carpets, and I do not think anyone who is at all acquainted with the subject will contradict me when I say that, all in all, they are not articles of luxury.

They can not be made in this country. You put down an American rug made by machinery, and in twenty days it will curl up at every one of the corners and wrinkle, and you may turn and turn it, and still it will curl up, and then the moth will attack it. It is the home of the moth, and in twelve months you are compelled to buy another article of the same kind. You take the oriental rug made by hand, and it is never, as I said, attacked by moths. It will last a generation, and it is by far the cheapest article that can be bought.

The Senator speaks about these rugs being worth $5,000 and $10,000. I believe I have seen one worth $1,200. That is the highest priced one I ever saw. That was used for one of the public buildings in the city of Washington. My constituents do not buy $1,200 rugs or $5,000 rugs, but you can go down to any of these auctions, and they are going on daily, and buy an oriental rug for $5 or $10 or $15, and they are hardly ever over that, which will outlast a carpet worth $25 or $30 years and years; and yet the Senator says it is an article of luxury.

What are the enormous duties imposed by the pending bill, even without the increases proposed by the Senator from Iowa? As I understand the amendment proposed, it takes off the limitations as to value and puts on 10 cents. The bill as we picked it up this morning read "Oriental, Berlin, and similar rugs, and carpets woven whole for rooms, valued at not more than 40 cents per square foot," but that limitation is taken off, and the tax now is to be imposed without regard to any valuation at all. What are the specific duties per yard without the amendment? Upon the first classification it is $1.80 per yard and 10 per cent; upon the next classification it is $3.60 a yard and 20 per cent; upon the next it is $6.76 per yard and 25 per cent; and on the fourth classification it is $2 a foot and 65 per cent, making at least $11.70 a yard. As a matter of course, these are exclusive rates. The goods can not come into this country, and the result, and I suppose the intention, is to exclude them entirely and force the American people to buy the machine-made rugs and carpets which no one will buy if he knows what they are and can avoid buying them.

Our friends upon the other side want to shut out all cheap matting, and they have done that, and all oriental mattings or cocoa mattings. They then propose to shut out all oriental rugs, and as a matter of course their object is to force the American people to take machine-made carpets manufactured in this country, or else to go with bare floors. That is all there is of it. I move to strike out the duties in the paragraph wherever they occur, and insert the existing taxation, 40 per cent ad valorem.

The VICE-PRESIDENT. The question will first be put on the amendment of the Senator from Iowa.

Mr. WHITE. I am willing that it shall be agreed to first.

The VICE-PRESIDENT. Without objection, the amendment as modified will be considered as agreed to.

Mr. WHITE. If it be true, as stated by the Senator from Iowa, that there are articles of necessity in the pending bill taxed at the rate specified in this paragraph, it will bring to the bill that universal and popular condemnation to which we long ago consigned it, and to which it is now being in advance consigned by the American people.

Now, about this paragraph. It must be admitted that neither the Senator from Iowa nor any other member of the committee stated to the Senate the actual ad valorem rate upon any of the classes of rugs described by him, but, after publishing the comparative statement, with blanks left where the information ought to have been, he now appears with an amendment in which he proposes to tax his $10,000 rug the same rate per yard or per foot, so far as the specific rates go, that he proposes to tax rugs which may be worth $1.50. Of course the ad valorem may compensate to some extent, but he makes no discrimination.

When the Senator from Iowa states that these rugs are of extraordinary value and are articles of luxury, he simply shows that he has happily been so placed that he has not come in contact with anything save luxurious surroundings, a condition which is so restricted in the per capita direction that I do not think it a justifiable foundation for any rule. These rugs are put upon the market at very moderate rates, and they are exceedingly useful to the middle classes of the American people, and are to be found in dwellings that are by no means aristocratic and where people are unable to pay the price of admission to look at a $10,000 rug, which I am glad has so often delighted the gaze of my friend the Senator from Iowa and instilled in him the patriotic sentiment which forces him to put a tax of $4,000 on the rug aforesaid, which, however, will not appear in the market, I imagine.

If there are $10,000 rugs bought by rich people in this country, I am perfectly willing to tax them 100 per cent, because the people who indulge in luxuries of that kind can afford to pay for them. But what I object to is that upon the low-grade articles here a new scheme is devised, not found necessary by the Senator from Iowa or those who labored with him in the formation of the McKinley bill, which has never been found necessary, and for which no reasons are assigned to-day by the Senator from Iowa.

Mr. ALLISON. Just one word. I gathered my information as respects the character of these rugs from noticing that under the McKinley law the importations were much larger than under the Wilson law, and I drew the inference that it was because of the prosperity that prevailed immediately after the passage of the McKinley Act—I do not wish to get into that kind of an argument now—as compared with the condition of our country after the passage of the Wilson law. Under the very low rate in the Wilson law the importations were less than under the McKinley law.

Mr. WHITE. Will the Senator from Iowa inform me what were the importations of these rugs under the McKinley law or the Wilson law? The comparative statement does not afford us any information.

Mr. ALLISON. On page 198 of the comparative statement——

Mr. WHITE. Under paragraph 370, the Senator will observe,

are included Aubusson, Axminster, moquette, chenille, and other carpets, and those are not the articles to which I allude.

Mr. ALLISON. It also contains Berlin, oriental, and similar rugs. They are included.

Mr. WHITE. How can the Senator segregate them?

Mr. ALLISON. I do not segregate them.

Mr. VEST. You can not tell.

Mr. ALLISON. I am not able to say what the proportion is, but they are similar in character and all pay the same rate. Now, the Senator will see that in 1896 there were only 105,000 yards imported, of a value of $258,000, against $1,271,000 in 1893. That is the only knowledge I have on the subject. I do not know that I have ever tread upon a ten-thousand-dollar rug. If I have, I had no knowledge of it at the time. My information is that these are very valuable and expensive rugs.

Mr. VEST. It depends upon the size.

Mr. WHITE. It is unfortunate, in view of the alterations and of the changes in phraseology which stood for many years, that no one can give us any reason for it, or afford us any statistics that bear directly upon the subject, and that we have to grope around in the darkness of guesswork.

Mr. VEST. I ask the Secretary to read the amendment again. I did not exactly understand it.

The SECRETARY. The paragraph as amended reads as follows:

Carpets of every description, woven whole for rooms, and oriental, Berlin, Aubusson, Axminster, and similar rugs, 10 cents per square foot, and in addition thereto 40 per cent ad valorem.

Mr. VEST. I move to strike out the specific, so as to leave it at 40 per cent ad valorem; and on that I call for the yeas and nays.

Mr. JONES of Arkansas. The suggestion made by the Senator from California, that we are compelled to grope around in the dark without understanding what we are doing and wondering why this paragraph is put in the bill, reminds me very strongly of an expression I find used in a speech by the Hon. William Lawrence, who seems to have had a good deal to do with the rates in this schedule. He says:

Something must be done to relieve existing conditions or the Republican party will soon go out of power. The protective policy can not be maintained, and a revolution may come in our monetary policy.

I thought possibly the Senator may have seen something of that sort, and that that accounted for it.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Missouri, on which the yeas and nays are demanded.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH]. The Senator from Utah [Mr. RAWLINS] is paired with the Senator from Ohio [Mr. HANNA]. I transfer my pair to the Senator from Ohio [Mr. HANNA], which will leave the Senator from Utah [Mr. RAWLINS] and myself at liberty to vote. I vote "nay."

Mr. MITCHELL (when his name was called). I am paired with the Senator from New Jersey [Mr. SEWELL]. If he were present, I should vote "yea."

Mr. MORRILL (when his name was called). I will transfer my pair with the Senator from Tennessee [Mr. HARRIS] to the Senator from New Hampshire [Mr. GALLINGER], and vote "nay."

Mr. PASCO (when his name was called). I again announce my pair with the Senator from Washington [Mr. WILSON]. If he were present, I should vote "yea."

Mr. WALTHALL (when his name was called). I transfer my pair with the junior Senator from Wisconsin [Mr. SPOONER] to the junior Senator from Tennessee [Mr. BATE], and vote "yea."

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER], and withhold my vote.

The roll call was concluded.

Mr. JONES of Arkansas (after having voted in the affirmative). Has the Senator from Maine [Mr. HALE] voted?

The VICE-PRESIDENT. He has not voted.

Mr. JONES of Arkansas. I withdraw my vote. I am paired with that Senator. My colleague [Mr. BERRY] is paired with the Senator from Illinois [Mr. MASON]. I make this announcement for the day.

Mr. TURPIE (after having voted in the affirmative). The senior Senator from Minnesota [Mr. DAVIS] being absent, I withdraw my vote.

Mr. BACON (after having voted in the affirmative). I have a general pair with the junior Senator from Rhode Island [Mr. WETMORE]. I am informed that he has not voted, and I therefore withdraw my vote.

I take this opportunity to state that I voted upon the former call of the roll, not thinking to inquire whether the junior Senator from Rhode Island had voted. I am now informed by the clerks that he has not been here to-day. My vote, however, did not change the result.

Mr. HANSBROUGH. I suggest to the Senator from Georgia that we exchange our pairs, so that he and I may vote. I am paired with the Senator from Virginia [Mr. DANIEL], and I will transfer my pair to the Senator from Rhode Island [Mr. WETMORE].

Mr. BACON. That will be agreeable to me, Mr. President, I vote "yea."

Mr. HANSBROUGH. I vote "nay."

The result was announced—yeas 22, nays 29; as follows:

YEAS—22.

Allen,	Gorman,	Mills,	Tillman,
Bacon,	Harris, Kans.	Morgan,	Vest.
Caffery,	Kenney,	Murphy,	Walthall,
Clay,	McLaurin,	Pettigrew,	White.
Cockrell,	Mallory,	Pettus,	
Faulkner,	Martin,	Roach,	

NAYS—29.

Allison,	Foraker,	Morrill,	Quay,
Baker,	Frye,	Nelson,	Shoup,
Burrows,	Gear,	Penrose,	Stewart,
Carter,	Hansbrough,	Perkins,	Teller,
Clark,	Hawley,	Platt, Conn.	Thurston.
Deboe,	Hoar,	Platt, N. Y.	
Elkins,	Lodge,	Pritchard,	
Fairbanks,	McBride,	Proctor,	

NOT VOTING—38.

Aldrich,	Gallinger,	Lindsay,	Spooner,
Bate,	George,	McEnery,	Turner,
Berry,	Gray,	McMillan,	Turpie,
Butler,	Hale,	Mantle,	Warren,
Cannon,	Hanna,	Mason,	Wellington,
Chandler,	Harris, Tenn.	Mitchell,	Wetmore,
Chilton,	Heitfeld,	Pasco,	Wilson,
Cullom,	Jones, Ark.	Rawlins,	Wolcott.
Daniel,	Jones, Nev.	Sewell,	
Davis,	Kyle,	Smith,	

So Mr. VEST's amendment was rejected.

The Secretary read the next paragraph, as follows:

377. Druggets and bockings, printed, colored, or otherwise, 22 cents per square yard, and in addition thereto 40 per cent ad valorem. Felt carpeting, figured or plain, 11 cents per square yard, and in addition thereto 40 per cent ad valorem.

Mr. ALLISON. I move to strike out the remainder of the paragraph after the words "ad valorem," in line 11.

The VICE-PRESIDENT. Is there any objection to the amendment?

Mr. VEST. I do not understand that. Does that mean that felt carpeting is to be put in the basket clause?

Mr. ALLISON. To take it out of the paragraph.

Mr. VEST. It is not in another paragraph. It is a part of this same paragraph. I want to understand this, because we have here an equivalent ad valorem of 62.57 per cent on felt carpeting.

Mr. WHITE. And 82.22 per cent on druggets.

Mr. VEST. Yes; 82.22 per cent on druggets. I want to know whether the meaning is to put felt carpeting specifically under another paragraph or to put it under the basket clause.

Mr. WHITE. I understand the Senator from Iowa intends to include felt carpeting in paragraph 378.

Mr. ALLISON. No; I do not intend to put it anywhere. I will say frankly to the Senator that I am not quite sure that I am right about it, but as I understand, under this paragraph, a very large amount of felt comes in as carpeting, and it is then cut up for piano covers, and is used for other purposes. If that is true, it ought not to be where it is.

Mr. WHITE. If the Senator from Iowa will kindly indicate to us, when he ascertains the fact, where the article will appear——

Mr. ALLISON. If the Senator will allow it to be stricken out, I will later on make it appear somewhere satisfactory to Senators on the other side.

Mr. VEST. If the amendment is sustained, it will go under paragraph 378.

Mr. ALLISON. That is my understanding.

Mr. VEST. As carpet made of wool, flax, or cotton, not otherwise specially provided for, 50 per cent ad valorem.

Mr. WHITE. The rate is 50 per cent in paragraph 378.

Mr. VEST. It is 50 per cent. I should decidedly favor that, because it is a reduction of 12.57 per cent on the proposed rate.

Mr. ALLISON. That is my understanding about it. If I am mistaken in regard to the matter, I will call attention to it later. I hope it will be stricken out now, because if it is stricken out the paragraph is not susceptible.

Mr. VEST. I have no objection.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 377, page 128, line 11, after the words "ad valorem," strike out the remainder of the paragraph in the following words:

Felt carpeting, figured or plain, 11 cents per square yard, and in addition thereto 40 per cent ad valorem.

The amendment was agreed to.

Mr. VEST. After the word "otherwise," in line 9, I move to strike out the words "22 cents per square yard, and in addition thereto," so as to make the rate 40 per cent ad valorem.

Mr. WHITE. I call attention to the fact that under the Wilson Act the importations under the head of druggets, bockings, etc.,

amounted in quantity to 1,592 square yards and in value to $778.36. If the amendment proposed by the Senator from Missouri is adopted, it appears to me no injury can result to anyone, notwithstanding the fact of the duty on wool, because the present duty is prohibitive and the duty now proposed would result in a slight importation.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment was rejected.

The Secretary continued the reading of the bill, as follows:

378. Carpets and carpeting of wool, flax, or cotton, or composed in part of either, not specially provided for in this act, 50 per cent ad valorem.

379. Mats, rugs, screens, covers, hassocks, bed sides, art squares, and other portions of carpets or carpeting made wholly or in part of wool, and not specially provided for in this act, shall be subjected to the rate of duty herein imposed on carpets or carpetings of like character or description.

Mr. ALLISON. On page 128, line 17, in the first line of paragraph 379, after the word "rugs," I move to insert the words "for floors."

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 380, page 128, line 26, after the word "woolen," to strike out "felt;" and in line 27, before the word "or," to insert "felt;" so as to read:

380. Whenever, in any schedule of this act, the word "wool" is used in connection with a manufactured article of which it is a component material, it shall be held to include wool or hair of the sheep, camel, goat, alpaca, or other animal, whether manufactured by the woolen, worsted, felt, or any other process.

The amendment was agreed to.

The next amendment was to add to paragraph 380 the following:

And all articles, fabrics, and manufactures, however described, of which wool is a component material, shall be classified and pay the duties respectively imposed by the several paragraphs of this schedule.

Mr. ALLISON. I ask that that amendment may be disagreed to.

The amendment was rejected.

The Secretary continued the reading of the bill, as follows:

SCHEDULE L.—SILKS AND SILK GOODS.

381. Silk partially manufactured from cocoons or from waste silk, and not further advanced or manufactured than carded or combed silk, 40 cents per pound.

382. Thrown silk, not more advanced than singles, tram, organzine, sewing silk, twist, floss, and silk threads or yarns of every description, except spun silk, 30 per cent ad valorem; spun silk in skeins, cops, warps, or on beams, valued at not exceeding $1 per pound, 20 cents per pound and 15 per cent ad valorem; valued at over $1 per pound and not exceeding $1.50 per pound, 30 cents per pound and 15 per cent ad valorem; valued at over $1.50 per pound and not exceeding $2 per pound, 40 cents per pound and 15 per cent ad valorem; valued at over $2 per pound and not exceeding $2.50 per pound, 50 cents per pound and 15 per cent ad valorem; valued at over $2.50 per pound, 60 cents per pound and 15 per cent ad valorem; but in no case shall the foregoing articles pay a less rate of duty than 35 per cent ad valorem.

Mr. VEST. I move, after the word "pound," in line 12, page 129, paragraph 382, to strike out the duty specified and insert "30 per cent ad valorem." It amounts to 35 per cent under the bill, and I move to make it the existing rate of 30 per cent ad valorem.

The SECRETARY. In line 12, after the word "pound," strike out "20 cents per pound and fifteen," and insert "thirty," so as to read "30 per cent ad valorem."

Mr. ALLISON. May I ask the Senator from Missouri if he intends that to apply to the entire paragraph down to 35 per cent, in the last line?

Mr. VEST. Yes; after line 12. You have 30 per cent before that, to which I do not object, but wherever after that you have 35 per cent, or where the equivalent is 35 per cent ad valorem, except as to the last classification, where it is 39, valued at exceeding $2.50 per pound, I move to strike out the rates here put in and to insert the present duty, which is 30 per cent ad valorem.

Mr. ALLISON. On the whole paragraph?

Mr. VEST. Yes; after line 12. I will put the motion on all together.

Mr. ALLISON. After the words "spun silk in skeins, cops, warps, or on beams valued at not exceeding $1 per pound," the Senator proposes 30 per cent ad valorem?

Mr. VEST. Yes.

The SECRETARY. It is proposed to strike out "20 cents per pound, and fifteen," in lines 12 and 13, and to insert "thirty;" so as to read "30 per cent ad valorem."

Mr. ALLISON. I understand the Senator from Missouri desires to take the sense of the Senate on the whole paragraph at 30 per cent ad valorem.

Mr. VEST. Yes; at 30 per cent ad valorem.

Mr. ALLISON. If so, he will move to strike out all after the word "beams" down to and including "thirty-five," and make the rate 30 per cent.

Mr. VEST. I make no attack, of course, upon the lines down to line 12, because there you have 30 per cent ad valorem, to which I make no objection; but after that your rate is 35 per cent ad valorem, although you have it in the shape of a compound duty; for instance, 30 cents per pound and 15 per cent on one classification.

Mr. ALLISON. But the Senator will want to make his motion to strike out, beginning in line 11, after the word "beam," so that the paragraph will include thrown silk, etc., and then spun silk in skeins, cops, warps, or beams, making the rate 30 per cent. That will test the sense of the Senate.

Mr. VEST. That is all right. Let it go that way.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri.

The amendment was rejected.

The next amendment of the Committee on Finance was, in paragraph 383, page 130, line 1, after the word "Velvets," to insert "velvet ribbons;" in line 2, after the word "fabrics," to insert "cut or uncut;" in line 3, after the word "value," to insert "not specially provided for in this act;" and in line 6, after the word "dollar," to strike out "and twenty-five cents;" so as to make the paragraph read:

383. Velvets, velvet ribbons, chenilles, or other pile fabrics, cut or uncut, composed of silk, or of which silk is the component material of chief value, not specially provided for in this act, $1.50 per pound and 15 per cent ad valorem; plushes, composed of silk, or of which silk is the component material of chief value, $1 per pound and 15 per cent ad valorem; but in no case shall the foregoing articles pay a less rate of duty than 50 per cent ad valorem.

The amendment was agreed to.

Mr. MILLS. In line 8 I move to strike out "less" and insert "greater;" so as to read:

But in no case shall the foregoing articles pay a greater rate of duty than 50 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Texas.

The amendment was rejected.

The next amendment of the Committee on Finance was, on page 130, after line 9, to strike out the following paragraph:

384. Goods in the piece, weighing not less than 1½ ounces per square yard, and not more than 8 ounces per square yard, if in the gum or dyed in the piece and containing not more than 20 per cent in weight of silk, 50 cents per pound; if containing more than 20 per cent and not more than 30 per cent in weight of silk, 65 cents per pound; if dyed in the thread or yarn, and containing not more than 25 per cent in weight of silk, 75 cents per pound; if containing more than 25 and not more than 40 per cent in weight of silk, $1.10 per pound; if containing more than 40 per cent in weight of silk, or if composed wholly of silk, if dyed in the thread or yarn, and weighted in the dyeing, so as to exceed the original weight of the raw silk, if black (except selvedges), $1.50 per pound; if other than black, $2 per pound; if dyed in the thread or yarn, and the weight is not increased by dyeing beyond the original weight of the raw silk, $3 per pound; if in the gum, $2.50 per pound; if boiled off, dyed in the piece, or printed, $3.25 per pound; if weighing less than 1½ ounces per square yard in the gum, $3 per pound; if weighing less than 1 ounce per square yard boiled off, $4 per pound; if weighing not more than one-third of 1 ounce per square yard, $5 per pound; but in no case shall any of the foregoing articles in this paragraph pay a less rate of duty than 50 per cent ad valorem.

And to insert in lieu thereof:

384. Woven fabrics in the piece, not specially provided for in this act, weighing not less than 1½ ounces per square yard and not more than 8 ounces per square yard, and containing not more than 20 per cent in weight of silk, if in the gum, 50 cents per pound, and if dyed in the piece, 60 cents per pound; if containing more than 20 per cent and not more than 30 per cent in weight of silk, if in the gum, 65 cents per pound, and if dyed in the piece, 80 cents per pound; if containing more than 30 per cent and not more than 45 per cent in weight of silk, if in the gum, 90 cents per pound, and if dyed in the piece, $1.10 per pound; if dyed in the thread or yarn and containing not more than 30 per cent in weight of silk, if black (except selvedges), 75 cents per pound, and if other than black, 90 cents per pound; if containing more than 30 and not more than 45 per cent in weight of silk, if black (except selvedges), $1.10 per pound, and if other than black, $1.30 per pound; if containing more than 45 per cent in weight of silk, or if composed wholly of silk, if dyed in the thread or yarn and weighted in the dyeing so as to exceed the original weight of the raw silk, if black (except selvedges), $1.50 per pound, and if other than black, $2 per pound; if dyed in the thread or yarn, and the weight is not increased by dyeing beyond the original weight of the raw silk, $3 per pound; if in the gum, $2.50 per pound; if boiled off or dyed in the piece, or printed, $3 per pound; if weighing less than 1½ ounces and more than one-third of an ounce per square yard, if in the gum, or if dyed in the thread or yarn, $2.50 per pound; if weighing less than 1½ ounces and more than one-third of an ounce per square yard, if boiled off, or if dyed or printed in the piece, $3 per pound; if weighing not more than one-third of an ounce per square yard, $5 per pound; but in no case shall any of the foregoing fabrics in this paragraph pay a less rate of duty than 50 per cent ad valorem.

Mr. ALLISON. I move to amend the amendment in line 11 by inserting after the word "dollars" the words "and fifty cents;" so as to read, "and if other than black, $2.50 per pound."

The amendment to the amendment was agreed to.

Mr. ALLISON. In line 22 I move to strike out the word "or" and insert "$3 per pound," inserting a semicolon before "if dyed or printed in the piece."

Mr. JONES of Arkansas. I do not understand that.

Mr. ALLISON. I will read it as I want it to be:

If weighing less than 1½ ounces and more than one-third of an ounce per square yard, if boiled off, $3 per pound.

Then strike out "or," and make it read:

If dyed or printed in the piece, $3.50 per pound.

I wish to make a difference of half a dollar between silk boiled off and silk dyed or printed in the piece. I ask that the amendment be reported.

The SECRETARY. After the words "boiled off" insert "$3 per pound" and a semicolon and strike out the word "or" following the word "off;" and after the word "dollars," in the same line, insert "and fifty cents;" so as to read:

If weighing less than 1½ ounces and more than one-third of an ounce per square yard, if boiled off, $3 per pound; if dyed or printed in the piece, $3.50 per pound.

Mr. ALLISON. That is right, if there is a semicolon in the proper place before the words "if dyed or printed."

The amendment to the amendment was agreed to.

Mr. ALLISON. In line 24 I move to strike out "$5" and insert "$4.50;" so as to read:

If weighing not more than one-third of an ounce per square yard, $4.50 per pound.

The amendment to the amendment was agreed to.

Mr. MILLS. On page 133, line 1, in the last line but one of the paragraph, I move to strike out "less" and insert "greater;" so as to read:

But in no case shall any of the foregoing fabrics in this paragraph pay a greater rate of duty than 50 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Texas to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. JONES of Arkansas. I move an amendment to the amendment.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. Insert at the end of the committee amendment, in line 2, page 133, the following:

Woven fabrics in the piece, not specially provided for in this act, if made wholly or in part of spun silk, weighing not less than 1 ounce per square yard, if the spun silk therein constitutes not less than 80 per cent of the total weight of the goods, if in the raw, $1.10 per pound, if boiled off or dyed, $1.25 per pound, if printed, $1.40 per pound; if the spun silk therein constitutes less than 80 per cent of the total weight of the goods and not less than 70 per cent thereof, if in the raw, $1.30 per pound, if boiled off or dyed, $1.40 per pound, if printed, $1.60 per pound; if the spun silk therein constitutes less than 70 per cent of the total weight of the goods, if in the raw, $2.25 per pound, if boiled off, dyed, or printed, $2.50 per pound, if weighing not more than 1 ounce per square yard, $2.50 per pound; but in no case shall any of the foregoing fabrics pay a less rate of duty than 50 per cent ad valorem.

Mr. JONES of Arkansas. Mr. President, I believe the rate of taxes on silk fabrics from 1861 to 1883 was about 60 per cent. From 1883 up to the McKinley Act it was 50 per cent. The McKinley Act continued the rates at 50 per cent. The Wilson bill reduced the rates on silk to about 45 per cent. In 1880, of the entire silk consumption in this country about 70 per cent was imported and about 30 per cent manufactured in the country. In 1890 the conditions were reversed, and of the silk consumption in the country about 70 per cent was manufactured here and about 30 per cent imported, the importation of silks being, as I understand, those of extreme prices, the very high and very low prices. The committee's amendment proposes, as is the practice of the Republicans everywhere and on all occasions, the lowest rates on the highest priced goods and the highest rates on the lowest priced goods.

Before I sit down, if I do not forget it, I shall examine some samples of silk goods here, showing the rates of taxation upon these low grades of goods, embracing Japanese silks, silks made of what are called pierced cocoons, cheap silks, low-grade silks, silks that enter into consumption among the poorer classes of people.

These rates are enormously increased. Instead of being 60 per cent, as they were under the war tariff and up to 1883, or 50 per cent as they were under the McKinley Act, the rate on these goods and these prices average from 75 per cent to 700 per cent.

I have in my hand a copy of a letter addressed to a member of the Senate by his constituents, which very clearly and distinctly states that the imposition of the tariff in the present silk schedule on the majority of the silk products cuts no figure whatever, but there is a material revenue amounting to three or four million dollars coming from the importation of the cheap silks manufactured at Lyons, in France, and in Japan.

The rates here proposed will absolutely prohibit the importation of these silks; it will cut off these importations; will cut off the revenue; will increase the cost of the low-grade silk to the common people of the country, and will enable one or two manufacturers in Connecticut who use spun silk, who never touch reeled silk, to charge for these cheap goods three or four or five times the prices that they can now be bought for. There will be a giving up of revenue from the Treasury of three or four million dollars to enable one or two silk manufacturers to manufacture a cheap class of goods and sell them at exorbitant prices. But I will read this letter:

The undersigned, importers of silks, doing business in New York, desire to invite your attention to the rates provided in the pending tariff bill to be imposed on silk goods. Schedule L as it came from the House imposes duties on many grades of silks imported by us that would be positively prohibitive and would practically destroy our business. We refer to Japanese silk and goods made chiefly of spun silk, known as chappe, made in France and Switzerland. At the same time other European dress silks of the finer grades are to be admitted at reasonable rates, so that they can still be imported.

We have made full representations to such members of the committee having the silk schedule in charge as to these inequalities, and we have made verbal statements to such members, who appeared convinced thereby, but we fear that these facts have been overruled before the full committee owing to the strong influence of a certain Connecticut manufacturer.

We now appeal to you to use your influence with the committee to stay this impending injury to the commerce of New York and to us, your constituents. There is no question as to the facts. The specific rates provided in the bill are equivalent to 90 per cent to 100 per cent ad valorem on Japanese silks and 110 per cent to 150 per cent on chappe silks. On some of the cheaper grades of Chinese pongees the duty will be more than 700 per cent. At the same time, the rates on European dress goods, such as are used by persons of wealth, are equal to from 40 per cent to 70 per cent, the lower rate applying to the most costly goods. These, however, will pay 50 per cent ad valorem if the specific rate falls below that rate.

This schedule is said to have been agreed upon by a committee composed of a Connecticut manufacturer who makes spun-silk goods, a Paterson manufacturer who desires to make the same class of goods, and some importers here who import the finer grades of European silks and also act as agents for American manufacturers of silk goods. Thus the committee has been made to understand that the schedule is the result of an agreement between manufacturers and importers. Between these Connecticut and New Jersey interests that part of the commerce of New York represented by us is to be crushed out.

We indignantly protest against such an outrage, and we ask you to interpose and demand equality and uniformity of treatment by the committee of all grades of silk goods imported. We have no objection to specific rates; we prefer them if they be fairly and equitably arranged. But this bill exhibits such glaring favoritism to the great Connecticut manufacturer, proposing, as it does, to crush out all foreign competition for his benefit, that we confidently appeal to you to use your good offices with the committee and have such amendments made as will avert the disaster which will befall us should the measure pass in its present form.

I have had made a statement showing the importations of reeled silk under the Wilson law. The importation of reeled silk has increased from 1884 down to 1896, and I call the attention of the Senators to it. In 1884 there were imported 3,222,555 pounds of reeled silk to this country. There was a steady and gradual increase year by year, showing that the American manufacturers were gradually taking the market, until 1896, when there was imported 8,015,659 pounds of reeled silk. In 1884 there were imported 616,365 pounds of spun silk, cut silk, short silk, or refuse silk. In 1896 there were imported more than a million pounds of the same silk, giving an increase, as the Senate will see, of two or three to one of the amount imported in 1884, resulting in a very large part of the silk goods now being manufactured here, except these cheap goods. Importations of silk have been steadily going down year by year, and the comparison of these amounts year by year will clearly show the progress of this industry.

The importations of silk goods from Japan in 1893 amounted in all-silk goods to $3,347,746. In the fiscal year 1896 they amounted to $2,804,906. Instead of an increase, a decline of $542,840 is shown here, although the duty has been lowered in the 1894 tariff bill below that of the tariff of 1890, which puts goods from a 50 per cent to a 45 per cent basis.

The effect of the contemplated tariff will be to decrease considerably that importation. The greater part of these goods are imported in white, to be printed in America, and considerable establishments have been constructed for the printing, dyeing, and preparing of these piece goods for the American consumer.

I have a number of pieces of silk here, with the present price, and the rate of taxation that would be imposed under this bill, if it becomes a law, which show what its effect will be. The first sample is a sample of pongee silk. Its value is 56½ francs.

Mr. PLATT of Connecticut. What material is that?

Mr. JONES of Arkansas. This is French material.

Mr. PLATT of Connecticut. Not Japanese?

Mr. JONES of Arkansas. No; it is French.

The weight is given at 1.2 ounces. The proposed duty would be $1.25 per pound. Under the Wilson law it was 45 per cent ad valorem. Under this bill the difference would be $1.25, and $3.25 a pound under this——

Mr. MANTLE. What would be the ad valorem?

Mr. JONES of Arkansas. One hundred and thirty per cent.

I have here some other samples of Japanese silk. The first sample I hold in my hand is a sample of white pongee silk. It costs 20 cents in Japan. The weight per square yard is 7.6 ounces. The duty under the Senate bill is $3 a pound, which is equivalent to 75 per cent. The rate of duty under the Wilson law is 45 per cent, and the equivalent specific under the present bill would be $1.37½.

Of another sample I have here the foreign cost is 27 cents per running yard, and the rate is 3½ pounds for 50 square yards. The weight per square yard is 1.02 ounces. The rate of duty by the Senate bill is $3, and the equivalent ad valorem rate is 75 per cent. The rate of duty under the Wilson law is 45 per cent, or $1.90, instead of $3.

I shall not detain the Senate by calling attention to many of these, but here is another sample which costs 35 cents per running yard, 50 square yards of which weigh 4 pounds. The weight per square yard is 1.28 ounces. The rate of duty under the Senate bill is $3 per yard, and the equivalent ad valorem is 75 per cent. The rate under the Wilson law is 45 per cent. The specific tax per pound under the present law would be $1.75½ against $3 under the proposed bill, which shows the increase in the rate of taxation.

Another sample I have here costs 16 cents. The weight for 50 yards is 2 pounds, and the weight per square yard is six-tenths of an ounce. The Senate committee rate is $3 per pound, which is equivalent to 75 per cent ad valorem.

Here [exhibiting] is a sample of goods manufactured of what is called wild Japan silk. It is a fabric that can not be produced in this country unless the wild cocoons should be imported from Japan for the purpose. It certainly can not be grown here. This silk costs 8 cents a yard in Japan, and a piece of 8 yards weighs 2½ pounds; per square yard it weighs 4 ounces. The specific rate in the pending bill is $2.50 a pound. The equivalent ad valorem

is 770 per cent. On this yard of goods, which costs in Japan 8 cents, the tariff under this bill would be 62½ cents, or pretty nearly eight times its cost. It is a class of goods used for men's clothing, and also by ladies as an article of cheap dress goods.

I have another sample costing 11 cents, which is an equivalent rate of 325 per cent. So they run all the way through.

Mr. President, my purpose in offering this amendment was to try, if possible, to get the committee to agree that on this class of cheap silks, this class of low-grade silks, many of which are manufactured in Japan and can not by any possibility be manufactured in this country, to put a rate of taxation very much higher than the present rate, but a rate of taxation which will bring some revenue to the Treasury and will not absolutely exclude these silks from importation. They are the cheapest and lowest grade of silks, and I can not imagine any purpose the committee could have in view in placing a tariff of 700 per cent on that class of goods except to absolutely prevent anything like them coming into this country, so that one or two manufacturers in this country who propose to enter into the manufacture of spun-silk goods can have the market to themselves at whatever prices they choose to make.

I have a statement which I shall ask to have printed in the RECORD, showing by numbers the rates of taxation on each of these articles and also some other matters to which I have referred. I shall not detain the Senate by any longer discussion of the proposition.

The statement referred to is as follows:

Growth of the silk industries in the United States from 1884 to 1896.

Year.	Imports.	
	Raw silk reeled from the cocoon.	Waste and noils.
	Pounds.	*Pounds.*
1884	3,222,555	616,365
1885	3,424,059	661,710
1886	4,754,831	1,611,719
1887	4,646,010	838,576
1888	5,174,232	742,314
1889	5,329,646	1,213,831
1890	5,658,947	1,404,842
1891	4,917,688	1,204,636
1892	7,136,555	1,150,198
1893	7,412,422	888,168
1894	4,958,342	774,794
1895	7,964,482	1,046,759
1896	8,015,659	1,084,493

The importations of raw silk have been constantly increasing and have at no time been as high as in the two years succeeding the enactment of the Wilson tariff.

(See table of imports of manufactured silk annexed.)

The importations of manufactures of silk have been declining in about the same ratio in which the importations of raw silk have been increasing, and this in nearly all lines, as shown by the accompanying statement drawn from the Treasury Reports on Commerce and Navigation.

It is necessary, in order to bring true meaning into comparisons of this kind, to take years of equal business conditions. Comparing years of depression and years of marked prosperity would give visionary results. If we take the year 1884, the year immediately following the enactment of the tariff of 1883 (the year preceding the panic of 1884), as an exceptionally prosperous year, we find in 1890, which was also a remarkable year of prosperity, the total of imports to be about the same in height.

Under the tariff of 1890 we find the importations in 1891 and 1893 to be of nearly that same amount. The years 1895 and 1896, after the enactment of the Wilson tariff, after a reduction in the tariff, show a considerable decline from the figures of the years from 1890 to 1893.

Comparison for 1894 is excluded, for the reasons stated above.

Laces and embroideries and ready-made clothing and other wearing apparel show very little change from the high figures, as they are goods which are imported only to satisfy the taste and fashion of the wealthier classes, and would be imported whatever the tariff might be.

The decrease in importations from the figures following the enactment of the tariff of 1890, down to 1894, is chiefly in dress goods, handkerchiefs, ribbons, and velvets.

The importations of silk goods from Japan for 1893 amounted, in all silk goods, to $3,347,746. In the fiscal year 1896 they amounted to $2,804,906. Instead of an increase, a decline of $542,840 is shown here, although the duty has been lowered in the 1894 tariff bill below that of the tariff of 1890, which puts goods from 50 per cent to a 45 per cent basis.

The effect of the contemplated tariff will be to decrease considerably that importation. The greater part of these goods are imported in white to be printed in America, and considerable establishments have been constructed for the printing, dyeing, and preparing of these piece goods for the American consumer. The exclusion will be a fatal blow to these works.

The proposed duty will also be aimed against Lyons, where considerable quantities of the silks from Japan are imported and printed and shipped as French goods to America. A comparison of prices and rates of duties proposed and figured on the equivalent they would pay if on an entirely ad valorem basis will show this.

Sample.	White Japanese silk.	Foreign cost per square yard.	Weight per square yard.	Duty per square yard.*	Equivalent ad valorem duty.
		Cents.	*Ounces.*	*Cents.*	*Per cent.*
1	36-inch Japanese habutai silk	20	0.768	14.4	75
2	do	23.5	.890	16.8	75
3	do	27	1	18.8	75
4	do	30	1.15	21.6	75
5	do	35	1.28	23.7	75
6	do	16.8	.64	11.8	75

* Rate of duty, $3 per pound (18¾ cents per ounce).

Another line of goods which will be excluded are Japanese Shantung pongees. They are made of Tussore silk—the wild silk of India. They are used very largely for summer coatings and cheap waists, and are bought extensively by the working classes. They can not possibly be made here. The rates of duty are as follows:

Sample.	Article.	Foreign cost per square yard.	Weight per square yard.	Duty per square yard.*	Equivalent ad valorem duty.
		Cents.	*Ounces.*	*Cents.*	*Per cent.*
9	18-inch Shantung pongee	8	4	62.5	770
10	do	11	2.30	36.5	325
11	do	15.5	2.4	37.5	241
12	do	18¼	2.9	46.5	246

* Rate of duty, $2.50 per pound (15½ cents per ounce).

Another class of goods that is discriminated against are goods made of chappe silk, wholly or in part. Under the amended Senate bill, under the different rates applying to plain, in the gum, boiled, or dyed in the piece, or printed, the rates will be as follows:

Sample.	Silks.	Foreign cost per square yard.	Weight per square yard.	Duty per square yard.	Equivalent ad valorem duty.	Rate of duty per pound.
	24-inch surah:	*Cents.*	*Ounces.*	*Cents.*	*Per cent.*	
1	Raw or in the gum	19.5	1.35	30.8	105	$2.50
2	Dyed in the piece	21	1.35	25	119	3.00
3	Printed	23.6	1.35	25	119	3.00
4	31-inch pongee, in the raw	14.5	1.2	18.7	129	2.50
5	30-inch pongee, piece dyed	17	1.2	22.5	132	3.00
6	20-inch pongee, printed	20.5	1.2	22.5	109	3.00
7	19-inch surah, dyed in the piece	19	1.12	21	110	3.00
8	21-inch pongee	18.5	1.2	22.5	122	3.00

The rates of duty on these cheap silks, used for summer dresses, in the highest rates are nearly 200 per cent above the present duty, and 133 per cent in the lowest duty rate above the present tariff. The higher valued goods from Lyons and Zurich on the specific basis of the amended tariff bill would pay duties as low as 40 per cent but for the proviso that in no case shall any of the aforesaid fabrics pay a less rate of duty than 50 per cent ad valorem.

Cotton-back satins, however, in which the cotton, of course, presents the chief weight, pay rates as high as 72½ per cent.

Amount of importations of manufactured silk goods from 1884 to 1896.

Classification.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.	1896.

* From 1891 included in "Webbings, etc."

† Up to 1891 included in "Braids, etc."

Mr. PLATT of Connecticut. What does the Senator think the equivalent ad valorem of the specific rate proposed in his amendment would be?

Mr. JONES of Arkansas. It would be something about 100 per cent.

I propose, if my amendment is voted down—which I presume will be done—to offer an amendment at the end of this paragraph, where the committee provides that there shall be no duty of less than 50 per cent, to insert "nor more than 60 per cent."

Sixty per cent is the highest rate ever imposed in the history of this country upon this class of goods. That was the rate imposed by the war tariff, and that was the rate prior to the tariff of 1883. Fifty per cent was the rate under the law of 1890. Sixty per cent is the highest rate ever known; and when you limit the tariff that none of these articles shall go below 50 per cent, it seems to me reasonable to add an amendment that none of them shall go beyond 60 per cent. If this amendment is not adopted, I shall move that as my next amendment.

Mr. MANTLE. Mr. President, I am not very familiar with the silk schedule. I have listened with a good deal of interest, however, to what has just been said by the Senator from Arkansas. I am in entire sympathy with him in his opposition to these enormous rates of duty proposed against these Japanese and Chinese silks. There certainly can be no excuse, no reason in fairness and justice, for any such rate of duty as is proposed by the committee, if the Senator from Arkansas is right. I shall oppose it upon the same line and for somewhat the same reason that I favored the putting of straw matting upon the free list.

I do not believe we can overcome this oriental competition in this way. To my way of thinking, there is another proposition which we shall have to adopt before we can equalize the conditions which exist in oriental countries and the conditions, industrially speaking, which obtain in our own country. But I certainly never could give my vote or countenance to the proposition to levy a rate of duty of 300 or 500 or 700 per cent upon a class of fabrics which are needed and which are used by the poorer people in this country.

I am not opposed to a good, stiff protective tariff, if I may use that expression, upon those manufactured commodities which can be produced in this country, but I certainly can not bring myself to vote to absolutely prohibit the importation of this character of goods. We need them in the country; the poorer class of people need them. If they can be produced here, I am perfectly willing to vote for a good protective tariff, a reasonable one, 75 per cent, if necessary, or 100 per cent, if necessary, but I want to vote in favor of the proposition advanced by the Senator from Arkansas—to limit this rate of duty upon this particular class of goods. I know myself that they are a character of goods which have come into use very largely in the last few years and have become a necessity where formerly they were a luxury, and the very fact that we have been able to get them cheaply has made them a necessity, and I do not want to exclude them.

Mr. PLATT of Connecticut. Mr. President, it is only a short time ago that there was a very decided sentiment in what might be called the Western or intermountain States against Japanese competition, and we had very plaintive appeals from the Pacific Coast with reference to Japanese competition in manufactured articles.

This Japanese competition is a pretty serious question, and in this bill the rates upon the class of goods which are imported from Japan are high so far as the equivalent ad valorem is concerned if we take the entered value of the goods at the custom-house. I undertake to say that in my judgment there has not been an honest valuation in the custom-house, or scarcely an honest valuation, of Japanese silk goods, but that they are undervalued worse than any other goods are undervalued, and when a high rate of equivalent ad valorem duty, like 100 or 200 per cent, is figured out, it is figured out upon a Japanese undervaluation of the goods at our custom-house.

Wherever you figure 100 per cent ad valorem as the equivalent for the specific rate, it is safe to say that the rate is 50 per cent on an honest valuation of the goods. There are no 200 or 300 or 400 or 700 per cent equivalent ad valorem rates in this paragraph. There are no spun silk or spun-silk goods that come from Japan, as I understand. This is very largely—I will not say misrepresentation, but a misunderstanding of the facts.

Mr. JONES of Arkansas. If the Senator will allow me to interrupt him, he has just made a broad statement there that seems to involve either the good faith or the intelligence of myself or of the man who furnished me these samples. The man who furnished me the samples is a reputable New York silk importer. He is said to be a gentleman, and I believe he is. He gave me the samples, and he assured me that they were taken without prejudice from his stock, without picking or selecting them for a special purpose, but that he took them as they came.

Here is a sample [exhibiting] which he says costs 8 cents a yard, and on that class of goods the Senator himself will not deny that the tax will be 62½ cents on the yard; and if that does not make a tax of more than 700 per cent, I do not understand the commonest arithmetic. Either the statements made by this importer or by me are untrue or here is an instance in which the tax is more than 700 per cent.

Mr. PLATT of Connecticut. Is that the wild silk?

Mr. JONES of Arkansas. The wild Indian silk.

Mr. PLATT of Connecticut. It is possible, though I do not believe it.

Mr. JONES of Arkansas. I do believe it; so that makes us even.

Mr. PLATT of Connecticut. But it is not an article of silk that is much imported or much used in this country, as I understand.

It is quite easy sometimes for importers to discover a particular article not much used, not much imported, entered at a very low valuation, very much undervalued, and then, in going over a specific schedule, to point out a high equivalent ad valorem on that particular article, as if that were the ad valorem rate which was imposed by the specific duties in the paragraph.

I think I am correct in saying that the duties in this paragraph will not average 75 per cent; and most of them will be very much less than that. On the contrary, I think that the amendment proposed by the Senator from Arkansas—though I have not had time to carefully analyze it—might be classed in simpler language in this way: "All spun-silk fabrics imported into the United States shall not pay more than 35 per cent ad valorem." That is the practical effect of the amendment proposed by the Senator from Arkansas, as I could catch it and analyze it offhand.

Mr. GRAY. Thirty-five per cent?

Mr. PLATT of Connecticut. I do not think the amendment proposed by the Senator from Arkansas would average over 35 per cent ad valorem on these goods.

Mr. JONES of Arkansas. Then the Senator and I differ widely on that point. I have not made the calculation as to what the rates would amount to, but I think they will average over 100 per cent.

Mr. GRAY. I do not believe there was ever a tax of 100 per cent on a necessary of life that was not an outrage. I do not believe that 100 per cent on any article of common necessity and of universal use could be justified on any ground at all.

Mr. HOAR. Will the Senator from Delaware allow me to ask him a question?

Mr. GRAY. Certainly.

Mr. HOAR. I wish to ask the Senator whether he opposes this as a Democratic outrage or as a Republican outrage?

Mr. GRAY. I do not care which; it is an outrage, no matter where it comes from.

I was speaking to the Senator from Arkansas [Mr. JONES]. As a matter of fact, these high rates of taxation are tyrannies, simple and pure, and in favor of individuals.

Mr. JONES of Arkansas. As a matter of justice to myself, I wish to say that the Senate understands, of course, that I did not offer this amendment because I desired it, but because I think 100 per cent is better than 700 per cent. I agree with the Senator from Delaware that a 100 per cent tax is an outrage.

Mr. GRAY. These are tyrannies, and they are acts of despotism in favor of a class of people who claim the right to use the taxing power of the United States for their own private benefit. It has been said somewhere, I think, of Russia, or of some other government of the world, that it was a despotism tempered by assassination. These high duties are only tempered by smuggling and every evasion that the ingenuity of the human mind can resort to. Where you establish tyranny, you are bound to induce resistance. High duties are tyranny tempered by smuggling and fraud.

Mr. MANTLE. Mr. President, replying just in a word to the Senator from Connecticut [Mr. PLATT], who spoke of the plaintive cry that has been set up by the Western people for protection against this oriental industrial invasion, I wish to say the Western people have plead for protection, but they have asked for a different remedy than a 700 per cent protective tariff, or even a 500, a 400, a 300, or a 200 per cent tariff. They believe that this competition has been stimulated by the difference in the financial conditions existing in the two countries; they believe a restoration of the old system of money, which obtained prior to 1873, will do more toward protecting those industries of this country, which are now suffering by competition from the Orient, than any reasonable tariff which can be placed upon their products.

I am in favor, I repeat, Mr. President, of a reasonable protective duty, but I assert, with my understanding of the conditions which exist in those countries and the conditions which exist in ours, that it is simply a matter of impossibility to equalize these conditions by the levying of any reasonable protective duty. We can equalize the conditions arising out of the difference in the standards of living, the rates of wages, and that sort of thing, which exist between these countries, by a protective tariff; but we can not equalize the difference which arises out of the divergence between the value of gold and silver by a protective tariff. It is

simply impossible. They enjoy an advantage by reason of their financial systems, and it is simply useless, in the light of experience, to attempt to correct the evil by a protective-tariff law. It can not be done.

Mr. PLATT of Connecticut. Mr. President, if I understand the amendment offered by the Senator from Arkansas, it does not refer to Japanese silks at all; it does not include Japanese silks. Japanese silks are not spun silks, that is, to any considerable extent, and they are not made from spun silk, but they are made almost entirely out of other kinds of silk. This provision applies entirely to spun silk, and is not aimed to correct any extravagant rate as applying to Japanese silk.

With regard to the very cheap prices upon specimens of silk goods, such as have been exhibited here, and the calculation of the equivalent ad valorem upon them, I will say that the manufacture of silk goods is peculiar. On a fabric of silk goods which costs a dollar a yard, if it does not happen to strike the taste and the fashion, there is no sale for it, and next year it may be sold at 20 cents a yard, or 10 cents a yard. So that these calculations, which are made upon fabrics which are said to have been purchased for 10 cents or 20 cents a yard, are entirely misleading.

The goods may have cost 20 cents or 40 cents or 100 cents when they were made. If the style changes, they go into the list of discarded silks, and are sold at the prices of discarded silks. It is in this way that it is attempted to convey the idea that the rates in this paragraph are extravagant. I undertake to say that the rates upon silk in this paragraph will not average over 75 per cent.

Mr. JONES of Arkansas. There is no doubt in my mind that my honorable friend from Connecticut is mistaken in his criticism of the amendment offered by me. The spun-silk goods are cheap goods, whether they come from France or Japan.

Mr. PLATT of Connecticut. They do not come from Japan.

Mr. JONES of Arkansas. The spun silk is used in Japan just as well as the reeled silk.

Cocoons are pierced in Japan as well as in France, and spun silk or cheap silk makes the cheap silk fabrics of Japan as well as of France. You can not make these cheap goods of real silk, because the real silk in the cocoons is worth more than that, and it can be sent to the French market and sold for a higher price than when used in these fabrics. So the amendment is intended to apply to spun silk and chappe silk and silk which is injured in the cocoon; silk that is cut in two; that does not have the long, almost endless fiber. Silk from the short cocoons, as everybody understands, is known as spun silk. Yarn from spun silk sells in this country for $1.30 a pound, while yarn from real silk sells for $5 a pound. The cutting of the fiber in two in piercing the cocoon injures it, almost destroys its value, and for a long time it was considered worthless.

The Senator from Connecticut has a constituent who began years ago the process of spinning silk in this country. I believe he began the process of spinning silk in the United States. He has spun silk, and, in fact, his competitors in the silk-weaving business complain that he will not sell a pound of spun-silk yarn to any other manufacturer. He wants to keep it in his own hands.

Mr. PLATT of Connecticut. I think, since the statement has been made, I should say that I understand there is no truth in it; that he is very glad to sell spun-silk yarn.

Mr. JONES of Arkansas. I know nothing about the truth. I have been told that that is so. I do not know whether it is true. Anyhow, he was the pioneer in spinning silk. He knows, as well as any man alive, the difference in the value between real silk and spun silk—between the silk that comes off in the form in which it was put on the cocoon by the silkworm and the silk with the fiber cut in two, practically destroyed.

The amendment which I propose applies only to spun-silk fabrics. Where cheap silks have been made—where the cheap goods, the pierced cocoons are used for the manufacture of goods, and a cheap class of goods made—then I propose that the lower rates shall apply.

I desire to say, since the Senator has raised the question as to the ad valorem rate, that I am inclined to think his criticism is in some measure correct. I do not believe the rate will be under 35 per cent in any instance, and I am willing to limit it, if he chooses to do so, to 50 per cent—that it shall not go below 50 per cent. I am entirely willing to leave that provision in it. I think then the rate will be about 70 or 75 per cent instead of 100 per cent, as I stated at first.

Mr. WHITE. I have a couple of brief communications which I desire to present to the Senate.

We, the undersigned, dealers and importers of silk goods, manufactured in Japan, beg to call your attention to the proposed duty of $3 per pound and to hand you herewith a statement showing the cost of such goods, ranging in weight from seventy-seven one hundredths of an ounce per square yard to 1.28 ounces per square yard, and from which you will see that this proposed duty of $3 per pound is equivalent to 75 per cent ad valorem, which is absolutely prohibitory.

These qualities of goods can not be manufactured in this country, as the class of silk from which they are made is of inferior grade and can not be worked upon power looms, on account of the tension, and must be made on hand looms only, and therefore these Japanese silks can not fairly be said to compete with American silks.

On the contrary, the large and growing industry established in this country for dyeing, printing, and finishing of Japanese silks is largely dependent upon the importation of these goods, and the proposed prohibitory rates would injure this industry, which at present is employing several thousands of working people at Paterson, Lodi, Hawthorne, and Passaic, in New Jersey; Lexington, in Massachusetts; Middletown, in New York, and in other places.

We further beg to state that the value of these goods imported at this port under the McKinley tariff amounted to over $5,000,000 annually, while under the present Wilson tariff, owing to the general stagnation in all lines, it has dwindled down to about $3,000,000, exclusive of receipts of other ports, and that the revenue therefrom exceeds $1,500,000 annually, of which, under the proposed prohibitory rates, the Government would be practically deprived.

We further submit that since the percentage of American silks consumed in the United States has risen from 30 per cent in 1890 to 70 per cent in 1896, under a tariff of 50 per cent ad valorem up to 1894, and since then of 45 per cent ad valorem, with raw silk free, it does not appear that the depression of that industry in common with all other branches of commerce, should be attributed entirely to the tariff, but may be accounted for by the general depression and domestic competition.

We now appeal to you to use your influence with the committee to stay this impending injury to the commerce of New York and to us, your constituents. There is no question as to the facts. The specific rates provided in the bill are equivalent to 75 per cent to 80 per cent ad valorem on Japanese silks. On some of the cheaper grades of Chinese pongees the duty will be more than 700 per cent. At the same time, the rates on European dress goods, such as are used by persons of wealth, are equal to from 40 per cent to 70 per cent, the lower rates applying to the most costly goods. These, however, will pay 50 per cent ad valorem if the specific rate falls below that rate.

We further call your attention to the fact that as these goods are made nowhere but in Japan, the imposition of a prohibitory rate would be tantamount to a discrimination against a country with whom we are in especially friendly relations, and must affect seriously our large and growing exports to Japan.

Silks manufactured in Japan enter largely into consumption amongst the masses by reason of their low prices, and are no longer a luxury used by the rich only.

We respectfully submit that a specific duty of $2.50 per pound on all boiled-off silks, weighing not less than five-eighths of an ounce per square yard, with a saving clause that such duty shall be in no case less than 60 per cent, an increase of 33⅓ per cent in the present rate would work no injury to any established American industry.

Certainly an increase of 33¼ per cent over the present rates of duty, made specific so as to preclude undervaluation, should afford all the legislative relief that can be fairly demanded.

It is believed that such a rate would not result in stopping importations, although it might diminish them to some extent, and the Government would receive as much or more revenue from this source than under the existing rate.

J. R. SIMON & CO.	MENDELSON BROS.
A. S. ROSENTHAL & CO.	Z. HORIKOSHI & CO.
E. T. MASON & CO.	LIN FONG & CO.
KAHN & KAHN.	R. ISAACS & BRO.
KOBBE & SANDS.	POLLOCK BROS.

I ask that the tabulated statement which accompanies the document may be printed in the RECORD without being read:

Sample.	Silks.	Weight per square yard.	Cost per yard.	Present duty.	Rate of duty per pound.	Equivalent ad valorem duty.
		Ounces.	*Cents.*	*Per cent.*		*Per cent.*
6	Momme quality	0.77	20	45	$2.50 3.00	62.5 75
7	do	.90	22-28	45	2.50 3.00	62.5 75.7
7½	do	.96	23-87	45	2.50 3.00	62.5 75.4
8	do	1.02	25-50	45	2.50 3.00	62.5 75
9	do	1.15	30	45	2.50 3.00	62.5 75
10	do	1.28	31-82	45	2.50 3.00	62.5 75.7

Handkerchiefs.

36 by 36, hemstitched, weighing 23 ounces per dozen:

First cost	$2.00
Present duty	3.00

At $2.50 per pound, with 10 per cent ad valorem, equals 70 per cent.
At $3 per pound, with 10 per cent ad valorem, equals 80 per cent.

Mr. PLATT of Connecticut. Will the Senator from California permit me right here? I am inclined to thank him for the introduction of that statement prepared by the importers of San Francisco, for it bears me out in my statement that the rates in this paragraph upon Japanese silks would not average over 75 per cent. I do not think they will average so much, but that is the statement of the importers, and it sets at rest all this talk about two, three, four, and five hundred per cent.

Mr. WHITE. If the Senator had noticed the communication throughout he would have found that the statement is that on the low-grade pongees the rate runs up to 700 per cent. The Senator from Connecticut shakes his head. He may shake his head, but he can not eliminate this typewritten document by doing so.

Mr. PLATT of Connecticut. I understood it to say that on the low grades it is from 75 to 80 per cent, and in particular cases, referring to this discarded wild silk, it would be as much as 700 per cent.

Mr. WHITE. They say:

On some of the cheaper kind of pongees the duty will be more than 700 per cent.

Mr. PLATT of Connecticut. I understand that.

Mr. WHITE. I have here a tabulated statement showing practically the same matters referred to by the Senator from Arkansas.

Speaking of silk as a luxury, this article calls attention to the fact that, by reason of the pursuit of the industry in Japan, articles numerous in number and excellent in fabric have been placed within the reach of the poorer classes of the American people. The object of my distinguished friends on the other side of the Chamber is to compel this article to retain its character as a luxury, and by keeping up the price to prevent its being an article of common use and necessity. In other words, if there is an article used by the people which has hitherto been expensive, and which gradually has been reduced in rate until it has been placed within the reach of all, then immediately a tariff is to be imposed which will again increase the price and deprive it further of its status as a subject of general consumption and universal utility.

We have put upon these cheap articles an enormous tariff. We have, as stated by the New York importers, not the San Francisco importers, whose statement I read, a declaration that the tariff is between 70 and 100 per cent, which they say is absolutely prohibitive. The Wilson bill fixed 45 per cent. The Senator from Arkansas alluded to a very prominent manufacturer in Connecticut, to whom also the Senator from Connecticut referred. I do not think the Senator from Connecticut will say that that gentleman, who is represented to be worth seven or eight million dollars, made legitimately in the pursuit of his business under favoring laws, is suffering at 45 per cent ad valorem. I do not suppose the Senator from Connecticut will say there is any general demand among the silk manufacturers in this country for anything more than a 50 per cent rate.

Indeed, I was told day before yesterday by a silk manufacturer that the vast majority—I think he said 90 per cent—of those interested in the business at Paterson, N. J., had agreed upon a 50 per cent rate; and if to this bill the committee would report an amendment providing for a 60 per cent rate, and that in no event should it be below 50 per cent, I would willingly vote for it as a substitute for the measure here proposed. But it will be observed that the provision of the bill is that in no event shall the rate be less than 50 per cent, while there is no maximum fixed.

Now, if the Senator from Connecticut is right, that the rates fixed by the bill are about 75 per cent, let us, if we can not get anything better, have an amendment fixing the maximum rate at 75 per cent. I shall propose such an amendment a little later on, and then we can test the sense of the Senate on it.

I have before me a copy of a letter from Mr. Tingle, of this city, who I suppose was examining the subject for interested parties, but it contains a very clear review of the situation. It is a copy of a letter addressed to the Senator from Rhode Island [Mr. ALDRICH], who was chairman of the subcommittee of the Committee on Finance. It is as follows:

WASHINGTON, D. C., *April 6, 1897.*

DEAR SIR: I respectfully ask your examination and consideration of the accompanying samples and tables relating to the rates of duty proposed on silk goods by the tariff bill (H. R. 379) pending in the Committee on Finance. These samples embrace a large variety of piece goods covered by Schedule L, including Japanese and Chinese pure silks, printed pongees, chappe silks, Swiss marcellines, and Lyons dress silks and satins.

The ad valorem equivalents of the specific rates proposed on Japanese and Chinese silk goods range from 95 per cent on Japanese habutai to 770 per cent on the lowest grade of Chinese pongees, while the rates on Lyons silks and Swiss marcellines, the latter comparing closely with Japanese habutai, at the specific rates proposed, would be from 40 per cent to 70 per cent ad valorem. As you are aware, the Lyons silks, paying the lowest rates of duty under the bill, are the most expensive and are used by persons of liberal means, while the Chinese and Japanese silks and French chappe are bought by the masses because of their cheapness.

I wish also to call attention to the fact that the bill makes no distinction between the inferior goods known commercially as chappe, made chiefly of spun silk, and silk goods proper made entirely of silk reeled from the cocoon. It should be noted that the chappe yarns in these goods cost $1.35 per pound and the small proportion of thrown silk therein $3 per pound. The proposed duty, as applied to the yarns in the piece, would be 150 per cent on the chappe and only 16 per cent on the silk.

It is obvious that the rates proposed on chappe, Japanese, and Chinese silks are prohibitory, and, should this become a law, the entire revenue now derived from this source would be lost to the Government, while at the same time a large business carried on by many firms in the United States would be entirely sacrificed, and our trade relations with the countries producing these goods disturbed.

Not only would the firms engaged in importing these goods lose their business, but the great number of persons employed in printing and dyeing Japanese and Chinese silks and Lyons chappe goods would be thrown out of employment, it being the practice to import these goods in the gray and print and dye them here, the art of printing and dyeing having been brought to great perfection in this country.

You have no doubt already observed the inequalities of this schedule, but it occurred to me that the presentation of the samples, by way of illustration, would emphasize its unfairness and perhaps aid you to some extent in arriving at fair and uniform rates which should be acceptable both to importers and domestic manufacturers.

I should be glad, if given an opportunity, to make a brief verbal statement of the matter in connection with the samples.

Very respectfully,

A. K. TINGLE.

HON. NELSON W. ALDRICH,
Chairman Subcommittee on Finance, United States Senate.

I have also before me copies of two short letters, written to the Senator from Oregon [Mr. MCBRIDE], from Portland. One is dated March 27 of the present year, and is as follows:

PORTLAND, OREG., *March 27, 1897.*

Hon. G. W. MCBRIDE,
United States Senator, Washington, D. C.

DEAR SIR: We respectfully call your attention to the Dingley bill as at present before the House of Representatives, and as we are doing an extensive business with the oriental countries, we would respectfully call your attention to objections that we find in this bill, not, be it understood, solely from an importer's standpoint, but what is far more important to the Pacific Coast, an exporter's.

Our correspondents in Japan, who are probably the largest house in that country, are so closely identified with the Government there that they know whereof they speak, and we have been advised by them that the Japanese people, on account of the increase on tariff on their exports, such as curios, silks, mattings, etc., and which advance, if put into effect, would not increase the revenue of this Government to any great extent, are at the present time turning their attention for flour and wheat to the Canadian side.

You are probably well aware of the vast flour business that has been done with the Orient from the States of Washington, Oregon, and California, and it would appear to us that we are endangering an export business that is bringing us in more than tenfold of what we are paying for goods we get from them.

I will not read the statement which follows, as it does not bear directly upon this point. The letter is signed by T. M. Stevens & Co.

There is also a letter written by the same party, T. M. Stevens & Co., to the same Senator, as follows:

PORTLAND, OREG., *May 18, 1897.*

DEAR SIR: Having very carefully perused the Dingley bill as amended by the Senate Finance Committee, we beg to call your special attention to the silk schedule. Having thoroughly studied this, we find that the cheaper grade goods are in every case made to pay a higher rate than the better class and in some cases, such duty will amount to nearly 100 per cent ad valorem.

As we understand it, the bill was originally proposed as a revenue measure, yet it is our opinion, as well as that of a large number of importers and dry-goods merchants in this country, that the prohibitive duties as imposed by this bill will restrict importations to such an extent that the revenue derived from this class of goods will be less than it has been under the Wilson bill.

Our understanding is that New Jersey silk manufacturers suggested a straight 50 per cent ad valorem duty as being ample protection to them, but as a substitute for such ad valorem duties, and which has been taken advantage of by some unscrupulous importers, we suggest the imposing of a duty of from $1.80 per pound on the light goods to $2.50 on the heavy goods, where made in the piece, and 60 per cent ad valorem on handkerchiefs, whether plain or embroidered.

Duties of this kind, while an increase of from 10 to 20 per cent over the present duty, will still admit of business being done, while with the duties as mentioned in the present measure the trade must be largely curtailed.

Trusting you will give this matter consideration, we are,

Yours, very truly,

T. M. STEVENS & CO., INCORPORATED.

Hon. GEO. W. MCBRIDE,
United States Senator, Washington, D. C.

Mr. President, I have searched the tariff hearings in vain for a reason for these great raises, and, as I stated in the early portion of my remarks, if it be true that the present peculiar, mystified, complicated, and scientific schedule means really not over 75 per cent ad valorem, let us so declare. It is easy to make an amendment of that character. The fact of the matter is that it is desired by the manufacturers, as I have said before, to continue silk, whether of the most valuable character or not, as an article of luxury, and now that there is an opportunity of its more general use, now that it is getting into the pockets of everybody and is of quite general consumption, we have a movement upon the part of the Republican party to abandon a tariff which they themselves have indorsed from war days to this hour, and we have presented to us a schedule which for complicated peculiarity is the most remarkable in the whole of this wonderful bill. That is the only remark I care to make now. Later on I will propose an amendment to test the sincerity of some of the manufacturing people of this country.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arkansas, which has been stated.

Mr. JONES of Arkansas. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. TELLER. Let the amendment be read.

Mr. PLATT of Connecticut. Before that is done, we might as well have a call of the Senate.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allison,	Foraker,	Mallory,	Proctor,
Bacon,	Frye,	Mantle,	Quay,
Bate,	Gear,	Mills,	Rawlins,
Burrows,	Gorman,	Mitchell,	Roach,
Butler,	Gray,	Morgan,	Shoup,
Caffery,	Harris, Kans.	Nelson,	Stewart,
Carter,	Hawley,	Pasco,	Teller,
Chandler,	Heitfeld,	Penrose,	Tillman,
Chilton,	Jones, Ark.	Perkins,	Vest,
Clark,	Jones, Nev.	Pettigrew,	Walthall,
Clay,	Kenney,	Pettus,	Wellington,
Cockrell,	Lodge,	Platt, Conn.	Wetmore,
Elkins,	McBride,	Platt, N. Y.	White,
Fairbanks,	McLaurin,	Pritchard,	Wilson.

The VICE-PRESIDENT. Fifty-six Senators have answered to their names. A quorum is present.

Mr. TELLER. Mr. President, I regret that we can not determine exactly what the duty is on the articles found in the paragraph. The Senator from Arkansas is sure that it is a very large duty. The Senator from Connecticut is sure that it is not, but he does not seem to be sure what the duty is. It seems to me the committee ought to be able to tell us very nearly at least what is the ad valorem duty. It is utterly impossible for those of us who are not skilled in these things to determine for ourselves.

I am willing to vote for a fair, reasonable duty on any of these articles. I am not willing to vote for a 700 per cent duty on anything unless I vote for it distinctly for the purpose of keeping it out of the imports of the United States. I do not know whether or not this paragraph includes Japanese silks. I do not know enough about the question to determine that, and I do not seem to be able to get any information from the committee on the subject. I do know something about the use of Japanese silk and the growth of its use in this country in the last few years. My attention has been called to it.

I know that dress goods made in Japan have been sold in the United States at retail within the last few years at a rate at which I do not believe it is possible for any American silk manufacturer to sell at wholesale. Dress goods made of Japanese silk have sold at retail in the State of Colorado within the last two years for 19 cents a yard. I do not know how good they are for wear, but they are reputable in looks at least, and are bought, as I understand, to a very large extent.

The Japanese have increased their manufacture of these textiles very rapidly. I have before me now the last publication of the Statesman's Year-Book, a work of authority, and I find that in 1894 the exports of silks and silk materials from Japan amounted to 55,513,197 yen or, in round numbers, 55,000,000 yen. The next year the exports were nearly 67,000,000 yen.

Mr. FRYE. What is a yen?

Mr. TELLER. A yen is practically an American dollar, or was until the recent change in the system. It was about ninety-eight cents and a fraction. We have always treated it as practically an American dollar. There is an increase in one year of over 12,000,000 yen, which, when you look at it, is a very large increase in percentage. These goods are brought here and sold at a rate that is astonishingly low because of the low price of wages in Japan and because the rates of exchange have been equivalent to a bonus of about 100 per cent in favor of Japan. That bonus will continue, notwithstanding Japan has nominally gone to the gold standard.

Our gold-standard friends have been very much elated of late over the statement that Japan has gone to the gold standard. She has gone to the gold standard in this way: She has cut her yen in two. She has recognized the appreciation in gold, which we have been contending for, and she has said the gold that heretofore made 1 yen shall now make 2, and that yen shall be legal tender for all debts in Japan just as it has been when it had twice as much gold in it. That enables her to continue the advantage she has because of the appreciation of gold or the depreciation of silver, if you choose to put it the other way.

It will be utterly impossible for us, unless with some such duty as is now proposed, to compete with Japan in the manufacture of silks or anything else that she can manufacture, and I do not know anything she can not manufacture that we can. I find by consulting some silk men in my State who are interested not in the manufacture of silk, but in its sale, that they do not make in Japan as fine an article of silk as we make in this country or as they make in France or Germany.

The silk for wear, I understand, is, much of it, quite as good, but it is not quite so brilliant and the finish is not as satisfactory to the American purchaser. I find also the fact to be that they are exporting silk to Germany and there having it finished and then reexport it from Germany to the United States, and it is sold here as German or French silk. I do not suppose it will take very long before the Japanese manufacturers will find out how to put the gloss on it that the purchaser desires. A few months, at least, I think, will enable them to do that.

Mr. President, it is not possible for us to meet this by any reasonable duty, as stated by the Senator from Montana. We can not defend here a duty of 700 per cent, unless we are willing to take the position that we intend absolutely to exclude it. If that is our intention, it would be twice as decent for us to say that hereafter we will exclude all Japanese silk. That we know we can not do without a violation of our treaties, and that we know the American people will not submit to. And yet, if the Senator from Arkansas is correct, we are practically doing that to-day if we put these immense duties upon Japanese silk.

The Senator from Connecticut says that it does not apply to Japanese silk. Then, if it does not apply to Japanese silk it is still more indefensible, in my judgment. If it does not apply to German silk and French silk, what silk does it apply to?

Mr. PLATT of Connecticut. If it applies to any, it applies to China.

Mr. TELLER. I am not up in the technical knowledge that a man ought to have to discuss the question as to what it does apply to; I do not know that we shall know when we get through and vote on it; but I am not willing to vote for any duty, I do not care whether it is against Chinese silk, Japanese silk, or any other, that approximates 700 per cent, or 500 per cent, or 400 per cent.

The Senator from Connecticut repeats in his seat what he has before said, that it does not, but he does not tell us what it is. We are entitled to know, approximately at least, how much duty we are voting on this class of silk. Unless I can be assured that it is a reasonable duty, I shall change my conduct in this matter and vote for the amendment of the Senator from Arkansas.

I have voted for a number of things here that did not meet my judgment, but, as I said the other day, I want this tariff bill to be what our Republican friends will call, when they get through, a Republican tariff bill. I think myself that the Wilson Act is a pretty good protective measure except in a few items. I think it affords more protection to American manufacturers than some tariff acts we have had labeled Republican tariffs. I think it is ample in very many things.

I know the duties are now being raised. I do not know whether they are being raised above the McKinley Act or not, but I judge some of them are. I have been quite inclined to vote and have voted for the raising of duties upon the theory that I wanted the bill to be satisfactory to the men who have promised that the bill shall bring prosperity. But I can not quite go 700 per cent, and unless the committee can assure me in some way that this is a reasonable duty, I shall be compelled to vote for the amendment of the Senator from Arkansas.

Mr. PLATT of Connecticut. Mr. President, the way in which the changes are rung upon the statement that here is an article on which the duty would be 700 per cent, to indicate that in this paragraph there is a duty of 700 per cent upon silk goods, is an illustration of the way the arguments are always made against specific duties. I call the attention of the Senator from Colorado to the fact that the Senator from California [Mr. WHITE] put into the RECORD a statement made by the importers of San Francisco——

Mr. WHITE. Of New York.

Mr. PLATT of Connecticut. Of New York, who can not be expected to understate the ad valorem equivalents, in which they put the ad valorem equivalent on Japanese silks in one instance at 75 per cent and in the other at from 75 to 80 per cent as the outside rate. I call attention to the fact that those are the importers of New York, an association of them, and that all they claim is that the duties on Japanese silks are from 75 to 80 per cent. That is the extreme claim. There has been a piece of wild silk goods, as it is called, from China brought in here which is not an article of commerce, on which it is said that there is a 700 per cent duty, and so Senators seem to think that there is a 700 per cent duty on everything.

Mr. STEWART. Can the Senator give the official figures?

Mr. PLATT of Connecticut. I was going to state that I take the figures of the appraiser at the port of New York. According to a recent report of the United States appraiser at New York the ad valorem equivalents of the specific rates in this paragraph 384 are as follows—and I am going to depart from my custom and take a little time to read what he says on the subject:

	Per cent.
Weighing not less than 1¼ nor more than 8 ounces per square yard:	
Containing not more than 20 per cent in weight of silk—	
If in the gum (50 cents per pound)	27 to 40
If dyed in the piece (60 cents per pound)	41 to 52
Containing over 20 and not over 30 per cent weight of silk—	
If in the gum (65 cents per pound)	22 to 43
If dyed in the piece (80 cents per pound)	27 to 43
Containing over 30 and not over 45 per cent weight of silk—	
If in the gum (90 cents per pound)	42 to 50
If dyed in the piece ($1.10 per pound)	30 to 46
If dyed in the thread or yarn and containing not over 30 per cent in weight of silk—	
If black (75 cents per pound)	36 to 46
If other than black (90 cents per pound)	37 to 58
Containing over 30 and not over 45 per cent weight of silk—	
If black ($1.10 per pound)	39 to 46
If other than black ($1.30 per pound)	40 to 48
Containing more than 45 per cent in weight of silk, or if composed wholly of silk, if dyed in the thread or yarn and weighted in dyeing so as to exceed the original weight of the raw silk—	
If black ($1.50 per pound)	25 to 56
If other than black ($2 per pound)	32 to 54
If dyed in the thread or yarn—	
And here is the spot where the contention is made—	
and the weight is not increased by dyeing beyond the original weight of the raw silk ($3 per pound)	30 to 50
If in the gum ($2.50 per pound)	30 to 55
If boiled off or dyed in the piece or printed ($3 per pound)	45 to 80
Here is the highest point—	
Weighing less than 1½ ounces and more than one-third of 1 ounce, if boiled off, or if dyed or printed in the piece ($3 per pound)	48 to 90
Weighing not more than one-third of 1 ounce per square yard ($5 per pound)	50 to 75

We have reduced that from $5 to $4.50, so that there is a reduction in the ad valorem rate. Now, I put against all this talk of the importers the appraiser at New York as to the equivalent ad valorems.

Mr. TELLER. Who is he?

Mr. PLATT of Connecticut. Mr. Bunn.

Mr. MILLS. Is the Senator reading the equivalent ad valorems of the goods imported?

Mr. PLATT of Connecticut. On the importations at the port of New York of these goods.

Mr. MILLS. But you do not touch the equivalent ad valorem on goods not imported and that are prohibited from importation. That is the point.

Mr. PLATT of Connecticut. I do not understand that anyone claims that anything is prohibited now.

Mr. MILLS. I take it that if your tariff of 700 per cent is imposed, it is prohibitive.

Mr. PLATT of Connecticut. There it is again. We never shall be able to answer that.

Mr. MILLS. Very well. The specific system is adopted for the purpose of prohibiting importation. It is a protective measure.

Mr. PLATT of Connecticut. This is the report of the appraiser at New York as to what the equivalent ad valorems would be upon the specific rates on the importations of last year.

Mr. MILLS. Precisely; I so understand it. Now, then, I mean to say that there are cheaper goods which are always kept from importation by these very specific rates, and that is what the specific tariff is adopted for by protectionists. It is to keep goods from coming in in order that the American manufacturer may have the market at his own price. That is the very object of it, and the figures given by the Senator from Arkansas are correct.

Mr. President, if there are goods in China that are taxed 700 per cent and prohibited from coming here, cheap silk goods that could come and be exchanged for cotton goods, so that our people who are working in the cotton fields and making not $200 a year might be able to wear those goods, why should Congress exercise the legislative power to prohibit our people from buying and wearing those goods and compel them to buy goods and pay even 80 or 90 per cent on them?

Mr. WHITE. Mr. President, I have here a statement prepared by one of the leading experts of the country, which I will read:

The specific rate—

He says—

provided in this paragraph, in a very large proportion of goods imported into the United States, would be covered by the proviso of the bill that they should not pay less than 50 per cent ad valorem. Goods of very light texture, however, such as chiffon imported from France and which is used in the manufacture of bows or ties and ornaments, and also the lighter silks from China and Japan—

I wish to direct the attention of the Senator from Colorado to this subject—

and also the lighter silks from China and Japan, known as habutai, surah, and kaikais, will have imposed thereon in many cases a duty in excess of 100 per cent, whereas articles made from these silks in this country would be protected with not more than 60 per cent—a discrimination that is not only unfair, but will disturb seriously the industries in a good many States in this country. I would much prefer seeing a duty on silks weighing less than 1½ ounces, and on manufactures thereof, at 75 per cent ad valorem than the mixed duties provided in this bill.

I wish to say to the Senator from Connecticut that I intend offering an amendment that in no case shall any of the foregoing fabrics in this paragraph pay a less duty than 50 per cent ad valorem or a greater duty than 60 per cent. If that is voted down, I shall propose another amendment fixing the maximum at 75 per cent, and I will then, I think, test his faith in his own calculation at a maximum rate of 75 per cent.

I call attention to the condition of the McKinley Act in this regard. There is no such provision contained in that act. The complications of paragraph 384, the mystifications of that paragraph, are wholly unknown in the original McKinley Act. The rate prescribed in the McKinley Act was less than the rate prescribed here. As I have stated already, if the calculations upon which we have relied are inaccurate and the rate is as low as the Senator from Connecticut contends, we will test his faith by a vote upon it.

The VICE-PRESIDENT. The Secretary will call the roll on agreeing to the amendment of the Senator from Arkansas [Mr. JONES] to the amendment of the committee.

The Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Ohio [Mr. HANNA], and vote "nay."

Mr. MITCHELL (when his name was called). I will announce for the day my pair with the Senator from New Jersey [Mr. SEWELL].

Mr. MORRILL (when his name was called). I am paired with the Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. MURPHY (when his name was called). I am paired with my colleague [Mr. PLATT of New York].

Mr. PETTUS (when his name was called). I am paired with the Senator from Massachusetts [Mr. HOAR].

Mr. RAWLINS (when his name was called). I transfer my pair with the junior Senator from Ohio [Mr. HANNA] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

Mr. WALTHALL (when his name was called). I transfer my pair with the Senator from Wisconsin [Mr. SPOONER] to the Senator from Tennessee [Mr. BATE], and vote "yea."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER]. He is not in the Chamber, and I therefore withhold my vote.

The roll call was concluded.

Mr. BUTLER (after having voted in the affirmative). The junior Senator from Maryland [Mr. WELLINGTON] has not voted. I am paired with that Senator, and therefore withdraw my vote.

Mr. WALTHALL. The Senator from Delaware [Mr. GRAY] is paired with the Senator from Illinois [Mr. CULLOM]. The Senator from Arkansas [Mr. JONES] is paired with the Senator from Maine [Mr. HALE].

The result was announced—yeas 23, nays 26; as follows:

YEAS—23.

Bacon,	Harris, Kans.	Mills,	Teller,
Caffery,	Kenney,	Morgan,	Turpie,
Clay,	McLaurin,	Pasco,	Vest,
Cockrell,	Mallory,	Pettigrew,	Walthall,
Faulkner,	Mantle,	Rawlins,	White.
Gorman,	Martin,	Roach,	

NAYS—26.

Allison,	Elkins,	Lodge,	Quay,
Baker,	Fairbanks,	McBride,	Shoup,
Burrows,	Foraker,	Nelson,	Stewart,
Carter,	Frye,	Penrose,	Wetmore,
Chandler,	Gear,	Perkins,	Wilson.
Clark,	Hawley,	Platt, Conn.	
Davis,	Jones, Nev.	Proctor,	

NOT VOTING—40.

Aldrich,	Gallinger,	Kyle,	Pritchard,
Allen,	George,	Lindsay,	Sewell,
Bate,	Gray,	McEnery,	Smith,
Berry,	Hale,	McMillan,	Spooner,
Butler,	Hanna,	Mason,	Thurston,
Cannon,	Hansbrough,	Mitchell,	Tillman,
Chilton,	Harris, Tenn.	Morrill,	Turner,
Cullom,	Heitfeld,	Murphy,	Warren,
Daniel,	Hoar,	Pettus,	Wellington,
Deboe,	Jones, Ark.	Platt, N. Y.	Wolcott.

So the amendment to the amendment was rejected.

Mr. WHITE. I move to amend the committee amendment on page 133, line 2, by inserting after the word "fifty" the words "or a greater rate of duty than sixty;" so as to make the paragraph read:

But in no case shall any of the foregoing fabrics in this paragraph pay a less rate of duty than 50 or a greater rate of duty than 60 per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from California to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. WHITE. I move to amend by substituting, in the same place, page 133, in line 2, "or a greater rate of duty than 75 per cent;" so that it will read:

But in no case shall any of the foregoing fabrics in this paragraph pay a less rate of duty than 50 or a greater rate of duty than 75 per cent.

Surely the committee will not object to this amendment, since, according to the statement of the committee, this is practically the maximum duty fixed in the bill. Upon my amendment to the amendment I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH], but by arrangement with the Senator from Utah [Mr. RAWLINS], who is paired with the Senator from Ohio [Mr. HANNA], we have arranged to transfer our pairs, so that the Senator from Ohio will stand paired with the Senator from New Jersey, and the Senator from Utah and myself are at liberty to vote. I vote "nay."

Mr. MORRILL (when his name was called). I announce for the day that I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. PETTUS (when his name was called). I am paired with the Senator from Massachusetts [Mr. HOAR], and therefore withhold my vote.

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

The roll call was concluded.

Mr. JONES of Arkansas. I am paired with the Senator from Maine [Mr. HALE]. If he were present, I should vote "yea."

Mr. WALTHALL. I desire to announce that the Senator from Delaware [Mr. GRAY] is paired with the Senator from Illinois [Mr. CULLOM], and that the Senator from Wisconsin [Mr. SPOONER] is paired with the Senator from Tennessee [Mr. BATE].

Mr. KENNEY (after having voted in the affirmative). I am advised that the junior Senator from Pennsylvania [Mr. PENROSE] has not voted. Being paired with that Senator, I withdraw my vote.

Mr. BURROWS. I am paired with the Senator from Louisiana [Mr. CAFFERY], and therefore withhold my vote.

Mr. PASCO. I wish to announce that on this vote the Senator from Oregon [Mr. MCBRIDE] is paired with the Senator from Idaho [Mr. HEITFELD]. The Senator from Oregon, if present, would vote "nay."

Mr. MALLORY (after having voted in the affirmative). I am paired with the Senator from Vermont [Mr. PROCTOR], whom I do not see in the Chamber, and therefore I withdraw my vote.

Mr. WARREN. By arrangement with the Senator from Alabama [Mr. PETTUS], we have agreed to transfer our pairs, so that the Senator from Massachusetts [Mr. HOAR] will stand paired with the Senator from Washington [Mr. TURNER], thus relieving the Senator from Alabama and myself. I vote "nay."

Mr. PETTUS. Under that arrangement I am at liberty to vote, and I vote "yea."

The result was announced—yeas 22, nays 24; as follows:

YEAS—22.

Bacon,	Harris, Kans.	Pasco,	Turpie,
Butler,	McLaurin,	Pettigrew,	Vest,
Clay,	Mantle,	Pettus,	Walthall,
Cockrell,	Martin,	Rawlins,	White.
Faulkner,	Mills,	Roach,	
Gorman,	Morgan,	Teller,	

NAYS—24.

Allison,	Elkins,	Jones, Nev.	Shoup,
Baker,	Fairbanks,	Lodge,	Stewart,
Carter,	Foraker,	Perkins,	Warren,
Chandler,	Frye,	Platt, Conn.	Wellington,
Clark,	Gear,	Pritchard,	Wetmore,
Davis,	Hawley,	Quay,	Wilson.

NOT VOTING—43.

Aldrich,	Gallinger,	Kyle,	Penrose,
Allen,	George,	Lindsay,	Platt, N. Y.
Bate,	Gray,	McBride,	Proctor,
Berry,	Hale,	McEnery,	Sewell,
Burrows,	Hanna,	McMillan,	Smith,
Caffery,	Hansbrough,	Mallory,	Spooner,
Cannon,	Harris, Tenn.	Mason,	Thurston,
Chilton,	Heitfeld,	Mitchell,	Tillman,
Cullom,	Hoar,	Morrill,	Turner,
Daniel,	Jones, Ark.	Murphy,	Wolcott.
Deboe,	Kenney,	Nelson,	

So the amendment of Mr. WHITE to the amendment of the Committee on Finance was rejected.

Mr. WHITE. I now move, in the new paragraph 384, reported by the committee, in line 2 on page 133, after the word "fifty," to insert "or a greater rate or duty than 100 per cent ad valorem."

In this connection, Mr. President, I desire to insert in the RECORD—I shall not detain the Senate by reading it—a comparative statement of the value of exports of the United States to Japan in the fiscal years 1893 and 1896. In this period, when the majority of the Senate are striving with such earnestness to bring about trade reciprocity with the world, the figures which I have asked to insert in the RECORD will be significant, taken in connection with the tariff proposed upon this article.

The VICE-PRESIDENT. The statement referred to by the Senator from California will be inserted in the RECORD, in the absence of objection.

The statement referred to is as follows:

Value of the exports of the United States to Japan, fiscal years 1893 and 1896.

Article.	1893.	1896.
Wheat, flour, etc	$393,000	$298,000
Chemicals, etc	19,990	28,000
Clocks, watches, and parts	115,295	99,000
Copper manufactures	2,368	10,676
Cotton	68,423	1,481,000
Cotton manufactures	52,501	105,000
Cycles		27,000
Cordage and flax manufactures	3,185	4,670
Cartridges	3,272	7,500
India-rubber goods	27,984	28,000
Iron and steel manufactures	225,855	908,398
Lamps	3,065	3,596
Manufactures of lead	636	1,035
Leather	149,096	404,092
Leather manufactures	4,475	9,000
Naval stores	5,800	8,000
Turpentine		4,400
Mineral oil	1,710,480	3,000,000
Lubricating oil		88,700
Paint	1,731	4,033
Paper	4,755	10,016
Plated ware	538	2,383
Meat products	46,427	55,000

Value of the exports of the United States to Japan, etc.—Continued.

Article.	1893.	1896.
Butter	$11,402	$18,000
Cheese	3,955	3,600
Milk	8,666	45,395
Soap	2,615	5,900
Stationery	14,174	17,760
Refined sugar	7,173	2,044
Tobacco and manufactures	232,662	273,000
Varnish	4,477	6,108
Wine	15,478	20,000
Timber		3,000
Lumber	4,560	29,386
Manufactures of wood	21,048	25,000
Total	2,974,811	7,202,692

The exports for the nine months ending March, 1897, can only be known from the Monthly Summaries, where they are not given separately for Japan, but are included in "Other Asia and Oceanica." The chief items of export mentioned for Japan for the year 1896 have grown considerably in proportion in these months.

The excess of exports over the exports for the same period of 1896 may be taken with safety to have gone almost in its entirety to Japan, as in the Summaries the chief other Asiatic countries, China and British East India, are separately mentioned.

I give below the exports contained in "Other Asia and Oceanica" for the nine months ending March, 1896 and 1897, in parallel columns, from which the continuous growth of exports of the United States to Japan can be estimated:

Article.	Nine months ending—	
	March, 1896.	March, 1897.
Agricultural implements	$12,283	$24,483
Bread stuffs	2,278,489	4,352,424
Carriages	33,300	36,801
Cotton	1,246,429	2,022,842
Cotton manufactures	408,171	1,421,813
Cycles	30,780	66,185
Fruits and nuts	80,786	87,904
Iron and manufactures	701,829	1,910,993
Leather and manufactures	387,982	169,578
Naval stores	57,617	84,958
Mineral oils	3,986,626	5,778,198
Meat products	218,887	218,552
Tobacco, and manufactures of	342,011	492,738
Lumber and manufactures of wood	347,124	477,577
Total	10,121,205	17,145,046

These exports are composed in a very large proportion of manufactured goods. This rapidly growing trade is being jeopardized by the excessive duties proposed on a few million dollars' worth of Japanese silks, necessarily the product of hand looms on account of the flimsy character of the silks used in their production.

Steel rails are not separately given, as the points of destination are not specified. The exports for 1896 were 130,682 and for 1897 1,859,081 to all countries, and a large proportion of these may be taken as having gone to Japan.

Mr. MANTLE. Mr. President, if the amendment of the Senator from California just proposed be adopted, the bill will then stand that in no case shall the duty upon these materials be less than 50 per cent ad valorem nor greater than 100 per cent ad valorem.

Mr. WHITE. That is correct; that is the exact matter.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from California [Mr. WHITE].

Mr. WHITE. Upon that proposition I call for the yeas and nays. In view of the statement made by the committee, I think it is my duty to put them upon the record.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). By arrangement with the Senator from Utah [Mr. RAWLINS] we have arranged for a transfer of pairs, so that the Senator from New Jersey [Mr. SMITH], with whom I am paired, will stand paired with the Senator from Ohio [Mr. HANNA], with whom the Senator from Utah is paired. I vote "nay."

Mr. HANSBROUGH (when his name was called). I am paired with the senior Senator from Virginia [Mr. DANIEL].

Mr. JONES of Arkansas (when his name was called). I am paired with the Senator from Maine [Mr. HALE].

Mr. MALLORY (when his name was called). I am paired with the Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. MURPHY (when his name was called). I announce for the day that I am paired with my colleague [Mr. PLATT of New York].

Mr. PETTUS (when his name was called). Under the arrangement announced on the last vote by the Senator from Wyoming [Mr. WARREN], I am at liberty to vote, and I vote "yea."

Mr. RAWLINS (when his name was called). I transfer my pair with the Senator from Ohio [Mr. HANNA] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

Mr. WALTHALL (when his name was called). I transfer my pair with the junior Senator from Wisconsin [Mr. SPOONER] to the junior Senator from Tennessee [Mr. BATE], and vote "yea."

Mr. WARREN (when his name was called). Under an arrangement with the Senator from Alabama [Mr. PETTUS], our pairs have been transferred, so that the Senator from Massachusetts [Mr. HOAR], who is paired with the Senator from Alabama, will stand paired with the Senator from Washington [Mr. TURNER], thus relieving the Senator from Alabama and myself. I vote "nay."

The roll call was concluded.

Mr. GRAY. I announce my pair with the Senator from Illinois [Mr. CULLOM]. If he were present, I should vote "yea."

The result was announced—yeas 25, nays 28; as follows:

YEAS—25.

Bacon,	Gorman,	Morgan,	Turpie,
Butler,	Harris, Kans.	Pasco,	Vest,
Caffery,	Heitfeld,	Pettigrew,	Walthall,
Chilton,	Kenney,	Pettus,	White.
Clay,	McLaurin,	Rawlins,	
Cockrell,	Mantle,	Roach,	
Faulkner,	Martin,	Teller,	

NAYS—28.

Allison,	Elkins,	Lodge,	Quay,
Baker,	Fairbanks,	McBride,	Shoup,
Burrows,	Foraker,	Nelson,	Stewart,
Carter,	Frye,	Penrose,	Warren,
Chandler,	Gear,	Perkins,	Wellington,
Clark,	Hawley,	Platt, Conn.	Wetmore,
Davis,	Jones, Nev.	Pritchard,	Wilson.

NOT VOTING—36.

Aldrich,	George,	Lindsay,	Platt, N. Y.
Allen,	Gray,	McEnery,	Proctor,
Bate,	Hale,	McMillan,	Sewell,
Berry,	Hanna,	Mallory,	Smith,
Cannon,	Hansbrough,	Mason,	Spooner,
Cullom,	Harris, Tenn.	Mills,	Thurston,
Daniel,	Hoar,	Mitchell,	Tillman,
Deboe,	Jones, Ark.	Morrill,	Turner,
Gallinger,	Kyle,	Murphy,	Wolcott.

So the amendment of Mr. WHITE to the amendment of the Committee on Finance was rejected.

Mr. WHITE. The Senate has just voted down an amendment fixing the maximum tariff upon this particular paragraph at 100 per cent. I will now offer one more amendment. I move, in paragraph 384, as reported by the committee, on page 133, line 2, after the word "fifty," to insert "or a greater rate of duty than 200 per cent."

Mr. MILLS. Let us have the yeas and nays on that.

Mr. MANTLE. Mr. President, I have already stated that I am in favor of adequate protection for this industry. So much has been said here with reference to what the ad valorem rate under the provision reported by the committee will be, and so much difference of opinion exists, that there must be a doubt in the minds of most of the Senators here as to what this specific duty will really amount to reduced to an ad valorem basis.

It has been asserted, and not successfully contradicted, that some of these duties will run from 200 to as high as 700 per cent; and I for one am not willing to vote for any such rate of duty as that, or anything approximating it. It does seem to me, in the light of the indefiniteness which surrounds this schedule, that my protectionist friends themselves ought certainly to be willing to accept the proposition now offered, definitely fixing the point which this duty shall not exceed at 200 per cent ad valorem.

Mr. President, there can be no interest in this schedule but what ought to be satisfied with a protective rate amounting to 200 per cent ad valorem. I wish the chairman of the committee would accept that amendment, so that we might put an end to the mystery which surrounds this paragraph, and at least know, those of us who desire to be satisfied upon this point, that there is no possibility of this duty exceeding 200 per cent ad valorem.

Mr. PLATT of Connecticut. I did not suppose that the mover of this amendment moved it in any other sense than for the purpose of embarrassing the entire bill. If a provision of this kind were a satisfactory and proper and usual provision to incorporate in a tariff bill, namely, that the specific rates should not be less than a certain ad valorem nor higher than a certain ad valorem, I should have been willing to have accepted the first amendment and certainly the second amendment offered by the Senator from California.

Nobody supposes that any rate upon any goods imported under this paragraph is going to be 200 per cent or 150 per cent or 100 per cent; but the difficulty about it is that this is introducing language and a feature which have never been introduced in a tariff bill since the beginning of our legislation on the subject of the tariff, so far as I know; and the moment it is introduced with regard to this clause it will be proposed by amendment with reference to every other clause in this bill where it is said that a specific rate of duty shall not be less than a certain ad valorem, and then the effort will be made to narrow the limits within which the specific duty shall work.

When the principle has once been admitted, it is as easy to move that the rate shall not be less than 50 nor more than 55 per cent as to move that it shall not be less than 50 nor more than 200 per cent.

The only reason why I object to this amendment is because I do not think it is a proper way of proceeding in a tariff bill.

Mr. MANTLE. May I ask the Senator a question there?

Mr. PLATT of Connecticut. Certainly.

Mr. MANTLE. Has not this element of limitation, so far as the minimum rates to be levied are concerned, already been placed in the bill originally, or at least by the committee?

Mr. PLATT of Connecticut. It has been in every tariff bill where there have been specific duties that the specific duties contained in the paragraphs should not be less than a certain percentage ad valorem, but never has there been a clause introduced, so far as I know, that they shall not be less than a certain per cent ad valorem nor more than a certain per cent ad valorem.

Mr. GRAY. If less, why not more?

Mr. MANTLE. That is the question I was about to ask. It seems to me the principle has already been recognized in the bill, in the interest of the industry protected, that the duty shall not be less than a given amount, and it would seem, in all fairness, and in view of the fact that there seems to be some vagueness connected with this particular schedule, to be proper—although I admit that it has not been the practice, and perhaps it would not be wise generally to put in this limitation—but because of the fact that there is a doubt here, an honest doubt, as to what these duties will amount to in ad valorem terms, it would seem to be proper, in this particular connection, to put a limitation, so that those of us who are anxious to vote for a protective duty, but do not want to vote for an outrageous duty, may be satisfied upon that point.

Mr. ALLISON. Just one word, Mr. President. If I believed that this duty was 200 per cent or anything approaching it, I would have some sympathy with these suggestions; but there is no reason why this limitation should be applied to silk any more than to any other article in this bill, or to any other schedule in this bill. We have heard here in these debates over and over again the statement that the duties upon wool are 90 per cent; that the duties upon woolen goods are 150 per cent and 175 per cent; whereas those who have advocated this bill and who have examined it do not believe there are any such duties in the bill or in the wool and woolen schedule; and yet if we apply this principle to one schedule, we must apply it to all; and we shall be told that the duty on wool and woolens shall not be less than 40 per cent nor more than 100 per cent, nor more than 75 per cent, nor more than 50 or 60 per cent.

Mr. MORGAN. Nor more than a thousand per cent.

Mr. ALLISON. So, if we introduce this new principle into this entire bill, which has never been in any bill before——

Mr. GRAY. May I ask the Senator from Iowa why there is inserted in the bill a minimum ad valorem, that no duty shall be less than a certain ad valorem?

Mr. ALLISON. There is a very good reason for that in the minds of those who frame these bills, and that is, that a certain per cent of ad valorem is necessary for the protection of these industries. Therefore that element has been drawn into them, though I think that of itself is a vicious element.

Mr. JONES of Arkansas. Would it not be equally meritorious to have a maximum put in for the protection of the people?

Mr. ALLISON. Perhaps it would. If we adopt that principle, let us adopt it as to all the schedules.

Mr. JONES of Arkansas. We shall be delighted to do so.

Mr. ALLISON. If that is to be an element, we might just as well provide in one schedule that the duty on wool shall not be less than 50 per cent nor more than 75.

Mr. JONES of Arkansas. Why not?

Mr. ALLISON. Certainly; I ask why not? If the principle be adopted that the duty on woolen goods shall not be less than 60 per cent nor more than 100 per cent, and so on, running through all the schedules of this bill, it will be unnecessary to have specific duties at all.

Mr. MANTLE. So far as wool is concerned, I should be very glad indeed if there could be a minimum ad valorem rate fixed, so that the woolgrowers might at least know that they were getting a certain amount of protection. That has not been put into the wool schedule, I apprehend.

Mr. ALLISON. It has never been put into any schedule of any tariff bill ever made.

Mr. MANTLE. Because it was not necessary. I presume it was not understood to be necessary in connection with wool, because the wool business is pretty well understood and its values are much better known. But here is a schedule wherein it seems there is not a thorough understanding as to what the value of the article is. Hence, in order to cover any doubts, in order "to make

assurance double sure," if I may use the term, a minimum rate is fixed, so that the persons interested are sure to have a protective benefit of 50 per cent.

It does seem to me, in carrying out that idea and recognizing the fact that this element of doubt exists, and must have existed in the minds of the framers of this bill, otherwise the clause would not have been framed, in order to make these limitations just all around, that, so far as this schedule is concerned, there ought to be a limitation fixed as the amount of protection which these industries shall receive. I admit that it is not necessary in many industries; it is not necessary, I think, in the wool industry.

Mr. GRAY. May I ask the Senator from Montana what is the limitation proposed in the amendment, the upward limit, the maximum limit?

Mr. WHITE. Two hundred per cent.

Mr. MANTLE. The bill makes the minimum 50 per cent ad valorem.

Mr. GRAY. The amendment proposed by the Senator from California is that it shall not be more than 200 per cent?

Mr. WHITE. Perhaps the Senator from Delaware was not in the Chamber at the time these amendments were offered. I will state that the first amendment offered proposed to fix the maximum of 75 per cent, it being the opinion of the Senator from Connecticut [Mr. PLATT] that that was substantially the maximum provided by these peculiar specific rates. That, of course, it is needless to say, was voted down. Then I offered another amendment making the rate 100 per cent, and that shared the same fate. Now I have proposed another amendment fixing the maximum at 200 per cent. That is objected to on the ground that it is unusual.

Mr. President, the proposition laid down by the Senator from Montana [Mr. MANTLE] admits of no answer, that if we can put into this bill a minimum rate, we must upon the same principle be prepared and can with equal propriety interpose a maximum rate, and there is a particular reason why it should be done in this case. Here is a paragraph formed upon entirely new lines, in utter disregard not only of the Wilson law, which perhaps might be disregarded, as it was enacted through the agency of another political organization, but in absolute disregard of the provisions of the act of 1890, and framed upon lines of most peculiar technicality. We have had amendments put in this section to-day by the Committee on Finance increasing the rates, and there is no one in this Chamber who has given to the Senate anything like a semilucid statement of the new rates provided for in this bill since it was amended by the committee.

If there is any faith upon the other side in the proposition that the maximum tariff proposed does not exceed 100 per cent, why this fear of the proposition of an amendment limiting it to 200 per cent, unless it be that the statement made by the Senator from Arkansas is true, and that there are in this bill provisions which will impose duties of 230, 240, 260, and even in one paragraph of 700 per cent?

But it is useless to proceed. We might as well have a vote; and I call for the yeas and nays upon the proposition.

The yeas and nays were ordered.

Mr. MORGAN. Mr. President——

The Secretary proceeded to call the roll, and Mr. ALLISON responded to his name.

Mr. MORGAN. Mr. President, this is a very peculiar presentation of the doctrine of protection.

Mr. CHANDLER. I hope the Senator will not go on. He can speak on a new motion just as well. I dislike to have the rule of the Senate violated.

Mr. MORGAN. What is the rule?

Mr. CHANDLER. That after the roll call has commenced debate is not in order.

Mr. MORGAN. I had addressed the Chair two or three times before the Senator from Iowa responded to his name.

Mr. CHANDLER. The roll call had begun and there had been a response. I should be glad to have the Senator speak, but the rule is imperative.

Mr. MORGAN. I am in order. The Chair knows—at least if the Chair does not know, I know—that I addressed the Chair two or three times distinctly before the name of the Senator from Iowa was called.

The PRESIDING OFFICER. The Chair did not hear the Senator.

Mr. MORGAN. I know that, but I am still on the floor and not violating any rule of the Senate.

The PRESIDING OFFICER. The Chair recognizes the Senator.

Mr. MORGAN. Mr. President, I think it is unfortunate that this peculiar debate and this peculiar exposition of the doctrines which pervade this bill should have occurred upon a question which concerns the Empire of Japan, and upon productions of that new and industrious nation, so far as its entering into commerce is concerned. Here, now, it is proposed to put a duty upon goods that come principally, if not entirely, from Japan, and that duty is attempted by the Senate to be confined, first, to 75 and then to 100 per cent, and now to 200 per cent ad valorem, and the Senators in charge of this bill refuse to signify by their votes, or refuse to allow us to signify, because we are in the minority, our unwillingness to tax these Japanese productions exceeding 100 per cent and now exceeding 200 per cent ad valorem.

The history of Japan in regard to tariff taxation is one that has appealed to our sympathy and to our sense of justice, and we have now a treaty with Japan, which goes into effect in 1900, that takes off a prohibition imposed upon her by the United States, in conjunction with all European powers, against her right to levy duties upon imports into that country exceeding, I think, 5 per cent. Japan has been trammeled now by that treaty, which was forced upon her really at the point of a bayonet, for a number of years—nearly thirty years—and she has always complained of it, and justly complained of it. Russia started out with the relaxation of the treaty, and the United States followed, and Japan is now making efforts with the Netherlands and with France and Great Britain to have that restriction taken off which was imposed upon her at the close of our civil war. Japan has looked to the United States as her foster mother in this line of liberty and sovereignty against the treaty arrangement of which she has complained, and justly, as I have observed, and which we have consented to let loose.

Now, it comes to pass when we have other possible troubles with Japan, and when her jealousy is excited against us about matters where I confess she has no possible ground of complaint, we are engaged in imposing duties upon one of her chief products, which the Senate of the United States refuses to say shall not exceed 200 per cent ad valorem. I think we ought to have a care that we will not outrage the feelings of that nation; for, after all, her trade with us is a matter of very great importance. She is willing to accommodate herself so as to give American merchants and manufacturers real advantages over those of any other part of the world.

Japan is now having a great war ship built in the harbor of San Francisco, to cost, I think, nearly $5,000,000. The contracts are all completed, the keel is being laid now, and the work is going on. She gave another ship to Great Britain, which is being constructed there, dividing her patronage between the United States and Great Britain. In every way that country has manifested toward us a very earnest desire to have fair commerce; but what are we doing in this bill, what are we doing in this particular item of the bill? We are making war upon the commerce of the world for the purpose of dividing out amongst politicians and political retinues in the United States those benefits which come from political action in a recent Presidential election. We are fastening down upon the commerce of the world burdens which it can not stand, which will necessarily cripple our commercial relations with foreign nations, and there is not a nation in the world to-day, from Mexico to Turkey, which does not understand that the tariff bill which we are now enacting is a war upon the commerce of the world.

I am expecting, perhaps, that the committee may devise some relief upon that old plan of Mr. Blaine's, of reciprocity, which means free trade in disguise, provided the other countries that are concerned with us will pay for it. That is all it means, and I hope some such relief as that may after a while be incorporated into the bill. But the attitude of the Senate of the United States and the House of Representatives and the administration of the Government to-day is one of clear, unrelenting, bitter war upon the commerce of the world. We may be able to stand it for a while here. We are a very powerful, a very energetic people. We grow rapidly. We develop resources that nobody anticipates, and we scarcely have ever yet met any difficulty, in fact we have not met any difficulty in our history, which the natural growth, increase of power, and production in this country have not been able to outlive and survive.

But, Mr. President, there is an end to that. There is also an end to the friendship of nations, upon which commercial intercourse must necessarily be predicated. We can not have unlimited commerce or valuable commerce with the nations of this world when our action is a mere declaration of war against commerce and against their interests. They will retaliate upon us. Japan has it in her power to retaliate upon us, and doubtless she will do so. We have taught her the lesson that she is not bound to wear the trammels of treaty obligations forever, such as we imposed upon her at the close of our civil war, when we had a war with her, or virtually a war.

When we put that restriction upon her, we lamented it, deplored it, and have done all we could from that time to this to relieve her from it, but unfortunately we made a joint agreement with four European powers, which none of us can get rid of without the consent of the five powers concerned, that we would restrain Japan in her power of taxation upon imports down to a point where it has been impossible for her to collect from import duties anything like enough to sustain the Government. She has been

compelled to resort to enormous internal taxes in order to maintain her Government.

Having taught her this example, having taught her the injustice of making this kind of war upon commerce, having invited her to make her exchange of commerce with us, now we come to an article here which she manufactures, and which, it seems, she alone can manufacture with success, which she can put in our markets at very low prices, and we prohibit her by a duty that we are unwilling to restrict even to 200 per cent. I think we have been very unfortunate to select this particular article, manufactured by this particular nation, and at this particular time, to illustrate the ferocity of the tariff bill. It will not be very long until the people of the United States, interpreting this bill by schedules like the one we are now passing upon, and items like that in relation to what is called wild silk, will condemn it out and out.

I have to abide my time along with my colleagues on this side of the Chamber until the day of relief shall come. I remember that there is no resurrection until after death. So far as I am concerned, looking forward to the time when the people of the United States will again be restored to their resurrectionary powers, to something like a reasonable interpretation of the Constitution, I stand here ready to invite the death. Let it come; but when we are destroying our own people and their happiness and prosperity by the exaggeration and outrages of the tariff, do not let us aim our shafts at a country like Japan, which has done so much to try to assist in her civilization and her rise and progress amongst the nations of the earth.

Mr. ALLISON. One word. The Japanese silks come in under the provision beginning in line 23, "if weighing not more than one-third of an ounce per square yard." There the bill, as it came to us from the House, read "$5 per pound." By an amendment offered by me this morning it was reduced to $4.50. I do not believe the duty on the Japanese silks under the bill will amount to 75 per cent ad valorem. I would just as lief vote for 100 per cent as 200 per cent. That is the only question about this matter.

Mr. WHITE. That is not much of a question, in view of the fact that the Senator from Iowa declined to vote for 100 per cent.

Mr. ALLISON. Certainly.

Mr. WHITE. I wish to call the attention of the Senate to paragraph 250 of the Wilson Act, the present law, where there is this proviso:

Provided, however, That in no case shall the duty levied exceed 8 cents per pound on yarns, etc.

That shows it is not unknown to the law for a maximum to be prescribed.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from California to the committee amendment, on which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH]. I transfer my pair to the Senator from Ohio [Mr. HANNA], and will vote. I vote "nay."

Mr. GRAY (when his name was called). I am paired with the senior Senator from Illinois [Mr. CULLOM]. If he were present, I should vote "yea."

Mr. MALLORY (when his name was called). I am paired with the junior Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON]. If he were present, I should vote "yea."

Mr. WALTHALL (when his name was called). I transfer my pair with the junior Senator from Wisconsin [Mr. SPOONER] to the junior Senator from Tennessee [Mr. BATE], and will vote. I vote "yea."

The roll call was concluded.

Mr. RAWLINS. My pair with the Senator from Ohio [Mr. HANNA] has been transferred to the Senator from New Jersey [Mr. SMITH]. I will therefore vote. I vote "yea."

The result was announced—yeas 23, nays 28; as follows:

YEAS—23.

Bacon,	Gorman,	Mills,	Teller,
Butler,	Harris, Kans.	Morgan,	Turpie,
Caffery,	Kenney,	Pasco,	Vest,
Chilton,	McLaurin,	Pettigrew,	Walthall,
Clay,	Mantle,	Pettus,	White.
Cockrell,	Martin,	Rawlins,	

NAYS—28.

Allison,	Elkins,	Jones, Nev.	Pritchard,
Burrows,	Fairbanks,	Lodge,	Quay,
Carter,	Foraker,	McBride,	Shoup,
Chandler,	Frye,	Nelson,	Stewart,
Clark,	Gear,	Penrose,	Wellington,
Davis,	Hawley,	Perkins,	Wetmore,
Deboe,	Hoar,	Platt, Conn.	Wilson.

NOT VOTING—38.

Aldrich,	George,	McEnery,	Sewell,
Allen,	Gray,	McMillan,	Smith,
Baker,	Hale,	Mallory,	Spooner,
Bate,	Hanna,	Mason,	Thurston,
Berry,	Hansbrough,	Mitchell,	Tillman,
Cannon,	Harris, Tenn.	Morrill,	Turner,
Cullom,	Heitfeld,	Murphy,	Warren,
Daniel,	Jones, Ark.	Platt, N. Y.	Wolcott.
Faulkner,	Kyle,	Proctor,	
Gallinger,	Lindsay,	Roach,	

So Mr. WHITE's amendment to the amendment of the committee was rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 386, page 133, line 21, before the word "cords," to strike out the word "braids;" in the same line, after the word "tassels," to strike out "fringes;" in line 23, before the word "whether," to insert "and;" and in line 24, after the word "embroidered," to insert "in any manner;" so as to make the paragraph read:

386. Bandings, beltings, bindings, bone casings, braces, cords, cords and tassels, garters, gorings, suspenders, tubings, and webs and webbings, composed wholly or in part of silk, and whether composed in part of india-rubber or otherwise, if not embroidered in any manner by hand or machinery, 50 per cent ad valorem.

Mr. ALLISON. I move to amend the committee amendment by inserting, after the word "Bandings," in line 20, the words "including hat bands;" after the word "bindings," in the same line, by inserting the word "beltings," instead of where it now appears, before the word "bindings;" and in line 21, by restoring the word "braids."

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. In line 20, after the word "Bandings," it is proposed to insert the words "including hat bands;" in the same line, before the word "bindings," to strike out "beltings," and after the word "bindings" to insert "beltings;" and in line 21, to restore the word "braids;" so as to read:

Bandings, including hat bands, bindings, beltings, bone casings, braces, braids, cords, cords and tassels, garters, gorings, suspenders, tubings, and webs and webbings, composed wholly or in part of silk.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. VEST. In line 25, I move to strike out "fifty" and insert "forty-five," the ad valorem duty under the existing law.

Mr. PLATT of Connecticut. Before the question is put upon the amendment of the Senator from Missouri, I wish to have the paragraph read as it stands.

The Secretary read as follows:

386. Bandings, including hat bands, bindings, beltings, bone casings, braces, braids, cords, cords and tassels, garters, gorings, suspenders, tubings, and webs and webbings, composed wholly or in part of silk, and whether composed in part of india rubber or otherwise, if not embroidered in any manner by hand or machinery, 50 per cent ad valorem.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri, to strike out "fifty" and insert "forty-five."

The amendment was rejected.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 387, page 134, line 3, after the word "ruchings," to insert "braids, fringes, ribbons;" in line 4, after the word "embroideries," to strike out the comma and the word "and," and after the word "articles," in the same line, to insert "and fabrics;" in line 5, after the word "machinery," to insert "or;" in line 6, after the word "appliqued," to strike out "articles," and in line 17, after the word "of," to strike out "3 cents per ounce, and in addition thereto;" so as to make the paragraph read:

387. Laces, and articles made wholly or in part of lace, edgings, insertings, galloons, chiffon, or other flouncings, nets or nettings and veilings, neck rufflings, ruchings, braids, fringes, ribbons, trimmings, embroideries, and articles and fabrics, embroidered by hand or machinery, or tamboured or appliqued, clothing ready made, and articles of wearing apparel of every description, including knit goods, made up or manufactured in whole or in part by the tailor, seamstress, or manufacturer; all of the above-named articles made of silk, or of which silk is the component material of chief value, not specially provided for in this act, and silk goods ornamented with beads or spangles, of whatever material composed, 60 per cent ad valorem: *Provided*, That any wearing apparel or other articles provided for in this paragraph (except gloves) when composed in part of india rubber, shall be subject to a duty of 60 per cent ad valorem.

Mr. ALLISON. I wish to modify the amendment by striking out the word "braids," in line 3, and the word "ribbons," in line 4; in the same line 4, by restoring the comma and the word "and;" and by striking out the words "and fabrics," after the word "articles," in that line 4. I think an article is a fabric. There is no need of those words.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to amend the amendment of the committee by striking out, in line 3, the word "braids" and in line 4 the word "ribbons;" in the same line, after the word "embroideries," by restoring the comma and the word "and;" and in the same line, after the word "articles," by striking out the words "and fabrics;" so as to read:

Laces, and articles made wholly or in part of lace, edgings, insertings, galloons, chiffon, or other flouncings, nets or nettings and veilings, neck ruffings, ruchings, fringes, ribbons, trimmings, embroideries, and articles, etc.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 388, line 22, page 134, after the word "act," to insert "and all Jacquard figured goods of which silk is the component material of chief value;" in line 24, before the word "manufactures," to strike out "such;" and in the same line, after the word "manufactures," to insert "or fabrics;" so as to make the paragraph read:

388. All manufactures of silk, or of which silk is the component material of chief value, including such as have india-rubber as a component material, not specially provided for in this act, and all Jacquard figured goods of which silk is the component material of chief value, 50 per cent ad valorem: *Provided*, That all manufactures or fabrics, of which wool is a component material, shall be classified and assessed for duty as manufactures of wool.

Mr. ALLISON. After the word "goods," in line 22, I move to amend the committee amendment by inserting "in the piece," and by striking out the words "or fabrics," after the word "manufactures," in line 24.

The SECRETARY. It is proposed to amend the committee amendment by inserting in line 22, after the word "goods," the words "in the piece;" and in line 24, after the word "manufactures," by striking out "or fabrics;" so as to make the paragraph read:

388. All manufactures of silk, or of which silk is the component material of chief value, including such as have india-rubber as a component material, not specially provided for in this act, and all Jacquard figured goods in the piece of which silk is the component material of chief value, 50 per cent ad valorem: *Provided*, That all manufactures of which wool is a component material shall be classified and assessed for duty as manufactures of wool.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. VEST. In line 1, page 135, I move to insert after the word "material" the words "of chief value."

The SECRETARY. After the word "material," in line 1, page 135, it is proposed to insert the words "of chief value;" so as to read "of which wool is a component material of chief value."

Mr. VEST. I call attention to the fact that in three places upon the preceding page, 134, the committee deliberately inserted the words "the component material of chief value," but when they come to an article in which wool is found, they strike out "of chief value," and the amendment will therefore amount to this, that if there is one single thread of wool in any article, then the wool duties are imposed upon it. Why this distinction? It is a very significant one.

When we talk about silk, look at line 11, page 134, and we find the provision that as to all articles "of which silk is the component material of chief value;" and again in line 20 all articles "of which silk is the component material of chief value;" and in line 23 we have the same provision, "figured goods in which silk is the component material of chief value." Yet upon the beginning of the next page it reads any manufactures "of which wool is a component material," etc. If there is one single thread or shred of wool, then the wool duties immediately attach. I move the amendment I have offered in order to equalize this paragraph and to make it just and right. There is no reason why this discrimination should be made.

Mr. HOAR. Will the Senator from Missouri allow the proviso to be read as it now stands before his amendment is acted upon?

Mr. VEST. Certainly.

The Secretary read as follows:

Provided, That all manufactures of which wool is a component material shall be classified and assessed for duty as manufactures of wool.

Mr. HOAR. I should like to have the Senator's amendment read from the desk.

The SECRETARY. It is proposed, after the word "material," in line 1, page 135, to insert the words "of chief value;" so as to read:

Provided, That all manufactures of which wool is a component material of chief value shall be classified and assessed for duty as manufactures of wool.

Mr. HOAR. I should like to ask the Senator from Iowa whether, as the language of the proviso now reads, there are not manufactures, various ornamental or other special manufactures, that have a larger duty than is placed on manufactures of wool, which would be reduced in value by weaving a very little of wool into them? Are there no such cases?

Mr. ALLISON. I do not think there are. If there are, of course it would reduce the duty. The wool duties are higher than the silk duties.

Mr. HOAR. Yes; higher than the silk duties.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri.

Mr. VEST and Mr. MILLS called for the yeas and nays; and they were ordered.

The Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I will transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Ohio [Mr. HANNA], and vote "nay."

Mr. GRAY (when his name was called). I have a general pair with the senior Senator from Illinois [Mr. CULLOM]. I will transfer that pair to the Senator from Missouri [Mr. COCKRELL] who is paired with the Senator from Iowa [Mr. ALLISON], and the Senator from Iowa and I will vote. I vote "yea."

Mr. MALLORY (when his name was called). I am paired with the junior Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. RAWLINS (when his name was called). I transfer my pair with the Senator from Ohio [Mr. HANNA] to the Senator from New Jersey [Mr. SMITH], and vote "yea."

Mr. TILLMAN (when his name was called). I again announce my pair with the Senator from Nebraska [Mr. THURSTON].

Mr. WALTHALL (when his name was called). I again transfer my pair as on the last roll call, and vote "yea."

The roll call was concluded.

Mr. JONES of Arkansas (after having voted in the affirmative). I am paired with the Senator from Maine [Mr. HALE], and withdraw my vote.

Mr. ALLISON (after having voted in the negative). I should state that I have a pair with the Senator from Missouri [Mr. COCKRELL], but I have transferred it to the Senator from Illinois [Mr. CULLOM], as already stated by the Senator from Delaware [Mr. GRAY].

The result was announced—yeas 21, nays 29; as follows:

YEAS—21.

Bacon,	Harris, Kans.	Pasco,	Vest,
Caffery,	Kenney,	Pettigrew,	Walthall,
Chilton,	McLaurin,	Pettus,	White.
Clay,	Martin,	Rawlins,

So Mr. VEST's amendment was rejected.

The reading of Schedule N was concluded.

Mr. ALLISON. Before passing from this schedule, I omitted to call attention to line 2, page 134, where there is a comma after "chiffon." I desire that comma to be stricken out, so as to read "chiffon or other flouncings," etc.

The amendment was agreed to.

The PRESIDING OFFICER. The Chair would call the attention of the Senator from Iowa to page 132, at the end of line 15. Should not the comma after "boiled" be stricken out? It reads, "if boiled, off or dyed in the piece."

Mr. ALLISON. It should be out. The comma should come in on line 16, after "off," so as to read, "if boiled off," etc.

The PRESIDING OFFICER. That amendment will be agreed to.

Mr. ALLISON. I ask that the Senate return to Schedule F, on page 66.

The next amendment of the Committee on Finance was, in Schedule F, "Tobacco, and manufactures of," paragraph 210, page 66, after line 16, to strike out the following paragraph:

210. Leaf tobacco suitable for cigar wrappers, if not stemmed, $2 per pound; if stemmed, $2.75 per pound: *Provided*, That if any tobacco imported in any bale, box, or package, or in bulk, shall be the growth of different countries or shall contain exceeding 15 per cent thereof of leaves suitable for cigar wrappers, the entire quantity of tobacco contained in such bale, box, or package, or in bulk, shall be dutiable, if not stemmed, at $2 per pound; if stemmed, at $2.75 per pound.

And to insert in lieu thereof:

210. Wrapper tobacco, and filler tobacco when mixed or packed with more than 5 per cent (in weight) of wrapper tobacco, and all leaf tobacco the product of two or more countries or dependencies when mixed or packed together, if unstemmed, $1.50 per pound; if stemmed, $2.25 per pound; filler tobacco not specially provided for in this act, if unstemmed, 35 cents per pound; if stemmed, 50 cents per pound.

Mr. ALLISON. I move to modify the committee amendment first in line 4, by striking out "five" and inserting "fifteen," and also by striking out the words in parentheses "(in weight)." I will state the whole modification. Also in line 7 I move to insert "seventy-five" instead of "fifty," and in line 8 "fifty" instead of "twenty-five." I propose all those as a single modification of the amendment.

The SECRETARY. It is proposed to amend the paragraph so as to read:

210. Wrapper tobacco, and filler tobacco when mixed or packed with more than 15 per cent of wrapper tobacco, and all leaf tobacco the product of two or more countries or dependencies when mixed or packed together, if unstemmed, $1.75 per pound; if stemmed, $2.50 per pound; filler tobacco not specially provided for in this act, if unstemmed, 75 cents per pounds; if stemmed, 50 cents per pound.

Mr. PASCO. I ask the Senator from Iowa if that does not restore the provision of the Wilson bill as to weight?

Mr. ALLISON. As to weight.

Mr. PASCO. That is satisfactory.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee as modified.

Mr. VEST. Mr. President, I was very much in hopes that our friends upon the other side would allow these rates to remain as they were reported from the committee. They were, both as to wrapper tobacco and as to filler tobacco, identical in fact with the rates imposed in the existing law. Now there is an increase of 25 cents upon both these classes of tobacco.

Mr. HAWLEY. I can not hear the Senator.

Mr. VEST. I say there is an increase of 25 cents upon each of these classifications. I simply want to call the attention of the Senate to the condition of the tobacco business commercially, as shown by the comparative statement. We exported in 1896 of leaf tobacco $24,405,245 worth. We imported during the same year of wrapper unstemmed tobacco $5,057,833 worth, and of stemmed leaf tobacco $5,934,938 worth, and of stemmed smoking tobacco $497,314 worth. So it will be seen that the balance of trade, as it is generally termed, in regard to tobacco is enormously in favor of the United States against the world.

We have here in this bill, as we have always had, the same old controversy between the wrapper tobacco of Connecticut and the Sumatra tobacco, and the same thing is attempted here as in all conflicts between domestic and foreign interests wherever they are found in tariff legislation. It is proposed by this increase upon wrapper tobacco to shut out, if possible, or handicap by a larger tax, the Sumatra tobacco, so as to compel the tobacco manufacturers of the United States to use larger quantities of the American wrapper tobacco.

If Senators feel any interest in this matter, I ask them to turn to the testimony taken by the Committee on Ways and Means. I have not the slightest interest locally, because in my State no wrapper tobacco of any consequence is produced. All the tobaccos from Missouri are the heavy bottom tobaccos used for chewing and for the inferior grades of smoking tobacco. But those Senators who feel any interest in the matter and who have large tobacco manufactories in their States will find an interesting discussion of this question in the testimony before the Ways and Means Committee.

The sum and substance of that testimony I will state as succinctly as possible. I will not say the unanimous opinion, but the general consensus of opinion, according to the testimony of the people who gave their evidence before the Ways and Means Committee, is that for some reason the Sumatra wrapper is preferred by manufacturers and smokers. One gentleman, Mr. Van Duzer, who is very much opposed to the Sumatra tobacco, accounts for this state of things both in Europe and the United States by saying that it is a fad; that it is because of the foolishness of the American people in thinking that a thing because it is imported is necessarily better. But Mr. Van Duzer himself said upon cross-examination that this Sumatra tobacco is of a brighter color and smoother, and that it gives an attractive appearance to the cigar, which causes the smokers to prefer the Sumatra wrapper to any other.

Mr. Van Duzer was asked what duty he thought ought to be imposed in order to exclude Sumatra tobacco from this country, and he stated it very frankly; and I am glad to find one protectionist who is not at all terrified by the result of his principles.

You want it—

Said General WHEELER—

300 per cent above the McKinley rate?

Referring to Sumatra tobacco. His answer was:

I do not care what per cent you have. If we are going to have protection—if it takes 300, or 400, or 500, or 1,000 per cent, it is all right, for there is that much difference between our labor and Chinese labor.

There is a gentleman whose courage I admire. He is willing to follow out to the legitimate result the principles that he professes. He is not frightened at a thousand per cent. I commend his testimony to my friend from Iowa, who did not want the limit of 100 per cent, nor 200 per cent, but clung to the minimum per cent in the legislation that he reported from the committee. But here is a gentleman who brutally says—no, I will not use that word, for I respect him—who says frankly and boldly, "If it takes 1,000 per cent, I am for it, to shut out the Sumatra tobacco." And that is the whole of this controversy.

As a matter of course, the raisers of tobacco in Connecticut want the market themselves. I believe possibly there is some of this wrapper tobacco produced in Florida, but I do not know to what extent it has influenced the political convictions of the Florida people. I hope they still adhere to their old doctrine, as I have no doubt the Senators from Florida do. But the controversy is absolutely between the Connecticut wrapper tobacco and the Sumatra tobacco, and because a large number of the people of this country are foolish enough to want the Sumatra tobacco, Congress is asked to intervene by large taxation and change their taste and reform their wicked proclivities toward a foreign article, and they must be made indirectly to use the cigars that are wrapped in the Connecticut tobacco and eschew, or, rather, not use, those that are wrapped in the Sumatra tobacco.

There is only a raise here of 25 cents, and a test vote upon the amendment of the committee will settle the conclusion of the Senate. For one I shall vote against the amendment increasing these duties 25 cents.

Mr. HAWLEY. Mr. President, the Senator from Missouri is usually accurate, but he is mistaken in some things to-day. In the first place, nobody dreams of excluding Sumatra entirely. I doubt if a five-dollar duty would do it.

In the next place, incidentally, he uses the term "Connecticut tobacco," as if the article were confined to one State. There are ten States that raise wrappers. There is some in the lower part, I think, of New Hampshire, in a limited region; some in Massachusetts, and some fine fields of it in Connecticut, where it is a very large and important crop. In New York, in Pennsylvania, in Ohio, I believe, certainly in Wisconsin, it is quite a large product.

Sumatra tobacco is not understood, or is understood by a few. If a cigar were made entirely of Sumatra tobacco, the smoker would probably be ill. It is not fit for any use but wrappers. It is exceedingly thin, quite smooth, and gives the cigar a pleasing appearance. By reason of its thinness and the small quantity of it on the cigar, the smoker does not get much of the bitterness and venom that are in that tobacco naturally. So it will always sell for wrappers.

The Connecticut wrapper, that portion selected for wrapper tobacco, is of a very much better quality. A passable cigar made entirely of it can be manufactured. It is very smooth, and makes a handsome cigar, as everybody can easily ascertain, and it brings spare cash to some counties in our State. Perhaps we feel quite as much interested as any other State. We have more than most in proportion to our area. The proceeds of the tobacco crop sometimes go into the millions in Connecticut.

The Sumatra tobacco is raised in the Dutch Possessions, where they pay about 10 cents a day for labor. I do not know, but I make a good guess when I say that the tobacco does not stand the Dutchman more than 15 cents a pound, and he sells it over here at from 80 cents to $1.20.

I have already alluded to the exceeding thinness of its leaf. It is a fact that 1 pound of it will wrap as much as 3 or 4 pounds of the comparatively thin Connecticut wrapper. So, you see, it is a very great competitor. Our people do not expect to keep it out, but they think that, having found a profitable crop in their own very superior tobacco, they might have a reasonable degree of protection. Two dollars a pound duty sounds large, but it does not begin to compensate for the difference due to lightness and thinness. We do not think it unreasonable to appeal, without demagogism, to the desire to give the farmer something of protection.

My people at home were very much determined, very anxious to secure a duty of $2 a pound. They know perfectly well that the tobacco will come in at $3 or $4, but if you put the rate high—suppose we put it at $2, as was done by the McKinley Act—the result is that the Dutchman, having an abundant supply cheaply produced, immediately drops his price to 80 cents or so. He would like to get $1.20, but he can make money at 50 cents. If you reduce the duty he ranges his prices between 84 cents and $1.20. Exactly that was done under the McKinley and Wilson acts. You can not escape it. He will put his tobacco down and it will come in under any duty. There is no doubt about that.

As science and the ingenuity of the country have progressed, and as great fertile lands have come into the possession of the people of the West for a nominal price and in immense areas for nothing, under the homestead act, the agriculture of the East has been very sorely afflicted. Those whom I know best and love best in this country depend upon the soil for their living. I used to see in my boyhood in Connecticut quite a number of cattle upon every farm of any considerable size. I do not see them now. I used to

see upon my grandfather's farm always a flock of sheep. They disappeared many years ago.

We compete with none of the products of that description. We could raise a very fair crop of wheat per acre, 30 bushels, perhaps. Nobody tries to raise wheat against the enormous prairies of the West, with those monstrous gang plows and the great machines that go cutting and binding, and I believe thrashing also, moving like batteries in echelon through square miles of fields. We can not compete with them in raising wheat. We raise oats enough for our own horses and some rye and occasionally some buckwheat for home consumption.

Mr. GRAY. No fertilizers are required on those Western fields.

Mr. HAWLEY. No fertilizers; you can find a slimy black soil 6 or 8 feet deep of eternal richness. And transportation has descended from 3 or 4 cents per ton per mile to 5 or 4 or 3 mills per mile. Competition is hopeless. So we fall back upon the dairies, and send good milk, good butter, and eggs, and what is commonly called garden truck to the towns and cities. And we raise some tobacco with which we try to make a little money. Some of our people raise large quantities of garden seeds, but we encounter the competition of dirty and adulterated stuff from Europe against which the Senate committee offers us no fair protection.

The short of it is, that agriculture is very greatly limited among us. There is only one single product that is really one of comparative profit. In 1892 Connecticut, Massachusetts, Vermont, and New Hampshire raised 65,748 cases of tobacco, of 350 pounds to the case, against 53,962 in 1895, a reduction of nearly 12,000. In 1892 New York raised 43,381 cases of tobacco, against 20,764 in 1895; Pennsylvania, in 1892, raised 85,714 cases, against 55,528 in 1895, a reduction of over 30,000 pounds; Wisconsin, in 1892, raised 51,428 cases, which was reduced to 22,762 in 1895; Ohio, in 1892, raised 58,600 cases under the McKinley law, and it went down to 38,751 under the Wilson law. The prices were more remarkable.

The average price of the New England crop in 1892 was a fraction over 25 cents a pound; in 1895 it went down to 9 cents per pound. It might have been an unfavorable season, but the reduction was greatly owing to legislation. The average in the other States named was 11¼ cents as against 5¼ cents, and this in the face of the fact that the manufacture of cigars is increasing at the rate of 75,000,000 per year.

Of the 4,200,000,000 cigars made in the United States last year, more than 2,000,000,000 were wrapped with Sumatra leaf, and will continue so to be under any ordinary duty.

I think—I appeal to my Republican friends particularly—that I am asking but a very modest and reasonable degree of protection for the highest form of all industries—that of agriculture—when I advocate $2 a pound duty on Sumatra, but vote for the $1.75, or all that is offered us.

Mr. PASCO. Mr. President, the amendment in which I feel the most interest is that proposed by the committee to the 5 per cent clause. Paragraph 210 reads as follows:

210. Wrapper tobacco, and filler tobacco when mixed or packed with more than 5 per cent (in weight) of wrapper tobacco, and all leaf tobacco the product of two or more countries or dependencies when mixed or packed together, if unstemmed, $1.50 per pound, etc.

I wish to give a brief history of this particular subject, so that the amendment may receive the consideration which its importance deserves.

When leaf tobacco was imported from Cuba into the State which I have the honor in part to represent, under the terms of the McKinley law an entire bale was subject to wrapper rates if a single leaf in the bale was suitable for wrapper purposes. This was the clause in the McKinley law:

242. Leaf tobacco suitable for cigar wrappers, if not stemmed, $2 per pound; if stemmed, $2.75 per pound: *Provided*, That if any portion of any tobacco imported in any bale, box, or package, or in bulk, shall be suitable for cigar wrappers, the entire quantity of tobacco contained in such bale, box, or package or bulk shall be dutiable; if not stemmed, at $2 per pound; if stemmed, at $2.75 per pound.

It was found that this worked a great hardship, to such an extent that if the law had been enforced in strict accordance with its apparent meaning it would have practically excluded the importation of wrapper tobacco from the Island of Cuba. The question was finally carried to the Board of Appraisers in New York as to how this clause should be interpreted, and they decided that only the class of leaf tobacco commercially known as wrapper should pay the higher rate of duty, and if less than 15 per cent of the tobacco in a bale was suitable for wrapper purposes, then that the entire bale might be admitted as filler tobacco. That was the decision of the appraisers, which modified the severity of the law, though it does not seem to have been in exact harmony with its language. The question was carefully considered when the Wilson bill was pending here, and this 15 per cent clause was regarded as wise and judicious, and it was incorporated as a part of the Wilson law. It reads as follows:

Provided further, That if any bale, box, package, or bulk of leaf tobacco of uniform quality contains exceeding 15 per cent thereof of leaves suitable in color, fineness of texture, and size for wrappers for cigars, then the entire contents of such bale, box, package, or bulk shall be subject to the same duty as wrapper tobacco.

This carried into the law practically the decision of the Board of Appraisers, and that has been the rule which has controlled the matter up to the present time. It was carried into the House bill as appears on page 66:

Provided, That if any tobacco imported in any bale, box, or package, or in bulk, shall be the growth of different countries or shall contain exceeding 15 per cent thereof of leaves suitable for cigar wrappers, the entire quantity of tobacco contained in such bale, box, or package, or in bulk, shall be dutiable, if not stemmed, at $2 per pound; if stemmed, at $2.75 per pound.

When the bill first came from the Senate committee, the 5 per cent clause was substituted for the 15 per cent clause, and the effect of the amendment now offered by the Senator from Iowa [Mr. ALLISON] who has charge of the bill will restore this item at the same rate that appears in the Wilson law, the same rate fixed by the decision of the Board of Appraisers, and it is a just and proper and fair amendment.

If the 5 per cent clause should be adopted as part of the law, and this amendment should fail, it would practically keep out of the country the Habana tobacco which has been heretofore imported, for the Cubans put up their tobacco there without separating the tobacco suitable for wrappers from the fillers, and it is impossible to determine the quality of an entire bale of tobacco without opening each bale and examining each leaf separately, which is not practicable. It is not imported in this way with the intention of defrauding the revenue of the Government, but that is the practice over in Cuba, and the people who use the tobacco in this country have no way of changing the Cuban mode of baling tobacco. So it is the proper and just thing to make this allowance, and to impose the wrapper duty only in case there should be more than 15 per cent of tobacco in the bale that can be used for that purpose.

We have presented this matter to the committee, and I am glad to say that they have accepted this modification of their amendment. They have restored the House features, and in this respect it is in harmony with the Wilson law.

So far as the rates of duty are concerned, the people in my State are interested not only as cigar manufacturers, but as tobacco raisers. A very fine quality of tobacco is raised in Florida, and the farmers and planters who raise tobacco believe that it can be used successfully instead of the Habana tobacco for a wrapper. This fine quality of tobacco is raised in several of the counties in my State, and in Polk County it is claimed that a grade of leaf is raised that can hardly be distinguished from the real Habana. This subject is of particular importance to our people, as many Cubans have come over to Florida and manufactories have been established at Tampa, Key West, and other places, and a most valuable manufacturing interest has been built up, which interest will be destroyed if this 5 per cent clause should be insisted upon.

The farmers and tobacco raisers of the State are specially interested in the rate of duty upon leaf tobacco, which, as I have already said, is grown in many of the counties. A number of communities are endeavoring to raise this tobacco. Both political parties have decided that tobacco is a proper subject for a high rate of duty. In the McKinley Act, as I have shown, the duty on wrapper tobacco was fixed at $2.75 a pound, in the Wilson law at $1.50 a pound, in the bill as it came from the House at $2 a pound, and in the bill as reported by the committee at $1.50 a pound. The proposition now offered with reference to the rate is a compromise between the House action and the original Senate committee action, and fixes the rate at $1.75 a pound, halfway between the two propositions.

Both political parties, as I have said, have recognized tobacco as a proper subject for a high rate of tariff duty; and the only question is between the rate of $2 a pound and $1.50 a pound. The committee, as I understand, after considering all the facts which have been presented to them, have reached this compromise rate of $1.75 a pound. I am disposed to stand by the action of the committee in that regard as well as in the other, believing that this is a proper subject for revenue, and believing as did those who framed the Wilson law and as did those who have framed this bill, that this is a proper subject from which a large revenue can properly be raised. For these reasons I shall vote for the amendments as offered by the Senator from Iowa to the amendment which originally came from the Senate Committee on Finance.

Mr. MILLS. Mr. President, the smoking of a good cigar by an ordinary Democrat in the United States is one of the lost arts [laughter], and it is the result of the taxation which has been placed upon tobacco and upon cigars. We have duties levied—we have had them all the time, and I do not expect that they will be changed by anything that I shall say—in the interest of tobacco growers that are enormous and unconscionable, and they can not be justified in any court of conscience or before any tribunal which recognizes the obligation of moral law.

I do not, Mr. President, recognize the right of Congress to pass

a law imposing high taxes upon anything except for the purpose of raising revenue for the support of the Government. It was an old doctrine of our fathers that luxuries should be taxed high and necessaries low, but they understood by luxuries the things wealthy people would buy, because they would then bear their proportional part of the taxes necessary to support the Government when their wealth was beyond the reach of direct taxation. But the idea of saying that a pipeful of tobacco is a luxury, or that a fairly good cigar is a luxury, that has got to be taxed to prohibition, and thus smite the lowliest, the humblest, and the poorest class of our population, is a perversion of that doctrine.

I have cast up some figures on this tobacco business, which show that the people of this country are completely in the hands of the manufacturers of cigars. Our Internal Revenue Commissioner reports to us that the annual make of cigars in this country is about four thousand millions. He gives us the number of pounds of tobacco used in the making of those four thousand million cigars, which shows that there are about 20 pounds of tobacco in a thousand cigars.

I have taken the export price of our American tobacco, and it is far beyond the reach of the home price of our ordinary tobacco. I have taken it at 12 cents a pound, where our good tobacco where I was raised in Kentucky, in one of the best tobacco districts in that State, is not now worth 5 cents a pound, and yet I have taken it at 12 cents. Twenty pounds of American tobacco at 12 cents a pound gives $2.40; labor, 82 cents, and the internal revenue on that tobacco $3 on a thousand cigars, which make them cost $6.22.

If the manufacturer imports 20 pounds of tobacco and makes a thousand cigars, his tobacco costs him 40 cents a pound, and that is $8; the labor cost is $2.76; the customs tax on that tobacco, at 35 cents a pound, is $7; and the internal-revenue tax on cigars is $3 a thousand, making the total cost $20.70 a thousand. A cigar dealer told me that the low-grade cigars, which cost six dollars and something on the thousand, are sold at from $25 to $35 a thousand by the wholesale dealer, by the manufacturer; that these cost, if made from imported tobacco, $20, and they are sold at from $40 to $50 a thousand. How is it possible for them to impose this high price upon the American people?

When you look at the cost of imported cigars you find the duty about 100 per cent. Twenty pounds of cigars cost $4.50 a pound, which makes $90; the specific tax is $4 a pound, which makes $80; the ad valorem tax is 25 per cent, which makes $22.50, and the internal-revenue tax is $3, making a thousand cigars of the best quality imported cost, laid down in the United States, $195.50.

The ordinary good tobacco is prohibited from coming by the high rates of duty, just as we saw a few moments ago that the ordinary silk goods are kept out by specific rates amounting to from 100 to 700 per cent. The result is that the exceedingly wealthy people can smoke cigars that cost by the thousand 20 cents apiece, but an ordinary Democrat can not smoke cigars at that price. What has he got to do? He can not have good tobacco; so he has to take cigars made out of what we called in Kentucky "lugs," the 5-cent cigars.

The tobacco manufacturers are protected from without by your tariff duties and protected against competition within by your internal-revenue system. A poor man can not make cigars and sell them; a man of small means can not engage in the business. It takes much capital. Hence, the cigar-making business of the United States is in the hands of a few monumental cigar dealers, millionaires; and if they are not millionaires when they go into the business, they soon get to be. Any man who has the profits which are given by this law to this business soon gets to be a millionaire and a multimillionaire.

I want the tobacco smokers, as well as the tobacco producers, as well as the tobacco importers, and as well as the tobacco manufacturers—I want the millions who smoke, and have a right to smoke, to smoke good cigars. It is a right that is in abeyance; it is a right that has been confiscated; but it is a right nevertheless; and in imposing taxes to raise revenue for the Government, we ought to regard the smoking of tobacco as one of the necessaries of life, and not a luxury, for we find it in every family all over our country, North, South, East, and West, in the lowliest cabin of the laborer; and we see the laborer on the highway with his pipe or cigar in his mouth. If nobody else moves to decrease the rate of duty in the pending tariff bill, I shall move to do it. I move, Mr. President, to strike out paragraph 210 and substitute in lieu of it:

Leaf tobacco of all kinds, 30 per cent ad valorem.

The PRESIDING OFFICER (Mr. BURROWS in the chair). The Senator from Texas proposes an amendment, which will be stated.

The SECRETARY. It is proposed to strike out paragraph 210 as amended and in lieu thereof to insert:

Leaf tobacco of all kinds, 30 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Texas [Mr. MILLS].

Mr. PASCO. I merely wish to add to what I have said before a statement as to the duties collected on importations of leaf tobacco of these different varieties under the Wilson law. Of leaf tobacco suitable for cigar wrappers, in 1896, at the rate of $1.50 a pound, the rate fixed by the Wilson law, the duties collected on importations were $6,286,523.09. The amount collected at the custom-houses upon leaf and other unmanufactured tobacco, not stemmed, was $5,555,548.93, in the same year, at the rate of 35 cents a pound; on stemmed tobacco, at the rate of 50 cents a pound, the amount collected was $522,881.23, making the total amount of revenue on leaf tobacco during the year 1896, under the operation of the Wilson law, $12,364,953.25.

Mr. BACON. There are two rates of duty specified in the pending paragraph, one for wrappers and the other for fillers, and in the case of stemmed and unstemmed there is a variation. I desire to ask the senior Senator from Florida [Mr. PASCO] if he can state approximately what is the ad valorem which these specific duties will give upon this kind of tobacco?

Mr. PASCO. The Senator from Texas [Mr. MILLS] has made a calculation upon that subject, and can probably answer the question of the Senator from Georgia better than I can.

Mr. BACON. Can not the Senator from Florida state what it is, approximately? He is doubtless familiar with the subject.

Mr. MILLS. I will state that it is somewhere from 124 to 129 per cent.

Mr. BACON. I understood the Senator from Florida to say that that duty is acceptable and desired by the people of Florida. Am I correct in that?

Mr. PASCO. I have stated, Mr. President, that it is simply a question of 25 cents between the rate fixed by the laws heretofore passed by the Congresses sitting in 1890 and 1894, representing the two great political parties, one known as the McKinley law and the other as the Wilson law. The rate offered by the amendment is a compromise between the two rates, meeting them halfway. The higher rates would be most acceptable to the tobacco raisers of Florida, but to the cigar manufacturers the lower rates would be acceptable. That is the way my people regard it.

Mr. BACON. I desire to know from the Senator from Florida why it is that the higher rate is desired by the people of Florida?

Mr. PASCO. The tobacco growers prefer the higher rates because they think they will get a larger price for the tobacco, and the cigar manufacturers prefer the lower rates because they think they will get the tobacco used in manufacturing cigars at a lower rate.

Mr. BACON. I understand the Senator to say that the tobacco growers desire a high rate because by reason of it the price of their product will be increased.

Mr. PASCO. That is their expectation.

Mr. MILLS. To satisfy my friend the Senator from Georgia [Mr. BACON], I will say that on leaf tobacco suitable for cigar wrappers the equivalent ad valorem is 124.29 per cent. On another class of leaf tobacco it is 93.60 per cent; on another class, 105.14 per cent; another, 222.22 per cent; another, 238.11 per cent; another, 110.80 per cent; another, 112.69 per cent; another, 133.62 per cent. If those duties were reduced there would be large importations, and we would get more revenue and better cigars.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Texas.

The amendment was rejected.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee as amended on the motion of the Senator from Iowa.

The amendment as amended was agreed to.

Mr. PETTIGREW. Mr. President, I like the House provision better than that of the Senate in regard to tobacco, for the reason that it places a higher duty upon fillers than the Senate committee have placed upon it. I do not know that the duty upon wrappers is any too high, but under the paragraph as it now stands we will receive no revenue whatever from tobacco that will come in from Cuba or Mexico as wrapper. It will all come in as filler and be used as wrapper, thus defrauding the Government out of a very large sum of money. It does not seem to me that that is just or fair or that it furnishes that measure of protection to the producers of wrapper in this country that ought to be afforded.

It is a fact that last year there was imported into this country but 28,000 pounds of Cuban wrappers, so called, which paid duty at $1.50, and yet there were made in this country 300,000,000 Cuban cigars, 160,000,000 of them being made in Florida. They were wrapped in Cuban tobacco—tobacco that came in as filler and paid 35 cents a pound.

The revenue collected was about thirty-eight or forty thousand dollars. The revenue which ought to have been collected is $2,250,000. I know it is useless to talk to the committee, for after the caucus meet and they agree, the most nefarious and infamous provision can be put through here without the squirming of anybody's conscience. While I know it is useless, I am going to put into the RECORD these facts in regard to the matter, in the hope

that they will have some influence on the conference. I ask the Secretary to read the statement which I present.

The Secretary read as follows:

There were imported into the United States during the fiscal year ended June 30, 1895, 25,688,261 pounds, of which 5,104,495 pounds were Sumatra and paid duty of $1.50 per pound.

	Pounds.
Cuba tobacco, which paid duty of $1.50 per pound	28,133
Imported into the port of Tampa	3,818
Imported into the port of Key West	2,683
	6,501
Leaves a balance of	21,632

coming under the head of Habana wrappers, constituting the entire importation of the United States, outside of Tampa and Key West. During the same year there were manufactured in the State of Florida 147,802,909 cigars. Probably 90 per cent belonged to Tampa and Key West, and were known as Habana-wrapped cigars.

There were imported into the United States tobacco for the fiscal year ended June 30, 1895, 32,924,966 pounds. Sumatra suitable for wrappers and paying duty of $1.50 per pound, 4,428,448 pounds.

	Pounds.
Imported from Cuba	22,406
Into Key West, Fla	3,881
Into Tampa, Fla	2,563
	5,844
Leaves a balance of	16,562

constituting the importation of wrappers at all other ports of the United States paying a duty of $1.50 per pound. In this year of 1895 there was manufactured in the State of Florida 161,084,191 cigars, and again I presume that 90 per cent were made at Tampa and Key West and constitute cigars wrapped with Habana tobacco. So taking the two years together (1895 and 1896) there were manufactured at Tampa and Key West about 250,000,000 cigars covered with Habana wrappers; and taking a fair estimate of 5 pounds to a thousand, it would seem in that case to require 1,250,000 pounds of wrappers to cover these particular cigars, and the duty that the Government has affixed ($1.50) would amount to $1,875,000.

The duty actually received for wrappers at Tampa and Key West for two years was $18,517.50, and deducting this from the amount that the Government should have received, the following is the result, a loss to the Government and a present to the manufacturers of Tampa and Key West of $1,856,482.50.

We go a little further and take the total quantity of tobacco other than Sumatra which has paid duty of $1.50, and which comes under the head of Cuba wrappers, for two years, and take the entire country including Tampa and Key West; there were imported as wrappers from Cuba, paying a duty of $1.50 in the year 1895, 28,133 pounds; in the year 1896, 22,406 pounds; making a total of 50,539 pounds; at $1.50 per pound would be $75,808.50.

It is generally believed that the production of Habana wrapped cigars is about 300,000,000 per annum throughout the United States, including Tampa and Key West. Now, taking this to be nearly correct, it would seem that 600,000,000 cigars had been made and covered with Habana wrappers during the years of 1895 and 1896, and if it requires 5 pounds of wrappers to cover a thousand cigars, the duty which the Government should have received would amount to	$4,500,000.00
The duty which the Government actually received on the importation of Habana wrappers amounted to	75,808.50
Loss to the Government and a present to the manufacturers in two years of	4,424,191.50
During the same period, 1895 and 1896, there was imported into the United States of Sumatra tobacco about 10,000,000 pounds, paying a duty to the Government of	15,000,000.00

Mark you, this is in two years, and these figures are here given simply as a key to show that during the two years referred to, the higher-priced cigars have paid a duty for their wrappers of $75,808.50, while the lower-priced cigars, and largely constituting the smoke of the masses, have paid a duty of $15,000,000 to the Government for their wrappers. It is unnecessary to make any further argument—figures will speak for themselves—except that I will show it to you in another way. If it takes about 2½ pounds of Sumatra wrapper to cover the outside of a thousand cigars, now then, whosoever smokes these cigars—and some of them are as cheap as $20 per thousand—pays the Government import duty on the wrapper of $3.75. If Habana manufacturers have virtually paid 35 cents duty on tobacco which they have used on the outside of their cigars, and presuming that instead of using 2½ pounds they use 5 pounds, thus you will see that the higher-priced cigars, running anywhere from $50 to $120 per thousand, pay a Government duty on the wrappers of $1.75 per thousand, whereas the cheaper article, as already stated, pays, by the working of the law, $3.75 per thousand.

Mr. PETTIGREW. It seems from this statement that wrappers for high-priced cigars come in as fillers. I have been informed that tobacco which was sent to the port of New York and rejected has gone to Florida and there has been admitted and used for this purpose. Therefore the cigars which the more wealthy people smoke pay a duty of $1.75 a thousand on the wrapper, while the cigars that the poor people smoke, covered with Sumatra wrapper, pay a duty of $7.50 a thousand on the wrapper. It seems to me it is unjust and unwise. I supposed the committee would look into the matter and correct the defect. There is no good reason why the Cuban wrapper should come in for nothing.

There is no good reason why it should not pay the duty required of other wrappers. Only 28,000 pounds of Cuban wrapper paid a duty of $1.50 last year, and yet we made 300,000,000 Cuban cigars. They ought to have paid a duty of $2,250,000. Therefore I think the House provision should prevail, and the duty on all fillers should be 65 cents, instead of 35 cents.

I wish also to have placed in the RECORD a statement by Mr. Storme, who is one of the largest cigar makers in this country, if not in the world.

The Secretary read as follows:

Let me say to you that there is no man on earth who can positively define what constitutes a wrapper in tobacco such as comes from Cuba or Mexico; and while the McKinley law was very explicit and stated that where any portion of a bale consisted of wrappers the whole was to pay the wrapper duty, yet in spite of this the Habana and Mexican tobacco continued to pour into the United States at 35 cents duty, whereas the duty on recognized wrappers, such as Sumatra, was $2 a pound; and this thing grew worse under the Wilson bill. In fact, there is no law for Tampa or Key West tobacco, which had been refused admittance in New York, had been shipped to Tampa and Key West, and there readily admitted. This is a ridiculous farce. Inasmuch as it seems utterly impossible to get a uniform duty, as pointed out in my argument, we must do the next best thing, and hence I advocated a duty of $3 on wrappers and $1 on fillers, and the following would have been the result: If manufacturers of cigars use 2½ pounds of Sumatra for wrappers, then the duty that these cigars paid the Government for their wrappers would be $7.50.

The Habana manufacturers claim that they use 5 pounds. Good; we admit that. If they paid $1 a pound, their duty for the wrappers would be $5 per thousand, but they would also pay more duty for the filling of the work than the people who use the Sumatra wrapper. To put it different: The Habana cigars consume about 20 pounds of tobacco to a thousand. If it is all Habana tobacco, and paid $1 per pound, the duty on that thousand cigars would be $20. That represents the better class of cigars and selling anywhere from $50 to $120 per thousand. The other cigars, on which Sumatra tobacco is used in connection with Habana, sell anywhere from $30 to $50 per thousand, and the duty they would pay would be about as follows: Twelve pounds of fillers at $1 per pound duty would be $12. Two and a half pounds of wrappers at $3 per pound duty would be $7.50, making a total of $19.50.

So you see I have this pretty carefully worked out. All other cigars in which there was no imported tobacco, either for wrappers or fillers, would pay no import duty at all to the Government, and these would constitute the smoke of the masses, and thus the broad principle would be carried out, that those who smoke the better class of cigars would pay the higher duty, and that is correct and as it should be.

Now, then, the Dingley schedule finally fixed the duty on wrappers at $2 per pound, and on fillers at 65 cents. If you take the same rule as above, then the following will be the result: Twelve pounds of fillers at 65 cents duty would be $7.80, and 2½ pounds of Sumatra wrappers at $2 per pound duty would be $5, making a total of $12.80. The Habana cigars consume about 20 pounds of tobacco to a thousand—if it is all Habana tobacco—and pay 65 cents per pound duty. Then the duty on that thousand cigars would be $13; and this Dingley bill under the circumstances is quite correct, excepting that the 15 per cent clause, which was crammed in by the Tampa people, should be stricken out and the language of the bill be precisely as it was under the McKinley Act.

Now, these people who have been making the clear Habana cigars have had such enormous advantages that they do not care what the duty is on wrappers as long as they would be permitted to continue their illicit practice, and this will be accomplished if the duty on fillers is allowed to remain at 35 cents; in fact, the duty on fillers should be $1. The principle is correct that whatever the duty on wrappers is, the duty on fillers should be one-half. As already stated, the Dingley law will answer, and I believe under it the American growers and manufacturers of tobacco would be benefited as never before, and the wrong which has crept into the operation of the previous law would be corrected, and what we consider the American manufacturer would not be driven out of business.

Again, why should the people of Connecticut and Massachusetts who produce the wrappers—why should these alone be considered, whereas the greater number of tobacco growers in New York, Pennsylvania, Ohio (who raise exclusively fillers), Wisconsin, Georgia, Florida, and even California to a small extent are all interested in fillers? And therefore I say, let us have the Dingley bill, pure and simple, with the 15 per cent clause stricken out, $2 on wrappers, and not less than 65 cents on fillers.

Mr. PETTIGREW. I move that the duty be increased so that it will read as follows:

Filler tobacco, not specially provided for in this act, if unstemmed, 65 cents per pound; if stemmed, 80 cents per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from South Dakota.

The amendment was rejected.

Mr. PETTIGREW. I thought I would call for the yeas and nays on the question of agreeing to the amendment, but concluded that I would not, because I knew it would be absolutely useless, and I did not care to take up the time of the Senate.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, on page 67, to strike out paragraph 211, as follows:

211. All other tobacco in leaf, unmanufactured and not stemmed, 65 cents per pound; if stemmed, 80 cents per pound.

And to insert in lieu thereof the following:

211. The term wrapper tobacco as used in this act means that quality of leaf tobacco which is suitable for cigar wrappers, and the term filler tobacco means all other leaf tobacco. Collectors of customs shall not permit entry to be made, except under regulations to be prescribed by the Secretary of the Treasury, of any leaf tobacco, unless the invoices of the same shall specify in detail the character of such tobacco, whether wrapper or filler, its origin and quality. In the examination for classification of any imported leaf tobacco, at least one bale, box, or package in every ten, and at least one in every invoice, shall be examined by the appraiser or person authorized by law to make such examination, and at least ten hands shall be examined in each examined bale, box, or package.

The amendment was agreed to.

The next amendment was, in paragraph 212, page 68, line 4, before the word "not," to strike out "Tobacco manufactured, of all descriptions," and insert "All other tobacco, manufactured or unmanufactured," and in line 5, before the word "cents," to strike out "sixty-five" and insert "forty;" so as to make the paragraph read:

212. All other tobacco, manufactured or unmanufactured, not specially provided for in this act, 40 cents per pound.

Mr. ALLISON. I wish to offer an amendment modifying the committee amendment by inserting "fifty-five" instead of "forty."

The SECRETARY. It is proposed to modify the amendment of the committee by striking out "forty" and inserting "fifty-five;" so as to read "55 cents per pound."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 213, page 68, line 8, before the word "cents," to strike out "sixty-five" and insert "forty;" so as to make the paragraph read:

213. Snuff and snuff flour, manufactured of tobacco, ground dry, or damp, and pickled, scented, or otherwise, of all descriptions, 40 cents per pound.

Mr. ALLISON. I move to amend the amendment of the committee by striking out "forty" and inserting "fifty-five."

The SECRETARY. It is proposed to amend the amendment of the committee by striking out "forty" and inserting "fifty-five;" so as to read "55 cents per pound."

Mr. WHITE. I call attention to the fact that the rate now proposed by the committee is higher than that in the McKinley Act; 5 cents, I believe.

Mr. ALLISON. In this it is 5 cents and in the former paragraph 15 cents.

I will say to the Senator that a lot of our Virginia friends and others in that neighborhood feel that there should be an additional duty provided for manufactured tobacco.

Mr. WHITE. I did not suppose the Senator was advised as to the desires of that part of the country. I notice that the Senators from that section of the country are absent. I presume they will reply hereafter to any statement made by the Senator from Iowa.

Mr. ALLISON. I assure the Senator from California that it is agreeable to our friends on both sides.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed. The next amendment of the Committee on Finance was, in paragraph 214, line 9, after the word "dollars," to strike out "and fifty cents;" so as to read:

Cigars, cigarettes, cheroots of all kinds, $4 per pound and 25 per cent ad valorem; and paper cigars and cigarettes, including wrappers, shall be subject to the same duties as are herein imposed upon cigars.

The amendment was agreed to.

The next amendment was, in paragraph 214, line 13, after the word "cigars," to insert the following proviso:

Provided, That cigarettes of all kinds weighing less than 4 pounds per thousand shall pay a duty of $3 per pound.

Mr. ALLISON. I ask that that amendment be disagreed to.

The amendment was rejected.

Mr. PETTIGREW. I believe this completes the tobacco schedule.

Mr. WHITE. If the Senator from South Dakota will allow me, I have a few letters here which I wish to put in the RECORD in connection with this schedule.

Mr. PETTIGREW. I wish to make a very brief statement in connection with the schedule, and then I will yield to the Senator from California.

I wish to call attention to the fact that the cigars which are smoked by the masses of the people of this country are those that are either wrapped by American tobacco or by Sumatra tobacco, and that the high-priced Cuban cigars that are smoked by the rich people of the country are wrapped in Cuban wrappers that come in with a duty imposed of 35 cents a pound, and come in as fillers. It is undisputed that they come in fraudulently, that they come in so as to defraud the revenue, and that they come in for the benefit and advantage of the people who smoke the high-priced cigars.

I placed in the RECORD a statement made in a speech at the Ocala convention, and also a statement of Mr. Storme, with regard to this matter. Mr. Storme is one of the largest manufacturers in this country. It is undisputed, it is unchallenged, and it shows conclusively that in the last two years the revenues were defrauded four and a half million dollars by admitting Mexican and Cuban wrappers as fillers. I simply want to call attention to that fact, and let it go before the country.

Mr. ALLISON. I wish also to say one word in respect to this subject. If that be true, it is the fault of the administration of the law. The law taxes Cuban wrappers the same as it taxes Sumatra wrappers; and if the people of Florida who make cigars are defrauding the revenue, it is the business of our Government to see that it is not defrauded. The remedy proposed by Mr. Storme is that we shall reduce all tobacco to 65 cents a pound.

Mr. PETTIGREW. Not at all; it is to increase the duty on filler tobacco to 65 cents and leave the wrapper as you have it. That is my amendment.

Mr. ALLISON. I did not speak of the Senator's amendment. I spoke of Mr. Storme's letter.

Mr. PETTIGREW. Mr. Storme's letter is in, and he also proposes to put the duty on wrappers at $2 and the duty on fillers at 65 cents.

Mr. MALLORY. In reference to the remarks of the Senator from South Dakota, I should like to inquire of him whether he will be able to correct the evil of which he is now complaining except simply to put a higher penalty upon certain individuals who are engaged in the cigar-making industry? That does not remove the difficulty which is presented to the attention of the Senate by the Senator's remarks, that difficulty arising out of the fact that you can not always tell what are suitable for wrappers and what are suitable for fillers.

It seems to me that the source of trouble in the Senator's mind arises from the inability of the inspectors to determine what tobacco is suitable for wrappers and what tobacco is not. Some tobacco may be used as wrapper tobacco, but it is not necessarily wrapper tobacco. I do not think it is any fraud on the Government if an inspector in one place decides that certain tobacco is suitable for wrappers when another inspector in another place holds that the same tobacco is not suitable for wrappers. That may have occurred, but it arises out of the fallibility of human judgment.

But the proposition which the Senator has made will not get rid of that difficulty. I should like to know how we can get around the objection he has urged here as to the letting in of tobacco as filler tobacco when in fact it is wrapper tobacco.

Mr. PETTIGREW. I take it for granted that it is impossible to enforce the law. It is admitted, then, on all sides that the law is avoided, that the Habana wrappers come in as fillers, and that we reap no revenue whatever from that source. That seems to be conceded. For some reason it is impossible to tell the difference between a Habana filler and a Habana wrapper, and therefore we can not enforce the law. And in the face of these admitted facts it is proposed to continue these provisions.

Now I will answer the Senator from Florida. If the duty is now 35 cents and the manufacturers of high-priced cigars do not pay their fair share of the burden, if you increase the duty to 65 cents a pound, they will be obliged to pay their fair share of the burden or else use American tobacco. If they avoid the law, so as to bring in as fillers wrappers upon which the duty is $2 a pound and pay only 65 cents a pound, then, if you can not distinguish between wrapper and filler, can you not remedy the evil by increasing the duty on the whole imports?

Mr. PLATT of Connecticut. Mr. President, this subject is a somewhat difficult one, but the remedy is not, I think, the remedy proposed by the Senator from South Dakota. There are about 4,000,000,000 cigars made in the United States. About half of that number, about 2,000,000,000, are made from domestic tobacco. There are imported about 4,000,000 cigars. Perhaps I am not correct as to the amount of cigars imported, but only about 1 per cent of the cigars consumed in the United States are imported.

So here are nearly 2,000,000,000 cigars that are made with more or less Habana filler in them and made in the United States. Now, to raise the filler from 35 to 65 cents a pound increases very largely the cost of the 2,000,000,000 cigars which are made in the United States, either wholly from Habana filler or Habana filler mixed with domestic tobacco; and those are cigars smoked by the common people just as much as the cigars which the Senator from South Dakota says are smoked by the common people. His remedy proposes to advance the cost of cigars which are smoked by at least half the people of the United States to punish the rich people, who smoke 1 per cent of the cigars which are consumed in the United States. That is the difficulty of the situation.

Mr. PETTUS. I move that the Senate proceed to the consideration of executive business.

Mr. WHITE. Will the Senator from Alabama withdraw the motion simply to permit me to have printed in the RECORD some communications?

Mr. PETTUS. Certainly.

Mr. WHITE. I have in my hand a number of letters referring to this matter. I ask that the first be printed in full, and as to the others that the names and addresses of the parties be inserted in the RECORD.

The VICE-PRESIDENT. There being no objection, that will be the order.

The matter referred to is as follows:

LOS ANGELES, CAL., *April 15, 1897.*

DEAR SIR: The council desires to call your attention to the cigar makers of this city and county, who are threatened with a disastrous future in their trade if the Dingley bill passes your honorable body. This business, which employs at present over 100,000 persons in the United States, would be thrown into involuntary strikes and their attendant miseries. We therefore petition you to oppose any increase of tariff on imported filler and wrappers, as mentioned on page 52 of the House bill, and to have the tariff remain as it is to-day, i. e., 30 cents dutyon imported filler and $1.50 on imported wrappers.

We find that the cigar manufacturers already pay a tax of about $12.50 on every 1,000 cigars made, and the proposed increase means an additional tax of $7 per 1,000, which is a direct tax on the people employed in this trade. These are the conditions now confronting the cigar makers in this country. We further request you to aid Messrs. Gompers and Tracy to secure a hearing before the Committee on Finance and present their grievance.

Hoping you will do all in your power to avert disastor from the cigar makers,

We remain, yours, respectfully,

L. A. COUNTY COUNCIL OF LABOR,
H. E. DEWEY, *President.*
A. VINETTE, *Secretary.*

Hon. STEPHEN M. WHITE,
United States Senator.

A letter from M. P. Kohlberg & Co., importers of and dealers in leaf tobacco and cigars, of San Francisco, Cal.;
A letter from William Rehker, secretary of the Cigar Makers' Local Union No. 248, of San Francisco, Cal.;
A telegram of The. Feeny, secretary, of Oakland, Cal.;
A letter of M. A. Roberts, secretary of the Alameda County Federation of Trades, of Oakland, Cal.;
A letter from G. W. Perkins, president of the Cigar Makers' International Union of America, of Chicago, Ill.;
A letter of Harry Marks, recording secretary of the Cigar Makers' Local Union No. 228, of San Francisco, Cal.;
A letter of H. E. Dewey, president, and A. Vinette, secretary of the Los Angeles County Council of Labor, of Los Angeles, Cal.;
A letter of F. J. Hepp, secretary of the Cigar Makers' Local Union No. 291, of San Jose, Cal.;
A letter of F. C. Ferris, secretary of the Cigar Makers' Local Union No. 332, of San Diego, Cal.;
Two letters of H. E. Martens, secretary of the Cigar Makers' Local Union No. 225, of Los Angeles, Cal.;
A letter of G. W. Perkins, international president of Cigar Makers' International Union of America, of Chicago, Ill.; and
A letter of G. S. Nicholas, of New York City.

Mr. CHILTON. I propose an amendment to the pending bill, and ask that it be printed.

The VICE-PRESIDENT. It will be so ordered.

Mr. PETTUS. I renew my motion that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After seventeen minutes spent in executive session the doors were reopened, and (at 5 o'clock and 20 minutes p. m.) the Senate adjourned until to-morrow, Saturday, June 26, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 25, 1897.

DEPUTY AUDITOR.

George W. Esterly, of Minnesota, to be deputy auditor for the State and other Departments, to succeed James J. Willie, removed.

COMMISSIONER OF IMMIGRATION.

George B. Billings, of Massachusetts, to be commissioner of immigration for the port of Boston, in the State of Massachusetts, to succeed Thomas F. Delhanty, resigned.

COMMISSIONERS TO EXAMINE AND CLASSIFY LANDS.

George A. Black, of Fairhaven, Wash., to be a commissioner to examine and classify lands within the land-grant and indemnity land-grant limits of the Northern Pacific Railroad Company in the Cœur d'Alene land district in Idaho, vice John E. McManus, removed.

Thomas A. Davis, of Malad, Idaho, to be a commissioner to examine and classify lands within the land-grant and indemnity land-grant limits of the Northern Pacific Railroad Company in the Cœur d'Alene land district in Idaho, vice Joseph T. Scott, removed.

William Ryan, of Rathdrum, Idaho, to be a commissioner to examine and classify lands within the land-grant and indemnity land-grant limits of the Northern Pacific Railroad Company in the Cœur d'Alene land district in Idaho, vice John B. Goode, removed.

PROMOTION IN THE MARINE CORPS.

Second Lieut. William N. McKelvy, United States Marine Corps, to be a first lieutentant in said corps from the 20th day of June, 1897 (subject to the examinations required by law), vice First Lieut. Thomas C. Prince, promoted.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Irving B. Dudley, of California, to be envoy extraordinary and minister plenipotentiary of the United States to Peru, vice James A. McKenzie, resigned.

CONSULS.

Frank C. Denison, of Vermont, to be consul of the United States at Woodstock, New Brunswick, vice Grenville James, resigned.

Frank Dillingham, of California, to be consul of the United States at Auckland, New Zealand, vice John Darcy Connolly, resigned.

PROMOTIONS IN THE NAVY.

Capt. George C. Remey, to be a commodore in the Navy, from the 19th day of June, 1897, vice Commodore Edmund O. Matthews, promoted.

Commander William H. Whiting, to be a captain in the Navy, from the 19th day of June, 1897, vice Capt. George C. Remey, promoted.

Lieut. Commander Frederick M. Symonds, to be a commander in the Navy, from the 19th day of June, 1897 (subject to the examinations required by law), vice Commander William H. Whiting, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 25, 1897.

CONSULS.

Edward H. Thompson, of Massachusetts, to be consul of the United States at Progreso, Mexico.

Horace W. Metcalf, of Maine, to be consul of the United States at Newcastle-on-Tyne, England.

William Jarvis, of New Hampshire, to be consul of the United States at Milan, Italy.

UNITED STATES DISTRICT ATTORNEY.

J. Otis Humphrey, of Illinois, to be attorney of the United States for the southern district of Illinois.

MARSHALS.

Addison Davis James, of Kentucky, to be marshal of the United States for the district of Kentucky.

Charles P. Hitch, of Illinois, to be marshal of the United States for the southern district of Illinois.

Walter H. Johnson, of Georgia, to be marshal of the United States for the northern district of Georgia.

COMMISSIONERS.

Albert C. Thompson, of Ohio; Alexander C. Botkin, of Montana, and David B. Culberson, of Texas, to be the commissioners to revise and codify the criminal and penal laws of the United States.

REGISTER OF THE LAND OFFICE.

Charles Kingston, of Grover, Wyo., to be register of the land office at Evanston, Wyo.

RECEIVER OF PUBLIC MONEYS.

Frank M. Foote, of Evanston, Wyo., to be receiver of public moneys at Evanston, Wyo.

COLLECTOR OF INTERNAL REVENUE.

Richard Yates, of Illinois, to be collector of internal revenue for the eighth district of Illinois.

POSTMASTER.

George E. Smith, to be postmaster at Laurel, in the county of Sussex and State of Delaware.

SENATE.

SATURDAY, *June 26, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. TELLER, and by unanimous consent, the further reading was dispensed with.

DRAWBACK ALLOWANCES.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 17th instant, copies of the evidence or statements on which the drawback allowances contained in Circular No. 102, of June 25, 1896, division of customs, were based; which was read.

Mr. VEST. Mr. President, I suggest the absence of a quorum.

The VICE-PRESIDENT. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Allen,	Hawley,	Morrill,	Teller,
Allison,	Heitfeld,	Pasco,	Turner,
Berry,	Hoar,	Pettigrew,	Turpie,
Burrows,	Jones, Ark.	Pettus,	Vest,
Carter,	Lodge,	Platt, Conn.	Walthall,
Chandler,	McLaurin,	Platt, N. Y.	Wetmore,
Clay,	Mallory,	Proctor,	White.
Fairbanks,	Mills,	Rawlins,	
Frye,	Mitchell,	Sewell,	
Harris, Kans.	Morgan,	Stewart.	

The VICE-PRESIDENT. Thirty-seven Senators have answered to their names. There is not a quorum present.

Mr. VEST. I move that the Sergeant-at-Arms be directed to request the attendance of absent Senators.

The motion was agreed to.

The VICE-PRESIDENT. The Sergeant-at-Arms will execute the order of the Senate.

After some little delay, Mr. DEBOE, Mr. PRITCHARD, Mr. ELKINS, Mr. KENNEY, Mr. PERKINS, Mr. GRAY, Mr. WELLINGTON, and Mr. MURPHY entered the Chamber and answered to their names.

The VICE-PRESIDENT (at 11 o'clock and 20 minutes a. m.). Forty-five Senators have answered to their names. A quorum is present.

Mr. ELKINS. I move that further proceedings under the call be suspended.

The motion was agreed to.

The VICE-PRESIDENT. The communication from the Secretary of the Treasury which was laid before the Senate will be printed, with the accompanying papers, and referred to the Committee on Finance.

CHINESE EXCLUSION.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 17th ultimo, certain reports, etc., relating to the alleged illegal entry into the United States of Chinese persons; which was read.

Mr. PROCTOR. I move that the report and accompanying documents be referred, without printing, to the Committee on Printing. This course is taken by an arrangement with the Senator from West Virginia [Mr. ELKINS] who introduced the resolution.

The motion was agreed to.

PETITIONS AND MEMORIALS.

Mr. HOAR presented a petition of sundry citizens of Somerville, Mass., praying for the enactment of legislation prohibiting the transmission by mail or interstate commerce of pictures and descriptions of prize fights; which was ordered to lie on the table.

Mr. TELLER presented sundry memorials of citizens of Colorado, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. CLAY presented sundry memorials of citizens of Georgia, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. HARRIS of Kansas presented sundry memorials of citizens of Kansas, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. BACON presented sundry memorials of citizens of Georgia, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. PLATT of New York presented sundry memorials of citizens of New York, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. LODGE presented sundry memorials of citizens of Massachusetts, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. SPOONER presented the memorial of E. G. Mills and 45 other citizens of Superior, Wis., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

He also presented the petition of Joseph Pettit and 59 other citizens of La Pointe, Wis., and the petition of C. F. Pierson and 24 other citizens of Florida, praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

UNION PACIFIC RAILROAD.

Mr. HARRIS of Kansas. From the Committee on Pacific Railroads I report back with amendments the resolution submitted by me and referred to that committee. I desire to submit a brief statement in regard to the views of some members of the committee, which I shall ask leave to have printed.

Mr. MORGAN. Let the resolution be first read.

The VICE-PRESIDENT. The Secretary will read the resolution as proposed to be amended.

The Secretary read as follows:

Whereas by an act of Congress entitled "An act authorizing an investigation of the books, accounts, and methods of railroads which have received aid from the United States, and for other purposes," approved March 3, 1887, it is provided:

"SEC. 4. That whenever, in the opinion of the President, it shall be deemed necessary to the protection of the interests and preservation of the security of the United States in respect of its lien, mortgage, or other interest in any of the property of any or all of the several companies upon which a lien, mortgage, or other incumbrance paramount to the right, title, or interest of the United States for the same property, or any part of the same, may exist and be then lawfully liable to be enforced, the Secretary of the Treasury shall, under the direction of the President, redeem or otherwise clear off such paramount lien, mortgage, or other incumbrance by paying the sums lawfully due in respect thereof out of the Treasury; and the United States shall thereupon become and be subrogated to all rights and securities heretofore pertaining to the debt, mortgage, lien, or other incumbrance in respect of which such payment shall have been made. It shall be the duty of the Attorney-General, under the direction of the President, to take all such steps and proceedings, in the courts and otherwise, as shall be needful to redeem such lien, mortgage, or other incumbrance, and to protect and defend the rights and interests of the United States in respect of the matters in this section mentioned, and to take steps to foreclose any mortgage or lien of the United States on any such railroad property.

"SEC. 5. That the sinking funds which are or may be held in the Treasury for the security of the indebtedness of either or all of said railroad companies may, in addition to the investments now authorized by law, be invested in any bonds of the United States heretofore issued for the benefit of either or all of said companies, or in any of the first-mortgage bonds of either of said companies which have been issued under the authority of any law of the United States and secured by mortgages of their roads and franchises, which by any law of the United States have been made prior and paramount to the mortgage, lien, or other security of the United States in respect of its advances to either of said companies as provided by law;" and

Whereas certain first-mortgage bonds on the said Union Pacific Railroad Company have matured, and the holders thereof have instituted foreclosure proceedings in several of the United States circuit courts to foreclose the liens created thereby and sell said railroad and all other properties and rights belonging thereto, and said foreclosure proceedings may, unless prevented by the President, proceed to final decrees and a final sale of all of said properties be made: Therefore,

Resolved by the Senate of the United States, That it is the sense of the Senate that the President should, in strict accordance with the above-quoted statute, direct the Secretary of the Treasury to carry out the provisions of said act by redeeming or otherwise clearing off the paramount liens, mortgages, and incumbrances on said railroad by paying the sums lawfully due in respect thereof out of the Treasury to the holders of prior liens, and that the President should direct the Attorney-General to take such steps and proceedings in the courts and otherwise as shall be needful to redeem such property from any prior mortgage, lien, or incumbrance necessary and proper to defend the interests of the United States in respect to the matters in said act of Congress mentioned, and to take steps to foreclose any mortgage or lien of the United States on any of said railroad property. And that the President is requested to suspend proceedings to carry into effect the agreement alleged to have been made to sell the interest of the United States in the Union Pacific Railroad, and in the sinking fund, until the further action of Congress is had in reference thereto.

Mr. HARRIS of Kansas. Mr. President, the statement which I submit represents the views of myself, the Senator from Alabama [Mr. MORGAN], and the Senator from Utah [Mr. RAWLINS].

[Senate Document No. 161, Fifty-fifth Congress, first session.]

UNION PACIFIC RAILROAD.

Mr. HARRIS of Kansas, from the Committee on Pacific Railroads, presented the following views of Mr. HARRIS of Kansas, concurred in by Mr. RAWLINS and Mr. MORGAN, on Senate resolution No. 125, reported from the Committee on Pacific Railroads, with amendments:

The most casual examination of the acts of Congress relating to the Pacific railroads fully establishes the fact that these roads were intended by Congress, as a national policy, to constitute one great continuous national highway from the Missouri River to the Pacific Ocean, and while, for the sake of expedition, the work of construction was intrusted to several companies, the practical and effective unity of the line was constantly and carefully kept in view, and all possibility of interference with that object was strictly guarded.

The possible danger of insolvency or failure of any one of the companies, or of all of them, was provided for by the provisions of this act of March 3, 1887, quoted in the resolution, and ample power was conferred upon the Executive to use money in the Treasury or in the sinking fund to prevent the possible action of any creditors of the company to in any way interfere with the action and operation of the roads as a great instrumentality of the Government. When, therefore, the executive department of the Government consents to an arrangement by which this fundamental object of the law is absolutely and forever defeated, and the great line so highly prized is to be divided up among warring and conflicting interests, it is time for an earnest and emphatic protest on the part of Congress; and when, further, it is found that the Executive not only permits but actually participates and aids in the execution of this destruction, as is shown by the correspondence as given by the letters from the Attorney-General in response to the Senate resolutions of January 23 and of March 26, 1897, and hereto attached, and actually proposes to consent to a surrender of the sinking fund, and the enormous sacrifice of the pecuniary interests of the Government, it would seem beyond the power of the most able of corporation agencies to satisfactorily explain such action. This correspondence shows letters from various Government directors highly approving this unlawful proceeding. If we are to believe the current news of the day, some of these directors are largely interested in the proposed new organization, and history seems about to repeat itself, and the practices of the Crédit Mobilier and the construction companies of the past to be once more revived and put in operation.

No information has come to the committee as to the plan of reorganization which is proposed as a sequel to the purchase of the interests of the United States in the Union Pacific Railroad and the sinking fund except statements in the newspapers which have not been contradicted. There are appended extracts of recent date from journals published in New York, which are of importance in the absence of more authentic statements.

If the Government has knowledge of this plan of reorganization, it has not been communicated to Congress; and the haste in the sale of the property under the existing agreement with the former Executive, which is evidently a part of the plan, requires the active intervention of Congress in demanding a full knowledge of the plan in course of execution.

According to estimates made as of January 1, 1897, the total debt of the Union Pacific Company is $92,285,344.36. The bond and interest account credits to March 1, 1896, are $20,146,889.33; further credits on account of transportation services to January 1, 1897, $1,000,000, leaving a balance of indebtedness of $70,538,455. As the sinking fund is not to be deducted from this sum, but is to be turned over to the reorganized company on the payment of $45,754,059.99, the actual loss in money to the Government will be $24,784,396. In addition to this there will undoubtedly be great losses sustained by other creditors of the company, because this is intended, apparently, to be a complete transfer of all the rights, property, and franchises of the existing company to a new company in virtue of a decree of the court and by its assistance in the execution of a contract that Congress alone can ratify.

The undersigned append a statement of a newspaper representing a complaint of the minor shareholders and giving some idea of the injury which would result to that class of creditors of the company.

But there is another class of creditors who have furnished the money with which these roads have been built, by payment of double price for Government land and by exorbitant rates of freight and fare, who have a right to claim every possible consideration at the hands of Congress.

The people living along these lines of road and throughout the West are the burden bearers and real creditors above all others whose claims must be considered. Congress has in its hands a sacred trust to perform in seeing to it that all the property and facilities which have been created at the expense of these people shall be preserved intact, and that no syndicates of bankers, bondholders, or others shall be allowed to step in and dismember the great

agency which is sacredly and forever to be preserved to the people, and it is for their benefit and interest that the committee recommend earnest and effective action.

The provisions of the Thurman Act so clearly and specifically state for what purpose the sinking fund shall be used that it is almost impossible to conceive of such an unlawful and improper action being taken in the face of law so full and comprehensive.

The power to sell that fund is not given to the President by any law.

In section 11 of that act the duty of the Attorney-General is specifically stated. It is not a matter of choice with him, but it is most absolutely and imperatively his duty.

"SEC. 11. That if either of said railroad companies shall fail to perform all and singular the requirements of this act and of the acts hereinbefore mentioned, and of any other act relating to said company, to be by it performed, for the period of six months next after such performance may be due, such failure shall operate as a forfeiture of all the rights, privileges, grants, and franchises derived or obtained by it from the United States; and it shall be the duty of the Attorney-General to cause such forfeiture to be judicially enforced."

The undersigned herewith submit various decisions of the Supreme Court bearing directly upon this action and can not hesitate to recommend the immediate passage by the Senate of the resolution now before the committee.

W. A. HARRIS.
JNO. T. MORGAN.
J. L. RAWLINS.

—

[99 U. S., 724-725. Sinking-fund cases. Union Pacific Railroad Company *vs.* United States. Central Pacific Railroad Company *vs.* Gallatin.]

The United States occupy toward this corporation a twofold relation—that of sovereign and that of creditor. (United States *vs.* Union Pacific Railroad Co., 98 U. S., 569.) Their rights as sovereign are not crippled because they are creditors, and their privileges as creditors are not enlarged by the charter because of their sovereignty. They can not, as creditors, demand payment of what is due them before the time limited by the contract. Neither can they, as sovereign or creditors, require the company to pay the other debts it owes before they mature.

But out of regard to the rights of the subsequent lien holders and stockholders, it is not only their right but their duty as sovereign to see to it that the current stockholders do not, in the administration of the affairs of the corporation, appropriate to their own use that which in equity belongs to others. A legislative regulation which does no more than require them to submit to their just contribution toward the payment of a bonded debt can not in any sense be said to deprive them of their property without due process of law.

—

[103 U. S., 651. Wardell *vs.* Railroad Company.]

1. The directors of a corporation are subject to the obligations which the law imposes upon trustees and agents. They can not, therefore, with respect to the same matters, act for themselves and for it, nor occupy a position in conflict with its interests.

2. Hence, a court will refuse to give effect to arrangements by directors of a railroad company to secure, at its expense, undue advantages to themselves, by forming, as an auxiliary to it, a new company, with the understanding that they or some of them shall become stockholders in it and then that valuable contracts shall be given to it by the railroad company, in the profits of which they, as such stockholders, shall share.

3. The contract entered into July 16, 1868, by the Union Pacific Railroad Company by direction of the executive committee of the board of directors, with Godfrey and Wardell (infra, page 652), which the latter assigned, without consideration, to a new company, in which a majority of the stock was taken by six directors of the old company, declared to be fraudulent and void.

—

[134 U. S., 287. Chicago, Milwaukee and St. Paul Railway Company *vs.* Third National Bank of Chicago.]

The properties of a corporation constitute a trust fund for the payment of its debts; and when there is a misappropriation of the funds of a corporation, equity, on behalf of the creditors of such a corporation, will follow the funds so diverted. The Milwaukee Company, from securities on the property of the Pacific Company, received nearly $3,000,000; part it used for the benefit of the lessor company, and part it appropriated to its own benefit. Can it do this, and let the lessor company's debt go unpaid? Equity answers this question in the negative, and such was the ruling of the circuit judge. (28 Fed. Rep., 820.)

—

[91 U. S. United States *vs.* Union Pacific Railroad Company.]

The bonds in question were issued in pursuance of a scheme to aid in the construction of a great national highway. (Page 79.)

The enterprise was viewed as a national undertaking for national purposes; and the public mind was directed to the end in view, rather than to the particular means of securing it. (Page 80.)

The project of building the road was not conceived for private ends; and the prevalent opinion was that it could not be worked out by private capital alone. It was a national work, originating in national necessities and requiring national assistance. (Page 81.)

It is true the scheme contemplated profit to individuals, for without a reasonable expectation of this, capital could not be obtained, nor the requisite skill and enterprise. But this consideration does not in itself change the relation of the parties to this suit. This might have been so if the Government had incorporated a company to advance private interests, and agreed to aid it on account of the supposed incidental advantages which the public would derive from the completion of the projected railway. But the primary object of the Government was to advance its own interests, and it endeavored to engage individual cooperation as a means to an end—the securing a road which could be used for its own purposes. (Page 81.)

Indeed, the whole act contains unmistakable evidence that if Congress was put to the necessity of carrying on a great public enterprise by the instrumentality of private corporations, it took care that there should be no misunderstanding about the objects to be attained or the motives which influenced its action. (Page 82.)

The failure to perform that condition is a cause of forfeiture. If the natural meaning of the words be adopted as the true meaning, there can be no forfeiture until the bonds themselves have matured. On the contrary, if the construction contended for be allowed, the grant is subject to forfeiture on each occasion that six months' interest falls due and is not met by the corporation. (Page 86.)

If the road were a success, in addition to the benefits it would confer on the United States, the corporation would be in a situation to repay the advances for interest and the principal when due. If, on the contrary, it proved to be a failure, subjecting the private persons who invested their capital in it to a total loss, there would be left the entire property of the corporation, of which immediate possession could be taken by the Government on a declaration of forfeiture. (Page 89.)

[Senate Document No. 83, Fifty-fourth Congress, second session.]

DEPARTMENT OF JUSTICE, *Washington, D. C., January 23, 1897.*

SIR: I have the honor, pursuant to the Senate resolution of this date, to say that an agreement has been made with what is commonly known as the reorganization committee of the Union Pacific Railway Company respecting the foreclosure of the Government lien on property of said company. I transmit herewith a copy of the letter of the President of the United States, under authority of which the agreement was made and foreclosure proceedings have been commenced, and copies of the correspondence which embodies the agreement.

The names of the gentlemen who comprise the reorganization committee are as follows: Louis Fitzgerald, chairman; Jacob H. Schiff, T. Jefferson Coolidge, jr., Chauncey M. Depew, Marvin Hughitt, Oliver Ames, 2d.

These papers set forth all the information called for by the resolution.

After the closing of the agreement I designated the United States Trust Company of New York as the depositary, and thereupon, upon the 21st instant, the sum of $4,500,000 was deposited therein in conformity with the terms of the agreement. The certificate representing such deposits is now in the hands of the Secretary of the Treasury.

I have the honor to be, with great respect, your obedient servant,

JUDSON HARMON, *Attorney-General.*

The PRESIDENT OF THE SENATE.

—

EXECUTIVE MANSION, *Washington, January 12, 1897.*

DEAR SIR: The bill which has been for some time pending before the Congress, providing for the adjustment and extension of the indebtedness of the Pacific railroads to the Government of the United States, has been defeated in the House of Representatives.

In the case of the Union Pacific Railroad and the Kansas Pacific Railroad, a default in the payment of their indebtedness having occurred, and suits having been commenced for the foreclosure of the lien upon said roads which is paramount to the lien and security of the United States, you are hereby directed, pursuant to the provisions of an act of Congress passed March 3, 1887, after taking such precautions and perfecting such arrangements as are possible to assure as far as practicable the payment of their indebtedness to the Government as a result of the suits now pending or others to be instituted, to take such proceedings in the courts as shall be needful to protect and defend the rights and interests of the United States in respect of such indebtedness, and to take steps to foreclose the mortgages or liens of the United States upon the property of these railroad companies.

In the case of the other aided Pacific railroads as to which no foreclosure suits are pending, a different situation is presented, which requires further consideration before deciding the course to be taken by the Government.

Yours, truly,

GROVER CLEVELAND.

Hon. JUDSON HARMON,
Attorney-General of the United States.

—

DEPARTMENT OF JUSTICE, *Washington, D. C., January 18, 1897.*

SIR: Hon. George Hoadly, special assistant to the Attorney-General, has sent me your letter to him of the 15th instant, making a proposition on behalf of your committee for a guaranteed minimum bid for the property of the Union Pacific and Kansas Pacific railway companies and the Union Pacific sinking fund as a basis for the Government's proceeding to foreclose its lien thereon. I am authorized by the President to commence foreclosure proceedings, as suggested in your proposal, provided it is modified in the following particulars:

(1) In order to preserve the basis of the original informal negotiations, which took place in the absence of an accurate statement of the sinking fund, your offer should be modified so that the amount of the guarantied bid therein named will be $45,754,059.99, instead of the sum of $45,000,000.

(2) That the following clause of your proposal be eliminated, viz, "and that, to the extent to which the Government may determine the terms of decree, an equal deposit to be made within a reasonable time before sale shall be required as a qualification of any other bidder." While I have no doubt that the court will follow the uniform practice in railway foreclosures of requiring a deposit of all bidders as a guaranty of good faith and security for performance, and while the Government will obviously have the same interest as other parties in having such condition imposed, I do not wish to make a stipulation on that point as a condition of our arrangement.

(3) That your proposal is understood to mean that in case the property mentioned should not be sold as a unit, minimum bids for the separate portions thereof are to be made which in the aggregate will produce to the Government the net sum above mentioned. In case of separate sales the deposit named by you may of course be used for qualification of bidders representing you at each, in such proportions as may be required under the terms of sale.

(4) Your guaranty applies to such sale or sales as shall become effective. The sale of the sinking fund may be judicial or otherwise.

Your acceptance of the above modifications of your proposal will close the arrangement, and I will proceed to institute foreclosure proceedings on behalf of the Government as soon as the deposit named by you is made, for which, upon receipt of your acceptance, I will designate the depositary.

Very respectfully,

——— ———, *Attorney-General.*

LOUIS FITZGERALD, Esq.,
Chairman Reorganization Committee, Union Pacific Rwy. Co.
No. 120 Broadway, New York, N. Y.

—

REORGANIZATION COMMITTEE,
UNION PACIFIC RAILWAY COMPANY,
New York, January 20, 1897.

SIR: I have your favor of 18th instant, written in reply to my letter of 15th instant to Hon. George Hoadly, special assistant to the Attorney-General.

On behalf of the reorganization committee of the Union Pacific Railway Company, I have the honor to accept the modifications proposed in your letter of January 18, 1897, to the proposal made in my letter to Hon. George Hoadly dated on the 15th instant.

I am, very respectfully,

LOUIS FITZGERALD,
Chairman Union Pacific Reorganization Committee.

Hon. JUDSON HARMON,
Attorney-General, Washington, D. C.

—

NEW YORK, *January 15, 1897.*

DEAR SIR: Replying on behalf of the Union Pacific reorganization committee to your favor of the 14th instant, in which you request from this committee such proposition as it may be willing to make fixing a guaranty bid at foreclosure and sale for the interest of the United States in the Union Pacific Railway and for the Union Pacific sinking fund, I am authorized to

submit to you, and through you to the executive department of the Government, the following:

In the event that the Government shall at once take proceedings in the pending foreclosure suits, or by independent bills, for the enforcement of its lien upon the railroad and property of the Union Pacific Railway (which includes the Kansas Pacific line) by sale thereof, and for the sale of the sinking fund in the hands of the Secretary of the Treasury relating to the Union Pacific Railway Company, the reorganization committee is prepared to guarantee a minimum bid for the Union and Kansas Pacific lines of railroad and property embraced within the lien of the Government, and for the cash and securities in the United States Union Pacific sinking fund, taken at par, which shall produce to the Government, over and above any prior liens and charges upon the railways and sinking fund, the net sum of $45,000,000.

The committee is prepared to furnish adequate security for the due performance of the above offer. As such security, it will deposit with such national depositary in New York City as may be selected by the proper officers of the Government the sum of $4,500,000 in cash (namely, 10 per cent of the guaranteed bid), subject to the condition that this deposit may be used, under the terms of the foreclosure decree, as a deposit to qualify such bidders as may act on behalf of the reorganization committee, and that to the extent to which the Government may determine the terms of decree, an equal deposit, to be made within a reasonable time before sale, shall be required as a qualification of any other bidder. Should the Government desire to liquidate the sinking fund in advance of sale of the railway property, the reorganization committee will be prepared to anticipate this feature of its offer by an earlier purchase of the sinking fund at par of the cash and securities therein contained.

As the provision proposed is one of very considerable magnitude, and as the proposition is based upon conditions which now exist, it will be obvious that the reorganization committee must reserve, and it desires to be understood as reserving, the right to withdraw this offer at any time previous to its acceptance by the Government.

I have the honor to be, very respectfully, yours,

LOUIS FITZGERALD,
Chairman of the Reorganization Committee of the Union Pacific Railway Company.

Hon. GEORGE HOADLY,
Special Assistant to Attorney-General,
No. 22 William Street, New York City.

—

[Senate Document No. 27, Fifty-fifth Congress, first session.]

DEPARTMENT OF JUSTICE, *Washington, D. C., April 3, 1897.*

The Senate of the United States:

In response to your resolution of the 29th ultimo, purporting to direct the Attorney-General to inform the Senate whether any and what agreement, if any, had been entered into by the President or any of the Executive Departments relating to the future disposal of the Union Pacific Railway by sale or otherwise, and that he send to the Senate all papers on file in the Department of Justice relating to said agreement, I have to say—

(1) That on the 23d of January last the Attorney-General, in answer to a similar resolution, sent to the Senate several papers relating to an agreement between him and Mr. Louis Fitzgerald.

(2) That inquiry at the Treasury Department and the Department of the Interior fails to disclose any other agreements of the kind inquired about.

(3) That I know of no other agreement entered into by the President or Attorney-General.

(4) I transmit copies of a few additional papers concerning the agreement reported upon the 23d of January last.

Respectfully,

JOSEPH MCKENNA,
Attorney-General.

—

[Telegram.]

DEPARTMENT OF JUSTICE, *Washington, D. C., January 16, 1897.*

Hon. GEO. HOADLY,
22 William Street, New York, N. Y.:

Please submit copy of proposal to Government directors, and ask them to please advise me in writing whether they think it should be accepted.

HARMON.

—

NEW YORK, *January 16, 1897.*

DEAR SIR: I have examined the proposal of the Union Pacific reorganization committee to Mr. Hoadly, by which the sum of $45,000,000, secured by a deposit of $4,500,000, is to be bid for the property, including the sinking fund, over and above all liens prior to the lien of the United States. In my judgment, this proposition ought to be accepted.

Yours, very truly,

E. ELLERY ANDERSON,
Government Director.

Hon. JUDSON HARMON,
Attorney-General.

—

[Telegram.]

OMAHA, NEBR., *January 17, 1897.*

Gen. JUDSON HARMON,
Attorney-General, Washington, D. C.:

Governor George Hoadly, special assistant attorney of Union Pacific matters, telegraphs me as follows:

"Reorganization committee Union Pacific Railway offer in writing to bid at foreclosure of Government lien for railroad and sinking fund, subject to first mortgage, $45,000,000 cash, and to secure bid by $4,500,000 cash deposited immediately. No restriction on competition of others. Highest and best bid to take property. Please wire Attorney-General Judson Harmon, Washington, at once whether you advise the acceptance of this proposition and the immediate beginning of foreclosure proceedings on behalf of the Government. This refers to Union Pacific and Kansas Pacific only."

Without opportunity to consult with the other directors, and supposing that these are the best terms that can be had for the Government individually, I advise the acceptance of this proposition.

J. N. H. PATRICK,
Government Director.

—

DEPARTMENT OF JUSTICE,
Washington, D. C., January 16, 1897.

SIR: I have just received your letter of the 15th instant, with inclosures. The letter of Mr. Louis Fitzgerald, chairman of the reorganization committee of the Union Pacific Railroad Company, to you, making a formal proposal of terms for the Government proceeding to foreclose its liens, of course received my first attention. I will look at the proposed bill later.

The Secretary of the Treasury and myself have carefully gone over Mr. Fitzgerald's proposal. We find two things in it to which we wish you to call the committee's attention, with a view, if possible, of having them changed before I take final action:

First. I do not like the clause "that to the extent to which the Government may determine the terms of the decree, an equal deposit, to be made within a reasonable time before sale, shall be required as a qualification of any other bidder."

This is a new feature which has never been mentioned in any of the informal discussions of the subject. While the court will doubtless, in the decree for sale, follow the usual custom of requiring a deposit of some sort from the bidders, this is a matter for the court and not for the parties to determine. While ordinarily counsel for the parties, in presenting their proposed decree, suggest this, among other terms, and while whoever may represent the Government in the suit at the time the decree shall be entered will agree to any reasonable suggestions in this regard, I do not want to agree in advance on the subject.

My reason is this: One of the strongest features of the proposed arrangement is that it secures the Government against the sacrifice of its claim by assuring at least a certain sum, and also saves to the Government whatever advantage there may be in a public sale at which all may compete. If I should now agree to any provision which might be construed as a restriction upon other bidders, I can see how embarrassment might ensue, in view of the public character in which I am acting and of the general situation.

It must be remembered, too, that this deposit, as between the Government and the committee, is not a condition of the bidding, as the deposit which may be required by the decree will be, but is an entirely different thing, namely, a security to the Government that the minimum bid will be made. This amount, therefore, bears no necessary relation to the deposit which should be required of the other bidders.

Second. I have always understood, in referring to the sinking fund—in fact, I think it has always been so expressed—that the sinking fund as it stood on January 1, 1897, was meant. While, of course, the Government will be bound if it accepts the proposal not to diminish the sinking fund or change it by any act of its own, yet in the time which may ensue between the making of the agreement and the actual sale of the property the amount of cash is likely to be increased. I should just suggest, therefore, that the proposal be amended so as to specify a date as of which the sinking fund is to be taken, so that there will be no possibility of misunderstanding.

I shall be glad if the committee, in such form as they shall deem best, will amend the proposal in these two particulars before I lay it before the President. You will please explain to the committee that there was some mistake or misunderstanding on the part of the Treasury accounting officers who prepared the statement of the present condition of the sinking fund, which I send you, which, as the Secretary tells me, made the amount of cash on hand considerably greater than it should be. I wish to remove any ground for possible misapprehension that there may be on this point.

Kindly also assure the committee that I recognize their right to a prompt reply to their proposal, and will act accordingly.

Very respectfully,

JUDSON HARMON,
Attorney-General.

Hon. GEORGE HOADLY,
No. 22 William Street, New York, N. Y.

—

[Telegram.]

CHICAGO, ILL., *January 17, 1897.*

Attorney-General JUDSON HARMON,
Washington, D. C.:

I am now informed that the Union Pacific Railway reorganization committee are ready to make the same offer, substantially, that Mr. Coudert and myself so strongly recommended to President Cleveland last June, and that they are now able to establish their bid upon a strong footing by a sufficient deposit of cash to warrant the Administration in taking immediate steps to secure an exceptionally good offer for the Government, which I have the honor to represent.

J. W. DOANE.

—

[Telegram.]

NEW YORK, *January 22, 1897.*

Hon. JUDSON HARMON,
Attorney-General, Washington, D. C.:

Government directors met to-day and adjourned to 1 o'clock to-morrow. They ask us to furnish copy of all correspondence with you relating to committee's guaranty, with copy of trust company's receipts of the earnest money, for purpose of embodying in formal report to President. Shall I furnish, as requested? This is sent after consultation with Governor Hoadly.

A. W. KRECH,
Secretary Reorganization Committee, 120 Broadway.

[Telegram.]

DEPARTMENT OF JUSTICE, *Washington, D. C., January 22, 1897.*

A. W. KRECH,
Secretary Reorganization Committee,
120 Broadway, New York, N. Y.:

No objections to furnishing directors copy of all correspondence.

HARMON, *Attorney-General.*

—

[Press dispatch.]

UNION PACIFIC REORGANIZATION—THE COMMITTEE HAS PREPARED PLANS SATISFACTORY TO THE GOVERNMENT.

BOSTON, *June 15.*

Within a short time the reorganization committee of the Union Pacific Railway Company is expected to make public its plan for the reorganization of the road, and assurances have been received that the plan will be acceptable to the representatives of the Government. It is expected that a new company will secure possession. The time for the actual sale of the road to the new company under the foreclosure proceedings was set for the first week in July, but owing to necessary legal formalities it is not expected that the great system will be operated by the new company much before October of this year.

The new plan is said to provide for the securing of the road by the reorganization committee for the actual net sum of $28,691,336, although the minimum bid was fixed at $45,754,000. The difference is made up in the form of deductions in the way of sinking funds, etc. The people who are active in the new company have already secured the sum needed, and with the $4,500,000 deposited with the United States Trust Company (10 per cent of the amount guaranteed the Government), are said to be ready to take the road as soon as the foreclosure sale is ordered. The allotment of first-mortgage 4 per cent

bonds which, under the original plan, was to be $100,000,000, is to be reduced under the new plan to $75,000,000, and there is to be an increase in the allotment of preferred stocks to the Union Pacific sinking fund 8s and the Kansas Pacific consols.

The Oregon Short Line, in which the Union Pacific has an equity, has reorganized on its own account since the original plan for reorganization was broached, and the Kansas City and Omaha and the St. Joseph and Grand Island being separately organized pass out of the Union Pacific system. The Denver, Lincoln and Gulf, and some of the smaller roads in Kansas and Nebraska, which are unprofitable properties, are not to be included in the reorganization plan, and are to shift for themselves.

Among the men mentioned as the members of the new corporation and its probable officers are Oliver W. Mink, of Boston; John W. Doane, of Chicago; Frederic R. Coudert, of New York; John F. Dillon, of New York; Alex. Millar, of Boston; Edwin F. Atkins, of Boston; Russell Sage, of New York; George J. Gould, of New York; George Q. Cannon, of Salt Lake City; Henry B. Hyde, of New York; Collis P. Huntington, and William R. Hearst, of New York.

—

UNION PACIFIC OPPOSITION—MANY ENGLISH SHAREHOLDERS THINK THAT THE REORGANIZATION PLAN IS TOO DRASTIC.

The stockholders' movement abroad, in opposition to the reorganization of the Union Pacific Railway, has received the support of some influential foreign banking firms and promises to bear fruit.

Mr. H. W. Rosenbaum, who went to Europe last April in the interest of some of the dissatisfied shareholders, returned yesterday. He said that he was more successful than he even hoped for when he started.

"I fully realize," he said, "the great difficulty of opposing the powerful syndicate which is engaged now in a so-called reorganization of the Union Pacific Company. Some prominent houses, however, have enlisted themselves on our side, although for the present they wish to have their names withheld until the opposition is more crystallized.

"The company can be easily reorganized without the necessity of creating $75,000,000 of preferred stock. I think $50,000,000 can be easily saved to the shareholders. Of course all Union Pacific reorganization plans are dependent on being able to effect a settlement of the Government debt on about the basis which the present reorganization committee contemplates, but if such a settlement can be obtained the creation of this mass of preferred stock is absolutely unnecessary and wasteful. There are still hopes, however, that Congress might be induced to grant an extension on the debt on a fair basis. With a sinking fund, the whole Government debt could be discharged within a reasonable time, and there is no necessity for the Government to lose one dollar.

"The Union Pacific, not counting the payments into the collateral trust sinking funds, and some extraordinary items, such as losses on investments which will not occur again, earned last year a surplus of $886,000 over and above payments to the Government of $1,244,000, and after having charged the full interest on all its direct indebtedness, except the various collateral loans, which are, however, nearly self-supporting. There is not the slightest doubt that the interest on about $37,500,000 first-mortgage bonds can be reduced from 6 per cent to 4 per cent without the necessity of giving the first-mortgage bonds millions in preferred stock as a bonus.

"This alone would save to the company about $750,000 a year, and would have enabled the company to apply last year $2,000,000 toward the payment of the Government debt. Of course all financial men realize that if the Government wants to sell out its claim and receive cash therefor, it would be quite impossible to raise the full sum of about $53,000,000, which is now owing to the Government, and the Government would have to accept a heavy sacrifice. Any benefit arising from this sacrifice should, however, in all justice and fairness go to the stockholders, and anything that is left, after having made a settlement with the bondholders, by right and equity must revert to the present shareholders."

"How can you overcome the fact that 95 per cent of the shareholders have accepted the reorganization plan?" I asked.

"We are quite aware of this fact," he said, "but we shall demonstrate at the proper time how some of the very largest shareholders have been induced by special privileges and participation in the syndicate to deposit their shares, and that they make up in a measure thereby what they lose on the other hand. The small shareholders, however, have been coerced into the acceptance of this plan by threatened penalties, and are not at all placed on the same footing as the large shareholders."

TRUSTEES FOR THE SHAREHOLDERS.

"The committee does not seem to realize that by asking for deposit of shares as well as bonds, and by allowing themselves compensation for their services, they become trustees for the shareholders as well as for the bondholders, and as such were bound to guard the interests of all the shareholders without any preference, and to obtain the best possible terms for them. If even at one time a diverse financial and business condition led the committee to honestly believe that the heavy sacrifices of the present plan were necessary, circumstances have now so changed as to make such sacrifices unnecessary.

"This obligation remains upon both the directors and the committee until a good and valid title shall have been irrevocably passed into other hands. Probably with this object in view the committee has especially reserved the right to alter and even to entirely abandon the plan, either before or after being declared operative. Any other interpretation of the power thus reserved would be doing injustice to the gentlemen of the committee, and the shareholders have every right to expect them to voluntarily propose material modifications. This is all we want.

"In trying to obtain this the shareholders could undoubtedly reckon upon the support of the public, the press, and probably also of Congress and the courts."

Mr. HARRIS of Kansas. I ask that the statement be printed.

The VICE-PRESIDENT. It will be so ordered. The resolution will take its place on the Calendar.

Mr. MORGAN. Mr. President, the resolution read is the unanimous report of the committee. Three Senators have chosen, I being of the number, to state the specific grounds upon which we rest our position in support of the report. I do not know that there is any contradiction or contrariety of opinion in the committee on the propositions that are here stated. I do not well see how there could be. The resolution as amended is agreed to by the entire committee.

I wish to say to the Senate separately, as a part of my report connected with this matter, that the agreement which has been made by the Executive of the former Administration is in process of execution and will very soon be consummated if the court before whom the bill is pending will feel itself warranted in giving any importance or any value to that agreement.

The three members of the committee point out in the report which the Senator from Kansas has just read that the agreement of the President of the United States for the disposal of the property of the Union Pacific Railroad Company and of the sinking fund is ultra vires. This position is the basis of the resolution. We might go further than that if we chose to do so, and say that it is a plain, palpable breach and violation of the statute. There is no authority for that agreement found in the laws of the United States. Nevertheless we understand the weight of Executive power and Executive influence in courts and in Congress and amongst the people. It is not a light matter. Many people yield to it without inquiry or objection.

It is necessary that the Senate of the United States should express its views upon this subject at the earliest possible date in order that the court may understand whether we expect to abide by and perform that agreement, or whether we expect to retain and reserve for the United States all the rights of the Government and the people against an agreement which sells a property that to-day is perfectly solvent and perfectly able to pay every debt that it owes for the paltry sum of $26,000,000.

I now give notice, inasmuch as this matter goes to the Calendar, that on next Monday at the conclusion of the morning business—and I desire the Senator from Iowa to notice this—that on next Monday morning, at the close of the morning business, I shall move the Senate to proceed to the consideration of the resolution. I think very likely it will not lead to much debate. I want the Senate, in the meantime, to have an opportunity to look over the report of the Senator from Kansas. It is compact, complete, brief, and to the point, and in my judgment there is no possible way of proceeding except by adopting a resolution of the Senate that we disagree to the action of the Executive and repudiate it, and that, so far as we are concerned, we do not expect to be bound by it.

Perhaps if both Houses were in the regular course of action, with committees provided, etc., we would have made this a concurrent or a joint resolution; but in the present attitude of affairs, running as we are on one wheel, and as we have to transact the business of the Government, as far as we can, for the preservation of the rights of the United States and of the people through the solitary action of the Senate of the United States, the committee have thought it best to present a Senate resolution. That is perhaps as far as we can go; but I take it, sir, that neither the courts nor any other of the departments or functionaries of the Government will undertake to venture, in the presence of the report that has now been made of facts that are absolutely indisputable, to sacrifice the great property of the Union Pacific Railroad for $26,000,000 under a void contract.

I feel inclined to go further with my statement, but I shall not do so at present. Whenever the resolution is taken up, I shall seek an opportunity to show not only that this agreement is contrary to the statute, that it violates it abruptly and decisively, but to show, Mr. President, that when the receivers of the road and the Government directors of the road are engaged in this contract for the purpose of throwing the Union Pacific Railroad away, the situation is, as is characterized in that report, as bad as if not worse than the Credit Mobilier and the Contract Company's engagement with the Central Pacific Railroad Company. The facts as disclosed in the reports of the Attorney-General sent to the Senate will not admit of delay or neglect in counteracting this dangerous exploit.

Mr. ALLISON. I am not familiar with this matter or the necessity for immediate consideration. My colleague [Mr. GEAR], who is chairman of the Committee on Pacific Railroads, is not present this morning, and I hope the Senator from Alabama will allow the matter to rest for the present without fixing a time. Certainly it is of the utmost importance that the bill now under consideration should be got into conference before any other measure is taken up. I shall feel compelled to resist, at least so far as I can, the taking up of any new business outside of the tariff question until that is disposed of.

BILLS INTRODUCED.

Mr. CAFFERY (by request) introduced a bill (S. 2287) for the relief of Arther Taylor, of Lafayette Parish, La.; which was read twice by its title, and referred to the Committee on Claims.

Mr. WELLINGTON introduced a bill (S. 2288) for the purchase of the Geracchi bust of Benjamin Franklin; which was read twice by its title, and referred to the Committee on the Library.

Mr. SPOONER introduced a bill (S. 2289) for the relief of Rev. Corydon Millard; which was read twice by its title, and referred to the Committee on Pensions.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. ALLEN submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

HARRIS P. HURST.

Mr. WALTHALL submitted the following resolution; which was referred to the Committee on Claims:

Resolved, That the Committee on Claims be instructed to investigate and report upon the claim of Harris P. Hurst against the Government of the United States for compensation for making, or causing to be made, certain ordnance inventions authorized in the act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1893," approved July 19, 1892, a contract having been entered into under said act between the said Hurst and the Secretary of the Navy, and report whether the Government of the United States has made or caused to be made any wire-wound or other guns, high-explosive shells, or other ordnance devices covered by any of the applications for patent filed by the said Harris P. Hurst in the United States Patent Office, for which the said Hurst claims compensation, and whether said inventions were embraced in his application for patents, or were devised by officers of the United States in public or private employ, and also whether said Hurst is entitled to any compensation therefor, and if so, how much.

COST OF PRODUCTION IN LEADING INDUSTRIES.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution of the Senator from Louisiana [Mr. CAFFERY], coming over from a previous day.

The resolution submitted on the 24th instant by Mr. CAFFERY was read, as follows:

Resolved, That the Commissioner of Labor be, and is hereby, directed to collect from official sources, or otherwise, if necessary, information relating to the total cost and labor cost of production in fifteen of the leading industries common to this country, Great Britain, France, Belgium, and Germany, and report the results of his inquiries to the Senate as soon after the meeting of the second session of the Fifty-fifth Congress as possible: *Provided*, That the inquiries hereby authorized shall be carried on under the regular appropriations made for the Department of Labor.

Mr. CHANDLER. I submitted to the Senator from Louisiana yesterday one or two amendments to the resolution, and if they can be agreed to, I shall have no objection to a resolution. I do object to it in its present form.

Mr. CAFFERY. Will the Senator state the nature of his amendments? I have not seen the amendments. Perhaps I might consent to them.

Mr. CHANDLER. If the Senator will allow the resolution to go over for a few moments, I will submit the amendments to him. I hope the resolution may be passed over for the present.

Mr. CAFFERY. I should like to have the resolution considered this morning, if possible.

Mr. CHANDLER. I shall prepare my amendments during the day, and will suggest them to the Senator.

Mr. CAFFERY. Very well.

The VICE-PRESIDENT. There being no objection, the resolution will lie over until an agreement is reached between the Senator from Louisiana and the Senator from New Hampshire.

Mr. CAFFERY subsequently said: The Senator from New Hampshire [Mr. CHANDLER] has decided not to offer the amendments which he intended to propose to the resolution that I offered, and which, as I understood the Chair, was laid temporarily aside in order that the Senator from New Hampshire might have an opportunity to perfect his amendments. I now ask that the resolution be taken up and considered.

The VICE-PRESIDENT. Is there objection to the immediate consideration of the resolution offered by the Senator from Louisiana on the 24th instant, which came up under the order of morning business this morning?

Mr. ALLISON. If it leads to no debate, I shall not object.

Mr. CAFFERY. It will lead to no debate.

The VICE-PRESIDENT. Is there objection to the consideration at this time of the resolution submitted by the Senator from Louisiana [Mr. CAFFERY], which has been read? The Chair hears no objection, and the question is on agreeing to the resolution.

The resolution was agreed to.

TRANSMISSISSIPPI AND INTERNATIONAL EXPOSITION.

Mr. ALLEN. I offer a resolution, which I ask to have read and lie over until Monday morning.

The resolution was read, as follows:

Resolved, That the President be, and he is hereby, respectfully requested, if in his judgment it would not be incompatible with the public policy, to invite by proclamation, or in such other manner as he may deem most proper, foreign nations to make exhibits at the Transmississippi and International Exposition, to be held at the city of Omaha, in the State of Nebraska, between June 1 and November 1, A. D. 1898.

The PRESIDING OFFICER (Mr. BURROWS in the chair). The resolution will lie over at the request of the Senator from Nebraska.

THE TARIFF BILL.

Mr. ALLISON. I now move that the Senate proceed to the consideration of House bill 379.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. ALLISON. On Thursday there was an understanding with the Senator from New Jersey [Mr. SMITH] and Senators on the other side that as soon as the schedule relating to tobacco had been disposed of we should take up the matters passed over relating to leather. I should be glad this morning to have that question taken up, but I learn that the Senator from New Jersey desires to be present when that schedule is considered, and that he is unwell to-day; so I suppose we shall be obliged to put it over. I ask what is the view of Senators on the other side?

Mr. JONES of Arkansas. We have no objection to its going over. I have just received a telephonic message from the Senator from New Jersey that he is too ill to be present to-day, but that he will be here on Monday morning. It may be just as convenient to other Senators to take it up on Monday as to take it up to-day.

Mr. ALLISON. It may be necessary for us to pass over some other matters which I wanted to take up to-day; otherwise an early adjournment may possibly be necessitated.

Mr. CHANDLER. I desire to have printed an amendment, which I submit by request to the pending bill, providing a schedule of duties on spices, which I ask may be printed and laid upon the table.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

Mr. CHANDLER. I also ask that an unsigned memorandum which has been handed to me, stating the reasons why duties upon spices should be imposed, may be printed as a document for the use of the Senate.

The VICE-PRESIDENT. Is there any objection to the request? The Chair hears none, and that order will be made.

Mr. ALLISON. I ask now that we proceed to the consideration of the paragraphs which have been passed over.

The VICE-PRESIDENT. Without objection, that will be the order; and the first paragraph passed over will be stated.

The SECRETARY. The first amendment passed over was, on page 1, line 3, of the bill, to change the operative date on which the proposed law shall take effect by striking out the word "May" and inserting "July;" so as to read:

That on and after the 1st day of July, 1897, etc.

Mr. ALLISON. From necessity, that will have to be left blank for the present.

The VICE-PRESIDENT. The next item which was passed over will be stated.

The SECRETARY. The next item passed over was, under the heading "Schedule A.—Chemicals, oils, and paints," in paragraph 1, on page 2, line 3, after the word "pound," to strike out "salicylic acid, 10 cents per pound."

Mr. ALLISON. I ask the Presiding Officer what was done with the amendment, in lines 6 and 7 of the first clause of the bill, after the word "countries," to strike out "or withdrawn for consumption?" Were those words stricken out?

The VICE-PRESIDENT. The Chair understands from the Secretary that the amendment striking out those words has been agreed to.

Mr. ALLISON. All right. Then the next item passed over is on page 2, line 3, which has been read by the Secretary.

The VICE-PRESIDENT. The amendment will be again stated.

The SECRETARY. In paragraph 1, page 2, line 3, after the word "pound," the amendment proposed by the Committee on Finance was passed over, striking out the words "salicylic acid, 10 cents per pound."

Mr. ALLISON. On behalf of the majority of the Committee on Finance, I ask that that amendment may be disagreed to.

The VICE-PRESIDENT. Is there objection? Without objection, the amendment striking out the words which have been read is disagreed to.

Mr. JONES of Arkansas. What were the words the committee originally reported to strike out in paragraph 1?

Mr. ALLISON. There was one item in that paragraph passed over, "salicylic acid, 10 cents per pound." The committee originally recommended that that item should be stricken out here and "salicylic" inserted in the free list.

Mr. JONES of Arkansas. That is agreed to.

Mr. ALLISON. The committee amendment has been disagreed to; but it has not yet been stricken from the free list.

Mr. VEST. That is, you put it back on the dutiable list?

Mr. ALLISON. It is put back on the dutiable list.

The VICE-PRESIDENT. The next paragraph passed over will be stated.

Mr. ALLISON. Before proceeding to that, I ask that in paragraph 452, which is in the free list, the word "salicylic," in line 20, may be stricken out; so that the entire matter may be disposed of now.

The SECRETARY. In paragraph 452, line 20, after the word "salicic," it is proposed to strike out "salicylic."

Mr. VEST. I should like to know the cause of this change of mind on the part of our friends on the other side. They have heretofore put this article on the free list, and it must have been

done after examination. I think this article came from the House on the dutiable list, and the Committee on Finance struck it out and put it on the free list. We are entitled to know the mental process by which our friends have concluded to put it back upon the dutiable list. I have a number of communications in favor of salicylic acid going upon the free list; but I have contented myself with the result of the examination on the part of the majority of the committee, and was very glad to know that they had put it upon the free list. Now, however, it is put back on the dutiable list.

Mr. ALLISON. This acid is largely manufactured in this country, and it is an important acid. The duty of 10 cents a pound is about 25 per cent ad valorem, the rate provided as to a great many other acids of a kindred character, and on further examination the committee thought it was a proper subject of duty.

Mr. VEST. The Senator from Iowa knows that the American manufacturers control the market for this article, and why should we now put a duty upon it? What manufacturer has been here and represented that it is to his interest that this thing should be done? The Senator knows that we manufacture almost all of this article that is used here. It was free under the McKinley Act, it was free under the Wilson Act, and it was made free by the first report of the majority of the Finance Committee. I think the weight of authority is altogether in favor of this article remaining on the free list.

Mr. ALLISON. It is very largely manufactured in St. Louis and in various other parts of our country. It is manufactured chiefly from coal tar, and also from wintergreen.

Mr. VEST. Of course.

Mr. ALLISON. It is a very important manufacture, and now sells at about 40 cents a pound.

Mr. VEST. I have not heard a single argument why it should not go on the free list. The Senator does not pretend to say that we do not control the market. We largely manufacture it.

Mr. ALLISON. We do not control the entire market; it is imported as well.

Mr. VEST. Not to anything like the amount of consumption.

Mr. SEWELL. I will state for the information of the Senator from Missouri that this is an article of large consumption and manufacture in this country, and that it has heretofore been protected by patents which have expired, and that is the reason that some protection is now wanted against the imported article. It is largely manufactured in my State and in Pennsylvania. I ask to have read a letter from a Pennsylvania manufacturer showing the actual cost of wages paid in the manufacture of the article.

Mr. VEST. I understand, as well as I can hear the Senator from New Jersey, his statement to be that this article hitherto was protected by a patent, but the patent has expired, and now they want to put a protective duty on it.

Mr. SEWELL. Is not that a very good reason? I will ask the Senator from Missouri why a duty should not be imposed to protect the American manufacturer against the German and English chemists and manufacturers?

Mr. VEST. I have no doubt that from the protective standpoint that is an ample and sufficient argument, but not from mine.

Mr. SEWELL. I will ask the Senator if it is not a good protective argument that this article is used in the manufacture of beer, against the deterioration of which the people of this country ought to be protected?

Mr. STEWART. Does the Senator say it is used in the manufacture of beer?

Mr. SEWELL. Yes, sir.

Mr. STEWART. Then it had better be put upon the free list at once. The article ought not to be used at all.

Mr. SEWELL. It is used for the deterioration of beer, and the beer people are asking to have it put upon the free list.

Mr. STEWART. The Senator is suggesting a very important subject. The use of foreign rice and acids in the making of beer is most injurious to the people. It is, according to the physicians with whom I have talked, poisonous, and it is creating almost universally diseases of the kidneys amongst beer drinkers. They would not be allowed to manufacture this kind of beer in Europe.

Mr. VEST. No; but if it is a poison, as I understand now from the Senator from New Jersey [Mr. SEWELL], then we ought not to protect it. I should like to know if we protect it and enable the domestic manufacturers to make more and sell more, if it will not still be used to poison beer and destroy the stomachs and lives of our Teutonic citizens? It seems to me, instead of protecting it, we ought to take away all protection from it.

Mr. PLATT of Connecticut. Is that any reason why the article should be placed upon the free list?

Mr. VEST. We ought to prohibit it entirely from coming into the country or being manufactured here. Why should we give to our own people greater facilities for poisoning the beer of the country?

I have received communications from the proprietors of a great chemical establishment in St. Louis, asking for a duty upon this article. I replied to them, as I reply now to all such applications, I am utterly opposed to it. The exports and imports show that we control the market.

Salicylic acid may be used, though I never heard of that before, for the deterioration of beer, the poisoning of beer; but it is largely used for a great many other purposes. It is an important chemical product. It is most astonishing that the tariff framers in 1890 and 1894, upon both sides of the Chamber, put this article upon the free list, and that our friends, so acute and learned in tariff examinations, deliberately changed the Dingley bill, as it was called, the House bill—took this article from the dutiable list and put it upon the free list, and the Senate indorsed it; and now it is to be taken off the free list and put upon the dutiable list upon the statements that are made here.

Mr. GRAY. Because the patent has expired.

Mr. VEST. Well, Mr. President, we will take the yeas and nays on it, anyhow.

Mr. SEWELL. I should like to have the communication read to which I have referred.

The VICE PRESIDENT. The communication referred to by the Senator from New Jersey will be read, in the absence of objection.

The Secretary read as follows:

POTTSTOWN, PA., *June 9, 1897.*

DEAR SIR: I am a manufacturer of salicylic acid, and have just been informed by Congressman IRVING P. WANGER that it was through your efforts that the consideration of the amendment to strike out the duty was postponed. For this, please accept my thanks.

When I commenced business two years ago, salicylic acid was selling for $1.25 per pound. At present 33 to 35 cents per pound is the price. Then the German makers were in a combination and without opposition here and maintained the price. When opposition developed, the price fell from $1.25 to 50 cents per pound at once, and the decline has since been gradual to the basis of 33 cents.

I give you the cost of making a pound of salicylic acid here:

Carbolic	$0.18
Caustic soda	.0225
Carbonic acid	.0225
Sulphuric acid	.005
Wages	.053
Coal	.0105
Interest on plant	.0201
Selling	.033
Total	.3466

I simply can not live and pay the wages I do and compete with the labor of Germany. My wages average $1.50 per man. In Germany 1 mark per day is paid. I asked for 25 per cent ad valorem before the Committee on Ways and Means. They gave 10 cents, which is better. If you can have this retained, you will help out a struggling manufacturer.

Yours, respectfully,

W. S. MCFARLAND.

Senator SEWELL, *United States Senate.*

Mr. SEWELL. I do not care to take up the time of the Senate any longer on the subject, Mr. President.

The VICE-PRESIDENT. The Chair will inquire of the Senator from Iowa whether his motion was simply to strike out the committee amendment as to the word "salicylic" alone, in paragraph 452?

Mr. ALLISON. I wish to restore, in paragraph 1, line 3, the words "salicylic acid, 10 cents per pound."

The VICE-PRESIDENT. That has been agreed to. The Chair is referring to paragraph 452.

Mr. ALLISON. There I desire to strike out merely the word "salicylic."

The VICE-PRESIDENT. The Senator from Iowa moves to strike out the amendment heretofore proposed by the committee, in paragraph 452, inserting the word "salicylic," in line 20, on page 161, on the free list. The Senator from Missouri [Mr. VEST] calls for the yeas and nays upon that amendment.

Mr. VEST. Let us understand this, Mr. President. What was said to have been agreed to in the first paragraph?

The VICE-PRESIDENT. The paragraph under discussion is paragraph 452, on page 161.

Mr. JONES of Arkansas. But that was in connection with paragraph 1. The proposition was to disagree to the amendment of the committee striking out the words "salicylic acid, 10 cents per pound," in paragraph 1, and in the same connection the paragraph in the free list was taken up. The two ought to be acted upon together. The vote may as well be taken on disagreeing to the amendment in paragraph 1 and on disagreeing to the committee amendment inserting "salicylic" in the free list.

The VICE-PRESIDENT. The first amendment of the committee, striking out the words "salicylic acid, 10 cents per pound," in paragraph 1, was rejected, and the Senator from Iowa [Mr. ALLISON] now asks that the amendment proposed by the committee, in line 20, paragraph 452, page 161, putting salicylic acid on the free list, may be disagreed to.

Mr. ALLISON. That is the situation now. If Senators, however, desire to test the sense of the Senate by taking the yeas and nays upon both questions, I have no objection.

Mr. VEST. Let the vote be taken on both propositions together.

Mr. ALLISON. Very well; let it be taken on both propositions,

disagreeing to the amendment of the committee in line 4, on page 2, paragraph 1, and also disagreeing to the amendment of the committee in paragraph 452, relating to salicylic acid.

Mr. BERRY. As I understand, the question then is on agreeing to the amendments reported by the committee, to strike out "salicylic acid" from the House bill.

Mr. MILLS. Thereby placing it on the dutiable list.

Mr. BERRY. It is already on the dutiable list in the House bill, and the committee reported in favor of striking it out, thereby putting it on the free list. Those who want it on the free list will then vote "yea," in favor of the committee amendment.

The VICE-PRESIDENT. On this question the yeas and nays have been demanded.

The yeas and nays were ordered.

Mr. PETTUS. We do not understand the question. As I understand it, the Senator from Iowa [Mr. ALLISON] moves to strike out "salicylic acid, 10 cents per pound," in paragraph 1, so as to restore the duty, and then moves to strike "salicylic acid" from the free list. That is what it amounts to.

Mr. JONES of Arkansas. If I may be permitted a word of explanation, as the Senator from Alabama [Mr. PETTUS] raises the question, the committee amendment was to strike out the words "salicylic acid, 10 cents per pound," in paragraph 1. The committee propose to withdraw the amendment striking out those words, and also to withdraw the amendment inserting "salicylic acid" on the free list.

The Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH], but I transfer that pair to the Senator from Illinois [Mr. MASON], and vote "nay."

Mr. GRAY (when his name was called). I am paired with the senior Senator from Illinois [Mr. CULLOM]. If he were present, I should vote "yea."

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "yea."

Mr. MALLORY (when his name was called). I am paired with the junior Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "yea."

Mr. MORGAN (when his name was called). I am paired with the senior Senator from Pennsylvania [Mr. QUAY]. If he were present, I should vote "yea."

Mr. MORRILL (when his name was called). I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote. I make this announcement for the day.

Mr. WELLINGTON (when his name was called). I have a general pair with the Senator from North Carolina [Mr. BUTLER]. In his absence, I withhold my vote.

The roll call was concluded.

Mr. CLARK (after having voted in the negative). I am paired with the Senator from Kansas [Mr. HARRIS], and voted without noting his absence from the Chamber. I transfer that pair to the Senator from Nevada [Mr. JONES], and will allow my vote to stand.

The VICE-PRESIDENT. The Senator from Nevada has voted.

Mr. CLARK. Then I withdraw my vote.

Mr. PENROSE (after having voted in the negative). I am informed that the junior Senator from Delaware [Mr. KENNEY], with whom I am paired, is absent, and I therefore withdraw my vote.

Mr. ALLISON (after having voted in the negative). I voted inadvertently, being paired with the Senator from Missouri [Mr. COCKRELL]. I suggest to the Senator from Delaware [Mr. GRAY] that we transfer our pairs, so that the Senator from Missouri [Mr. COCKRELL] will stand paired with the Senator from Illinois [Mr. CULLOM], which will allow the Senator from Delaware and myself to vote, and I will allow my vote to stand.

Mr. GRAY. Under that arrangement I vote "yea."

Mr. MILLS. I am paired with the Senator from New Hampshire [Mr. GALLINGER]. If he were present, I should vote "yea."

Mr. TURNER. I am paired with the Senator from Wyoming [Mr. WARREN]. If he were present, I should vote "yea."

Mr. COCKRELL. I vote "yea."

Mr. BERRY. The Senator's pair has been transferred.

Mr. ALLISON. I have transferred my pair with the Senator from Missouri [Mr. COCKRELL] to the Senator from Illinois [Mr. CULLOM].

Mr. COCKRELL. Very well. Then I withdraw my vote. I should vote "yea" if not paired.

The result was announced—yeas 20, nays 30; as follows:

YEAS—20.

Allen,	Clay,	Mitchell,	Tillman,
Bacon,	Gray,	Murphy,	Turpie,
Berry,	Heitfeld,	Pasco,	Vest,
Caffery,	Jones, Ark.	Pettus,	Walthall,
Chilton,	McLaurin,	Roach,	White.

NAYS—30.

Allison,	Foraker,	McEnery,	Spooner,
Baker,	Frye,	Nelson,	Stewart,
Burrows,	Gear,	Perkins,	Teller,
Carter,	Hawley,	Platt, Conn.	Thurston,
Chandler,	Hoar,	Platt, N. Y.	Wetmore,
Dubois,	Jones, Nev.	Pritchard,	Wilson.
Elkins,	Lodge,	Sewell,	
Fairbanks,	McBride,	Shoup,	

NOT VOTING—39.

Aldrich,	Gallinger,	Lindsay,	Pettigrew,
Bate,	George,	McMillan,	Proctor,
Butler,	Gorman,	Mallory,	Quay,
Cannon,	Hale,	Mantle,	Rawlins,
Clark,	Hanna,	Martin,	Smith,
Cockrell,	Hansbrough,	Mason,	Turner,
Cullom,	Harris, Kans.	Mills,	Warren,
Daniel,	Harris, Tenn.	Morgan,	Wellington,
Davis,	Kenney,	Morrill,	Wolcott.
Faulkner,	Kyle,	Penrose,	

So the amendments of the committee in paragraphs 1 and 452 were rejected.

The VICE-PRESIDENT. The effect of the vote is to leave salicylic acid dutiable at 10 cents a pound, as prescribed in the first paragraph.

Mr. ALLISON. Is it understood that the effect of the vote just taken carries with it the striking out of the word "salicylic" in the free list? I understood that to be the effect of it.

The VICE-PRESIDENT. That is correct. At the suggestion of the Senator from Arkansas [Mr. JONES] and the Senator from Missouri [Mr. VEST], the two votes were taken together; and both the amendments of the committee have been disagreed to.

Mr. CAFFERY. On the 17th of this month I offered a resolution calling on the Secretary of the Treasury to furnish the Senate the evidence and information on which drawback allowances on sugar contained in Circular No. 102, of June 25, 1896, division of customs, were based. I had been informed that the work required some considerable time. I did not think when I offered the resolution that it would require more than two or three days to take copies of all the evidence and the written information or to gather whatever verbal information they could, but I have been disappointed in that matter, and I propose now to make a statement of the information which I have gathered.

The VICE-PRESIDENT. Will the Senator from Louisiana permit the Chair to interrupt him? A communication was laid before the Senate this morning from the Secretary of the Treasury covering the subject referred to by the Senator from Louisiana, and was referred to the Committee on Finance, and ordered to be printed.

Mr. CAFFERY. Then I will state the information which I gathered from the parties as well as information gathered by Mr. Holt, who first informed me that in his opinion the Treasury statement was erroneous.

Mr. ALLISON. I suggest if it would not be well for the Senator from Louisiana to see the statement in print before he makes his remarks. Does the Senator desire to go on this morning?

Mr. CAFFERY. I simply desire to state what I gathered myself. I have not seen the statement. So long as I have started on the work and as it will not take me long, I propose to finish it.

The Treasury statement is based upon information derived mostly from refiners. Among those refiners are members of the sugar trust. It is safe to say that nearly all the refiners, with perhaps rare exceptions, are either of the trust or under the trust. Therefore I take it that any statement emanating from the refiners is practically a trust statement.

It was stated to me by Mr. Buynitzky in the customs division of the Treasury Department——

Mr. LINDSAY. I will ask the Senator from Louisiana if I understand him correctly that the Treasury statements were based upon information received from refiners?

Mr. CAFFERY. Yes, sir.

Mr. LINDSAY. I ventured to express that opinion while the sugar schedule was under consideration, and the Senator from Iowa [Mr. ALLISON] characterized my statement as absurd. I suppose the Senator must be mistaken about it.

Mr. CAFFERY. I think the Senator from Iowa is mistaken.

Mr. ALLISON. My attention was diverted for a moment. I did not hear what the Senator from Louisiana said. Indeed, I did not know that the sugar schedule was up.

Mr. LINDSAY. It is always up.

Mr. CAFFERY. Drawbacks are up, and drawbacks have something to do with raw sugar, and it is near enough for Senatorial discussion.

Mr. ALLISON. If I knew what the Senator from Louisiana had stated, I might be able to answer the Senator from Kentucky.

Mr. LINDSAY. Will the Senator from Louisiana please repeat what he stated?

Mr. CAFFERY. I stated that I learned at the Treasury Department that the statements in the Treasury drawback circular as to the number of pounds of raw sugar it took to make a pound

of refined at a certain degree or any degree were practically obtained from the sugar refiners, and among those refiners were members of the sugar trust, especially Mr. Havemeyer.

Mr. ALLISON. One can go into the Treasury Department and ascertain almost anything, I suppose. I should be glad to know from what authority the Senator acquired that information.

Mr. CAFFERY. I obtained the information from Mr. Buynitzky.

Mr. ALLISON. Is he an employee of the Treasury Department?

Mr. CAFFERY. He is; and I was told that he has been there over twenty-nine years.

Mr. JONES of Arkansas. He is an expert there.

Mr. CAFFERY. He is a sugar expert, and he had a great deal to do with the matter of fixing the number of pounds on which the trust was entitled to a drawback when it exported sugar.

Mr. ALLISON. If the Senator will allow me to interrupt him for a moment, I will state that the substance of what I said—or what I meant to say—was that this matter was disposed of by the then Secretary of the Treasury, Mr. Carlisle, and that I had no doubt he procured the information from proper sources. I have no doubt now that that is true. If Mr. Buynitzky knows differently, of course that is another matter.

Mr. WHITE. For information, I should like to inquire of the Senator from Iowa whether he thinks refiners would constitute a proper or improper source?

Mr. ALLISON. Will the Senator from Louisiana allow me?

Mr. CAFFERY. Certainly.

Mr. ALLISON. I will answer the Senator from California with great pleasure. If I were endeavoring to ascertain correctly the number of pounds of raw sugar required to make a pound of refined, I would procure that information from every available source. I suppose a refiner would know something about it, but I would not rely upon the refiner for my information.

Mr. LINDSAY. With the permission of the Senator from Louisiana, the point I wish to make is that when the Senator from Iowa disputed my figures and exhibited figures in opposition thereto, he said they came from the Treasury Department, over which my friend the then Secretary of the Treasury presided, and I expressed the opinion that those figures were based upon facts furnished by the sugar refiners, and my friend said that my opinion was absurd.

Now, it turns out that at least one expert in the Treasury Department states that the facts were furnished by the sugar refiners. I do not pretend to say he is right. I only wish to vindicate myself against having expressed an opinion that might be characterized as an absurdity.

Mr. ALLISON. I was trying to defend the Secretary of the Treasury from the imputation that he would rely solely and only upon sugar refiners for his information.

Mr. CAFFERY. Will the Senator permit me?

Mr. ALLISON. In one moment. My information is that the experts of the New York custom-house, who certainly ought to know something about this matter, and the chemists connected with the Government there, provided the basis upon which the calculation was made. I may be mistaken, but I trust I will relieve the Secretary of the Treasury from the imputation which the Senator from Kentucky and the Senator from Louisiana now cast upon him——

Mr. CAFFERY. Wait until I get through my statement.

Mr. ALLISON. That he did not rely upon his own experts' information, but relied on outside parties.

Mr. LINDSAY. Mr. President——

The VICE-PRESIDENT. The Senator from Louisiana is entitled to the floor. Does he yield to the Senator from Kentucky?

Mr. CAFFERY. I think it perhaps better that I should state what I wish to say in this connection, for I had not finished my statement. I had got up to the sugar refiners. Then after I make the full statement I will yield to the Senator from Kentucky.

I had stated that this expert had told me that this information was derived from sugar refiners, but that sugar refiners had not been exclusively the source of the information; that the inquiry was conducted, so far as he knew, by Mr. Ayre, and that Mr. Ayre was in New York, and that he was told that he went in a refinery and made an examination there.

Mr. ALLISON. It was a great crime for him to go to a refinery when engaged in an important investigation of this sort.

Mr. CAFFERY. If the Senator from Iowa is of the opinion that I am attempting to cast any aspersion whatever upon the method of the examination, he is entirely mistaken. I am reciting the bare facts. I do not say that the Treasury officials acted improperly or acted in any other manner than they were justified in acting. I think before I get through my statement he will perceive that it was proper for them to get this information from refiners, as they could give correct information if they wanted to.

After making as full a statement of the facts as he knew how, Mr. Buynitzky told me that the result of 92 pounds from 96-test sugar was derived by an averaging of the different statements of the refiners. Some said 92 pounds; some put it as high as 94 pounds, and the party, he said, who put it at 94 pounds was a Mr. Cunningham, of Texas, a refiner in that State, and the only independent refiner I know of. Mr. Cunningham was quoted as stating that out of 100 pounds of sugar testing 96 degrees in saccharine strength he made 94 pounds of sugar, or that was his estimate. There were various estimates given by refiners, and I think anybody who knows anything about sugar knows that the statements coming from the refiners as to the number of pounds to make a pound of refined are to be considered, as they know the business, and can, if they will, give correct results.

This gentleman showed me by a calculation in my presence that taking 92 pounds of refined sugar as the basis of the result, or the output of 100 pounds of raw sugar of 96 test, it took 108.7 pounds of raw sugar to make 100 pounds of refined sugar at 96 test. I then asked him what became of the residue. He said it was lost; it went into sirup. Right at that point is the fatal defect of the Treasury statement. In 100 pounds of sugar testing 96 degrees of sugar there are 96 pounds of sugar. If it takes 108.7 pounds of that sort of sugar to make 100 pounds of refined at 96 degrees, then there are about 4½ pounds of sugar to account for. There are 4½ pounds of sugar not sirup, and there is only a pound and a fraction of that sugar allowed for in the Treasury circular. When you take 108 pounds of sugar at 96 degrees as the gross number of pounds necessary to make 100 pounds of refined, you will perceive that the Treasury circular has credited the Government with 1.23 pounds; that is, as the difference between 108.7 and 107.47.

That statement is erroneous upon its face. It does not require an expert to know it. I do not know much about polariscopes, if anything; I never looked through one in my life; it is a mere mechanical machine; but I know that there are more than 92 pounds of sugar in 100 pounds of centrifugal sugar at 96 test. That is the sort of sugar I make. It is a good sugar to eat. There are not 4 pounds of loss in it. There are 4 pounds of sirup and sugar in it, but it is not dirt.

Mr. President, from this statement it appears that the Treasury circular is made up purely from the evidence of refiners and some other sources not known by me. I do not know how they could get any evidence from other sources. A pure theoretical calculation as to the amount of loss in pounds below and above 96 is made by the Department. Take it from 96 degrees down. You will see that there is an allowance of 1.89, 1.86, and 1.87 between degrees. This is a theoretical calculation, and so Mr. Buynitzky told me.

He said the whole investigation was made upon 96 test. There was no investigation made of any other test—none whatever. It is evident that they made this sort of a calculation: They divided the loss of 4 pounds among these different degrees, above 96 to 100, and gave each one 1.87, 1.87, 1.86, and so on; and it runs all the way down. Everybody knows that the loss in a lower degree of sugar is much greater than in a higher degree, and so it is perceived that that is a pure theoretical calculation not based upon any evidence whatever.

Mr. President, take the other statement. Mr. ALDRICH says that a pound of raw German sugar, at a certain test, will cost within 1 mill of the refined sugar. In other words, at the test he takes, the number of pounds of raw sugar required to make a pound of refined costs 2.29 cents and the refined costs 2.30. Is not that statement absurd upon its face? Is a refiner going to buy raw sugar within 1 mill a pound of the refined when it costs about fifty one-hundredths of a cent to refine it, and there is only a difference of one point—not a cent, but one point; the difference between 2.29 and 2.30—and he says that is the basis upon which he makes the calculation.

It is absolutely absurd. He says in his own statement before the Senate that the refiner was confronted with the condition of affairs where the raw sugar that it took to make a pound of refined sugar was within one point of the value of the refined, and yet he says that it costs fifty points to refine that sugar. What refiner or anybody else on earth engaged in the sugar business would buy raw sugar at any such figure? He would lose forty-nine one-hundredths of a cent on every pound he refined.

This whole circular is based upon those erroneous statements. There is not any accounting for the sugar in the 96 test. He accounts for the waste, taking 4 pounds off. When you go down to 96 pounds of crystallizable sugar in a hundred pounds of sugar, that is as far as you can go with the loss. The balance is sugar. They make 92 pounds, and they call the balance invert sugar. They say it is only equal to one pound and a fraction of sugar. Of course the amount of differential goes up in favor of the trust according as the degrees decline.

I wish to offer an affidavit made by Mr. Holt of his interview with Mr. Buynitzky, and to have it incorporated in the RECORD as a part of my remarks.

The VICE-PRESIDENT. Without objection, the affidavit will be printed in the RECORD.

The affidavit is as follows:

CITY AND COUNTY OF NEW YORK, *ss:*

Byron W. Holt, being duly sworn, says:

I am 39 years of age and reside at 128 West One hundred and thirty-seventh street, New York, N. Y. I have lately had occasion to inquire as to the basis on which drawbacks are allowed on refined sugar exported from this country, and as a result of my investigation I submit the following statement:

On June 16, 1897, between the hours of 9 and 11 o'clock a. m., I visited the United States Treasury building at Washington, D. C. I called upon the customs division and asked for and obtained four copies of Department Circular No. 102, entitled "Drawback on sugar and sirup." I made inquiry as to the reports of commissions concerning frauds perpetrated upon our Government by means of discoloring and in other ways preparing sugars for export to our country, so that they could pass through our custom-house upon payment of a smaller amount of duty than is proper.

Mr. Comstock, of the customs division, directed me to the special-agency department. Being unable to obtain the reports desired, I again called upon Mr. Comstock, of the customs division, to make inquiry in regard to the way in which the tables of Treasury allowances for drawbacks upon sugar were made. Mr. Comstock told me that they were made very carefully by a number of experts, who spent several months' time in getting statements from refiners and others, and who secured special permission to visit certain refineries and observe the process of refining sugar. Mr. Comstock did not hesitate to say that the tables were extremely accurate. I continued to ask questions until Mr. Comstock said: "Well, now, if you want to know all about sugar, I will have to turn you over to Mr. Buynitzky." Before introducing me to Mr. Buynitzky, Mr. Comstock said: "He will tell you all about sugar in six months."

I accompanied Mr. Buynitzky to his desk. He began to explain to me the way the tables of allowances were made. He said that the number of pounds of raw sugar allowed in the first table of Department Circular No. 102 did not represent the exact number of pounds used to make 100 pounds of hard refined sugar, but was intended to give the number of pounds which would represent in value the amount of raw sugar actually used in making 100 pounds of hard refined sugar, after deducting an allowance for the value of the sugar in the sirup. He then did some figuring on a slip of paper (which I retained) to show me how the allowance was made for the refined sugars made from raw sugars testing 96 degrees. He said that from 100 pounds of raw sugar testing 96 degrees there were made 92 pounds of hard refined sugar, and that there was left over one-half gallon of sirup. He divided 10,000 by 92 to find how much raw sugar was required in practice to make 100 pounds of refined sugar.

This he found to be 108.7 pounds. He then said that as there were 4 pounds of sugar in a gallon of sirup, there were 2 pounds in one-half gallon. He subtracted 2 from 108.7, leaving 106.7 pounds. He said as these 2 pounds of sugar were mixed in the sirup, they did not have the full value of crystallized sugar. He first said that the sugar in the sirup was estimated to have only half as much value as crystallized sugar. He therefore started to add 1 to 106.7, but, observing that this would not give him the Treasury allowance, said that it was not exactly one-half of the value which was lost, because the sugar was mixed in the molasses, but a little more than one-half. He said: "We have forg tten just now the exact proportion of the value which was deducted, but it must have been a little more than one-half the value." He then added seventy-seven one-hundredths to 106.7, which made 107.47 pounds. He said they must have concluded that seventy-seven one-hundredths of a pound was the proper amount to add to obtain the correct allowance.

Mr. Buynitzky said that the tables were prepared by a commission of experts, of which Col. Ira Ayre was the most important member. He said Mr. Chance and Mr. Leary were also members of this committee, and that he (Mr. Buynitzky) was secretary. After reflection he said: "I have been with so many committees that I am not certain but that I was a member of this committee; perhaps I was; yes, I think you can put me down as a member of this committee. I think I signed the report as a member of the committee." He further said that Mr. John C. Sage was what might be called an "advisory member" of the committee. He said that Mr. Sage in fact advised the committee in the capacity of a sugar expert. He said he believed that Colonel Ayres visited a refinery, but made no definite statement as to whether or not any other members of the committee visited refineries. He said that he thought that Mr. Ayres did not get much information in the refinery of assistance in making up the Treasury tables. He said that the committee obtained sworn statements from eight different refiners as to the number of pounds of raw required to make a certain amount of refined, as to the kind of sugar used by each refinery, and as to the proportions in which the different grades and different kinds of sugar were mixed together in each refinery to produce the refined sugar. He said that one of these statements was made by Mr. Havemeyer.

I asked Mr. Buynitzky if those eight statements could be made public. He said, "No; they are not public papers. Some of them were obtained only upon the pledge of secrecy." Mr. Buynitzky said that the 92 pounds of hard refined sugar made from 100 pounds of raw sugar testing 96 degrees represented the average of the eight statements, and that the commission, after considering the eight statements, fixed upon 92 pounds as the average amount of refined sugar made from 100 pounds of 96-degree raw sugar. He said that he did not think it was the proper figure, and that when he was making estimates for his own personal information he always took 93 instead of 92 pounds as the amount of hard refined sugar made from 100 pounds of 96-degree sugar. He said that possibly the correct figure was somewhere between 92 and 93, but that he was never convinced that it should be 92. He said the statements made by the refiners were all made under oath, and the Government having no other sufficient information and no way of disproving the statements had to accept them. He said: "Of course, if the refiners prevaricated, that concerns their consciences. We have simply done the best we could."

I asked Mr. Buynitzky how the Government could tell, when it was paying drawback duties upon refined sugars, what grade of raw sugars were used in making the refined sugar, and how, if there should be an advantage in claiming that the refined sugar was made from low-grade raw sugars, the Government could prevent the exporting refiner from claiming that the refined sugar which he was exporting was made from low-grade raw sugars. Mr. Buynitzky said that the refiner had to make statements under oath, and that if his statements were consistent there was no way of preventing such frauds. He said, however, that records were kept of all grades and value of sugar imported by refiners, and that if a refiner made a statement which did not agree with these records, he could be found out. He said of course if he remembers the kind of sugars which he imported he would have no trouble in making the Government accept a false statement. I suggested to Mr. Buynitzky that a refiner might keep a record of all the kinds of sugar and amounts imported of each kind and their value, and that then he would have no trouble in making consistent statements when he wanted to export sugar. Mr. Buynitzky said that they would have to keep a separate set of books for that purpose.

Mr. Buynitzky appeared to be getting nervous at the kind of questions which he was called upon to answer. He at last asked me for what purpose I wished this information, and if I was going to write it up. I told him I was not on any newspaper, but that I might make some use of the information. I told him that Senator ALLISON had stated that the sugar schedule was based upon the Treasury Department figures, and that therefore it was necessary to make sure that these figures were accurate. I said that fifty or sixty million dollars a year was at stake, and that a small inaccuracy in these figures might make a difference of several millions of dollars to the Government and to the refiners. Mr. Buynitzky thought that the tables were not accurate enough to serve as a basis for a sugar schedule. He said that the commission had received very little information concerning amounts of low-grade sugars required to make 100 pounds of raw sugar, and that the allowances made for low-grade sugars were based upon the allowance for 96-degree sugar, which was the most important sugar, and upon which the commission had most information. He thought that 106.7 pounds, rather than 107.47, should serve as a basis upon which to construct a sugar schedule. This, he said, was about eight-tenths of 1 per cent less than the allowance made by the Government.

Before leaving I told Mr. Buynitzky that I was not in favor of giving any differential to the sugar trust, and that I was making inquiry in regard to the Treasury tables because I thought that, based upon these tables, the proposed sugar schedule would give the sugar refiners even more of a differential than most protectionists were willing to allow. Mr. Buynitzky expressed surprise that I was not in favor of allowing any differential to refiners, and asked me if I did not believe in protection. I told him that I did not, but that even if I did I should not believe in giving the refiners a higher differential than was intended. He said that he believed in giving the refiners a substantial differential and that he believed in protection. He said: "This is a protection Administration and the high man, over all of us, Mr. McKinley, is a protectionist."

I told him that I presumed that he and the other members of the commission had made the tables as nearly accurate as they could from the information at hand, but that I did not believe the statements of the refiners. He again said that he did not fully believe the tables, but that they were the only statements which the Government had, and that the sugar refiners kept their secrets.

I thanked him for the information which he had given me and started to leave the room. He walked with me to the desk of Mr. Comstock. Mr. Comstock asked if I now knew all about sugar. I told him that I had received considerable information from Mr. Buynitzky in considerably less than six months' time.

BYRON W. HOLT.

Sworn to before me this 22d day of June, 1897.

JOHN SPRUNT HILL,
Notary Public, New York County.

Mr. CAFFERY. I also offer a statement in connection with this affidavit. I have looked over this affidavit very carefully, and in every particular it agrees with my recollection of what Mr. Buynitzky told me. I may not have stated everything that Mr. Buynitzky told me, but the whole of his conversation with me in regard to this matter is contained substantially in the affidavit of Mr. Holt, which I corroborate and say it is the statement that Mr. Buynitzky made.

Mr. Holt is the gentleman who has been here in behalf of the Reform Club, taking an interest in the tariff.

The VICE-PRESIDENT. Without objection, the statement will be printed in the RECORD.

The statement is as follows.

THE SUGAR DRAWBACK FRAUDS.

All calculations as to the differential or amount of protection to sugar refiners in all of the sugar schedules thus far proposed by the present Congress are based upon Department Circular No. 102, issued by the customs division of the Treasury Department in 1893. This circular is entitled "Drawback on sugar and sirup," and fixes the number of pounds of raw sugar of different degrees allowed by the Treasury Department in the payment of drawback duties to make 100 pounds of refined sugar.

Senator NELSON W. ALDRICH said in the Senate on May 25, 1897:

"As a basis for the calculation of the number of pounds of sugar of each polariscope test required to make 100 pounds of refined sugar, I have taken the statement of the Treasury Department promulgated June 25, 1893, Department Circular No. 102. I assume that there will be no question as to its accuracy. The computations have been confirmed by various statements furnished by the appraiser's office in New York."

Senator WILLIAM B. ALLISON said in the Senate on June 14, 1897:

"I was about to state that I arrived at these figures by taking the number of pounds of raw sugar which are required to produce a given number of pounds of refined sugar, * * * according to the absolutely accurate test made by Secretary Carlisle as Secretary of the Treasury, and produced by him, as I have been told, after the most accurate calculations of the best chemists and experts obtainable on the sugar question."

The accuracy of the Treasury tables of allowances thus becomes of great importance. If they are incorrect to any considerable extent, millions of dollars may by the new tariff law be unintentionally taken from the sugar consumers and given to the sugar refiners, or vice versa. If, after careful investigation, it seems probable that the tables are very far from accurate, it would then appear that all three of the proposed sugar schedules should be discarded.

We will first examine the circular itself. Here is the first table, to which is added a column showing the estimate of allowance for each degree decrease in strength:

Test of raw sugar used.

Degrees.	Allowance for—		Degrees.	Allowance for—	
	100 pounds hard refined.	Waste.		100 pounds hard refined.	Waste.
	Pounds.	*Pounds.*		*Pounds.*	*Pounds.*
99	101.87	1.87	86	126.14	1.87
98	103.73	1.86	85	128.01	1.87
97	105.60	1.87	84	129.88	1.87
96	107.47	1.87	83	131.74	1.86
95	109.34	1.87	82	133.61	1.87
94	111.20	1.86	81	135.48	1.87
93	113.07	1.87	80	137.35	1.87
92	114.94	1.87	79	139.21	1.86
91	116.81	1.87	78	141.08	1.87
90	118.67	1.86	77	142.95	1.87
89	120.54	1.87	76	144.82	1.87
88	122.41	1.87	75	146.68	1.86
87	124.27	1.86			

We observe first that, beginning at the top of the second column, either 1.67 or 1.86 pounds have been added to each allowance to get the allowance for the next lower degree. It would not appear that these figures were made "after the most accurate calculations of the best chemists and experts obtainable on the sugar question," for one does not need to know much about sugar to know that there is generally far more waste material between each 2 degrees of low-grade than between each 2 degrees of high-grade sugars. When raw sugars test 97 or 98, they usually contain a little water and invert sugar (glucose), but very little ash or dirt. Practically all of the crystallizable sugar can be easily obtained. When raw sugars test below 90, they usually contain considerable ash and dirt, and it is not easy to get out anything like the full amount of crystallizable or hard sugar known to be there.

We next observe that drawback duties are also allowed on "soft refined" sugars and on sirups. As soft refined sugars and sirups are usually made from the waste or by-products of the hard refining process, it would appear from this circular that it is possible for a refiner to get back, when he exports hard refined sugar, 99 per cent of all the duty paid on the raw material used, and to get back, when he exports the soft refined sugar and the sirup made from these same raw materials, an additional amount of duty. It seems probable that the total drawback duty received in this way might greatly exceed the full duty paid on the raw materials used.

Again we observe that, calculated from this Treasury circular, the cost of a sufficient quantity of raw sugars to make 100 pounds of refined sugar is the same as the cost of the 100 pounds of refined sugar—leaving nothing for the cost of refining. This was the result reached by Appraiser Sharretts, whose statement appears in the CONGRESSIONAL RECORD of June 11, 1897. He found that on June 9, 100 pounds of German granulated sugar was worth in New York in bond $2.30; and that 120.54 pounds of raw sugar testing 89 degrees was then worth $2.29. We were at that time importing both of these sugars.

What fools we must be to import raw sugar when we can import refined at practically the same price! Senator ALDRICH undoubtedly had these Treasury tables in mind when he on May 25 made the absurd statement that "for months raw beet sugar and German granulated have sold on an absolute parity of value, taking only into account the percentages of pure sugar contained in each." How kind it is of the German refiners to sell refined sugar at the same price which they pay for raw. It is perhaps as a reward for this kindness that the German Government gives them a net bounty of 7 or 8 cents on every 100 pounds of refined sugar exported, this being, according to Senator ALDRICH and our Treasury tables, all the German refiner gets for work which Senator ALDRICH estimates to cost 50 cents.

From the above observations it is clear that on its face something is wrong with the Treasury Department circular. It appears to have been constructed not by experts, but roughly and carelessly, and without regard to consistency or to facts.

We shall now look outside of it for evidence of its accuracy. Senator ALDRICH claims to have substantiated the accuracy of these tables by two chemical tests. He said on May 25:

"For illustration, I will take an analysis of sugar testing 88 degrees, made by the chemist in charge of the sugar laboratory in New York. This sugar contained seventy-four one-hundredths of 1 per cent of ash, 4.13 per cent of invert sugar, and an outturn of 81.85 per cent of crystallizable sugar.

"Of this sugar it would take 122.17 pounds to make 100 pounds of refined sugar. The Treasury estimate is 122.41 for this test. It will be noticed that this sugar contained 4.13 per cent of invert sugar. This invert sugar becomes sirup in the process of refining, and is worth from one-half to three-fourths of a cent per pound. The result in this case would probably be a fair estimate of the average result of the value of the residuum of invert sugar contained in all cane sugars testing in the neighborhood of 89 degrees. The value of this sirup would not appreciably affect differentials.

"The same chemist made at the same time a test of 94-degree centrifugals, which showed forty-two one-hundredths of 1 per cent of ash and 2.47 per cent of invert sugar and an out-turn of 90.27 per cent of refined sugar. In this case the amount of 94-degree test sugar required to make 100 pounds of refined would be 110.77, as against 111.20, the amount named in the table, with 2¼ pounds of sirup.

"It must be evident from these examples that the Treasury statement shows the entire amount of crystallizable sugar that can be obtained in each case from 100 pounds of raw."

In his first sample the sugar tested 88 degrees. That means that 88 per cent of this sample was crystallizable sugar. His chemist got out only 81.85 per cent of crystallizable sugar. As neither the ash nor the invert sugar was a part of the 88 per cent, this chemist loses, apparently without observing it, 6.15 per cent of his crystallizable sugar. In the second sample 3.73 per cent was lost in the same way. If his chemist informed him that these amounts of crystallizable sugar disappeared in some mysterious manner, Senator ALDRICH is not to blame for saying that the value of the sirup made from the invert sugar would not appreciably affect differentials. If, however, his chemist made no mention of the loss, it seems strange that Mr. ALDRICH himself did not discover this oversight before he used the figures. What kind of a chemist did he employ anyway? Of what sugar laboratory is he in charge?

Considerable information has been obtained in regard to these Treasury tables from recent interviews with Mr. S. M. Buynitzky. Mr. Buynitzky is the sugar expert of the Treasury Department, and was one of the four or five on the committee which made the Treasury tables. Mr. Buynitzky says:

(1) That the Treasury tables do not represent the full number of pounds of raw sugar required to make 100 pounds of hard refined. He says that they allow something for the value of the residuum.

(2) That eight refiners submitted statements to the committee, and that the tables were constructed by taking an average of these eight statements.

(3) That these statements related almost entirely to 96-degree sugar.

(4) That the allowance for other degrees are based upon that for 96-degree sugar.

(5) That according to the eight statements submitted 92 pounds of hard refined sugar could be made from 100 pounds of raw sugar testing 96 degrees.

(6) That the statements varied from less than 92 to over 94 pounds.

(7) That the statement containing over 94 pounds came from Cunningham, of Texas.

(8) That he never believed the refiners' statements, and that he always estimated that 93 to 93½ pounds of hard refined could be made from 100 pounds of 96-degree sugar.

(9) That the principal member of the committee, Mr. Ira Ayer, was permitted to visit a refinery and watch the process of refining, but that he probably got no valuable information there for use in making up the table of allowances.

(10) That the sugar refiners keep their secrets.

(11) That though their statements were made under oath he does not believe them.

(12) That it is easy for sugar refiners to make false statements when exporting refined sugar as to the kind or kinds of raw used in making such refined sugar, and that the Government has no certain way of detecting the falsity of these statements.

(13) That the Treasury tables are unfit to serve as a basis for a tariff bill.

These statements of Mr. Buynitzky make interesting reading for those who have been swearing by these Treasury tables. It is evident from these statements—

First. That the Treasury tables are inaccurate, unreliable, inconsistent, and unscientific.

Second. That the principal table of allowances, and the one upon which both Senators ALDRICH and ALLISON base all of their calculations, is not what it appears upon its face to be.

Third. That the sugar trust, as stated by Senator LINDSAY, practically made its own drawback-allowance tables for the 96-degree sugar.

Fourth. That the special committee fixed the allowances for sugars testing above or below 96 degrees in a crude and unscientific way. In other words, the committee, having no data for other degrees, fixed up a table as best they could. It seems probable that they did it by dividing the number of pounds over 100 required of 96-degree sugar, as the trust represented, to make 100 pounds of hard refined by 4, the number of degrees between 96 and 100, and then added this quotient (1.86¼) to the allowance for each degree to obtain the allowance for the next lower degree.

Fifth. That the big refineries of the sugar trust—ten to twenty times as large as Cunningham's—do not get as much hard refined out of 96-degree raw sugar as does Cunningham's little refinery.

Sixth. That Cunningham, being as nearly out of the trust as any refiner in this country, did not have an understanding with the trust refiners as to the kind of statements which were to be submitted, and that therefore his statements were probably more nearly truthful than were the others.

Seventh. That it was unfair to the Government, if some refiners could make over 94 pounds of hard refined from 96-degree raw sugar, while others claimed to make less than 92 pounds, to take an average of the statements. By so doing, it is clear that the refiners who get the greater amounts of refined from the raw sugar can and do get back from the Government more duty than was paid upon the raw sugar used.

Eighth. That as no expert can tell, when he sees refined granulated sugar from what particular grade of raw sugar it was made, it is easy for exporting refiners to deceive the customs officials on this point, and if there is any object in so doing to claim that the refined was made from 84 or 85 degree sugar, when, in fact, 96 or 97 degree sugar was used.

There are many other reasons for believing that the Treasury allowances are grossly inaccurate. Since the formation of the sugar trust in 1887 no Government official or outsider has been permitted to see the trust's books or to obtain information as to the cost of refining or the amount of absolute waste in different kinds and grades of sugar.

When the New York senate committee was investigating the sugar trust in 1888, the officers refused to produce the books and said that they did not know where they were at that time, but that they were probably in New Jersey. Other investigating committees met with the same fate. The officers refused to give census statistics to the Census Department, and baffled the efforts of the Attorney-General to obtain access to the books until Carroll D. Wright advised the Attorney-General to give up the fight, as it was too late to make use of the statistics even if they should be obtained.

The officers of the trust do not defy State and national laws and risk their personal freedom in their attempt to guard secrets which are considered of little value or importance.

Trust refiners, when they have appeared before the Ways and Means Committee or the Senate Finance Committee to ask for protection, have carefully refrained from making statements as to the loss in refining. In 1890 Mr. E. C. Knight, of Philadelphia, appeared somewhat unexpectedly before the Ways and Means Committee. He was not then in the trust, and inadvertently made some statements which do not substantiate the Treasury figures. Here is the first part of his statement:

"Mr. Chairman and gentlemen, I came here in the capacity of a listener, not to say anything myself; but as I see nobody else prepared to speak in the interest of sugar refiners, I will say a few words to the committee.

"I have had no conversation with other sugar refiners, and am expressing entirely my own ideas, from my own knowledge of the business, having been at it a good many years.

"I am going to assume as a basis that our house manufactures 5 per cent of all the refined sugar made in this country. I do not think that we come quite up to that, but I will take that as a basis. On that basis, if we melt 500,000 pounds a day, costing 5 cents a pound, the raw sugar costs us $25,000 a day, and on that 500,000 pounds we pay 2 cents a pound duty to the Government. In refining that raw sugar there is 4 per cent of impurity, a sample of which I have here. [Exhibiting it to the committee.] This 4 per cent of impurities costs us $1,000 a day, and, assuming that we work three hundred days in the year, it costs us $300,000 a year. Now, if we have but one-twentieth of the entire refining business of the country, the total loss to refiners from this source is $6,000,000 a year.

"Mr. GEAR. You say that the loss from impurities is 4 per cent?

"Mr. KNIGHT. Yes; 4 per cent. That would be on a grade of good 90-degree sugar. If we were to manufacture the centrifugal sugars polarizing 96 degrees, the loss would not be so great."

Gen. J. Hale Sypher expressed the opinion before the Ways and Means Committee on December 30, 1896, that the total cost of refining sugar by the American Sugar Refining Company does not exceed one-fourth of a cent per pound. He said that this one-fourth cent covers waste and everything. If his statement is true, there can not be nearly as much waste as allowed by the Treasury Department.

Many sugar importers and brokers in New York and other sugar-refining cities do not hesitate to say that 105 pounds of 96-degree sugar is all that is required for 100 pounds of hard refined sugar—in addition to somewhat of sirups and soft sugars. Some of these men have friends in the refining business in this or other countries. Some of them claim to have positive information on this point. They, however, will neither state it nor permit themselves to be quoted.

In view of the above facts and statements, it appears to be certain that the Treasury tables of drawback allowances on sugar are far from accurate, and that they should not serve as a basis for a sugar tariff schedule.

Mr. CAFFERY. Mr. President, the material question to be determined in regard to the sugar schedule is, first, the number of pounds of sugar at a certain test required to make a pound of refined, and the differential allowed under the bill. When you have those two factors, as I have stated before, the price of the raw is immaterial. Protection stands out right square from the absolute differentials given in the bill, but the material point of a correct starting place, in my opinion, is first to be settled. There have been more pounds of raw sugar allowed to make a pound of refined than is actually required, and just in proportion to the extra amount of raw allowed under the bill to make a pound of refined, just in that proportion is the differential greater between the raw and the refined under the bill.

So it is with the drawback allowance. If the sugar trust

exports sugar, and gets a drawback allowance on 140 pounds of raws, as required to make the number of pounds of refined exported, when in point of fact it took only 130 pounds, the Senate will perceive the benefit given to the trust. It is not unlikely, under the operations of the pending bill, that the sugar trust will export sugar. I have made the statement, and I reiterate it, that they control the price of raw sugars made out of cane throughout the world, and the consequence of that is that they can dictate to their patrons everywhere whatever degree of sugar they want the raw sugar to be at. They can require it to be made as well at 90 as at 96, and the lower you go down in degree the higher the differential is and the more the protection to the trust.

Of course I know that what I shall say has no weight. I do not know what cast-iron arrangement has been arrived at as to a conference report, but I do know, so far as my information goes, that the essential basis of the number of pounds of raw sugar to make a pound of refined is erroneous, and upon that basis this whole schedule of protection is predicated. So far as I am concerned, I want the Senate and the country to know the enormous amount of protection in this bill to the sugar trust. I have no hope whatever of making any impression upon our friends on the other side or on the conference committee. They appear to be drilled with the rigor and discipline of janizaries, and they are bound to enact this bill at all hazards. But right at this point of the sugar trust it appears to me they ought to call a halt; they ought to investigate the matter; they ought not to give this trust more power than it already possesses, for it possesses much.

It is a dreadful power; it is a dangerous power. There is not a wholesale grocer in the United States who is not a slave to the trust, who does not sell his sugar at their command and dictation. There is not a consumer in the United States who is not in their complete power. They can raise the price of his sugar at will; and after the testimony has been adduced before the Senate that they can make sugar and defy the competition of the world, after they have been given a compensating duty upon refined of more than they pay upon the raw, I want to know why it is that after all that is done this clear twenty-hundredths of a cent a pound, with the concealed advantages in this schedule, shall be added to their already enormous advantages.

Mr. WHITE. I desire to say to the Senator from Iowa that when the item relating to coal comes up I shall make an effort to reinstate the provision of the act of March 3, 1883, which provides for a drawback upon coal imported and used as fuel on board vessels propelled by steam engaged in the coasting and foreign trade, and so on. It is impossible to frame the amendment now, as I am not aware of the rates which the committee intend to report. I call the attention of the committee to the fact that it was supposed generally that that provision was retained by the act of 1890, and it was so decided by the district court and the circuit court of appeals of the ninth circuit, but afterwards the Supreme Court of the United States, one of the judges dissenting, held that by implication the act of 1890 repealed it. I simply call attention to the matter now.

Mr. ALLISON. I will say to the Senator from California that we have that very matter under consideration, and expect in some form to allow those drawbacks. I will be very much obliged to the Senator if he will turn his attention to the preparation of a suitable provision.

Mr. WHITE. I shall do so. The decision to which I refer is 168 United States, 500. I will prepare the amendment and submit it to the Senator as soon as the rate is fixed.

Mr. ALLISON. The coal matter will not come up to-day.

Mr. SPOONER. I wish to ask the Senator in charge of the bill to allow the item regarding bleaching powder to go over for to-day. I am not satisfied myself as to the wisdom of the amendment, and I wish to have an opportunity to examine it further.

Mr. ALLISON. There is no objection to that course.

The VICE-PRESIDENT. The Chair hears no objection, and that paragraph will be passed over.

Mr. WHITE. I desire also to suggest to the committee the advisability of examining the decision to which I have referred in another view. There are a great many provisions retained in the administrative portions of the bill which were proposed to be eliminated by the majority of the Committee on Finance upon the theory that their elimination from the bill would interfere with the operation of some section that is contained in existing law. But I fear that the rule of construction adopted by the Supreme Court of the United States in the case referred to might result in a repeal by implication, which would not be desired here.

Mr. ALLISON. I will say to the Senator that since our original report was made we have examined with great care the sections to which he alludes, and it is our purpose, both for convenience and for certainty as respects the construction of the law, to restore in some form those sections when we reach them, modifying one or two of them.

The VICE-PRESIDENT. The next amendment passed over will be stated.

The SECRETARY. Paragraph 14, page 4——

Mr. JONES of Arkansas. What has become of paragraph 7½?

Mr. ALLISON. The Senator from Wisconsin desired that that should go over.

Mr. SPOONER. I asked to have it passed over.

The Committee on Finance reported an amendment to paragraph 14, page 4, line 22, after the word "colors," to strike out "thirty-five" and insert "not specially provided for in this act, twenty-five;" in line 24, after the word "products," to strike out "or preparations;" in the same line, after the word "tar," to insert "not medicinal;" in the same line, after the word "medicinal," to strike out "by whatever name known;" and in line 26, before the word "per," to strike out "twenty-five" and insert "fifteen;" so as to make the paragraph read:

14. Coal-tar dyes or colors, not specially provided for in this act, 25 per cent ad valorem; all other products of coal tar, not medicinal, not specially provided for in this act, 15 per cent ad valorem.

Mr. ALLISON. The committee propose a modification of paragraph 14, which I send to the desk.

The VICE-PRESIDENT. The modification will be stated.

The SECRETARY. Paragraph 14, page 4, line 23, strike out "twenty-five" and insert "thirty;" in line 24, after the words "coal tar," insert the words "not colors or dyes and;" and in line 26 strike out the word "fifteen" and insert the word "twenty."

Mr. ALLISON. I should be glad to have the paragraph read as it will read when amended. I will read it:

Coal-tar dyes or colors, not specially provided for in this act, 30 per cent ad valorem; all other products of coal tar not colors or dyes and not medicinal, not specially provided for in this act, 20 per cent ad valorem.

Mr. SEWELL. I presented an argument to the committee, and I thought they had adopted my suggestion to leave in the words "or preparations."

Mr. ALLISON. I have no objection to leaving in those words. We supposed them to be surplusage.

Mr. SEWELL. No; it covers a number of preparations that have been adjusted already in the custom-house. I ask that the words "or preparations" be left in.

Mr. ALLISON. There is no objection to it, although the word "products" will certainly cover preparations.

Mr. SEWELL. It is a technical term that has practically become established.

Mr. ALLISON. I want to assure the Senator from New Jersey that we took expert advice on the subject before making this amendment. But I have no objection to the insertion of the words if the Senator insists upon it.

Mr. SEWELL. I prefer to have the words "or preparations" in.

Mr. ALLISON. It is a matter of no moment.

Mr. SEWELL. Let that language be included in the amendment of the committee.

The VICE-PRESIDENT. The amendment will be so modified, in the absence of objection.

Mr. SEWELL. I also ask the Senator in charge of the bill whether, in changing the rate from 15 to 20 per cent, in line 26, the duty on the raw products of coal-tar dyes will not be increased, and if in that view it would not be very much better to have the rate 15 instead of 20 per cent.

Mr. ALLISON. A great many of the raw products of coal-tar dyes are on the free list unless we strike them off. Nearly all the raw products are on.

Mr. SEWELL. I am aware that a good deal come under this enumeration, so that the people who make coal-tar dyes would have to pay 20 per cent instead of 15. I will not, of course, make any contest on the subject.

Mr. ALLISON. If we make any mistake about it, I shall be glad to rectify it later on.

Mr. JONES of Arkansas. I know nothing personally about this matter, but I am told by experts and by persons connected with the custom-house in New York that practically all coal-tar dyes or colors that come into this country come in the form of coal-tar products; that they must necessarily be mixed with other things before they become dyes; that there must be some mordant or some other mixture before they can be used; that the structure of this clause will result only in litigation and difficulty of construction, and that in the paragraph there ought to be one rate for the entire product.

Mr. ALLISON. The Senator may be right, although there are a few manufacturers in our country who make some of these coal-tar dyes and colors, and it was thought wise by the committee to give them fair protection.

Mr. JONES of Arkansas. I understand that they import the coal-tar products, and by a very simple process produce the coal-tar dyes by mixing them with other things. It hardly rises to the dignity of manufacture, as I understand the facts. I do not know that I am right about it, but that is my information and my impression. I believe there ought to be one rate for all these articles.

Mr. GRAY. I should like to ask the Senator from Iowa a question in regard to this matter. Would the duty that is here imposed be excluded from everything that is medicinal by the language "not medicinal?"

Mr. ALLISON. Yes.

Mr. GRAY. Then I should like to ask whether it would exclude such an article as thymo-cresol, which is sometimes called sheep dip. I understand from a manufacturer of the article that that is used as a disinfectant or insecticide—

It can absolutely be used—

I read from a communication of his—

for no other purpose. It is used to a certain extent in hospitals, but is used chiefly by farmers and stockmen as a sheep dip, cattle wash, etc. For this purpose it is used and recommended by the leading breeders and veterinarians throughout the world. It is known to commerce as a "sheep dip." It is at present on the free list.

Mr. WHITE. It has been stricken from the free list.

Mr. ALLISON. It w ll be on the free list.

Mr. GRAY. It will be on the free list?

Mr. ALLISON. That is, not in that form, but sheep dip and all that class are provided for in the free list. I will find the provision.

Mr. GRAY. I suggest to the Senator some such language as this, as proposed by these people, to put on the free list "products or preparations of coal tar used only as insecticides and disinfectants." That would cover the articles that are mentioned and prevent this tax from being placed upon this article that is becoming every day more and more essential to the health of the stock of the country.

Mr. WHITE. There are parts of the country in which sheep are produced where frequently there is a disease of the skin and it is necessary in its treatment to make a solution in which the whole sheep, except the head, is sometimes immersed.

Mr. GRAY. This is it.

Mr. ALLISON. It is not the intention, I will assure the Senator, to make sheep dip dutiable under any clause in this paragraph.

Mr. GRAY. Would it be in order for me to move to put upon the free list now "products or preparations of coal tar used only as insecticides and disinfectants?"

Mr. ALLISON. If the Senator will give notice of that amendment, I will say that the committee will look into the matter. I think in some form it ought to be done.

Mr. WHITE. Paragraph 630 of the proposed bill as originally framed contains sheep dip, but the line passed through the paragraph indicates that the committee intended to eliminate it.

Mr. ALLISON. My impression is that it is provided for in some other part, but I can not turn to it at the moment. I assure the Senator it will be dealt with.

Mr. GRAY. All right.

Mr. MANTLE. I should like to inquire of the Senator from Iowa at this point if the committee has decided to permit sheep dip to remain upon the free list?

Mr. ALLISON. Sheep dip is a very indefinite term, and is made up of two or three hundred things that are called sheep dip. It was our purpose to cover, and I think we have some provision here which covers, what would be called sheep dip. If the Senator will look at paragraph 505, I think he will find it.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, on page 5, after line 1, to strike out paragraph 16, in the following words:

16. Collodion, and all compounds of pyroxyline, by whatever name known, and whether rolled or in sheets, but not made up into articles, 50 cents per pound; if in finished or partly finished articles, including such as are commonly called celluloid articles, 75 cents per pound and 30 per cent ad valorem.

And in lieu thereof to insert:

16. Collodion and all compounds of pyroxylin, whether known as celluloid or by any other name, rolled or in sheets or otherwise, but not made up into articles, 50 cents per pound; if in finished or partly finished articles, 60 cents per pound and 25 per cent ad valorem.

Mr. ALLISON. The committee propose a modification of that paragraph which I send to the desk.

The SECRETARY. Strike out paragraph 16 and insert:

Collodion and all compounds of pyroxylin, whether known as celluloid or by any other name, 50 cents per pound; rolled or in sheets, unpolished and not made up into articles, 60 cents per pound; if in finished or partly finished articles, 65 cents per pound and 25 per cent ad valorem.

Mr. VEST. That is a considerable increase and a change of classification so as to put up these duties enormously. Why are these changes made? That paragraph seems to have been deliberately framed and reported by the committee. Here is a new classification in the first part of it and 5 cents duty added to the latter part. I should like to know, for it is little enough to ask, why this is done.

Mr. ALLISON. I call the attention of the Senator from Missouri to the law of 1894. We have practically taken the phraseology of that law, making another bracket, as it were, covering collodion and all compounds, etc., at 50 cents a pound, and then when rolled in sheets, which is another process——

Mr. VEST. Making it 60 cents.

Mr. ALLISON. Making it 60 cents. Then when made up in finished articles or partly finished, 65 cents and 25 per cent ad valorem. The present law is "collodion and all compounds of pyroxylin, by whatever name known, 40 cents a pound." Where the law now provides 40 cents we provide 50 cents. On rolled or in sheets, but not made up into articles, it is 50 cents per pound in the present law, and we make it 60 cents. If in finished or partly finished articles, it is 45 per cent ad valorem, and we have made it partly specific in the last bracket.

Mr. JONES of Arkansas. What is the proposed rate in the last bracket of the amendment?

Mr. ALLISON. Sixty-five cents and 25 per cent.

Mr. VEST. The 65 cents is an increase. I was very glad, when this amendment was originally made, to see that it was a reduction from the Wilson Act. The Senator does not pretend to say that it now is the equivalent of the Wilson Act with the change of classification?

Mr. ALLISON. It is the classification of the Wilson Act practically.

Mr. VEST. Yes; but the rates are not the same.

Mr. ALLISON. The rates are increased over the Wilson Act.

The VICE-PRESIDENT. The question is upon agreeing to the amendment of the Senator from Iowa to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, in paragraph 22, page 6, line 17, after the word "above," to strike out "ten" and insert "seven;" in line 18, after the word "pound," to strike out "two" and insert "one;" and in line 19, after the word "above," to strike out "ten" and insert "seven;" so as to read:

Gelatin, glue, isinglass or fish glue, and prepared fish bladders or fish sounds, valued at not above 7 cents per pound, 1½ cents per pound; valued at above 7 cents per pound, etc.

Mr. ALLISON. I ask that that amendment be disagreed to.

The amendment was rejected.

The next amendment was, in line 19, after the word "above," to strike out "twenty-five" and insert "thirty-five;" in line 20, after the word "pound," to strike out "three cents per pound and fifteen" and insert "twenty-five;" in line 21, after the words "ad valorem," to strike out "valued above 25 cents and not above 40 cents per pound, 5 cents per pound and 15 per centum ad valorem;" in line 23, after the word "above," to strike out "forty" and insert "thirty-five;" in line 24, after the word "pound," to strike out "twenty" and insert "fifteen;" and in line 25, before the words "per centum," to strike out "fifteen" and insert "twenty;" so as to make the paragraph read:

22. Gelatin, glue, isinglass or fish glue, and prepared fish bladders or fish sounds, valued at not above 10 cents per pound, 2½ cents per pound; valued at above 10 cents per pound and not above 35 cents per pound, 25 per cent ad valorem; valued above 35 cents per pound, 15 cents per pound and 20 per cent ad valorem.

Mr. ALLISON. That should be agreed to.

The amendment was agreed to.

Mr. JONES of Arkansas. I should be glad if the Senator from Iowa would explain the effect of the paragraph as he proposes it in comparison with the present law. The comparative statement submitted to the Senate gives no information whatever. It seems as if the experts in the Treasury were completely paralyzed and bewildered by the proposed changes in this paragraph, and there is nothing in the comparative statement from which any opinion can be formed as to the effect of the proposed changes.

Mr. ALLISON. The appraisers in New York have recently reported that the rate on gelatin, under the paragraph as we have amended it, would run from 21 to 25 per cent ad valorem, and on glue, 4 per cent to 21 per cent; on isinglass or fish glue, fish bladders, etc., from 4 to 6 per cent. There is no great change. We reduced the rates, as the Senator will see, on the lower grades.

Mr. JONES of Arkansas. I must accept the Senator's statement because I have no idea what is the effect of the changes made. It appears to me as if the rates are increased in some respects. I may be mistaken in that. I would be very much gratified to find that there is a reduction by which the committee stands.

Mr. ALLISON. On the lower grades, of course, there is a little increase; on the higher grades there is a reduction.

The VICE-PRESIDENT. The next amendment passed over will be stated.

The next amendment of the Committee on Finance was, on page 8, line 17, paragraph 38, before the word "cents," to strike out

"fifty" and insert "thirty-five;" so as to make the paragraph read:

38. Olive oil, not specially provided for in this act, 35 cents per gallon.

Mr. ALLISON. I have a modification to present in that paragraph, which I will send to the desk.

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. In paragraph 38, page 8, line 17, before "cents," strike out "thirty-five" and insert "forty;" and at the end of the paragraph insert a semicolon and the words:

If packed in bottles, jars, tins, or similar packages, 50 cents per gallon.

Mr. JONES of Arkansas. I can not imagine what excuse there can be for increasing the rate on olive oil above the rate in the McKinley Act. It was 35 cents a gallon in the McKinley Act. It is 35 cents under the present law. Certainly the production of olive oil is not an infant industry in this country. The importations were increased in 1896 over 1893. If the purpose is to get revenue it would seem that we are at the revenue point at 35 cents a gallon. I can not understand why the rate should be increased beyond 35 cents; and I should be very glad to have the Senator state some reason why it should be done. If there is not some satisfactory reason given, I should like to have a vote of the Senate by yeas and nays, to know whether the Senate will agree to this increase.

Mr. PERKINS. Mr. President, there are two good reasons. The first reason is that of revenue to be gained by increasing the rate from 35 to 50 cents. The second reason, which to my mind is far more important than the other, is because it provides that we shall have pure olive oil. The people of the western side of this continent are demonstrating the fact that we have olive orchards that are equal to those of Spain or any other country. We have several hundred thousand olive trees now in full bearing in California, and we are producing the only pure olive oil that is produced upon this continent, while, as a historical fact, we are shipping out of the United States cotton-seed oil that is sent to Spain and other European countries and put up in bottles there, labeled, and returned to this country and sold to the consumer as pure olive oil, when seven-tenths of it is cotton-seed oil.

I wish to say one word more. I do not wish to take up time. We have hundreds of thousands of olive trees that will come into bearing within the next few years. The olive grows upon the foothills and elevations of from 500 to 2,000 feet above the level of the sea. The trees grow most luxuriantly in California, and among the old nations there are olive trees more than 100 years old that have been yielding all that time. I want to say to my friend from Arkansas that there is no industry more worthy of his support and recognition than the cultivation of olives in this country. We have demonstrated the fact that we can give you pure olive oil, and you will get it from no other place in the world imported into this country.

Mr. JONES of Arkansas. I understand that there is a large quantity of pure olive oil in this country made from cotton seed, and I suppose it is necessary under the circumstances to have some protection.

Mr. VEST. If the Senator from California had just put one or two words more in his remarks I could have subscribed to them with great cheerfulness—pure olive oil and cheap olive oil. There is the point in this discussion. The increase of taxation will not make the oil any purer. The whole object is to make us buy at a higher rate the olive oil that is raised and produced in California. If I were to stand here and demand an additional duty upon an article produced in Missouri in order to make the people of California pay more for it I would be doing exactly what the Senator from California is doing now.

Here is an article necessary to comfort and health, because the best physicians tell us that olive oil should be used in salads and that it is absolutely necessary to health in the large cities and in the springtime. In France it is used to a very large extent, because no Frenchman thinks that his dinner is complete and entirely healthful without a salad. The people of the United States at large use this article. Why should we be made to pay tribute to one State? What sort of justice is there in that? Here is something that comes from the soil. No immense amount of labor is used in the production of olive oil. We want it pure; there is no objection to that; but we want it cheap. Here is an increase in the rate of taxation for the single purpose, pure and simple, of making my constituents pay a larger price for something that is raised in the State of California. That is the tariff.

Mr. PERKINS. I will say to my friend the Senator from Missouri that, having in view the word "cheap," we prevailed upon the committee to place adulterated olive oil upon the free list. It is there; and therefore he will have a choice. He can take the pure California olive oil which we will give him or he may at a very low figure take the cheap adulterated oil.

Mr. VEST. Does the Senator say that adulterated olive oil is on the free list?

Mr. PERKINS. For lubricating and other purposes.

Mr. VEST. Olive oil?

Mr. PERKINS. Olive oil for lubricating and other purposes is on the free list. It comes here in barrels and is bottled.

Mr. VEST. That is not edible oil?

Mr. ALLISON. It is in paragraph 603.

Mr. VEST. Is that edible oil, used for salads to put in people's stomachs?

Mr. PERKINS. I am inclined to think a great many of our friends use it for that purpose.

Mr. VEST. I suppose not, if they know it.

Mr. PERKINS. No; they do not know it.

Mr. VEST. And disarrange their internal organization and bring about disease? I never heard of a man lubricating his stomach with adulterated olive oil. [Laughter.]

The VICE-PRESIDENT. The question is on the amendment of the Senator from Iowa to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The VICE-PRESIDENT. The next amendment passed over will be read.

The Secretary read paragraph 43, on page 9, as follows:

43. Blues, such as Berlin, Prussian, Chinese, and all others, containing ferrocyanide of iron, dry or ground in or mixed with oil, 8 cents per pound; and in pulp or mixed with water, 8 cents per pound on the material contained therein when dry.

Mr. ALLISON. The committee propose to modify the amendment, in line 15, by striking out "six" and inserting "eight," restoring the rate provided for in the bill as it came from the House of Representatives.

The VICE-PRESIDENT. The amendment proposed by the Committee on Finance will first be stated.

The SECRETARY. On page 9, paragraph 43, line 14, after the word "iron," it is proposed to insert "in pulp;" and in line 15, after the word "oil," to insert "or water;" so as to read:

43. Blues, such as Berlin, Prussian, Chinese, and all others, containing ferrocyanide of iron, in pulp, dry or ground in or mixed with oil or water, etc.

The amendment was agreed to.

The next amendment was, on page 9, paragraph 43, line 15, after the word "water," to strike out "eight" and insert "six;" so as to read "6 cents per pound."

Mr. ALLISON. The committee desire that amendment to be disagreed to.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Committee on Finance, which has just been stated.

The amendment was rejected.

Mr. VEST. I want to call attention to the fact, just in a historical way, although it does no good, that this is an increase over the McKinley rate from 6 to 8 cents; yet we were assured by the Senator from Rhode Island [Mr. ALDRICH] that wherever the committee went over the McKinley rate it would be phenomenal and abnormal. There are 132 instances which have been already counted where the committee have gone over the McKinley rates.

The next amendment of the Committee on Finance was, on page 9, paragraph 43, line 16, after the word "pound," to strike out:

And in pulp or mixed with water, 8 cents per pound on the material contained therein when dry.

The amendment was agreed to.

The VICE-PRESIDENT. The next amendment of the Committee on Finance which was passed over will be stated.

The SECRETARY. On page 10, paragraph 47, line 10, after the word "act," the Committee on Finance propose to strike out "crude" and insert "dry;" and in line 11, after the word "pound," to strike out the words "dried or powdered, one-half of 1 cent per pound."

Mr. ALLISON. The Committee on Finance instruct me to present a modification of this amendment, and I move to strike out the paragraph and insert in lieu thereof what I send to the Secretary's desk.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. On page 10 it is proposed to strike out paragraph 47 and insert:

47. Ocher and ochery earths, sienna and sienna earths, and umber and umber earths, when crude or not powdered, washed, or pulverized, one-eighth of 1 cent per pound; if powdered, washed, or pulverized, three-eighths of 1 cent per pound; if ground in oil or water, 1½ cents per pound.

The VICE-PRESIDENT. The question is on the amendment of the committee as proposed to be modified.

Mr. ALLISON. I want to modify the amendment further. After the word "earths" where it last occurs I move to insert "not specially provided for."

The VICE-PRESIDENT. The modification to the amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. It is proposed to modify the amendment by inserting after the word "earths" where it last occurs the words "not specially provided for."

Mr. ALLISON. Now I ask the Secretary to read the paragraph as it is proposed to be amended.

The SECRETARY. It is proposed to strike out paragraph 47 and in lieu thereof to insert:

47. Ocher and ochery earths, sienna and sienna earths, and umber and umber earths, not specially provided for, when crude or not powdered, washed, or pulverized, one-eighth of 1 cent per pound; if powdered, washed, or pulverized, three-eighths of 1 cent per pound; if ground in oil or water, 1½ cents per pound.

The amendment as modified was agreed to.

The next paragraph passed over was paragraph 50, on page 10, which the Committee on Finance proposed to amend, in line 17, after the word "blue," by striking out "and other ultramarine colors;" so as to read:

50. Ultramarine blue, whether dry, in pulp, or mixed with water, and wash blue containing ultramarine, etc.

The amendment was agreed to.

The next amendment was, in line 19 of the same paragraph, before the word "cents," to strike out "four" and insert "three."

Mr. ALLISON. I wish to modify that amendment by inserting the words "and one-half" after "three."

The VICE-PRESIDENT. The amendment to the amendment will be stated.

The SECRETARY. It is proposed to amend the amendment of the committee, in line 19, paragraph 50, page 10, before the word "cents," by inserting the words "and one-half;" so as to make the paragraph read:

50. Ultramarine blue, whether dry, in pulp, or mixed with water, and wash blue containing ultramarine, 3½ cents per pound.

The amendment was agreed to.

The amendment as amended was agreed to.

The next paragraph passed over was paragraph 58, on page 12, line 12, which the Committee on Finance proposed to amend, before the word "cents," by striking out "twenty" and inserting "ten;" so as to make the paragraph read:

Phosphorus, 10 cents per pound.

Mr. ALLISON. I propose to modify the committee amendment by inserting "fifteen" instead of "ten;" so as to read:

Phosphorus, 15 cents per pound.

The amendment as modified was agreed to.

The next item passed over was the amendment reported by the Committee on Finance, on page 14, after line 22, to insert as a new paragraph:

74½. Soda ash, three-eighths of 1 cent per pound.

The VICE-PRESIDENT. In the absence of objection, the amendment will be considered as agreed to.

Mr. VEST. Let us understand that, Mr. President.

Mr. ALLISON. Has paragraph 74½ been agreed to?

Mr. VEST. No; I want to understand it.

Mr. ALLISON. I move to amend that paragraph by placing a semicolon after the word "pound," in line 23, and inserting what I send to the desk.

The VICE-PRESIDENT. The amendment to the amendment proposed by the Senator from Iowa on behalf of the committee will be stated.

The SECRETARY. In line 23, after the word "pound," it is proposed to strike out the period and insert a semicolon; and to add "arseniate of soda, 1½ cents per pound."

The amendment to the amendment was agreed to.

Mr. SEWELL. Representing as I do immediately a State in which there is an industry that consumes a large amount of soda ash, whilst I do not wish to make any contest with the committee on this amendment, I ask to have published in the RECORD, as a part of my remarks, the statement which I send to the desk.

The VICE-PRESIDENT. If there be no objection, it will be so ordered.

The statement referred to is as follows:

SODA ASH.

The bill reported by the Finance Committee of the United States Senate increases the duty on soda ash, reported in the House bill at one-fourth cent per pound, to three-eighths cent per pound.

The present cost of soda ash for importation is about one-fifth cent per pound, f. o. b. Liverpool, so that a duty of three-eighths cent per pound is equivalent to fully 185 per cent protection.

At the present rate of duty, one-fourth cent per pound, which is also the duty of the McKinley bill, there is imported into this country about 120,000 tons per annum, yielding to the Government about $672,000 annually as revenue.

The soda ash imported into this country is principally consumed on the seaboard, as the foreign makers can not compete with the American makers where they are obliged to pay much freight. A duty of three-eighths of a cent per pound would therefore be prohibitive and prevent any further revenue from importations, and in addition would place all the industries consuming soda ash at the mercy of three manufacturing companies in the United States. (There are but three makers of soda ash in this country, all of whom are large corporations.) The glass, soap, paper, and pulp industries are all large consumers of soda ash; to place an increased duty on soda ash, already protected by a duty of over 100 per cent, means a very severe injury and loss to all these large industries, none of which are protected in their manufacture to the extent already given and conceded to the soda-ash makers.

A protective duty of 185 per cent on an article so largely consumed by four great industries, and necessary to them as raw material, is imposing upon them a burden almost destructive.

It is entirely unnecessary as a protective measure, and would entirely defeat its object as a revenue measure, being prohibitory.

Mr. VEST. Let me ask the Senator from Iowa what the present duty is on arseniate of soda?

Mr. ALLISON. Twenty-five per cent ad valorem.

Mr. VEST. What do you propose to make it?

Mr. ALLISON. One and one-fourth cents per pound.

Mr. VEST. What is the equivalent ad valorem?

Mr. ALLISON. About 25 per cent, I think.

Mr. VEST. I want to call attention to the fact that the increase proposed by the committee upon soda ash, which is an article of very great importance, is above the McKinley rate, it is above the Wilson rate, and it is above the rate in the House bill.

Mr. ALLISON. That is all right.

Mr. VEST. Will the Senator tell us now why he proposes to make that increase? We are certainly entitled to know the reasons for it. I suppose every Senator has received many communications in regard to this article. The soap manufacturers are very much interested in it, for it is an article of large consumption and of absolute necessity to the soap manufacturers of the United States, and they have petitioned for a decrease of duty. Not satisfied with the McKinley rate—leaving out the Wilson rate, which of course is not to be considered by our friends on the other side—and not satisfied with the Dingley rate, they now propose to put up the price of this commodity one-eighth of a cent, making it a 48 per cent ad valorem duty. I hope our friend from Iowa will tell us why this is done.

Mr. STEWART. I will state for the information of the Senator from Missouri that this article is largely manufactured in many places. Competition will undoubtedly keep the price down to where it ought to be. This duty is imposed upon the principle that such articles should be protected. Certainly it is a product of our own country, and competition has resulted largely in the reduction of the price of it, and we want this duty.

Mr. VEST. The Senator from Iowa [Mr. ALLISON] does not answer, but the Senator from Nevada [Mr. STEWART] does, which is proof positive that Nevada and the Western country is interested in soda ash.

Mr. STEWART. Suppose they are, is that a crime?

Mr. VEST. "Hinc illæ lachrymæ" is the old Latin quotation—"hence those tears."

Mr. STEWART. Do not be afraid of Nevada getting too much, or Missouri either.

Mr. VEST. I do not care whether it is Missouri or Nevada or anywhere else, I am opposed to this class legislation—putting up the price of an article of necessity in favor of certain manufacturers. I do not ask it for Missouri. I shall vote against any increase upon an article of prime necessity in my State, and take my chances as a public man. When it comes to lead, I shall vote to put that on the free list; when it comes to lumber, I shall vote to put that on the free list, and salt on the free list, and wool on the free list: and if they want a Senator here to do otherwise, let them send somebody else here. These duties ought to be just and equal, and they should be imposed with reference to the consumers of the country, the millions upon millions of people who are not represented here by any lobby or any moneyed interest at all.

Here is soda ash, which is put into soap, an article of absolute necessity, a cheap article, used by everybody. It is said that the Democratic party does not use it as a rule, though I believe they are as much addicted to bathing as any other class in the community. An ex-President, of whom I was a great friend, at a dinner party in New York spoke of soap as a great political instrumentality during the previous election. [Laughter.] Here is soap, the component or principal article composing which is soda ash, made dearer; though our friend from Nevada tells us he thinks that the competition in this country will keep the price of soda ash down.

Mr. STEWART. Certainly.

Mr. VEST. Well, then, what is the use of shutting out the foreign manufacturer, when our experience is that whenever you shut out foreign competition, the domestic manufacturers arrange the price for their own benefit, and you have what is generally called a combine or a trust? One manufacturer says to another, "Here, Smith, you and myself are cutting each other's throats. You own a factory over there, and I have a factory over here. Why let these haymakers get this article cheap at our expense? Let you and I get together and coolly fix the price for our own benefit, and make money." "Put money in thy purse," Roderigo; "put money in thy purse." That is all there is in it.

Mr. PLATT of Connecticut. Mr. President, the manufacture of soda ash in this country comes in direct competition with the manufacture of soda ash by the United Alkali Company, of Great Britain, the most powerful trust or combination in the world. What our friends on the other side seem to wish to do is to destroy the manufacture of soda ash in this country in order that it may

be entirely monopolized by the United Alkali Company, of London, which, as I said, is a trust with $20,000,000 of capital, and probably the closest and most grinding monopoly on the face of the earth.

Mr. LINDSAY. I call the attention of the Senator from Connecticut to the fact that the importation of soda ash between the years 1893 and 1896 has declined 33½ per cent. The Americans seem to be able to take care of that British trust.

Mr. PLATT of Connecticut. To-day there are, as I understand, three soda-ash manufactories in the United States, perhaps more. When they commenced the manufacture of soda ash, there was at the then prevailing price perhaps an opportunity of a living profit. To crush out this manufacture here the foreign monopoly reduced the price to a point where there was no profit in the American manufacture. Just the moment that they can succeed in crushing the American manufacturers, who are not in combination, this foreign combination and trust will raise the price higher than it was before. That is the old story.

I think that the people who use soda ash in this country will get their soda ash much cheaper by a duty upon it which will allow its manufacture in the United States than by putting it on the free list, thus crushing out the manufacture in the United States and putting the whole business in the hands of this monopoly.

Mr. JONES of Arkansas. Is it on the free list now?

Mr. LINDSAY. It has never been on the free list.

Mr. PLATT of Connecticut. It is not on the free list.

Mr. LINDSAY. It was on the dutiable list in the McKinley law.

Mr. VEST. We only desire to have the McKinley rate.

Mr. JONES of Arkansas. The same rate is on this now that was under the McKinley law, and there was an increase as originally proposed by the committee of an eighth of a cent over the bill as it came from the House. The importations amounted in 1893 to $4,880,787.77 and they fell off in 1896 to $1,970,975.31. So it seems that a quarter of a cent gives ample protection. The importation was not one-half in 1896 what it was in 1893.

What is the occasion for raising the tax any higher? We have been told all the time that it was not proposed to have any extravagant rate of taxation, and yet the rate under the McKinley law and the rate under the present law is proposed to be raised 50 per cent, when the House of Representatives itself proposed only a quarter of a cent, and the Committee on Ways and Means were satisfied with the present rate and satisfied with the rate which was in the McKinley law. This increase, the like of which has not been heard of in any article of necessity anywhere, has been put on by the Senate committee, when we were assured in the beginning of the debate that all these taxes were going to be kept down to a marvelously low level.

The VICE-PRESIDENT. The question is on the adoption of the amendment proposed by the committee as amended.

Mr. VEST. I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH], but I transfer that pair to the Senator from Illinois [Mr. MASON], and vote "yea."

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "nay."

Mr. MILLS (when his name was called). I am paired with the Senator from New Hampshire [Mr. GALLINGER]. If he were present, I should vote "nay."

Mr. MORGAN (when his name was called). I am paired with the Senator from Pennsylvania [Mr. QUAY].

Mr. PENROSE (when his name was called). I have a general pair with the junior Senator from Delaware [Mr. KENNEY]. Were he present, I should vote "yea."

Mr. TILLMAN (when his name was called). I am paired with the Senator from Nebraska [Mr. THURSTON], and therefore withhold my vote.

Mr. WARREN (when his name was called). I am paired with the Senator from Washington [Mr. TURNER]. If he were here, I should vote "yea."

Mr. WELLINGTON (when his name was called). I again announce my pair with the Senator from North Carolina [Mr. BUTLER]. In his absence, I withhold my vote.

The roll call was concluded.

Mr. THURSTON. I inquire if the senior Senator from South Carolina [Mr. TILLMAN] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. THURSTON. I again announce my pair with that Senator, and withhold my vote. If he were present, I should vote "yea."

Mr. WARREN. I am informed that the Senator from Colorado [Mr. TELLER] would, if he were here, vote on the side of this question that I would. I transfer my pair with the Senator from Washington [Mr. TURNER] to the Senator from Colorado [Mr. TELLER], and vote "yea."

Mr. JONES of Arkansas (after voting in the negative). I am paired with the Senator from Maine [Mr. HALE], and therefore withdraw my vote.

Mr. SHOUP. I have a general pair with the Senator from California [Mr. WHITE], but I reserved the right to vote on this question, and will therefore allow my vote in the affirmative to stand.

Mr. GEAR. I have been transferring pairs with the Senator from Utah [Mr. RAWLINS], who is not now here; but, by his permission, I will transfer his pair to the Senator from New Jersey [Mr. SMITH]. I want to protect the vote of the Senator from New Jersey. They would both vote the same way. I will let my vote in the affirmative stand.

Mr. PENROSE. I transfer my pair with the junior Senator from Delaware [Mr. KENNEY] to the junior Senator from Illinois [Mr. MASON], and vote "yea."

The result was announced—yeas 30, nays 20; as follows:

YEAS—30.

Allison,	Frye,	McEnery,	Shoup,
Baker,	Gear,	Penrose,	Spooner,
Burrows,	Hansbrough,	Perkins,	Stewart,
Carter,	Hawley,	Platt, Conn.	Warren,
Chandler,	Hoar,	Platt, N. Y.	Wetmore,
Deboe,	Jones, Nev.	Pritchard,	Wilson.
Fairbanks,	Lodge,	Proctor,	
Foraker,	McBride,	Sewell,	

NAYS—20.

Allen,	Clay,	Mallory,	Pettus,
Bacon,	Cockrell,	Mitchell,	Roach,
Berry,	Gorman,	Murphy,	Turpie,
Caffery,	Heitfeld,	Pasco,	Vest,
Chilton,	McLaurin,	Pettigrew,	Walthall.

NOT VOTING—30.

Aldrich,	Gallinger,	Lindsay,	Rawlins,
Bate,	George,	McMillan,	Smith,
Butler,	Gray,	Mantle,	Teller,
Cannon,	Hale,	Martin,	Thurston,
Clark,	Hanna,	Mason,	Tillman,
Cullom,	Harris, Kans.	Mills,	Turner,
Daniel,	Harris, Tenn.	Morgan,	Wellington,
Davis,	Jones, Ark.	Morrill,	White,
Elkins,	Kenney,	Nelson,	Wolcott.
Faulkner,	Kyle,	Quay,	

So the amendment of the committee as amended was agreed to.

The next paragraph which was passed over was paragraph 81, beginning in line 14, on page 15, which the Committee on Finance proposed to amend, after the word "Vanillin," by striking out "70 cents per ounce" and inserting "50 per cent ad valorem."

Mr. ALLISON. I move to amend the amendment by striking out the amendment heretofore proposed by the committee, "50 per cent ad valorem," and also striking out "70 cents per ounce," and inserting "80 cents per ounce;" so as to read:

81. Vanillin, 80 cents per ounce.

Mr. VEST. There is nothing in the comparative statement showing that any of this article comes into the country.

Mr. ALLISON. I have a very full statement from the appraiser's office respecting it.

Mr. JONES of Arkansas. There ought to be some reason given for some of these increases. Let the statement of the Senator be read.

Mr. VEST. We can not find out anything about this article.

Mr. ALLISON. I have a statement regarding vanillin, which has been heretofore classified as a chemical compound at 25 per cent ad valorem.

Mr. VEST. What is the unit of value?

Mr. ALLISON. About $50 a pound. It has ranged within the last few years from $35—$35 being exceptionally low, and only for a short time—to $50 and to as high as $80 a pound. This duty of 80 cents an ounce would be equivalent to about 25 per cent ad valorem.

Under the present rate of duty the people abroad, as I understand, fix the price to suit themselves. There are, I think, only two or three manufactories abroad, and only one in this country. The object is to get a specific duty.

Mr. VEST. How many of these manufactories are there in this country?

Mr. ALLISON. Just one. The object is to secure a specific duty of about 25 per cent ad valorem, which is 80 cents an ounce.

Mr. VEST. I understand this article is an extract of the vanilla bean. Is that so?

Mr. ALLISON. It is what is called a synthetic product. It is an efficient substitute for vanilla made from the vanilla bean, and is a highly concentrated article, used for flavoring ices, ice creams, confectionery, etc., and also in making perfumery. It is made from coal tar and various other things.

Mr. VEST. Is it a coal-tar product?

Mr. ALLISON. Not a coal-tar product entirely.

Mr. VEST. Then of what is it made?

Mr. ALLISON. Coal tar is one of the elements which enter into its composition.

Mr. VEST. There is but one factory in this country, and none of the article comes in, according to the comparative statement.

Mr. ALLISON. I have a statement here, and perhaps I had better briefly give the contents of it.

Mr. VEST. Let us have something, for we are in the dark about it.

Mr. ALLISON. It is a proprietary article, made and controlled abroad under patent, and it is understood that it is consigned for sale on foreign owners' account to but two or three firms in this country.

It is a white crystalline powder, chemically pure, made from coniferine, a glucoside contained in the cambrium layer (under the bark) of the pine tree; also from guiacol, or the resin of the lignum-vitæ tree, as well as from a body found in oil of cloves. Its market value has been a matter of serious dispute, it having been the subject of frequent advances and of reappraisement. The latest appraised value is about $50 per pound. It was formerly invoiced considerably higher, and lately by one concern as low as $35 per pound; but, as before stated, it was advanced. In consequence of the disputes respecting its value and the repeated attempts at undervaluation, it is of the highest importance that the rate upon the article be specific. Seventy-five cents an ounce would be substantially the equivalent of 25 per cent ad valorem, the rate to which the article is now subject.

Mr. VEST. What is it used for?

Mr. ALLISON. For perfumery, and, of course, in confections and as a substitute for the vanilla bean.

The VICE-PRESIDENT. Without objection, the amendment will be considered as agreed to.

Mr. ALLISON. Before leaving this subject, I wish to insert—I think it is better to make it a new paragraph called 80½, although I intended to make it a part of this paragraph—as a separate paragraph what I send to the desk.

The SECRETARY. It is proposed to insert as a new paragraph the following:

80½. Tonquin, tonqua, or tonka beans, 50 cents per pound; vanilla beans, $2 per pound; vanilla beans, commercially known as cuts, $1 per pound.

Mr. JONES of Arkansas. What is the rate now?

Mr. VEST. What is the present duty?

Mr. ALLISON. Both of the articles are on the free list. Tonqua beans are on the free list.

Mr. JONES of Arkansas. The intention of this is to give effect to the tariff just put on. As these things would probably come in competition with vanillin, an increased rate on that article would not be very effective unless this article is taken off the free list.

Mr. ALLISON. I will say to the Senator from Arkansas that they bear no relation to each other.

Mr. VEST. Did I understand the Senator to say vanillin is used as a substitute for the vanilla bean?

Mr. ALLISON. I did say so.

Mr. VEST. How can the Senator say they have no relation to each other?

Mr. ALLISON. What I meant to say was that the action of the committee had no reference to that.

Mr. VEST. We are discussing the effect of the action of the committee. The Senator has just put a duty of 80 cents an ounce upon vanillin, which is a substitute, as he says, for the vanilla bean. He then proceeds to take the vanilla bean off the free list and put a duty on it. Now, the meaning of that is first to protect the vanillin, of which there is just one manufacturer in this country, and none brought in, and then to exclude the competing product by putting a duty upon it. In other words, put the vanilla bean upon the dutiable list, shut out the vanilla bean in the interest of the vanillin manufacturer in the United States, who gets 80 cents an ounce, and none of it comes in. If that is not a tariff combine, there never was one made.

Mr. ALLISON. The tonqua bean is a very high-priced article, and it is imported to this country at a high price, and it will undoubtedly maintain that price under the duty we propose, which is purely a revenue duty.

As to the effect it may have upon vanillin, I do not suppose it would be appreciable. The vanillin is a highly-concentrated product, and is used as a substitute for the vanilla bean in the way I have stated, and both of these articles will yield from a half million to seven hundred thousand dollars, as I am informed by Treasury experts. I think we need the revenue, especially if we are not to put a tax upon beer and tobacco and some other articles that are now embraced in the bill. I submit the amendment to the Senate, and if they wish to vote it down, they can do so.

The VICE-PRESIDENT. The question is on agreeing to the amendment submitted by the committee.

Mr. VEST. I call for a division of the question.

The VICE-PRESIDENT. The question is on agreeing to the first part of the amendment, which will be stated.

The SECRETARY. It is proposed to insert:

Tonquin, tonqua, or tonka beans, 50 cents per pound.

The amendment was agreed to.

The VICE-PRESIDENT. The remaining portion of the paragraph will now be stated.

The SECRETARY. Vanilla beans, $2 per pound; vanilla beans, commercially known as cuts, $1 per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment which has been stated.

The amendment was agreed to.

Mr. ALLISON. I ask that paragraph 86, the next in order, may be passed over for the moment.

The VICE-PRESIDENT. It will be passed over. The next amendment which has been passed over will be stated.

The SECRETARY. In paragraph 88, line 21, after the word "ton," to strike out "bauxite or beauxite, crude, not refined or otherwise advanced in condition from its natural state, $1 per ton;" so as to make the paragraph read:

88. Clays or earths, unwrought or unmanufactured, not specially provided for in this act, $1 per ton; wrought or manufactured, not specially provided for in this act, $2 per ton; china clay or kaolin, $2 per ton; asphaltum and bitumen, crude, if not dried or otherwise advanced in any manner, $1.50 per ton; if dried or otherwise advanced in any manner, $3 per ton.

Mr. ALLISON. I ask that the amendment be disagreed to.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Committee on Finance.

The amendment was rejected.

Mr. CHILTON. I suggest to the Senator from Iowa that the Senator from Georgia who wished to be heard upon this question is not present in the Chamber.

Mr. ALLISON. In line 17, before the word "dollars," I move to strike out "two" and insert "three."

The SECRETARY. It is proposed to amend the paragraph by striking out, in line 17, the word "two" and inserting "three;" so as to read:

China clay or kaolin, $3 per ton.

Mr. JONES of Arkansas. I should like the Senator from Iowa to state what the present rate is on china clay or kaolin.

Mr. ALLISON. Two dollars a ton. That is my recollection.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa.

The amendment was agreed to.

Mr. PLATT of Connecticut. I should like to have the paragraph read as it now stands.

The Secretary read as follows:

88. Clays or earths, unwrought or unmanufactured, not specially provided for in this act, $1 per ton; wrought or manufactured, not specially provided for in this act, $2 per ton; china clay or kaolin, $3 per ton; asphaltum and bitumen, crude, if not dried, or otherwise advanced in any manner, $1.50 per ton; if dried or otherwise advanced in any manner, $3 per ton.

Mr. PLATT of Connecticut. I thought there had been an amendment previously adopted placing limestone rock asphalt on the dutiable list. It is so printed.

The VICE-PRESIDENT. The Secretary informs the Chair that that is the pending amendment, which has not been agreed to.

Mr. PLATT of Connecticut. The Secretary did not read the rest of the paragraph, as I understand it to remain.

The VICE-PRESIDENT. The Secretary will read.

The Secretary read as follows:

Bauxite, or beauxite, crude, not refined or otherwise advanced in condition from its natural state, $1 per ton.

Mr. PLATT of Connecticut. Now, there is an amendment pending in regard to rock asphalt.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. After the word "ton," in line 17, it is proposed to insert:

Limestone rock asphalt containing not more than 15 per cent bitumen, 50 cents per ton.

And in line 20, after the word "bitumen," to insert "not specially provided for in this act;" so as to read:

Limestone rock asphalt containing not more than 15 per cent of bitumen, 50 cents per ton; asphaltum and bitumen, not specially provided for in this act, crude, if not dried or otherwise advanced in any manner, $1.50 per ton.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

Mr. VEST. I wish to call attention, in the line of historical allusion simply, to the fact that asphalt, under the McKinley law and the existing law, whether crude or advanced in manufacture, was free. Here it is put upon the dutiable list. The equivalent ad valorem for $3 per ton upon asphalt is 100 per cent. Of course the argument will be made, when anything is said against a tax on asphaltum, that the principal supply of this country to-day comes from an island in the West Indies that belongs to Great Britain. It is said that Great Britain charges so much royalty for the bitumen or asphaltum which is taken out of the lake on that island. My information is that an American company has purchased either the whole of that lake or an interest in it, and that the asphalt we have to-day upon the streets of the city of Washington—Washington has more asphaltum pavement than any other city in the United States—came from that lake, and the government of

the District of Columbia paid an enormous price, about three and a half times what is now the commercial value of the asphalt used on streets.

We have lately discovered immense deposits of asphalt or gilsonite in the United States, and every Senator will recollect the struggle we had here in regard to the Uncompahgre Reservation, about opening it. That legislation was defeated; but of course the asphaltum or gilsonite beds remain there. There is a company in the city of St. Louis that have gilsonite or asphaltum deposits outside of that reservation, and they are furnishing now to the city of St. Louis and to Kansas City, in my State, asphaltum or gilsonite paving at about one-third what it costs the Commissioners of the District of Columbia and the United States Government to pave with asphaltum the streets of this city.

I do not know why this duty is put upon the article now and why the article is taken off the free list. It seems to me that with the immense natural deposits in the United States we are able to compete with any country in the world and absolutely to control this very necessary article for municipal purposes. The gilsonite found in the Uncompahgre Reservation is used not only for paving, but roofing and other purposes, and why this large duty should be imposed, unless it be, as I suppose will be said, as an attack upon the English company who own the lake in the West Indies, I am unable to see. The result when this duty is imposed is that the article of asphaltum will be made higher to every municipality in the United States that wants to use it upon its streets, and it is hardly necessary to say that in a great many noncommercial cities it is the very best article that can be used for the purpose.

Mr. CHILTON. Mr. President, there is a further observation which might be made in regard to the asphaltum business. I believe the California asphalt, which is noted all over the world, contains a much larger quantity of bitumen than the Trinidad asphalt, and has an advantage in the market on that account. It will make many more square yards of pavement to the ton than Trinidad asphaltum. It seems to me this is a case where the American industry is clearly able to stand alone and compete with all the world. It needs no protection. Asphaltum is not only used in city pavements, but it is used in livery stables and other lines of business, and the tax imposed will constitute a charge on a large number of American people.

The question of transportation largely controls the market for asphaltum. The California product is largely shut out of New York and extreme Eastern cities on account of the high rates of transportation. It is practically impossible to transport it to New York so as to come in active competition with the Trinidad article. Therefore it seems, sir, that in so far as transportation does not offer difficulties to the American production of asphaltum it is now completely on its feet. The imposition of this tariff will add a tax for asphaltum in the Eastern section of the United States which the Western asphaltum can not reach on account of the enormous transportation charges to which I have referred.

I know, as has been frequently said, that it is useless to offer any reasons against proposed amendments, but it occurs to me that this is an unnecessary charge upon the taxpayers of a large section of this country and can do no possible good. The product is one which can not be locally developed by a protective duty, and being so largely used in the work of municipalities, it is not an appropriate subject for a revenue duty.

Mr. PLATT of Connecticut. If we listened to and heeded the arguments which are made whenever an item in this bill is under consideration, the Government would have no revenue whatever, for every item is objected to. Now, this, as I understand it, is purely a revenue duty, and the necessity for revenue seems to be very apparent.

With reference to increasing the cost of street paving, I think myself there is profit enough in the asphaltum business between the lake at Trinidad and the laying of the pavement in cities so that that pavement can be afforded at the same rate at which it is now laid.

I desire to amend the paragraph further by adding the provision which I send to the desk.

The PRESIDING OFFICER (Mr. BURROWS in the chair). The amendment proposed by the Senator from Connecticut will be stated.

The SECRETARY. On page 17, after line 23, it is proposed to add to paragraph 88 the following:

Fuller's earth, wrought or manufactured, $3 per ton.

Mr. JONES of Arkansas. What is the rate now?

Mr. PLATT of Connecticut. Two dollars.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Connecticut.

The amendment was agreed to.

Mr. QUAY. I have just entered the Chamber, and I find the Senate occupied with paragraph 88, in which I am very much interested, and on which I had understood the committee in charge of the bill was to give me a hearing before action was taken by the Senate.

Mr. PLATT of Connecticut. In relation to what?

Mr. QUAY. Paragraph 88.

Mr. PLATT of Connecticut. Which article?

Mr. QUAY. First as to crude asphalt, which I desire to have placed on the free list; second, as to gypsum, and third, as to feldspar, which I desire to have placed on the dutiable list. I will be very glad if the Senator from Connecticut will allow the paragraph to be passed over. My understanding was distinct with the Senator in charge of the bill that I should have a hearing on the paragraph before action by the Senate.

Mr. PLATT of Connecticut. I wish the Senator from Pennsylvania would let the action of the Senate stand until the Senator from Iowa returns, which will be in a few minutes.

Mr. QUAY. I enter a motion to reconsider and will let it stand.

Mr. PETTIGREW. I move to amend the paragraph by adding:

Fuller's earth, unwrought or unmanufactured, $2 per ton.

I offer that to follow the amendment already agreed to proposed by the Senator from Connecticut.

The PRESIDING OFFICER. The amendment proposed by the Senator from South Dakota will be stated.

The SECRETARY. It is proposed to add to the words already adopted:

Fuller's earth, unwrought or unmanufactured, $2 per ton.

Mr. PETTIGREW. Mr. President, up to two years ago all the fuller's earth used in this country was imported from England. They had a complete monopoly of the American market. Some of it was imported unmanufactured and some ground and prepared for use. The price was from nineteen to thirty dollars per ton. About three years ago fuller's earth was discovered in Georgia and Florida and Virginia and South Dakota. We began the production of this article. Last year we produced in this country about 20,000 tons. We consume about 50,000 tons, and nearly all of that which we produced and placed upon the market last year came from Florida, where the deposits are unlimited in extent and inexhaustible. The veins are 8 feet thick—from 4 to 8 feet—and the clay is of superior quality, fully equal to the best imported from Great Britain. One firm is producing 1,000 tons a month at the present time.

We can supply the American market, but the rate of transportation on fuller's earth from Florida to New York is about $5 per ton, while often, for the purpose of getting loads for ballast, vessels will carry clay from England for $1 per ton laid down in New York. Therefore the duty on the raw earth should be increased so as to protect the production of the article by the American producer.

This earth is used for various purposes. It was formerly used for cleansing furs and clothes. It is now used for clarifying oil, and the market is constantly increasing and widening. The deposit in my own State contains several million tons. The vein is 8 feet in thickness and covers a thousand acres of ground. It is very pure and of excellent quality, but owing to the difference in the freight rates and the difference in the cost of labor we can not compete without this protection.

I notice some rather remarkable things in connection with this paragraph. In the first place, the House provided that the duty on unwrought and unmanufactured clays or earths should be $1 per ton, and on wrought or manufactured, not specially provided for in this bill, $2 per ton. This included fuller's earth. There is a little factory in Connecticut, and Connecticut is represented on the committee, and therefore the committee bring in an amendment to increase the rate on wrought or manufactured fuller's earth to $3 a ton, but they leave the unwrought or unmanufactured article still at the same rate imposed by the House.

My amendment proposes to increase the duty on unwrought or unmanufactured earth the same as we have increased it on the wrought or manufactured earth. No attention is paid to the interest of the producer of the article in this country, but the little mill that grinds English stock must be specially taken care of, because it is represented on the committee. Therefore, without any opposition whatever, the duty is increased to $3 on the ground and prepared earth. Nothing is done for the producer, nothing is done for the men who discovered the article and reduced the price to the consumer from $19—$30 per ton down to $12 a ton. This little machine was running in Connecticut when they charged $30 a ton for the article. It did not reduce the price to the American consumer one penny, but when Americans discovered this article in Florida and Georgia, and Virginia and South Dakota, and began to put it upon the market, the price went down. Who is rewarded? The mill that kept up the price. The duty is increased for them to $3 a ton, because they are represented on the committee. I wonder if there is an institution at any crossroads in Connecticut that is not thoroughly taken care of by this bill. If there

is one that is not taken care of, it is an oversight. There is no question about that.

Furthermore, the committee brought in an amendment to increase the duty on china clay from $2 to $3 per ton. That is found in Pennsylvania and New Jersey. If an article is discovered anywhere outside of the excessively protected States, who have had the special favor of the Government in every respect for years, it can shift for itself; but if it is found in a State where every industry is protected 4 feet deep, then it gets additional favors.

For whosoever hath, to him shall be given, and he shall have more abundance: but whosoever hath not, from him shall be taken away even that he hath.

The committee bring in the amendment for $3 a ton on china clay because, I suppose, the foreign importer can land it by water in Pennsylvania, or is it because the Senator from Pennsylvania [Mr. QUAY] has 4 bushels of manuscript which he has told the committee he would bring in and read for a week, and has thereby obtained these concessions? The rest of us had better get 4 bushels of manuscript.

Mr. QUAY. The Senator from Pennsylvania must disclaim any intention to bulldoze this committee.

Mr. PETTIGREW. The Senator from Pennsylvania says he must disclaim any intention to bulldoze this committee. It is unnecessary, doubtless. He had to bulldoze the committee that prepared the last tariff bill, and his manuscript is saved until when we get into power.

Fuller's earth in the State of South Dakota, for instance, is dug from beds not very deep under ground. It is then ground into powder and dried either in the sun or dried by artificial means, and then it is ground and screened and prepared for use. We make the duty $1 on the unwrought or unmanufactured, although the freight rate from the beds of clay in the United States to New York is more than twice what it is from the beds of clay in England, and then we impose a duty of $2 more for the benefit of the little machine in Connecticut.

All they have to do after the earth comes in is to dry it, grind it, and screen it to make it fit for use, and yet they are to have $3 a ton. They will not grind one single pound of American clay, and they do not propose to. They want the duty of $3 so that they can grind English clay, although the quantity in this country is unlimited. If they are so anxious to help the laboring man, it seems to me they ought to be willing to employ American clay, mined by American miners, and then pay the freight, instead of paying it to British ships, to American railroads, if we have any American railroads. Senators talk about wanting to encourage our own commerce, and yet whenever a single thing in this bill can be secured cheaper abroad for the use of the Eastern manufacturers, they are anxious to get it in foreign bottoms and pay the freight to foreign shipowners.

I sometimes think that the only real political principle which agitates the representatives of New England on this floor is that of enlightened self-interest. I know it is enlightened, because it is always in the interest of New England, and everybody else can go.

I know, Mr. President, it is no use to contend against the committee. I understand full well the arrangement and understanding, and I know, of course, that this increase will be given to the clay of Pennsylvania and New Jersey, and this increase will be given to the mill that grinds the fuller's earth in Connecticut. I propose to have the people understand just what is going on. I propose to have it understood what this bill is gotten up for and in whose interest it is manipulated, and that is all I expect to accomplish.

Mr. PLATT of Connecticut. Mr. President, it is true that the business of grinding fuller's earth is carried on in Connecticut. It is also true, I suppose, that there has been a bed of fuller's earth found in Florida. What I understand the Senator from South Dakota wants—who is not a protectionist except in spots, when he has some particular thing that he desires to have protected—is that the Connecticut mill shall be obliged to buy the fuller's earth, which it is said has been found in Dakota, in its raw state, and transport it by rail to Connecticut and grind it there, and then send it back to Dakota for use, or as far back as it can find purchasers. Now, I do not think there is very much inconsistency in that.

Mr. PETTIGREW. Mr. President, the deposit of fuller's earth in South Dakota would not go to Connecticut to be ground, nor to the Eastern market. It would go, however, into the markets of the West, to Kansas City, where it would be used to clarify lard oil, cotton-seed oil, etc. But the clays of Florida can come into the New York market if you give them a chance to do it, and there is no reason why they should not be allowed to come. There is no argument, except an effort to create a prejudice in the mind of somebody, why the Connecticut mills should not buy the Florida earth and grind it, and be obliged to buy it or else go unprotected themselves.

Further, Mr. President, I do not know that I care to disclaim or admit the charge as to whether I am a protectionist or not. I believe that the nation should do its own work. I believe that a varied industry is necessary to the development of the best traits of character and the highest civilization among any people. I believe that it is the nation's duty to encourage that varied industry which will enable every talent among its people to be developed to its fullest extent.

Because I refused to vote for 185 per cent duty on woolen goods, the Senator from Connecticut stands up here to say that I am a protectionist only in spots. Because I refused to vote for 700 per cent duty on the lower grades of silk, used by the poor people of this country, the Senator from Connecticut says I am a protectionist only in spots.

Well, if to be a protectionist all over a man must vote for 700 per cent duty on the cheaper articles and for 10 per cent on the higher priced articles that are used by the rich, I am only a protectionist in spots. If to be a protectionist I must vote for an extra duty on sugar purely and absolutely in the interest of the most corrupt and demoralizing trust ever organized in this country, at the behest and dictation of a political caucus, then I am a protectionist only in spots. If I must vote for every trust, if I must vote for every combination, vote special privileges to the few, high rates of duty, differential duty, in order that they may be encouraged in their raids upon the people of this country, then, Mr. President, I am not a protectionist all over.

Is the Republican party a protection party? Why, Mr. President, the issue of protection has departed from our politics. When New England made her trade with the cotton Democrats of the South for the purpose of putting a duty on cotton, thinking to break up the solid South, she abandoned the only principle, the only issue, that gave the party character, and it has left you nothing with which to fight the next campaign. All the Republican party stands for to-day, inasmuch as protection is no longer an issue and the South is broken up, is as the champion of the trusts and the gold standard, as the special representative of the classes against the masses.

Mr. PASCO. Some very valuable deposits of this fuller's earth are found in the State which I have the honor in part to represent, and they have been developed and are being developed to a very considerable extent. The most valuable deposits are in Gadsden County, near the town of Quincy, and I have received some communications from the general manager of the company that is developing them that I shall ask to have read at the desk. This is the first one, which I ask the Secretary to read.

The Secretary read as follows:

QUINCY, FLA., *January 25, 1897.*

DEAR SIR: As you are probably aware, we have been mining and shipping fuller's earth from this section for the past two years, and our shipments from Quincy for the year 1896 represented 6,000 tons. Our Florida product is used in competition with the finest grades of English fuller's earth, and owing to the competition of the American product the shippers of English fuller's earth have reduced their prices very materially for the past year. Nearly all of our consumers report that as satisfactory results can be obtained with the American article as with the imported, but owing to the very low ocean freight rates and the desire on the part of the English people to hold the market, they can only hold the trade by reducing the price and driving the American product out of the market.

Under the McKinley law the rate on clay imported was $3 per ton on the ground and prepared article and $1.50 on the crude. Under the Wilson bill the rates were reduced to $2 on the finished material and $1 on the crude. The fuller's earth industry in this State promises to become very important, and in order to protect and build up the industry we are anxious to have the rates restored as they were under the McKinley law. This would certainly aid in building up the industry in Florida, and as the discovery of fuller's earth in the United States is so recent we feel fully justified in asking for protection.

I would also say that contracts can be made with the English people to ship fuller's earth from Liverpool to Chicago and other Western points at a much lower rate of freight than prevails in our own country, owing to the low proportion charged by the Atlantic steamers.

I would ask you to give this matter your consideration, and, if consistent with your views, extend your aid in supporting a new Florida industry.

With best respects, I am, yours, very truly,

WM. M. CORRY, *General Manager.*

Hon. SAMUEL PASCO,
Senate Chamber, Washington, D. C.

Mr. PASCO. I ask also that extracts from the following letter may be read at the desk as marked.

The Secretary read as follows:

QUINCY, FLA., *April 17, 1897.*

DEAR SIR: As you are doubtless aware, fuller's earth of the finest quality was discovered in Florida a little over two years ago, and I am general manager for a firm that will ship over 12,000 tons out of the State this year. In order to introduce fuller's earth to the trade successfully, we must first overcome a deep-seated prejudice that exists on the part of consumers in favor of the imported fuller's earth, and the introduction and general use of the American article is surrounded by some difficulties. The importers of English fuller's earth have been working strenuously to prevent an increase on the duty, and in order to shut out American competition have formed a combination, and have been steadily reducing prices for the last two years.

The freight rates on Florida fuller's earth to New York is $4 per ton, while the rate from Liverpool to New York and other American ports has been made as low as $2 per ton, and in many cases the material has even been carried as ballast at a nominal price. English fuller's earth has been known commercially for the past three hundred years, and producers and shippers of the article have amassed fortunes in the business. All of this competition must be met in order to introduce successfully the Florida product, and where the Florida earth has been given a fair trial the consumers admit that it is fully equal in many branches of the business to that which is imported.

Under the McKinley bill the rates on fuller's earth were fixed at $2 on the crude and $3 on the ground and milled article per ton. Later on the Wilson bill reduced these rates to $1 and $2 per ton on the two grades, respectively. We have asked that the McKinley rates be restored in order to encourage the consumption of the American product, which even at the time of the passage of the Wilson bill was an unknown commodity. We understood that the Ways and Means Committee of the House would report favorably on the advance in the rates, restoring the McKinley figures, but the bill as passed by the House shows no change from the rates provided for in the Wilson bill.

* * * * * * *

The discovery of fuller's earth in this country caused a great deal of uneasiness on the part of those engaged in mining fuller's earth in England, and as soon as the American article was placed upon the market the price of the imported article was reduced, and the figures have been lowered at frequent intervals since we have been shipping the Florida product. Therefore the advance in the rate of $1 per ton would still give the consumers a very marked advantage as compared with the prices paid in years gone by, and they would have no ground on which to base a complaint. The Florida product has cheapened the cost of the imported article to all consumers, but the foreigners have the advantage of the freight rates, years of experience in the business, and with large accumulations of wealth are trying to drown out this new industry in our own country.

I think our demands are reasonable, and trust you will use your influence in behalf of the American fuller's earth.

Yours, very truly,

WM. M. CORRY, *General Manager.*

Hon. SAMUEL PASCO,
Senate Chamber, Washington, D. C.

Mr. PASCO. Mr. President, many of the people who compose this company live in other States. Some of them have moved into Florida. They have brought there a large amount of capital, and they have developed this and other industries since they came there.

I have thought it proper that they should be heard upon this subject. For this reason I have had these letters read, so that they may be considered by the Senate and by the committee. I have felt that my duty toward these gentlemen would be discharged by bringing this matter to the attention of the committee, and I have done so; but the committee have not been convinced that the duty upon fuller's earth in its unwrought or unmanufactured state should be increased. This company is not directly interested in the manufactured article, but the committee has seen fit to favor a much higher duty upon the article in its wrought state, and propose to raise that, but leave the duty on the unmanufactured article where it was under the Wilson Act.

So far as I am personally concerned, I have been disposed to accept the action of my party friends when they made the Wilson Act, and I have not asked, and do not ask, for any increase, but I do not think that the committee should raise the duty upon the manufactured product and still leave the duty on the unwrought article where it is left in the Wilson Act.

I wish to state now, so that there may be no misunderstanding as to my own position, that I shall not vote for this increase, and I do not myself ask for any increase. The responsibility must rest with the committee, who have all the facts before them and the reasons urged by my correspondents for a higher rate of duty on the unwrought article.

Mr. HOAR. I should like to inquire of the Senator what, in his judgment, should the duty on the crude article be?

Mr. PASCO. The duty on the unmanufactured article was placed in the Wilson Act at $1 a ton, exactly where it is placed in the present bill. So that I presume the Senator from Massachusetts and the committee agree that the Wilson law was correct in that respect. These gentlemen whose letters have been read differ with the committee and they differ with the committee that made up the Wilson Act, and they ask for the higher rate, the same rate that is moved by the Senator from South Dakota. That proposition I have presented to the committee. They still adhere to the idea that the Wilson Act put a sufficiently high duty upon unwrought fuller's earth, and they have left it where the Wilson Act did leave it. But when you come to the manufactured article, which is manufactured in a Northern State, the committee has seen fit to put on a much higher rate of duty.

I think myself if the committee had been disposed to treat the article with entire fairness they would have carried out the wishes of these people who are interested in this matter in my State by increasing the duty on the raw material also; but I have not made that motion, and I do not expect to. I have felt that my duty in the matter was discharged by bringing the views of these gentlemen to the attention of the committee and of the Senate, and I know very well that if I should make a motion myself to increase the duty on the unwrought article it would have no effect. I understand that the duty is fixed and settled by the action of the committee and the action of the Republican caucus, but I deem it proper to present the views of these gentlemen and spread them upon the record, so that they may have a hearing, and the friends of the bill can act as they deem best upon their request. They will understand that the reason why the relief which they desire has not been granted to them is because the committee which framed the bill and those who support them politically do not think the higher rate of duty should be granted, and it is only through them that favorable action can be secured.

Mr. HAWLEY. Mr. President, there have been some misapprehensions here, especially on the part of the Senator from South Dakota [Mr. PETTIGREW]. The manufacturers of the advanced article were greatly pleased to find that this crude earth had been discovered in the United States. When the business began the manufactured article sold at $28. An American firm contracted with the producers of the earth abroad and entered upon the business here of advancing the crude earth. It went on for about three years, and then the British company declined to renew and continue it any further. The American company was obliged to resort to other parties not so convenient, I think, in England, to get the earth and continue the business. Then they found to their great pleasure that the crude article had been discovered in South Dakota and in Florida, which to some extent emancipated them from the trammels of the English quarrymen or miners, whatever you may call them. So there should be no controversy between the Senator and me on that point.

He is altogether mistaken when he says that Connecticut and our New England people are selfish about this matter, that if we get the duty we want we do not care about anybody else. That is a most tremendous mistake. If anybody on earth has studied the tariff it is the New England manufacturers, and they know that it can not be confined to any one locality. I repeat what I have before stated, that in my experience of now sixteen years here and some years in the other House besides I have had but one letter from Connecticut asking me to advocate free wool, and yet you know we are largely engaged in the higher classes of woolen manufacture there, and that letter was from what is sometimes called a Bourbon Democrat who was engaged in the woolen business. He wanted to have wool free. He is not the ideal New Englander that the Senator sets forth. He is the exception, the sole exception, I might say, in my dealing of sixteen years with the subject.

We know very well that a tariff can not be made up in that way. Nobody knows it better. The New England men hasten to do whatever is generous and just—I leave out the word generous—they hasten to do what is just by our friends all over the country. We desire, in the substantial language of the Democratic platform of 1884 and 1888, to have the difference in wages between the United States and other countries considered in all adjustments of the tariff. That is first-rate Republican doctrine, and that we aim at in this measure. I want to have all the American labor that is concerned in this business have a fair chance at protection; and we rejoice in the discovery of fuller's earth in this country by reason of the fact that it emancipates us from those men abroad.

Mr. PASCO. I suggest to the Senator from Connecticut that there is a very simple way of satisfying these gentlemen who are interested in these deposits in Florida that they are going to be treated with exactly the same degree of fairness that the citizens of his own State are treated, and that is by persuading his colleague, who is a member of the committee which has charge of the bill, and who has an influential voice in their deliberations, to raise the duty upon the unwrought material as well as upon the manufactured article.

But when we see the duty upon the manufactured article largely raised, while the duty upon the unmanufactured article is left where it was before, the people will not be satisfied that they are treated with that exact fairness and justice that the Senator from Connecticut says he is disposed to treat the people of all sections of the Union.

But this seems to be another case similar to the cotton ties, of the bagging and other articles used in my section of the country which have a duty imposed upon them, while similar articles used by the Western farmers are not subjected to these high rates.

Mr. HAWLEY. Perhaps it is a case like that of Bessemer steel. The price went down from $150 a ton to $20 or $21. Perhaps it is a case like tin plate, which, it was said, could not be manufactured in this country, but it is successfully being done under the influence of the protective doctrine.

I never heard anything said—nothing was ever said to me—about putting a duty of $2 upon this crude earth. I know that friends of mine who are engaged in the business wanted the duty on the manufactured earth to be $3, that it might compensate for the difference between the labor of the men who get 60 or 75 cents over there, while the same classes of men, comparatively, get a dollar and a half or two dollars here.

I only say that if the Committee on Finance can adjust this thing more fairly, if they think it would be better for American labor and American capital to make any change in the bill, I shall be perfectly willing to consent to it. But as for the influence over my colleague which the Senator refers to, I have not found it avail much during the consideration of the bill. I think that he stands so erect that sometimes, to show his independence, he does not do exactly what I want. But I find no fault with him, as a general rule, about anything. He has done in the bill exactly what he thought would be right and what I believe I thought right at the time.

Mr. ALLISON. I ask that paragraph 88 with all the pending amendments may be passed over.

The PRESIDING OFFICER. The Senator from Iowa asks that paragraph 88 with the pending amendments may be passed over.

Mr. ALLEN. Is that the paragraph under discussion?

The PRESIDING OFFICER. It is.

Mr. ALLEN. To be passed over until when?

The PRESIDING OFFICER. To be passed over for the day. If there be no objection, it will be so ordered.

Mr. ALLISON. If it suits the convenience of Senators, I ask that we now go to page 59.

The PRESIDING OFFICER. The amendment which was passed over on page 59 will be stated.

The SECRETARY. The Committee on Finance propose to strike out, beginning in line 6, on page 59, paragraph 189, as follows:

189. Watch movements having not more than 7 jewels, 35 cents each; if having more than 7 jewels and not more than 11 jewels, 50 cents each; if having more than 11 jewels and not more than 15 jewels, 75 cents each; if having more than 15 jewels and not more than 17 jewels, $1.25 each; if having more than 17 jewels, $3 each, and in addition thereto, on all the foregoing, 25 per cent ad valorem; watches, watch cases, and parts of watches, including watch dials, chronometers, box or ship, and parts thereof, clocks and parts thereof, not otherwise provided for in this act, whether separately packed or otherwise, 40 per cent ad valorem; all jewels for use in the manufacture of watches or clocks, 15 per cent ad valorem.

And in lieu thereof to insert:

189. Watches, clocks, and chronometers, and parts thereof, finished or unfinished, whether separately packed or otherwise, and not specially provided for in this act, 40 per cent ad valorem; jewels for use in the manufacture of watches or clocks, 10 per cent ad valorem.

Mr. ALLISON. The majority of the committee instruct me to offer a modification to this paragraph, in line 6, after the word "movements," by inserting "whether imported in cases or not, if," or I will say, "whether or not imported in cases, if," and then by inserting a comma after the word "cases."

Mr. TURPIE. I suggest that it should read "whether imported in cases or not."

Mr. ALLISON. Does the Senator from Indiana think that that phraseology would be better?

Mr. TURPIE. I do.

Mr. ALLISON. Very well. That is what I had originally proposed, and therefore I accept the suggestion of the Senator from Indiana.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa [Mr. ALLISON] on behalf of the committee will be stated.

The SECRETARY. In line 6, after the word "movements," it is proposed to insert "whether imported in cases or not, if;" so as to read:

Watch movements, whether imported in cases or not, if having not more than 7 jewels, 35 cents each.

Mr. ALLISON. That is right.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be considered as agreed to, in the absence of objection.

Mr. ALLISON. In line 14, after the words "ad valorem," I move to strike out the word "watches" and the comma following it.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 189, line 14, page 59, after the words "ad valorem," it is proposed to strike out the word "watches" and the comma.

The amendment was agreed to.

Mr. ALLISON. In line 18 I move to strike out all after the words "ad valorem" down to and including the words "ad valorem," in line 20.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In line 18, after the words "ad valorem," it is proposed to strike out the semicolon and the words "all jewels for use in the manufacture of watches or clocks, 15 per cent ad valorem."

The amendment was agreed to.

The PRESIDING OFFICER. If there be no objection, the paragraph as amended will be considered as agreed to.

Mr. VEST. Let us first hear it read, Mr. President.

The PRESIDING OFFICER. The Secretary will read the paragraph as amended.

The Secretary read as follows:

189. Watch movements, whether imported in cases or not, if having not more than 7 jewels, 35 cents each; if having more than 7 jewels and not more than 11 jewels, 50 cents each; if having more than 11 jewels and not more than 15 jewels, 75 cents each; if having more than 15 jewels and not more than 17 jewels, $1.25 each; if having more than 17 jewels, $3 each, and in addition thereto, on all the foregoing, 25 per cent ad valorem; watch cases and parts of watches, including watch dials, chronometers, box or ship, and parts thereof, clocks and parts thereof, not otherwise provided for in this act, whether separately packed or otherwise, 40 per cent ad valorem.

The paragraph as amended was agreed to.

The PRESIDING OFFICER. The Chair understands that the new paragraph 189, originally proposed by the committee as a substitute for paragraph 189 of the bill as it came from the House, is intended to be disagreed to.

Mr. ALLISON. Yes, that is intended to be disagreed to.

The PRESIDING OFFICER. That will be the order, in the absence of objection.

The Secretary proceeded to read paragraph 109, which the Committee on Finance propose to amend, in line 8, after the word "painted," by striking out "window glass and stained or painted;" in line 9, after the word "windows," by inserting "or parts thereof;" and in line 12, after the word "manufactures," by inserting "of glass or paste, or;" so as to make the paragraph read:

109. Stained or painted glass windows, or parts thereof, mirrors, not exceeding in size 144 square inches, with or without frames or cases, and all glass or manufactures of glass or paste, or of which glass or paste is the component material of chief value, not specially provided for in this act, 45 per cent ad valorem.

Mr. ALLISON. We are not prepared to deal with these matters in this and the succeeding paragraphs, it having been the expectation of the committee that the leather schedule would have been taken up to-day; but owing to the illness of a Senator we have been obliged to forego its consideration. I think, Mr. President, this being Saturday, and not being prepared with the leather schedule, which has gone over until Monday, I shall suggest an adjournment or an executive session.

Mr. WHITE. If the Senator will pardon me a moment, I have a statement which has been furnished me with reference to the methods utilized in perpetrating frauds on the Government in the sugar trade. I have had it examined by gentlemen who have expert knowledge on the subject, and they think the information contained in the statement is of value. I send it to the desk and ask that it may be inserted in the RECORD as a part of my remarks.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The statement referred to is as follows:

RAW-SUGAR FRAUDS.

MALDEN, MASS., *June 7, 1897.*

The determination of custom duties levied by the United States Government upon imported sugars is effected by two standards, viz: Color, and the polariscope test.

Under the provision of the McKinley tariff law the duty imposed was specific, all sugars darker than a certain color being free of duty, and all sugars lighter than the said color being subject to a duty of one-half cent per pound. The polariscope test was not required.

Under the provisions of the Wilson tariff law the duty imposed is both specific and ad valorem. Hence the polariscope test, which determines the percentage of refinable sugar present in the raw sugar, and upon which its value of course depends, is again in use, in addition to the color test.

It is manifest that any means of artificial discoloration, or of vitiation of the polariscope indication, which can be quickly and cheaply removed at the refinery, is to the financial advantage of the importer.

I propose to demonstrate that by an inferential collusion between the American Refinery Company, commonly known as the sugar trust, on the one hand, and the producers of raw sugars on the other hand, the United States Government has, during the past several years, been defrauded of immense sums of money through the above-indicated means.

It is true that both the above-mentioned laws provided extra duty for discolored or adulterated sugars. It is equally true that the law on this point was and is a dead letter. It may be stated that appraisers recognize this fact, and while not at liberty to quote individual testimony, I may add that each one feels that he "is not big enough to fight the trust."

In order to intelligently demonstrate where and how fraud is practiced, it is necessary, first, to explicate in detail the nature and use of the standards; second, to sketch in outline the beginning, and in some detail the end, of raw-sugar production; third, to explain the inception of the refining process.

Standards—As to color, the so-called "Dutch standards" are used. A certain firm in Holland each year prepares with great care, and seals in white glass bottles, fifteen samples of raw sugar, numbered from No. 6, in color a dark brown, and ranging to No. 20, in color almost white.

These samples serve as standards for the ensuing twelve months, when they are renewed. Appraisers are provided with sets of these samples, and the grading of the raw sugar is effected by placing a sample of the latter beside the former and "matching." It will be seen that the result will depend upon individual expertness.

As to the polariscope test.—If a ray of polarized white light be examined after passing through a solution of crystallizable sugar, it will be found to have become colored. If the polarizing apparatus be rotated to the right, a series of changes of color will ensue in the ascending order of the Newton scale, viz, from red through orange, etc., to violet.

If a noncrystallizable sugar solution be substituted, similar phenomena will be observed. But with this difference, to produce the same sequence of changes of color the rotation must be to the left. Hence crystallizable sugars are classified by the chemist as dextrogyrate, or right-handed, and noncrystallizable sugars as levogyrate, or left-handed.

If, now, a solution containing both crystallizable and noncrystallizable sugar be substituted, the direction and degree of rotation required to produce a particular result will be determined by the relative proportion of the sugars present in the solution.

Advantage has been taken of the principle involved in the above facts, and a most perfect optical instrument, known as the saccharometer, or, more commonly, simply as a polariscope, has been devised and is in universal use for the testing and grading of sugar.

In this instrument when the index is at 0 degree and nothing intercepting the light, the field of view, which is circular, is of a uniform gray tint. Upon interposing a solution of sugar, one-half of the circle becomes darker than the other, and an adjusting screw must be operated to compensate for the rotation due to the sugar solution and restore a uniformity of tint. The extent of adjustment required to produce this result is indicated by an index upon a scale so graduated that 1 degree of displacement corresponds to .2048 gram of cane sugar dissolved in 100 cubic centimeters of water and viewed through a tube 200 millimeters in length. Given a sample of sugar

to be analyzed, 26.048 grams are weighed out and dissolved in the above quantity of water. If chemically pure and anhydrous, the scale will read 100 degrees of displacement, or 100 per cent of sugar; and if impure, correspondingly less.

In the application of polariscope analysis to sugar two cases may arise: (a) When no other optically active substance is present, and (b) when invert sugar is also present.

It should be stated at this point that crystallizable sugar, from whatever source, has come to be known as "cane" sugar (sucrose), and noncrystallizable sugar as "invert" sugar (glucose), and by these terms will be referred to in the balance of this article. Note also that cane sugar is readily inverted, but that the action can not be reversed, and that the cane sugar is the commercially valuable article.

Referring now to (a), the sample is weighed and dissolved as above, certain necessary precautions being taken to insure exactness. The tube of the polariscope is filled with the solution and placed in the instrument. The adjusting screw is turned until uniformity of tint in the two halves of the field is restored, when the number of degrees (or percentage of cane sugar in the sample) is read off the scale.

(b) When this condition obtains, the reading will be vitiated. A correction is made by the method of inversion. The direct reading is taken in the usual way. The solution is then subjected to the action of an acid, which has the effect of changing the cane sugar present to invert sugar, the invert sugar originally present not being altered. A second reading is now taken, and the two readings form the basis for a calculation which will give the percentage of cane sugar originally present.

Passing to a consideration of the production of raw sugar from the crop of beet, cane, or sorghum, as the case may be, it will be sufficient if attention is confined to the sugar cane.

The older and simpler process of sugar production on the plantation is, in brief, as follows: The ripened cane having been cut and transported to the mill, is subjected to pressure between massive rolls. The water in the expressed juice is removed by boiling in a series of open pans set in a furnace, and known as the "copper wall" or battery. The high temperature at once darkens the sugar and inverts a large percentage of the cane sugar originally present in the juice. After boiling, the thickened juice or "masse-cuite" is "struck out" into shallow tanks, there to cool and complete the crystallizing process which began during the boiling, and is then placed in perforated receptacles, from which the invert sirup (molasses) in part drains, carrying with it much of the grain. The resulting mass is variously known as melada, muscovado, etc., and is a legitimately dark-colored, low-grade, and low-priced raw sugar, comprising a soft grain, a large percentage of invert sugar and débris, and giving rightly a low reading with the polariscope or by the Dutch-color test.

This sugar was the product of the "good old time" when "niggers" were cheap and a vacuum pan an unknown adjunct.

The above-outlined process was very wasteful, and reclaimed but a small part of the cane sugar present in the expressed juice. According to Lock and Newland, it is still practiced in some backwoods countries, but is pretty well obsolete in the English and French colonies, and its manufacture is decreasing rapidly in Louisiana. Modern business requirements demand improved methods, and these consist in improved means of extracting the juice from the cane, evaporation under more favorable conditions, and a more thorough separation of the sirup from the sugar. A part of the second condition consists in the use of the vacuum pan for the final boiling, the resulting thickened juice or "massecuite" comprising a hard grain in a high-grade sirup, which is worked in and reboiled with fresh lots of juice. The separation of the sirup is effected by the use of the centrifugal machine, displacing the gravity drainage methods of the older systems. The result is a high-grade, hard-grained sugar, polarizing at 92 degrees to 97½ degrees.

It is at this point that the fraud is accomplished. If the raw sugar produced as described were shipped to the United States it would be subjected to a high duty by either the color or polariscope test. To escape this result two methods are available. The simplest and most practiced is as follows:

When the boiling in the vacuum pan is completed, and before discharging to the centrifugal machines a charge of very low grade sirup is introduced into the pan, which at once forms a coat over each grain of sugar. A little extra heat is given to fix the coat and then the pan is discharged to the centrifugals, in which the sugar is purged gently of any surplus sirup. The result is a reduction in the polariscope grading of 2 to 6 degrees. That is, a raw sugar entered at the custom-house as 88 degrees should be 92 degrees to 94 degrees, and at 95 degrees should be 97 degrees or even 97½ degrees. A rough test consists in putting raw sugar in a bottle with water enough to just cover, shaking, and pouring off the water. The sugar crystals will then appear about the color of rock salt.

The second method requires a more detailed description of the manner of using the centrifugals. The massecuite unadulterated is discharged from the pan into a reservoir termed a "mixer," below which are located the centrifugals, which are baskets of wire gauze revolved horizontally at a high rate of speed within a metal guard or curb. A charge of massecuite is drawn into a centrifugal through a gate in the reservoir. The machine is set in motion, the charge tiles to the circumference, and the sirup leaves the crystals through the meshes of the basket, is caught by the curb, drains to a gutter and thence to a tank to be reworked. Next a spray of water is directed to the interior of the basket and against the sugar. The centrifugal force drives it violently through the sugar, washing away the last vestige of high-grade sirup and leaving a hard, light-colored, and nearly pure grain, as above described. The sugar while still in motion is sprayed with a low-grade, dark-colored, sticky invert sirup. Each grain receives an intimate coating. The centrifugal is then discharged, the result being as above.

We are now to consider the raw sugar as having been received at the refinery after successfully passing the appraiser as a low-grade sugar. By the older methods the sugar was at once melted, bag filtered, char-filtered, boiled, dried, and barreled. Not so to-day. This raw sugar is first placed in a centrifugal, a stream of water turned upon it, washing away the film of sticky, dark-colored sirup, and behold the high-grade sugar concealed within.

To give an idea of the trifling expense attendant upon the washing of sugar, it may be stated that 10 men at $10 per week can wash in six days nearly 10,000,000 pounds of sugar. This is about 1 cent per 1,000 pounds.

This fraud was first practiced with German beet sugar, and a specific instance will best illustrate the growth and present extent.

The Standard Refinery of South Boston has a capacity of 800 to 1,000 tons of sugar per day. Four, now six, years ago (1891) six small centrifugals were devoted to washing 75 to 100 tons beet sugar per day. This plant was at once increased 50 per cent, which was to the extent of space then available. Shortly after the construction of a washhouse was undertaken. This house is 50 feet wide, 70 feet long, and comprises six stories and a melting pit. To-day practically all the sugar received is washed.

Mr. CHILTON. I offer an amendment to the pending bill, which I ask to have read and printed in the RECORD.

The PRESIDING OFFICER. The amendment intended to be proposed by the Senator from Texas will be stated.

The SECRETARY. It is proposed to amend the bill by adding at the end of section 24 the following:

Provided, That in allowing the drawback on sugar hereunder it shall be calculated that refined sugar has been produced in the process of refining in an amount equal to the percentage or number of degrees of pure sugar shown by the polariscopic test at the time of the original importation.

The PRESIDING OFFICER. The amendment intended to be proposed by the Senator from Texas will be printed and lie over.

Mr. JONES of Arkansas. I was out of the Chamber for a few minutes, and I understand that in my absence the paragraph in regard to watches and watch movements was taken up and acted upon. I wish to have that go over until the next meeting of the Senate.

Mr. ALLISON. Why not go on with it now?

Mr. JONES of Arkansas. I did not expect that paragraph to be reached to-day. Quite a number of paragraphs seem to have been passed over to get at it. I was out of the Senate Chamber for a few minutes. If I had known that the paragraph was likely to be reached, I should have been ready; but I prefer that it should be allowed to remain open until Monday.

Mr. ALLISON. Very well, let the paragraph go over until Monday.

The PRESIDING OFFICER. That will be the order, in the absence of objection.

Mr. CAFFERY. I ask to introduce a brief giving some reasons why the tax on cigarettes should not be placed at $1 a thousand. I was not here when the cigarette schedule was taken up, and I offer the protest in the hope that it may have due weight with the conference committee.

The PRESIDING OFFICER. The paper referred to by the Senator from Louisiana will be received and lie on the table.

EXECUTIVE SESSION.

Mr. PLATT of Connecticut. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eighteen minutes spent in executive session the doors were reopened, and (at 3 o'clock and 10 minutes p. m.) the Senate adjourned until Monday, June 28, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 26, 1897.

CHIEF JUSTICE OF ARIZONA.

Hiram C. Truesdale, of Arizona, to be chief justice of the supreme court of the Territory of Arizona, vice Albert C. Baker, to be removed.

ASSOCIATE JUSTICES OF ARIZONA.

George R. Davis, of Arizona Territory, to be associate justice of the supreme court of the Territory of Arizona, vice Joseph D. Bethune, to be removed.

Fletcher M. Doan, of Arizona Territory, to be associate justice of the supreme court of the Territory of Arizona, vice Owen T. Rouse, to be removed.

Richard E. Sloan, of Arizona, to be associate justice of the supreme court of the Territory of Arizona, vice John J. Hawkins, whose term expired April 14, 1897.

COLLECTORS OF INTERNAL REVENUE.

Herschel S. Harkins, of North Carolina, to be collector of internal revenue for the fifth district of North Carolina, to succeed Samuel L. Rogers, resigned.

Michael W. Sutton, of Kansas, to be collector of internal revenue for the district of Kansas, to succeed Richard B. Morris, resigned.

SURVEYOR-GENERAL OF MONTANA.

Edward W. Beattie, of Helena, Mont., to be surveyor-general of Montana, vice John S. M. Neill, removed.

PROMOTION IN THE ARMY.

General officer.

Col. Caleb Henry Carlton, Eighth Cavalry, to be brigadier-general, vice Mills, retired from active service.

ASSISTANT ENGINEERS IN THE NAVY.

The following-named naval cadets, graduates of the Naval Academy, to be assistant engineers in the Navy, from the 1st day of July, 1897, to fill vacancies existing in that grade, namely:

Thomas M. Dick, of South Carolina.
Charles K. Mallory, of Tennessee.
Newton Mansfield, of Ohio.
James P. Morton, of Missouri.
Daniel M. Garrison, of New Jersey.
Franklin D. Karns, of Ohio.
Frederick N. Freeman, of Indiana.
John F. Marshall, jr., of Texas.

Darwin R. Merritt, of Iowa.
Ernest F. Eckhardt, of Wisconsin.
Edward H. Dunn, of Connecticut.

ENSIGNS IN THE NAVY.

The following-named naval cadets, graduates of the Naval Academy, to be ensigns in the Navy, from the 1st day of July, 1897, to fill vacancies existing in that grade, namely:
Frank H. Brumby, of Georgia.
Frank P. Baldwin, of New Jersey.
William C. Davidson, of South Dakota.
Harris Laning, of Illinois.
David W. Todd, of California.
John V. Klemann, of New York.
William R. Cushman, of New York.
Henry V. Butler, jr., of New York.
Walter R. Gherardi, at large.
John R. Monaghan, of Washington.
James J. Raby, of Michigan.
James E. Walker, of North Carolina.
William H. Standley, of California.
Arthur T. Chester, at large.
Cassius B. Barnes, of Oklahoma.
Joseph C. Breckinridge, of Kentucky.
Albion J. Wadhams, of New York.
Kenneth M. Bennett, of New Jersey.
Edward H. Watson, of Kentucky.
Worth Bagley, of North Carolina.
Orlo S. Knepper, of Pennsylvania.
Michael J. McCormack, of Michigan.
Rufus Z. Johnston, jr., of North Carolina.

SECOND LIEUTENANTS IN THE MARINE CORPS.

The following-named naval cadets, graduates of the Naval Academy, to be second lieutenants in the Marine Corps, from the 1st day of July, 1897, to fill vacancies existing in that grade, namely:
Philip M. Bannon, of Maryland.
Newt H. Hall, of Texas.

POSTMASTERS.

W. W. James, to be postmaster at Monterey, in the county of Monterey and State of California, in the place of Fannie Ingram, resigned.

William A. Price, to be postmaster at Delaware City, in the county of Newcastle and State of Delaware, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1897.

Lenny C. Gilbert, to be postmaster at Oakland, in the county of Coles and State of Illinois, in the place of William Hunt, resigned.

Theodore Bailey, to be postmaster at Portland, in the county of Jay and State of Indiana, in the place of William W. Timmonds, resigned.

William A. Stevens, to be postmaster at Columbus, in the county of Bartholomew and State of Indiana, in the place of Thomas A. Rush, resigned.

Elias E. Wesseler, to be postmaster at Rockport, in the county of Spencer and State of Indiana, in the place of Charles Lieb, resigned.

Edward Hall, to be postmaster at Havre de Grace, in the county of Harford and State of Maryland, in the place of Edward Hall, whose commission expired February 16, 1896.

Francis Norwood, to be postmaster at Beverly, in the county of Essex and State of Massachusetts, in the place of Josiah Woodbury, removed.

C. E. Gross, to be postmaster at Boonville, in the county of Cooper and State of Missouri, in the place of John F. Rogers, resigned.

Theodore E. McCrary, to be postmaster at Lexington, in the county of Davidson and State of North Carolina, in the place of Lewis C. Hanes, removed.

A. S. Ellingson, to be postmaster at Northwood, in the county of Grand Forks and State of North Dakota, the appointment of a postmaster for the said office having, by law, become vested in the President on and after October 1, 1896, John F. Hogan, appointed by the President and by him nominated to the Senate, not having been confirmed.

S. W. Willey, to be postmaster at Hinton, in the county of Summers and State of West Virginia, in the place of George W. Warren, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 26, 1897.

SURVEYOR-GENERAL.

Edward W. Beattie, of Helena, Mont., to be surveyor-general for Montana.

CONSUL.

Albert W. Swalm, of Iowa, to be consul of the United States at Montevideo, Uruguay.

COMMISSIONER OF IMMIGRATION.

George B. Billings, of Massachusetts, to be commissioner of immigration for the port of Boston, in the State of Massachusetts.

DEPUTY AUDITORS.

George W. Esterly, of Minnesota, to be deputy auditor for the State and other Departments.

Edward McKitterick, of Iowa, to be deputy auditor for the Treasury Department.

INDIAN INSPECTOR.

Charles F. Nesler, of Newark, N. J., to be an Indian inspector.

INDIAN AGENT.

Henry J. Cleveland, of Arizola, Ariz., to be agent for the Indians of the Pima Agency in Arizona.

MARSHAL.

James M. Shoup, of Idaho, to be marshal of the United States for the District of Alaska.

POSTMASTERS.

Thomas L. Dunham, to be postmaster at Lestershire, in the county of Broome and State of New York.

Henry A. Pease, to be postmaster at Edgartown, in the county of Dukes and State of Massachusetts.

Joshua F. Ensor, to be postmaster at Columbia, in the county of Richland and State of South Carolina.

Charles L. Porter, to be postmaster at Plattsburg, in the county of Clinton and State of Missouri.

James W. Mills, to be postmaster at Versailles, in the county of Morgan and State of Missouri.

SENATE.

MONDAY, *June 28, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of the proceedings of Saturday last, when, on motion of Mr. QUAY, and by unanimous consent, the further reading was dispensed with.

LAWS OF ARIZONA.

The VICE-PRESIDENT laid before the Senate a communication from the secretary of the Territory of Arizona, transmitting copies of the Supplement of the Revised Statutes of Arizona for 1887; which, with the accompanying documents, was referred to the Committee on Territories.

PETITIONS AND MEMORIALS.

Mr. HARRIS of Kansas presented a petition of 11 citizens of Graham County, Kans., praying for the enactment of legislation granting the Fort Hays Military Reservation to the State of Kansas for the purpose of establishing thereon a western branch of the Agricultural College and Normal School; which was referred to the Committee on Public Lands.

Mr. BERRY presented a memorial of George R. M. Browne and 125 other citizens of Arkansas, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. TELLER presented the memorial of R. B. De Masters and 13 other citizens of Colorado, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. FORAKER presented the memorial of William Lawrence and 530 other citizens of Ohio, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. CARTER presented a petition of 24 citizens of Castle, Mont., praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

Mr. TURPIE presented a memorial of Local Union No. 77, National Union of the United Brewery Workmen, of Indianapolis, Ind., remonstrating against the proposed increase of the tax on beer; which was ordered to lie on the table.

He also presented the memorial of G. W. H. Kemper, ex-president of the Indiana State Medical Society, and sundry other citizens of Indiana, remonstrating against the passage of Senate bill No. 1063, for the further prevention of cruelty to animals in the District of Columbia; which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. BURROWS, from the Committee on Finance, to whom was referred the bill (S. 1311) to refund certain import duties, asked to be discharged from its further consideration and that it be referred to the Committee on Claims; which was agreed to.

Mr. RAWLINS, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 2048) for the erection of a public building at Fergus Falls, Minn., reported it without amendment.

Mr. QUAY, from the Committee on Public Buildings and Grounds, to whom was referred the bill (S. 2074) providing for the erection of an addition to the public building at Los Angeles, Cal., and appropriating money therefor, reported it without amendment.

Mr. DAVIS, from the Committee on Foreign Relations, reported an amendment intended to be proposed to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

BILLS INTRODUCED.

Mr. HARRIS of Kansas introduced a bill (S. 2290) granting a pension to Mrs. Lucy Pratt Estabrook, of Lawrence, Kans.; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2291) granting an increase of pension to Elijah A. Gilbert; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2292) removing the charge of desertion from the name of Benjamin Walker, of Ottawa, Kans.; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 2293) authorizing the Secretary of War to grant an honorable discharge to Michael McGrath, of Salina, Kans.; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. PASCO introduced a bill (S. 2294) to provide an American register for the steamer *Jacksonville;* which was read twice by its title, and referred to the Committee on Commerce.

He also introduced a bill (S. 2295) for the relief of the legal representatives of Joseph Sierra, deceased; which was read twice by its title, and referred to the Committee on Claims.

AMENDMENT TO THE TARIFF BILL.

Mr. CLARK submitted an amendment intended to be proposed by him to the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States; which was referred to the Committee on Finance, and ordered to be printed.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. GRAY submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was ordered to be printed, and, with the accompanying papers, referred to the Committee on Appropriations.

TRANSMISSISSIPPI AND INTERNATIONAL EXPOSITION.

The VICE-PRESIDENT. The Chair lays before the Senate the resolution submitted by the Senator from Nebraska [Mr. ALLEN], which comes over as a part of the morning business. The Chair observes that the Senator from Nebraska is not in his seat.

Mr. BACON. I suggest that the resolution lie over, as the Senator from Nebraska is not present.

The VICE-PRESIDENT. At the suggestion of the Senator from Georgia, the resolution will lie over until the Senator from Nebraska returns.

Mr. ALLEN subsequently said: I ask the consent of the Senator from Iowa to call up a resolution that was laid over a few moments ago owing to my absence.

Mr. ALLISON. I yield to the Senator from Nebraska, if the resolution will not lead to debate.

Mr. ALLEN. I think it will not. It is a formal resolution.

The VICE-PRESIDENT. The Chair lays the resolution before the Senate.

The resolution was read, and agreed to, as follows:

Resolved, That the President be, and he is hereby, respectfully requested if in his judgment it would not be incompatible with the public policy, to invite by proclamation, or in such other manner as he may deem most proper, foreign nations to make exhibits at the Transmississippi and International Exposition, to be held at the city of Omaha, in the State of Nebraska, between June 1 and November 1, A. D. 1898.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. WHITE. If the Senator from Iowa will give me his attention for a moment, will it be convenient to him to state about what course the Senate will pursue to-day in the consideration of the bill? I mention it as a matter of convenience.

Mr. ALLISON. It was our purpose this morning to take up the leather schedule, which it was understood would go over until Monday. I do not know whether the other side are ready.

Mr. JONES of Arkansas. I asked that it might go over on account of the absence and illness of the Senator from New Jersey [Mr. SMITH]. I have not heard this morning what his condition is, and I do not know whether he will be here or not.

Mr. WHITE. I presume the Senator from New Jersey will likely be here in a short time. Of course, from the absence of Senators in this Chamber, we can not assume illness, or perhaps infirmity would be quite general, judging by the appearance of the Chamber.

Mr. ALLISON. We might take up some other matters then.

Mr. JONES of Arkansas. I understood the other day that it was the purpose of the Senator from Iowa to proceed regularly with the items passed over. Of course I understand that there is now and then a case where the circumstances are such as to require that a paragraph shall go over, but I suppose that in proceeding with the bill we should be as near regular in the matters we take up as possible, and not go about from place to place without any sort of regularity.

Mr. ALLISON. The suggestion made by the Senator is the very process that I recommend. The reason why I called up the matter of leather this morning was because it was postponed until to-day. The next paragraph in order passed over is paragraph 118.

Mr. JONES of Arkansas. Was paragraph 109 disposed of?

The VICE-PRESIDENT. Paragraph 109 is the next.

Mr. ALLISON. Paragraph 109 is the next one.

Mr. JONES of Arkansas. The last one disposed of when I was in the Chamber, according to my recollection, was paragraph 81, vanillin; possibly 86, gypsum. I think gypsum was up, but I do not know that paragraph 88, bauxite, was taken up. Possibly it was.

Mr. ALLISON. We were in the consideration of bauxite when the Senator from South Dakota [Mr. PETTIGREW] was taken ill, and the paragraph was passed over.

Mr. JONES of Arkansas. Then was paragraph 109 taken up? I was not in the Chamber at the conclusion of the proceedings.

The VICE-PRESIDENT. The Secretary informs the Chair that there is an amendment pending to paragraph 88, which was offered by the Senator from South Dakota [Mr. PETTIGREW].

Mr. ALLISON. There is an amendment pending to paragraph 88, but I think perhaps it would be wise to pass it over for the present.

Mr. JONES of Arkansas. I have no objection.

Mr. QUAY. Then paragraph 88 is to be passed over?

Mr. ALLISON. For the present it will be passed over. Paragraph 86 I would be glad to have passed over to-day, if the Senator from Arkansas will allow that to be done.

Mr. JONES of Arkansas. I have no objection on my part.

Mr. ALLISON. Then the next is paragraph 109, the basket clause of the glass schedule. The committee recommend no change in the amendment there.

Mr. JONES of Arkansas. I understood the Senator to propose that that should be passed over.

Mr. ALLISON. No; I am willing that it shall be considered now.

The VICE-PRESIDENT. The Secretary will read paragraph 109.

The Committee on Finance reported to amend paragraph 109, on page 29, in line 8, after the word "painted," by striking out "window glass and stained or painted;" in line 9, after the word "windows," to insert "or parts thereof;" and in line 12, after the word "manufactures," to insert "of glass or paste, or;" so as to make the paragraph read:

109. Stained or painted glass windows, or parts thereof, mirrors, not exceeding in size 144 square inches, with or without frames or cases, and all glass or manufactures of glass or paste, or of which glass or paste is the component material of chief value, not specially provided for in this act, 45 per cent ad valorem.

The amendment was agreed to.

Mr. TURPIE. I ask the honorable and learned Senator from Iowa what is the force and meaning of the term "mirrors"—if there is such a thing as stained or painted mirrors? The last word in line 9.

Mr. ALLISON. Mirrors?

Mr. TURPIE. Yes, sir; mirrors or parts thereof.

Mr. ALLISON. It is the ordinary meaning of the term.

Mr. TURPIE. I am not aware of stained or painted mirrors. That is what is referred to here if "mirrors" is used.

Mr. ALLISON. I think it would cover stained or painted glass windows and mirrors.

Mr. TURPIE. No; "Stained or painted glass windows, or parts thereof, mirrors."

Mr. ALLISON. It would not include stained mirrors. It means ordinary mirrors.

Mr. TURPIE. Then "stained or painted" ought to be eliminated.

Mr. ALLISON. It is the phraseology that exists in the law of 1890 and also in the law of 1894. It is the present law.

Mr. JONES of Arkansas. In the present phraseology the words "and all" come before "mirrors," so as to read "and all mirrors."

Mr. ALLISON. I am willing that those words shall be inserted.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 9, before the word "mirrors," insert the words "and all:" so as to read, "and all mirrors."

The amendment was agreed to.

Mr. VEST. I wish to call attention to the fact that this paragraph makes an increase of 10 per cent over the rates in the existing law. But that is not by any means, from my standpoint, the worst part of it. The effect of the amendment is to put all broken and old glass and rough-cut or uncut class, which is now on the free list, on the dutiable list at 45 per cent. This is a great change over existing legislation. I suppose it was deliberately intended by our friends upon the other side. I ask the Senator from Iowa if it is the intention to put a duty on broken and old glass, which is now on the free list, and on glass rough cut or uncut, which is on the free list?

Mr. ALLISON. I do not think it is. It is the phraseology of existing law.

Mr. VEST. I think not. My friend from Arkansas has the existing law before him.

Mr. ALLISON. It is practically the phraseology. We do not change it in that respect.

Mr. JONES of Arkansas. For the purpose of determining that point, if my colleague will note the bill, I will read the present law:

All stained or painted glass windows, or parts thereof, and all mirrors not exceeding in size 144 square inches, with or without frames or cases, and all manufactures of glass, or of which glass is the component of chief value, not specially provided for in this act, 35 per cent ad valorem.

"Or parts thereof," inserted in italics, which is the amendment of the committee, seems to suggest that broken and waste pieces will be included in paragraph 109, and they are certainly not included in the law as it stands.

Mr. VEST. Then in this provision are the words "and all glass," all broken glass.

Mr. ALLISON. There is no intention, certainly, to include broken glass.

Mr. VEST. That phrase would include it, of course—"all glass," "or parts thereof." That is obviously the meaning of the provision.

Mr. ALLISON. I do not think so.

Mr. VEST. Then will the Senator agree to insert "not including old or broken glass or rough or uncut glass"?

Mr. ALLISON. I am perfectly willing to insert "not including all old or broken glass." But rough or uncut glass is a very different thing.

Mr. VEST. Then you mean to include rough or uncut glass?

Mr. ALLISON. Unless it is provided for elsewhere, as I think it is.

Mr. VEST. I do not know where it is. But if the Senator from Iowa will agree to that much, we will except old or broken glass.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. Insert after "mirrors," in line 9, paragraph 109, the words "not including old or broken glass."

Mr. ALLISON. I do not know quite what old glass is.

Mr. VEST. It is broken glass; glass that is not fit for manufacture.

Mr. ALLISON. I think I would say "not including broken glass." Then we can deal with it later on if it is necessary.

Mr. JONES of Arkansas. Why not leave out the committee amendment, "or parts thereof?"

Mr. ALLISON. That is parts of glass windows, "stained or painted glass windows, or parts thereof."

Mr. JONES of Arkansas. Are glass windows imported in parts?

Mr. ALLISON. They are, undoubtedly.

Mr. JONES of Arkansas. I do not see how that is possible. It must either be glass or windows—"stained or painted window glass and stained or painted glass windows." If they are imported as panes of glass, they will come in under the first paragraph; but if as windows, they will come in under the second, and the words "or parts thereof" seem to me to be clearly surplusage if it is the intention to confine it either to panes of glass or the completed window.

Mr. ALLISON. We have struck out the words "window glass and stained or painted" and substituted "or parts thereof" for window glass. So the paragraph now reads, "stained or painted glass windows, or parts thereof."

Mr. JONES of Arkansas. You intend to exclude "window glass and stained or painted?"

Mr. ALLISON. Yes, sir; that phraseology is stricken out by our amendment.

Mr. JONES of Arkansas. Where are they provided for?

Mr. ALLISON. They are provided for right here; "stained or painted glass windows, or parts thereof," which would be stained window glass.

Mr. JONES of Arkansas. The other phraseology, it seems to me, would be very much more desirable and would get rid of the difficulty raised by the Senator from Missouri—that is, to let it stand "stained or painted window glass and stained or painted glass windows."

Mr. ALLISON. The truth is we were following the act of 1894, prepared by our good friends, and we were trying to get as near to that as possible.

Mr. JONES of Arkansas. Then you were following it without reading the law.

Mr. ALLISON. Let us see whether we were.

Mr. JONES of Arkansas. "All stained or painted glass windows."

Mr. ALLISON. "Or parts thereof."

Mr. JONES of Arkansas. I will admit that the Senator was right and I was wrong. I am glad to see the Senator following a good example, and I shall withdraw any further objection.

Mr. ALLISON. I assure the Senator we are doing as well as we can.

Mr. JONES of Arkansas. I only want to say that I am very sorry you began so late in life.

Mr. VEST. I move to insert after the word "glass" the words "broken glass."

Mr. ALLISON. I agree to that amendment.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 12, after the word "glass," insert "except broken glass."

Mr. ALLISON. Put the words "except broken glass" in parentheses.

The VICE-PRESIDENT. Without objection, the amendment will be agreed to, and the words "except broken glass" will be put in parentheses. It is agreed to.

The next paragraph passed over was paragraph 118, on page 31, which the Committee on Finance propose to amend, in line 24, after the word "ore," by striking out "and" and inserting "also;" so as to make the paragraph read:

118. Iron ore, including manganiferous iron ore, also the dross or residuum from burnt pyrites, 40 cents per ton: *Provided*, That in levying and collecting the duty on iron ore no deduction shall be made from the weight of the ore on account of moisture which may be chemically or physically combined therewith.

The amendment was agreed to.

Mr. ALLISON. On page 31, line 25, after the word "ton," I move to strike out the colon and insert a semicolon and what I send to the desk. I ask the Secretary to read all of the amendment suggested.

The SECRETARY. On page 31, paragraph 118, line 25, after the word "ton," strike out the colon and insert a semicolon and the following:

Manganese ore, $1 per ton.

In the same paragraph, page 32, line 1, strike out the words "iron ore" and in lieu thereof insert the words "such ores;" and in line 4, after the word "therewith," insert a semicolon and the words "basic slag, ground or unground, $1 per ton."

Mr. ALLISON. Those are all the amendments we propose to the paragraph.

Mr. JONES of Arkansas. Let it be read as proposed to be amended.

The VICE-PRESIDENT. The Secretary will read the paragraph as it will stand when amended.

The Secretary read as follows:

118. Iron ore, including manganiferous iron ore, also the dross or residuum from burnt pyrites, 40 cents per ton; manganese ore, $1 per ton: *Provided*, That in levying and collecting the duty on such ores no deduction shall be made from the weight of the ore on account of moisture which may be chemically or physically combined therewith; basic slag, ground or unground, $1 per ton.

Mr. JONES of Arkansas. I should like to call the attention of the Senator from Iowa to what seems to me likely to lead to confusion resulting from the amendment. The paragraph now reads:

Iron ore, including manganiferous iron ore, also the dross or residuum from burnt pyrites, 40 cents per ton.

Now, you propose that manganese shall carry a dollar a ton. What is the difference between manganese ore and manganiferous iron ore?

Mr. HOAR. I understand (of course I have nothing except the information that comes to me) that there are in some parts of the country very large deposits of manganese ore which is of a peculiar value and is of a variety much more valuable than the ordinary iron ore and should have a corresponding protection. There is a large deposit of it in Arkansas, the Senator's own State.

Mr. JONES of Arkansas. Yes, sir; there is a very large manganese deposit in Arkansas, but the question with me was whether it is not always combined with iron ore.

Mr. PLATT of Connecticut. Not at all. If I am correctly informed, the manganese in Arkansas and the Blue Ridge is an ore

by itself. Manganese is sometimes found blended or combined with iron ore.

Mr. JONES of Arkansas. I knew that, and I thought it was always combined with iron ore.

Mr. PLATT of Connecticut. But the mine in the Senator's State has no iron connected with it at all; it is purely manganese ore, and is used in making steel and other articles.

Mr. JONES of Arkansas. I knew it was used for that purpose, and my impression was that it is found in combination with iron at all times.

Mr. ALLISON. I do not think there will be any trouble about it.

The VICE-PRESIDENT. Without objection, the three amendments to paragraph 118 proposed by the Senator from Iowa will be agreed to. They are agreed to.

The next paragraph passed over was paragraph 142, on page 43, which was read, as follows:

142. Card-clothing manufactured from tempered steel wire, 45 cents per square foot; all other, 20 cents per square foot.

The VICE-PRESIDENT. If no amendment be proposed to this paragraph, the next paragraph passed over will be read.

Mr. PETTUS. I desire to know what disposition was made of paragraph 125.

The VICE-PRESIDENT. It was agreed to on the 2d day of June.

Mr. ALLISON. That paragraph was disposed of some days ago.

Mr. PETTUS. There was a motion made to put cotton ties on the free list.

Mr. ALLISON. Later, when we reach the free list, that will be in order, and of course if cotton ties are put on the free list——

Mr. PETTUS. The motion was to strike out a part of this paragraph.

Mr. ALLISON. It is now a part of the paragraph, but if cotton ties should be put on the free list, of course it will be stricken out here.

The VICE-PRESIDENT. The Chair understands that the amendment is pending, and that when the free list is reached it will be in order to move it.

Mr. PETTUS. It was not my amendment, but that of the Senator from Georgia [Mr. BACON].

Mr. BACON. The Senator is right. It is the amendment proposed by myself.

The VICE-PRESIDENT. The amendment is pending.

Mr. BACON. I think Senators on both sides agree as to the proper course to be pursued.

Mr. ALLISON. There is no expectation that we shall not deal with it.

Mr. BACON. I understand.

The next paragraph passed over was paragraph 164, on page 52, which the Committee on Finance proposed to amend, in line 1, after the word "act," by striking out "forty" and inserting "thirty;" so as to read:

164. Crosscut saws, 6 cents per linear foot; mill saws, 10 cents per linear foot; pit, and drag saws, 8 cents per linear foot; circular saws, 25 per cent ad valorem; hand, back, and all other saws, not specially provided for in this act, thirty per cent ad valorem.

The amendment was agreed to.

Mr. ALLISON. In paragraph 164, page 51, line 25, after the word "ad valorem," I move to insert:

Steel band saws, finished or unfinished, 10 cents per pound and 20 per cent ad valorem.

Mr. PLATT of Connecticut. May I make an inquiry? What became of paragraph 142?

The VICE-PRESIDENT. It was passed.

Mr. ALLISON. It was agreed to.

Mr. PLATT of Connecticut. It was adopted?

The VICE-PRESIDENT. No amendments were proposed to that paragraph. The question is on agreeing to the amendment of the Senator from Iowa to paragraph 164.

Mr. VEST. In line 2, on page 52, I notice there is an increase over the existing law in the ad valorem rate. I want to call attention to the condition of the trade in regard to these articles. We exported, in 1896, $2,197,450 worth of saws and tools. We imported $27,000 worth of saws of all kinds. It is a notorious fact that the American manufacturers absolutely control the market, and that the Disston saws of Philadelphia are accepted as the best article in the world that is manufactured. They are sold all over Europe and in South America. There is no necessity whatever to put up the ad valorem duty. I think with regard to my assertion there can not be the slightest doubt, and the exports and imports show that to increase the duty upon an article of this kind is absolutely useless, and not only useless, but, with great respect, absurd.

Mr. ALLISON. These band saws are a very high grade of saws, and the amendment proposed does not increase the duty above 30 per cent.

Mr. VEST. It increases it 5 per cent over existing law. The existing law is 25 per cent ad valorem, and the committee propose to make it 30 per cent. I am afraid to make any motion for fear the Senator will move to make it 40 per cent.

Mr. WHITE. I presume the Senator refers to band saws, because they are being substituted very largely for circular saws. The waste resulting from the process of sawing lumber by means of band saws is far less than that which results from the use of the common circular saws, and in all the large mills throughout the United States, especially where there are logs of any size, the band saws are being utilized at present, and coming into use and becoming more necessary, and the tariff is therefore raised on them.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa to paragraph 164.

The amendment was agreed to.

Mr. ALLISON. In this connection, I ask consent of the Senate to go back to paragraph 137, page 43, for a moment. The Senate committee amendment was disagreed to. I desire to move to insert in line 1 "three-fourths of," after the word "paid;" and in line 4 to strike out "three-fourths" and insert "one-half;" so as to make the paragraph read:

137. On all iron or steel bars or rods of whatever shape or section which are cold rolled, cold drawn, cold hammered, or polished in any way in addition to the ordinary process of hot rolling or hammering, there shall be paid one-fourth of 1 cent per pound in addition to the rates provided in this act on bars or rods of whatever section or shape which are hot rolled; and on all strips, plates, or sheets of iron or steel of whatever shape, other than the polished, planished, or glanced sheet iron or sheet steel hereinbefore provided for, which are cold rolled, cold hammered, blued, brightened, tempered, or polished by any process to such perfected surface finish or polish better than the grade of cold rolled, smoothed only, hereinbefore provided for, there shall be paid three-fourths of 1 cent per pound in addition to the rates provided in this act upon plates, strips, or sheets of iron or steel of common or black finish; and on steel circular-saw plates there shall be paid one-half of 1 cent per pound in addition to the rate provided in this act for steel saw plates.

The amendment was agreed to.

The next paragraph passed over was paragraph 169, on page 54, which the Committee on Finance proposed to amend, in line 11, after the word "aluminum," by striking out the comma and the words "in crude form" and inserting "and;" in line 13, by inserting at the beginning of the line the words "in crude form;" in the same line, before the word "cents," by striking out "ten" and inserting "five;" in the same line, before the word "plates," by inserting the word "in;" and in line 14, after the word "rods," by striking out "of aluminum, of any kind, in which aluminum is the component material of chief value, fifteen," and striking out the comma and inserting "ten;" so as to make the paragraph read:

169. Aluminum, and alloys of any kind in which aluminum is the component material of chief value, in crude form, 5 cents per pound; in plates, sheets, bars, and rods, 10 cents per pound.

Mr. ALLISON. In line 13, I move to insert "seven" instead of "five," and in line 15, to insert "twelve" instead of "ten." I propose to modify the amendment by inserting "seven" instead of "five" and "twelve" instead of "ten." I ask that the paragraph may be read as now proposed to be amended.

The Secretary read as follows:

169. Aluminum, and alloys of any kind in which aluminum is the component material of chief value, in crude form, 7 cents per pound; in plates, sheets, bars, and rods, 12 cents per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next paragraph passed over was paragraph 170, page 54, which the Committee on Finance proposed to strike out, as follows:

170. Manufactured articles or wares of aluminum of any kind, in which aluminum is the component material of chief value, and whether partially or wholly manufactured, 45 per cent ad valorem.

Mr. ALLISON. That paragraph is to be stricken out. It is already provided for in paragraph 191, page 60.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee striking out the paragraph.

The amendment was agreed to.

The next paragraph passed over was paragraph 174, on page 55, which the Committee on Finance proposed to amend, in line 5, after the word "leaf," by striking out "four" and inserting "five;" so as to read:

174. Bronze powder, 12 cents per pound; bronze or Dutch-metal or aluminum, in leaf, 5 cents per package of 100 leaves.

Mr. ALLISON. The committee recommend that 8 cents be substituted for 5 cents in that paragraph in line 5.

The SECRETARY. It is proposed to modify the committee amendment by striking out "five," in line 5, and inserting "eight."

Mr. JONES of Arkansas. The House proposition was 4 cents. The Senate committee raised it to 5 cents, and now the Senator proposes to raise it to what?

Mr. ALLISON. To 8 cents. I think that is a pretty high duty.

Mr. JONES of Arkansas. We agree that it is a pretty high duty.

Mr. ALLISON. But there are very strong reasons for it. The reason why we propose 8 cents is not only because we think it is

right, but also because we want to get it into conference with the House between 4 cents and 8 cents. We understand under the rules governing conference committees that the conferees could not raise a rate beyond what one or the other House had provided for. So I hope the Senator will allow that amendment to be made.

Mr. JONES of Arkansas. The present law is 40 per cent, and 5 cents was proposed by the Senate committee. Four cents, as proposed by the House, is 49 per cent. Five cents, as proposed by the Senate committee, is 61 per cent, and 8 cents, I presume, would be somewhere in the neighborhood of 100 or 125 per cent, as against 40 per cent.

Mr. ALLISON. That depends upon the point of view upon which you make your calculation.

Mr. JONES of Arkansas. That is what the comparative statement of the committee shows.

Mr. ALLISON. The 40 per cent ad valorem is of course a nominal percentage. It comes in valued at whatever price they may put upon it in Nuremberg and other German cities where it is manufactured.

Mr. JONES of Arkansas. None comes to this country.

Mr. ALLISON. It is stated that this duty of 8 cents a pound is absolutely necessary to enable our people to produce these leaves, the industry having been destroyed by the act of 1894.

Mr. JONES of Arkansas. Only $153 of revenue came in under the 40 per cent rate. That is near enough to being an exclusive rate, it seems to me.

Mr. HOAR. I should like to ask the Senator from Iowa a question publicly in reference to a statement he has just made. He has just stated that no conference committee would raise a duty higher than the point which was agreed to by the Senate when the Senate increases a rate over that fixed by the House.

Mr. ALLISON. It is a mooted question whether a conference committee can raise a duty above what one or the other House provided.

Mr. HOAR. I dare say that may be sound policy whether it is strict law or not, but I suppose it would not prevent the substitution of ad valorem for specific rates or specifics for ad valorems.

Mr. ALLISON. Certainly not.

Mr. SEWELL. I will ask the Senator in charge of the bill if the Senator from Arkansas has not made a mistake. The duty on bronze or Dutch metal was 8 cents per bag under the McKinley Act, and the duties collected were $179,865, showing a large importation of it. I know myself from familiarity with it that it is entirely labor. It is a pounding out of metal into leaves, and the skilled workmen who are engaged in it to-day make only $8 a week by reason of the lack of protection under the Wilson Act.

Mr. JONES of Arkansas. I was looking at the wrong subdivision when I made the statement that the importations were only $153. That was in a subsequent subdivision of aluminum and not under bronze. Under bronze the importations under the 40 per cent rate were $55,000 a year.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next paragraph passed over was paragraph 178½, which was proposed by the Committee on Finance to be inserted as a new paragraph, as follows:

178½. Hooks and eyes, metallic, whether loose, carded, or otherwise, including weight of cards, cartons, and immediate wrappings and labels, 5½ cents per pound and 15 per cent ad valorem.

The amendment was agreed to.

Mr. QUAY. Mr. President, I suppose paragraph 179 will create some discussion, and before passing to that I should be glad if the Senator from Iowa would return to paragraph 137. There, as the paragraph was, in passing, the Senator moved, in line 1, on page 43, to strike out "1 cent" and insert "three-fourths of a cent." I think he will admit that he was in error in proposing that amendment, and that the vote by which it was agreed to should be reconsidered.

Mr. ALLISON. I found a memorandum here upon my table respecting that paragraph, and then I found it struck out. I merely moved to insert it for the purpose of looking into it further; but I am willing that it shall go out.

The VICE-PRESIDENT. Is there any objection to the reconsideration of the vote by which the amendment was adopted?

Mr. VEST. We can not understand what the question is on this side. We can not hear the Senators.

Mr. QUAY. I refer to paragraph 137.

The VICE-PRESIDENT. The Secretary will state the amendment which was adopted and which it is desired to have reconsidered.

The SECRETARY. In paragraph 137, on page 43, line 1, the committee amendment was to insert, after the word "paid," the words "three-fourths of;" so as to read, "there shall be paid three-fourths of 1 cent per pound."

Mr. QUAY. That was adopted instead of 1 cent, and I ask the Senator from Iowa to correct it.

Mr. VEST. Do I understand that the Senator from Iowa made an error about that?

Mr. ALLISON. It was a reduction.

Mr. JONES of Arkansas. And therefore an error.

Mr. VEST. We could not understand it over here when the amendment was made.

Mr. ALLISON. The Senator from Pennsylvania [Mr. QUAY] has explained it.

Mr. QUAY. The next amendment occurs in line 4 of paragraph 137, where, on motion of the Senator from Iowa [Mr. ALLISON], the word "three-fourths" was stricken out and the word "one-half" substituted. That is also a reduction; but that reduction is to stand.

Mr. VEST. That is another error, I suppose.

The VICE-PRESIDENT. In the absence of objection, the vote by which the Senate agreed to the amendment, in line 1, page 43, paragraph 137, striking out "1 cent" and inserting "three-fourths of" will be regarded as reconsidered, and the amendment is disagreed to; so that the articles named shall pay a duty of 1 cent per pound. The Chair hears no objection, and that is the order. The next paragraph which was passed over will be stated.

Mr. PLATT of Connecticut. Has paragraph 178 been agreed to?

Mr. ALLISON. That has been agreed to.

The Secretary read paragraph 179, beginning in line 12, on page 56, as follows:

179. Lead-bearing ore of all kinds, 1 cent per pound on the lead contained therein: *Provided*, That on all importations of lead-bearing ores the duties shall be estimated at the port of entry, and a bond given in double the amount of such estimated duties for the transportation of the ores by common carriers bonded for the transportation of appraised or unappraised merchandise to properly equipped sampling or smelting establishments. On the arrival of the ores at such establishments they shall be sampled according to commercial methods under the supervision of Government officers, who shall be stationed at such establishments, and who shall submit the samples thus obtained to a Government assayer, designated by the Secretary of the Treasury, who shall make a proper assay of the sample, and upon his report of the lead contents of the ore the import entries shall be liquidated thereon. And the Secretary of the Treasury is authorized to make all necessary regulations to enforce the provisions of this paragraph.

The first amendment reported to the paragraph by the Committee on Finance was, on page 56, line 12, after the words "one cent," to insert "and one-half;" so as to read:

Lead-bearing ore of all kinds, 1 cent and one-half per pound on the lead contained therein.

Mr. ALLEN. I should like to ask the Senator from Iowa if it is intended to insist upon the committee amendments in paragraph 179?

Mr. ALLISON. It is proposed to adhere to the amendments as made in these paragraphs, except that we propose to insert, in line 18, on page 57, "2¼ cents" on pig lead.

Mr. ALLEN. I suggest the propriety of letting this paragraph pass over until to-morrow. I desire to discuss it somewhat fully, but I find upon my arrival in the Chamber that I have not the documents and papers with me which I desire to use, and which I thought I had.

Mr. VEST. That refers to lead ore?

Mr. ALLEN. Yes, sir.

Mr. ALLISON. The only trouble, I will state to the Senator from Nebraska, is that unless we take up some one of these items we do not know when we shall get through. I had expected to take up leather and the products of leather this morning, but in the absence of the Senator from New Jersey [Mr. SMITH]——

Mr. SMITH entered the Chamber.

Mr. ALLISON. I see that the Senator from New Jersey is now present, and I presume we can go on with the leather schedule.

Mr. ALLEN. Then let the paragraph in relation to lead ore be passed over.

Mr. ALLISON. If the Senator from New Jersey is ready to proceed on the leather schedule, we can take that up now, and proceed with lead ore a little later in the day.

Mr. SMITH. I desire to say that I have been absent from the Chamber on account of illness. I am hardly strong enough to go on to day, but rather than incommode the committee in any way I shall make the effort to proceed.

The VICE-PRESIDENT. The Chair understands that paragraph 179 is temporarily passed over.

Mr. ALLISON. Passed over until the leather schedule is completed.

The VICE-PRESIDENT. That will be the order, in the absence of objection. Paragraph 426½ will be read.

The SECRETARY. The Committee on Finance propose to insert as a new paragraph, under the head of "Leather, and manufactures of," on page 152, after line 6, the following:

426½. Hides of cattle, raw or uncured, whether dry, salted, or pickled, 1½ cents per pound: *Provided*, That upon all leather exported, made from imported hides, there shall be allowed a drawback equal to the amount of duty paid on such hides, to be paid under such regulations as the Secretary of the Treasury may prescribe.

Mr. ALLISON. The committee recommend a modification of this amendment by striking out "1½ cents per pound" and inserting "20 per cent ad valorem;" and the committee also recommend that the proviso be stricken out.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa on behalf of the committee will be stated.

The SECRETARY. It is proposed to amend the amendment, in line 8, after the word "pickled," by striking out "1½ cents per pound" and inserting "20 per cent ad valorem;" and after the word "pound," in line 9, by striking out:

Provided, That upon all leather exported, made from imported hides, there shall be allowed a drawback equal to the amount of duty paid on such hides, to be paid under such regulations as the Secretary of the Treasury may prescribe.

So as to make the paragraph read:

426½. Hides of cattle, raw or uncured, whether dry, salted, or pickled, 20 per cent ad valorem.

Mr. SMITH. Mr. President, do I understand that in the proposed amendment the same rate of duty is applied to dry hides as to salted hides?

Mr. ALLISON. Twenty per cent ad valorem, the same ad valorem rate upon dry hides as upon raw or uncured hides.

Mr. JONES of Arkansas. The proposition is to strike out "1½ cents per pound" and insert "20 per cent ad valorem."

Mr. ALLISON. Yes.

Mr. WHITE. Has the Senator from Iowa any information as to the unit of value or the average value of hides in the South American markets?

Mr. SMITH. I can give the Senator the information.

Mr. ALLISON. I have a statement on the subject.

Mr. WHITE. Will the Senator from New Jersey state how much dry hides are worth?

Mr. SMITH. They average about $4.50.

Mr. WHITE. Will the Senator state what is the average weight?

Mr. SMITH. Green hides average on the other side from 90 to 100 pounds each, and they are sold now from 10½ to 11½ cents a pound.

Mr. ALLEN. That is, as I understand, the market price after they reach a central market.

Mr. SMITH. That is the price at which the hide dealer sells to the manufacturer.

Mr. PLATT of Connecticut. I telegraphed to the custom-house in New York to-day and had a telegraphic reply from the appraiser. I have it not with me, but I can get it in a moment. I know, however, what it is. It is to the effect that during the last eleven months the importation of hides has been 70,000,000 pounds, of the value of $7,000,000, of fresh, green hides, and the average is about 10 cents per pound. That is the telegram. The hides varied from 3 to 8 cents a pound, and the average is about 5. I thought there was a little inconsistency between the prices given and the completed account, but that was the statement.

Mr. WHITE. Has the Senator a statement as to what the average price would be?

Mr. PLATT of Connecticut. It would average about 10 cents.

Mr. JONES of Arkansas. Green hides?

Mr. PLATT of Connecticut. Yes, green hides, 10 cents.

Mr. JONES of Arkansas. What about dry hides?

Mr. PLATT of Connecticut. The price of dry hides is from 3 to 8 cents a pound.

Mr. WHITE. Evidently there is a mistake in the figures somewhere.

Mr. SMITH. If Senators will allow me, I can explain to them the figures. This apparent inconsistency arises from the fact of the classification of hides under our custom-house rules, which vary, and which are changed from time to time. For instance, the classification of what are known as hides includes goatskins, kangaroo skins, etc. I have the classification here. I think cattle hides are now included in the same category as sheepskins, Angora goat skins, salted sheepskins, and kangaroo skins. So that would make what would appear from the imports to be a very large quantity of imported hides coming into this country, and would make it appear as if they were at a very low price from the fact that these skins are included as cattle hides.

Mr. PLATT of Connecticut. What I telegraphed for was as to the importation of cattle hides. I have sent for the dispatch. I do not quite understand it, but it came from the appraisers, and I should like to present it to the Senate.

Mr. SMITH. If the committee were familiar with the subject, it seems to me that the proposition of placing raw hides and salted hides at the same ad valorem would not appear to be just. For instance, the rate of duty on salted hides on this basis at the present price of selling would be about $2 per hide. If it be a cent and a half, it would amount to a little less than a dollar and a half a hide. Therefore the rate of duty of 20 per cent ad valorem would be much higher than a cent and a half a pound.

But, Mr. President, before proceeding further I should like to know what disposition the committee have made of goatskins—whether they have placed any duty on goatskins. I ask the question for the reason that I am not in favor of a duty upon them, for goatskins come more particularly in competition with American hides, or quite as much so, as do the tanned hides, and more than do the salted hides, because the only salted hides brought to this country are hides of a larger size than those of this country, as a rule. Those hides are clearer on the grain; that is, they are better fitted to be used for certain, particular, specific purposes of a character which we do not raise or produce here, because between the branding of our cattle, the barbed-wire fences, and so on, our hides become imperfect on the grain. Therefore, if you allow goatskins to come in free of duty, which practically come in competition with your American hides, and tax your salted hides $2 a hide, which practically do not come in competition, it does not seem to me to be entirely fair, just, or right.

Mr. JONES of Arkansas. Before the Senator proceeds further, I desire to get this matter clear in my mind. I should like to ask him about what is the average value of dry cattle hides?

Mr. SMITH. About four dollars and a half.

Mr. JONES of Arkansas. By weight per pound?

Mr. SMITH. On the basis of about 25 pounds.

Mr. ALLEN. Twenty-five pounds of hide?

Mr. SMITH. Twenty-two pounds would be a fair average, so far as the dry hides are concerned.

Mr. JONES of Arkansas. That would make 20 cents a pound?

Mr. SMITH. Yes, sir.

Mr. JONES of Arkansas. Twenty per cent on 20 cents a pound would be 4 cents a pound tariff.

Mr. SMITH. Yes, sir.

Mr. JONES of Arkansas. Against the first proposition of a cent and a half?

Mr. SMITH. Yes, sir.

Mr. JONES of Arkansas. So it is an increase of between 200 and 300 per cent over the original proposition. Now, what is the value of salted hides per pound?

Mr. SMITH. The price to-day is about 11 cents per pound.

Mr. JONES of Arkansas. Eleven cents?

Mr. SMITH. On the average to about 100 pounds of hide.

Mr. JONES of Arkansas. That would make about $2.20.

Mr. SMITH. Under the former duty of 1½ cents a pound it would be $1.50.

Mr. ALLEN. I understand the Senator from Arkansas and the Senator from New Jersey have figured out the ad valorem duty as greater than the specific duty?

Mr. JONES of Arkansas and Mr. SMITH. Yes.

Mr. ALLEN. Is that satisfactory to the Senator from New Jersey?

Mr. SMITH. No, sir. I propose, if I can, to show to the Senator from Nebraska and to the gentlemen of the Senate that the duty on hides is not only unnecessary, unfair, and unjust, but that it does not protect anybody in this country that I believe the Senate desire to protect. On the contrary, it will prove a great injury to the American people, whether they be farmers or manufacturers or merchants or professional men.

Mr. ALLEN. Will it interrupt the Senator if I ask him a question?

Mr. SMITH. Not at all. I shall be glad to hear the Senator.

Mr. ALLEN. If protection is a good thing, ought it not to go all around, and should not everybody have a little of it?

Mr. SMITH. Yes, sir.

Mr. ALLEN. And if it is a good thing as to any imported article, ought it not to result in benefit to the farmers as to hides, and would not the imposition of a sufficient duty upon hides correspondingly raise the price of hides in this country?

Mr. SMITH. No, sir. I say in answer to the Senator from Nebraska that if I believed a tax on hides would benefit the farmers of this country I would not stand here in my place in the Senate and oppose it; but I hope, before this argument is completed, to be able to show to the members of the Senate, who, I believe, want to be informed about this matter, that there is only one class of people who can in any way be helped by the imposition of this duty, and they are the people who need the least help, and to whom I am satisfied, notwithstanding the fact that a great many of the general public believe otherwise, the Senate does not want to extend protection beyond what is fair and right and reasonable, and that is the great American beef trust of this country, who will be the only beneficiaries of this tax.

I wish to say at the outset, Mr. President, that when what is known as the Dingley bill was passed by the House of Representatives I did not intend nor did I expect to address this body on any question connected with it. I believed then, as I believe now, that the bill was formulated by the Republican party in accordance with one of the principles laid down in their platform, and that they had a right to formulate the bill in such way as in their best judgment carried out their views.

I believed, Mr. President, when that bill was framed that it was much more objectionable than was the McKinley law, and I believed that nothing would sooner relegate the party now in power into oblivion than the quick passage of the Dingley bill.

But, Mr. President, I can not believe, and do not believe, that the canvass which brought into power the present Administration was ever fought—certainly not in the State which I have the honor in part to represent—on any theory that the tariff question or the reenactment of the McKinley law was to be the first act of the new Administration. I am frank to say that, in my judgment, the 45,000 Democrats of New Jersey who went to the polls on election day and cast their votes for the ticket with the names of Mr. McKinley and Mr. Hobart upon it did not do so simply for the purpose of saying that they wanted a reenactment of the McKinley law.

While I am willing to admit that very many of them voted as they did through State pride, and as a matter of courtesy and for the purpose of showing their esteem for the gentleman who represented the Republican party on that ticket as the candidate for Vice-President of the United States, still I must say that they were not impelled in that action by that motive alone.

When it is considered that this extra session was called at a season of the year when most gentlemen would be more pleasantly situated at other places than here in order to bring about the enactment of a law which no Senator on this floor will stand up and say——

Mr. JONES of Arkansas. I rise to a question of order, Mr. President.

The VICE-PRESIDENT. The Senator from Arkansas will state his point of order.

Mr. JONES of Arkansas. The Senator from New Jersey is not well, and I submit that audible conversation, which can be distinctly heard all over the Chamber, ought not to go on while the Senator from New Jersey is making a speech.

Mr. SPOONER. Or while anybody else is making a speech.

Mr. JONES of Arkansas. Yes; and I think the Senator from New Jersey ought to take his seat and refuse to proceed until the Senate is in order.

The VICE-PRESIDENT. The Chair will ask Senators to suspend their conversation and preserve order. The Senator from New Jersey will not proceed until there is order on the floor of the Senate. [A pause.] The Senator from New Jersey.

Mr. SMITH. Mr. President, I only desire to say that I do not believe that the necessities or the conditions of this country from a financial point of view necessitated the calling together of this extra session. The business of this country might have been restored and might have gone on and improved just as well, or better, if this subject had been postponed until the regular session of Congress.

The great question which was submitted to the American people in the last Presidential election, as I supposed, was one of finance. On that the people of this country voted, and not on the question of the tariff. The tariff was simply a side issue. If it had been made the principal question, I am afraid, Mr. President—whilst it would have been pleasing to me—that the result of that election would have been different from what it was. We are here, however, confronted with the tariff question, ignoring the great question upon which the battle was fought; we are confronted with a bill which is the most peculiar, to say the least of it, of any which has ever yet been framed by any committee of either House of Congress.

We are confronted to-day by a spectacle unheard of and unknown in the history of this country.

When we stop to consider for a moment that the national Republican platform, the national Democratic platform, and the State platform recently adopted in the State of Ohio declared in glowing language and in strong terms the great wrongs which Spain is perpetrating on poor Cuba, where her men, women, and children are being murdered by thousands, and with all these pretensions Senators leave this Chamber and go home to their States and renounciate the platform adopted by the national Republican convention, and call on the people of the United States to see that justice shall be done to those people—in the face of all this, Mr. President, has this country ever withessed, under such circumstances, such a spectacle, when the Congress of the United States is in session, and when this body by a two-thirds vote passed a resolution of belligerency and sent it to the tomb of the Capulets, to be laid away by a Republican House at the dictates of a Republican Speaker, and according to intimations we have heard, it is done at the dictation of a Republican President?

If the people of this country have not changed their minds and their views from what I believe them to be, this question will ring through this country, and when the Congressional elections next take place, leaving out the question of gold and silver, leaving out the question of high or low tariff, but simply the insult to the American people by that House, the protest of the people will be so strong and so overwhelming that there will be no Republican majority in that House of Congress to respond to the roll call for many years to come.

Now, Mr. President, I will take up the particular part of the subject upon which I have risen to address the Senate. I would ask, in speaking upon this question, particular attention, so far as possible. I do not want to inflict upon Senators anything that I may have to say upon this question, but I have now come to the point which I desire to discuss for the benefit of the Committee on Finance, because I believe they want to do what is fair in regard to this matter.

I ask to have the subject go over for the present. I may be able to resume in five minutes.

Mr. WHITE. I suggest to the Senator from Iowa to pass to some other item.

Mr. VEST. I will take the floor on this subject. The Senator from New Jersey says he can go on in five or ten minutes, and I can say what I have to say now.

Mr. President, up to 1872 there was a small duty upon hides. In that year our Republican friends put hides upon the free list. It is interesting to note the effect of this action of our Republican friends in 1872, because it illustrates the difference between the two systems as to raw materials, whether they shall be taxed or placed upon the free list.

In the last year (1872) when hides were taxed we exported from this country abroad of leather and leather manufactures $3,648,029 worth. I ask Senators interested in the matter to note these figures. In 1872 the duty was taken off of hides, and it has remained off ever since under both Republican and Democratic Administrations. Now, what is the result? We exported in 1896 of leather and leather manufactures $20,242,756 worth. We send all over the world our leather manufactures—boots, shoes, belting, harness, and everything else that is made from leather. There can be no more conspicuous or significant illustration of the propriety of putting raw materials on the free list and then enabling the manufacturers of the United States to compete upon equal terms with the manufacturers of all other countries. Three million six hundred and forty-eight thousand and twenty-nine dollars in 1872; $20,242,756 in 1896.

Mr. President, there are some singular features in the history of the question of the duty upon hides. In 1890, when the McKinley Act, that great exemplar of protection, was enacted, there was a fierce attempt made in the House of Representatives to put a duty upon hides. It came from the same quarter that it comes from to-day, from the great cattle-producing region of the West. I want to say here, without thrusting my personal position upon the Senate, which I always refrain from doing, if possible, but in order to emphasize the brief argument I shall make in favor of free hides, that I come from a State which is one of the largest agricultural and cattle-producing States—I mean of fine cattle—in the Union, and if I had any local interest actuating me in this matter, I will say that the appeals made to me by certain classes in Missouri have been frequent and earnest that I should vote for a duty upon hides, because they have been by certain people made to understand that a duty upon hides is in the interest of the cattle producers of the country. I have had occasion to examine very thoroughly this question and what I say is based upon no abstract, theoretical view, but on actual, absolute, and earnest investigation, because I have been placed as a public man between two interests, those of my constituents who believe with me in free raw materials, and those who are anxious to put a duty upon hides, believing it will increase the price of their cattle.

In 1890, as I have said, the same assault was made upon free hides that is made here to-day, and by the same people, and Mr. McKinley, now President of the United States, was induced, with his committee, of which Governor DINGLEY was a conspicuous member, to yield to the appeal, and he did put a duty upon hides. In a single night that determination was changed, and it was not for months afterwards that the exact reasons for the change became public. The singular fact presented now in the history of hides is that in the report made by President McKinley in 1890 accompanying the bill that bears his name he boasts of the fact that in order to get more revenue the committee had placed a duty upon hides. When the perfected bill came before the House, it was found that the bill did not agree with the report, that hides had been put back upon the free list. By an oversight the distinguished author of the bill had not changed his report, and the record stands to-day as I have named it, with the report boasting of the duty upon hides and the bill itself putting hides upon the free list.

It was stated that a distinguished member of this body, then a prominent member of the House of Representatives from Massachusetts, was very active in securing this change on that fateful night when hides went back to the free list, that in the name of the boot and shoe manufacturers of Massachusetts he informed Mr. McKinley—the margin of votes in the House being rather precarious—that if he persisted in putting a duty upon hides he could look for no political support for his bill from Massachusetts.

Whether that be true or not, I desire to contribute to this remarkable history a letter which has come to light and which was published in a New Hampshire paper. I ask the Secretary to read the letter of Mr. Blaine.

The VICE-PRESIDENT. The Secretary will read as requested.

The Secretary read as follows:

WASHINGTON, *April 10, 1890.*

DEAR MR. MCKINLEY: It is a great mistake to take hides from the free list, where they have been for so many years. It is a slap in the face to the South Americans with whom we are trying to enlarge our trade. It will benefit the farmer by adding 5 to 8 per cent to the price of his children's shoes. It will yield a profit to the butcher only—the last man that needs it. The movement is injudicious from beginning to end, in every form and phase. Pray stop it before it sees light. Such movements as this for protection will protect the Republican party into a speedy retirement.

Yours, hastily,

JAMES G. BLAINE.

Hon. WILLIAM MCKINLEY,
Chairman Ways and Means.

Mr. VEST. That letter came to light after this remarkable record was made in 1890 in regard to hides, and it will be noticed that Mr. Blaine makes the statement emphatically, with which I entirely agree, that the duty upon hides would simply add to the cost of shoes used by the poor man and his family and would inure alone to the benefit of the butcher. He would have been more accurate in his language if he stated to the great beef trust of Chicago.

In 1881 a special committee was organized by this body to examine into the transportation and sale of meat products, and the Senate did me the honor to make me chairman of the committee. I endeavored faithfully and earnestly to discharge my duty. We went to Chicago, the headquarters of this great beef combine, composed of four large houses, and subpœnaed before our committee the heads of those houses and their purchasing agents. They refused to appear.

After consultation, the committee adjourned to the city of Washington, because we had doubts in regard to the question of the power of the Senate to summon recalcitrant witnesses and punish them, which has since been decided by the Supreme Court in a recent decision, in order to avail ourselves of the statute in regard to witnesses who refuse to appear before committees in the District. We again subpœnaed Mr. Philip D. Armour, the great head of the great house of Armour & Co., and under the advice of counsel he appeared and gave his testimony.

Mr. SPOONER. Will the Senator from Missouri kindly give me the number of the document?

Mr. VEST. With great pleasure. It is Senate Report No. 829, first session Fifty-first Congress. I will say to the Senator from Wisconsin that the report has long since been exhausted, and I do not know whether he will be able to obtain a copy. I have this copy by special favor of the document room to use in the debate.

As I was proceeding to say, Mr. Armour, under advice of counsel, appeared before the committee in the District of Columbia, and in his testimony he made this significant statement:

Hides have steadily declined in value since 1886 and prior to that time. The figures to-day show a loss upon every hide of from $1.25 to $1.60.

Mr. HOAR. What does that mean—a loss from $1.25 to $1.60?

Mr. VEST. Loss upon each hide; lowering in value.

Mr. HOAR. Compared with former times?

Mr. VEST. Yes, sir.

During the last five years imports of foreign hides have amounted to over 4,000,000 hides a year, and the class of foreign hides which more directly compete with our salted hides here, viz, Montevideo and Buenos Ayres, have declined in price from 25 cents per pound to 14½ and 15 cents. The decline in the price of these hides, together with their large importation, has undoubtedly had a depressing effect upon the American hide market.

As a Senator from a large cattle-producing State, this testimony on the part of Mr. Armour gave me very serious concern, and I made it my special duty, as did the other members of the committee, because Governor Coke, of Texas, was upon the committee, representing possibly the largest cattle-producing State in the Union—we made it our duty, to speak more properly, to examine very closely and thoroughly this statement of Mr. Armour. I will ask my friend the Senator from Arkansas [Mr. JONES], who reads better than I do, to give to the Senate the result of our examination and our report upon the statement of Mr. Armour.

Mr. JONES of Arkansas read as follows:

The object of Mr. Armour in this statement is to create the impression that the free importation of hides has the effect of reducing the price of American hides and thereby lowers the price paid for cattle to the producer.

One of the largest leather manufacturers in the Middle States, whose name can be given if Mr. Armour requests it, writes the chairman of the committee as follows, on December 1, 1888:

"We use 50,000 hides yearly and are obliged to pay whatever the Chicago syndicate want to ask for their hides, notwithstanding low price of cattle, Armour getting more to-day for his December hides. Inclose an offer received from Armour to-day."

The offer referred to is a telegram from Armour & Co., dated December 1, 1888, as follows:

"If unsold, we can give you two cars heavy native steers, 60 and up, 10½ prompt delivery."

In his printed statement, Mr. Armour submits the following list of prices for American hides:

Average price of hides in—	Texas steers.	Native steers.
	Cents.	Cents.
1886	10½	10½
1887	9½	9½
1888	8½	9

Average hide values in—	All kinds of cattle.
1870	$6.00
1880	5.50
1885	5.00
1888	4.50

It will be noticed from this table that the average price of American hides in 1888 is put by Mr. Armour at 8½ cents per pound for Texas steers, and 9 cents for native steers; but his telegram asks 10½ cents for the latter grade of hides on December 1, 1888.

It will be noticed that the table of prices produced by Mr. Armour begins with the price of hides per pound in 1886, but in order to ascertain the effect of placing hides upon the free list it is necessary to go back to the market prior of 1872, when the duty of 10 per cent was removed.

In 1869 American hides, salted for tanners' use, sold at 11½ to 11¾ cents per pound.

Mr. GEAR. I suggest to the Senator that the price of hides was based upon the price of currency, and currency was at 40 per cent discount at that time.

Mr. JONES of Arkansas read as follows:

In 1870, at 11½ to 11¾; in 1871, at 11½. On August 1, 1879, Chicago, Texas, and native hides sold at 9½ to 9¾.

August 1—	Cents.	August 1—	Cents.
1880	11½	1885	10 -10½
1881	12 -12½	1886	11½
1882	12½-12¾	1887	9 -10½
1883	11 -11½	1888	8 – 9
1884	10 -10½	1889	8½- 9

These prices are taken from the Shoe and Leather Reporter of August 1, 1889; but we have not been able to get from any quarter the exact prices from 1871 to 1879, although we are informed that they remained at about the figures quoted for 1871, with slight fluctuations.

It will be noticed from this table that after the removal of the duty on hides in 1872, and from 1880 to 1887, the price of Chicago hides remained about the same as in 1871, the year before they were placed on the free list.

In 1880 the price was 11½ cents, and in 1886, 11½ cents.

The price of hides commenced falling in 1887, a year after the marked decline began in beef cattle.

We are authorized from these figures to conclude that the removal of the tariff duty in 1872 did not cause a decline in American hides, for it was fifteen years after hides were put on the free list before the fall in prices occured.

Nor can we accept Mr. Armour's statement that the foreign hides imported come into competition with our domestic product and cause a decline in prices.

In a hearing before the Ways and Means Committee of the House of Representative of recent date, a committee from the shoe and leather trade made the following statement:

"Nearly all hides imported are dry and dry-salted hides, while the production of domestic hides is nearly all of green-salted. Dry hides are used entirely for sweat stock, and nearly all domestic green-salted hides for limed stock. These two kinds of leather are entirely different, and do not compete with each other to any great extent."

It is our opinion that the putting back a tariff duty upon hides will not increase the price paid the producer for his cattle.

The same causes which control the prices of cattle now would continue to operate, and until these are removed like results will follow.

From the New York Tribune of March 24, 1889, we make the following extract, which is worthy the serious attention of those who entertain the opinion that a tariff duty on hides will benefit the cattle producer:

"The duty on hides was taken off by a Republican Congress in 1872. The imports have scarcely increased at all since that time. At this port, where most of the hides arrive, the imports last year were hardly 10 per cent larger than they were in 1871, before the duty was removed. This seems conclusive evidence that the home producer does not suffer from foreign competition, and the supply of American hides actually marketed has increased during the same period 12½ per cent, judging from the number of "oxen and other cattle" reported. It can hardly be believed that the home producer can be benefited under such circumstances by the imposition of a duty which would apparently help nobody so much as the rich combination of beef packers at the West, while it would seriously affect the cost of the materials for leather and boot and shoe establishments near the seaboard, which use foreign hides largely and export a considerable part of their products."

Mr. GEAR. Let me suggest to the Senator from Arkansas that exports——

Mr. JONES of Arkansas. If the Senator from Iowa will allow me, I am not making a speech. The Senator from Missouri is the speaker.

Mr. GEAR. I wish to reply to what the Senator from Arkansas was reading. I do not want to reply to the speech of the Senator from Missouri.

Mr. JONES of Arkansas. I merely read for the Senator from Missouri.

Mr. GEAR. May I reply to the Senator from Missouri?

Mr. VEST. Certainly.

Mr. GEAR. Our manufactures of boots and shoes aggregate $234,000,000 per year, and there was exported about a million and a half. So it can not interfere with exports materially.

Mr. VEST. I do not understand the Senator from Iowa. Does he say that the exports of leather manufactures amount to only a

million and a half? In 1896 they amounted to over $20,000,000, according to the comparative statement.

Mr. JONES of Arkansas. That is right. They have increased.

Mr. GEAR. I am talking about shoes. I know all about the export of leather. There is a drawback on the export of leather provided in the bill.

Mr. VEST. In discussing this question we are not confined to boots and shoes.

Mr. GEAR. The report rather suggested it was an interference with the export of boots and shoes. I simply call attention to the fact that out of $234,000,000 manufactured in this country only about a million and a half is exported. There is an export duty on leather provided for in the rebate.

Mr. VEST. The significant fact is that the exports of leather and leather manufactures of the United States have increased since 1872, the last year when hides were on the dutiable list at 10 per cent, from $3,000,000 to $20,000,000 in 1896, hides having been on the free list ever since 1872.

Mr. ALLEN. Does the Senator from Missouri pretend to say that that is composed wholly from hides produced in this country?

Mr. VEST. No, sir; produced also from foreign hides, and the committee of the leather manufacturers, boot and shoe men, who appeared before the Ways and Means Committee, and whose statement has been read by the Senator from Arkansas, stated that the foreign hides do not come into competition with the domestic hides.

Mr. ALLEN. Why not?

Mr. VEST. He gave the reasons for it. It is a different sort of leather, used for different purposes, and they so state emphatically and distinctly. I am not an expert.

Mr. ALLEN. I do not want to interrupt the Senator unnecessarily, but I desire to say to him that the tanners of the United States say that foreign hides do come in competition.

Mr. VEST. I have given the statement of this committee.

Mr. ALLEN. Any man upon the face of the earth knows that if you bring in a foreign hide here and manufacture it into leather which otherwise would be manufactured from a hide produced in this country, it comes into competition with the domestic production. It is just as broad and clear as that the day follows night, and no man can testify it away.

Mr. JONES of Arkansas. Mr. President, here is an extract which the Senator from Missouri asks me to read:

> In a hearing before the Ways and Means Committee of the House of Representatives of recent date a committee from the shoe and leather trade made the following statement:
>
> "Nearly all hides imported are dry and dry-salted hides, while the production of domestic hides is nearly all of green-salted. Dry hides are used entirely for sweat stock, and nearly all domestic green-salted hides for limed stock. These two kinds of leather are entirely different, and do not compete with each other to any great extent."

Mr. ALLEN. But one can be used in place of the other.

Mr. VEST. I am not an expert. I simply quote here what the people engaged in the trade testified to before the Ways and Means Committee. But my opposition to the duty upon hides is based upon entirely different and other grounds. I point to the significant fact that our exports of leather and leather manufactures have enormously increased since hides have been put upon the free list, and, in addition to that, I hold, and think I can prove mathematically almost, that to put a duty upon hides will not increase one single cent the price paid for cattle to the producers of the West.

Mr. ALLEN. In consequence of the beef trust?

Mr. VEST. Yes, that, and because the hide is a by-product, which is not considered at all in the price of the beef.

Mr. ALLEN. Oh, I beg pardon.

Mr. VEST. I beg the Senator's pardon. I examined this question for a year, and went to the very bottom, if it could be done by human agency. The price of beef cattle is fixed in the Chicago market by four houses. If that is not true, it is not true that I am addressing the Senate. I prove in this report, which of course is too voluminous to be read in the Senate, that these men are combined and confederated through all their business. We never could get one of their purchasing agents before the committee. They ran them off to Canada and Europe, and we have not been able to this day, although I sent officers of the Senate to search Chicago, with the aid of detectives, from end to end, to get one of their purchasing agents.

Mr. Armour swore he made no combination. Of course not. His purchasing agent would go into the stock yards in the morning and meet the purchasing agents of Nelson Morris & Co., of Swift & Co., of Hammond & Co., and they would fix in a corner the amount of beef cattle that each house wanted, having entire control of the market, and then the cattle producer of my State or Nebraska, with his bunch of 50 or 100 cattle, was approached by one of these buyers and asked how much he would take for them. "Five cents." "I will give you four and a half." "No; I will not take it." And in an hour another man would come to him from one of the other houses. "How much will you take for your cattle?" "Five cents." "I will give you four and a quarter," and the next one four and an eighth. His cattle in the meantime were held there at large expense, paying enormous prices to these same people for feed, for water, and for stalling, and he would be compelled to let his cattle go at the price. We had dozens of dealers come to us privately and tell us, "We are coerced here; we have to take what we can get." I said, "I will put you on the stand." "Oh, no. I will take the next train out of Chicago. If I testified against the beef trust, I never could sell another steer in this market." They came before the committee at last in Kansas City, Mo.

Mr. L. Leonard, one of the most distinguished farmers in the State, and the candidate for governor of the party to which the Senator from Nebraska [Mr. ALLEN] belongs, testified before the committee at St. Louis that he had 150 head of cattle and that he was boycotted and refused any price at all in Chicago from either of these great houses.

Mr. President, when the price of the cattle is fixed, the price is fixed on the hide. The hide is a by-product. Take these prices from year to year which are found in this report, and you will find that the price of hides was one thing when Mr. Armour and Mr. Swift and Hammond & Co. undertook to sell their hides, but it was a very different thing when they came to buy cattle.

Mr. GEAR. Mr. President——

The PRESIDING OFFICER (Mr. CARTER in the chair). Does the Senator from Missouri yield to the Senator from Iowa?

Mr. VEST. Certainly.

Mr. GEAR. The Senator from Missouri claims, I understand, that in Chicago the Big Four, as they are commonly called, absolutely control the price of cattle.

Mr. VEST. I do.

Mr. GEAR. He claims that they have conspired to put down the price all the time.

Mr. VEST. To put it down or put it up. They put the price down, as the evidence here shows.

Mr. GEAR. In view of what the Senator says, I should like to state that the price of cattle has gone up a cent and a cent and a quarter in the last forty days.

Mr. VEST. I can explain it, and I will.

Mr. GEAR. I should be glad to have an explanation of that fact.

Mr. VEST. It depends on the question whether the Big Four houses want any cattle or not. When they want to put down the price of cattle, they do that, and they put it down until the farmers and cattle raisers are afraid to ship. Then they let up the gate, fill up the stalls again in their enormous houses, and buy the cattle at their own price.

Mr. GEAR. I had a different opinion. I had supposed there was a scarcity of cattle this year, and that, notwithstanding the very low price of corn and other products, the scarcity of cattle caused the advance of a cent and a cent and a quarter.

Mr. VEST. The prices fluctuate as the trust propose they shall fluctuate. I have not observed the cattle market recently, but if they did put them up——

Mr. SMITH. If the Senator will allow me, I will state that the price of native steers April 15 was $81; on May 15, $80.25; June 15, $78.75, and June 25, $76.75—a drop of about $5 in a little over two months.

Mr. VEST. I had not examined that point, for I am not interested in the matter; but I know the price ought to go up, because there has been a large decrease in the supply of cattle. The number of cattle in the country has decreased, and therefore the price ought to have gone up. But you will find in this testimony that these big houses in Chicago put up the price or put it down. Not only that, but they forced the butchers of the country, who undertook to kill their own cattle, to buy their dressed beef or go out of the business.

I produced, and it will be found in this testimony, a telegram from Mr. Armour's principal to a man in Freeland, Pa., to the agent of Mr. Armour, saying, in regard to a certain butcher there named Schwabe, "You must make Schwabe buy our dressed beef or go out of the business." I brought Mr. Schwabe there and put him upon the stand. I confronted Mr. Armour with his telegram, which he admitted to be correct, and he said he had told the man who sent it that he was imprudent in sending such a telegram. Said I, "Did you discharge him?" "No," he said, "he is still in my employment." This butcher Schwabe was notified that he must stop killing cattle and buy the dressed beef. He refused to do it, and they boycotted him. He could not ship on the railroads his cattle to be butchered at Freeland, and he was forced to go out of business. He was an obstinate, hard-headed German, worth about $40,000, and he spent it all in the unequal conflict with this tremendous trust.

Mr. Armour admitted that at Akron, Ohio, he put up shops upon either side of a butcher who refused to buy his dressed beef, and that he put down the price of dressed beef until the man was compelled to become his agent, and he explained it by stating that he believed it was absolutely impossible for a man to kill his beef and

at the same time to sell dressed beef; that he must do one thing or the other.

Mr. ALLEN. The evidence here would seem to be strong enough to indict Mr. Armour and these other conspirators. Why have they not been indicted and prosecuted?

Mr. VEST. I am not an officer of a United States court. I did my duty.

Mr. ALLEN. I know, but both political parties have for years been declaring for a law against trusts. We have a law against trusts. Such a combination is itself indictable at common law. Why has not either the Republican or Democratic Administration, both of which have been in power during the time, set the law officers at work to indict and prosecute these persons for a violation of the law? If we can not do anything, we might as well lie down and let the beef trust run the Government.

Mr. HOAR. I should like to ask the Senator from Missouri what was the business of the man whose business, he says, was affected by Mr. Armour's methods? Was it interstate business or local business?

Mr. VEST. He was a local butcher at a little town in Pennsylvania.

Mr. HOAR. Then the answer to the Senator——

Mr. ALLEN. No; there is no answer at all. Armour & Co. were engaged in interstate traffic, and they were violating the laws of the nation.

Mr. HOAR. I thought the Senator from Missouri yielded to me.

Mr. ALLEN. They were violating the law of the nation, and they were indictable for that offense and subject to prosecution in the Federal courts.

Mr. HOAR. The Senator from Missouri yielded to me. I had got as far in my sentence as to say "the answer is," when the Senator from Nebraska springs to his feet and says that is no answer at all. He has not heard what I was about to say.

Mr. ALLEN. The Senator from Massachusetts said it was indictable in the State courts.

Mr. HOAR. I did not say any such thing. That is what I was going to say, perhaps.

Mr. ALLEN. That is my understanding of what the Senator from Massachusetts said.

Mr. HOAR. Very well; but will the Senator be good enough, in his great zeal, to wait until I have said something before he assumes a prophecy? The Senator is a very able man, but prophecy is not an exact science, and the Senator is certainly not so distinguished as a prophet as he is in other departments of usefulness.

Mr. ALLEN. I must assume, upon the other hand, that the Senator from Massachusetts is not only a distinguished prophet, but in all my life I have never seen a man who knew so much.

Mr. HOAR. I did not hear what the Senator said, and I am glad I did not. [Laughter.]

If the Senator from Missouri will indulge me a little further, I understand the Senator to say that this particular butcher was engaged in a local business.

Mr. VEST. Yes, sir.

Mr. HOAR. And that he was driven out of that local business by the establishment on both sides of him of a concern, also to do local business, who underbid him and drove him out. So it seems to me the answer to what the Senator from Nebraska said is that the State of Pennsylvania has failed to supplement the act of Congress by sufficient and vigorous State legislation, and that we never can trample out the great evil, of which there is such just complaint, by national methods alone. We can not punish a man by depriving him of his rights as an importer or as a shipper from State to State because he conducts in an oppressive manner local and State commerce. We must have either an amendment to the Constitution or the cooperation of the State in order to make any remedy against these large trusts complete and effectual.

Mr. ALLEN. Will the Senator from Missouri permit me at this point?

Mr. VEST. Certainly.

Mr. ALLEN. In reply to the Senator from Massachusetts, if I may be permitted to reply to him, when Mr. Armour sent his agent into Pennsylvania, pursuant to a conspiracy between himself and other meat producers in the city of Chicago who were carrying on an interstate business and therefore amenable to the laws of Congress, he violated the laws of the United States and was indictable as a conspirator. That act itself was not only a crime against the laws of the State of Pennsylvania, if they have any law on the subject, but it was a distinct and separate offense against the laws of the United States and might be prosecuted under our present statute, or it might be prosecuted as a common-law conspiracy. Therefore I repeat that with all the knowledge of the Senator from Massachusetts he has not answered the question.

Mr. VEST. Mr. President, all this is hardly germane to the point I was discussing when interrupted. I must frankly state that I agree very largely with the Senator from Massachusetts as to the legal difficulties around this subject. I was a member of the Committee on the Judiciary with him when the antitrust law was framed and reported by the chairman of the committee, Mr. Edmunds. The Senator from Massachusetts, the Senator from Vermont, and myself all three worked upon that bill, and we encountered all the time the constitutional difficulty that the jurisdiction of Congress was limited to commerce among the States and with foreign nations.

When Armour sent his instructions to his agent in the State of Pennsylvania, it did not affect interstate commerce. When he put his shops to sell dressed beef on each side of a butcher in Akron, Ohio, it did not affect interstate commerce, and I do not think it would come under the provision of the antitrust law.

Mr. ALLEN. Will the Senator permit me? Suppose he sent his agent to Pennsylvania pursuant to a conspiracy formed between himself and Morris, Hammond, and others, and that it was carrying out one branch of the conspiracy, will the Senator from Missouri say that he was not indictable under the statutes of the United States for that act?

Mr. VEST. There are two very great difficulties which are made apparent in the case of the United States *vs.* The Knight Sugar Company, reported in 156 United States Reports. In the first place, you must prove the conspiracy, or trust, or combination. In the second place——

Mr. HOAR. Armour did this without binding anybody else? He did it personally?

Mr. VEST. Yes; he did it himself. And you must prove besides that the product of that syndicate or trust or combination went into commerce among the States or with foreign nations. That is the substance of that decision.

But whatever may be the law in regard to it, and it is a very difficult question, as I think the Senator from Nebraska will admit when he comes to examine it in detail, one thing is very certain, and that is, that such a combination exists in Chicago. They have attempted over and over again, by bringing in foreign capital, to break it up, but without success.

Mr. President, we might as well be frank upon this subject. When you find a man or a collection of men who control from three to five hundred million dollars, it is the most serious question in the world how you can prevent the influence and operation of that money from working. When you come to competition with that much capital, nothing but the aggregate power of the national banks or the Treasury of the United States can do it. They have repeatedly started rival establishments in the city of Chicago. The Englishmen tried it and they went down before Armour, Swift & Co., Morris & Co., and Hammond & Co., whose capital is so enormous that it is impossible to compete with them when it comes to putting up dollar against dollar.

Mr. CAFFERY. Will the Senator yield that I may ask him a question?

Mr. VEST. Certainly.

Mr. CAFFERY. If there is found to be a combination of manufacturers, is the case not reached by the decision of the transmissouri case, and why can not the Attorney-General or the district attorney institute proceedings and bring them under the penalties of the statute?

Mr. VEST. It is possible that it might be done. I hope that it can be done. I should be glad to contribute anything in my power to have it done. But if the Senator from New Jersey is now able to proceed, I will simply conclude my desultory remarks by saying that this report was made with very great labor and care, and if any Senator interested will look at the testimony, I think he will be satisfied, after even a cursory examination, that the cattle raisers of the country will not be benefited one cent by putting a duty upon hides.

Mr. HOAR. Before the Senator from New Jersey proceeds, I desire to ask the Senator from Missouri if he stated that the copies of that report are exhausted?

Mr. VEST. Yes, sir.

Mr. HOAR. I ask unanimous consent to have it reprinted for the use of the Senate.

Mr. VEST. I think that is a good suggestion. I receive many applications for it.

The PRESIDING OFFICER. The Senator from Massachusetts asks unanimous consent that the report referred to by the Senator from Missouri be reprinted.

Mr. COCKRELL. The copy my colleague has is from the folding room.

Mr. VEST. Yes; but you can not get any more there.

Mr. COCKRELL. I know that copies can not be had in the document room.

The PRESIDING OFFICER. Will the Senator designate the number to be printed?

Mr. HOAR. I think the motion implies a certain regular number, whatever the number is.

Mr. COCKRELL. The regular number would be distributed and go to libraries and places where it already is. The number that we want printed is for distribution among Senators, and I

suggest that the Senator offer a separate resolution ordering the printing of a certain number of the document for the use of Senators. That would be the better way. A Senator would get only three or four copies if it is printed simply for the use of the Senate.

Mr. HOAR. Very well. Is there anything in the statute which provides a limitation of the number reprinted to be distributed among Senators?

Mr. COCKRELL. It can not be printed for the use of the Senate without a concurrent resolution if the amount involved is over $500.

Mr. HOAR. Would the amount exceed $500 for 1,500 copies?

Mr. COCKRELL. I could not tell about that. We can print for the use of the Senate anything that does not cost over $500.

Mr. HOAR. So I understand. My question is whether there is anything in the statute which prohibits a resolution directing this reprint to be distributed amongst Senators which they may send to libraries and elsewhere?

Mr. COCKRELL. Nothing at all.

Mr. HOAR. Very well, then. My resolution is that 1,500 copies of the document be printed for the use of the Senate, to be distributed exclusively to Senators.

There being no objection, the resolution was reduced to writing, and agreed to, as follows:

Ordered, That 1,500 copies of Senate Report No. 829, with the testimony, Fifty-first Congress, first session, be printed for the use of the Senate, and to be distributed exclusively to Senators.

The VICE-PRESIDENT. The Senator from New Jersey will proceed.

Mr. SMITH. Mr. President, I think it is but right and fair for me to state the reason why I have selected particularly this question of hides to speak on in regard to the tariff increases. It is owing to the fact that in the State which I have the honor in part to represent 95 per cent, I should say, of the French salted hides are manufactured into leather; that in that State 95 per cent of the patent leather used in this country is made, and that practically all the furniture leather of this country is made there, and nearly all the enameled leather of this country. Consequently, while that State is in favor of fair protection to any industry and to every industry, I believe, as my people there believe, that this duty on hides would bring destruction to the interests there.

Mr. President, the placing of a duty on hides can not be considered as a protection to any industry of the United States against foreign competition, and can only be of material benefit to the beef trusts, who to-day control almost absolutely the price of hides used by American manufacturers of leather and the commodities made therefrom. And it will remove the only check, slight as it may be, that prevents them from advancing at will the price of hides, the result of which would be to cut off the placing of our surplus leather and its products in the markets of the world. How important the export trade in the products of hides is can best be determined by a study of the value of exports in leather and its products and the relationship of such exports to the unit of business done by leather producers.

Hides were placed on the free list in June, 1872, and have remained undisturbed throughout every subsequent revision of the tariff. The total amount of leather and its products exported during the year 1872, the last year in which a duty was imposed, was $3,648,029, while in 1896 the exports amounted to $20,242,756. The law of supply and demand has regulated the price current of hides during all those years, the American producer being able at all times to purchase domestic and other hides as cheap as his foreign competitors, and consequently has been in a position not only to hold the home market against all comers, but to meet competition at least to the extent of placing his surplus in the home markets of his foreign competitors.

In this connection, it is a noticeable fact that the importation of hides into the United States, taking an average of any five years since they were placed on the free list, has steadily decreased.

The following table shows the value of hides and skins other than fur skins imported each year from 1872 to 1896, inclusive, according to the Statistical Abstract of the United States:

IMPORTS OF HIDES AND SKINS OTHER THAN GOATSKINS AND FUR SKINS.

1872	$11,346,984	1885	$16,389,067
1873	15,109,509	1886	21,049,320
1874	13,534,733	1887	18,370,973
1875	15,452,707	1888	17,569,928
1876	10,242,874	1889	17,459,278
1877	11,795,029	1890	12,775,804
1878	13,672,701	1891	16,497,014
1879	12,847,622	1892	15,392,251
1880	24,235,814	1893	15,503,651
1881	22,861,778	1894	8,302,986
1882	23,026,402	1895	15,108,115
1883	22,401,815	1896	20,215,782
1884	17,193,708		

Owing to the difference in classification, the value of imports of hides and skins, as stated in the table taken from the Statistical Abstract, is very misleading in so far as cattle hides are concerned, viz:

ACT OF MARCH 2, 1867.

The classification at the New York custom-house, under the heading of "Hides and skins," included in valuation:

Cattle hides.

Sheepskins, wool on same classified as wool, not included in valuation.

Angora goat, wool on same classified as wool, not included in valuation.

Salted sheep and skivers, deerskins, and various other skins.

Kangaroo skins, no imports.

Import valuation of "hides and skins" in 1871, as given by Bureau of Statistics, $14,892,987.

ACT OF OCTOBER 1, 1890.

Hides and skins included, as follows:

Sheepskins, wool on same, classified as hides and skins, included in valuation.

Angora goat, wool on same, classified as hides and skins, included in valuation.

Kangaroo skins, about 800,000 imported in 1896.

Salted sheep and skivers, large increase in imports in 1896 over 1871. Imports about 450,000 dozen in 1896.

Deerskins and various other skins.

Imports of "hides and skins" in 1896, as given in Statistical Abstract, $20,215,782.

I submit that a classification that is called a hide classification, which includes so many skins of various sorts and of so great a value, and which is subject to so many changes, and including at one time that which is not included at another, should not be used in making a comparison of the value of imports of hides, or as showing their value.

The best information obtainable as to the actual imports of hides is that furnished by the Shoe and Leather Reporter, of New York.

I want to call attention particularly to this table. It shows that in 1872, when hides were placed on the free list, we imported $15,719,000, and that in 1896 the imports amount to $9,160,000. In other words, there are $6,000,000 worth less of cattle hides imported in 1896 than prior to the placing of hides upon the free list.

Mr. JONES of Arkansas. Can the Senator state the quantities imported in those years?

Mr. SMITH. Yes, sir.

These figures are taken from the ships' manifests at New York and Boston, and for various other ports of the country they are estimated. An estimate of the value of hides has also been made by the above-named paper. This valuation is substantially correct, although possibly not absolutely so. This table is for calendar years, while that of the Statistical Abstract is for fiscal years.

Value of imports of hides from 1872 to 1896.

[Compiled by Shoe and Leather Reporter.]

Year.	Receipts of hides.				Value, currency.	
	Ships' manifests.		At San Francisco and other ports (estimated).	Total number.	Per pound.	Total.
	New York.	Boston.				
					Cents.	
1872	1,632,145	667,810	100,000	2,399,955	29½	$15,719,705
1873	1,107,683	844,445	100,000	2,052,128	29½	13,441,438
1874	1,908,677	769,275	100,000	2,772,952	29	17,091,443
1875	1,404,733	728,562	100,000	2,233,295	25½	12,394,787
1876	1,235,538	925,828	100,000	2,261,366	21½	10,854,556
1877	1,960,515	1,249,978	100,000	3,310,493	23½	17,115,248
1878	1,732,944	752,268	100,000	2,586,212	20½	11,793,126

Average imports for twenty-nine years.

	Hides.
New York	*2,203,060
Boston	*981,590
San Francisco, etc	†100,000
Total	3,284,650

*Actual. †Estimated.

Average imports, 1867 to 1896, inclusive.

	Hides.
1867 to 1870, inclusive (four years)	2,624,678
1871 to 1879, inclusive (nine years)	2,318,825
1880 to 1889, inclusive (ten years)	3,934,481
1890 to 1896, inclusive (seven years)	3,505,985

I would also call attention to the fact that the values given in the table from the Shoe and Leather Reporter are currency values, while those in the Statistical Abstract are gold values; thus accounting for the difference in values from 1872 to 1879.

The table just read shows the value of hides imported in 1896 to have been $6,558,997 less than those imported in 1872.

Mr. MANTLE. May I interrupt the Senator from New Jersey?

Mr. SMITH. Certainly.

Mr. MANTLE. I should like to inquire if the statistics just read indicate that there has been a fall in the value of hides, that is, in the price of hides?

Mr. SMITH. Both in volume and price. The table just read shows the value of hides imported in 1896 to have been $6,558,997 less than those imported in 1872, while, on the other hand, a study of the following table giving the exports of leather and its products during the same period, which I will ask to have embodied in my remarks, shows an increase of $16,558,727.

The table referred to is as follows:

Exports of leather, shoes, and harness, saddlery, etc., for twenty-five years.

[From United States Government Statistical Abstract.]

Year.	Leather.	Shoes.	Harness and saddlery.	All other leather manufactures.	Total.
1872	$3,018,702	$502,689	$65,599	$96,979	$3,684,029
1873	4,612,885	421,548	101,943	169,118	5,305,494

Mr. SMITH. It will readily be seen that with hides on the free list not only have our producers been able to defy competition in the home markets, thereby placing their products at the lowest possible figures in the hands of the farmer and the mechanic, and, in fact, every individual within the territory of the United States, but they have laid the foundation for an immense trade in the markets of the world, out of which, if not interfered with, as intended by this bill, will grow new and varied channels for the employment of American labor.

I contend, sir, that the placing of a duty on hides will bring disaster upon the leather interests of the country, as it will undoubtedly place them, at least to the extent of the discrimination permitted in this bill, in the hands of the great aggregations of capital, in whose sole interest the proposed duty is to be levied, notwithstanding the fact that it is said to be for the purpose of revenue for the United States and, incidentally, for the protection of the ranchmen, the farmers, and the butchers of the country.

This may seem a very broad assertion to make, but not so when it is considered that these great companies control 90 per cent of the trade in the cattle and hides of the country, and have by their efforts crushed the ordinary butcher out of competition; and should you add to their power a discrimination of 20 per cent as against the foreign hide, you will benefit them alone, to the injury of the manufacturers of leather, the wage earners employed in leather industries, and of the consumers as well.

In support of these conclusions, I desire to call attention to the following extract from the Shoe and Leather Review, of Chicago, under date of May 26, 1897, and to other extracts, giving the opinion of the British press:

THEY WANT THE DUTY.

It may be interesting to note what the English trade papers have to say about the tariff on hides. The very fact that the English writers favor the duty should argue loudly against it. The London Boot and Shoe Trades Journal of May 15 says:

"The tanning industry in America is in fear and trembling lest the proposed duty on hides imported into the United States should come into operation, whilst little, if any, less alarm is felt by boot manufacturers at such a probable contingency. On this side of the Atlantic the interest in the question is in no quarter very great, for whatever happens we shall have to put up with it, and it is not good philosophy to whine about what we can not avoid: but where any opinion is expressed the wish is, as may be expected, that the duty will be imposed.

"This fact alone ought to be sufficient inducement for the American Government to put hides on the free list, for we fear the common policy lately followed in America is to do nothing calculated to benefit this country, yet it frequently happens that in the pursuance of this doctrine more good is often done to those to whom the least is intended. The effect of a duty on imported hides would be to seriously injure the tanning industry of America. The first result would be that of forcing up hides, which are now altogether too high and quite out of harmony with the prevailing price of leather. Leather values might go up also, and the American boot manufacturer who is anxious to build up an export trade would find himself handicapped by yet another difficulty. He already encounters more of these than his British confrère, but withal he is eating his way into our colonial trade. The little addition which a duty on hides would make on his productions might, however, prove sufficient to put him out of competition, whilst some check might be given to the exports of tanned leather. On purely economic grounds the suggested duty is wrong in principle, tending to hamper the external and possibly the internal trade of America."

[London Shoe and Leather Record.]

It will be interesting to see whether the American Senate succeeds in forcing through the proposed duty of about 20 per cent on imported dry and dry-salted hides and about 30 per cent on green salted to the United States. Should this project succeed, the extra cost of producing leather is reported to be about 12½ per cent. Such a tariff can scarcely stand a chance, so it would be futile to raise the hopes of English and Australian tanners. If it should by any means be forced through, then for the time being the home and antipodean tanners will be in clover. In the first place, hides must come down in Europe and Australia, simply because of the absence of Yankee competition. In the second, leather would become a fraction dearer owing to the withdrawal of supplies to be pitted against it. The strong agitation which is being carried on over there against the proposal can scarcely fail to be successful in defeating the allied forces of hide packers, dealers, and politicians, who are in the main its only supporters.

[Leather Trade Circular and Review, London.]

Speaking generally of tanning material, one thing is certain, that English tanners were never better off than now in working their business at the present reduced values of all tanning materials, which rule at values from 20 to 25 per cent lower than they were five years ago, and we do not believe any country is so favored. If hides were to come down to a lower level, tanners would again be well remunerated, and be able to compete favorably with the foreigner. It is anticipated by some that we are in a position not only to meet all the requirements of the home trade, but to export to America, from which market we have received such large supplies the last few years. The present duty, 10 per cent on rough leather is not prohibitory, as our cost of tanning is certainly as much as that below their cost.

Is it not humiliating to have to listen to language such as has just been read, emanating from some of the trade journals of a nation which dislikes to see material advancement made by the manufacturers of this country, where such advancement must militate against that of her own manufacturers?

And in the same vein I quote from the London Leather Trade Circular and Review the following:

It seems contrary to common sense that the Senate should pass the bill, but it is, perhaps, early as yet to arrive at a decision either way. One thing is certain, in the event of it being passed the English leather trade will feel the benefit of it. It will keep the Americans out of the European markets, thus reducing the prices of hides while enhancing the price of leather.

Further, while on this division of the subject, I desire to have read the following, taken from the Shoe and Leather Reporter and extracts from various leading journals of the country.

The Secretary read as follows:

[Shoe and Leather Reporter, June 3, 1897.]

GENUINE PROTECTION WANTED.

The representatives of the leather and shoe trade, who are at the national capital endeavoring to protect their industry in accordance with the best principles of protection, are bringing to bear such weighty reasons why the imposition of a duty on hides would be a colossal blunder alike from the economic and the commercial point of view that we can not see how it is possible that there can be a majority of the members of both Houses, or of either, to inflict this burden upon a highly important industry. One of the latest contributions of sound arguments on the subject is the following from the pen of a tanner of lifelong experience in Boston:

"The hide is less than one-tenth the value of the animal of which it forms a part.

"Taking a 50-pound hide as a basis, the proposed duty of 1½ cents per pound would amount to 75 cents.

"The animal from which it is taken is worth at Chicago $40. The hide is worth $4.

"Seventy-five cents is nearly 19 per cent of the value of the hide, and it is 11 per cent of the hide, after adding the cost of tanning and finishing; 75 cents is less than 2 per cent of the value of the animal.

"If the duty increased the value of domestic hides, the producer of hides, who is the butcher, would probably get the whole benefit.

"If the duty should add to the value of the animal 1½ cents per pound of the weight of its hide, it would be less than 2 per cent, and would not be protection to the cattle producer at all adequate to the burden it would be upon the tanner.

"It would be taxing the leather industry 19 per cent on its raw material, or 11 per cent on its finished product, to benefit the cattle raiser 2 per cent, which is unjust and out of proportion.

"This tax on leather would make a difference in shoes of 6 per cent or more, which would appear either in advanced prices or poorer qualities at the same prices, and as the shoe business is done at an average profit to the manufacturer of less than 2 per cent, it would be felt by every consumer. It would also be felt in the same way in the harness trade.

"The production of leather in this country exceeds the consumption. More than 10 per cent is exported.

"Of sole leather exported, about 40 per cent is made from imported and 60 per cent from domestic hides.

"Of upper leather exported, 5 per cent is from imported and 95 per cent from domestic hides.

"Manufactured leather, excepting shoes, is all, or nearly all, from domestic hides.

"Of shoes exported, 60 per cent of the value is leather, mostly from domestic hides.

"It is argued that the duty would not injure the foreign trade in leather and shoes, because a drawback could be had of the amount of duty paid upon the hides.

"In the case of sole leather, this might be true to the extent of 40 per cent of the quantity exported, but the other 60 per cent made from domestic hides could have no drawback, because no duty would be paid.

"The upper-leather tanner would be at a much greater disadvantage; 95 per cent of his export leather being made from domestic hides, and the other 5 per cent from certain parts of foreign hides, not the whole of any one hide, it would be difficult and practically impossible to identify the imported hide in the exported upper leather. The drawback provision would be useless to the exporter of upper leather.

"What is said about upper leather is true with regard to manufactures of leather and shoes.

"It might be argued that the cost of domestic hides would not be increased. If this is true, the whole object of the proposed duty is defeated, and it would be folly to run the risk of so great harm for the mere possibility of so little good.

"The export trade in leather from imported hides is barely holding its own.

"The duty would give control of the hide market to the small number of large packers, less than a dozen, and would, in certain conditions of the market, enable them to dictate prices, regardless alike of the interests of the cattle producer and the tanner.

"In considering a duty on hides it should be remembered that Canada has free hides, abundance of bark, and would gladly build more tanneries if by so doing it could secure the American export trade in leather.

"Canada is now a large exporter of leather, and is in a position to take immediate advantage of any mistake we may make.

"The West and South are as much interested in having cheap leather and cheap shoes as the East.

"Not more than one-quarter of the production of leather is made in New England. Not more than one-third the shoes.

"About one-half the leather is made in the Middle and Southern States; a full quarter in the Western States, including California.

"Oregon and Washington have large bark forests, and are likely to become great tanning States in the future.

"Texas, Colorado, Wyoming, and Montana, and the other grazing States produce cattle whose hides go largely into export sole leather.

"It can not be said that the tanning, shoe, and harness interests are confined to any section.

"They are among the most widely spread industries of the country."

[Shoe and Leather Review, Chicago, April 21, 1897.]

THE TARIFF ON HIDES.

The proposal to tax hides had its inception in a desire to foster the cattle industry of the country, and especially of the Western States. It is admitted that the raising of cattle has become less remunerative in recent years and that the slaughter of cattle at Chicago and the packing houses on the Missouri River is less than it was in 1890, 1891, and 1892.

In view of these facts it becomes necessary to inquire what are the causes that have brought about the stagnation of stock breeding, and whether a tariff on hides would prove a remedy or would work an aggravation of the existing stagnation.

We believe that the depression in the cattle industry was caused by overproduction. Eastern capital prior to 1890 was freely invested in the stock-raising sections of the West, and the business soon became overstimulated. In the natural course of events there came a rebound. Eastern capital was withdrawn, and the tremendous influx of cattle to the stock yards of Chicago, Kansas City, South Omaha, and East St. Louis during 1890-1892 was largely caused by the forced sales resulting from the desire of Eastern investors to get out of an unremunerative business. Already the recuperative forces are at work. Cattle are in shorter supply, prices are higher, and stock raisers are feeling more hopeful of the future, and are sending their steers to market and withholding their bulls and cows for breeding purposes. Last summer there was a large entry of Mexican cattle over the Rio Grande because enough Texas cattle were not obtainable. Hide quotations are phenomenally high at the present time—higher on an average than for forty years; but beef was slower to respond because of the tremendous increase in the kill of sheep. The official statement printed by the stock yards companies will demonstrate that during the years that the slaughter of cattle decreased the kill of sheep increased. Beef cattle are emerging from the depression, and under the prospect of proper economic conditions with respect to wool there has been a corresponding advance in cattle prices this year.

A tax on foreign hides is not the proper economic remedy for depression in the cattle industry, for the reason that the average steer, when brought to market, represents a relative value of 92.44 per cent of beef and only 7.56 per cent of hide; and these percentages are based upon the present high price of hides and moderate price of beef. While admitting that the stockman gets too little for his cattle, it is nevertheless easily demonstrated that hides are bringing fully as much as they can be made to bring without destroying the export trade in leather tanned from domestic hides, and that any improvement in net results to the cattle raiser can only be brought about by still further increasing the consumption of beef, and thereby advancing the price of it.

The principle of protection can not be made to apply to hides, because the making of hides is not an industry. If a cheap substitute for leather should be invented, made from, say, vegetable fiber, the production of hides would go on just the same, and if something should happen to double the demand and price of hides, the supply would not be increased in any degree. Hides are a by-product contingent upon the kill of cattle, and the ordinary law of supply and demand does not apply to them at all.

While there is no way in which foreign hides can be taxed to stimulate the production of domestic hides, there is a way by which the annual take-off of hides in this country could be increased in value many millions of dollars. Branded hides bring 1 cent per pound less than free-of-brand hides, but all efforts to introduce reforms in branding have failed, for the reason that stockmen have never yet been able to secure any better prices for free-of-brand animals than they obtain for those carrying several large brands. Grub holes, sores, and the bruises caused by drovers' prods, and horn scratches and gores, induced by overloading cattle into railroad cars, result in causing a large proportion of the hides offered for sale to be classed as No. 2's and sold for 1 cent per pound less than the price for No. 1's. For years the tanners of the United States have endeavored to institute methods that would conserve the value of hides, but without avail. Stockmen have claimed, and no doubt with absolute correctness, that they were paid so much per 100 pounds for their cattle, without any regard to the value of the hides.

The fluctuations of hide prices bear no relation to the changes in cattle prices. In a printed table that may be found elsewhere in this paper it is shown that Texas cattle brought $4.10 per 100 pounds at the Chicago Stock Yards in April, 1896, and the hides taken off of them brought 6 cents per pound, while in October of the same year Texas cattle brought only $3.50 per 100 pounds, when the hides were selling for 9½ cents per pound. Our trade statistics show that with one exception during a period of twenty-six years the market prices of cattle and hides have run in reverse directions. Hides advanced as cattle declined, and declined as cattle advanced. This is easily explained by the increasing and decreasing supplies, and demonstrates that whatever impost may be placed on hides will inure to the owner of the hide when marketed, and the price obtained will bear no relation to the rates obtained for animals on the hoof.

For certain purposes absolutely clear-grained hides are required, and the tanners are compelled to import them, as, owing to crude methods of branding and the injury from barbed-wire fences, clear hides of domestic origin can not be obtained in sufficient quantities.

[Times, Philadelphia, Pa. No date.]

To impose a tax of 2 cents a pound on hides would be to levy a tax upon the whole people of the country, and wholly for the benefit of the great cattle trust that has made the nation pay tribute to it for the last decade.

[Union, Bridgeport, Conn., April 14, 1897.]

If the representations of the leather men are correct, there seems to be little excuse for putting a tariff upon hides. They show that since hides were put upon the free list in 1871 there has been built up a very large export trade in leather goods. Shoe men can now export shoes to South America, manufacturers of leather belting can now sell their goods in almost every country on the globe, and a large export trade in other kinds of leather can be developed.

[Inter Ocean, Chicago, May 7, 1897.]

The proposed tariff bill provides for a drawback on goods manufactured from foreign hides. Along this line the statement made by William B. Rice, president of the New England Shoe and Leather Association, in a recent interview in this city, is to the point. He said: "You ask about the drawback. Have you ever tried to get it? I have. How is it possible to prove that any part of a given shoe was made of foreign hides that paid a duty? How could you prove that part of the $7,000,000 of upper leather that was sent abroad last year was made from foreign hides?"

[Inter Ocean, Chicago, Ill., May 7, 1897.]

The evident contempt in which the cattlemen hold the subject of hides is shown by the manner in which they brand their stock. They have been repeatedly urged to make their brands smaller and not spoil such a large portion of a side of leather from each beef. They have invariably replied that they raise stock for beef and not hides. * * * Stock raisers have never received pay for the hides on their animals, and for that reason projected reforms in branding have always failed.

[People and Patriot, Concord, N. H., May 6, 1897.]

The truth is, not one farmer in a hundred, in this State or the country at large, who fattens an animal for the market slaughters it himself. They are substantially all sold to the drovers and butchers in the East, none of whom will pay the farmer a cent more for his cattle on account of this duty, while at the West, where the great bulk of all our cattle are raised, they substantially all go into the hands of the great combination known as the cattle or beef trust, who reap practically all the benefit arising from this tariff imposition, and for whose benefit, and that alone, it was imposed. * * * The farmers, along with the great body of the people, are simply to be compelled by this provision, if it is finally embodied in the law, which is likely to be the case, to pay heavy tribute in increased cost of boots and shoes for themselves and their families, while no benefit of any kind accrues to themselves.

Mr. SMITH. It is contended that the value of hides enters into the price of the meat product. The best authorities are against such contention, and I doubt if anywhere in this or any other country you can find a farmer or stock raiser who raises cattle for the hides. The beef is and ever has been the only consideration, and the supply must be regulated to the demands for beef. A tariff can not increase or diminish the domestic product by one hide. The value of the various products of cattle, such as fat, hides, blood, bone, etc., is not considered until long after the beeves are marketed.

In this connection, the Chicago Stock Yards official quotations for export steers, which I quote, as follows, will be found of interest. I want the Senators who were looking for this information a few minutes ago to receive it now. This is an official statement for the years 1893, 1894, 1895, and 1896.

Top prices for native cattle on the hoof and green salted hides at Chicago, monthly, for the years 1893, 1894, 1895, and 1896.

[From official report of secretary Union Stock Yards.]

The following are quotations just received from Chicago:

Chicago quotations—cattle and hides.

Date.	Native steers per pound.	Native hides.	Texas steers per pound.	Texas hides.
1897.	Cents.	Cents.	Cents.	Cents.
April 15	5.40	9	4.40	8½
May 15	5.35	9	4.25	8½
June 15	5.25	9½	4.25	9½
June 25	5.10	10	4.30	9½

Below is given value of cattle and hides during this period:

NATIVE STEERS.

Date.	Estimated average weights.	Per pound.	Per steer.	Average hides.	Price.	Per hide.
1897.	Pounds.	Cents.		Pounds.	Cents.	
April 15	1,500	5.40	$81.00	78	9	$7.02
May 15	1,500	5.35	80.25	78	9	7.02
June 15	1,500	5.25	78.75	78	9½	7.60
June 25	1,500	5.10	76.50	78	10	7.80

TEXAS STEERS.

April 15	1,000	4.40	$44.00	58	8½	$4.78
May 15	1,000	4.45	44.50	58	8½	5.03
June 15	1,000	4.25	42.50	58	9½	5.36
June 25	1,000	4.30	43.00	58	9½	5.51

Taking the price of cattle and hides April 15 as a basis, we have:

NATIVE STEERS.

Date.	Price.	Increase.	Decrease.	Price per hide.	Increase.	Decrease.
April 15	$81.00			$7.02		
May 15	80.25		$0.75	7.02		
June 15	78.75		2.25	7.60	$0.58	
June 25	76.75		4.25	7.80	.78	

TEXAS STEERS.

Date.	Price.	Increase.	Decrease.	Price per hide.	Increase.	Decrease.
April 15	$44.00			$4.78		
May 15	44.50	$0.50		5.03	$0.25	
June 15	42.50		$1.50	5.36	.58	
June 25	43.00		1.00	5.51	.73	

Query: If an advance of three-fourths of a cent per pound on native steer hides between April 15 and June 15, 1897, reduces the value of native cattle $2.25 each, and an advance of 1 cent per pound on Texas steer hides reduces values of Texas cattle $1.50 each, what will the reduction be on same provided a tax of 1¼ cents per pound on hides is imposed?

NOTE.—Total receipts for 1896, 2,600,746; slaughtered, 1,782,420. Total receipts for 1895, 2,588,558; slaughtered, 1,803,466.

Showing that during all these years, 1893, 1894, 1895, 1896, and on to the present time, at no time did the question of the price of hides enter into the sale or the price of the cattle. These figures are not those of a day, a week, or a month, but of year after year; and at no time did the question of the value of the hides enter into the question of what the farmer received for his cattle.

Before leaving this contention, I will frankly admit that there may have been a time in the United States when a tariff such as is proposed might be found to be of material benefit to the farmer and the butcher of our country. But, sir, that time has long since passed. The farmer and the butcher of this country are not to-day independent sellers of their products, and enabled as such to take into consideration every part of the cattle in the making up of its value. They have long since given up their every right in this respect to the aggregated capital of the great companies of this country interested in cattle, who are, beyond question, like all other trusts, the legal offspring and fostered children of excessive protection.

Before they came into active life the ranchman, the farmer, and the butcher of this country were ranked among the best and most independent of our citizens, but since this overprotected power came into being the lands of the farmer and the ranchman, together with the stocks upon them, both vegetable and animal, have become encumbered; in fact, are bartered away to the controlling capitalists before they are in marketable condition. The interested companies buy the cattle at their own price, and no legislation that you can enact in this bill will alter that condition of affairs. With this immense power, then, controlling 90 per cent of the cattle and hides of the country, is it reasonable to suppose that because you impose upon foreign hides a tax of 20 per cent the controllers of the interested trusts will give the benefit of any of that 20 per cent to those from whom they are buying cattle on the hoof under the conditions that now prevail?

On the other hand, is it not more reasonable to conclude that the farmer or the roadside butcher will receive no material benefit, but that the manufacturer and the producer of leather and its products will have to pay above the current price up to the percentage of the discrimination you are placing against the foreign product? To my mind, sir, there is and can be but one conclusion deducted from the proposed duty on hides, and that is, that all that is said regarding such imposition being of benefit to the ranchmen, the farmers, and the butchers of this country is the grossest misrepresentation, and that the material benefits derived from such taxation will be entirely for and in the interest of those great controlling trusts who are crushing out every semblance of the independence of the farmer and the butcher.

Mr. WARREN. May I ask the Senator from New Jersey a question?

Mr. SMITH. Certainly.

Mr. WARREN. I merely desire to ask the Senator at that point, as he has complained quite often of the cattle trust, if there is or is not a trust in this country known as the leather trust?

Mr. SMITH. Yes, sir; there is a leather trust; and under this bill I want to say to you here and now that they will be the only people who will be benefited by it if it shall become a law—they and the beef trust—because you grant a drawback, which can be traced on sole leather and can not be on any other grade of leather that can be exported.

Mr. WARREN. The Senator will pardon me for one more question?

Mr. SMITH. Certainly.

Mr. WARREN. Noticing that the Senator thinks the leather trust, and it only, will be benefited by a duty on hides, may I ask, Does the Senator from New Jersey understand that the leather trust is asking for a tariff on hides or is opposing a tariff on hides?

Mr. SMITH. I would say that very naturally they would oppose a tariff on hides. I should suppose they would; and in that connection, Mr. President, I would further intimate to the Senator who has just taken his seat, who has been one of the Senators who has been advocating a duty on hides, as I understand——

Mr. WARREN. Yes.

Mr. SMITH. In that connection, I ask the Senator from Delaware to be good enough to read this letter.

Mr. GRAY read as follows:

BECKWITH, QUINN & CO., INCORPORATED, STOCK GROWERS,
Cokeville, Wyo., June 12, 1897.

DEAR SIR: In response to your request that we give you our opinion of the probable effect of a duty of 1½ per cent a pound on cattle hides, will say that in our belief the benefit would accrue to the butcher or packer and not to the cattlemen. The bill, as we understand it, raises the duty on cattle on the hoof 10 per cent, and this we heartily approve of, as it will tend to prevent the importation of cattle from Mexico.

We receive no direct revenue from hides and are indifferent upon the subject of taxing them, except as we assume that in a general way the harness leather, saddles, and boots and shoes we consume are likely to be raised in price by reason of the imposition of such a tax.

Yours, truly,

BECKWITH, QUINN & CO.
B. R. WELLS, *President.*

CHAS. A. SCHIEREN, Esq.,
Chairman Executive Committee National Association Shoe and Leather Manufacturers, Washington, D. C.

Mr. WARREN. Since the Senator from New Jersey has introduced a letter purporting to come here from those who live in the State which I have the honor in part to represent, perhaps he will allow me to say that the name Beckwith, Quinn & Co., Incorporated, which appears in that letter, is the old name of a concern now existing as a corporation, as it purports, but Mr. Beckwith is long since dead, and Mr. Quinn long since became a citizen of another State or Territory. The majority of the stock of the Beckwith-Quinn Company is now held by certain boot and shoe and leather manufacturers. The Mr. B. R. Wells who signs the letter as president is of the great Wells boot and shoe house of Chicago, Ill. I simply say this in answer to the letter which the Senator has had read.

Mr. SMITH. It is a corporation. There may be some men who own factories who are interested in the Quinn corporation, but I do not know of any boot and shoe manufacturers or anybody engaged in the leather business who are engaged in the business of raising cattle in order to secure their hides.

When this special session of Congress was called, it was asserted that its action would prove one of the adjuncts of the prosperity so lavishly promised to the people of the United States by the new Administration. It was claimed that the first thing necessary to prosperity was a remodeling of the tariff laws of the country, and that in such remodeling every interest of commercial enterprise would be fostered and promoted. The people were led to believe that the power of capital, and the wishes of individuals and private interests, would give way to the general good.

The fidelity with which this Congress is carrying out these laudable promises is placed before us in the bill under consideration. It is unnecessary for me to go through its long schedules, but if all of them bear the same impress as does the item relating to hides, then I have no hesitation in saying that the bill is not in the interest of the whole people, is not to foster and promote the industries of the country and to place them in such position that they may be able to compete in the markets of the world, but is for the purpose of increasing the power of the gigantic trusts of the country that have already crushed the laudable ambition of every American workman to become a master in his art, which, above all else, made the prosperity of the past.

When trusts did not control every avenue of trade in our country it was the pride of the American workman to compete in all its branches. Then it was a fight between Americans, and out of it grew not so much a race for wealth as that for preference in the different lines of usefulness, and his inventive genius, together with his untiring energy, gave birth to American mechanism, which has become celebrated throughout civilization. When one looks at the trade and commerce of the different nations and asks of competitors everywhere, "In what does the American excel?" he will be informed that he excels particularly in his improved machinery, the result of his inventive genius, and in the beauty and regularity of the designs of articles produced thereby.

I submit, sir, that the most important product of hides are the boots and shoes of American manufacture, which, like her machinery, possess a world-wide reputation for superiority in material, design, and finish, as well as in price. And, further, that the proposed duty on hides can only result in removing the boot and shoe industry from the enviable position which it has won and now occupies in the markets of the world. Even our friends of Great Britain, who rarely praise the work of others, while saying that their own are more durable, admit that the productions of the United States are more beautiful, more attractive, and hence more commendable to the buyer and consumer.

You will find American shoes in England, Germany, and France, and in the Orient. But the margin of profit which permits the extension of this industry, which gives so many of our citizens employment, is small indeed, and will not stand any diminution, such as would result from the imposition of a duty on the principal article from which they are produced. Why, sir, while all the energy and tact of the legislators of the United States have been in the past devoted to the enactment of laws in behalf of the protection of the iron interests of the country, in boots and shoes—products of hides—you will find an interest nearly if not quite equal to that of iron, cotton, and wool.

I send now to the Clerk's desk extracts from unprejudiced sources, and, in addition, a dispatch of Ambassador Bayard to the Department of State, dated March 27, 1894, relating to the growing foreign trade in these products, which I ask to be read as a part of my remarks:

The Secretary read as follows:

[Letter from an Australian manufacturer in the Boot and Shoe Trades Journal, England.]

* * * The real competition for external trade in boots and shoes now lies between English and American manufacturers. The former have been for many years almost in possession of the trade, the latter having only given their attention to it within the last few years. I have been making inquiries amongst the buyers of boots in the colony, and the opinion is general that the American manufacturers will secure a large, increasing share of the business. * * *

American manufacturers have a splendid factory system, by which they combine cheapness of production with satisfactory results to the actual wage earner. Their workmen are well paid and highly intelligent. Their styles are attractive, the fitting of their lasts admirable, and their goods are lower in price than English lines.

The leading retail establishments in the Australian capitals, particularly in Sydney and Melbourne, are making a specialty of advertising "ladies' and gentlemen's fine footwear of American manufacture." The goods give satisfaction in wear as a whole, and repeat orders are being given freely. A week or two ago one retail firm in Sydney gave a £1,700 order to a representative of American firms. * * * The officer appointed by one government to interview the boot and shoe importers was most struck with the opinions expressed as to the growing trade with American houses, and reference to this will, I have no doubt, be found in the report to be made to the Secretary of State.

The American manufacturers enjoy one great advantage over their English competitors through the great enterprise displayed by the leather trade of the United States. The development of the manufacture of upper leather in that country is marvelous, and it furnishes an object lesson to the leather trade of the United Kingdom. * * *

The main object in writing this paper is to seek to arouse the trade in England to the significance of these figures. American boot manufacturers may be said to be only commencing to push trade with the southern colonies of Great Britain. They seem now disposed to take up the business in earnest. It is incumbent, therefore, on our English friends to bestir themselves, especially the producers of leather. Leather is the raw material of the boot manufacturers, and no one can handle American boots without observing that the shoe manufacturers there have been greatly assisted by the manufacturer of upper leathers in that country. They have shot far ahead of their English competitors. If this paper calls attention to the subject, it will not have been published in vain. * * *

[Boston Post, May 28, 1897.]

HOW FAR WILL HE GO?

Senator LODGE urged upon the Republican caucus the inadvisability of removing hides from the free list, where they have remained for twenty-five years. This was right as far as it went. But how much further is Senator LODGE ready to go in the defense of this great Massachusetts industry?

The effect of Mr. LODGE's opposition to the proposed tariff tax on hides was to draw out threats from some of the cheap Western Senators, declaring that if hides were left on the free list they would retaliate by taking off the duty from articles which New England wants to see "protected." These are bulldozing tactics. Will the Massachusetts Senators meet them with firmness, or will they cringe and yield?

When the last United States census was taken, seven years ago, there were 1,057 boot and shoe factories in Massachusetts, in which $44,567,702 was invested. These factories gave employment to 69,934 persons, who earned $34,949,689 a year in wages, and produced goods to the value of $118,500,000. In the same year the total value of all the hides in all the United States, according to the census, was $14,705,486. Is there any comparison to be made between these two industries as regards their relative importance?

Senator LODGE can properly go so far as to refuse to vote for a tariff bill that aims a blow at Massachusetts industry by levying a duty on hides. Neither he nor Senator HOAR can do their duty toward the State which they represent if they stop short of this point.

The large number of factories here given conclusively proves that no grasping trusts have as yet absorbed the boot and shoe industry of the United States, as in the case of the cattle we raise and the meat we eat.

AMERICAN BOOTS AND SHOES IN ENGLAND.

[Consular Reports, May, 1895.]

In a dispatch to the Department, dated London, March 27, Ambassador Bayard says: "As of interest to those engaged in the preparation of leather and in the manufacture of boots and shoes in the United States, I have the honor to inclose herewith an extract from the Times of this date, which discloses the effect of the present conflict now waging in the boot and shoe trade of this country, as a consequence of which American productions are enabled to establish their superiority in the market, and owing to the admission of raw hides and skins free of duty, and to untrammeled resort to labor-aiding machinery, the enterprise and industry of our citizens engaged in the preparation of leather and the manufacture of boots and shoes in the United States are finding profitable remuneration in foreign markets as well as at home."

THE BOOT-TRADE DISPUTE.

[From the Times, Wednesday, March 27, 1895.]

The question of American competition enters so largely into the merits of the present conflict that I availed myself yesterday of an opportunity to inspect some of the goods that have just arrived from the United States. The American manufacturers seriously challenged the English home trade last spring. The fact that a part of the colonial trade had been attracted by American manufacturers gave them confidence that some of the English home trade could be secured as well. A large variety of American-made boots and shoes was shown at the boot and shoe trades' exhibition at the Agricultural Hall, London, but it then became apparent that, although the productions of Vienna and Paris were readily salable in England, the peculiar style of the American goods did not commend them to the English market. This failure, however, only led to the adoption of new methods. English-made boots and shoes were secured, together with all the necessary designs and patterns, and goods made from these designs, to all outward appearance English made, are now being imported into this country.

I have had an interview with a manufacturer, employing over 1,000 hands, who had a consignment of these goods sent over. He stated that the goods were delivered free at his own warehouse door at a lower cost than that at which he could produce them in his own factory. He could sell ten times as many of that class of goods as of any other, and customers would not know them from goods of English make. If the English manufacturers could not beat the Americans in price, the latter would now take a strong hold of the English market. He added that three-fourths of the leather used in the Leicester trade was of American tanning. Questioned as to the cost of manufacture, he stated that boots of the class imported from America would cost in making in Leicester 1s. to 1s. 1d. per pair. In America they would get the same boot made up for 8d. per pair. This saving alone would give the American manufacturers more than a working profit and enable them to compete with English manufacturers.

As to the settlement of the present disastrous conflict, the view expressed by the manufacturer was that it was possible, and ought to be arranged before work was resumed, to have a piecework statement or scale of pay for machine work based on the American principle. Such a statement should embrace but two qualities—a best and a common—and it ought to be in the power of the manufacturer to have the work finished as best or common, at his option. This would enable a manufacturer to have medium or common goods well finished, provided he paid the operative for the extra work done. The operative should be remunerated according to the amount of work he did, and not according to the value of the material to which that work was applied, or the quality of the design, or the cost of the upper.

He then proceeded to sketch a scheme for increasing the number of men engaged. The operatives, he explained, wanted to spread out the work and find something for the unemployed. That increased the cost of production and drove the British manufacturer out of the markets, both home and foreign, and, instead of increasing the work to be done, it would send the trade to America, Germany, and Austria, where there was the keenest competition. His view was that it would be much better in the interests of both employer and employed if the workmen would work only five hours per day, the manufacturers working two shifts His firm had laid down £6,000 in American machinery, but if the machines had been worked up to their full capacity they would have had to spend only £4,000.

The extra driving power required in this case added between £300 and £400 to the cost, besides increased warehouse room, wear and tear, etc. He was satisfied that if the men made the best use of their time they could do the amount of work they had been turning out in six hours instead of spreading it over ten hours. The union, however, would not sanction such a scheme at present.

The view quoted as to the value of American goods, I ought to add, was fully confirmed by one of the largest wholesale buyers in this country, and he added that he was so satisfied with the samples that he had placed large orders with American firms.

Mr. SMITH. I desire to say a few words more. I think, from any impartial standpoint, the statistical and other facts I have

given go to prove beyond any question of doubt that at no time within the last ten years at least has the question of the price of cattle been governed in any degree by the price of hides; that there can be no fair and honest contention that the advancement of the duty on raw hides will benefit anyone except the beef trust; that, on the contrary, on the basis of exports of leather manufactures and boots and shoes, the amount of at least $5,000,000 will be taken away from the laborers, mechanics, and wage earners in leather and leather products. I am not willing to believe that the Senate is prepared now, in the present condition of this country, to take away from the working people $5,000,000, when it will only benefit the great beef trust, which does not need it.

In conclusion, I desire to present the following letter, written by an American statesman, who was ever on the alert to protect American interests. I refer to the following:

WASHINGTON, *April 10, 1890.*

DEAR MR. MCKINLEY: It is a great mistake to take hides from the free list, where they have been for so many years. It is a slap in the face to the South Americans with whom we are trying to enlarge our trade. It will benefit the farmer by adding 5 to 8 per cent to the price of his children's shoes. It will yield a profit to the butcher only—the last man that needs it.

If he were writing now, he would say "the trust" instead of "the butcher."

The movement is injudicious from beginning to end—in every form and phase. Pray stop it before it sees light. Such movements as this for protection will protect the Republican party into a speedy retirement.

Yours, hastily,

JAMES G. BLAINE.

Hon. WILLIAM MCKINLEY,
Chairman Ways and Means Committee.

Such, Mr. President, is the handwriting on the wall!

Mr. STEWART. Mr. President, a marvelous amount of contradictory argument is used in the Senate whenever any question arises. There is no question presented here as to which the arguments of yesterday are not refuted by those of to-day. Men get up here and show beyond controversy that a shrinking volume of money necessarily produces falling prices; and it is conceded by nearly everybody that the demonetization of silver reduced prices 50 per cent. This is conceded by the great statistician, Giffen, to whom all refer and upon whom all rely.

Now, we have Senators reading price lists when there was a tariff, or when there was not a tariff twenty years ago, and making comparisons of the prices of to-day with those of the past, claiming that the tariff was the principal factor. A great many causes enter into the rise and fall of prices, but there is nothing more effective to put down prices than absolute stagnation in business. If enterprise is destroyed, prices must go down; price of labor and of everything else. That is the present condition of the country. Prices are very low, but I should like to hear an argument or a reason why, if there is a tariff on leather and a tariff on shoes and boots, there should not be a tariff on hides. Hides are produced by American labor on the farm. Leather is taxed, and boots and shoes are made principally by foreign labor in the cities.

The newcomers who perform that kind of labor are foreigners, whereas the labor that produces hides is American. I understand the theory of protection is to protect American labor. I have heard no man state why American labor in the fields is not just as much entitled to protection as is foreign labor in the shops. That has not been explained to me.

They say, furthermore, that the farmer should not be protected because there is a beef trust. It so happens, however, that the beef trust does not kill all the beef. I do not believe it can be shown that the beef trust kills 25 per cent of the beef killed in the United States; certainly not 50 per cent.

Then, besides, the beef trust is the result of another trust, and not the result of protection, except the protection to gold gambling. The great trust that breeds all other trusts is the money trust. Competition is the only thing that can destroy a trust. Associations of men to do business is one of the necessities of civilization. Every partnership is a trust. Every kind of an association, every cooperation between men, is a trust to a certain extent, and it is very difficult to draw the line between one organization for industrial purposes and another.

The only remedy for a trust is other trusts. Under laws under which new combinations, new enterprises, are possible the old trusts will go to pieces. You have in this country a large number of trusts. You have the leather trust, and all your other trusts. Why do you have them? Because prices are falling, and men combine to protect themselves. You have driven every kind of business into trusts, because prices are falling. A, B, and C are engaged in a business. It does not pay; they say, "Let us get together and not run against one another. Nobody else can start if we get together and let some of our mills stand. We have perfect security against opposition if we get together, because prices are falling and nobody dares to start while our machines are lying idle." So you fill the country with trusts.

Then you go on and rail against trusts. Trusts are fed on falling prices. Falling prices are produced by a shrinking volume of money, and while the volume of money shrinks men must go into trusts or into bankruptcy. They can not compete. With a large number of factories standing idle, with three or four million laborers idle in the country, talk about competing against trusts! Nobody dares go into business when the loanable value of money has fallen nearly 75 per cent. Why is that? There are three or four hundred million dollars in your banks which can not be loaned. Why? Because it can not be used profitably. Because if it is put into business, the business must fail.

It can not be used profitably. Enterprising men dare not borrow, and men who have money dare not loan, because property is depreciating. Let business revive, and the loanable value of money will more than double. The loanable value of money on good security is not more than 2½ per cent to-day, perhaps less on gilt-edged security, because there is so little gilt-edged security. You can not put your hand on anything that is not escaping from you all the while. There is little good security. The competition for gilt-edged security to make loans upon is so great that people will take 2½ to 3 per cent, whereas if business were prosperous, the money could be profitably used. If they borrowed money, they could pay it back. There would be plenty of security, and interest would run from 6 to 7 per cent.

But money will not earn anything in business. It is true that there are certain classes of people who can profit by falling prices. They are the wreckers. For example, these bond manufacturing institutions in New York and London, which wreck a railroad, bond it, and sell the stock, and then wreck it again, and do the same, and keep doing it. The courts have held that the current expenses have a prior lien upon roads. All they have to do is to let a little debt accumulate against it, and then they have ready cash and can say who can come in and who shall not. The property of the balance is confiscated. In the last five years not less than $5,000,000,000 of stocks and bonds in the United States have gone to the bad, and those who invested in them have been robbed by inside manipulators. If they can keep prices falling, keep on wrecking business, the wreckers will make money, if they do not get caught themselves. The loaner of money takes desperate chances, because he can not get good securities. They are losing as much as any other class.

We talk about trusts when there must be trusts. The only people who thrive are those in trusts. The balance go into bankruptcy. Let us have competition, and those trusts will melt away like dew before the sun, because they have large establishments, encumbered with a great many deadhead concerns. Just as soon as enterprise starts they will fall to pieces. Take the sugar trust. It could not live a year if you had an abundant supply of money. They have a whole lot of concerns lying idle, and they are at enormous expense in carrying out their plans, in lobbying, and doing everything. If business were lively and prices were rising, small capital could go into the manufacture of sugar. It could manufacture sugar cheaper, and the trust would melt away.

But people rail against trusts and insist upon a condition of things under which trusts must exist or universal bankruptcy must prevail. Trusts are as inevitable and as necessary with falling prices as the air we breathe. Those who are not in them have gone to the bad all over the country. The only people who have been saved from the bad in the last few years of falling prices are those engaged in trusts, limiting production. Do you want to deprive the people of their only house of refuge when you make competition impossible? And I say competition is impossible when 3,000,000 laborers are idle, when business is stagnant. It is impossible. But there are plenty of people who would go into enterprises if there were opportunity. Can any man of enterprise and industry make a competence and establish a home for himself in this country?

Opportunities are gone. That is why our European friends who are monarchists are in favor of contracting the currency. They very properly say if you expand the currency and let prices rise, industry will prosper and you will have democracy. But contract the currency, destroy enterprise, and capital must rule. Capital is conservative. Capital will maintain the established institutions. Capital will maintain monarchies. Capital will wreck republics. That is what they want.

This is a world-wide combination. It is a great trust for the purpose of destroying democracy and building up aristocracy. It is ruining and impoverishing the people. While the great money trust rules the civilized world, Egypt will have the English lash on the back of the poor people. You will have Christians in Greece and in Turkey begging for protection when there is none. You will have a united Christendom joining the Turk to maintain his right to kill Christians. You will have all these things while the money trust controls.

How did the English acquire possession in Egypt? The Rothschilds had a fraudulent lot of bonds that everybody laughed at when they were issued, amounting to $500,000,000. To collect the interest on those bonds England took possession of that country

and applied the lash to the Egyptians. Look at the rapacity of this gold trust. It has confiscated $1,700,000,000, it is estimated, of the property of the poor Hindoo by demonetizing silver, and they are starving to death to-day by the millions, with no money with which to buy food. It is the money trust that is doing this. While that trust exists it is idle to talk about trusts. While it exists it will breed other trusts, and it will breed faster than you can kill them. Legislation can not reach the trusts. Legislation to reach trusts would reach the business relations, the associations necessary in order to civilize and progress. There never was a time when business was good and money was plentiful that trusts thrived. New, vigorous organizations can create establishments and manufacture cheaper than old, decayed trusts.

I hear the papers talking about trusts. So far as this is concerned, they say because there is a trust in beef that the farmer should not be protected on hides. If there is a trust in leather, why protect the manufacturer of leather? "Give us a foreign market; let us export." How? By making the farmer bear the burden. Does he not carry burdens enough? It is because you can get cheap hides from Mexico and South America that you can export. The reason why you can export is because the farmer in this country is put in competition with the lowest paid labor—labor that gets nothing. Our people can manufacture for export if you can avail yourself of that.

What you want is a free-trade market in which to buy and a protected market in which to sell, and then say we will have a surplus. If you are going to have a free-trade market in which to buy, you ought to have a free-trade market in which to sell. You should treat both sides equally. The idea of giving the manufacturer of leather and shoes a free-trade market in which to buy and a protected market in which to sell is an outrage, and it rests upon no principle whatever. The talk about what has been the relative price of this article under protection and not under protection is no test. You can not test it by that rule, because prices have fluctuated, as I have said, for other reasons than that of the tariff.

This is a very small protection, 20 per cent. It ought to be 50; it ought to be 100, if necessary, so that the hides produced in this country would all be used before others were bought, if you are going to carry out the principle of protection. I apprehend that even my friend the Senator from New Jersey [Mr. SMITH], who is a very fair-minded man, would hardly consent that the tariff should be taken off of leather and shoes and boots. They have a tariff on those articles, and New Jersey Democrats, and I find that New England Democrats, like that kind of a tariff. I know there is no difference between the Democrats and Republicans——

Mr. SMITH. I will say for the benefit of the Senator from Nevada that if hides and all the articles that go into the manufacture of leather—I know something about the manufacture of leather myself—were put on the free list, I would be entirely willing to put it on the free list, and no American manufacturer would lose anything by it.

Mr. STEWART. I am glad to hear the Senator from New Jersey say that. It is a very honest, fair expression. I wish it could prevail generally. I wish, when it is claimed that free raw material, as they call it, because it is produced by American labor, should go on the free list, they would say, "We will put our materials which are produced in the shops on the free list." That is a very fair proposition. It is impractical, I will tell my friend, and he can not get any friends to go with him on that.

What I am pleading for is equality, and there ought to be no discrimination. I believe in the principle of the Chicago platform of 1896, when Democracy took a new departure, when it took a departure for the people against the trusts and the combinations and the money power which is enslaving them. It then declared in favor of making it equal, without discrimination against any interest, without discriminating against any class of labor or any class of men or any section of this country.

I say that to have a tariff on leather, a tariff on boots and shoes, and no tariff on hides is a discrimination against which the Chicago platform pronounced affirmatively. I am for the Chicago platform of 1896 on this question and all other questions. It is an American platform. It is the platform of equal rights. It is not a platform to put protection on what is produced in my State and leave what is made in yours on the free list. That is not the platform of the Democratic party. I know something about that platform. I have read it a good many times, and I like it.

Now, I say that putting any article on the free list and then putting the manufactured result of it on the protected list is a discrimination against the first producer. Raw material! What a farce that is! Raw material upon which labor has been expended! It is nonsense. Every article goes through many different processes, but the first process requires labor and changes it from the raw material, and the labor cost is what we want to equalize. It is true we have a beef trust and a very bad one, but I undertake to say we can never deal with that trust until the farmers have better times. They can not now get anything for their products. The farmer has to pay for everything you buy abroad. He pays for all you import. He pays for the luxuries you buy abroad. He pays for the interest on the debt you have accumulated under the gold-standard arrangement.

What he exports bears the entire burden. He has the whole thing loaded upon him, and to say you will not help to take that off where you can do it with the same kind of legislation that you ask for yourself, that you will not share with him any of the benefits of protection, that he shall be driven in every article into competition with cooly and slave labor abroad, is unjust.

You can not protect wheat unless you give it an export bounty, which you ought to do, because we produce a surplus of wheat and send it abroad to buy what we import and to pay our debts. The same is true of cotton. You can only protect that by an export bounty. But the same farmers who are engaged in producing wheat and cotton are engaged in raising some stock, and you can do a little for them in this way—a very little. This is 20 per cent. If that was in a manufacturing concern and in a combination of manufacturing influences, it would be 100 per cent.

I am astonished at my Democratic friends protesting against their constituents having a little of the benefits of a protective system which they are going to vote for. They voted for the Wilson bill, the same system. This bill is on the same plan as the Wilson Act. There is no difference. No man has had the audacity to introduce a free-trade tariff bill for the last thirty years. Nobody does that. They are all on protective lines. While you were voting for protection, when you gave the New England manufacturers a tariff on leather and on boots and shoes, why did you not, in the Wilson bill, give a little protection on the articles the farmers produce, which go into the same production—into boots and shoes?

Why discriminate? The Democrats are not free from this. They did it the same way, and some of them now will vote to put this very article on the free list. On what principle, I should like to know? Why should the people of Missouri or Kansas work for the people of Massachusetts or any other State? I should like to get at it. I should like to know what it is. If we are going to have protection, why are not the people of Missouri and my State as much entitled to it as anybody else? The proposition is, to treat what is produced by one section on the free-trade theory, to enable the manufacturers to sell in a protected market and buy in a free-trade market. All the letters that come in are on that basis. They just look at home—at what they can produce. They do not look at the effect on their neighbor at all.

If an honest tariff were levied, if it could be levied, there would be no objection to the tariff. The only difficulty is in adjusting it. When there is a plain principle, as plain as this, it seems to me the man who will vote for any kind of a tariff that will operate as protection, and will not vote for a tariff on hides and wool and things of that kind, does not understand the principle of protection, or is very much down on the South and the West, which produce those articles. He is either very greatly prejudiced or very stupid. I say that with all due respect to those who differ with me. My friend the Senator from South Carolina [Mr. TILLMAN], while he did not give protection a very complimentary name—I believe he called it a steal or a swindle or something of that kind—said if it was going around he wanted to have his share.

Mr. GRAY. That is the principle.

Mr. STEWART. I say it is the principle; and if the others are going to have it, no matter how you please to call it, while your constituents stand the burden and have none of the benefits, it is all wrong. It is on the principle that a man who will not provide for his own household is worse than an infidel. If you were here voting against all tariff, if your Wilson bill had been a free-trade measure, if there is anything in the record of the Democratic party showing that it is a free-trade party and not going to protect, then there would be some excuse for it; but as long as they are for protection there is no excuse for discrimination in favor of one section against another.

That is one of the reasons why I like the Chicago platform of 1896, which took such a glorious position in favor of the American people and against the combinations and usurers and wreckers and monarchs attempting to enslave mankind, who hold the lash over the Egyptians, starving and trampling and enslaving 350,000,000 Hindoos, marching their armies to crush out republican institutions in South Africa, menacing free institutions everywhere, and who have brought ruin to this country by producing stagnation and hard times.

Why should we have hard times now? Does twenty-five years of peace and abundant harvests in this country, with unlimited resources, necessarily produce hard times? Everybody knows that that is not the cause. Everybody knows that a want of a sufficient money supply upon which to do business and falling prices are the cause of hard times. It is want of money. Everybody knows it who knows anything at all. That being the case, times being so bad—and they are going to be worse—why should a few

men be saved while the great mass of them are ruined? Why not save the farmers as well as you can while you make rich the manufacturers? There is no reason, and the time will come when the sentiment of the Chicago platform, which repudiates discrimination against sections or individuals or individual interests and wants, and honest tariff, which will bear equally upon all industries, will be universal in the United States.

Mr. ALLEN. Mr. President, I have announced myself so frequently as being opposed to a distinctively protective tariff levied for the sole and exclusive purpose of protection that I suppose it is neither necessary nor proper for me to restate my position upon that question at this time. But I am very forcibly impressed with the argument made by the Senator from Nevada [Mr. STEWART], as I am always impressed with what he says. If we are to have a protective bill that levies taxes upon protective lines exclusively or principally, it is preeminently proper that protection should extend to all sections of the Union alike and to all articles that may be protected.

There is nothing in the bill thus far that is of benefit to the farmer. The man who produces grain and who raises stock for a livelihood has not one penny of benefit in the bill, either direct or indirect. Here is a little item of a tax upon hides which might be made of some benefit to him if Congress were disposed to take into consideration his condition and his wants and wishes, and the moment it is mentioned that moment it meets with opposition. In other words, everybody is to be protected in all the various lines of industry and trade except the man who is engaged in the primary occupation, the occupation of all occupations, that of farming.

We have been told, and I presume will be told again, that a protective tariff upon hides is of no value. My distinguished friend the senior Senator from New Jersey [Mr. SMITH] takes that position. The junior Senator from Missouri [Mr. VEST] takes that position, and yet, as strange as it may seem, in New Jersey and Missouri we find the heaviest boot and shoe manufacturing establishments of the United States. I think the city of St. Louis makes more boots and shoes than any other city in the United States of America. So it is not an unmixed question in New Jersey and Missouri. There are the boot and shoe makers upon the one hand contending for benefit to their interest, and there are the farmers of those States upon the other hand contending, I suppose, for benefit to their interest. But in the State which I have the honor to represent in part in this Chamber we have no great boot and shoe manufactories, no great institutions like that to overcome and overbalance the interest and the wishes of the farming classes. We have a due proportion of manufacturing, it is true, for a new State, but our manufacturing is limited as compared with the output of hides in the State.

Mr. President, if there be any truth in the theory that as you protect an article or exclude a foreign article from the market you correspondingly raise the price of the domestic article—I believe that is the gravamen of the Republican argument upon this question—then the State of Nebraska produces a million of hides a year, in round numbers, upon which her farmers ought to receive under the bill as it was first amended by the Senate committee a cent and a half a pound.

Mr. PLATT of Connecticut. They get fully that now, I think.

Mr. ALLEN. I do not know. It strikes me that hides are on the free list now.

Mr. PLATT of Connecticut. No; I mean under the amendment as now proposed fixing the rate at 20 per cent ad valorem.

Mr. ALLEN. I do not know. I was about to ask the Senator from Connecticut why the rate was changed from a specific to an ad valorem duty.

Mr. PLATT of Connecticut. It was thought that a specific duty of a cent and a half a pound would not work equally. Dry hides weigh very little compared with green hides, and the duty would not be as much on the dry hides as on green hides. It was thought that it would be more equitable to make an ad valorem duty. In my judgment, an ad valorem duty on green hides of 20 per cent would be nearer 2 cents a pound than 1½ cents.

Mr. ALLEN. That depends altogether upon how green the hide is. There is a marked difference between a dry hide and a green hide.

But passing that over, the people of the State of Nebraska produce, in round numbers, as I said, 1,000,000 hides a year. Now, this little sum of a cent and a half a pound would be of some benefit to them, if the protective theory is correct. If it is not correct, then the insertion of this tax in the bill would be a work of supererogation; and if, as is claimed by the Senator from Missouri and the Senator from New Jersey, the great beef trust of the country eats up the value of the hides to the farmers, then it would be equally a work of supererogation.

In this connection, as throwing some light upon the product of hides, their weight, and value, I will read a portion of a letter from the Cudahy Packing Company, of South Omaha, Nebr., to me. This is written by Mr. Edward A. Cudahy, vice-president and general manager of the company, and is dated South Omaha, Nebr., April 10, 1897:

It is difficult to furnish very accurate statistics as to the annual hide output of Nebraska, but the information given below will, I think, be sufficiently correct for your purposes. The Department of Agriculture returns show that the State of Nebraska contained on—

	Cattle.		Cattle.
January 1, 1893	2,100,000	January 1, 1895	1,750,000
January 1, 1894	2,150,000	January 1, 1896	1,600,000

The number of cattle slaughtered at South Omaha were:

In 1893	546,000	In 1895	312,000
In 1894	501,000	In 1896	302,000

The average for each year being about one-fourth the number of animals in the State. We think that 250,000 to 300,000 head are killed annually throughout the State for local consumption, thus making the entire annual output of the State from 600,000 to 700,000 hides.

I may be permitted to say that, in my judgment, this is too low.

The present market prices of hides in South Omaha are, per pound, native steers, 8½ cents; butt-branded steers, 8 cents; Texas steers, 8 cents; Colorado steers, 7½ cents; branded cows, 8 cents; native cows, 8½ cents; native bulls, 7½ cents; and this is not very far from the average prices during the past year. As the hides will weigh about 60 pounds each, the average value is about $5 per hide, or a total of from $3,000,000 to $4,000,000 per annum.

Statistics show that during 1896 the value of hides imported into the United States was about $20,000,000, and that during the same period about $16,000,000 worth of leather was exported, about one-half of which consisted of sole leather made largely from imported hides. It is claimed by leather men that if a duty was placed on hides sufficient to prevent their importation, that it would correspondingly decrease our exports of leather, and thus keep out of employment a number of persons engaged in the tanning and leather industries, without benefiting the market on home-produced hides. My own idea is that a slight duty would not seriously interfere with the importation of hides, and at the same time would be considered very favorably by the cattle risers of the United States.

This comes from a practical man, one whose whole life has been devoted to the packing industry, and it shows that the imposition of a slight tariff upon hides would be of some benefit to the farmer. What is true as respects Nebraska is true as respects every other State in the Union. I am taking it, of course, for granted that the cardinal argument of the Republican party is true, and for the purposes of this argument I assume that it is true.

Now, why should there be any discrimination? If an interest in Maine is the subject of protection, the like interest in the State of Nebraska or in the States of Texas or California ought to receive the same protection. If we are to enter upon an era of tariff taxation which will drive from our shores much of the commerce of the world and turn over our domestic commerce to trusts and corporations, let us give the farmers some slight benefit that may be derived from the imposition of a tax of this kind.

I can see no reason why a specific duty of a cent and a half a pound should be converted into an ad valorem duty. But I pass from this to another branch of the question, which seems to me to be of more importance than the mere question of imposing a tax upon hides at this time.

The Senator from Missouri [Mr. VEST] has told us, and he has been reenforced by the distinguished senior Senator from Massachusetts [Mr. HOAR], that this Government is powerless in the hands of a great trust that controls the beef output and fixes the price of hides and all kinds of meat. We are told that under the laws of the United States this trust has the power to put down and raise prices at its will; that it can say "Thumbs up!" and up they go, and "Down!" and down they go; and that the whole Government, from the Chief Executive of the nation down to the most obscure judiciary of the land, is powerless to relieve us from its grasp.

The senior Senator from Massachusetts, who knows everything upon legal propositions excepting what few crumbs he allows a few of us to pick up occasionally here and there in spots, tells us that our remedy is to go to the courts of Pennsylvania in the instance cited by the junior Senator from Missouri. Mr. President, I say that it is primary law, capable of demonstration here or elsewhere, that whenever these interests combine to put up the price of an article of consumption to the American people they are guilty of a criminal conspiracy under the laws of this nation, and may be indicted and prosecuted and punished for the crime. Why, sir, they are guilty at common law. Whoever at common law conspired to increase the price of food to the people was guilty of a crime and was subject to indictment, and the Supreme Court of the United States, in 156 Reports, have not changed that rule in the slightest degree.

Mr. PETTUS. Will the Senator from Nebraska allow me?

Mr. ALLEN. Certainly.

Mr. PETTUS. Is there any United States criminal law outside of the statutes?

Mr. ALLEN. The Senator's question is foreign to anything I am discussing. I repeat what I said a moment ago, that at the common law a conspiracy to raise the price of food was a crime. Does the Senator deny it?

Mr. PETTUS. I do deny that it is a crime against the United States.

Mr. ALLEN. I am not talking about the United States now. I say that we have in the statute book a law which reenacts the

common law of England on the subject of a conspiracy between parties to raise the price of articles of consumption. We have supplemented that law. That which came to us as an inheritance from England, and which is found in every State of this Union, was made the law of the nation by the act of 1890, and not only by the positive words of the act of 1890, but by the evident policy and spirit and purpose of that act. Possibly, while the Senator from Alabama is putting questions, I may put one to him. Does not every State of the Union inherit the common law of England as it existed at the period the Union was formed?

Mr. PETTUS. That is the general rule, with one or two exceptions, I believe.

Mr. ALLEN. I am glad to know that I am right. Now let me read the act of July 2, 1890. It is short, and I will read it entire:

Be it enacted, etc.:

SECTION 1. Every contract, combination in the form of trust or otherwise, or conspiracy in restraint of trade or commerce among the several States, or with foreign nations, is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 2. Every person who shall monopolize, or attempt to monopolize, or combine or conspire with any other person or persons to monopolize, any part of the trade or commerce among the several States, or with foreign nations, shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 3. Every contract, combination in form of trust or otherwise, or conspiracy, in restraint of trade or commerce in any Territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such Territory and another, or between any such Territory or Territories and any State or States or the District of Columbia, or with foreign nations, or between the District of Columbia and any State or States or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding $5,000, or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

SEC. 4. The several circuit courts of the United States are hereby invested with jurisdiction to prevent and restrain violations of this act; and it shall be the duty of the several district attorneys of the United States in their respective districts, under the direction of the Attorney-General, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition, the court shall proceed, as soon as may be, to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

SEC. 5. Whenever it shall appear to the court before which any proceeding under section 4 of this act may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpœnas to that end may be served in any district by the marshal thereof.

SEC. 6. Any property owned under any contract or by any combination, or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act, and being in the course of transportation from one State to another, or to a foreign country, shall be forfeited to the United States, and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure, and condemnation of property imported into the United States contrary to law.

SEC. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared to be unlawful by this act may sue therefor in any circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the costs of suit, including a reasonable attorney's fee.

SEC. 8. That the word "person" or "persons," wherever used in this act, shall be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the Territories, the laws of any State, or the laws of any foreign country.

That is the entire act. Mr. President, the act of 1890 revives the common law of conspiracy with reference to matters of food, and in fact revives it almost as completely as, if not more completely than, it formerly existed, or I should say, perhaps, that it enlarges the common law.

There are two courses which can be pursued by the United States as respects one of these conspiracies. The first is to indict and punish for the crime of conspiracy. The second is the softer and the easier way for the conspirator, and that is to sue out a writ of injunction.

Mr. VEST. Will my friend permit me to ask him, as a lawyer, this question: Does he hold that under the act which he has just read the United States court could take cognizance of a conspiracy, if you please to term it so, inside of a State, which affected only articles sold between the citizens of some State?

Mr. ALLEN. Oh, no, Mr. President; I have not said anything of the kind. But I do not know; I am pretty nearly prepared to say it, and I may say it after a time.

Mr. VEST. Will the Senator let me make a suggestion? If he will read the act carefully, he will see that as to those sort of transactions it confines the jurisdiction of the United States courts to the Territories and the District of Columbia, over which we have the same power as a State legislature. As to the States, the United States courts have no right to make an application of the statute to the transactions between citizens of the same State, but it must be an unlawful combination in restraint of trade as to commerce between the States or with foreign nations. All three of the sections have that limitation on them.

Mr. ALLEN. I do not think there is any difference between the Senator from Missouri and myself.

Mr. VEST. If the Senator will permit me—and I will not interrupt him again—he will find in the existing tariff law a much more comprehensive provision; he will find what is known as the Morgan amendment.

Mr. ALLEN. Yes, I remember that provision.

Mr. VEST. I think there are some five sections of it. I have always thought that that went much further than what is known as the antitrust law.

Mr. WHITE. If the Senator from Nebraska will permit me, I will call his attention to a very brief statement made by the author of the trust law and published in this morning's New York World, which ought to be a matter of interest. I refer to the statement made by Secretary Sherman. According to the interview, he stated:

> The present national trust law (the Sherman law) is not strong enough. I framed it myself, and the Senate Committee on Judiciary made changes in it which materially weakened its effect. I favor making unlawful in the most direct manner all combinations in restraint of trade. They put all industries in the control of a few men. The people have a right to open competition in all industries and trades.
>
> Restraint of trusts can be made effective when we get the proper kind of a law. The Supreme Court has upheld the present trust law, but has pointed out its defects. I think that those defects can and will be remedied.

The rest of the article refers to the fact that there are no bosses in Ohio, and contains other information not pertinent to this discussion.

Mr. ALLEN. I accord the Secretary of State much credit as a statesman of renown and large experience, but I will say in all frankness in this public manner that I prefer to follow my own judgment of the law rather than to follow his.

Mr. President, there is no real distinction between the Senator from Missouri and myself, whatever there may be between the Senator from Massachusetts and myself upon this question, and we never can agree upon any question that I have ever yet discovered. Commerce between the States does not mean commerce between the States as legal entities. That was merely figurative language. There was no such thing when the Union was formed as commerce between the States in a technical sense, or, if there was, it was very limited, and therefore the courts have held—and it is true—that the expression in the commerce clause of the Constitution, of commerce between the States, means that commerce which is carried on between citizens of two or more States.

Mr. HOAR. The language is "among the several States."

Mr. ALLEN. I find the language is "to regulate commerce with foreign nations, and among the several States, and with the Indian tribes."

That means, Mr. President [the Vice-President in the chair], that when you as a citizen of New Jersey engage in traffic with me as a citizen of Nebraska, you will ship an article from New Jersey to Nebraska, or vice versa; that is interstate commerce, and can be regulated by Congress. Sir, suppose two or more persons enter into a conspiracy that in shipping their articles from one State to another, as a result of their agreement, they will, by certain means, drive another person or certain other persons out of trade in the State of Pennsylvania. I want to know if my distinguished friend from Missouri will claim that that is not indictable under the law of 1890 and under the present Wilson law? Is not that interstate commerce?

Mr. PETTUS. Without a doubt.

Mr. ALLEN. Without a doubt, my friend from Alabama says. That is what I mean, and when the Senator from Massachusetts says that a conspiracy set on foot in Chicago, by which articles are to be controlled in Pennsylvania, and the controlling of those articles in the State of Pennsylvania, and the driving out of citizens there from trade as the result, is not indictable under the law of the United States, as much as he knows about those laws, I must be permitted to enter my dissent. It would be a direct violation of that portion of this act which makes a conspiracy criminal. It was to protect the man in Pennsylvania and to protect men all over the United States from the result of these conspiracies that the conspiracies themselves were made indictable.

True it is that the courts of Pennsylvania would have concurrent jurisdiction and might indict and prosecute for conspiracy; but that would not prohibit the courts of the United States from doing likewise. And there is nothing in the case of Knight, in 156 Supreme Court Reports, in conflict with the position I have taken.

Mr. HOAR. Mr. President, I do not propose to go into the discussion of this question at this time. I think it likely that there will be an amendment proposed to the pending bill intended to perfect the provisions, or at any rate to continue the provisions on this subject of the tariff law of 1894, and an amendment which will declare that those provisions are not repealed by the present act. Such an amendment has been prepared by the honorable Senator from Alabama [Mr. PETTUS]. Unless some

new view of the matter should occur to me before it comes up for action, I expect to vote for that amendment. If it shall come up—and I suppose it will, as the Senator from Alabama has given notice and has had his amendment printed—that would seem to be the proper time to discuss it, and not now. So I do not propose to go into the general question.

I propose, however, to point out two or three difficulties in dealing with this problem which trouble me. They do not seem to trouble the Senator from Nebraska [Mr. ALLEN]. The Senator from Nebraska seems to think that if anybody else is troubled by them, or, at any rate, if I am troubled by them, it furnishes some reason for some objurgatory expressions on his part. But I must do my duty as well as I can, without being too much disturbed with the disapprobation of that Senator, although I do not like to incur the disapprobation of so intelligent a gentleman as the Senator from Nebraska.

Mr. President, the trouble is this: State commerce, that is, manufacturing articles within a State and the selling of articles within a State where the manufacture and the contract of bargain and sale are both completed and executed, is within the domain exclusively of State legislation; and the conspiracy to do anything in the way of manufacture within a State, or in the way of bargain and sale where the contract of bargain and sale is to be completed and executed within the State, to affect the price of any article favorably or unfavorably, to depress or to raise it, is also a matter solely within State jurisdiction, as I understand it. The power of Congress begins when the article is transported from one State to another, or when the process of bargain and sale is carried on between citizens of different States, or the sale is made in one State to be executed in another. There are the two fields.

I understand the question has been presented to the Supreme Court of the United States whether, if an article be manufactured and the process completed within the limits of one State, or if it be sold and the transaction completed and executed and the delivery take place within the limits of one State, anything criminal, either in the way of conspiracy or forestalling or increasing or diminishing or monopolizing, or whatever may be the description of the crime at which we wish to strike in regard to that article, can be punished by United States authority because the article is expected afterwards to be the subject of interstate commerce, either by being transported from one State to another or to be sold by the local buyer to another buyer in another State; and I understand the Supreme Court, in the case cited by the Senator from Missouri [Mr. VEST]—one of the justices only dissenting, to wit, Mr. Justice Harlan—to have held that we can not deal with a conspiracy to raise or lower the price of an article to be sold, the transaction being completed within the State, or with a conspiracy to affect the price of the article in its process of manufacture, or in any other way, merely because the article may be a subject of interstate or international commerce afterwards, and is expected to be, either by being transported from one State to another or sold by the seller in one State to a buyer in another State.

There is the difficulty, if I correctly understand it. That is the difficulty which troubles me; and I do not find that the Senator from Nebraska so far has helped me out of it, though I am anxious to join with him in attacking the evil if I can, and getting around that difficulty.

Another proposition also, I suppose, follows, though I do not know that it has been expressly decided; and that is, if a citizen of one State enter into local commerce in another—the commonest case in the world—where a man who does business in New York lives in New Jersey and comes into his place of business in the city of New York, I do not understand the mere fact that he is a citizen of a State where he does not carry on that particular business makes a purely local business carried on by him subject to national authority; and I suppose that to be true even if, dwelling in one State, he carry on local business in another, or if, dwelling in one State, he carries on local business in forty-four others, or in every other State in the Union.

One of our great troubles in this matter is the influence, as the Senator from Missouri or the Senator from Nevada, or both of them, said, of enormous aggregations of wealth. A man who has come to be worth $100,000,000 can, if he chooses, affect State legislation and national legislation powerfully by influences in a hundred ways which can not be touched by the criminal law—at any rate, by any criminal laws we have now got; but you can not help that thing on a tariff bill, if you can by any national legislation.

Whether you can help it at all, is one of the profoundest and most difficult questions with which we have to deal; and I think—though other gentlemen differ with me, and I do not want to go into a discussion of that question now—that those great aggregations of wealth are not the result of manufacturing industries or protected industries in this country as a rule, though there may be some exceptions. Some have come from patents, some have come from dealings with great railroads. They came in the old generation from the business carried on by importing merchants. They have come in later generations from investments in real estate in the neighborhood of growing cities; they have come to some extent, I suppose, in the past, from great mining enterprises. I do not think, therefore, we can deal with them in a tariff bill.

Now, suppose—to come back to what I was saying, and to illustrate—suppose the Standard Oil Company, wishing to get a monopoly of the business in this country—and it makes no difference whether the Standard Oil Company is a corporation composed of three or four or thirty or forty men, or is an individual like Mr. Armour or Mr. Swift or anybody else—suppose they say: "We mean to manufacture and supply every citizen of this country with all the oil which is to be consumed; we will reduce the price to the people by the economies which can be practiced by a vast business."

It is very clear that so far that is a beneficial thing to the people and that you can not help it. When they have got so that they can do that, then they largely monopolize the business in that innocent and harmless and, indeed, beneficial way. But still, there they are, a great menace to legislation; there they are, controlling this vast amount of wealth, liable to be perverted in the next generation, if not in this, to bad uses; and we have got to prevent that by some remedies, as I said, which do not come in a tariff bill, if it can be prevented by legislation at all.

Next, having got as far as that, having got along in their business, they say that if anywhere in the United States a small dealer sets up in the business of dealing in oil, they will plant two establishments next door, or close by him, in the same village or town, or ten establishments, the necessary number, and simply undersell him, until he loses all his customers and goes out of business. They do not do it by anything which is an instrumentality of their interstate commerce under the decision of the Supreme Court. They send their oil from the place where they manufacture it to the town where it is to be sold; they retain the property in it themselves.

The mere transporting it from one State to another, of course, is to that extent interstate commerce—they do it by rail—but that has nothing to do with the illegal part of the transaction. So far the man or the company in the West, in Chicago, or in Cincinnati, or wherever the headquarters of their business may be, have taken their own property to Connecticut or to Massachusetts, or wherever they expect to sell it, and put it into a warehouse of their own. When they have done that, that company have done nothing more on a vast scale than the man does on a small scale who travels from one State to another with his personal baggage in a carpet bag in his hand. Their offense, therefore, is the offense simply of dealing in the local business, all the interstate part of their business having been absolutely innocent, something you can not touch in a way to break down their local business. I am afraid that has got to be dealt with and must be dealt with solely by State authority.

One suggestion has been made in regard to the great sugar trust, as it is called, which, if the ruling of the Supreme Court in the Knight case may be taken as stating the whole story, is not literally and technically a trust, for a reason which I shall state presently. You can probably to some extent, as the Senator from Alabama has tried to do, and as the old tariff act of 1894 tried to do, punish them by striking at their imports, if they undertake to import any articles from abroad for the purpose of getting a monopoly in pursuance of a conspiracy against the freedom of trade, of interstate or international trade; but I do not see how you can say, as has been proposed and as was proposed in the amendment of the Senator from South Dakota [Mr. PETTIGREW] the other day, that if a man violate the law by importing for this illegal purpose, you can punish him not only by confiscating the article imported, but by prohibiting him from exercising the right of importing for the future. In other words, I do not see how you can make as a punishment for a single offense a deprivation of a right to engage hereafter in commerce as other citizens do in their transactions, which are innocent and not unlawful. That certainly would be an unusual punishment, which is expressly prohibited by the Constitution of the United States.

I understand a trust—of course, it is a word that is popularly used, and used sometimes in both Houses of Congress, as representing any great combination or aggregation of capital which gets an advantage or a monopoly in manufacturing or trade—but I understand that a trust, technically and legally, means the case of having one or more persons commit to others, or to a combination of others, their business, or the control of their business, or the management of some portion of their business, such as the selling portion or the fixing the price or the hiring of labor, with the understanding that those powers are to be exercised by the corporation or combination to whom it is committed in a manner to operate for the benefit of the persons committing to them that power, ordinarily by the depression or putting up of prices. So the Standard Oil Company, as I have just described it, or the Sugar

Refining Company, as its business was proved to be carried on in that case, is not a trust, and I am afraid if we make a law which strikes at trusts simply we shall fall very far short of meeting and dealing with this evil.

Mr. LINDSAY. Mr. President——

Mr. HOAR. I wish my honorable friend from Nebraska would believe me when I assure him that I should be glad to find a constitutional method to uproot these great evils. I have no interest in them; I have no friends or kinsmen or acquaintances who have an interest in them. I think they are a menace to the Republic itself. But it certainly does not indicate a true desire to reform evil to go at it recklessly, without studying the difficulties, especially when we have this complicated division of powers between the nation and the States. If the Senator from Nebraska will help us out by finding a mode which will accomplish this end, and which will stand the scrutiny of any judicial tribunal, and which would stand his own scrutiny if, instead of being a Senator, he were a judge, I should be very glad to go with him to accomplish the result.

Now, I will listen to the Senator from Kentucky, if he desires to be heard.

Mr. LINDSAY. I was going to make this suggestion, that the sugar-refining arrangement prior to 1890 was, as I understand, in the nature of a trust; that fifteen or twenty corporations, which otherwise would have been in competition, did arrange to combine all their business, and that they should have a common management, but in the suit in New York it was decided that it was a trust.

Mr. HOAR. And that put a stop to it.

Mr. LINDSAY. And that put a stop to it. Then they took out letters of authority, organized a corporation in the State of New Jersey, and these same corporations put their property in at an agreed valuation.

Mr. HOAR. And abandoned their old organization?

Mr. LINDSAY. Yes; they abandoned their prior arrangement and took stock in lieu. Then it was none the less a monopoly after that because it ceased to be a trust.

Mr. HOAR. So I understand; and that made it much harder to deal with.

Mr. LINDSAY. Yes; and now what we are attempting to do, so far as the sugar-refining business is concerned, is to reach a monopoly rather than a trust. That brings in, as I conceive, an additional difficulty.

Mr. HOAR. Now there comes in, if the Senator will pardon me, the difficulty which grows out of the question, as I understand it, that has been settled by the Supreme Court of the United States.

Mr. LINDSAY. I want to suggest another thing.

Mr. HOAR. Let me finish my sentence.

There comes in the precise difficulty in the Knight case; that is, that the court has said, if I understand it, that the fact that they propose to sell their sugar, or that the buyer of their sugar is going to sell it as an article of interstate commerce, does not put the manufacture of their sugar or its sale to a buyer in a State where the buyer and they both dwell under the authority of national regulation.

Mr. LINDSAY. I see that difficulty in the case. Then my theory was—I may have been mistaken, but the theory advocated by the present Secretary of State was—that, being a confessed monopoly (because it is a confessed monopoly), no act of Congress ought to be passed in the way of raising revenue which gives assistance to that enemy of the public good. I doubt whether we shall ever be able to frame a statute that will reach it through the Federal courts.

Mr. HOAR. Then comes up the question, which I will put to the Senator, What constitutes a monopoly in the legal and technical sense of the word? Does he mean that there must be some of these illegal practices to make a monopoly? A monopoly strictly in the English law was a grant by the Government of exclusive powers, as the Senator knows very well.

Mr. LINDSAY. Certainly; but I do not mean that.

Mr. HOAR. The evil of monopoly was an evil created by the sovereign power of the state itself.

Mr. LINDSAY. I understand that.

Mr. HOAR. But suppose this sugar refiners' association does none of the illegal things which lower or raise the price, but merely crushes out its competitors by economy in doing its business, which its great size and wealth enables it to practice, or simply as local seller in various places proceeds to undersell its competitors in all parts of the Union until it has driven them out and then puts up prices—that is one of the things which it does—I do not at present exactly see how to hit it. The State can say that no corporation shall have a capital of more than a million dollars or a hundred thousand dollars, and stop it in that way, but I do not see how we can hit it.

Then, of course, there is another way in which it acts, and that is, where it says it will refuse to sell its product to anybody who will not submit to its terms in regard to the matter of selling, but that, according to the Knight decision, is still matter of local commerce and not of interstate commerce.

Now, therefore, the only way——

Mr. CAFFERY. Will the Senator allow me?

Mr. HOAR. I am answering the question of the Senator from Kentucky [Mr. LINDSAY], and I desire to finish that.

The only way in which we can hit it which has been suggested anywhere is to say, "So long as you have got this vast aggregate of wealth and drive your competitors out of business by underselling them, just as the English manufacturers did here in the olden times, or impose these conditions or make a discrimination in the persons to whom you sell, you shall not import, or you shall not have any duty on the articles you import during a certain period, or you shall not have a duty on the articles you make," as the Senator suggests. That is what you have got to do.

Mr. BERRY. Why not do that?

Mr. LINDSAY. That is where I think we can strike a fatal blow at this business.

Mr. HOAR. That may be.

Mr. CAFFERY. Will the Senator allow me now?

Mr. HOAR. I am trying to answer the question of the Senator from Kentucky, if the Senator from Louisiana will pardon me.

That is the trouble I have just stated. You have got to convict a person, because this thing would be applicable to one individual, Mr. Rockefeller or Mr. Armour or anybody else, as well as to a corporation. That makes no difference. You have got to convict a man first of the described method of violating the law or of doing the act which you wish to make illegal. Can you prescribe as the punishment, on conviction of such an offense, a future incapacity to import, or a future regulation that the man shall import under certain conditions? I do not think you can, because that is a very unusual punishment, altogether out of all the lines and precedents.

Then take the other alternative; that is to say——

Mr. LINDSAY. Mr. President——

Mr. HOAR. I want to answer the Senator's question.

Mr. LINDSAY. Very well. I shall not interrupt the Senator. I thought he had finished.

Mr. HOAR. I can not answer such a question in ten words. I will answer the Senator as well as I know how.

Mr. LINDSAY. I thought the Senator had finished. I beg his pardon.

Mr. HOAR. The other alternative, if the Senator will pardon me, is to say, "Very well, if your business is done in that way, the article in which you deal shall be free." The difficulty with that is that, if you undertake to go into the general policy of legislation on that principle, you are always putting the manufacturers or business men of any kind in this country who have grown up a business which depends for its prosperity or its life on the protection which you have established at the mercy of any three or four scoundrels who choose to commit an offense for the mere purpose, perhaps, of overthrowing the tariff, and you would put the revenues of the Government, if the proposition which was voted for the other day, as I understand it, had been enacted into law, in the power of any three Englishmen or Dutchmen or Frenchmen who could come here to this country and could, in succession, establish some little business, violate this law, and overthrow and destroy the entire protective system of this country. That is the difficulty.

Now I will hear the Senator from Kentucky.

Mr. LINDSAY. The difficulty stated by my friend in regard to the first point seems to be well-nigh fatal to the amendment offered by the junior Senator from Alabama, and that is, that in the application of the penalty you have first to take the conviction. Now, his objection to the second proposition I admit to be well taken. A general law which provides for punishing trusts throughout the great domain of trade may encourage conspiracies to bring about punishment for the advancement of some other interest, but the point I want to make is as to the sugar trust. We have the president of the trust admitting that through their combination of capital they have rendered it a practical monopoly; that they control 80 per cent of all the refined sugars sold in the United States; that they do not admit of competition, and that they fix their rates so as to exclude all foreign competition. Now, I say, we have a case here that did not need any trial and did not need any conviction.

Mr. HOAR. What are you going to do with the other 20 per cent?

Mr. LINDSAY. The other 20 per cent is interested in this very sugar monopoly, in that the American Refining Company owns one-half of the stock of the Western American Refining Company, and the independent sugar refining companies in Boston own stock in the American Refining Company, and while they avoid technically having a common interest, they are in point of fact so

connected together that there is no competition between them and no competition intended to be between them.

I say that when we have a confessed case of that sort and we are legislating to raise revenue, when we reach the point of taxation that benefits this sugar monopoly, we ought to refuse to give it anything in the way of protection, and we ought to act upon Mr. Sherman's theory of opening our markets to the competition of the world until this unholy monopoly shall be broken down, and then will be time enough to consider the question of giving protection to the domestic sugar refiners.

Mr. HOAR. I do not wish to take up much time, for I have taken up too much already; but the answer to that seems to be this: We have come to the conclusion that it is desirable to have a revenue from refined sugar, and that it is also desirable that the business of refining sugar shall be prosecuted in this country to so large an extent as to have at least competition here with the foreign refiner, and that if we do not do that we shall be at the mercy of the foreigners, who very often are a much bigger and worse trust than the sugar trust, bad as it may be.

I do not myself think there is any more hostile, dangerous trust in any business than a great foreign government endeavoring to manage and control the American market and paying out its bounties to its own manufacturers or its own exporters in order to enable them to break down the American business. They are doing everything they can to break down competition here in that way, with greater power than the men in this country whose processes have just been described.

I think we want to hesitate a little, and see if we can not provide some other way to regulate and control this thing. Simply because a fox, or a jackal, if you choose to say so, preys on our garden or on our coops, I think there is some better remedy than giving it over to a foreign wolf or foreign lion.

Now, in regard to the amendment of the Senator from Alabama, I think I can show the Senator from Kentucky that it is not liable to the objection which I have been stating, but I should rather undertake that at the time when it comes up for consideration.

Mr. LINDSAY. The Senator may be able to do that.

Mr. CAFFERY. Mr. President, if I understand the Senator from Massachusetts correctly, his proposition is that the Supreme Court having decided in the case against the sugar trust that the question of monopoly is one for the States to deal with exclusively, any Federal legislation would be inoperative as to any such monopoly. That is the way I understand it.

Mr. HOAR. I did not say that. I do not know why it is that when Senators state the difficulties which they encounter they are charged with having expressed an opinion. I did not express any opinion on the subject. I said I had been studying the subject as well as I could, and I encountered those difficulties.

Mr. CAFFERY. I quite agree with the Senator that the question of monopoly is one for State jurisdiction, and I hardly think an attack upon monopoly can come through the instrumentality of a Federal statute. The question of a State monopoly is one thing, and the question of a contract in restraint of trade by that monopoly when the trade has reference to other States is quite another thing.

The decision in the case referred to—I suppose it is that of the Government against Knight—does not go to the extent of holding that the product of the monopolized manufacture could not come within the inhibition of the Federal statute against trusts. The pleadings in that case were to the effect that the monopoly trust should be broken up, the certificates returned, and the institution abolished, and the opinion contains a very strong hint that if the suit had been brought to bring the trust within the penalties of the statute for violation of the antitrust law prohibiting combinations in restraint of trade it might have been maintained.

I quite concur with the Senator from Nebraska that the present law is perfectly adapted to reach unlawful combinations or conspiracies in restraint of trade, if the restraint affects interstate trade and comes within the domain of commerce between the States. The difficulties conjured up in the mind of the Senator from Massachusetts, in my opinion, are purely speculative. I can not see their practical working. In my opinion, the decision which was lately rendered by the Supreme Court of the United States in the case of the Transmissouri Traffic Association meets the case of every trust located in any State the product or manufacture of which is designed and does get into interstate commerce.

I do not recollect exactly that decision, but the facts were that there was a combination or conspiracy between the railroads or the freight associations whereby no amount less than that fixed upon for the transportation of freight should be charged, and we have the undoubted testimony and proof that the contracts between the sugar trust and its patrons, the wholesale grocers, come directly within the scope of that decision. Those contracts are substantially that the trust sells to its patrons so much sugar free on board at such a price, and to every shipment is attached a coupon which the consignee shall sign and return that he obligates himself not to sell below the price fixed in the invoice.

That is a contract directly in restraint of trade, and comes directly within the inhibition and penalties of the statute quoted by the Senator from Nebraska. I think it is time to call the attention of the Attorney-General and the district attorneys throughout the United States to these flagrant and constant and repeated violations of the law on the part of the sugar trust. There may be aggregations of capital to such an extent as to control the prices of necessary commodities, and they may be legitimate and lawful in certain cases; but whenever an aggregation of capital, or even individual capital, undertakes to couple with its contracts anything in restraint of trade, then it violates the law. Then it remains no longer legitimate, whether it is an aggregation of capital or whether it is not.

Mr. LINDSAY. It must be interstate.

Mr. CAFFERY. Of course. Before the Federal statute could reach a case of that sort the trade must be interstate. You can not affect its contracts in a State, confined to the State, not intended to go outside of the State.

Mr. ALLEN. There is no controversy as to that point. The whole question has been confined to interstate commerce.

Mr. CAFFERY. Interstate commerce.

Mr. ALLEN. Except in so far as the Senator from Massachusetts interjected into the discussion State commerce.

Mr. CAFFERY. The Transmissouri decision went so far as to hold that whether it was a reasonable regulation of trade or not, just so that it was a binding contract not to transport freight at a lower price, it was a violation of the Federal statute.

The Senator from Massachusetts has stated what to me appears to be another speculative matter, entirely outside of any practical operation or effect, when he said that two or three persons may get together—and this is in reference to the operation of the amendment offered by the Senator from South Dakota—and make a trumped-up combination or contract in restraint of trade, then that contract would have the effect of breaking down all legitimate enterprises in the same line of business. There is nothing in that, because the amendment proposed by the Senator from South Dakota only contemplated contracts the effect of which and the intendment of which was to restrain trade. No other contracts can be considered. So these imaginary contracts are of no moment. Such fraudulent devices would not effect any purpose at all.

The other point was made that because trust contracts were made by citizens in a State, localized in a State, entirely to affect their business in a State, therefore the Federal statute could not reach them. That is a non sequitur. In the first place, the import duty placed upon an article imported into the United States is not put there by way of reward, and the taking off of the import duty would not be done in the way of punishment.

That argument would seem to imply that whenever an import duty is laid upon a foreign article competing with one made in the United States, the taking off of the import duty would be a punishment on somebody somewhere. That idea is born of the protective theory. It seems to contemplate protection as a reward for great benefactions to the human race—the charging of three or four or five or six times as much as they ought to pay. Whenever Congress impose a duty they can take it off, and they ought to do so whenever the duty upholds trusts, local or otherwise.

Mr. President, in a pamphlet which I have there is a very interesting history of the operations of the sugar trust. As the Senator from Kentucky [Mr. LINDSAY] said some time ago, sugar is always up, and sugar is very much connected with this present discussion. The discussion relates to trusts, and the sugar trust is the most powerful trust in the world; it is the most tyrannical trust in the world; it is the most arrogant trust in the world; it is the most iniquitous trust in the world, and the least deserving of any favor from the Congress of the United States.

This pamphlet recites the manner in which the American sugar trust took in the innocent wholesale grocers. The sugar trust made it appear, about the time the sugar interests were consolidated, that it was necessary, in order that it and the wholesale grocers, distributers of its product, should both enjoy large benefits and advantages from the trade, for those grocers to help it procure certain tariff legislation. The grocers helped.

Congress was besieged in 1890 and 1894 by telegrams coming thick to almost every member of the House and Senate from wholesale grocers to place a tariff upon refined sugar. They did not care very much about raw sugar. The trust was interested in refined. The help was given in pursuance of the idea that the sugar trust would take the wholesale grocers in its circle and would distribute its sugar through the National Wholesale Grocers' Association.

The sugar trust got its legislation; it got protection against foreign competition; and the very moment it did so it threw aside

the wholesale grocers, preferring to deal with individuals, preferring to deal with those who could not break down its monopoly, rather than with a powerful organization which might break down its monopoly if there were any cause to justify it.

I will read one of the delectable contracts which the sugar trust makes with its agents.

Mr. ALLEN. Let me suggest to the Senator that we should all like to have the benefit of the entire document he has. I suggest to the Senator to attach it to his remarks.

Mr. CAFFERY. I am going to do so. I simply now wish to read this so as to draw attention to it. Here is what they send with their invoices:

> We inclose herewith invoice of sugar of even date on which a commission of one-eighth of a cent per pound has been deducted in addition to our usual terms of 1 per cent cash in seven days and 1 per cent trade discount on 100-barrel lots, the understanding being that with your remittance the certificate below is to be returned, duly signed by you as a voucher.
>
> THE AMERICAN SUGAR REFINING COMPANY.

Here is the certificate which the poor lamb has to sign:

> We hereby certify that we have not sold, nor will sell, nor has any employee, salesman, or agent of ours sold, either directly or indirectly, any of the sugars for which we are now remitting, for less than your daily quotations, with freight added from refining point to point of sale (as per equality rate book), in any of the territory specified on the back of this certificate, nor on more liberal terms as to credit or cash discounts.

Here is the indorsement of the territory in which the party agrees not to sell the sugar below the quoted invoice price. Of course they run all over the United States, but this takes in a small block of the United States:

Maine,	Rhode Island,	Maryland,	Ohio,
New Hampshire,	New York,	Virginia,	Tennessee,
Vermont,	New Jersey,	West Virginia,	District of Columbia.
Massachusetts,	Pennsylvania,	North Carolina,	
Connecticut,	Delaware,	South Carolina,	

Now, then, when they ship a consignment to some other consignee in a territory not covered by this certificate, they put it in. The States of Nebraska, Arkansas, Louisiana, Alabama, Mississippi, Kentucky, perhaps are in another. Now, in between the lines of this contract this is written: "If you sell any part of your sugar below this price, then you are out; but if you do not buy it from us exclusively, you can not ever get another shipment of our sugar."

That is between the lines. That is the practical operation of it. That is what has been done as to the Louisiana sugar planters who wanted to sell sugar in Omaha. That is what is being done every day. They control the whole market of the United States by reason of the tariff upon the refined product, and therefore it is that no sales can be effected anywhere except by and through the trust.

I offer the whole of this pamphlet to be inserted in the RECORD, commencing with the words "Sugar distribution combine," down to the end of it. It was prepared by the Hon. John De Witt Warner, former member of the House, a man of ability and integrity, and I believe his statements. He copies the contracts of the trust, and he gives a succinct and picturesque history of the whole business, of the formation of the distribution combine, which took effect shortly after the formation of the sugar trust itself.

The VICE-PRESIDENT. There being no objection, the document will be printed in the RECORD.

Mr. ALLISON. I trust the Senator will be content with having that printed as a document. It seems to be a long one.

Mr. CAFFERY. I should like to have it printed in connection with my remarks. It is not very long.

(See appendix.)

Mr. CAFFERY. I want to call the attention of the Senate to another point in the sugar business which gives the sugar trust unlimited sway over the sugar market of the United States. The Senator from Arkansas introduced some samples the other day of certain soft sugars which polarize below 85 degrees of saccharine strength. These sugars under the operation of the schedule on sugar would come in at the highest tax on refined sugars. Now, these sugars are absolutely necessary (and I call the attention of the Senator from Iowa to this matter) to a very important industry in the United States, that is, the bakery business and the biscuit business.

I received some letters from some parties (I have them not here with me now, for I did not intend to address the Senate this morning) on this question, stating that this low-grade refined sugar is necessary in the business referred to, and it is necessary to the ordinary consumer of the United States. The same tax is imposed upon this sugar testing 83 and 85 as is imposed upon sugar testing 100 degrees. In other words, there is more tariff upon the raw centrifugal sugar of 96 degrees saccharine strength than there is upon this class of inferior refined sugar.

That class of sugar is largely consumed by the poor, and in some respects it is a better sugar, for there is no more impurity in it than the higher grade sugars. It has the capacity of much more rapid solution. It dissolves quicker in any liquid in which you put it. The ordinary man in putting a spoonful of this hard granulated sugar into a cup of coffee does not wait long for it to perfectly dissolve.

Everybody is aware of that fact from the amount of sediment or undissolved sugar that is found at the bottom of the cup; but this cheap sugar, being already liquefied to some extent, dissolves immediately and effects its purpose much more quickly. Therefore this cheap sugar or this low-grade sugar that comes in between 83 and 85 degrees is very much more purchased by the poor; and the sugar trust to-day, I am told, is making that sort of sugar in Brooklyn, where is located one of its largest refineries.

That sugar comes in and is tariffed as much as the hard granulated and cut loaf sugar. It comes in under a tariff higher than you propose upon raw sugar, and it gives the sugar trust too much swing. What prevents the sugar trust from making that kind of sugar, when by the operation of the tariff law you exclude all foreign competition? What prevents the sugar trust from deriving a benefit of the tariff upon the higher grades and making the lower for ordinary consumption in the United States? Nothing in the world.

What prevents the sugar trust from exporting that sugar? I tried to show the other day to the Senator from Iowa, but I could not convince him, that the Treasury statement itself was erroneous in its predicate of the number of pounds of raw sugar it took to make a number of refined. What is to prevent the sugar trust, under these conditions, from making an enormous amount of money in the export of these sugars?

Mr. President, as long as the question of trusts is up, I do not see how argument or reason can be better employed than to the annihilation of the sugar trust. As to the aggregations of capital of a legitimate character, they have no connection with this illegitimate organization. As was well put by the Senator from Kentucky [Mr. LINDSAY], there is no speculation as to the character of the sugar trust. Its character is an established fact by testimony coming out of its own mouth. Its character is an established fact in the decision in the case of the Government against Knight, where the Supreme Court stated that about 10 per cent of the whole business of refining in the United States was merged into this vast trust corporation.

APPENDIX.

SUGAR-DISTRIBUTION COMBINE.

[John De Witt Warner.]

THE GENERAL SITUATION.

On January 23, 1894, the House of Representatives decided to refuse all protection to the sugar trust, leaving it without either favor or obstruction of law to earn its own living. On February 1 the tariff bill, with this and other amendments, was to be reported back to the House for final action. On January 30 there began a sprinkle, which by the next day had grown into a shower and on February 1 had become a deluge, of telegrams from all parts of the country, urging Congressmen to kill the amendment by which the sugar trust was denied subsidy.

The telegrams, which had been heretofore arriving largely at the residences and hotels of members, now came showering about the floor until the matter became one of amusing comment—some favored members having a perfect sheaf of the yellow favors; and the curious interest with which at first members had compared similar suggestions from widely differing quarters of the country having turned into a simple nod and "I have got another;" which was heard on every side, as the pages continued to deliver the messages. These were busy days, and telegrams on a variety of subjects were not so rare as to be curiosities; but the most easy-going member was roused by the extent to which the whole country seemed suddenly clamoring for higher priced sugar, and as it developed that these messages came almost exclusively from wholesale grocers, somewhat of curious interest was aroused.

Older members, however, simply smiled and shook their heads as they recalled similar, though not so extreme, experiences when the McKinley bill was pending, and, except that in that case the Southwest seemed to be most stirred while on this latter occasion Illinois seemed the storm center, they remarked nothing noteworthy except that the sugar combine seemed to be working better than ever.

The interest which then and since has been shown in the distribution combine, by which an overwhelming majority of the grocers of the United States are acting as special agents of the trust, under special written contract, upon an agreement for definite commissions, and the importance of the subject, involving, as the one item of sugar does, probably about one-third of the total groceries trade of the United States, has seemed to me to justify what by some may be regarded as an exposé, but what to others will be merely a commonplace summary of facts. They have been long known, to anyone who cared to inquire, as constituting a system so flagrant as long since to have been pilloried and crushed, except for the all-pervading influence of the sugar trust and the extent to which the moral sense of the American people has been deadened by the daily mess of horrors that protection has served up.

In the autumn of 1887 a reorganization was commenced of the whole business of sugar refining and sugar distribution for the United States. For several years the conservative business methods of former times had been demoralized by the extent to which cheapening transportation and the utilization of enormous capitals had turned what had been simple individual rivalry between conservative men, willing to do a safe business upon a small capital, into a veritable "battle of the giants," the leading wholesale grocers and refiners, each of whom, both against his rivals in his own business, and in combination with them against those engaged in the other, aimed to extend his field of operations and profit. Each, in his way, was striving to outdo others in cheaply serving the public and compelling others to do so.

The margin of expense and profit, both in the refining and in the distribution of sugar, was less than ever before or since, the difference between the cost at which the refiner purchased his centrifugals, raw sugars, and the price at which the retail dealer received from the jobber his standard refined granulated being frequently not more than three-fourths of a cent per pound. From such conditions has grown the combine, by which, as direct employees of the trust in the majority of cases, the wholesale grocers of the United States—that trade upon which more than upon any other our people are dependent for their food supply—have combined with the sugar trust to control the most important item of their supply, to limit production, raise prices, double, treble, and quadruple profits, and boycott and drive from the business any dealer who dares attempt to serve the public more cheaply.

At this date (August 1, 1894), in spite of the extraordinary cheapening of transport during the last few years, and the great cheapening in the cost of raw sugars, which would make the old margin an exorbitant one now, the difference east of the Rocky Mountains between the price paid by the refiner for 96-degree centrifugals and that paid by the retailer to the jobber for standard granulated is 1¼ cents per pound in addition to freights and charges, and a much higher figure westward to the Pacific coast, while this margin is no longer offset, as at the earlier period was frequently the case, by special discounts offered by competing jobbers, the larger profit now being as rigidly, as invariably, and as successfully exacted as the similar profit at the earlier date was frequently reduced.

Leaving these last out of the question, however, as the result of excessive rivalry, the net gain through the combine in the extent to which its normal profits have been increased is equivalent to at least seven-sixteenth cent, making, upon the present basis of consumption, at least $17,500,000 in addition to what in those former years was a normal business profit and what to-day, with the narrowing margins of all business, would be a most liberal margin. Of this somewhat less than one-third is extra bonus received by the grocers as the result of the combine, and the remainder is the "lion's share" exacted by the trust as its prerogative. This in addition to the greatly increased profits which, by its enterprise in other directions and cheapened processes, it would be in any case able to realize from the old margin.

And, once for all, it is noted here, in answer to those who figure out the low per cent margin upon which the sugar business is done, that this trade is conducted in such a systematic way and so largely as a "cash" business that thirty days would be an extraordinary length of time to estimate as the average period during which the funds involved in any one transaction are held idle, while the discounts for cash and for large orders, not noted above but universally allowed jobbers, are such as, if they chose to do a short credit business with the retailer, amply to pay average expenses and insure against average losses as well as reimburse current interest.

To charge against sugar sales any considerable proportion of general expenses is unfair, for the reason that such general expenses are incurred on behalf of matters other than sugar, and that under the "equality plan" now so generally in vogue the most of the general expense which might otherwise have been taken into account is done away with: and with a comparative small storehouse, a clerk, and a bookkeeper, a large wholesale business in sugar can be done. The bulk of general expenses is directly or indirectly necessitated by attempts to realize large margins on other goods, to which they should be charged.

The plea, therefore, now so frequently made, that the arrangement with the trust insures the grocers only 4 or 5 per cent net profit on sugars (which is not far from correct if these trade and cash discounts are omitted from the calculation) is really equal to an admission of net profits of from 40 to 60 per cent per annum on the capital used in handling them.

ORIGIN OF THE DISTRIBUTION COMBINE.

In this line, as in most others, there had been little organization prior to 1885. In New England an association of wholesale grocers, originally organized at Boston, had existed since 1875, which, though it had not attempted materially to raise prices, had practically put an end to the "wild-cat" rivalry involved in selling any goods at a loss in order to attract custom for others, and had secured such adjustment of freight rates in that territory for the benefit of the whole trade as to relieve its members from the alternative of attempting special arrangements or being outrivaled by some one who did so. With its headquarters in Boston, its executive committee took advantage of the normal competition then existing between the Revere Refinery and the Boston Refinery to secure profitable working arrangements with each, not merely insuring greater certainty and promptness in settlement of accounts and greater simplicity in doing business, thus enabling all parties to secure more profit on less margin and relieving each of sundry expenses and unpleasant contingencies, to which the irregular methods had formerly exposed him, but including a contract with the Boston refiners by which they agreed not to sell in lots of less than 20 barrels, except at one-eighth cent per pound higher than the wholesale price.

At New York the great grocery houses, while not carrying their rivalry to the extent practiced by their more enterprising or more foolhardy brethren of the West, were selling sugars at as low a margin as was consistent with safety, while the several refiners were competing to supply them upon similar terms. The situation was similar at Philadelphia, Baltimore, New Orleans, and San Francisco, while in the West and Southwest sugar prices were too frequently used as an advertising card, and profits sacrificed in consequence. About 1885, however, new conditions arose. At New York the new Havemeyers & Elder Refinery, and at Philadelphia the Franklin Refinery, built upon a scale not before attempted, steadily enlarging their capacity, utilizing new processes, mechanical and otherwise, were marketing increasing quantities of their sugars at prices which were driving others from the field.

Older firms stood aghast as the Havemeyers repeatedly increased the size of their plant and signalized their lead, not only of America, but of the world, by marketing abroad increasing quantities of their best product, selling at a profit for export during the last year before the formation of the trust at least 100,000 tons of standard granulated sugars. At Philadelphia Claus Spreckels had selected the site and was planning the buildings for an enormous refining plant, built expressly to compete with the Havemeyers, the only existing refinery he seemed to consider of any consequence whatever as a possible rival. It was evident that the American people were in actual danger of having cheap sugar, that the owners of antiquated refining plants might in a few years be compelled to charge them to profit and loss, and that unless something was done even the Havemeyers would soon be obliged to content themselves with such returns from capital as in fair competition with an equally enterprising refiner they and he might fix. And though the success of the New England association and the conditions at New York and the other great grocery centers were likely to insure to the grocery trade a moderate profit in sugar, there was no immediate prospect of any bonanza in handling it.

With McKinleyism in the air and shortly in control of Government, this state of things called for a remedy, and the genius of the sugar trust supplied it.

So far as concerns the mutual relations of the refiners themselves, the story is a well-known one. After consultation between the Havemeyers, who were even then making large profits and rapidly extending their trade, and the other refiners, who saw their old plants becoming worthless, there was little trouble in coming to an agreement to pool their issues, and the original sugar trust was formed, practically controlling the supply for New England, New York and vicinity, and, from New Orleans, the lower Mississippi Valley, competing on even terms with the Philadelphia refiners for the middle West and Northwest, while Spreckels was left undisturbed from the Missouri River to the Pacific coast, the trust controlling about 70 per cent of the total United States markets. There was but little trouble as to the basis of combine.

The owners of the old refineries which had become no longer profitable were gratified by the receipt of "preferred" certificates in the new association equal to the total cost of their plants. The new refiners received in preferred certificates an amount as many times the investment in their plants as, on account of the fact that they were worth something, it was calculated they were more valuable than the antiquated ones. And then as a douceur to everybody and sort of speculative flyer an additional number of certificates, representing nothing but water, were issued to each associate equal to those that he already had, and the most congenial combine in the world was thus pleasantly born, and the only drawback being the great number of worthless plants that must promptly be closed and left to rot and rust, and the more than Senatorial courtesy that made it inevitable to give fat contracts for the furnishing of supplies, cooperage, etc., to the former owners and present associates, who had invariably taken the precaution to put into the common stock only the bare refining plant, retaining the necessary adjuncts as their individual property. These arrangements pleasantly occupied the latter months of 1887, and by January, 1888, sugar brokers and purchasing grocers found themselves entirely relieved of the trouble of ascertaining where they could buy sugar most cheaply, prices being higher on every hand, and each refinery charging the same and showing an utter indifference to orders.

It may have been the increasing closeness in competition and margins which are the natural source of rising prices, or it may have been the slow development in organization in the grocery trade that made the grocers of the United States just at this time so easy a field to exploit, and it needs no explanation to understand how desirable it was for the sugar trust to organize such an alliance as, controlling the greatest amount of territory possible, should extend the markets for its sugars, exclude rival sugars from its territory, and, by further refinement of system, cheapen the cost of its business and relieve it entirely of the greater part of its expense for agents. Mr. Howard W. Spurr, of Boston, and Messrs. G. Waldo Smith and H. H. Holly, of New York, concurred in the suggestion that this sugar matter ought so to be arranged that everyone concerned could secure sure and liberal profits without superfluous worry and cost, and their correspondence was most enthusiastically welcomed by such gentlemen as Mr. Dymond, of Cincinnati, and Mr. Inbusch, of Milwaukee, the latter of whom, with a genius for organization, had already planned such an association between the grocers of the Mississippi Valley as should relieve the trade of the cutthroat competition that was then so prevalent in that section.

THE WHOLESALE GROCERS' NATIONAL ASSOCIATION.

As a result, a national association of wholesale grocers was gotten together in New York in June, 1888. It had not been thought desirable to call the whole matter a sugar deal, and many of those who attended had actually in mind the numerous other objects which had been kept prominent in correspondence. When Mr. Holly, however, who was elected chairman, took the chair, he, as the press reports it, "at once took up the sugar question and said that competition was such that grocers were selling sugars at a ruinous loss and were compelled to raise the price on other articles to meet it," and that the trouble was "close competition and also adulteration." Thereupon a committee, consisting of Mr. W. J. Johnson, of Richmond; Mr. H. W. Spurr, of Boston; Mr. G. Waldo Smith, of New York; Mr. F. W. Inbusch, of Milwaukee, and Mr. Richard Dymond, of Cincinnati, was appointed to consult with the sugar refiners, which meant Mr. Havemeyer, with whom it had long before been arranged to be ready to meet the committee when appointed.

In the pleasurable excitement that followed this step the rest of the business of the convention was forgotten, except that some of the leaders "were positive in their statements that there was no idea of forming a grocers' sugar trust, but that the plan was by association to prevent trade abuses and secure the selling of pure and wholesome goods." As the press reports of that date indicate, "the retail grocers watched the convention with interest, as they would like to make a little profit on sugar, too." It adjourned so promptly, however, that the retail grocers did not see much, and are still in the dark.

At the adjourned meeting on June 26, the committee appointed to confer with the refiners reported "that the refiners in this city were very willing to enter into any reasonable agreement that might be proposed by the Wholesale Grocers' Association, but that it would be impossible for them to enter upon any agreement as to prices of sugars unless all refiners in various parts of the country should join in the movement. After a brief discussion as to the amount of profit the wholesalers should realize on sugar," a discussion which, as given out to the reporters, developed an apprehension that any mistake "would enable English refiners to flood the market"—though why the wholesale grocers should not have been glad to have the English refiners in the market is unaccountable—the convention adjourned.

What had really happened was this: The committee had seen Mr. Havemeyer, was assured by him that the great aim of the sugar trust was to see to it that everyone concerned got fair profits, and especially that sugars were kept wholesome and pure. To effect these aims, however, he pointed out, as the result of long consideration, that it would be necessary to keep out the adulterated British and other depraved sugars, and, indeed, to limit the production in this country—as otherwise the temptation of grasping refiners to broaden their markets would be a perpetual menace to the liberal and friendly arrangements he had in mind. The committee were at first surprised. They had been talking about pure and wholesome groceries, but, until Mr. Havemeyer brought them down to a practical basis, they had not worried about the importation of adulterated sugars; and then, too, while they did want a friendly arrangement that should assure them of profits and rid them of trouble, it had not occurred to them that they needed to have sugar production limited; and, so far as they had thought about it, they had taken it for granted that the more sugar there was produced, the easier it would be to make large sales at comparatively low prices coincide with liberal profits.

Indeed, as they explained, it was not so much the size of the margin that they were anxious about, as that some margin, however slight, should be assured. Mr. Havemeyer, however, showed them how mistaken they were, and had little trouble in convincing them that in addition to trade and interest discounts the wholesale grocer ought to have a good liberal margin, say a quarter of a cent per pound, which it would be easy to arrange if only the Philadelphia people were reasonable. The committee were more than pleased with Mr. Havemeyer, and explaining to him that they could control three-fourths of the sugar trade of this country, and that, whatever the Philadelphia men might do, the National Association was the fast friend of the trust, reported to their convention and started for Philadelphia. Meanwhile Mr. Havemeyer felt that the trust's position had been strengthened

and thoughtfully put out a notice that on and after July 1 commissions would be refused to sugar brokers who handled sugars of refiners outside of the trust, or who dealt with other brokers who did handle such sugars.

At Philadelphia the committee found the refiners most cynical and businesslike. At the suggestion that they limit their production, the refiners smiled, and seemed even more pleased when assured that Mr. Havemeyer thought it would be a good plan. Concerning adulterated foreign sugars, they were not worried at all, and as to commissions to wholesale grocers, while not objecting to Mr. Havemeyer's liberal ideas, seemed to think there might be danger of going too far, and that the more sugar there was produced the better, so long as it could be sold. They politely assured the committee, however, that if all the rest of the refiners in the United States assented to their proposition, they would too, provided no law would be violated by the arrangement. The committee then went to Boston, but apparently made no history there, though it may doubtless be assumed that somebody gave them a dinner at the Parker House, as the contrary is not stated.

The wholesale grocers had not secured their rebate arrangements, but they had formed a very pleasant acquaintance with Mr. Havemeyer and Mr. Searles, and were greatly encouraged. The sugar trust, on the other hand, had secured a practical boycott over a majority of the United States of Philadelphia sugars, while they regretted very much that the threatened and soon pending suits in New York made it imprudent for them to enter into arrangements with the wholesale grocers by which they (the sugar trust) could be held.

Sympathizing with the trust in this affliction, which, however, was vastly more damaging to the grocers, Mr. Inbusch, the now secretary and practical factotum of the National Grocers' Association, started out to visit the wholesale grocers in the different sections of the United States, to persuade them to join his association and, by conferring with the refiners and outside parties, to agree on some plan which would not interfere with the antitrust laws of the different States, and under which the trust could bind itself by a definite agreement which would insure liberal profits to the wholesale grocers, and which Mr. Havemeyer and Mr. Searles seemed anxious to consummate.

Col. Jay Torrey, a distinguished lawyer of St. Louis, who had since earned fame in connection with the bankruptcy bill, was called in, and under his counsel were drawn first contracts providing for "equality" plan as to prices, a commission or rebate payable on the 10th of each month by the trusts to each obedient grocer of one-fourth cent a pound on all the sugar he had paid for during the month preceding, and an allowance to the secretary of the National Grocers' Association for expenses, etc., in attending to certain of working details, and second, for mutual papers to be exchanged between the refiners and their customers, which have become historic as the originals from which were developed the forms now used, and are therefore quoted here:

"Mr. ——— ———,

———— ————:

"We inclose herewith invoice of sugars of even date.

"Upon your execution and return of the affidavit herewith, but not otherwise, you may deduct from the invoice one-fourth of a cent per pound less one-fiftieth of 1 cent per pound in addition to the rebates already made.

"(Name.)

"[Affidavit.]

"STATE OF ———, *County of* ———; *ss:*

"———— ———— (insert the name of the person making this affidavit), upon being duly sworn, says that the sugars for which a remittance is made herewith, nor any sugars referred to in any previous affidavit, have not been sold, directly or indirectly, by ———— ———— (insert the name of the seller of the sugars) for less than the daily price furnished by Frederick W. Inbusch, and not on longer time than thirty days, nor with a greater discount than one-half of 1 per cent for cash in ten days."

With these papers in his pocket, Mr. Inbusch started eastward. Philadelphia was on his way, and though he had not much hope from such cynical people, who indeed referred him to their attorneys, he was pleased with their businesslike promptness in acquiescing on being advised that they would not thereby get into legal complications. Mr. Inbusch and Judge Torrey hastened to New York to report their success to Mr. Havemeyer and to close arrangements. Mr. Havemeyer was only less pleased than they at the plan proposed, and most anxious to enter upon it, but thought it rash to do so just at the time that the McKinley bill was pending, and afterwards concluded that though the proposed contract was legal, yet that it would be better to wait until determination of proceedings which had been commenced in New York State courts. It was suggested to Mr. Inbusch, however, that the wholesale grocers could help their friends, the refiners, make sure of such a margin upon refined sugar as should leave ample room for liberal commission to the grocers, and that the time might well be spent in properly influencing legislation.

THE SUGAR TRUST'S CATSPAW.

An opportunity soon arose. This was in 1889 and on the eve of the assembling of the McKinley Congress, and about August 1, 1889, there was introduced by Mr. Seabury, of St. Paul, into a meeting of the board of directors of the National Grocers' Association the following resolution:

"Whereas the wholesale and retail grocers of the United States distribute sugar at a loss when the interest on capital employed and losses from bad debts are considered; and

"Whereas these losses are greatly enhanced by the high price of sugar, and this is due largely to the heavy import duty now imposed, which amounts on the average to about 2½ cents per pound; and

"Whereas the revenue derived from this source is not needed, and the duty on sugar constitutes a heavy burden alike upon consumers and distributers of sugar; and

"Whereas a free breakfast table has been a desiderstum recognized by all parties, and tea and coffee have long since been placed upon the list of articles free of duty:

"*Resolved*, That the officers of this association be, and are hereby, instructed to prepare a petition to Congress that sugar be added also to the list of articles free of duty, and that said petition be circulated throughout the United States by the salesmen and customers of the members of this association."

This resolution was referred to the executive committee of the board, which met on the 2d or 3d of August. The vote was close, and it was tabled by a majority of 1. Some of those present were surprised to learn afterwards that the sugar trust was kept fully informed from the inside of all that was pending or done at either the board or committee meetings of the wholesale grocers; and no one was more puzzled by this than was Mr. Inbusch, the secretary, who naturally thought that his own friendly feeling for the trust made entirely uncalled for any attempt on its part to have him watched.

So far, however, there was no rift in the lute. In January the refiners camped in Washington, and in public and private did what they could to acquaint Congress with their wishes. But as March waned and April dawned and the bill was perfected for report, they were not satisfied with the situation; and through the National Grocers' Association they sent out a Macedonian cry. There was promptly sent to each member of the association this preamble and resolution in blank ready to be filled out and signed:

"Whereas the present tariff on sugar affords protection to American sugar refiners of more than 1 cent per pound between the rate of duty on raw and refined grades; and

"Whereas the tariff bill as proposed by the present Committee on Ways and Means destroys nearly the whole of this protection, changing the duty from a specific to an ad valorem basis at the rate of 35 per cent on raw sugar up to No. 16 Dutch standard, and only 40 per cent on higher grades; and

"Whereas this margin of 5 per cent is insufficient and would break down our entire refining industry, including the refiners outside of the sugar trust, as well as those which are in the trust;

"*Resolved*, That in the opinion of the wholesale grocers of ——— it would be unjust and unadvisable to thus cripple a leading industry, and that while the margin afforded by the present tariff is too large, that the one proposed is too small, and that in order to equalize the difference in the cost of labor and materials between American and foreign refineries the rate of duty on sugar above No. 16 Dutch standard should be at least 50 per cent instead of 40 per cent, as proposed in the McKinley bill."

These began to snow down upon the Ways and Means Committee; but their effect was sadly broken by Governor GEAR, of Iowa, who, on April 16, 1890, produced in the House a copy of the blank in question, and at the same time sent to the Clerk's desk to be read the following letter, in which the experience of later years has disclosed a depth of meaning then unsuspected:

WHOLESALE GROCERS' NATIONAL ASSOCIATION,
MERCANTILE EXCHANGE,
New York, April 7, 1890.

DEAR SIR: We have to-day seen the sugar trust people. They are very friendly and will do all they can to secure grocers a reasonable profit for distributing sugar as long as they have any profit themselves, but they are despondent on the tariff question; say that if the McKinley bill goes through with only 5 per cent difference between high and low grades, they can not live under it, owing to the higher cost of labor and other expenses of refining here as compared with Europe; that European refined will be dumped on this market, and there can be no regulation of prices in the interest of the grocers, as contemplated, and that everybody will be forced to work for nothing.

Now, this is undoubtedly true, and it will upset all your long labor and all of our efforts to get a living margin for grocers to distribute sugars on.

There is nothing to be gained by the United States in breaking down the refining interests, though they have doubtless had things too much their own way in the past; but a difference in the duty of, say, 15 per cent between raw and refined would permit them to live and give grocers a quarter of a cent distributing margin, and this they are willing to do.

Governor GEAR, of Iowa, who is now in Congress, has been the most prominent in urging a policy which would cripple the refiners in order to punish them for the sins of the trust; but you know the trust has been blamed for all the great advance in raw sugars last year, when in reality they were not in fault more than one-third or one-quarter of it. And if the present proposition is to go through, Spreckels, Harrison, Frazier & Co., Nash, Spaulding & Co., and the other small refiners outside of the trust will be punished as badly as the trust people.

Now, can not you get the Iowa jobbers, who, I believe, have an association, at once to communicate with Governor GEAR, if possible by a delegate, or pass resolutions deprecating any change which would break down our sugar refining interests, and also get the St. Louis and Chicago people to do the same thing?

We can get Boston, New York, and Philadelphia to protest against the present proposition, and ask that the margin between raw and refined be raised from 5 to 15 per cent, which would make grades above No. 16 standard (Dutch) pay 50 per cent ad valorem, and No. 16 and below, 35, as at present proposed. This is a reasonable change and we can defend it with reason.

See what you can do and communicate with us at once. Perhaps you can get your Milwaukee wholesale grocers to act first and pass a resolution somewhat like the one I inclose.

F. B. THURBER.
J. E. NICHOLS.

F. W. INBUSCH, Esq., *Milwaukee, Wis.*

And as it passed the House even the McKinley bill was unsatisfactory to the trust.

The reserves were called out. Each member of the Wholesale Grocers' Association was requested to correspond with his Representative at Washington, urging that a higher duty be put on refined sugars. Those who were supposed to be most influential were asked to go to Washington, where Mr. Inbusch marshaled them for action, and, as was triumphantly announced, they "there met Senator ALLISON, SPOONER, and McKinley, and put the matter before these gentlemen, as well as perhaps 50 other Representatives, and we finally succeeded in having the change made to one-half and three-fifths cents per pound." The net result is thus told by a reminiscent grocer under date of August 16, 1894:

"The trust, after we had carried our point for one-half cent, refused point-blank to give the trade a share of this, and up to date has pocketed every cent of it themselves."

This gentleman, however, is probably misled by his emotions, for the trust carefully avoided refusing "point-blank," or doing anything else point-blank.

Up to date the wholesale grocers had netted nothing except a mutual acquaintance with each other and the pleasure of association with Mr. Havemeyer and Mr. Searles. The trust, however, was doing fairly well. It was selling the wholesale grocers its sugars about as exclusively as though it had had a hard and fast agreement, the grocers had given it most valuable assistance in securing it the 60 cents per 1,000 pounds protection accorded it by the McKinley bill, and there now seemed to be no reason why the agreement which it professed to be in such a hurry to consummate, and which everybody's lawyers had said was legal, should not be entered into at once.

Mr. Inbusch went to New York and, congratulating Mr. Havemeyer upon the passage of the McKinley bill and upon the happy ending of the New York litigation and reorganization of the trust already arranged for, hinted that the grocers were now ready to close arrangements. Mr. Searles and Mr. Havemeyer, however, felt that it would be "well to wait and see what the Philadelphia refiners would do," as they were a very unreliable lot and might disagree with each other and perhaps make trouble in keeping the proposed agreement with the Wholesale Grocers' National Association. Mr. Inbusch did not understand this, but had so much faith in Mr. Havemeyer that he said, "All right," and waited.

In the autumn of 1891 the representative of the National Grocers' Association was more than pleased at the news that Mr. Havemeyer had been so successful as to have procured the Philadelphia refiners, Spreckels, Harrison, Frazier & Co., et al., to be incorporated into the new trust, and wrote Mr. Havemeyer as to closing arrangements with the grocers—the way being now so happily cleared of the last obstacle. Mr. Havemeyer seemed eager to close the agreement, but advised a preliminary meeting of the representatives of the grocery trade from the sections east of the Rocky Mountains. This made

Mr. Inbusch tired; but he was a patient man, and hearing that Mr. Searles would be at St. Louis, he arranged with Mr. Schweppe and Mr. Scudder, leaders of the wholesale grocery trade of that city, to call upon Mr. Searles for the purpose of finding out whether there were to be any more hitches in store for the grocers after they met.

Mr. Schweppe and Mr. Scudder had a very satisfactory interview with Mr. Searles about May 5, 1892. The wholesale grocers' meeting had been arranged for some date in May. Mr. Searles advised that this might have a bad effect on Congress, which, as Mr. Searles may have known, though he did not so state to Mr. Schweppe, had been considering in the Ways and Means Committee of the House a bill which was successfully smothered, to repeal the duty on refined sugar. As Mr. Schweppe stated:

"My own deductions from the interview are that the sugar trust needs the hearty cooperation of the wholesale grocers, and they are willing to promise almost anything to get the work done at the present time. I told him that I had heard him (Searles) talk just the same way once before, and that when the proper time for action came we did not get the benefit; to which he replied that 'it was on account of the Philadelphia refiners,' and suggested that he is willing to do anything or adopt any plan the grocers will unite upon."

USING OLD FRIENDS BEFORE TRADING THEM FOR NEW ONES.

While Mr. Searles was entertaining Messrs. Schweppe and Scudder at St. Louis, Mr. Havemeyer was in receipt of startling news. The Wholesale Grocers' Association of New Orleans had appointed a committee to go to Washington and agitate for a "free breakfast table," or, in other words, free refined sugar, and the committee was actually at Washington. Mr. Inbusch was appealed to, and the telegraph wires were hot between New York, Milwaukee, New Orleans, and Washington, as the New Orleans people were appealed to to withdraw their committee unless they wanted "to injure our cause." Mr. Inbusch finally succeeded in "calling them down," and all breathed freely again.

Meanwhile Mr. Martin, of Memphis, the president of the Southern Wholesale Grocers' Association, had been corresponding with Mr. Havemeyer, who, on May 9, had written him: "While we feel disposed to cooperate with the wholesale trade in the direction of securing for them a fair remuneration for their services in distributing our product, any plan looking to this end must originate with them and be the result of their mutual agreement as to what is best for their interests." It was doubtless through information derived in this correspondence with the president of the sugar trust that Mr. Martin, in his encyclical of May 17, 1894, to the Southern Wholesale Grocers' Association—extending from Missouri southward and from Virginia to Texas—wrote each member for his "opinion as to the question now being agitated for the removal of the import duty on sugar," and added, "it appears to us that a removal of the import duty on sugar would throw the control of that article into the hands of foreign refiners, unsettle values, and demoralize the trade generally, defeating every hope of a uniform price," which opinions, duly reaching Congress, doubtless had much to do in putting finally to rest the bill for the repeal of the duty on refined sugar that was then nearing its last gasp in the Springer committee.

In consultation with his new friends—gradually becoming old ones—of the trust, Mr. Inbusch had worked out an "equality" basis for the sugar business, and a meeting of the national association was called for June 8, at the Mercantile Exchange, New York City. "Our meeting with the refiners on the next day, June 9. It is important that a strong delegation be present." The meeting was held, and was most enthusiastic and representative. Mr. Inbusch's plan, involving at least one-fourth cent rebate to the wholesale grocer, the return-coupon agreement to be signed by the purchaser as drafted by him and Colonel Torrey, and the "equality" scheme, and also that "the expense of its operation shall be borne by the sugar trust," was adopted by the overwhelming vote of 150 to 1, and a committee appointed to call upon the heads of the sugar trust and close matters. They were most cordially received, but astonishment is a weak word to describe their surprise when they were told that "unless we (the grocers) could make it unanimous, they (the sugar trust) would not make the arrangement."

In their haste some of them came to a conclusion similar to that of Solomon when he was in a hurry, and, in addition to painful suggestions as to the veracity of the sugar trust representatives, asserted that a well-known grocer of Chicago, the one gentleman who had not agreed with the others, had been procured by the trust to go to New York to vote against anything that was brought up, and that "the grocers were fooled once more," while "the sugar trust had the full advantage of the duty according to the McKinley law;" and Mr. Inbusch became a sadder and wiser man, putting two and two together, as he rubbed his startled eyes and read and reread this from the issue for June 2, 1892, of the sugar trust organ:

"The grocers' national convention, which meets in New York next week, promises to be a very important event to the trade. In the meantime the Wholesale Grocers' Association of New York and vicinity, which worked so satisfactorily, has been extended to cover New Jersey, and will no doubt prove acceptable to the entire convention without the interference of any individual plan. Query: Are the grocers who attend the convention at the invitation of Mr. Inbusch liable to the claim of 5 cents per barrel?"

The Wholesale Grocers' National Association was dead.

THE LOCAL ORGANIZATION PLAN.

Laboring under the impression that the trust meant business, Mr. Inbusch had entered zealously into the work of introducing the "equality" plan which he had devised. By 1890 he had so overcome doubt and conservatism that the New England grocers, who had at first laughed at him, were enthusiastic; and before his eyes were opened, in 1892, he had gotten the New York grocers well into line. From the standpoint of the trust, however, there was one serious difficulty about Mr. Inbusch's plan which Mr. Havemeyer and Mr. Searles appreciated none the less, though (probably in deference to his feelings) they had not mentioned it to Mr. Inbusch.

It left the grocers as one organization to deal with the trust as another; whereas the trust preferred to deal directly with individuals and local associations, thus preventing them from combining, and holding each at its mercy. Quietly working on this plan, by the time it was ready to drop the national-association idea it had practically arranged its business throughout the Northeast as far south as the Potomac, and westward as far as and including Ohio. There was yet, however, more or less of unpleasant variety of practice in the several localities, though these were being rapidly brought into accord; so that, on September 12, 1892, as an important step toward perfect harmony, and as conclusive evidence that it bore no grudge against Mr. Inbusch, the trust, adapting the document which he had drawn, caused the following notice to be sent out:

"NOTICE TO SALESMEN FROM JOBBERS.

"On and after this date the American Sugar Refining Company will attach to every invoice of sugar sold by them to any part of the United States a certificate as follows, which the buyer must sign in order to obtain a rebate of one-eighth of a cent per pound:

"CERTIFICATE OF AGREEMENT.

"We hereby certify that we have not sold, nor will we sell, nor has any employee, salesman, or agent of ours sold, either directly or indirectly, any of the sugars for which we are now remitting for less than your daily quotations, nor on more liberal terms as to credit or cash discount."

And now, striving to forget the gentleman whose suspicions had done Mr. Havemeyer and Mr. Searles such injustice, the trust proceeded to extend over the whole country the system which it had succeeded in arranging in the East, the new plan being a much less onerous one to itself than the one which, on account of the unfortunate opposition of Mr. Stuart, it had not felt at liberty to close with the national association.

When the trust started out to perfect its connections with the grocers, whom it had now at its mercy, it changed radically the plans it had allowed itself to indorse when it was seeking their aid to cut out Spreckels and to get the McKinley bill fixed. Including in its combination Spreckels and Harrison, Frazier & Co., in whose behalf Messrs. Thurber and Nichols had so touchingly pleaded, it came to a working arrangement with the other "independents," except Cunningham, of Texas, so satisfactory on all hands that sugar-trust stock became a favorite investment among "independent" refiners; and working in perfect harmony, as one correspondent puts it, "all refiners slept in the same bed, one end of which rested upon sugar producers and the other upon sugar consumers," even Cunningham observing, from what he claimed to be free choice, the same course as did others whose movements were dictated by the trust.

The former problem in organization of the grocery trade had been to settle upon what was best for the grocers. The later one became, "What is best for the sugar trust?" The former plan had involved a strong organization of the grocery trade. The latter was best answered by a series of local associations of grocers, each of which should deal directly with the trust, and, indeed, serve mainly as an instrument to corral their individual members. For this work Mr. L. P. Lyon, of New York, seems to have been selected, and he has certainly worked with noteworthy enthusiasm, energy, and success. In New England Yankee enterprise and Mr. Inbusch's good work had too far completed organization to make it unsafe to trifle with its matters, which were already about in the shape the trust preferred.

So Mr. Lyon took up first the organization of the wholesale grocery trade of New York and vicinity, which, largely on Mr. Inbusch's plan, he soon got into working order. From New York as a center he has extended his work, taking in local organizations where they were too strong to be ignored, encouraging the formation of new ones on the trust's plans in other States, until, as outlined below, the whole country is now fairly well covered. In this he has been aided by the trust, which has what may be called general offices, not merely at Boston, New York, Philadelphia, New Orleans, and San Francisco, but also at Chicago and St. Louis, with confidential agents everywhere, all worked in perfect unison by telegraph from the main office at No. 117 Wall street, New York City.

In perfecting his occupation of the field and in "working out" local differences there will, however, be work for Mr. Lyon for years to come, and meanwhile some one has held up before him the vision of a national organization of the wholesale grocery trade, of which he shall be the author and finisher. Between him and the trust there exists mutual admiration and confidence, and though Mr. Inbusch's name is rarely mentioned, no better tribute could be paid to his memory than the firm conviction of Mr. Lyon, that no local organization is complete till it has adopted the "equality" plan, and he, too, as well as Mr. Havemeyer, would be shocked if anyone suggested that there could be anything more beneficent or legal than the invoice notice and return coupon which they have adapted from Mr. Inbusch's draft, and which even "independent" refiners use, without thinking to remind their printers that it is not necessary to copy the special indorsements used by trust concerns.

In its working the new system has proved a success—for the trust; and in the crisis of January last, when the trust called on its grocer henchmen to bombard their Congressmen with protests against free sugar, the response was so prompt and hearty as to demonstrate that the "direct" method was far more effective than that of handling them through any executive committee of themselves.

THE PRESENT STATUS.

The general situation may perhaps be better appreciated by first grouping its details.

BOSTON.

New England is practically covered by the "Executive Association of the Wholesale Grocers of New England," with headquarters at 200 State street, Boston. Of its confederated associations—those of Boston, Providence, Portland, and southern (more properly southwestern) New England—that at Boston, whose membership is open to any firm in New England, is the leader and admitted dictator. It is a close organization, admitting new members by ballot, five black balls not merely rejecting the applicant, but preventing a reconsideration of his name for six months afterwards; and, as will be seen from the quotations below (which constitute about two-thirds in volume of its laws, etc.), is mainly engrossed in sugar.

"ARTICLE XI.

"There shall be a negotiating committee of three members, which shall have authority to secure rebates and arrange with the manufacturers and sugar refiners as to what quality of their goods shall constitute a 'quantity purchase' and a 'retailer's purchase.' It may make all proper and legal agreements and contracts with the same for regulating the sale of their products, and it shall have the right to call on any other members of the association for advice and assistance whenever it shall be deemed necessary.

"ARTICLE XIII.

"There shall be an investigating committee of three members, who shall investigate all charges of the cutting of any and all prices as limited by the manufacture of sugar or recommended under Article XIV. Pending investigation, information thereof shall be given to the manufacturer or refiner, in order that they may withhold any rebate, if they shall see fit. If the charge is proven to the satisfaction of the committee, notice shall be given to the manufacturer or refiner, and to each member of the association. An appeal, however, from the decision of this committee may be made to the arbitration committee, and its decision in the matter shall be final, and shall be notified in like manner.

"ARTICLE XIV.

"There shall be a committee of three members elected at the annual meeting, and every three months thereafter, to serve for three months or until its successors are elected, whose duty it shall be every day to ascertain and name for the following day the price for which granulated sugar is to be sold by the manufacturer or refiner at wholesale or by quantity; and it shall be its duty to notify every member of this association of such price in any manner it may think best.

"ARTICLE XV.

"Any firm belonging to this association which shall sell granulated sugar or allow it to be sold for less than the price so notified by the committee and recommended as above shall be reported to the investigating committee, and

upon conviction to the satisfaction of that committee said firm may be expelled from the association by a majority of the votes at any regular or special meeting called for the purpose and a vote of censure placed upon the records, its name posted in a conspicuous place in the rooms of the association and reported to all refiners, and it shall relinquish and lose all claim upon the funds of which the association may be possessed.

"ARTICLE XVI.

"The firms belonging to this association agree each with the others that they will in no case themselves, nor will they allow their salesmen in any manner, to make prices in advance for any granulated sugars away from their jobbing location, but that all orders for any granulated sugars sent to them shall be filled by the house, at the prices fixed by the house for the day on which such orders are received; and it is understood and agreed that offering granulated sugars by letter, circular, telegraph, or in any other way at fixed prices, to be ordered on the next day or any subsequent day, is a violation of this article; and any firm violating these agreements shall be treated as in Article XV of these by-laws.

"ARTICLE XVII.

"That on all sales of granulated sugar at the card price it is understood that no greater discount shall be allowed for cash within seven days than 1 per cent for quantities of less than 25 barrels. That members of this association may sell granulated sugar to each other at such prices and on such terms as they may elect without becoming liable under Article XV.

"ARTICLE XVIII.

"It shall be the duty of every member of this association who has reason to believe that any article limited as herein provided has been sold, either by members of this association or others, for less than the price so limited, to report the same to the investigating committee, together with the facts in the case that have come to his knowledge; and in case its said committee shall be satisfied that any retail dealer purchasing granulated sugar from any member of the association or otherwise has sold the same below the price so limited, they shall report the same to each member of the association."

The omission of penalties in a code otherwise so complete is understood to be supplied by proper treatment by the refiners of the wholesale dealer, and by the wholesalers of the retailer that dares to exact less profit on sugar than do his neighbors. The cause of omission to mention this in printed circulars is too obvious to need explanation.

As to sugar supply, while all can, and western New England largely does, order from New York, the rest are supplied from Boston, where the trust fills orders, using invoice notice and return coupon as follows:

[The American Sugar Refining Company. H. O. Havemeyer, president; Jno. E. Searles, jr., secretary and treasurer. P. O. box 5313.]

BOSTON, ——, *1894*.

M—— ——:

We inclose herewith invoice of sugar of even date, on which a commission of one-eighth of a cent per pound has been deducted in addition to our usual terms of 1 per cent cash in seven days and 1 per cent trade discount on 100-barrel lots. The understanding being that with your remittance the certificate below is to be returned, duly signed by you, as a voucher.

THE AMERICAN SUGAR REFINING COMPANY.

——.

No. ——.

To the American Sugar Refining Company:

We hereby certify that we have not sold, nor will we sell, nor has any employee, salesman, or agent of ours so'd, either directly or indirectly, any of the sugars for which we are now remitting for less than your daily quotations, with freight added from refining point to point of sale (as per equality-rate book), in any of the territory specified on the back of this certificate, nor on more liberal terms as to credit or cash discounts.

(Indorsement on back of notice.)

Maine,	Connecticut,	Delaware,	South Carolina,
New Hampshire,	Rhode Island,	Maryland,	Ohio,
Vermont	New Jersey,	West Virginia,	District of Columbia.
Massachusetts,	Pennsylvania,	North Carolina,	

(Indorsement on coupon identical with that on notice.)

This, however, is not all. There is an "independent" refinery at Boston, and the situation is so typical there as to merit notice. Though New York has come to be the show conservatory, New England has been, in a sense, the forcing bed of this sugar-distribution combine. Long before the formation of the trust the Boston Grocers' Association, dating from 1875, had pooled issues with the Boston refiners, and while in the rest of the country competition in handling sugars was free, in New England it had already been so restricted as to insure liberal profits, though not at present rates. And when the trust was formed, not merely the so-called "independent" refiners, but wholesale grocers as well, invested largely in its stock, which, largely on account of the faith that knowledge of the New England combine had inspired, became a favorite for Boston capitalists. As a result there is to-day probably held in New England, mainly in and about Boston and Providence, more sugar trust stock than in any other part of the country, the estimate given to the Senate investigating committee by Mr. Reed being that there were in New England 4,500 stockholders, owning $30,000,000 of sugar trust stock.

Prominent among these are Nash, Spaulding & Co., the owners of the so-called "independent" Revere Refinery, whose investments in trust stock have been very large ever since the trust was organized; so large, indeed, that one of its partners declined, on examination by the Senate committee, to swear that they were below $2,000,000 or $3,000,000, and understood to be far more than the amount invested in their own refineries. It might, therefore, be expected, as is the case, that the prices of the Revere are always the same as those of the trust, except that it sometimes charges a higher price for certain grades and makes a specialty of supplying direct old customers among the retailers. The use of the Revere, therefore, seems to be to preserve the "good will," which enables a portion of the sugars sold in New England to be marketed to old customers at higher prices than the trust in its own name could fix for the same grades, this without technically breaking the obligation of the trust to wholesalers, by which sales direct to retailers are discouraged.

Accounts are made up as follows: The trust refinery gives the wholesaler not merely the one-eighth of a cent provided for by the contract quoted above and the 1 per cent, and 1 per cent trade discounts for quantities and cash, but an extra allowance of one-sixteenth of a cent per pound, so that the trust commission is generally mentioned as the "three-sixteenths of a cent discount." The original discount was but one-eighth of a cent, in strict accord with the contract quoted. When, however, the extra one-sixteenth of a cent was conceded, it was thought useless unduly to excite the retailers by letting them know it, so the printed forms were left as before, with mention of the one-eighth of a cent only. A typical bill would be:

BOSTON, —— ——, 1894.

M—— ——

Bought of THE AMERICAN SUGAR REFINING CO.

Terms: Cash seven days Boston or New York funds, check to order of the company.

100 bbls.	Granulated sugar (——) 4.25		$1,453.05
	Less rebate under agreement ¼ cent per pound		42.73
			1,410.32
	Less allowance 1/16 cent per pound		21.37
			1,388.95
	Less trade discount 1 per cent		13.89
			1,375.06
	Less cash discount 1 per cent		13.75
			$1,361.31

The Revere bills its sugars net, that is, at three-sixteenths of a cent per pound below the prices quoted by the trust and subject only to trade and cash discounts.

It may be noted here that the effect of $30,000,000 sugar-trust holdings upon a thrifty population of 4,700,000—a concentration in less than one-fifteenth of the United States of two-fifths of the total sugar-trust interest—has so thoroughly soaked that section with its influence, that, though the masses of the population and the leaders among the newspapers are outspoken in denunciation of its extortions and methods, its influence is practically irresistible in financial, social, and political circles.

NEW YORK.

The New York territory includes New York, northern New Jersey, and a great part of the trade of Vermont and western Massachusetts and Connecticut. The trust refineries sell through the trust's main offices, at 117 Wall street, New York City, rendering bills upon the same basis as that from Boston above quoted, and using notice of invoice and return coupon of precisely the same form as does the Boston office of the trust, except as to heading and indorsements, which are as follows, respectfully:

[The American Sugar Refining Company. H. O. Havemeyer, president; Jno. E. Searles, jr., secretary and treasurer. P. O. box 2663.]

NEW YORK, ——, —.

(Notice and coupon the same as under Boston above.)

[Indorsement on notice:]

Maine,	Michigan,	Pennsylvania,	West Virginia,
New Hampshire,	Connecticut,	Delaware,	North Carolina,
Vermont,	Rhode Island,	Maryland,	Ohio,
Massachusetts,	New York,	Virginia,	District of Columbia.
Kentucky (on and east of the main line L. & N. R. R.),	New Jersey,	Tennessee,	

(Indorsement on coupon identical with that on notice.)

It will be noted that the indorsement here differs but slightly from that used by the Boston refineries, and, indeed, this difference is in practice mainly made by erasure and interlineation.

No special significance seems to be given to this; and the indorsement itself is understood to be a "survival" from the time when, commencing with New England, the trust began systematically to extend its own propaganda (as distinguished from that of the National Grocers' Association) in organizing local concerns—the indorsements on the Boston documents representing the extent to which this had been effected at the time when the plan was first formally recognized, and the New York forms representing the status at a somewhat later stage.

In general, however, for sales outside of the States named in the indorsement last noted above, even New York offices use a different form for its return coupon, bearing no indorsement, and reading as follows:

[The American Sugar Refining Company. H. O. Havemeyer, president; Jno. E. Searles, jr., secretary and treasurer. P. O. box 2663.]

NEW YORK, ——, 1894.

M—— ——

We inclose herewith invoice of sugar of even date on which a commission of one-eighth of a cent per pound has been deducted in addition to our usual terms of 1 per cent cash in seven days and 1 per cent trade discount on 100-barrel lots, the understanding being that with your remittance the certificate below is to be returned, duly signed by you as a voucher.

THE AMERICAN SUGAR REFINING COMPANY.

——.

"*To the American Sugar Refining Company:*

"We hereby certify that we have not sold, nor will we sell, nor has any employee, salesman, or agent of ours sold, either directly or indirectly, any of the sugars for which we are now remitting for less than your daily quotations nor on more liberal terms as to credit or cash discount.

"—— ——."

As noted below, the New York "independent" refiners, and some of the Philadelphia refiners, seem to use these indorsements more as a matter of habit with their printers than from any intelligible motive.

The relations of the "independent" refiners at New York with the trust seem to be as close as at Boston, and even more identical so far as the public is concerned.

The Mollenhauer and National refineries do their business exclusively through B. H. Howell, Son & Co., of No. — Wall street, New York City, and send out with each invoice to be returned with remittance a printed memorandum, of which the following is a copy:

To B. H. HOWELL, SON & CO.:

We hereby agree that in consideration of a commission of one-eighth of a cent per pound (⅛) deducted from invoice of even date, in addition to the usual terms of 1 per cent trade discount on all 100-barrel lots, and 1 per cent cash in seven days, that we will not sell, nor will any employee, salesman, or agent of ours sell, either directly or indirectly, any of the sugars for less than your daily quotations, with freight added from refining point to point of sale (as per Equality Rate Book) in any of the territory specified on the back of this certificate, nor on more liberal terms as to credit or cash discounts.

The understanding being that with our remittance this certificate is to be returned, duly signed by us as a voucher.

Invoice dated ——— —, 189—

——— ——— barrels sugar. ——— ———.

[Indorsed as follows:]

Maine,	Connecticut,	Pennsylvania,	West Virginia,
New Hampshire,	Rhode Island,	Delaware,	North Carolina,
Vermont,	New York,	Maryland,	South Carolina,
Massachusetts,	New Jersey,	Virginia,	Ohio,
Kentucky (on and east of the main line L. and N. R. R),		Tennessee,	District of Columbia.

The utility of the New York "independent" refineries in sugar trust policy appears to be somewhat the same as that of the Revere at Boston, to which, it is stated, is added the use of the so-called "independents" to make special shadings in prices on "off" grades of sugar whenever a surplus of these accumulates.

PHILADELPHIA.

At Philadelphia the situation is apparently more complicated—actually more simple. The trust refineries there are the Spreckels and the Franklin (the Knight refinery being run in combination with the latter), while the "independent" is in this case the McCahan Sugar Refining Company.

So close are mutual relations between the trust and the "independents" that the babies are here delightfully mixed up, the McCahan using the full trust form with its indorsements, as per copy below, while the Spreckels and Franklin refineries, which are owned by the trust, keep up an appearance of separation by the use of separate invoice notices and return coupons in the trust's short form, noted above, as sometimes used at New York. McCahan's relations here to the trust refineries are understood to be similar to those of the Mollenhauer and National at New York.

(1) [The Franklin Sugar Refining Company, P. O. box 1630.]

PHILADELPHIA, ——— ———.

(Notice and coupon identical with the trust's shorter form used at New York.)

(2) The Spreckels notice and coupon have no date head, and in form are copied from the trust's shorter form used at New York.

(3) [The W. J. McCahan Sugar Refining Co., 147 South Front street.]

PHILADELPHIA, ——— ———

(Invoice notice and return coupon the same as the trust's full form used at Boston, as noted above, with precisely the same indorsement, which, however, is on the back of the coupon alone. There is also added to the coupon the words: "Covering invoice ———.")

The bills rendered are all upon the same basis, though differing slightly in wording, and identical prices are quoted at the trust and independent concerns. The following are examples from the Franklin and McCahan, respectively:

PHILADELPHIA, *July —, 1894.*

Messrs. ——— ———

Bought of THE FRANKLIN SUGAR REFINING COMPANY.

Terms, 30 days, or cash less 1 per cent.
7 days in Phil. or N. Y. funds. Due in Phil., Aug. —, 1894.

100 lbs.	Fine No. 4, 31,091 lbs., 4.61c	$1,474.79
	Less ¼c. as per agreement, and $\frac{1}{16}$c. additional allowance	59.98
		1,414.81
	Less 1 per cent	14.14
		1,400.67
	Less 1 per cent (for cash)	14.00
		1,386.67

PHILADELPHIA, ———, 1894.

To the W. J. MCCAHAN SUGAR REFINING CO., Dr.

Terms, cash in 7 days, less 1 per cent.
Payable in Phil. or N. Y. funds.

Bags.	Barrels.		Net.	Price.	
20		Fine grade	6,525	4¼c.	$277.31
		Less a commission of ¼c. and $\frac{1}{16}$c			12.24
					265.07
		Less 1 per cent (for cash)			2.65
					262.42

NEW ORLEANS.

At New Orleans the trust refineries use the trust's short form:

[The American Sugar Refining Company. P. O. box 341.]

24 N. PETERS ST., *New Orleans*, ——— ———.

(Invoice notice, short form.)
(Return coupon, short form.)

The Henderson "independent" refinery seems to run as a tender to the trust in the same manner as do its brother "independents" in the North, and its net prices are the same as those of the trust. Its bills rendered are also on the same net basis, though figured in a different way. Below are samples, respectively, of each:

NEW ORLEANS, ——— ———, 1894,

M. ——— ———

Bought of WM. HENDERSON.

Hend. St. Gran. Sugar,	100 bbls.	34,124.	4$\frac{4}{8}$	$1,471.60
Less $\frac{4}{8}$				63.97
				1,407.63
Trade discount, 1 per cent				14.08
				1,393.55

(Subject to discount for cash.)

NEW ORLEANS, ——— ———, 1894.

M ——— ———

Bought of AMERICAN SUGAR REFINING CO.,

Office and salesroom, No. 24 North Peters st., cor. Custom-House.

S/D Terms Cash.
S/D B/L. Attached.

25 bbls. Standard Granulated. 8,670 lbs. 4$\frac{4}{8}$		$368.48
Less rebate under agreement ¼c. per lb		10.84
		357.64
Less allowance, $\frac{1}{16}$c. per lb		5.42
		352.22
Less trade discount (for less than 100 bbls.), ½ per cent		1.76
		350.46
		3.57
Less cash discount, 1 per cent		346.95

Conditions at New Orleans are somewhat complicated by the extent to which "plantation granulated" and other unrefined sugars are sold for direct consumption. This, however, practically applies only to Louisiana and a small section of Mississippi, and as a matter of fact, though probably over three-fourths of the raw centrifugals produced in Louisiana are above No. 16 Dutch standard, yet the greater part of them are actually sold to the refiner to be worked as raws, so thoroughly does the trust control sugar distribution.

SAN FRANCISCO.

At San Francisco Mr. Spreckels is decidedly in evidence. Free sugar under the McKinley bill destroyed a part of his extra profits on Hawaiian sugar, but he largely recouped by the arrangements into which he forced the trust as a condition of quieting his competition at Philadelphia. In the first place, he carefully preserved his personal control of the beet-sugar interests of California. In the next place, he retained the controlling interest in the Western Sugar Refinery (the trust concern at San Francisco), selling to the trust a part of his Western stock and the whole of his Philadelphia plant for several times what they cost him, and reserving his right to his own peculiar arrangements on the Pacific Coast, through which, however, the trust nets a greater profit than it could hope to obtain were its old method adopted.

Nothing short of a summary description can do justice to the peculiarly irresponsible control by which Mr. Spreckles made the performances of his Eastern partners seem philanthropic in comparison. The following is from a trustworthy correspondent:

"The arrangement between the jobbers and the refinery here is substantially as follows:

"The arrangement as originally made was for the purpose of securing to the Western Sugar Refining Company the trade of the Pacific Coast, as against any importations of foreign refined sugars; and further, to secure to the jobbers who are handling this product some profit, which heretofore had been very small. This profit is given to the jobbers in the shape of a rebate payable quarterly, and is left entirely to the Western Sugar Refining Company to make up and distribute.

"There is no jobber who knows what his exact percentage is, and it is this very doubt as to what each one's proportion is that has prevented, since this system was adopted, the cutting on this article which had before been practiced. As a basis for a division of those profits, a pool is made of the entire amount of sugar distributed by the refinery to the Pacific Coast territory; a sum equal to one-fourth of a cent per pound is transferred by them to the credit of the jobbers' fund and distributed according to the purchases made by each in the year 1891, and is so distributed yearly. This appears to be yet satisfactory to all concerned. Some perhaps may receive a little more than one-fourth, others a little less; but as the amount so received for rebate is much in excess of any profit realized before this arrangement went into effect, no one is anxious to disturb the relations now existing.

"You may, therefore, set the arrangement down as this: The jobbers collectively are entitled to one-fourth of a cent per pound rebate, which they distribute among themselves on an agreed basis. There are no copies and forms of accounts. The bills are made out at their regular quotations, under which no jobber is allowed to quote. Payment is made five days after delivery, net cash, no discount, and billed at prices ruling on date of purchase. Large purchases of 1,000 barrels or more are payable seven days after purchase, net, no discount."

Which is reenforced by the sugar-trust statisticians themselves:

"Wild statements" about San Francisco. * * * Assuming the quotation of granulated in San Francisco is as stated, 5¼ cents, it is necessary to deduct from this one-half cent per pound, which is given San Francisco grocers for rebate, reducing the price to 4.75 net to grocers. Contracts exist with the Pacific Coast great canning industry for a further rebate from this price, making the net price on all still less.

The total production of refined sugar on the Pacific Coast is not 150,000 tons. In 1893 it was 128,000 tons, and in 1892 it was 122,000 tons. This refined sugar is not all consumed in San Francisco nor on the Pacific Coast, but a large part of it is sent over the Rocky Mountains for a market. A letter received by us March 19, from Kansas City, Mo., reads as follows:

"The business in granulated and other refined sugars by the San Francisco refineries throughout all the States and Territories between the Pacific and the Missouri River, and at times reaching as far east as St. Louis and as far north as Chicago and as far south as Texas, shuts out of this immense territory for nine months in each year all other refining interests in the United States."

The San Francisco refineries are selling granulated in Kansas City and other Missouri River points at 4.52 cents net cash, on which they pay freight from San Francisco of 85 cents, leaving net to refiner of 3.67 cents per pound.

WILLET & GRAY,
Sugar Statisticians.

MARCH 20, 1894.

But this is not all. The arrangement just noted is in force throughout California, Washington, and Oregon, but the territory supplied at least in part from San Francisco extends eastward to the Missouri River. With perfect coolness Mr. Spreckels makes the price of sugar, delivered at different parts of the territory supplied by him, not greater in proportion to the distance from San Francisco upon which freight must be paid, but greater in proportion to the distance from New Orleans, Philadelphia, or New York, from which competition can be had—that is, the jobber nearest the refinery pays the highest gross price, the freight being counted against him rather than in his favor.

If there is any other noteworthy instance of this practice, the writer has not heard of it. Its toleration can only be accounted for on the ground that by too long contemplation of the Chinese the Californians have developed an excessive amount of patience. All along the Pacific coast Chinese sugars are

imported, but sold only to retailers and direct consumers, as no jobber dare touch them.

No attempt is made at the task of untangling the relations of the several Spreckels with each other and with the organizations they control.

TEXAS.

The only remaining substantial supply point is Sugar Lands, Tex., where Cunningham & Miller have a refinery with a capacity of 600 barrels a day, easy to be doubled. It is not known that this refinery has any contract relations whatever with the trust, and its position seems to be one of armed neutrality. It practically supplies the whole of the Texas trade, and competes as far off as Denver, Omaha, and Kansas City, its agents, however, always selling at trust quotations for each locality, and its bills, of which the below is a specimen, being made out upon the same net basis, though arrived at by a slightly different calculation, the three-sixteenths being first deducted from the price per pound and other charges added.

M ——— ———

Bought of CUNNINGHAM & MILLER,
SUGAR LANDS, TEX., *June —, 1894.*

100 bbls. st. gran. sugar,	32,027 lbs. @ 4.09½c		$1,325.26
10 " cubes,	2,000 lbs. @ 4.34½c		86.84
10 " powdered,	2,664 lbs. @ 4.34½c		115.68
		1,537.78	
Less 1 per cent + 1 per cent		31.60	
		1,506.18	

Freight prepaid.

DIVISION OF TERRITORY.

Generally speaking the source of supply is indicated by the neighborhood of any locality to the several refining centers. Boston, Philadelphia, and New York form one group, which supplies the whole North and the Central West and Northwest to and including Minnesota, as well as a portion of the Southeast, especially that reached by seaboard, even as far south as Florida.

The New Orleans refineries supply Mississippi and Louisiana and Alabama, and in part South Carolina, Georgia, Florida, and Arkansas, and both sides of the Mississippi River as far north as St. Louis and Little Rock, where they meet the competition from the Northeast. With the exception of Texas, which, as noted, seems to belong to Cunningham & Miller, the Territories and new States east of the Rockies buy where they please—from Spreckels, the Northeast, New Orleans; or, south of Dakota, from Cunningham & Miller—at prices, however, fixed by the sugar trust's Eastern quotations.

The Eastern trust refineries give their maximum discounts on lots of not less than 100 barrels, while Spreckels (trust) from San Francisco delivers on equally advantageous terms in lots of 75 barrels, and makes such concessions to large direct consumers, canners, confectioners, etc., as he thinks necessary to hold the market against Chinese sugars. The trust refineries are also comparatively uniform in practice as to freights and special charges, while the so-called "independent" refiners, to some extent, probably, from their larger dealings with the retail trade, have a tendency to lump everything together, thus making their bills on a more widely differing apparent basis as to the net price of sugar than is actually the case.

As to the return coupons, it is found that in New England, New York, Philadelphia, and vicinity they are not merely generally signed and returned, but the greatest anxiety manifested by individual grocers to be sure that this is invariably and promptly done. In the South and West, however, the practice varies to an extent almost comical when the correspondence from near-by cities or neighboring grocers of the same city is compared, one being sure that these coupons are invariably signed and returned, while another contemptuously asserts that he does not propose to do anything of the kind and incloses an assortment which he has rescued from his waste-paper basket.

On the whole, however, they are probably signed in nine-tenths of the cases, and even the few who decline to do so are not sufficiently known to each other to make most of them feel other than uneasy whenever there is a rumor of strictness on the part of the trust. Some of the local associations punish their own members for violation of sugar agreements; others call in the assistance of the trust; and in other cases the trust seems to be nosing about for a chance to volunteer its disciplinary assistance.

MISCELLANEOUS DATA.

Below are quoted characteristic fragments of an extended correspondence and numerous interviews:

* * * "The long and short of the whole story is that the grocers thought that the sugar refiners were acting in good faith with them, and we later found that they were only making use of our influence in the first place for having the output of sugar limited, and then for the purpose of getting good protection from our Government. The first they did not get (they now have it), and in the second they were certainly successful. I will add that if the United States Senate and the House are not exceedingly careful, the sugar trust will work out even more protection than they have had." * * *

* * * "The agreement as to selling prices applies to all sugar wherever purchased, and as far as I know the certificates are identical in substance if not in words. Before the sugar trust was formed, all New England grocers had an agreement, similar in form, which established a minimum profit." * * *

"We are simply enabled to make a very small profit on a staple article, and to control, if need be, any house that starts a ruinous competition on prices." * * *

OHIO—SUGAR AND COFFEE FREIGHT RATES—INSTRUCTIONS TO SALESMEN.

(Equality plan:) For instance, if a grocer in Bucyrus buys in Toledo when the price of granulated in New York is 5.18 he will pay 5.18 plus 29 cents per hundred (rate of freight from New York to Bucyrus), making 5.47 per hundred delivered in Bucyrus. The local rate of freight from Toledo to Bucyrus is 9 cents per hundred, which the Toledo jobber credits on the invoice of the Bucyrus grocer. If he buys in Mansfield he pays the same price (5.47 delivered), but as the local rate from Bucyrus to Mansfield is only 7 cents per hundred he will have credit on his invoice of 7 cents per hundred; so the Bucyrus customer will pay the same for his sugars wherever he buys. In other words, the retail merchant pays the same, delivered, no matter what market he buys from, but the profit of the wholesalers varies slightly, according to their geographical situation. The same principle governs all jobbing points.

* * * As soon as the trust (three years ago) got its rebate system adopted, it changed its quotation from a "net" price to a "list" price basis. Moreover, by virtue of its power, it compelled its brokers—that is, all brokers—and agents to telegraph none other than list prices. * * *

* * * We purchase all of our sugar from the trust refineries, but the wholesale grocers of Ohio do purchase some from Mollenhauer, National, and McCahan refineries, who claim that they are not in the trust, but their terms are the same as the trust refineries, and all purchasers are required to sign the agreement herewith inclosed.

About two years ago the wholesale grocers of Ohio organized an association called the Wholesale Grocers' Association of Ohio, in order to sell sugar on the equality plan, but their association would be of no account unless they were sustained by the refiner. They agreed with Mr. Havemeyer that if 95 per cent of the dealers in Ohio would sign the agreement to sell sugar on the equality plan he (Mr. Havemeyer) would not sell any outsiders who would not come into the association and sign the agreement.

In sugar? It's heaven now compared with formerly. We have made more on sugar in the last two years than for ten years before. Sugar rates used to be cut so that we never could count on anything and were always in trouble. Now we do our business in peace, and in addition to usual discounts for cash and for large purchases we get three-sixteenths of a cent commission per pound, or, say, 60 cents a barrel. Yes, I know our contract calls for only one-eighth; but the trust people give an extra one-sixteenth. This is the way the bills are made out. [Shows bill for purchase June 9, 1894.] You see that from the gross price are deducted not merely the one-eighth cent, "according to contract," but one-sixteenth; then 1 per cent for cash; then 1 per cent more on account of the purchase being over 100 barrels. It is not that the present commission is so large—though we do not object to that—but because we have peace now, that I like the present plan. As to commission, it may not be kept so high. I had rather have free trade in sugar, so that we would not be at the mercy of the trust.

Then, too, the lower the price of sugar the more pounds will we sell and the bigger will be our profits in proportion to capital invested even at the same rate per pound, and it is no advantage to try to keep prices at too high a rate. It won't stay. So long as there is the least tariff that discriminates in favor of refined sugars the trust has us. If we import, it can sell in our territory at only, say, one-half the tariff rate above free-trade prices, and thus ruin us while it continues to make money by those very sales. I have no grievance against the trust, but I know very well that I would have if I sold sugar for less than they tell me to. What would they do? They would shut me out of my commission, probably, possibly of my discounts, and if necessary I would be cut off from supply of sugar. Directly? Well, I don't know; but I am sure that if the trust did not want me to get sugar I would not get it—not at rates or in time to do me any good. There would be delays and obstructions—as many as were necessary. Independent refiners? Oh, they are all in with the trust; they have an arrangement—at least it is so understood.

* * * The American Sugar Refining Company bill their sugar at card prices less one-eighth cent under agreement, and one-sixteenth allowance and 1 per cent trade discount, and 1 per cent for cash.

We inclose you Cunningham's quotation sheet, which is three-sixteenth cent less than American Sugar Refining Company's quotations, but they do not allow the one-eighth and one-sixteenth, cent rebates, which makes their prices the same.

* * * I have no circular of these associations, but their aim is about as follows:

They agree not to buy from any manufacturer or dealer who sells the retail trade direct and not to make prices on certain articles less at any one place than another, thus giving each town in which there is a member of the association the trade of its own territory. * * *

* * * We purchase our sugars in San Francisco from the Western Sugar Refining Company, which is a branch of the American Sugar Refining Company. According to our contract with these parties, we are not allowed to sell any sugars outside of their products, therefore we do not handle any Chinese sugar. * * *

* * * The wholesale grocers of the Pacific Coast obtain all their sugar from the Western Sugar Refining Company, of San Francisco. This is the Spreckels refinery operated in connection with the trust. The wholesale grocers, properly speaking, do not buy any sugar imported from China. There is, however, quite a business done in China sugar, granulated, by the larger retail stores, who buy in lots of 1,000 pounds and upward. Parties manipulating China sugar maintain a price of one-eighth cent lower than that asked by the Western Sugar Refining Company. All of the wholesale grocers of California, Oregon, and Washington enter into an agreement with the refinery to sell no other sugar but theirs, and to refuse to sell it at less price than it is billed to them by the refinery plus freight from San Francisco to destination. In consideration of this agreement being carried out, the refinery allows the wholesale grocers a rebate every three months, which approximates one-fourth cent per pound.

There has been an advance during the last thirty days of one-half cent in consequence of the nonarrival of any granulated from China owing to the strike among the refineries of China. The present selling price of granulated sugar is 5¼ cents net. * * *

Arkansas Wholesale Grocers' Association constitution and by-laws.

PREAMBLE.

* * * Whereas increased facilities of production and distribution have resulted in the extreme development of the law of competition, * * * the manufacturers and the importers ignoring the jobbers, and selling their surplus product direct to the retailers, regardless of the interest of their first and best customers, the jobber; * * *

Whereas * * * no article of trade should be sold without a small margin of profit to all parties handling it, and no one class of dealers, be they manufacturers, importers, jobbers, or retailers, is entitled to all profits that are made on an article before it reaches the consumer. * * *

* * * The penalty for not adhering to sugar trust, if found out, is a fine of $100 for each offense. If parties withdrew from their State associations, we understand the trust would decline to sell them. The regular rate from New York and Philadelphia is 22 cents per 100 pounds; for nearly a year we have been allowed a drawback of 6 cents per 100 pounds. Sugars are charged to us at 22 cents rate of freight and we deduct difference in remitting. * * *

* * * McCahan, of Philadelphia, confines his operations principally to the smaller country buyers. Have never heard of them making a sale in our city or any other point where there is a jobbing business done. We inclose also a copy of the agreement which the Wholesale Grocers' Association made with the refiners. This was sent us with other printed matter when urging us to become members of the association. We regret exceedingly that we can not give you fuller information in regard to the situation. We beg to state, however, that we have no trade secrets and no sympathy with any combination of business men who have. We wish you every success in your efforts to deal with this big monopoly, and feel that the time has come when our Congress should take notice of others. One of the most complete monopolies that * * *

* * * had been reported at once to the trust as having kicked out of the traces and * * * received a quiet summons from the American Sugar Refining Company to take * * * place back in the ranks. * * * Hold the telegrams and letters. * * *

* * * The American Sugar Refining Company has an extremely arbitrary manner of doing their business, compelling a detailed statement from all of their customers, even when purchasing for sharp cash. Our payments are always made within seven days of the date of invoice, and in hardly a

single instance do we receive a bill of lading, and are, in fact, completely at the mercy of the sugar refining company. * * *

* * * As to Henderson, his prices have been the same as the refinery prices for some months past. Previous to that time they used frequently to quote different prices, but are evidently working under an agreement now. Henderson does not require any contract, but gives the same prices as the American Refining Company and the same discount, according to the size of the lot. It is safe, therefore, to state that Henderson now uniformly sells at the American Sugar Refineries Companies' listed price. * * *

* * * Terms on sugar from refiners to jobbers, to responsible parties, are as follows: Western of San Francisco, Spreckels of Philadelphia, Cunningham & Miller of Texas are list less ½ and 1/10, 1 per cent and 1 per cent. Cash, ten days. Oxnard of Nebraska, same, except cash seven days. American Sugar Refining Company, ½ and 1/10 and 1 per cent, forty days, or an extra 1 per cent if cash seven days. Henderson, same, except thirty days instead of forty. * * * These prices and terms apply only on car quantities of 100 barrels; if bought in less amount, costs ¼ per cent more. * * *

* * * The refiners' selling plan on the Pacific Coast is not similar to the plan in vogue in the East, as explained in your letter. There is no agreement between the refinery and the wholesale grocer as to equality of price. The selling system here itself regulates the price. We are sorry to say that we can not consistently send you any documents showing our Coast plan in detail, but we will explain it in a general way, which will probably be sufficient for your purpose. The wholesale grocer makes as much on the sugar whether he sells a pound or 10,000 pounds of sugar, as profits are not proportional to the current sales under the system. You can readily understand that no wholesale grocer would cut the price, as there would be absolutely no object in it. * * *

PROCEEDINGS OF THE SECOND ANNUAL CONVENTION OF THE MICHIGAN WHOLESALE GROCERS' ASSOCIATION, GRAND RAPIDS, MAY 15, 1891.

* * * President R. O. Wheeler read the following address:

* * * As you are well aware, our main trouble has arisen from the competition of dealers in States which were unorganized, and we see already fulfilled the prediction, made by your presiding officer in Chicago in January, 1893, that the equality plan would not pause until it embraced all the States east of the Missouri River. In much less time than was anticipated this result has been attained; the four States of Illinois, Wisconsin, Iowa, and Minnesota have entered the combination within the past thirty days, while Indiana has completed her organization. * * *

William Widdicomb, chairman, presented the report of the executive committee, as follows: * * *

As chairman of your committee, I made the following trips in the interest of the association and to further its business:

To Chicago, eleven trips.
To Toledo, three trips.
To Washington, one trip.
To New York, three trips.
To Indianapolis, one trip.

* * * My trip to Washington was somewhat extended, and, I trust, did not fail to accomplish what may prove of much value to the association. The other trips were all to secure equality in sugar, which we now have as our reward. * * *

Mr. REED. You probably all have before you fresh in your minds the experiences that you have passed through with the Standard Oil Company. The time is not long ago when you were all selling oil and making money on it. Who sells the oil to-day? Who has superseded you after you have built up the trade with the retailers, and taken the oil business out of your hands? I want to say to you that unless the Western States, beginning with Ohio and going West as fast as they adopt equality, are in perfect harmony and accord, your sugar business will soon be in the condition that the Standard Oil Company has placed you in. This is a matter of fact and a matter of record. Now, can such a firm as Edgar & Sons, who have spent time and money in building up their business, afford to have the American Sugar Refining Company come in and take their trade away from them? Can any jobber in this room, working under equality, afford to compete or try to compete with the American Sugar Refining Company? * * * Now, I am authorized to say, as was said to those gentlemen who produced the figures, and we have the pledge of not only the American Sugar Refining Company, but the other sugar refiners in this country, that if the seven States are in harmony and in perfect accord upon the equality plan, they will not interfere. Now, then, you can sift that down to as fine a point as you please and figure out whether it means anything or whether it does not. * * *

Mr. WIDDICOMB. * * * Mr. Reed has given you the warning, gentlemen, and I think the executive committee is entitled to a rising vote. * * *

The CHAIRMAN. Those in favor of the adoption of rule 5 will please rise; opposed by the same sign. It is carried. [Great applause.]

THE SUGAR-TRUST AUTOCRACY.

The sugar-distribution combine has just passed successfully a most trying crisis. The trust naturally took advantage of the few months before the Wilson bill went into effect so to rush importation and refining as to accumulate great stocks of refined sugar, to market which it offered every inducement to the wholesale grocers. The result was that during September and October the sugar market was so glutted that there ensued throughout the trade an eagerness to sell which, for the time being, broke all combinations and forced refined sugars to a lower price in comparison with raws than before of late years. But by shutting down the refineries until after election, the trust at once posed as a martyr and "corrected" the market, and now, with diminished stocks and rising prices, is again in command of the situation.

With the Spreckels in control of Hawaii, and the Havemeyers extending their plantations in Cuba, the trust dictates to every branch of sugar production and distribution in the United States, taking under its wing every one concerned—except those who consume sugar. From its office at 117 Wall street cable messages fly daily to its agents in Cuba, fixing the price of raw sugars there; to San Francisco announcing "Cuban parity," at which arriving Hawaiian sugars are to be valued; to Louisiana, telling her planters what—in view of Cuban and Hawaiian prices—the trust condescends to offer for American sugar; and to its representatives all over the world giving the limit—based on Cuban parity—at which they can pick up Austrian, Javan, Philippine, Brazilian, and other sugars, when these are temporarily depressed in price.

In an adjoining room the quotations at or above which the subservient dealers throughout the country are permitted to sell sugars are daily settled, and through the four great sugar brokers who stand nearest the throne these are passed to the forty others who await the sugar trust's nod at New York and telegraphed to the waiting hundreds in the other cities of the land. These, in turn, so promptly notify their patrons, the thousands of wholesale grocers of the country, that before their doors are opened all danger of any purchaser getting his sugar below trust prices is over for the day. By discount from his bill, or periodical remittance, as the case may be, each faithful wholesaler is promptly and liberally paid for his loyalty; and whenever, in the crisis of legislation, he hears the bugle call of the trust, he instantly steps into line, ready to bombard his Congressman with telegrams or fight him with ballots at short range until the sugar trust cause is triumphant.

Not merely this, but all along our borders he keeps tireless vigil lest foreign sugars enter. For he concurs in Mr. Havemeyer's forcible statement to the Senate committee that "every pound of foreign sugar consumed in this country is at the expense of the American Sugar Refining Company," and stands ready to protect against any such disaster his guide, philosopher, and friend.

Such is the grandest trade organization the world has ever seen.

The sugar trust dictates the tribute that shall be rendered it by the American people.

The wholesale grocers are rewarded by whatever of largess the trust thinks necessary to insure their loyalty.

And the public? "The public be damned;" and it is.

Mr. ALLEN. Mr. President, this discussion seems to have drifted from dry hides to sugar within a very short time. I think possibly it is due in a large measure to the fact that the senior Senator from Massachusetts [Mr. HOAR] has floated around upon the sea of logic without rudder and without compass, and has finally landed the Senator from Louisiana [Mr. CAFFERY] on the sugar question.

The question before the Senate now is whether a specific duty of a cent and a half a pound shall be put upon hides, or whether we shall have 20 per cent ad valorem. In discussing this question, the junior Senator from Missouri [Mr. VEST], who is always very felicitous and usually sound, told us that it is useless to put hides upon the dutiable list, because there is a gigantic trust, composed of Morris, Swift, Armour, and Hammond, who control the entire meat output of the world and the hides and the price of everything in that line, and therefore the tariff would not be of any benefit to the farmer and those who raise the cattle.

I took occasion, in replying to that, to call attention to the existing laws of Congress and to read one act at length for the purpose of putting the question why some Administration in the last seven years had not put the existing law in force and by means of that law indicted the combination which was in violation of the statute and prosecuted it before some one of the courts of the country having jurisdiction of the subject-matter and of the parties. No man has yet answered that question, and no man will ever answer it. The discussion will drift upon sugar or drift upon something else before the question is answered.

Thereupon the Senator from Massachusetts undertook to take my attention or the attention possibly of the Senate away from the question under discussion by differing with me, very properly, I presume, as he always does, upon the question of law that is presented. Mr. President, I do sincerely have a great deal of respect for the legal knowledge of my honorable friend from Massachusetts, but I lived pretty nearly fifty years without knowing him. I have come from boyhood to my present manhood—whatever that may be, perfect or imperfect—without knowing him; and I have always relied upon my own judgment in doing so. I can not be expected now, when I am at an age where my hair is turning almost as white as his, to abandon my own conclusions and my own method of making deductions to accept his in all respects.

Now, what did that Senator say? He did not dispute, except in a roundabout way, the proposition of law that I made. He said that an article made in a State to be sold in a State is local commerce. Nobody ever disputed that that I ever heard, and it was not disputed by me. He said that in the case of an article made in a State to be sold in a State, and which might become an article of interstate commerce, a conspiracy to control the price is not indictable and punishable under the laws of the United States. I never heard any man say it was.

But, Mr. President, the Senator from Massachusetts did not dispute, except in smothered words, the prominent fact that an article sold in one State to be delivered in another State is interstate commerce under the Constitution of the United States and under the rulings of all the courts of the United States.

Nor did he dispute the further fact that a combination made in Chicago or elsewhere in the United States between two or more persons to control one of the great staple products of the United States and to lower or raise the prices of that product at their will, when that article became an article of interstate commerce, pursuant to the agreement or conspiracy between these parties, and passed the boundaries of the State where the conspiracy was formed into another State, and a part of the conspiracy, the agreement, was to follow the article into another State and use it to crush out industries there, is not also indictable. If the Senator from Massachusetts, with his great ability and his experience, can prove to the American people that that proposition is not right, I am perfectly willing that he should do so.

Why, sir, that is the very gravamen and essence of interstate commerce. The Supreme Court in the Brown case, along in the early history of this country, declared that as long as an article was an article of interstate commerce the law of Congress would follow it and protect it, and would punish a violation of the rights of the lawful owner. That was determined in the Gibbon case and in the Brown case early in the history of this country. So I assert upon the authority of those cases and upon the authority of the language of the Constitution itself that if the four persons named by the junior Senator from Missouri enter into a conspiracy

to control the price of meat throughout this country, and pursuant to that conspiracy send their agent to Pennsylvania and begin the work of controlling the prices by undertaking to destroy the business of some man there located in legitimate business, it comes clearly within the purview of the statute of 1890 prohibiting criminal conspiracies and combinations among dealers.

What was wrong about that? Simply because it does not meet the approval of the Senator from Massachusetts; that is all. It does not bear his stamp or his brand. Whatever that Senator may say with reference to me or my capacity to understand these questions, that question has been settled by more than one hundred decisions of American courts of last resort. There can be no question about it.

Then we come back to the simple proposition whether Congress shall refuse to put a tax upon hides simply because this Government is so paralyzed in its executive, its judicial, and its legislative branches that a great meat trust controls the Government and these parties can not be prosecuted and convicted of crime. Mr. President, the country is rotten from one end to another with these trusts. A hundred trusts to-day control all the staple products of this country. Everything we eat, everything we wear, everything upon the roof under which we live, upon the floor on which we stand, is controlled by a trust. Here stands Congress, the highest legislative body, and the executive and the judiciary, all paralyzed, impotent, and powerless to protect the people.

The VICE-PRESIDENT. The question is on the amendment of the committee to insert a new paragraph as paragraph 426½, as amended.

Mr. WHITE. Is House bill No. 379 in order? I inquire of the Senator from Iowa whether it has been laid aside.

Mr. ALLISON. I hope the bill is still under consideration. I am not quite clear about it.

Mr. MANTLE. Is it in order to offer an amendment to the proposed committee amendment?

The VICE-PRESIDENT. The Chair so understands.

Mr. MANTLE. I desire to offer an amendment.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. Amend the committee amendment by inserting, after the word "pickled," in line 8, page 152, paragraph 426½, the following:

Skins of animals, generally called hair sheep, or half-breeds, or cabretta or Angora sheep, raw or uncured, with the hair or hair and wool on, goatskins, kangaroo skins, and the hides or skins of all other animals (not tanned), and not specially provided for. Sheepskins (except sheepskins with the wool on), raw or uncured, whether dry, salted, or pickled.

Mr. MANTLE. Mr. President, the purpose of the amendment is to include with hides, as provided by the committee, all other raw skins which come into competition with cattle hides and which it is proposed in the pending amendment to leave upon the free list. In my opinion, if the matter is permitted to go as it now stands, levying a duty upon cattle hides only, the real object and purpose of the amendment will fail; that is to say, the protection which it is intended by the amendment to give to the domestic producers of hides will not be realized, because there will be left a vast amount both in number and value of other hides to come in free, which will come into competition with the cattle hides.

I have talked with a number of tanners and manufacturers upon this subject, and I find quite a good many of them are not opposed to a duty upon hides. They are entirely willing that a duty shall be levied, but they object to this discrimination, in permitting a vast amount of other hides used largely for the same purposes to come in duty free in competition with the articles they produce.

I have here a document presented by the senior Senator from Massachusetts, a memorial of George H. Maddock, who is the president of the Boston Upper Leather Tanners' Club, in which he sets forth many facts that are applicable to the case in point, and presents the matter very clearly. I think the document ought really to go into the RECORD for the benefit of those who desire to understand this matter thoroughly. This document gives the number of hides which are imported and which are produced in this country. It goes on to say that about 12,000,000 are taken off in the United States annually, and an average of from 3,000,000 to 6,000,000 are brought in.

He states that there are also imported into this country yearly about 7,000,000 sheepskins; and here I may say that I have been informed by manufacturers that these sheepskins when tanned can scarcely be distinguished, and certainly not by a layman, from the cowhide leather. They are also used largely for the same purposes that cattle hides are used, and people are actually deceived in their purchase; that is to say, they buy sheepskin while believing they are buying cowhide or cattle-hide leather.

This memorial shows also that there are about 50,000,000 raw goatskins, kangaroo skins, hair sheep, and Angora sheepskins imported annually into the country, the goatskins weighing about as many pounds and valued at about $10,300,000. It shows further that there was a total last year of about $33,500,000 worth of hides of all kinds imported into the country. Of this about $10,500,000 were of goatskins, and of hides other than goat and fur skins about $20,000,000, and it shows that if the matter is left as now recommended by the committee there will be $13,500,000 in value of other classes of hides, of raw goatskins, sheepskins, etc., which will come in duty free, the great body of which will compete more or less with cattle hides

So it seems to me that this provision will be incomplete, that it will fail of its object and purpose in giving protection to the producers of cattle hides, and to manufacturers and tanners as well, unless it is made to cover all of these raw skins, and I certainly think that my amendment ought to prevail in this case, in order to complete the purpose which the committee have in view.

Mr. President, I have listened to the speech made by the Senator from New Jersey [Mr. SMITH] this afternoon in opposition to a duty upon hides. The burden of his discourse was that the only ones who will be benefited by the duty on hides is the great beef trust of Chicago. If I believed that that was true, I certainly would not favor the imposition of this duty. In these matters, however, I am far more ready to accept the statements of people who are engaged in the industry, such as the people who are raising and selling cattle throughout the country, than I am to accept abstract theories and propositions made and stated here without, as I regard it, sufficient foundation.

Now, it is a fact that the cattle growers of the country, and the great body of farmers of the country who are raising cattle and selling them, are desirous of having a duty imposed upon hides. To my mind that is sufficient. That carries far more weight with me than any statement of the character to which I have alluded. At least two-thirds of all the hides which are produced in this country are produced by the small farmers and small cattle growers and the small independent butchers. About one third, it is estimated, are produced by the cattle trust. So the great mass of the producers of this country will be benefited by the imposition of a duty.

I am very much pleased with the recommendation of the committee to change this duty on hides from a cent and a half a pound specific to 20 per cent ad valorem, because I believe in this particular case, considering the condition in which the hides are imported, an ad valorem duty perhaps will come nearer reaching the object had in view.

Without stopping to take up the time of the Senate further, I desire to present a communication, which I will not stop to read, because I rather apprehend that my suggestion, not having emanated from the committee, will carry no weight here, and will not be adopted.

That, however, does not prevent me from presenting the matter and pointing out what I conceive to be the inconsistency of the proposition now advocated, to put a duty upon cattle hides and leave the great bulk of other hides to come in free. I desire to say that this communication is from a citizen of Texas, a Republican, a most ardent protectionist, and a gentleman who has given a great deal of study and investigation to the subject of goat raising and sheep raising and of wool and all the matters which are related to those subjects.

The communication referred to is as follows:

PEARSALL, TEX., *June 20, 1897.*

MY DEAR SENATOR: * * * The hair of the Angora and Cashmere goat should no more be scheduled with wool when formulating a tariff bill than silk should be. The bill now under consideration recommends that raw silk pay an import duty of 50 cents per pound. This, I infer, is considered a revenue rate of import duty, as I do not infer that it is expected that such rate of import duty will ever tend to develop the business of producing raw silk in this country. The fabrics made from the hair of the Angora and Cashmere goat are worn by the same class of people that wear silk fabrics—people receiving good salaries or having good incomes—consequently they should be required to contribute to the revenues needed by the Government.

The fabrics made from the skin of the goat are also worn by the same class of people; therefore the same policy should apply when considering the question of restoring goatskins to the dutiable list. You are well aware that in applying the principles of the protective-tariff policy all luxurious commodities imported and used by the extravagant, wealthy, and people of well-to-do circumstances should be required to bear largely the burdens of taxation, in order that the laboring masses may be relieved, as largely as is consistent with good government, from taxes necessary to be levied and collected to meet the current expenses of the Government.

This view of the case being accepted as the correct policy, the question arises as to the amount of import duty that should be justly levied on mohair. As the tariff bill now under consideration recommends that 50 cents per pound be levied on raw silk as a revenue duty, it seems to me right and proper that mohair should pay the same rate of import duty that silk is to pay, and in addition to the 50 cents per pound as the revenue duty, it should pay 25 cents per pound import duty as an additional protection to the industry, which can be made to meet the demands of the people within a reasonable number of years if adequate protection be given same.

The hide of the goat, being used exclusively in the manufacture of luxurious commodities, should pay an import duty of 40 cents or more per pound. Forty cents per pound import duty levied on the dry flint hide would have enabled the Government to collect more than $20,000,000 per annum on the more than 50,000,000 pounds of dry flint goatskins that have annually been imported into the United States during each of the last six or eight years, except the year closing June 30, 1894. Aside from this quantity imported as dry flint hides, there has also been imported a considerable quantity of goatskins in a half-dressed condition for the manufacture of morocco leather. The tanners of goatskins will need to be given proper rates of compensatory duties to protect them against competition offered by foreign tanners.

An examination of the Treasury Department reports will show that the consumption of goatskins by the people of the United States, as imported in

the raw and half-dressed condition and as imported in gloves, is enormous, costing the people of this nation (computing the probable quantity of raw goatskins used in the manufacture of gloves imported) annually less than an average of $13,000,000 during the last eight years, every pound of which can and would be produced by the people of this country if given adequate protection against foreign competition; and the same records go to prove that during the last fifteen years the annual importations of goatskins have very greatly increased.

I herewith insert statement taken from the records of the Treasury Department showing importations of goat products:

Import of goatskins and mohair and manufactures of goatskins.

[See United States Treasury Department reports.]

Year.	Pounds, free.	Value.	Cost per pound.	Dutiable under section 3, act of October 1, 1890.		Goatskins, tanned, but not dressed, for morocco purposes.	Kid gloves, value of.	Mohair.	Value per pound.
				Quantity.	Value.				
			Cents.	*Pounds.*				*Pounds.*	*Cents.*
1887		$5,848,128				$2,401,530	$4,159,112		
1888		6,309,411				3,450,571	4,437,287		
1889		7,668,472				3,415,935	4,523,600		
1890		9,106,082				3,644,695	5,501,336		
1891		11,443,745				3,474,735	5,627,984		
1892		11,509,127		240,493	$48,840	3,497,879	5,830,380		
1893		12,414,988		1,927,965	420,257	4,137,435	6,925,876		
1894		8,170,563		1,780,183	412,603	2,484,740	4,412,597		
1895	53,968,385	10,894,845	20.3	272,107	50,982	3,728,225	6,4 3,822		
1896	46,747,029	10,304,395	22.06			3,145,939	6,765,082	1,806,071	41

The facts set forth in the records of the Treasury Department, added to the further fact that the United States possesses all the conditions requisite to enable the people of this nation to produce every pound of goatskin and mohair needed, renders this subject worthy the careful and earnest consideration of Congress, while considering ways and means by which the Government can be supplied with the necessary amount of revenue, and at the same time induce the people to make this country self-supplying in all commodities needful that we are now importing but that we can successfully produce.

Further consideration of this subject will enable you to ascertain the facts that highlands of all Southern States, nearly all of Texas, New Mexico, and Arizona, a large portion of California, and some portions of the Pacific Coast north of California are well adapted to raising the Angora goat, and that middle and west Texas, New Mexico, and Arizona not only have room to successfully graze and care for many millions of goats (besides carrying at the same time large stocks of sheep), but the three sections of country last named have been proven to be the natural home of the goat in North America, and are spoken of by men of experience in other countries as comparing favorably with any part of the world for goat-raising purposes.

Concerning the number of goats now in the United States, I have to advise you that, while the reports of the Department of Agriculture at Washington show but 45,000 goats in North America, such report is misleading, from the fact that a reference to the office of comptroller of Texas shows that the assessors of this State returned to that office for assessment last year (1896) 251,585 goats, and a reference to the comptroller's records for the State of California and the Territories of New Mexico and Arizona will show that in those districts there are also considerable numbers of goats, a good portion of which, in all these different States and Territories named, are of the Angora breed.

While discussing the feasibility of obtaining stock for the building up of a sufficient stock of goats to enable the United States to become self supplying, I have to further advise you that while we have no official reports concerning the number of goats in Mexico, yet my personal knowledge of the number of goats in that country leads me to believe that there are at least three or four millions of goats in that country, a good portion of which the people of the United States would be likely to come in possession of in comparatively few years by purchase and removal of same to the United States if sufficient rate of protection is given the industry by Congress to justify the people in purchasing and bringing same into the United States.

It is a well-known fact that the goat is the most hardy and prolific animal of any of the wool-bearing species; consequently it is reasonable to conclude that the addition of a considerable portion of the goat stock of Mexico to the present stock of goats in the United States would, in comparatively few years, enable the people of this country to become self-supplying in both goatskins and mohair, thereby enabling the nation to keep at home the $15,000,000 to $17,000,000 in gold that is now being sent abroad in payment for goatskins and mohair that we are annually importing, and which amount of importations is rapidly increasing, and at the same time the building up of this industry would give profitable employment to tens of thousands of people and make valuable millions of acres of nonagricultural lands located in the arid districts of the United States.

Most respectfully,

B. L. CROUCH.

Hon. LEE MANTLE,
United States Senate, Washington, D. C.

Mr. MANTLE. It will be seen that this gentleman has gone into the matter most thoroughly, has investigated all the statistics bearing upon it, and has tabulated a statement giving his views, and from the protective standpoint there is no disputing the proposition that a higher rate of duty ought to be levied upon these skins and hairs for the purpose of encouraging their production in our own country. His judgment and belief is—and he states the case very clearly and logically—that with a protective duty sufficiently high we can supply these articles very largely ourselves.

I desire to have the memorial of Mr. Maddock, to which I have referred, printed in the RECORD in connection with my remarks.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

The memorial referred to is as follows:

[Senate Document No. 150, Fifty-fifth Congress, first session.]

MEMORIAL OF GEORGE H. MADDOCK.

Mr. HOAR presented the following memorial of George H. Maddock, president of the Boston Upper Leather Tanners' Club, containing statistics in regard to tariff on hides:

WASHINGTON, D. C., *June 10, 1897.*

The Senate of the United States:

The following in regard to a tariff on hides and leather is most respectfully presented:

According to the census of 1890, the amount of capital employed in the various branches of the manufactures of boots, shoes, and leather amounted to $200,000,000, and the value of the manufactured product was $622,000,000; the number of people employed, 295,000, and the amount of wages paid was $130,000,000.

The industry has increased to a very large extent since that time, and the capital employed is much larger.

The number of cattle hides taken off annually in the United States for the past five years has been from 12,000,000 to 15,000,000, and the number imported has been from 3,000,000 to 6,000,000. The largest importations were in 1895, when the price of hides in this country was much higher than in any part of the world, and large numbers came here from nearly all the hide-producing countries. The imports of cattle hides in 1895 were nearly 6,000,000.

The domestic take-off of cattle hides in the United States in 1896 was about 12,000,000; about one-third of this number were taken off by the large and small packers, and the other two-thirds by the small butchers and farmers.

There are also very large numbers of calfskins taken off in this country every year, but it is difficult to estimate the number.

About 5,000,000 sheep and lambs are slaughtered in the United States yearly, and most of the skins are used in making leather.

There are also imported into this country yearly about 600,000 dozen, or 7,000,000, sheepskins, used mostly for making leather.

There are also imported yearly a large number of goatskins, kangaroo skins, hair sheep and Angora sheepskins.

The definite number can not be determined, but conservative estimates place the number as in the vicinity of 40,000,0 0 to 50,000,000 skins. According to the reports of imports of merchandise for 1896, there were 45,715,000 pounds of goatskins, raw or uncured, imported into the United States, valued at $10,300,359. These goatskins came principally from India, China, Germany, France, Russia, Turkey, Mexico, Argentina, Brazil, Africa, and United Kingdom. The supply of these foreign goat and sheep skins seems to be unlimited.

As the shoe and leather industry is so large and important an industry, great care should be taken in the adjustment of the new tariff that as little disturbance as possible should be made in the long-established conditions of the trade, and it would be very detrimental to the industry to have excessive or unequal duties imposed on raw materials; but without doubt the industry could very readily adapt itself to a reasonable duty.

On account of our extensive forests of oak and hemlock, and the easy access to them by our railroads, and on account of the enterprise and push of our American tanners, we are able to produce leather (in the making of which oak or hemlock bark is required) at a less price than similar leather can be produced in other parts of the world, and for this reason we have been able to establish a large foreign trade for our leather, amounting to nearly $30,000,000 a year.

This leather goes to nearly all the important leather markets of Europe, and American leather has become almost a necessity to the English shoe manufacturers. The shoe and leather trade seems to seek a few principal centers in each country. Boston is now the great shoe and leather center of the world, and London is the next place of importance.

Owing to the skill and enterprise and close attention to the business by the American tanner and shoe manufacturer, the competition has become very close and the profits are reduced to the minimum, so that many of our large shoe factories are willing to run for a profit of 1 to 2 cents per pair on the cheaper grades of shoes, costing $1.25 per pair or less, and a profit of 5 cents per pair is an unusual thing, except on the medium and better grades of shoes, and the tanners of cattle hides for the past three years have not averaged over 20 to 25 cents per hide profit.

In spite of the inroad upon this narrow margin of profit which would be made by the proposed duty on hides, less harm would result if the duty on cattle hides was properly classified, and if the hides and skins of other animals were also put on the dutiable list at an equitable rate. Such a duty on skins would give more real protection to cattle hides than the proposed duty in the Senate bill; it would give more revenue, and it would be a more popular measure.

It is proposed in the tariff bill as reported to the Senate May 4, 1897, to take cattle hides from the free list, where they have been since 1872, and place a duty on them of 1¼ cents per pound. (See p. S. B. 152, No. 4254.)

In the same bill it is proposed to leave the raw skins of all other animals on the free list (page 184, No. 636½), and also leave the duty on tanned skins at 10 per cent ad valorem, the same as they have been, hides on the free list (No. 427, page 154, lines 7, 8, and 9).

These imported raw skins produce leather that is used extensively in place of similar leather made from cattle hides, displaces so much cattle-hide leather, and helps to reduce the price of hide leather and of cattle hides. A duty should be placed on these raw skins if a duty is to be placed on hides.

The tanned skins imported under No. 427, lines 7, 8, and 9, compete very seriously with leathers made from domestic hides, as can readily be shown, and a duty of 30 per cent on this article would not be excessive, and would afford much better protection to our domestic hides than would a duty on cattle hides.

It requires, on the average, over two months' time to manufacture leather from cattle hides, and a large amount of raw material, such as bark, etc., is used. This gives constant employment to labor for over two months for a hide, and employs a large amount of labor in gathering and preparing the materials used, such as bark, etc., while on the average it takes only about

two weeks to prepare leather from the imported skins, for the reason that most of the skins are tanned by a quick chemical process, such as a chrome-tanning process, or by some other similar process, which have not as yet been found to be succe-sfully applicable to tanning a hide. Very little material is required in tanning or finishing these skins, and it requires only a few days to finish leather from the imported tanned skins, and only a very small amount of material.

It will thus appear that the manufacture of leather from cattle hides employs labor at least four times as long as the manufacture of leather from these imported skins, and also uses a much larger amount of domestic material in the manufacture of hide leather.

It is difficult to give the amount of imports of the raw skins that compete with leather made from cattle hides. They are not properly classified in the Government reports, as they have been on the free list.

The importation of goatskins, raw, in 1895 amounted to $10,955,000; in 1896 to $10,305,000. A portion of these skins would produce leather that would compete with cattle hides.

Under the term "Skins for morocco, tanned," the imports in 1895 were $3,730,000, and in 1896, $5,150,000. These paid a duty of 10 per cent, but probably valued at the extreme low price at which they were brought (chiefly in India), the leather from a large portion of these tanned skins competes very seriously with leather made from cattle hides. The duty on these skins has been 10 per cent, which is not enough for protection. It should be 30 per cent, as before stated.

The value of cattle hides imported can not be definitely stated, as they are not classified separately, having been on the free list.

A careful estimate of the imports of cattle hides gives the number imported in 1896 as 3,500,000. A fair estimate of the weight would be 71,000,000 pounds; a fair estimate of the value would be $13,000,000.

The imports of raw goatskins in 1896 were 45,715,000 pounds, valued at $10,300,000. These were free of duty.

The importations of hides and skins for 1896 are as follows:

Imports of goatskins, not tanned	$10,300,000
Imports of hides and skins other than goat and fur skins	20,216,000
Imports of tanned skins for morocco, meaning principally East India tanned goat, sheep, and kip skins	3,150,000
Total	33,666,000
Less estimated value of cattle hides	13,000,000
Total	20,666,000
Less tanned skins, taxed at 10 per cent	3,150,000
Leaving total value of	13,516,000

Being the value of hides and skins other than cattle hides that it is proposed to leave on the free list. This certainly does not give the desired protection to cattle hides.

GEO. H. MADDOCK,
President Boston Upper Leather Tanners' Club.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Montana [Mr. MANTLE] to the amendment proposed by the committee, which has been read.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on the adoption of the amendment proposed by the committee inserting a new paragraph.

Mr. VEST. Let us have the yeas and nays on that, Mr. President.

The yeas and nays were ordered.

Mr. COCKRELL. Let the amendment be stated.

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to amend the amendment of the committee in paragraph 426½, in line 8, page 152, after the word "pickled," to strike out "1¼ cents per pound" and insert 20 per cent ad valorem;" and after the word "pound," in line 9, to strike out:

Provided, That upon all leather exported, made from imported hides, there shall be allowed a drawback equal to the amount of duty paid on such hides, to be paid under such regulations as the Secretary of the Treasury may prescribe.

So as to make the paragraph read:

426½. Hides of cattle, raw or uncured, whether dry, salted, or pickled, 20 per cent ad valorem.

Mr. WHITE. I inquire if we are now to vote upon the amendment proposed by the committee to the amendment of the committee?

Mr. VEST. I understood that 20 per cent had been already accepted.

Mr. ALLISON. We have substituted for the original amendment another amendment, and we are now voting upon the amendment as amended as a substitute.

Mr. WHITE. From the statement made from the desk, it would seem to be a substitution of 20 per cent for 1¼ cents per pound, and striking out the proviso. It ought to be read as if 20 per cent had already been inserted.

Mr. ALLISON. That is correct.

The VICE-PRESIDENT. The question is on the insertion of the new paragraph 426½ as it has been amended on the motion of the Senator from Iowa [Mr. ALLISON]. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. DANIEL (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH], and therefore withhold my vote.

Mr. DEBOE (when his name was called). I am paired with the Senator from South Dakota [Mr. PETTIGREW], and therefore withhold my vote.

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH]. If he were present, he would vote "nay" and I should vote "yea."

Mr. LINDSAY (when his name was called). I have a general pair with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "nay."

Mr. MILLS (when his name was called). I am paired with the Senator from New Hampshire [Mr. GALLINGER], and therefore withhold my vote.

Mr. TELLER (when Mr. PETTIGREW'S name was called). The Senator from South Dakota [Mr. PETTIGREW] is paired with the Senator from California [Mr. WHITE]. The Senator from South Dakota would vote "yea" if present.

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER], but as he would vote upon this question in the affirmative, if he were present, as I shall do, I ask to record my vote. I vote "yea."

The roll call was concluded.

Mr. BATE. I desire to state that my colleague [Mr. HARRIS] is absent on account of ill health, and that he is paired with the Senator from Vermont [Mr. MORRILL] who is also absent.

Mr. JONES of Arkansas (after having voted in the negative). I am paired with the Senator from Maine [Mr. HALE], and voted inadvertently. I withdraw my vote.

Mr. GEAR. I have announced my pair with the Senator from New Jersey [Mr. SMITH], but I transfer that pair to the Senator from Rhode Island [Mr. ALDRICH], and vote "yea."

Mr. CLARK (after having voted in the affirmative). I inquire of the Chair whether the junior Senator from Kansas [Mr. HARRIS] has voted?

The VICE-PRESIDENT. The Senator has not voted.

Mr. CLARK. Then I withdraw my vote, as I am paired with that Senator.

Mr. BUTLER. I am paired with the Senator from Maryland [Mr. WELLINGTON], but understanding, if he were present, that he would vote the same way on this question as I do, I vote "yea."

Mr. CLARK. I transfer my pair with the junior Senator from Kansas [Mr. HARRIS] to the junior Senator from Illinois [Mr. MASON], and vote "yea."

Mr. DEBOE. I transfer my pair with the Senator from South Dakota [Mr. PETTIGREW] to the Senator from Nevada [Mr. JONES], and vote "yea."

Mr. PENROSE. I am authorized to transfer my pair with the junior Senator from Delaware [Mr. KENNEY], so that he will be paired with the Senator from Utah [Mr. CANNON]. Therefore I am at liberty to vote, and vote "yea."

Mr. WHITE. On this question I am paired with the Senator from South Dakota [Mr. PETTIGREW], and withhold my vote. If he were present, he would vote "yea" and I should vote "nay."

Mr. MARTIN. I wish to announce that I am paired with the Senator from Oregon [Mr. MCBRIDE], and therefore withhold my vote.

Mr. BACON (after having voted in the negative). I inquire of the Chair if the junior Senator from Rhode Island [Mr. WETMORE] has voted?

The VICE-PRESIDENT. The Senator from Rhode Island has not voted.

Mr. BACON. Then I withdraw my vote, as I have a general pair with that Senator.

Mr. MANTLE. I desire to inquire if any arrangement has been made respecting the pair of the Senator from Utah [Mr. CANNON]?

The VICE-PRESIDENT. The pair of the Senator from Utah [Mr. CANNON] has been transferred to the Senator from Delaware [Mr. KENNEY], as announced by the Senator from Pennsylvania [Mr. PENROSE].

The result was announced—yeas 39, nays 20; as follows:

YEAS—39.

Allen,	Deboe,	Jones, Nev.	Rawlins,
Allison,	Elkins,	Lodge,	Sewell,
Baker,	Fairbanks,	Mantle,	Shoup,
Burrows,	Foraker,	Nelson,	Spooner,
Butler,	Frye,	Penrose,	Stewart,
Carter,	Gear,	Perkins,	Teller,
Chandler,	Hanna,	Platt, Conn.	Thurston,
Clark,	Hawley,	Pritchard,	Warren,
Cullom,	Heitfeld,	Proctor,	Wilson.
Davis,	Hoar,	Quay,	

NAYS—20.

Bate,	Cockrell,	Mallory,	Roach,
Berry,	Faulkner,	Mitchell,	Tillman,
Caffery,	Gorman,	Morgan,	Turpie,
Chilton,	Gray,	Pasco,	Vest.
Clay,	McLaurin,	Pettus,	Walthall.

NOT VOTING—30.

Aldrich,	Harris, Kans.	McMillan,	Smith,
Bacon,	Harris, Tenn.	Martin,	Turner,
Cannon,	Jones, Ark.	Mason,	Wellington,
Daniel,	Kenney,	Mills,	Wetmore,
Gallinger,	Kyle,	Morrill,	White,
George,	Lindsay,	Murphy,	Wolcott.
Hale,	McBride,	Pettigrew,	
Hansbrough,	McEnery,	Platt, N. Y.	

So the amendment to insert as a new paragraph paragraph 426½ as amended was agreed to.

Mr. ALLISON. I offer, on behalf of the majority of the

Committee on Finance, a new paragraph in lieu of paragraph 427 as originally proposed to be inserted by the committee.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa on behalf of the committee will be stated.

The SECRETARY. It is proposed to insert, as a substitute for paragraph 427 as originally reported, the following:

427. Band or belting leather, sole leather, dressed upper, and all other leather, calfskins, tanned, or tanned and dressed, kangaroo, sheep and goat skins (including lamb and kid skins), dressed and finished, chamois, and other skins, and bookbinders' calfskins, all the foregoing not specially provided for in this act, 20 per cent ad valorem; skins for morocco, tanned, but unfinished, 10 per cent ad valorem; skins of sheep origin, dressed, with the grain on, $1.50 per dozen skins; skins of goat origin, dressed, with the grain on, 22 per dozen skins; skins dressed as suede or with the exterior grain surface removed, whether known as mocha or otherwise, $2.50 per dozen skins; patent, japanned, varnished, or enameled leather, weighing not over 10 pounds per dozen hides or skins, 30 cents per pound and 20 per cent ad valorem; if weighing over 10 pounds and not over 25 pounds per dozen, 30 cents per pound and 10 per cent ad valorem; if weighing over 25 pounds per dozen, 20 cents per pound and 10 per cent ad valorem; pianoforte leather and pianoforte action leather, 35 per cent ad valorem; leather shoe laces, finished or unfinished, 50 cents per gross and 30 per cent ad valorem; boots and shoes made of leather, 25 per cent ad valorem: *Provided*, That leather cut into shoe uppers or vamps or other forms, suitable for conversion into manufactured articles, shall be classified as manufactures of leather and pay duty accordingly.

Mr. WHITE. This amendment is very lengthy and seems to need a little clarification. I will inquire of the Senator from Iowa as to whether the effect of it is to increase the duty over the amendment heretofore proposed by the committee or over the bill as it came from the House; I speak of it generally. It is mysteriously concocted.

Mr. JONES of Arkansas. How great an increase is proposed by the amendment?

Mr. ALLISON. This amendment was very carefully prepared by an expert of the Treasury Department. It does somewhat increase the duties upon japanned leather above those heretofore provided, but otherwise I do not think there is any material advance.

Mr. WHITE. Will the Senator state the object of the committee in framing this complicated amendment? Will he state the object to be gained by it? What was the difficulty with the former amendment?

Mr. ALLISON. If the Senator had noticed carefully the reading of the amendment, he would have observed that all the leathers bearing 20 per cent ad valorem have been thrown together. This is more scientific, if I may use that term, than the paragraph formerly proposed by the committee.

Mr. WHITE. This is more scientific than the other?

Mr. ALLISON. That is to say, it carries all the leathers that have a 20 per cent ad valorem duty together. Then it classifies other leathers, some of them being made specific instead of ad valorem, without increasing the ad valorem. Perhaps I should have said the amendment now proposed is more symmetrical than the former one.

Mr. VEST. Under the amendment as originally proposed by the committee the duty upon japanned leather was 20 per cent ad valorem. Can the Senator now tell us what is the ad valorem rate upon japanned leather under the amendment as amended?

Mr. ALLISON. About 10 per cent.

Mr. VEST. All these "band or belting leathers, * * * calfskins tanned, or tanned and dressed, dressed upper leather, including patent, enameled, and japanned leather, dressed or undressed," etc., were placed at 20 per cent ad valorem. What does the Senator say is now the increase over 20 per cent?

Mr. ALLISON. The increase is about 10 per cent, making it 30.

Mr. LINDSAY. Instead of 20?

Mr. ALLISON. Instead af 20.

Mr. JONES of Arkansas. On all of those?

Mr. ALLISON. On all that class of leather.

Mr. WHITE. Is there any compensating duty in this? Was this framed with a view to prepare a compensating duty?

Mr. ALLISON. It was framed in view of the fact of the 20 per cent duty on hides.

Mr. WHITE. Then the increase is due to the fact that a tariff duty has been placed on hides?

Mr. ALLISON. On that class of leather. I believe the proposed amendment is satisfactory to those who voted to impose a duty on hides.

Mr. GRAY. I should like to ask what the committee propose to substitute for lines 7, 8, and 9, which read:

Skins for morocco, tanned, but unfinished, 10 per cent ad valorem;

Mr. ALLISON. That is included in the substitute as stated. The duty on morocco is not increased.

Mr. GRAY. How is it as to "skins for morocco, tanned, but unfinished?"

Mr. ALLISON. They are not included, and stand at 10 per cent, as in the former amendment.

Mr. JONES of Arkansas. Was the tax too high as proposed before the 20 per cent was put on?

Mr. ALLISON. On skins for morocco?

Mr. JONES of Arkansas. Yes.

Mr. ALLISON. I think so.

Mr. JONES of Arkansas. I understood the Senator to say these duties were raised in this paragraph to compensate for the 20 per cent which has just been added on hides?

Mr. ALLISON. Ten per cent as to japanned leather.

Mr. JONES of Arkansas. Was it not raised as to anything else?

Mr. ALLISON. Not as to anything else, I believe.

Mr. JONES of Arkansas. Then the addition of 10 per cent does not, in the opinion of the Senator, change the necessity for protection on these articles?

Mr. ALLISON. Only as I have stated.

Mr. JONES of Arkansas. From which I infer that the Senator thinks that the rates were too high in this paragraph before the addition of the 20 per cent duty on hides?

Mr. ALLISON. They were high enough.

Mr. JONES of Arkansas. Yes.

The VICE-PRESIDENT. The question is on the adoption of the amendment of the committee.

Mr. JONES of Arkansas. There ought to be a yea-and-nay vote of the Senate on that proposition, and I ask that the vote be taken in that way.

The yeas and nays were ordered.

Mr. WHITE. If the Senator from Iowa has the information convenient, I should like to know the ad valorem rate on shoe strings.

Mr. GRAY. Are shoe strings on the dutiable list?

Mr. WHITE. Yes; under this amendment.

Mr. GRAY. Could they not escape?

Mr. WHITE. No; it seems not.

Mr. ALLISON. The rate is about 20 per cent, I think.

The Secretary proceeded to call the roll.

Mr. DANIEL (when his name was called). I am paired with the Senator from North Dakota [Mr. HANSBROUGH].

Mr. GEAR (when his name was called). I have a general pair with the senior Senator from New Jersey [Mr. SMITH]. If he were present, I should vote "yea."

Mr. LINDSAY (when his name was called). I am paired with the senior Senator from Michigan [Mr. MCMILLAN]. If he were present, I should vote "nay."

Mr. MARTIN (when his name was called). I am paired on this question with the Senator from Oregon [Mr. MCBRIDE].

Mr. MILLS (when his name was called). I am paired with the Senator from New Hampshire [Mr. GALLINGER]. If he were present, I should vote "nay."

Mr. PENROSE (when his name was called). I am paired with the junior Senator from Delaware [Mr. KENNEY]. If he were present, I should vote "yea."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER], but for this vote I transfer my pair to the Senator from Illinois [Mr. MASON], and I will vote. I vote "yea."

Mr. WHITE (when his name was called). Upon this vote I am paired with the Senator from South Dakota [Mr. PETTIGREW]. Were he present, he would vote "yea" and I should vote "nay."

The roll call was concluded.

Mr. BERRY. I was requested by the senior Senator from New York [Mr. MURPHY] to announce that on all these questions he is paired with his colleague [Mr. PLATT]. If the senior Senator from New York were present, he would vote "nay."

Mr. VEST. I am paired with the Senator from Minnesota [Mr. NELSON]. If he were present, I should vote "nay" and he would vote "yea."

Mr. JONES of Arkansas (after having voted in the negative). I am paired with the Senator from Maine [Mr. HALE], and voted inadvertently. I withdraw my vote.

Mr. BACON (after having voted in the negative). The junior Senator from Rhode Island [Mr. WETMORE] not having voted, I withdraw my vote, as I have a general pair with him.

The result was announced—yeas 30, nays 19; as follows:

YEAS—30.

Allison,	Elkins,	Lodge,	Spooner,
Burrows,	Fairbanks,	Perkins,	Stewart,
Carter,	Foraker,	Platt, Conn.	Teller,
Chandler,	Frye,	Pritchard,	Thurston,
Clarke,	Hanna,	Proctor,	Warren,
Cullom,	Hawley,	Quay,	Wilson.
Davis,	Hoar,	Sewell,	
Deboe,	Jones, Nev.	Shoup,	

NAYS—19.

Allen,	Cockrell,	Mitchell,	Roach,
Bate,	Faulkner,	Morgan,	Tillman,
Berry,	Gray,	Pasco,	Turpie,
Caffery,	Harris, Kans.	Pettus,	Walthall.
Chilton,	Mallory,	Rawlins,	

NOT VOTING—40.

Aldrich,	Gorman,	McEnery,	Penrose,
Bacon,	Hale,	McLaurin,	Pettigrew,
Baker,	Hansbrough,	McMillan,	Platt, N. Y.
Butler,	Harris, Tenn.	Mantle,	Smith,
Cannon,	Heitfeld,	Martin,	Turner,
Clay,	Jones, Ark.	Mason,	Vest,
Daniel,	Kenney,	Mills,	Wellington,
Gallinger,	Kyle,	Morrill,	Wetmore,
Gear,	Lindsay,	Murphy,	White,
George,	McBride,	Nelson,	Wolcott.

So the amendment of the committee was agreed to.

Mr. CAFFERY. I offer a table prepared by Mr. Byron W. Holt, in connection with the sugar schedule, and ask that it may be printed in the RECORD and as a separate document.

The VICE-PRESIDENT. If there be no objection, that order will be made.

The table referred to is as follows:

Table showing differential or net protection on 100 pounds of hard refined sugar; protection concealed in error of Treasury table; total concealed protection, over the 20 cents per 100 pounds intended; and net protection, or differential (including countervailing duty of 38 cents) on 100 pounds hard refined sugar.

Raw "test" degree.	Pounds raw required to make 100 pounds refined sugar.*			Duty per pound.	Amount of duty on raw sugar required to make 100 pounds of hard refined sugar.			Amount duty of on 100 pounds refined.	Differential on 100 pounds hard refined sugar based on †—			Protection concealed in Treasury table error.	Total concealed protection, all over 20 cents per 100 pounds.	Differential, or net protection (including countervailing duty), on 100 pounds hard refined sugar.‡
	Theoretical.	Treasury.	Actual.		Theoretical allowance.	Treasury allowance.	Actual pounds.		Theoretical allowance.	Treasury allowance.	Actual pounds.

*The column headed "Theoretical" shows the number of pounds of raw sugar of each grade which would be required to make 100 pounds of crystallized or hard refined sugar, providing all of the crystallizable sugar was extracted. It is not practicable to extract all. In the column headed "Actual" the allowance is sufficient to yield in practice 100 pounds of hard refined sugar. If refiners do not get out 100 pounds of hard refined from these allowances, it is usually because they can give a greater value to their products by turning out less hard and more soft refined sugars. Of course the unextracted crystallizable sugar can be made into soft refined—almost as valuable as hard refined sugars. Besides these sugars there is more or less of invert sugar, which goes into sirup.

†In the column headed "Theoretical allowance" the differential is based upon the supposition that all the crystallizable sugar is gotten out of the raw sugar. The small amount that is lost in practice is saved in the form of soft refined sugars. The differential shown in this column is therefore probably nearer correct than is that in the column headed "Actual pounds." In the latter column no account is taken of the increased value of the soft refined sugars due to the duty on them.

‡These differentials do not include the duty on the soft sugars made from the residue of the first refining process, all of which duty is clear profit to refiners. Neither do they show the full protection given to the low-grade refined sugars. Under the proposed schedule these sugars, though often testing less than 90 degrees, enjoy the same protection as hard refined sugars testing 99+. The protection on these sugars is therefore about 10 per cent more than on hard refined sugar. It will thus prohibit the importation of low-grade refined sugars.

Mr. ALLISON. I desire to have the attention of the Senator from California for a moment. In the original paragraph 427 I find that leather shoe laces were partly specific and partly ad valorem. The rate proposed by the amendment just adopted is less than the rate proposed by the House.

The reading of the bill was resumed, beginning with line 17, page 154, and continued to the end of paragraph 430, which is as follows:

430. Women's or children's "glacé" finish, lamb or sheep, not over 14 inches in length, $2.50 per dozen pairs; over 14 and not over 17 inches in length, $3.50 per dozen pairs; over 17 inches in length, $4.50 per dozen pairs; men's "glacé" finish, lamb or sheep, $4 per dozen pairs.

Mr. GRAY. I should like to ask the Senator from Iowa how paragraph 430 compares with the McKinley law on gloves?

Mr. ALLISON. I think it is an increase.

Mr. GRAY. Can the Senator from Arkansas state the increase, unless the Senator from Iowa has the figures?

Mr. ALLISON. It is 25 cents a dozen on the first bracket.

Mr. GRAY. That is what I make it out. The classification is different from that of the McKinley law. We in this paragraph have adopted the classification of the law of 1894.

Mr. JONES of Arkansas. On 14-inch gloves it is $1.75 a dozen under the present law, and $2.50 under the Senate bill; over 14 inches and not over 17 inches, $2.75 under the present law, and $3.50 under the pending bill—75 cents difference.

Mr. GRAY. Seventy-five cents difference?

Mr. JONES of Arkansas. Seventy-five cents. Over 14 inches and not over 17 inches, unlined, it is $2.75 under the present law and $3.50 under the pending bill; over 14 and not over 17 inches in length, lined, $3.75 under the present law and $4.50 under this bill; over 17 inches in length, unlined, $3.75 under the present law and $4.50 under the pending bill.

Mr. ALLISON. On the next item it is the same—$4.

The reading of passed-over paragraphs was resumed, and paragraph 431 was read, as follows:

431. Women's or children's "glacé" finish, goat, kid, or other leather than of sheep origin, not over 14 inches in length, $3 per dozen pairs; over 14 and not over 17 inches in length, $3.75 per dozen pairs; over 17 inches in length, $4.75 per dozen pairs; men's "glacé" finish, kid, goat, or other leather than of sheep origin, $4 per dozen pairs.

Mr. GRAY. Will the Senator from Iowa tell us in regard to the last item in paragraph 431? It is the same description as in paragraph 431, men's "glacé" finish. What kind of a glove is it? It is a tremendous tax, it seems to me. Is that a fine glove or a coarse glove?

Mr. LODGE. A smooth glove.

Mr. ALLISON. It is a smooth finish.

Mr. GRAY. They are taxed $4 a dozen pairs. It is a very high tax, and I wish to know whether it is an ordinary leather glove or a fine leather glove.

Mr. ALLISON. They are all fine gloves—"glacé finish, kid, goat, or other leather than that of sheep origin."

Mr. VEST. The "glacé" is the finer glove.

Mr. JONES of Arkansas. The tax is about 50 per cent.

Mr. GRAY. How do they differ, I should like to ask the Senator from Iowa, from the last classification in paragraph 430 "men's glacé finish, lamb or sheep, $4 per dozen pairs." Is the lamb or sheep a coarse, heavy glove?

Mr. ALLISON. They are heavier gloves. These are the kids, and other than of sheep origin.

The reading of the bill was resumed. The next amendment of the Committee on Finance was to strike out paragraph 434, in the following words:

434. In addition to the foregoing rates there shall be paid the following cumulative duties: On all leather gloves, when lined, $1 per dozen pairs; on all pique or prix seam gloves, 50 cents per dozen pairs; on all gloves stitched or embroidered, with more than three single strands or cords, 50 cents per dozen pairs: *Provided*, That all gloves represented to be of a kind or grade below their actual kind or grade shall pay an additional duty of $3 per dozen pairs: *And provided further*, That no gloves shall be classed as children's gloves that are larger than size 6, glove measurement.

And to insert in lieu thereof:

434. In addition to the foregoing rates, there shall be paid on leather gloves, when lined, $1 per dozen pairs. On all leather gloves imported without fasteners of any kind for closing the wrist openings there shall be a reduction of 25 cents per dozen pairs from the rates in the preceding paragraphs.

Mr. ALLISON. I offer what I send to the desk as a substitute for the committee amendment.

The SECRETARY. It is proposed to amend the amendment of the committee by inserting as a substitute therefor the following:

434. In addition to the foregoing rates there shall be paid on leather gloves, when lined, $1 per dozen pairs; on all pique or prix seam gloves, 25 cents per dozen pairs; on all gloves stitched or embroidered with more than three single strands or cords, 25 cents per dozen pairs. On all leather gloves with wrist openings, imported without fasteners, or parts thereof, of any kind, there shall be a reduction of 25 cents per dozen pairs from the rates in the preceding paragraphs.

Mr. JONES of Arkansas. As well as I could hear, there has been an increase in the rate of duty on gloves of 75 cents a dozen in these paragraphs. The amendment now offered, if I understand it correctly, increases it $1 in addition to the 75 cents.

Mr. PLATT of Connecticut. No.

Mr. ALLISON. It increases it $1 on lined gloves.

Mr. JONES of Arkansas. That is above the 75 cents already on; more than 100 per cent on the first recommendation of the committee.

Mr. ALLISON. Oh, no.

Mr. JONES of Arkansas. Then I do not understand it.

Mr. ALLISON. Paragraph 434 provided that "in addition to the foregoing rates, there shall be paid on leather gloves, when lined, $1 per dozen pairs."

Now, in addition to that we have provided for 25 cents additional per dozen pairs on all pique or prix seam gloves, instead of 50 cents a dozen, as in the House scheme, and also upon embroidered gloves the same rate, 25 cents a dozen additional, the House having put on 50 cents a dozen, and we omit from the amendment the last two provisos found in the House text.

Mr. JONES of Arkansas. I do not understand the meaning of the amendment. I should be glad to have it read again from the desk.

Mr. ALLISON. I hope the Senator will also look at the House text.

The VICE-PRESIDENT. The amendment will again be read.

The Secretary again read the amendment.

Mr. JONES of Arkansas. This is a substitute for the House provision.

Mr. ALLISON. It is a substitute for the House provision and the Senate amendment.

Mr. JONES of Arkansas. I did not so understand it when it was first read.

Mr. WHITE. I do not exactly understand the last sentence of the paragraph, which provides that in certain cases there shall be a reduction of 25 cents per dozen pairs. This seems to be amenable to the criticism made by the Senator from Iowa the other day when he spoke deprecatingly of a provision that the duty should not go above a certain figure. I note with apprehension that he is injecting into the bill that very dangerous element, for he provides here that on certain lines of goods a reduction shall be made. I think, perhaps, the amendment is better phrased than the House paragraph, which provides for cumulative duties. I have heard of cumulative penalties in certain cases. The change, as I understand it, is a considerable raise over previous law, but the classification is so different that it is impossible to figure it out, and I see it is a task for which the mathematician who prepared the comparative statement found himself inadequate, for I observe there is no computation here as to paragraph 434, either as it came from the House or as it is now in the bill.

Mr. GRAY. Then, if I understand it, it means that on leather-lined gloves the duty shall be $5 per dozen.

Mr. ALLISON. If they are lined.

Mr. GRAY. If they are lined. So if they are lined, I presume that takes them out of the category of ordinary kid gloves which may be worn for fashion or for some other purpose, perhaps for dress rather than for warmth; but a lined glove is only worn as a necessity, and the leather-lined gloves are the necessary hand apparel of everybody who is out in the open air, and especially those who work in the air. This is a very large tax, it seems to me, to be placed upon a necessary of life—$5 a dozen.

Mr. ALLISON. The people who make gloves complain very much that we allow only $1. It is said that the cost of lining many of these gloves is four or five dollars a dozen.

Mr. GRAY. The people who wear gloves will complain.

Mr. ALLISON. I have not heard of any complaint from them.

Mr. JONES of Arkansas. The remark of the Senator from Iowa, that the people who make the gloves complain, reminds me of the complaint I remember to have read once of an old conveyancer in England, who complained that a deed for land was not required to be exactly the same size as the land, so that the conveyancer, who was paid by the hundred words, would receive something like a respectable fee for conveying the land. I do not think anybody ever believed he was right.

Mr. WHITE. I notice there is one reason which ought to be controlling, and no doubt has been in the matter of the increase of this duty. The importation of men's lined gloves in 1896 was 10 dozen, and the duty paid $38; and in view of that fact, I should think there would be no objection to the amendment proposed by the Senator from Iowa.

Mr. ALLISON. It is a revenue duty.

Mr. VEST. I wish to make one observation about the glove schedule. On all the cheaper grades of women's and children's gloves there is a heavy increase of 75 cents on the dozen pairs. When it comes to higher priced gloves for men, other than of sheep origin, it is $4 in the existing law, and no increase in this amendment. In other words, the increases are upon the lower grades and the cheaper grades, while the higher valued goods escape the increase entirely.

Mr. ALLISON. I think the Senator must be mistaken. There seems to be a regular gradation here and increase in duties. Of course it is true that in each of these paragraphs men's gloves of lamb or sheep are $4 a dozen.

Mr. VEST. That is existing law.

Mr. ALLISON. And men's gloves, other than of sheep origin, $4 a dozen. The other gloves here are graded up according to their degree of finish. There will be no trouble about that.

Mr. WHITE. Perhaps it would further justify the report of the committee as to paragraph 434 to call attention to the comparative statement, on page 232, from which it appears that of women's or children's gloves, glacé finish, goat, and so on, over 14 and under 17 inches in length, lined, there were imported in 1896 30.26 dozens, and a duty paid of $201. That importation was not equaled by the bracket over 17 inches in length, lined, for it appears there the importation was 4.8 dozens, and the amount of duty collected the munificent sum of $35.

The VICE-PRESIDENT. The question is on agreeing to the amendment in the nature of a substitute proposed by the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of passed-over paragraphs was resumed and continued to the end of line 19, on page 157.

Mr. ALLISON. That completes the leather schedule. I ask that we return to paragraph 189. The Senator from Nebraska and one or two other Senators ask that we do not take up the lead schedule to-night, and, inasmuch as it will take some little time, I suggest that we take up paragraph 189, which was partially considered a few days ago.

Mr. JONES of Arkansas. I do not understand why it seems to be the purpose to take up paragraph 189 just about the time for adjournment each afternoon.

Mr. ALLISON. I do not quite see any special reason for it myself, except that it is more convenient than to take up the lead schedule. I do not think the Senator from Arkansas will find any great difficulty in the paragraph.

Mr. JONES of Arkansas. Relating to watches?

Mr. ALLISON. Yes; to watches.

Mr. JONES of Arkansas. I think there will be considerable difficulty with it, from my observation. It is a proposition to raise the tax from 25 per cent, as it stood for years and never was raised since the war, to 65 per cent, and it seems to me there ought to be some reason given for it in the Senate when that is done.

Mr. TURPIE. I ask the honorable Senator from Iowa whether he will give way to an executive session if I move one?

Mr. ALLISON. I will in a moment. The Senator from Arkansas desires that we shall not take up the paragraph relating to watches to-night.

Mr. JONES of Arkansas. I think we had better go on in the regular way. So far as I am concerned, I shall have but little to say about the watch business. I have no doubt the question has already been settled by the Republican caucus, and that whatever they have decreed will be adopted; that it is useless to call attention to the outrage, if I may be allowed to say so in a polite way, in this paragraph. Still, I propose to do it. I do not think it will take more than a few minutes, but I should rather not begin when we are all exhausted and the time has come really for an adjournment, and I think the suggestion of the Senator from Indiana had best be acted on.

Mr. ALLISON. Then allow me to take up a matter which I think will not lead to any debate, and that is paragraph 215—cattle. I believe it is a matter which will not lead to any debate.

Mr. JONES of Arkansas. What does the Senator from Iowa propose?

Mr. ALLISON. I should like to propose an amendment. If there is any serious objection to it——

Mr. JONES of Arkansas. We shall be glad to have it proposed, so that we may know what it is.

Mr. ALLISON. It will take but a few minutes to dispose of it.

Mr. JONES of Arkansas. What is the proposition?

The VICE-PRESIDENT. The Secretary will state the amendment proposed to paragraph 215.

The SECRETARY. It is proposed to strike out paragraph 215 and insert:

215. Cattle, if less than 1 year old, $2 per head; all other cattle, if valued at not more than $14 per head, $3.50 per head; if valued at more than $14 per head and not more than $25 per head, 25 per cent ad valorem; if valued at more than $25 per head, 30 per cent ad valorem.

Mr. JONES of Arkansas. How does that differ from the present law?

Mr. ALLISON. The rate is a little higher than the present law.

Mr. JONES of Arkansas. Let the amendment be read again.

The Secretary again read the amendment.

Mr. ALLISON. It is much less than the House provision, but it is, of course, an increase over the present law, which is 20 per cent ad valorem. It is lower than the House rate.

Mr. JONES of Arkansas. If the Senator would make the last

bracket 20 per cent, I would not have any serious objection to the proposition.

Mr. ALLISON. I think this is the desire among the agricultural people, and perhaps of those who import cattle from other countries.

Mr. WHITE. Does the protection given on hides make any difference in the tariff on cattle, I will ask?

Mr. ALLISON. This provision relates to live cattle.

Mr. WHITE. As long as hides are protected raw, perhaps it might affect the rate.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

Mr. CHILTON. Let us understand the question a little better. What is the proposition?

The VICE-PRESIDENT. The proposition is to strike out paragraph 215 and insert a new paragraph, which has been read.

Mr. CHILTON. Let it be read again.

The Secretary again read the amendment.

The VICE-PRESIDENT. The Chair will again put the question. The question is on agreeing to the amendment of the Senator from Iowa.

Mr. VEST. Of course it is useless to make any opposition to this increase, but I want to call attention to the fact that in 1896 we exported $34,560,672 worth of cattle and we imported $1,497,622 worth. I could say a great deal were it not for the lateness of the hour and the utter uselessness of making any contest against the amendment. I suppose that the object of the amendment is to exclude entirely from the country Mexican cattle and the Canadian cattle.

Mr. ALLISON. I will say to the Senator that it is not the object. The object is to get a duty if they are imported, as they will be undoubtedly, from Mexico.

Mr. VEST. These rates are absolutely prohibitory on young cattle. From the way they have been rating heretofore in price—they have gone up a little lately—it is absolutely impossible to bring into the country any of the cheap Mexican cattle, which are bred in Texas and Nebraska and in the western portion of Missouri. It is not true that they come in competition with our cattle in the Chicago market. There never have been more than two small bunches of those cattle carried to Chicago, and they were immediately bought by the canners, and not sold in competition with the grass-fed or corn-fed cattle of the Western States. But I suppose the amendment is to be adopted. I simply wanted to enter my dissent from it and to state that I am against it.

The amendment was agreed to.

Mr. ALLISON. Now I yield to the Senator from Indiana.

Mr. MORGAN. I desire to offer an amendment to the pending bill, which I ask to have printed.

The VICE-PRESIDENT. It will be so ordered.

EXECUTIVE SESSION.

Mr. TURPIE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After forty-five minutes spent in executive session the doors were reopened, and (at 5 o'clock and 47 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, June 29, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 28, 1897.

MARSHAL.

Clarence W. Ide, of Washington, to be marshal of the United States for the district of Washington, vice James C. Drake, to be removed.

COLLECTOR OF INTERNAL REVENUE.

Henry Fink, of Wisconsin, to be collector of internal revenue for the first district of Wisconsin, to succeed James W. Murphy, removed.

CONSUL.

Soren Listoe, of Minnesota, to be consul of the United States at Rotterdam, Netherlands, vice Lars S. Reque, resigned.

PROMOTIONS IN THE NAVY.

Naval Cadets Stuart F. Smith, of Pennsylvania, and William G. Groesbeck, of Ohio, to be assistant naval constructors in the Navy from the 1st day of July, 1897.

Asst. Engineer John H. Rowen, to be a passed assistant engineer in the Navy from the 28th day of May, 1897, vice Passed Asst. Engineer Edgar T. Warburton, promoted.

PROMOTIONS IN THE MARINE CORPS.

Frank L. Denny, captain and assistant quartermaster, United States Marine Corps, to be quartermaster of said corps, with the rank of major, from the 27th day of June, 1897, vice Richard S. Collum, major and quartermaster, retired.

Charles Laurie McCawley, to be an assistant quartermaster in the United States Marine Corps, with the rank of captain, from the 27th day of June, 1897, vice Frank L. Denny, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 28, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Irving B. Dudley, of California, to be envoy extraordinary and minister plenipotentiary of the United States to Peru.

CONSUL-GENERAL.

Hector de Castro, of New York, to be consul-general of the United States at Rome, Italy.

CONSULS.

Frank Dillingham, of California, to be consul of the United States at Auckland, New Zealand.

Frank C. Denison, of Vermont, to be consul of the United States at Woodstock, New Brunswick.

SECRETARY OF LEGATION.

Thomas C. Dawson, of Iowa, to be secretary of the legation of the United States at Rio de Janeiro.

PROMOTION IN THE ARMY.

General officer.

Col. Caleb Henry Carlton, Eighth Cavalry, to be brigadier-general.

PROMOTIONS IN THE NAVY.

Capt. George C. Remey, to be a commodore.

Commander William H. Whiting, to be a captain.

Lieut. Commander Frederick M. Symonds, to be a commander.

PROMOTION IN THE MARINE CORPS.

Second Lieut. William N. McKelvy, United States Marine Corps, to be a first lieutenant.

MEMBER OF CALIFORNIA DÉBRIS COMMISSION.

First Lieut. Herbert Deakyne, Corps of Engineers, United States Army, to be a member of the California Débris Commission, vice Capt. Cassius E. Gillette, Corps of Engineers, relieved.

COLLECTORS OF INTERNAL REVENUE.

Michael W. Sutton, of Kansas, to be collector of internal revenue for the district of Kansas.

Henry Fink, of Wisconsin, to be collector of internal revenue for the first district of Wisconsin.

Herschel S. Harkins, of North Carolina, to be collector of internal revenue for the fifth district of North Carolina.

POSTMASTERS.

William Jenney, to be postmaster at Mount Clemens, in the county of Macomb and State of Michigan.

Seymour Foster, to be postmaster at Lansing, in the county of Ingham and State of Michigan.

Clarence E. Closser, to be postmaster at Munising, in the county of Alger and State of Michigan.

HOUSE OF REPRESENTATIVES.

MONDAY, *June 28, 1897.*

The House met at 12 o'clock m. Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of Thursday last was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed the following resolutions:

Resolved, That the Senate has heard with deep sensibility the announcement of the death of Hon. EDWARD DEAN COOKE, late a Representative from the State of Illinois.

Resolved, That a committee of five Senators be appointed by the Presiding Officer, to join the committee appointed on the part of the House of Representatives, to attend the funeral of the deceased.

Resolved, That the Secretary communicate these resolutions to the House of Representatives.

And that in compliance with the foregoing the Presiding Officer of the Senate had appointed as the committee Mr. MASON, Mr. SPOONER, Mr. CARTER, Mr. PASCO, and Mr. TURNER.

ORDER OF BUSINESS.

Mr. DINGLEY. Mr. Speaker, I am not aware that there are any matters requiring the attention of the House to-day——

Mr. BAILEY. It is impossible for us to hear what the gentleman says.

Mr. DINGLEY. I say that I am not aware that there are any matters claiming the attention of the House to-day. I move, therefore, that the House do now adjourn.

Mr. BAILEY. As the gentleman from Maine has suggested

there is no business claiming the attention of the House, I take the liberty of saying I know there is. We have the bankruptcy bill and the Cuban resolution, both of which ought to be considered.

The SPEAKER (having put the question on the motion of Mr. DINGLEY). On this question the ayes are 85, the noes 86. [Applause on the Democratic side.]

Mr. DINGLEY. I call for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 97, nays 88, answered "present" 14, not voting 153; as follows:

YEAS—97.

Adams,	Davison, Ky.	Jenkins,	Shannon,
Alexander,	Dingley,	Johnson, Ind.	Shattuc,

So the motion to adjourn was agreed to.

The following pairs were announced:

Until further notice:

Mr. HENRY of Indiana with Mr. MIERS of Indiana.

Mr. PUGH with Mr. RHEA of Kentucky.

Mr. HEMENWAY with Mr. ROBERTSON of Louisiana.

Mr. BROSIUS with Mr. ERMENTROUT.

Mr. KERR with Mr. ROBB.

Mr. KULP with Mr. STALLINGS.

Mr. WHITE of Illinois with Mr. BRENNER of Ohio.

Mr. GROW with Mr. RICHARDSON.

Mr. SAUERHERING with Mr. COWHERD.

Mr. WEYMOUTH with Mr. TAYLOR of Alabama.

Mr. STEWART of Wisconsin with Mr. LITTLE.

Mr. WILLIAM A. STONE with Mr. MCCLELLAN.

Mr. LYBRAND with Mr. LENTZ.

Mr. LOVERING with Mr. WHEELER of Alabama.

Mr. BRUMM with Mr. COX.

Mr. CHICKERING with Mr. BRADLEY.

Mr. FOOTE with Mr. CASTLE.

Mr. HICKS with Mr. OTEY.

Mr. GROUT with Mr. BERRY.

Mr. JOY with Mr. CARMACK.

Mr. HOOKER with Mr. CATCHINGS.

Mr. WRIGHT with Mr. DOCKERY.

Mr. YOUNG of Pennsylvania with Mr. BENTON.

Mr. BARRETT with Mr. FITZGERALD.

Mr. BARROWS with Mr. JETT.

Mr. BELDEN with Mr. SULZER.

Mr. HAWLEY with Mr. SWANSON.

Mr. ACHESON with Mr. WILSON of South Carolina.

Mr. HEATWOLE with Mr. DINSMORE.

Mr. MCCALL with Mr. JONES of Virginia.

Mr. MCEWAN with Mr. VEHSLAGE.

Mr. MILLS with Mr. HOWARD of Georgia.

Mr. MINOR with Mr. SPARKMAN.

Mr. SOUTHARD with Mr. NORTON.

Mr. QUIGG with Mr. BLAND.

Mr. POWERS with Mr. GAINES.

Mr. OTJEN with Mr. LESTER.

Mr. SPALDING with Mr. CLAYTON.

Mr. DE ARMOND with Mr. GILLETT of Massachusetts.

Mr. MCCLEARY with Mr. BANKHEAD.

For this day:

Mr. CLARKE of New Hampshire with Mr. RIXEY.

Mr. BARNEY with Mr. TODD.

Mr. FARIS with Mr. MAGUIRE.

Mr. BINGHAM with Mr. DAVEY.

Mr. HENDERSON with Mr. MCMILLIN.

Mr. ODELL with Mr. BRANTLEY.

Mr. REEVES with Mr. SLAYDEN.

Mr. PARKER with Mr. ELLIOTT.

Mr. TATE. Mr. Speaker, I ask indefinite leave of absence for my colleague from Georgia, Mr. HOWARD, who is now and has been for some time necessarily absent on account of sickness in his family.

There being no objection, leave was granted.

Mr. GAINES. I am paired with the gentleman from Vermont, Judge POWERS. I desire to withdraw my vote and be recorded as present.

Mr. RHEA of Kentucky. I am paired with my colleague, Mr. PUGH. I desire to withdraw my vote and be marked present.

Mr. CARMACK. I wish to know, Mr. Speaker, whether I am recorded as voting.

The SPEAKER. The gentleman is recorded in the negative.

Mr. CARMACK. I desire to withdraw my vote, as I am paired with the gentleman from Missouri, Mr. JOY.

Mr. HENRY of Indiana. I am paired with my colleague, Mr. MIERS. I wish to withdraw my vote, and answer "present."

Mr. RICHARDSON. I am paired with the gentleman from Pennsylvania, Mr. GROW. I voted inadvertently. I desire to withdraw my vote.

EULOGIES ON HON. W. S. HOLMAN.

Pending the announcement of the result of the vote on the motion to adjourn,

Mr. STEELE, by unanimous consent, submitted the following resolution:

Resolved, That Thursday, the 8th day of July, 1897, be set apart for paying a tribute to the memory of Hon. W. S. Holman, late a member of the House of Representatives from the State of Indiana.

The SPEAKER. The Chair desires to say that if this resolution should be adopted, any action of the Committee on Rules will be given precedence. The Chair makes this statement in order that the House may understand the matter now.

The resolution was adopted.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. GREENE, indefinitely, on account of important business.

To Mr. HAMILTON, for ten days, on account of important business.

To Mr. MORRIS, for ten days, on account of important business.

To Mr. FERGUSSON, for two weeks, on account of important business.

The result of the vote was announced as above recorded.

Accordingly (at 12 o'clock and 42 minutes p. m.) the House, in pursuance of the order heretofore adopted, adjourned until Thursday next, at 12 o'clock m.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. CRUMPACKER: A bill (H. R. 3553) to limit the scope of the civil-service act—to the Committee on Reform in the Civil Service.

By Mr. SHAFROTH: A bill (H. R. 3554) to encourage the economical administration of the Government—to the Committee on Ways and Means.

By Mr. HENRY of Mississippi: A bill (H. R. 3555) for improving the Homochitto River, from mouth to Yazoo and Mississippi Railroad, in Mississippi—to the Committee on Rivers and Harbors.

By Mr. HAWLEY: A bill (H. R. 3556) to fix the salary of the collector of customs of the district of Galveston, Tex.—to the Committee on Ways and Means.

By Mr. DAVIS: A bill (H. R. 3557) to provide an American register for the steamer *Jacksonville*—to the Committee on the Merchant Marine and Fisheries.

By Mr. KING: A bill (H. R. 3558) to provide for and to regulate the annexation of the Hawaiian Islands as a Territory of the United States—to the Committee on Foreign Affairs.

By Mr. CRUMPACKER: A joint resolution (H. Res. 69) proposing an amendment to the Constitution respecting the annexation of territory—to the Committee on the Judiciary.

By Mr. HAWLEY: A joint resolution (H. Res. 70) providing for estimate of cost of certain improvements at the mouth of Double Bayou and Galveston Bay, Texas—to the Committee on Rivers and Harbors.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. CANNON: A bill (H. R. 3559) for the relief of Jacob A. Henry—to the Committee on Claims.

By Mr. CUMMINGS: A bill (H. R. 3560) for the relief of James M. Willbur—to the Committee on Claims.

By Mr. DOLLIVER: A bill (H. R. 3561) granting a pension to Margaret Newcomb—to the Committee on Invalid Pensions.

By Mr. FENTON: A bill (H. R. 3562) for the relief of William Davis, of Omega, Ohio—to the Committee on Military Affairs.

Also, a bill (H. R. 3563) for the relief of Andrew J. Duncan, jr., of Mount Joy, Ohio—to the Committee on Military Affairs.

By Mr. FISCHER: A bill (H. R. 3564) to remove the charge of desertion from the military record of Simon Nager—to the Committee on Military Affairs.

By Mr. HAWLEY: A bill (H. R. 3565) to pension Theresa Bonnaveau—to the Committee on Pensions.

By Mr. LACEY: A bill (H. R. 3566) granting a pension to Sarah E. Ward—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3567) to remove the charge of desertion against Gardner Dodge—to the Committee on Military Affairs.

By Mr. McDONALD: A bill (H. R. 3568) to carry out the findings of the Court of Claims in the case of Joseph M. Middlekauff—to the Committee on War Claims.

By Mr. RIDGELY: A bill (H. R. 3569) to remove the charge of desertion against E. A. Brown—to the Committee on Military Affairs.

Also, a bill (H. R. 3570) for the relief of Emanuel Klauser—to the Committee on Military Affairs.

Also, a bill (H. R. 3571) granting a pension to John Loudabarger—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3572) granting a pension to Marcus D. Watson—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3573) granting a pension to George Diehl—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3574) granting a pension to William A. Williford—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3575) to remove the charge of desertion against William T. Grady—to the Committee on Military Affairs.

Also, a bill (H. R. 3576) granting a pension to John Heniff—to the Committee on Pensions.

By Mr. SMITH of Kentucky: A bill (H. R. 3577) to remove the charge of desertion against John B. Perkins—to the Committee on Military Affairs.

Also, a bill (H. R. 3578) granting a pension to James I. McLain—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3579) for the relief of Mary L. Piatt—to the Committee on War Claims.

Also, a bill (H. R. 3580) granting a pension to Thomas J. Daniel—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3581) granting a pension to Cynthia A. Middleton—to the Committee on Invalid Pensions.

By Mr. SAMUEL W. SMITH: A bill (H. R. 3582) granting a pension to Alvin D. Hubbard—to the Committee on Invalid Pensions.

By Mr. SNOVER: A bill (H. R. 3583) for the relief of David Laufier—to the Committee on Military Affairs.

Also, a bill (H. R. 3584) for the relief of Darius Covey—to the Committee on Military Affairs.

By Mr. WEYMOUTH: A bill (H. R. 3585) to restore William F. Peck to the rolls of the Navy, and to grant him an honorable discharge—to the Committee on Naval Affairs.

By Mr. ZENOR: A bill (H. R. 3586) granting a pension to Henry Graybrook, of the city of New Albany, Ind.—to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ACHESON: Sundry petitions of Henry G. Sargent, Harvey Crumrine, and other citizens of Fredericktown, Pa., and vicinity; Solomon Lipsley and others, of Connellsville, Pa.; W. H. Lynn and others, of Vanderbilt, Pa.; S. E. Williams and others, of Moyer, Pa., praying for the passage of an act to further restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. ADAMS: Petition of sundry tea merchants of the city of Philadelphia, Pa., favoring a specific duty on tea—to the Committee on Ways and Means.

By Mr. DOLLIVER: Paper to accompany House bill granting a pension to Margaret Newcomb—to the Committee on Invalid Pensions.

By Mr. FISCHER: Paper to accompany House bill to remove the charge of desertion standing against Simon Nager—to the Committee on Military Affairs.

By Mr. HENRY of Indiana: Resolutions adopted by the Winter Wheat Millers' League, favoring a reciprocity treaty for the extension of trade; also requesting that burlaps, burlap bags, and bolting cloth be placed on the free list—to the Committee on Ways and Means.

By Mr. HITT: Resolutions adopted at the Thirty-first Annual Encampment of the Department of Illinois, Grand Army of the Republic, held at Galesburg, Ill., May 5 and 6, 1897, indorsing the bill to establish a national military park to commemorate the campaign, siege, and defense of Vicksburg—to the Committee on Military Affairs.

Also, resolution of the Thirty-first Annual Encampment, Department of Illinois, Grand Army of the Republic, praying for an amendment of the invalid pension laws, so that it shall not be required of the widow and children of a deceased soldier to prove that he died of a disability contracted in the service and line of duty—to the Committee on Invalid Pensions.

By Mr. HOWELL: Petition of 33 citizens of New Brunswick, N. J., in relation to the restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. KNOX: Petition of Frank C. Adams and 72 other citizens of Lowell, Mass., praying for protective-tariff legislation at the earliest possible date—to the Committee on Ways and Means.

By Mr. LACEY: Paper to accompany House bill No. 9878, granting a pension to Sarah C. Ward—to the Committee on Invalid Pensions.

By Mr. McALEER: Petition of officers and members of 46 labor organizations in the lithographic trade, praying for protection against foreign competition—to the Committee on Ways and Means.

Also, petition of the Philadelphia Tobacco Board of Trade, protesting against the tariff schedule on leaf tobacco—to the Committee on Ways and Means.

Also, petition of the Tobacco Board of Trade of Baltimore, Md., on behalf of 300,000 people, protesting against the tobacco schedule of the Dingley tariff bill—to the Committee on Ways and Means.

Also, petition of Vetterlein Bros., of Philadelphia, Pa., remonstrating against that portion of Schedule F in the Dingley bill

relating to imported tobacco used for cigar purposes—to the Committee on Ways and Means

Also, protest of Cigar Makers' International Union, against the enactments of the Dingley bill increasing the duty on cigar fillers and wrappers—to the Committee on Ways and Means.

Also, a petition of Frank Teller & Co., of Philadelphia, Pa., protesting against a duty in the Dingley bill of $2 per pound on cigar wrappers and 70 cents per pound on Habana fillers—to the Committee on Ways and Means.

Also, protests of A. Newman & Co., Frank D. Weylman & Co., National Morocco Association, and George H. West & Sons, against a duty on goatskins and morocco—to the Committee on Ways and Means.

Also, petition of E. Clinton & Co., asking that the duty on dressed bristles remain as at present—to the Committee on Ways and Means.

Also, petition of E. Wilkinson & Co., of Philadelphia, remonstrating against an increased duty on onions—to the Committee on Ways and Means.

Also, petition of Elder Jenkins, of Philadelphia, protesting against the omission of bristles from Schedule N in the proposed tariff bill—to the Committee on Ways and Means.

Also, remonstrance of Lawford Bros., of Baltimore, Md., against a duty on sheep dip—to the Committee on Ways and Means.

Also, petition of A. G. Elliott & Co., of Philadelphia, asking for reduction of duty on paper—to the Committee on Ways and Means.

Also, petition of hop merchants of the city of New York, protesting against increase of duty on hops—to the Committee on Ways and Means.

Also, protest of Reeves, Parvin & Co., of Philadelphia, against the discontinuance of rebate on canned goods—to the Committee on Ways and Means.

Also, resolution of the Board of Managers of the Trades League of the city of Philadelphia, comprising 2,000 members, protesting against the repeal of the act of Congress of 1883 known as the civil-service law—to the Committee on Reform in the Civil Service.

Also, protest of the Merchant Tailors' Exchange of Pittsburg, Pa., against the allowance of $100 to tourists in their purchase of goods abroad—to the Committee on Ways and Means.

Also, petition of tea merchants of Philadelphia, favoring a specific duty on tea—to the Committee on Ways and Means.

Also, protest of Frank H. Fleer & Co., of Philadelphia, against increasing the duty on gum chicle—to the Committee on Ways and Means.

Also, petition of Russell Thayer, of Philadelphia, favoring increased duty on high-grade machinery—to the Committee on Ways and Means.

Also, petition of Thomas Sparks & Co., of Philadelphia, in favor of a higher duty on shot—to the Committee on Ways and Means.

Also, petition of Robert Latimer & Co., of Philadelphia, protesting against any change in the duty on bolting cloth for millers' purposes—to the Committee on Ways and Means.

Also, petition of Charles F. Heizel, on behalf of the Fruit Importers' Union of New York, protesting against prohibitory duty on oranges, lemons, etc., as set forth in Schedule G—to the Committee on Ways and Means.

Also, remonstrance of Francis D. Moulton & Co., salt manufacturers, of New York City, against a duty on salt—to the Committee on Ways and Means.

Also, remonstrance of E. R. Warrington & Co., of Philadelphia, against an increase of duty on muriate of ammonia or sal ammoniac—to the Committee on Ways and Means.

By Mr. MERCER: Resolutions of the Nebraska Beet Sugar Association, in favor of the passage of the Dingley tariff bill—to the Committee on Ways and Means.

Also, resolution of the Commercial Club of Omaha, Nebr., favoring the passage of Senate bill No. 1, relating to American merchant marine—to the Committee on the Merchant Marine and Fisheries.

By Mr. SHUFORD: Petition of T. H. Hathcock, mayor of Norwood, N. C., and 579 other citizens of Norwood and vicinity, favoring the passage of Senate resolution giving belligerent rights to suffering Cuba—to the Committee on Foreign Affairs.

By Mr. ZENOR: Papers to accompany House bill No. 1034, for the relief of William H. Byrum—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 3119, for the relief of Capt. Andrew P. Batson—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 3549, granting a pension to John Hammond—to the Committee on Invalid Pensions.

Also, paper to accompany House bill No. 3550, granting a pension to Martha Brisco, widow of late Capt. Andrew J. Brisco—to the Committee on Invalid Pensions.

Also, papers to accompany House bill No. 3552, granting a pension to John W. Daugherty—to the Committee on Invalid Pensions.

SENATE.

TUESDAY, *June 29, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. QUAY, and by unanimous consent, the further reading was dispensed with.

PORT OF FERNANDINA, FLA.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in response to concurrent resolution of May 26, 1897, a letter from the Chief of Engineers, together with a report of Capt. O. M. Carter, Corps of Engineers, relative to the present condition of the harbor of Cumberland Sound, and the action necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina; which, with the accompanying papers, was referred to the Committee on Commerce, and ordered to be printed.

NORTHERN LIBERTY MARKET CLAIMS.

The VICE-PRESIDENT laid before the Senate a communication from the Commissioners of the District of Columbia, transmitting, in response to a resolution of the 21st instant, certain information relative to the payment of certain claims against the District of Columbia by drawback certificates; which, with the accompanying papers, was referred to the Committee on the District of Columbia, and ordered to be printed.

Mr. COCKRELL. I ask that a special order be made for the immediate printing of that communication.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

PETITIONS AND MEMORIALS.

Mr. BURROWS presented petitions of C. W. Martin and 43 other citizens of Gratiot County, of S. W. Howard and 140 other citizens of Belding, of H. J. Milbourn and 33 other citizens of Eaton Rapids, I. L. H. Dodd and 12 other citizens of Buchanan, William Sickles and 23 other citizens of Sickles, and of E. A. Winton and 45 other citizens of Ithaca, all in the State of Michigan, praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

Mr. BURROWS. I present sundry memorials signed by the presidents and secretaries of various labor organizations in the State of Michigan, remonstrating against the passage of Senate bill No. 1575, or any similar measure, aimed to prevent ticket brokerage or the disposing of railway tickets by anyone except the duly authorized agents of the railways. I move that the memorials be referred to the Committee on Interstate Commerce.

Mr. CHANDLER. I should like to ask the Senator from Michigan a question. To what extent have the labor organizations of his State united in these memorials?

Mr. BURROWS. Running over the list, I should judge that pretty generally the entire labor organizations of the State remonstrate against the passage of the bill.

Mr. CHANDLER. Can the Senator state about how many?

Mr. BURROWS. I have not the number now in mind. I think the papers disclose the fact.

The VICE-PRESIDENT. The memorials will be referred to the Committee on Interstate Commerce.

Mr. FAIRBANKS presented a petition of sundry citizens of Indianapolis, Ind., and a petition of George Searing and 25 other citizens of Lima, Ind., praying for the enactment of protective-tariff legislation, at the earliest possible date, such as will adequately secure American industrial products against the competition of foreign labor; which were ordered to lie on the table.

He also presented sundry memorials of citizens of Indiana, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. MALLORY presented a memorial of Cigar Makers' Union No. 29, of Jacksonville, Fla., remonstrating against the adoption of the tobacco schedule in the pending tariff bill; which was ordered to lie on the table.

Mr. WETMORE presented a petition of the Episcopal clergy of Rhode Island, praying for the ratification of an arbitration treaty between the United States and Great Britain; which was referred to the Committee on Foreign Relations.

He also presented petitions of 1,000 citizens of Providence, R. I., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

Mr. CULLOM presented a petition of the Department of Illinois, Grand Army of the Republic, of Galesburg, Ill., praying for the establishment of a national military park to commemorate the

siege and defense of Vicksburg; which was referred to the Committee on Military Affairs.

He also presented a petition of the Department of Illinois, Grand Army of the Republic, of Galesburg, Ill., praying for the adoption of certain amendments to the invalid pension law; which was referred to the Committee on Pensions.

Mr. MORRILL presented a memorial numerously signed by citizens of Hartford, Vt., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. CHILTON presented a petition of sundry citizens of Rockport, Tex., praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

Mr. McMILLAN presented a memorial of the Trades and Labor Council, of Kalamazoo, Mich., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

He also presented a petition of the common council of Detroit, Mich., praying for the early passage of the so-called Cullom bill for the regulation of the Interstate Commerce Commission; which was referred to the Committee on Interstate Commerce.

Mr. TURPIE presented a memorial of Local Union No. 308, Cigar Makers' International Union of America, of Muncie, Ind., remonstrating against the proposed increase of the tax on cigars and tobacco; which was referred to the Committee on Finance.

Mr. QUAY presented a petition of the general assembly of Pennsylvania, praying that an appropriation be made providing for an exhibit by the United States to the Paris Exposition in 1900; which was read, and ordered to lie on the table, as follows:

IN THE HOUSE OF REPRESENTATIVES, *June 16, 1897.*

"Whereas the Republic of France more than two years ago invited the people of the United States to officially participate in the Paris Exposition of 1900; and

"Whereas the French Republic has at great expense been officially represented at the two international expositions heretofore held in the United States, the first of which was the centennial celebration of the independence of this nation, and was held in and under the auspices of the State of Pennsylvania: Therefore,

"*Resolved (if the senate concur)*, That the Senators and Representatives in Congress from the State of Pennsylvania are respectfully requested to aid, by their votes and influence, an appropriation sufficient to insure a dignified and creditable exhibit of the industries and resources of the United States at the Paris Exposition of 1900."

Extract from the journal.

JERE B. REX,
Chief Clerk of the House of Representatives.

In the senate, June 16, 1897.

E. W. SMILEY,
Chief Clerk of the Senate.

Approved the 19th day of June, A. D. 1897.

DANIEL H. HASTINGS.

Mr. BAKER presented the affidavit of Charles A. Craig, to accompany the bill (S. 1930) granting a pension to C. A. Craig, of Smith Center, Kans.; which was referred to the Committee on Pensions.

REPORTS OF COMMITTEES.

Mr. GALLINGER, from the Committee on Pensions, to whom was referred the bill (S. 1297) for the relief of John P. Leitzell, asked to be discharged from its further consideration and that it be referred to the Committee on Military Affairs; which was agreed to.

Mr. GALLINGER. I am directed by the Committee on Pensions, to whom were referred sundry bills, to report them adversely.

Mr. ALLEN. I think the name of the Senator introducing the bill should be stated, so that we may know who introduced the bills as they are read by title.

The VICE-PRESIDENT. The suggestion of the Senator from Nebraska will be adopted.

Mr. GALLINGER. What is the suggestion?

Mr. ALLEN. That the names of the introducers of the bills be stated as the titles are read at the desk, so that we may be notified.

Mr. GALLINGER. Oh, certainly.

On the following bills, Mr. GALLINGER submitted adverse reports, which were agreed to, and the bills were postponed indefinitely:

A bill (S. 1420) granting a pension to Frederick A. Driscol (introduced by Mr. WOLCOTT);

A bill (S. 755) granting an increase of pension to Adelaide Morris (introduced by Mr. GRAY);

A bill (S. 905) granting a pension to Hans Johnson (introduced by Mr. DAVIS);

A bill (S. 888) to grant a pension to Charlotte O. Van Cleve, widow of Gen. Horatio P. Van Cleve (introduced by Mr. DAVIS);

A bill (S. 572) granting an increase of pension to Elizabeth D. Marthon, widow of Lieut. Commander Joseph Marthon (introduced by Mr. HOAR);

A bill (S. 894) granting a pension to William Brown (introduced by Mr. DAVIS);

A bill (S. 188) granting an increase of pension to Mary E. Hazlip (introduced by Mr. THURSTON);

A bill (S. 597) to pension Frances E. Wickware (introduced by Mr. GEAR);

A bill (S. 900) granting a pension to Neil McNeil (introduced by Mr. DAVIS); and

A bill (S. 899) granting a pension to Sarah E. Boyd (introduced by Mr. DAVIS).

Mr. GALLINGER. I have a large number of favorable reports from the same committee, and I desire to make a very brief statement before presenting them.

The Committee on Pensions had its first meeting this morning, and it was decided to report back favorably all bills that had had affirmative action either by the committee or by one or both Houses of Congress at some former session, but which had not become laws; and the reports which I shall now present, and that other members of the committee will present this morning, are of that nature; they have been favorably acted upon previously either by the Committee on Pensions of the Senate or by one or both Houses of Congress.

I desire to state to Senators that the committee have decided not to take up at the present session any new bills, but to allow those to go over until the regular session in December next.

First, I present favorable reports on three general pension bills which have formerly been favorably acted upon.

The following bills Mr. GALLINGER reported severally without amendment, and submitted reports thereon:

A bill (S. 503) to amend section 3 of an act entitled "An act granting pensions to soldiers and sailors who are incapacitated for the performance of manual labor, and providing for pensions to widows, minor children, and dependent parents," approved June 27, 1890;

A bill (S. 494) to supplement the act of June 27, 1890, as to pensions; and

A bill (S. 488) defining and regulating proof in certain pension cases.

Mr. GALLINGER. From the same committee I report back favorably the private pension bills which I send to the desk to be read by title.

Mr. HOAR. To read the titles is to read a mere list of names of the beneficiaries of bills which have been acted on favorably. I suggest that they take their proper disposition without reading.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and that will be the order.

Mr. MITCHELL. I have sundry reports to present from the Committee on Pensions.

Mr. HOAR. I make the same request as to those bills.

Mr. GALLINGER. While I consented in private conversation to the suggestion of the Senator from Massachusetts, I desire to call his attention to the fact that having the reports placed on the Calendar without the titles being read may lead to confusion. I understand that the Reporters find it impossible to keep their records correct, and perhaps the clerks to keep theirs with accuracy, unless the titles are read at the desk. Although it will take a little time, I think it would be better not to deviate from our usual custom, and that the titles of the bills should be stated. I think the Senator from Massachusetts will concur in that suggestion.

Mr. HOAR. I withdraw the request, Mr. President.

The following bills Mr. GALLINGER reported severally without amendment, and submitted reports thereon:

A bill (S. 1462) granting a pension to Enoch G. Adams;

A bill (S. 1702) granting an increase of pension to Nancy G. Allabach;

A bill (S. 1581) granting a pension to Mary W. C. Burgess;

A bill (S. 485) granting a pension to Mrs. Martha Frank;

A bill (S. 501) granting an increase of pension to Charles D. Hanscom;

A bill (S. 487) granting a pension to Delia Gilman;

A bill (S. 499) granting a pension to Sarah R. Frary;

A bill (S. 496) granting a pension to Simpson Everett Stilwell;

A bill (S. 482) to increase the pension of Margaret Custer Calhoun;

A bill (S. 492) granting a pension to Ella D. Cross;

A bill (S. 483) granting an increase of pension to Caroline B. Bradford;

A bill (S. 489) granting an increase of pension to William A. Beckford;

A bill (S. 497) granting an increase of pension to Betsey B. Olin;

A bill (S. 500) granting a pension to Francis H. Staples;

A bill (S. 1890) granting an increase of pension to Benjamin F. Tuck;
A bill (S. 505) granting an increase of pension to Edward F. Adams;
A bill (S. 1111) granting an increase of pension to Joseph V. Bowie;
A bill (S. 493) granting a pension to Mary A. Wise;
A bill (S. 506) granting an increase of pension to Daniel G. George;
A bill (S. 942) granting a pension to Louise Van Atter;
A bill (S. 502) granting a pension to Rebecca P. Quint;
A bill (S. 2100) granting a pension to Hepza Hobson Werden;
A bill (S. 619) to increase the pension of William N. Wells;
A bill (S. 1110) granting an increase of pension to Samuel E. Liscom;
A bill (S. 486) granting a pension to Mary M. Macauley, widow of the late Brig. Gen. Daniel Macauley, United States Volunteers;
A bill (S. 491) to pension Thomas F. Leahy;
A bill (S. 495) granting a pension to Plumy E. Marden;
A bill (S. 1704) to increase the pension of Mrs. Helen A. De Russy;
A bill (S. 670) granting a pension to Mrs. Marietta Hayes;
A bill (S. 1320) granting a pension to Sophia J. Chilcott;
A bill (S. 1317) to increase the pension of Arabella V. Washburn;
A bill (S. 1318) granting a pension to Celesthia A. Whitney;
A bill (S. 1321) granting a pension to Emily E. Atherton; and
A bill (S. 1023) granting a pension to Jane L. Buckingham.

Mr. GALLINGER, from the Committee on Pensions, to whom were referred the following bills, reported them severally with an amendment, and submitted reports thereon:
A bill (S. 943) granting a pension to Jane B. Johnston;
A bill (S. 504) granting an increase of pension to Mrs. Christine C. Barnard;
A bill (S. 508) granting an increase of pension to John H. Sanborn;
A bill (S. 484) granting an increase of pension to Carlton W. Muzzy;
A bill (S. 618) granting a pension to Philip T. Greely;
A bill (S. 116) granting a pension to W. L. Faxon;
A bill (S. 1118) granting an increase of pension to Mary E. Chamberlin;
A bill (S. 1751) granting a pension to Moses M. Crants; and
A bill (S. 666) granting an increase of pension to William H. Morgan.

Mr. GALLINGER, from the Committee on Pensions, to whom were referred the following bills, reported them severally with amendments, and submitted reports thereon:
A bill (S. 941) granting a pension to Mary Stewart Lasselle; and
A bill (S. 507) restoring to the pension roll the name of Lucia A. Hynes.

Mr. MITCHELL, from the Committee on Pensions, to whom was referred the bill (S. 1090) to pension Mrs. Susan M. Sessford, reported it with an amendment, and submitted a report thereon.

He also, from the same committee, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:
A bill (S. 1089) granting a pension to Harriet Clarissa Mercur, widow of James Mercur, late professor of civil and military engineering in the United States Military Academy at West Point, N. Y.;
A bill (S. 1088) granting a pension to Mrs. Frances C. De Russy;
A bill (S. 1087) to increase the pension of Mrs. Elizabeth S. Roberts, widow of the late Gen. Benjamin S. Roberts, United States Army;
A bill (S. 1887) granting an increase of pension to Russell R. King;
A bill (S. 959) to increase the pension of Capt. Isaac D. Toll;
A bill (S. 1453) granting an increase of pension to Henry Wilson; and
A bill (S. 1733) granting a pension to Frances M. Roberts.

Mr. BAKER, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:
A bill (S. 732) granting an increase of pension to William H. H. Wright, of McPherson, Kans.;
A bill (S. 1075) granting an increase of pension to Edward Stanley;
A bill (S. 734) granting an increase of pension to Jackson Osborn;
A bill (S. 733) granting an increase of pension to Jacob Saladin;
A bill (S. 1361) granting an increase of pension to John N. Landon, of Leavenworth, Kans.;
A bill (S. 731) granting a pension to Elender Herring, of Elsmore, Kans.;
A bill (S. 728) granting a pension to John F. Hathaway;
A bill (S. 1209) granting an increase of pension to Maj. John H Gearkee;
A bill (S. 1363) granting an increase of pension to Alvah A. Eaton;
A bill (S. 730) granting an increase of pension to John N. Corgan, of McPherson, Kans.;
A bill (S. 1362) granting a pension to Charles Williamson;
A bill (S. 1076) granting an increase of pension to Allen Buckner, of Baldwin, Kans.;
A bill (S. 2280) granting a pension to Andrew M. Callaham;
A bill (S. 301) to increase the pension of Edmund Woog;
A bill (S. 304) granting a pension to Henry Farmer;
A bill (S. 948) granting a pension to Joseph M. Waddell;
A bill (S. 302) granting a pension to Ambrose J. Vanarsdel;
A bill (S. 310) granting a pension to Johnson Hays;
A bill (S. 949) granting a pension to Levi R. Long; and
A bill (S. 950) granting a pension to Ann King, widow of Samuel King, deceased.

Mr. BAKER, from the Committee on Pensions, to whom was referred the bill (S. 294) granting increase of pension to John J. Boatwright, reported it with an amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 769) to increase the pension of Clark W. Harrington, late sergeant of Company I, Ninety-third New York Infantry, reported it with amendments, and submitted a report thereon.

Mr. SHOUP, from the Committee on Pensions, to whom were referred the following bills, reported them severally with an amendment, and submitted reports thereon:
A bill (S. 126) granting an increase of pension to Henry B. Conway;
A bill (S. 637) granting an increase of pension to Oliver P. Silvey;
A bill (S. 859) granting a pension to Josephine I. Offley; and
A bill (S. 862) granting a pension to Mary A. Benjamin.

Mr. SHOUP, from the Committee on Pensions, to whom was referred the bill (S. 858) granting a pension to Cornelia De Peyster Black, reported it with amendments, and submitted a report thereon.

He also, from the same committee, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:
A bill (S. 856) granting a pension to Margaret Rowsell;
A bill (S. 125) granting an increase of pension to George W. Palmer; and
A bill (S. 638) granting a pension to Nellie L. Groshon.

Mr. PRITCHARD, from the Committee on Pensions, to whom were referred the following bills, reported them severally with an amendment, and submitted reports thereon:
A bill (S. 1836) granting an increase of pension to John McGrath;
A bill (S. 1518) to increase the pension of Martha M. McCall, widow of William Wallace McCall, a soldier of the Mexican war;
A bill (S. 1829) granting an increase of pension to James H. Kile; and
A bill (S. 1826) granting an increase of pension to Mrs. Jane L. Fagg, widow of Col. John A. Fagg.

Mr. PRITCHARD, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:
A bill (S. 934) granting an increase of pension to Napoleon B. Breedlove;
A bill (S. 522) granting an increase of pension to John S. Hall;
A bill (S. 1837) granting a pension to Sarah E. Cotton;
A bill (S. 1822) granting a pension to Silas B. Hensley; and
A bill (S. 1825) granting an increase of pension to Robert P. Wild.

Mr. KENNEY, from the Committee on Pensions, to whom was referred the bill (S. 655) granting a pension to Harriet R. Matlack, reported it with an amendment, and submitted a report thereon.

He also, from the same committee, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:
A bill (S. 654) granting an increase of pension to Caleb M. Wright;
A bill (S. 651) for the relief of Eugenia Wood;
A bill (S. 657) to increase the pension of George W. Smith, late a captain, Seventh Regiment New Jersey Infantry Volunteers;
A bill (S. 649) to grant a pension to Emeline C. Sewell, widow of Chief Engineer George Sewell, United States Navy;
A bill (S. 449) granting an increase of pension to Mrs. Christine C. Barnard;
A bill (S. 1200) granting a pension to Miss Mary Hayne;
A bill (S. 1866) granting a pension to Mrs. Martha L. Bohannon, of Lynchburg, Va.; and
A bill (S. 1202) to increase the pension of Emily M. Tyler.

Mr. ROACH, from the Committee on Pensions, to whom were

referred the following bills, reported them severally with an amendment, and submitted reports thereon:

A bill (S. 76) granting a pension to Alice V. Cook, of St. Paul, Nebr., invalid daughter of John Y. Cook, deceased, late of Company D, Eighth Regiment Kansas Volunteer Infantry; and

A bill (S. 73) granting a pension to William L. Grigsby, of Belvidere, in the county of Thayer, Nebr.

Mr. ROACH, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 963) granting a pension to Nathan Mitchell;

A bill (S. 962) granting a pension to Riley W. Pierce;

A bill (S. 692) for the relief of Abner Abercrombie;

A bill (S. 1466) granting an increase of pension to Ransom S. Angell, late private of Company G, First Regiment Wisconsin Cavalry;

A bill (S. 1465) granting an increase of pension to Daniel Phillips;

A bill (S. 342) granting an increase of pension to Jerusha Sturgis, widow of Brig. Gen. Samuel D. Sturgis;

A bill (S. 71) granting a pension to Alfred Bigelow, of Norfolk, in the State of Nebraska;

A bill (S. 180) increasing the pension of Celia A. Jeffers to the sum of $30 per month;

A bill (S. 179) granting a pension to Mary F. Hawley;

A bill (S. 184) granting a pension to Catherine E. O'Brien;

A bill (S. 178) granting a pension to Susan A. Paddock;

A bill (S. 186) granting an increase of pension to Franklin C. Plantz;

A bill (S. 169) granting an increase of pension to James M. Simeral;

A bill (S. 181) granting a pension to Mrs. Hattie E. Redfield, of Omaha, Nebr.;

A bill (S. 166) granting an increase of pension to Samuel A. Smith;

A bill (S. 1521) granting a pension to Sarah M. Spyker; and

A bill (S. 182) granting a pension to Hiram H. Palmer.

Mr. SHOUP (for Mr. CANNON), from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 151) granting an increase of pension to George W. Walton;

A bill (S. 152) to increase the pension of Esther Brown;

A bill (S. 1869) granting a pension to Catherine A. Bradley;

A bill (S. 1375) granting a pension to James W. Whitney;

A bill (S. 1422) granting an increase of pension to Abraham Rhodes;

A bill (S. 1384) granting a pension to Jackson Lucas;

A bill (S. 1379) granting a pension to Simon D. Kohl;

A bill (S. 1373) granting an increase of pension to Jacob P. Fletcher;

A bill (S. 1417) granting an increase of pension to Sarah L. Hivey;

A bill (S. 1378) granting a pension to William F. Gowdy;

A bill (S. 1387) to increase the pension of Michael Carron;

A bill (S. 709) to increase the pension of Wesley C. Sawyer;

A bill (S. 1237) granting an increase of pension to Mrs. Arethusa Wright, of Sheridan, Oreg.;

A bill (S. 1238) granting a pension to Catherine L. Nixon;

A bill (S. 1115) for the relief of Margaret C. McKay, widow of the late Dr. William C. McKay, of Oregon;

A bill (S. 1154) for the relief of George Hughes, of Portland, Oreg.;

A bill (S. 104) to increase the pension of Lucretia C. Waring;

A bill (S. 2209) granting an increase of pension to Samantha Barnes;

A bill (S. 2225) granting a pension to John G. B. Masters;

A bill (S. 2224) granting a pension to James Byrne;

A bill (S. 2228) granting a pension to James G. Hartzell; and

A bill (S. 2219) granting a pension to Thomas Madden.

Mr. SHOUP (for Mr. CANNON), from the Committee on Pensions, to whom were referred the following bills, reported them severally with an amendment, and submitted reports thereon:

A bill (S. 2214) granting an increase of pension to Mrs. Kate Ezekiel;

A bill (S. 1372) granting a pension to George D. Noble;

A bill (S. 1424) granting a pension to Richard T. Seltzer;

A bill (S. 2220) granting an increase of pension to Charles F. Holly;

A bill (S. 2213) granting an increase of pension to Mrs. Cornelia I. Skiles;

A bill (S. 2210) granting an increase of pension to Helen L. Dent;

A bill (S. 2248) granting a pension to Charles A. Hutchings; and

A bill (S. 2247) granting a pension to Charles E. Mann.

Mr. SHOUP (for Mr. CANNON), from the Committee on Pensions, to whom were referred the following bills, reported them severally with amendments, and submitted reports thereon:

A bill (S. 1155) granting a pension to P. F. Castleman, of Oregon;

A bill (S. 1430) granting a pension to George E. Tuttle; and

A bill (S. 2217) granting a pension to Aaron B. Page.

Mr. SHOUP (for Mr HANSBROUGH), from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 1450) granting a pension to Catherine Leary;

A bill (S. 1476) granting a pension to Louise M. Rice, widow of Bvt. Maj. Gen. Samuel A. Rice;

A bill (S. 1474) granting a pension to John G. Powers;

A bill (S. 1473) granting a pension to Oscar A. Palmer;

A bill (S. 1477) granting a pension to Joseph Porter;

A bill (S. 897) granting a pension to Julia D. Richardson;

A bill (S. 603) granting a pension to Clarissa E. Hobbs; and

A bill (S. 157) to increase the pension of Gen. James W. McMillan.

Mr. SHOUP (for Mr. HANSBROUGH), from the Committee on Pensions, to whom was referred the bill (S. 1475) granting a pension to Elijah N. Parkhurst, reported it with an amendment, and submitted a report thereon.

Mr. LINDSAY, from the Committee on Pensions, to whom was referred the bill (S. 1119) granting a pension to Cassius M. Clay, sr., a citizen of Kentucky and a major-general in the Army of the United States in the war of the rebellion, reported it with an amendment, and submitted a report thereon.

He also, from the same committee, to whom were referred the following bills, reported them severally without amendments, and submitted reports thereon:

A bill (S. 383) granting an increase of pension to William W. Tumblin, of Bradford County, Fla.;

A bill (S. 1034) for the relief of James Eganson, of Henderson, Ky.;

A bill (S. 1334) granting a pension to William J. Murray; and

A bill (S. 385) granting a pension to Mrs. Selena McKay, of Suwanee County, Fla.

Mr. MORGAN. I desire to make an inquiry about the reports which have just been made. There seems to be a flood of pension bills coming on the Senate this morning. I have no doubt that they are all meritorious and that the beneficiaries must be very much in need of what the Government owes them for services rendered to the country in great extremity. We are here engaged in trying to prepare a bill that the gentlemen on the other side of the Chamber say is going to make a large redundancy of money so that we can pay them off. That bill will probably pass the Senate during the present week and pass Congress during the coming week, and we shall have money in the Treasury, and money to burn, for that matter.

I have been considering, as I heard this great array of reports presented to the Senate and read, whether there was any possibility of getting legislation on the subject at the present session of Congress. I would be perfectly willing to stay here and pass those pension bills, but the Congress of the United States is not in a condition to pass the bills, and these men must go without these rewards until somebody consents that the Congress of the United States may proceed in regular order.

I therefore move that the consideration of these bills be postponed until the Wednesday after the first Monday in December next, and that they be made a special order for that day, in view of the fact that they can not possibly get any action before that time.

Mr. GALLINGER. If the Senator will permit me, I will state that I made a statement before he entered the Chamber to the effect that these bills, which have been reported favorably, are bills that had affirmative action by the Senate, or at least by the Committee on Pensions of the Senate, in some former Congress, but failed to become laws for one reason or other. Many of them were acted upon by the Senate and not by the House; some were acted upon by both branches of Congress affirmatively, and the President did not veto them nor did he give them his approval.

I trust the Senator will not insist upon that motion. The Committee on Pensions will not urge the consideration of these bills. It was desirable that they should go on the Calendar at some time, and the committee are quite content to have them remain on the Calendar, if any individual Senator so desires, until the regular meeting of Congress in December next.

Mr. MORGAN. I have no doubt that the committee, very vigilant, very active, and very patriotic, are willing and anxious to keep up appearances about this matter, and they make these reports here as if Congress now had the opportunity or the liberty of passing one of the bills. We know that Congress has neither the opportunity nor the liberty to pass one of the bills. Congress is not actually in session now. The lawyers of this country will look up the subject, and they will present it to the courts, and there is going to be a great deal of trouble over the question as to whether Congress is actually in session. In order to smooth the

way for the consideration of these demands upon the Government of this patriotic character, I think it is my duty to insist on the motion that we shall not consider the bills at the present session of Congress.

Mr. GALLINGER. I make the point of order, first, that the Senator from Alabama can not make a motion to postpone the consideration of a bill until it is before the Senate for consideration; and secondly, that the Senator can not make a motion to postpone a large number of bills without individualizing them and making his motion touching each of them.

Mr. MORGAN. Allow me to say, Mr. President, that I expected, if my motion was ruled to be in order, to divide it up and make the motion applicable to each one of these measures as it has been reported here, I do not know how many there are—fifty-odd, I suppose. But I would even take the time out of the consideration of the tariff bill to do that in order to give these men some satisfaction by learning that we were doing something more than merely mocking them by reporting bills which we knew could not pass.

I believe that the point of order made by the Senator from New Hampshire as to my right at this moment to move to postpone consideration is well taken. It did not occur to me at the time, because I was anxious to do it. But I shall take occasion again at some proper opportunity which involves the question of order and progress in business to bring this subject back to the attention of the Senate.

Mr. FAULKNER, from the Committee on the District of Columbia, to whom was referred the bill (S. 916) in relation to taxes and tax sales in the District of Columbia, reported it with an amendment.

Mr. WARREN, from the Committee on Claims, to whom was referred the bill (S. 1311) to refund certain import duties, reported it without amendment, and submitted a report thereon.

Mr. CLARK, from the Committee on the Judiciary, to whom was referred the bill (S. 162) to amend an act entitled "An act to provide for holding terms of court in the district of Montana," approved July 20, 1892, reported it with amendments.

BILLS INTRODUCED.

Mr. McMILLAN introduced a bill (S. 2296) concerning land titles in the District of Columbia; which was read twice by its title, and referred to the Committee on the District of Columbia.

Mr. FORAKER introduced a bill (S. 2297) for the relief of Henry Halteman; which was read twice by its title, and referred to the Committee on Military Affairs.

He also introduced a bill (S. 2298) for the relief of L. O. Maddux, doing business as Maddux, Hobart & Co.; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Finance.

He also introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Pensions:

A bill (S. 2299) granting a pension to Caroline A. Slocum;

A bill (S. 2300) granting a pension to James W. Miller;

A bill (S. 2301) granting an increase of pension to Andrew T. Bovard;

A bill (S. 2302) granting a pension to Mrs. Augusta E. Kellogg; and

A bill (S. 2303) granting a pension to Martha M. Harrier.

Mr. ALLEN introduced a bill (S. 2304) granting an increase of pension to Granville R. Turner, of Bluesprings, Nebr.; which was read twice by its title, and referred to the Committee on Pensions.

Mr. BURROWS introduced a bill (S. 2305) granting a pension to Maria Somerlat, widow of Valentine Somerlat; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Pensions.

He also introduced a bill (S. 2306) granting an increase of pension to Elvira Ellen Baxter; which was read twice by its title, and referred to the Committee on Pensions.

Mr. BAKER introduced a bill (S. 2307) for the relief of William H. Wilson; which was read twice by its title, and, with the accompanying paper, referred to the Committee on Military Affairs.

Mr. GRAY introduced a bill (S. 2308) to assist in the development of the Territory of Alaska, and to secure better transportation for mails therein; which was read twice by its title, and referred to the Committee on Territories.

GRAND ARMY ENCAMPMENT AT LEAVENWORTH, KANS.

Mr. BAKER. I introduce a joint resolution and request its immediate consideration.

The joint resolution (S. R. 53) directing the Secretary of War to issue tents for the use of the Grand Army Encampment, at Leavenworth, Kans., was read the first time by its title and the second time at length, as follows:

Joint resolution directing the Secretary of War to issue tents for the use of the Grand Army encampment at Leavenworth, Kans.

Resolved, That the Secretary of War be, and he is hereby, directed to issue, for the use of the Grand Army encampment for the State of Kansas, to be held at Fort Leavenworth and Leavenworth City, in said State, from October 11 to October 16, 1897, both days inclusive, 1,000 tents, or so many thereof as may be necessary for such purpose.

The VICE-PRESIDENT. The Senator from Kansas asks for the immediate consideration of the joint resolution.

There being no objection, the joint resolution was considered as in Committee of the Whole.

Mr. HAWLEY. I suggest that the joint resolution should lie over, unless the Senator can state that he has consulted with the Quartermaster-General.

Mr. BAKER. I have consulted with the Quartermaster-General and the Secretary of War. Both of them are anxious to grant this request, but they claim that it would be a technical violation of the law unless permission is given in this way.

Mr. GALLINGER. I suggest that the word "directed" be inserted in place of the word "requested."

Mr. BAKER. Very well; I will modify the joint resolution accordingly.

The VICE-PRESIDENT. The Senator from Kansas accepts the modification suggested by the Senator from New Hampshire.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

JUDGMENTS OF THE COURT OF CLAIMS.

Mr. WELLINGTON submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of the Treasury be directed to report to the Senate immediately all judgments of the Court of Claims rendered since the date of the last report up to and including the date of the adjournment of the court on June 24.

IMMIGRATION BUILDINGS AT ELLIS ISLAND, NEW YORK.

Mr. CHANDLER submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of the Treasury be directed to transmit to the Senate, as soon as possible, a statement of the general plan for the reconstruction of the immigration buildings at Ellis Island, New York Harbor.

EXPENDITURES OF CIVIL SERVICE COMMISSION.

The VICE-PRESIDENT. The Chair lays before the Senate as a part of the morning business a resolution submitted by the Senator from New Hampshire [Mr. GALLINGER], coming over from a previous day. The resolution will be read.

The Secretary read the resolution submitted by Mr. GALLINGER on the 24th instant, as follows:

Resolved, That the Civil Service Commission is hereby directed to furnish the Senate a detailed account, by years, of the expenditures of said commission from its organization to the present time, each item of expenditure (such as salaries, traveling expenses, examinations, printing, etc.) to be separately stated.

The VICE-PRESIDENT. The question is on agreeing to the resolution.

The resolution was agreed to.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. ALLISON. At the adjournment last night we were on paragraph 189. I hope we will take up that paragraph this morning and conclude it.

The Secretary read paragraph 189, on page 50, as amended, as follows:

189. Watch movements, whether imported in cases or not, if having not more than 7 jewels, 35 cents each; if having more than 7 jewels and not more than 11 jewels, 50 cents each; if having more than 11 jewels and not more than 15 jewels, 75 cents each; if having more than 15 jewels and not more than 17 jewels, $1.25 each; if having more than 17 jewels, $3 each, and in addition thereto, on all the foregoing, 25 per cent ad valorem; watch cases and parts of watches, including watch dials, chronometers, box or ship, and parts thereof, clocks and parts thereof, not otherwise provided for in this act, whether separately packed or otherwise, 40 per cent ad valorem.

Mr. ALLISON. The words after the words "ad valorem," in line 18, being "all jewels for use in the manufacture of watches or clocks, 15 per cent ad valorem," were struck out.

I move a further amendment to the paragraph, which I send to the Secretary's desk.

Mr. JONES of Arkansas. Has the committee withdrawn its amendment, or does it propose to stand by the amendment?

Mr. ALLISON. When this paragraph was up for consideration on Saturday last, the committee amendment which was proposed as a substitute for paragraph 189 was voted down, which restored the text of the bill as it came from the House.

Mr. JONES of Arkansas. On the motion of the committee?

Mr. ALLISON. On the motion of the committee. Now I am trying, if I can, to propose an amendment which will perfect the text. I will call the attention of the Senator to the changes we have made in the text after the proposed amendment is read.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa in behalf of the Committee on Finance will be stated.

The SECRETARY. In paragraph 189, line 18, after the word "otherwise," it is proposed to insert "not composed wholly or in chief value of china, porcelain, parian, bisque, or earthenware."

Mr. ALLISON. The other changes made in the text, I will say to the Senator from Arkansas, are in line 6, after the word "movements," where we have already inserted the words "whether imported in cases or not, if;" in line 14 the Senate has already struck out the word "watches;" and in lines 18, 19, and 20 we have struck out "all jewels for use in the manufacture of watches or clocks, 15 per cent ad valorem."

Mr. JONES of Arkansas. Where did the Senator say the word "watches" was stricken out?

Mr. ALLISON. In line 14 the word "watches" was stricken out before the words "watch cases;" so as to read:

Watch cases and parts of watches, including watch dials, etc.

Mr. VEST. I should like to ask the Senator from Iowa what, in his judgment, is the effect of this amendment as to putting in the number of jewels in watches? I know that, like myself, he is not an expert in watches and clocks, but I have taken some little interest in the matter and have consulted an expert, who tells me that the increase of duty is large. What is the information of the Senator from Iowa upon that subject?

The whole structure of the paragraph has been altered. It was a very simple arrangement until the last amendment of the committee was adopted. It read as first proposed:

189. Watches, clocks, and chronometers, and parts thereof, finished or unfinished, whether separately packed or otherwise, and not specially provided for in this act, 40 per cent ad valorem.

It is now proposed to make an increase over the McKinley rate and over the rate in the Wilson law, the rate in both of those laws being 25 per cent. It is an increase of 15 per cent ad valorem. Then the jewels for use in the manufacture of watches or clocks, 10 per cent ad valorem. That portion, however, I understand has been stricken out. I made a motion when the paragraph was first before the Senate to strike that out, and the clause went over. I understand now that the majority of the committee have stricken that out.

Mr. ALLISON. On jewels?

Mr. VEST. Yes; but it is the remainder of the paragraph about which I am inquiring, where the whole structure has been changed and duties imposed according to the number of jewels in the watch. As a matter of course, nobody but an expert can know exactly what will be the effect of that change. An expert tells me that it will be a large increase of duty—over 40 per cent.

Mr. ALLISON. There is some little difference among experts, I know, as to the facility with which watches can be examined; but the committee satisfied itself that there will be no difficulty in examining watches with a view of ascertaining the number of jewels contained in them. So far as the specific rate upon jewels is concerned, as I understand, it is the rate of the present law, which is in the neighborhood of 40 per cent ad valorem.

Mr. VEST. I am informed that it is 65 per cent at least under this new paragraph, an increase of 25 per cent over the 40 per cent. I simply want to understand it. I do not want to take up the time of the Senate.

These are articles of prime necessity. That remark, at first blush, may seem to be exaggerated, but it is the truth. Watches and clocks are articles of prime necessity. They can only be made articles of luxury when there is an exuberance of ornamentation and of jewels. When a timepiece is constructed in the shape of a watch or clock as a timepiece, without regard to any ornamentation, it is an article of prime necessity in every household and to every business man and mechanic.

Mr. President, I want to make another statement, which may possibly sound a little exaggerated or unfounded, but it is the truth. To show the inventive genius of the American people, I was astonished when abroad two years ago to find American watches, New England watches, for sale in Europe, successfully competing with those made in Switzerland and Germany. The official report shows that we are not dependent upon foreigners. In 1896 we exported from this country, in clocks and parts of clocks, $929,395 worth, and we exported in the same year in watches $530,980 worth. After sales in the domestic market, we were enabled, through, I say, our superior inventive and mechanical genius, to send abroad this large amount to compete with foreigners.

If it be true, as I am informed by this expert, whom I have always found to be exceedingly reliable, that this is an increase of 25 per cent, I protest against it. There is no necessity for it, and it can only have one effect, and that is to increase the price of clocks and watches to the consumers in the United States, and, I repeat, the price of an article of prime necessity.

Mr. JONES of Arkansas. In addition to what the Senator from Missouri has already said, the comparative statement furnished by the committee to the Senate shows that on the subdivision of "chronometers, boxed or shipped, and parts thereof" the rate under the McKinley law was 10 per cent; the rate under the present law is 10 per cent, and it is increased in this bill to 40 per cent—400 per cent over the McKinley rate; four times the McKinley rate.

Under the head of watches, the rate under the law of 1890, the McKinley law, was 25 per cent; under the present law the rate is 25 per cent; and the Senate committee proposes to increase that to 40 per cent; and so on through the bill.

Mr. President, I am somewhat confused by the amendments recently made on the motion of the Senator from Iowa; and I should like to ask under what subdivision or what part of this paragraph watches are to be taxed? As I understand, as the paragraph is amended in the first line so as to read "watch movements, whether imported in cases or not," the movements will be taxed, and not the watch. Then the word "watches" was stricken out in line 14. I do not understand from a hasty reading of the paragraph where watches will go and at what rate they will be taxed.

It seems to me that there is no provision for taxing watches in this paragraph; and, if there is not, I should like to ask the committee to be kind enough to allow the Senate to know what provision is to be made for levying a tariff on watches at all?

Mr. ALLISON. What is the inquiry?

Mr. JONES of Arkansas. I have been undertaking to say to the Senate and to the Senator that—although I do not know that I understand the paragraph as proposed to be amended—it seems to me there is no provision for levying a tariff on watches in this paragraph.

Mr. ALLISON. In paragraph 189 the words "watch movements, whether imported in cases or not," would cover watches.

Mr. JONES of Arkansas. How can those words possibly cover watches when the provision in specific terms proposes to tax watch movements, whether in cases or not, and whether they come in watches or in boxes?

Mr. LODGE. If the Senator from Arkansas will allow me, watch movements are made dutiable under the first clause of the paragraph.

Mr. JONES of Arkansas. Certainly.

Mr. LODGE. Whether imported in cases or not.

Mr. JONES of Arkansas. Yes.

Mr. LODGE. Then the case is made dutiable below.

Mr. JONES of Arkansas. That is the point. I did not catch that. Will the Senator be kind enough to state where cases are provided for?

Mr. LODGE. After the word "watches," in line 14, which was stricken out.

Mr. JONES of Arkansas. "Watch cases and parts of watches, including watch dials, chronometers," etc. Then they would be covered separately. I think that covers that objection.

Watch cases themselves are taxed at 40 per cent. A very large part of the value of a gold watch case, for instance, is the metal that is in the case. In a great number of instances there is nothing added to the value, or very little added to the value, of the gold by the labor or the expense of manufacture; and it seems to me that that is an unreasonable rate of taxation. It seems to me that 10 per cent is as high a tax as ought to be placed on watch cases. They are made by machinery, I understand, in a great many instances. The principal value of a plain watch case, made of either gold or silver, consists of the metal of which it is made, and I can see no justification for putting a tax of 40 per cent on gold. The Senators on the other side of the Chamber, who are particularly anxious to have gold come into the country, ought not to be discriminating against gold in that kind of way.

Mr. STEWART. They do not want gold to come.

Mr. JONES of Arkansas. Mr. President, I know but little, of course, about this paragraph, but the tax on this class of goods has been, I think, for thirty years, or more than thirty years, 25 per cent. This is a proposition to increase the tariff from 25 per cent to 65 per cent. Thirty years ago, when a tariff of 35 per cent was put on watches, the watch industry was new in this country. It had just begun. Watches are now being made by

machinery, and the industry has been developed until now we export large quantities of watches and import no watches of the class made by machinery in this country.

Mr. HOAR. Oh, yes; we do.

Mr. JONES of Arkansas. Well, then, my understanding is certainly that no large number of foreign watches are sold here in competition with the Waltham and Elgin watches and watches of that character. The importations would seem to indicate that; and I understand, as a matter of fact, that that is the case. What excuse can there be for more than doubling the tariff, which was considered sufficient protection to the manufacturers of watches when the industry was just beginning? Now that the country has absolute control of the trade, when we are sending watches abroad and selling them by the thousands in open competition with the watchmakers of the balance of the world, why there can be any excuse for more than doubling this tax on watches is beyond my comprehension.

Mr. President, I have a statement which has been furnished me, a sort of brief, which was submitted to the Committee on Finance by Messrs. Tiffany & Co., Theodore B. Starr, and Benedict Bros., of New York, in which they set out the reasons why this tax is unreasonable and will practically destroy certain branches of this trade. There are certain parts of watches imported by watch manufacturers. As I understand, the policy is to allow those parts of watches which the manufacturers use to come in at as low a rate as possible; but when a man proposes to import a watch of a quality he can not buy in this country, he would be practically excluded by putting a tax of 40 per cent on the gold that enters into the manufacture of the case, which is, to my mind, a perfect absurdity.

It is a well-known fact—so this brief says—that American watches are exported and sold abroad at a lower price than they are sold to American consumers; while our manufacturers have been protected sufficiently to build up such a trade as that, they can and do ship abroad and sell profitably watches at prices at which they will not sell to American citizens. What sort of justification can there be for our putting a higher tariff on these watches, and attempting to exclude the importation of any other watches to give more power to them, and to enable them possibly to sell watches higher in the United States than they are now selling them? I do not believe that is right.

I will insert as a part of my remarks, without taking up the time of the Senate by reading it, the brief statement which the gentlemen I have named made to the Finance Committee. It will by this means go to the country, and I hope the case will be fully understood.

The VICE-PRESIDENT. The paper referred to by the Senator from Arkansas will be printed in the RECORD, in the absence of objection.

The paper referred to is as follows:

[Copy of brief submitted to the Committee on Finance.]

To the Senate of the United States:

Your petitioners respectfully offer the following statements and facts as evidence of the evil of the proposed advance in duty on watches, watch movements, watch cases, and parts of watches.

The measure being prohibitory, the result would be:

First. Curtailment of imports of a class of watches not made here, consequently not interfering with the domestic goods, and which is an important factor in the business of the American retail watch dealer and jeweler.

Second. Resultant reduction in this branch of revenue for the Government.

WATCH MOVEMENTS.

The present rate of 25 per cent duty, having been in existence thirty-six years, was considered by the Senate Committee on Finance in 1888, and said rate was then maintained and confirmed in the law of 1890, having been proven more than sufficient protection to the domestic industry.

Even during and after the late war, when the Government most required revenue, duties on watches were not increased, notwithstanding that the domestic industry was then in its infancy.

The continued success of the American watch companies shows that they have flourished under said protection.

Their successful introduction and constantly increasing production resulted in the almost complete exclusion of that class of foreign watches which competed with the domestic article.

Statistics of the last six years, recording a constant decrease in the imports of watches (at present about 50 per cent of the amount imported six years since), are referred to as evidence.

Value of importation of watches and parts of watches.

1891	$1,704,007	1894	$940,066
1892	1,500,221	1895	825,925
1893	1,497,070	1896	908,009

This includes materials and parts of watches largely used by the American watch factories.

Besides, the large dividends declared by the American watch factories, even at present, in spite of stagnant business, and notwithstanding unnecessary reductions in selling prices, prove the success achieved by them without the aid of a prohibitory tariff.

American factories sell movements on this market 20 per cent cheaper than the cheapest foreign watch can be imported for, as can be seen daily in press advertisements.

While the importations of watches has steadily decreased, statistics show that the American exports of watches to foreign countries have doubled in the same space of time. Even in foreign markets the American watch competes readily with goods of similar grade.

Exports of American watches and parts of watches.

1891	$275,707	1894	$283,279
1892	308,743	1895	357,329
1893	341,758	1896	590,080

It is a known fact that American watches are exported at much lower prices than they can be purchased here for home consumption, thus showing that they can withstand any competition.

The foregoing shows conclusively that the American watch industry is not in need of any further protection.

Specific duties as proposed on watch movements are absolutely impossible of execution and unpractical, the diversity of styles and great variety of quality making a correct classification impossible. Moreover, combined with the 25 per cent additional duty, the proposed tariff would be equivalent to from 55 to 75 per cent ad valorem duty, which would effectually stop the importation of watches, and thereby affect the revenue of the Government.

The proposition to grade these specific duties according to number of jewels can not justly be applied, for an equal number of jewels exists in movements of very extreme grades. Thus the same specific duty is applied to a movement costing 16 francs and one costing 40 francs, thereby making them rank and taxing them equally, whereas the difference in value is over 100 per cent.

WATCH CASES.

The present rate of 25 per cent does not admit the importation of watch cases.

American cases are, on the contrary, exported all over the world.

The only watch cases imported to-day are such as the class of movements they inclose make this casing imperative.

The rate of 25 per cent duty was thoroughly canvassed by the Senate Committee on Finance in 1888, and the then proposed duty of 40 per cent was, in the law of 1890, put back to 25 per cent, it being shown that an increase would not only fail to produce additional revenue, but would effect a reduction and be of no benefit to domestic manufacturers.

The cost of the raw material constitutes almost the entire cost of a gold watch case, the labor involved in the manufacture being an inconsiderable element. The present tariff of 25 per cent not only more than covers the difference in cost of production here and abroad, but is almost the double of labor cost in the United States, because the present duty imposes a tax on the gold composing the case in addition to the cost of making.

The following comparison between an American-made 14-carat gold watch case and the same article made abroad proves the aforesaid statement:

American-made sells for $24.30; foreign-made costs, with 25 per cent duty, $29.48.

The same ratio of difference exists in the following:

American-made sells for $18.43; foreign-made costs, with 25 per cent duty, $22.40.

The protection being absolute, an increase in rate is unnecessary and detrimental to the revenue of the Government and the interests of the retail watch dealers and jewelers.

The only demand for an increase comes from the powerful trust-like watch companies, for their own benefit, and regardless of the interests of the dealers and the public, and unsupported by them.

Being domestic manufacturers, backed by vast means to introduce their products, foreign competition is impossible, as they can produce much larger quantities of a kind, and thereby reduce the cost of their manufacture to a minimum.

In the face of these advantages, and the fact that foreign competition can not exist, any increase in duty would be superfluous; and the direct effect of such increase being loss to the revenue, owing to curtailment of imports, the measure should not be sanctioned.

An advance in duties would greatly stimulate smuggling, and would invite an increase of purchases of watches in Europe and Canada, to the detriment of retail jewelers and watch dealers throughout the country.

The whole retail jewelry trade, selling both domestic and imported watches, unite in opposition to the proposed change in duty, and by their signatures, liberally granted wherever approached, express their desire that the present rate be maintained.

Attention is called to the appended list of American watch-case manufacturers, who, by their signatures, approve and concur in the above.

Signed by the committee.

TIFFANY & CO.
THEO. B. STARR.
BENEDICT BROS.

Mr. LODGE. Mr. President, I merely desire to say a few words in answer to what has been said by the Senator from Arkansas [Mr. JONES].

The whole watch industry in this country was revolutionized by American inventions in machinery, making machine-made watches. We make them so much better and so much cheaper that no handmade watch can compete with those made here. The industry was built up in that way. We were able to get into European markets and to all the markets owing to the fact that we had this immense advantage in our machine-made watches over the handmade watches.

The American watchmakers asked for no protection in the various tariff bills which have gone through; they have never asked for an increase over the original amount proposed to be given them. Since then the Swiss watchmakers in the last few years have bought up and set up American watch machinery, and they are making enormous quantities of watches by our machinery, with labor necessarily of a very much cheaper kind.

The competition we have to meet is not an equal competition, even with that lower labor cost. They bring their watches into this country with a valuation so small as to amount practically to nothing, with an ad valorem duty.

Most of the large Swiss exporters do not export watches to American dealers, but send to their own agents, who reside in New York; and they export the lower grades of watches at merely nominal prices. I speak of watch movements now. They invoice many of the watch movements at 15 cents apiece. But that is not the worst result of the ad valorem. I have in my committee room, and can bring here if it is desired, what they do after they get the watches over here. In order to meet the law, they stamp in letters

which can only be detected with the microscope, the word "Swiss" somewhere on the edge of the watch movements. On the face and on the back or on the box in which the movements come they stamp in large letters the name of an American company, the Waltham Watch Company, the Marvin Watch Company of Springfield, or the New Haven Watch Company. In other words, they put an absolute fraud on the market. They do not sell them at lower rates than ours, but they force an inferior watch upon our market under the pretense that it is an American watch.

With competition of that kind, and with the lower labor cost behind it, it is absolutely impossible to compete without a duty that shall be honestly collected. An ad valorem duty practically amounts to nothing. The chief general appraiser tells me that the specific duties which we have here will average about the ad valorem which the Senate proposes, about 40 to 41 or 42 per cent. Some of them are higher and some of them are lower.

When we come to parts of watches and other portions of watches which come here, they are all dutiable at 40 per cent.

Mr. VEST. Before the Senator leaves the other branch of his statement, I want to ask him this question: I understand him to say that these foreign watchmakers, the Swiss exporters, put in microscopic letters the word "Swiss," and then put in large, conspicuous letters the name of some American manufacturer. If that is done, I want to ask the Senator why the domestic manufacturer does not avail himself of the provisions of the existing law, the law of 1890, and of the present bill, and confiscate that article? I am just looking for the section which imposes severe penalties where an article is brought into this country and it is fraudulently attempted to put on it one of our trade-marks. That is a plain, absolute, and palpable fraud upon the revenue laws of the United States, and in violation of common honesty, and it is not a creditable reflection upon the intelligence of the watchmakers of Massachusetts to have permitted themselves to be swindled after that fashion.

Mr. LODGE. The Senator knows very well that that leads to endless litigation. Where it is stopped in one place it goes on in another. It is a fraud which it is almost impossible to meet. For instance, I have got a watch movement made to imitate the Waltham watch. The foreign watch company have put on their watch a monogram that looks exactly like the monogram of the American Waltham Watch Company, but they leave out the cross on the "A," a little change that nobody would notice; but it would protect them if they were taken into court. They have got in microscopic characters on the edge the word "Swiss."

Mr. GRAY. May I ask the Senator a question, because this is a matter which interests me?

Mr. LODGE. Certainly.

Mr. GRAY. Why do the Swiss people put the Waltham name on their watches?

Mr. LODGE. Because they think they can get into the American market that much better, as the American watch is preferred.

Mr. GRAY. Is not that a very gratifying proof that the American watch commands the market?

Mr. LODGE. The American watch is the better watch, and will command the market if we have a fair chance.

Mr. GRAY. Then do we not want a more strenuous enforcement of the law we now have to prevent fraud on American trade-marks and some new provision that will more effectually guard the superior American watch against the Swiss imitations?

If the Senator will pardon me, it is to me a very gratifying evidence of the superiority of the American watch and that it does not need any protection; but it, of course, does need protection against a fraud of the kind the Senator mentions, and I am willing to vote for anything that will prevent that.

Mr. LODGE. We have laws that ought to prevent it, but as a matter of fact they do not. For instance, I hold in my hand a watch. There is the box [exhibiting] marked "Marvin Watch Company," and on the outside is "Marvin Watch Company of Springfield." That company has gone out of business; that is, it has been transferred to the State of Ohio, and its name is no longer in business. That is a Swiss watch. Senators can look at it for themselves, and see if they can find the word "Swiss."

Mr. VEST. If the Senator from Massachusetts will permit me, I wish to read that section to which I alluded, which is section 8 of the pending bill, and a similar provision was contained in the Wilson law and in the McKinley Act:

SEC. 8. That no article of imported merchandise which shall copy or simulate the name or trade-mark of any domestic manufacture or manufacturer shall be admitted to entry at any custom-house of the United States. And in order to aid the officers of the customs in enforcing this prohibition, any domestic manufacturer who has adopted trade-marks may require his name and residence and a description of his trade-marks to be recorded in books which shall be kept for that purpose in the Department of the Treasury, under such regulations as the Secretary of the Treasury shall prescribe, and may furnish to the Department facsimiles of such trade-marks; and thereupon the Secretary of the Treasury shall cause one or more copies of the same to be transmitted to each collector or other proper officer of the customs.

Mr. LODGE. I am aware of that law; and it was drawn strongly, and ought to give ample protection, but it does not. In the very case of the watch I have just shown they put on the name of an extinct company, a company which is doing business now under a name which has been transferred to the State of Ohio, and they have taken that extinct name and put it on.

Here [exhibiting] is a Swiss watch made to counterfeit the Waltham watch. Anybody looking at it carelessly would think it bore the Waltham monogram and trade-mark, but the cross on the "A" is left out; and it is impossible by law to meet such a case.

Now, with the undervaluations and the frauds, the use of American machinery, and the very greatly lower labor cost in Switzerland, they are enabled to run into our country with an inferior watch, which they sell as an American watch, and replace ours in many cases. There is no danger of the price of watches being raised. The domestic comoetition is altogether too severe for that.

I should say as to watch movements, on which a specific duty is levied, there is very little fluctuation, and the telling of the number of jewels is an ordinary commercial method of grading watch movements.

When you come to cases, on which the value of the watch largely depends, of course if you have a gold case, it seems to me that it is a fit subject for a revenue duty, and all watches are to a certain extent articles of voluntary use at least, and the expensive ones are certainly fair subjects of a revenue duty. But it is on the watch movements that the great frauds occur, and it is for that reason that the specific duties have been adopted.

I believe the Senator is mistaken about the parts of watches. None of those come in free. The only thing that is supposed to come in free are the jewels, and if the Senator from Arkansas has examined that question, as I have no doubt he has, he will know that it is absolutely impossible practically to collect a duty on watch jewels, the result being that the honest manufacturer has to pay a heavy duty, whilst the dishonest man buys watch jewels from the smuggler. You can put $4,000 worth of watch jewels in an ounce vial. They are so small that it is perfectly easy to bring them in.

Mr. JONES of Arkansas. I have only one suggestion to make to the honorable Senator from Massachusetts. The burden of his complaint seems to be that the European watchmakers have procured American machinery and are making watches practically by our own methods, those that we have developed. It seems to me we are not in a condition to complain of that.

The other day when the item of vanillin was under consideration, I remember it was stated on the other side of the Senate Chamber that this was a product that was covered by a patent abroad. It seems that an American manufacturer had stolen the idea of the patentee on the other side, that he was industriously producing the product on this side, and was not willing to enter into open competition with the man who owned the patent, but wanted a high protection, the enormous protection of 80 cents or a dollar an ounce, or something of that kind, to protect him against the man from whom he had gotten the idea.

Mr. ALLISON. I hope the Senator from Arkansas will not mingle vanillin with watches.

Mr. JONES of Arkansas. Not at all; only to illustrate the policy of the other side by a reference to what we have already done.

Mr. ALLISON. The Senator can illustrate it in that way, but he should keep close to the facts in the case.

Mr. JONES of Arkansas. Certainly.

Mr. ALLISON. Those who manufacture vanillin synthetically in the United States do it by a different process from the patented process that is used abroad, and it has been so decided in our courts. So far from this being the ingenious Americans following in the footsteps or pathway of the inventors of Europe, they have an invention of their own, which is distinct from that of Europe.

Mr. JONES of Arkansas. Is that patented?

Mr. ALLISON. It is not patented, because they do not propose to expose their secret.

Mr. JONES of Arkansas. It is a secret process?

Mr. ALLISON. A secret process. So we have disposed of vanillin.

Mr. JONES of Arkansas. My understanding was that the process was practically the same, and I was illustrating the policy of the other side by reference to that article. However that may be, I can conceive of no justification for the enormous increase in the tax on these goods. If you have developed and built up a system which makes watches better and cheaper than they are made anywhere else in the world, commands the market of the world, and has done it under a tax of 25 per cent, where is the excuse for the increase in taxation to what experts tell me is about 65 per cent instead of 25 per cent? How that can be justified is beyond comprehension to me.

Mr. LODGE. I made the remark I did in regard to the introduction of American machinery in Switzerland simply to show that conditions have changed since the time when the Senator

said we had only handmade watches to compete with. They have got onto an equality with us, with the aid of our own machinery. I do not complain of that. I say conditions have changed. They are now working machinery with labor of much lower cost. I think we ought to give sufficient protection to make that difference, and I think we ought also to make a difference in order to protect our people against undervaluations and frauds.

These are great industries, employing the very highest class of mechanics. Of course I allow for the effect of bad times, but even then their sales have been so cut down by the Swiss competition, watches brought in at these undervaluations and in these fraudulent forms, taking the place of American watches and sold at exactly the same rate, that they have had to reduce their running time to four days in the week. I think when we have reduced the price of watches as we have by our own ingenuity to the whole world, when we get them at the lowest possible price and give a better article to our own people at lower prices than anybody else can do, that we are entitled to protection against a cheap labor, which is also aided by undervaluations and by fraud.

Mr. GRAY. Mr. President, as I said a moment ago, I am very much interested in what the junior Senator from Massachusetts [Mr. LODGE] has said in regard to the development of the watch industry in this country and largely in the State which he so ably represents in part, but while it is gratifying to know that this industry has not only been established, but has grown and developed and commands the market of the United States and largely of the world by reason of the superiority of its manufacture, surely it is no reason to tax the people of the United States to a greater extent than they are already taxed on these articles, no longer a luxury, but I might say a necessity. What were the luxuries of a generation ago are becoming the necessities of the present one. We all know that. The world advances and civilization advances, and its progress is not more surely marked than by the diffusion of these things in common use which comparatively a few years ago were used only by the rich and were classed as luxuries.

Watches have become a necessity. There is no reason that I can conceive of, from the statement made by the Senator from Massachusetts as to the state of this industry, why, in order to prevent these frauds or compensate the American manufacturer for the effect of these frauds, we should impose this burden upon the American people. We must not punish the boy or girl who buys a watch or the poor man who buys a watch because the Swiss fraudulently imitate the trade-mark of the Massachusetts watchmaker. I am willing to go to any length that is reasonable in defining and punishing the crime of the simulation of an American trade-mark. Let us punish that and prevent it, and I would propose some such language as I will read, for that is the chief complaint I hear made by the Senator from Massachusetts, and he has made it the justification for an increase of duty. An increased duty will not prevent the simulation of the trade-mark. I suggest some such provision as this:

No watch or clock or part thereof shall be admitted to entry at any custom-house in the United States which shall not have the name of the place and the country from which imported, or where made, printed or engraved conspicuously on the face of the watch or movement or upon the part of the watch imported.

I suggest to the junior Senator from Massachusetts—merely as a suggestion to be perfected—whether some such language would not measurably answer the purpose which the watchmakers have in view. Then add a penal provision which shall punish anyone who attempts it.

Mr. LODGE. We have law enough now.

Mr. GRAY. I think that is an advance of the present law.

Mr. ALLISON. I will say to the Senator from Massachusetts and the Senator from Delaware that the committee have in preparation a modification of one of the sections of the bill, I think section 8, which will more certainly cure the defect.

Mr. GRAY. There is a law, as I understand it, which requires the name of the country to be marked on the goods.

Mr. ALLISON. There is such a law.

Mr. LODGE. They comply with it.

Mr. GRAY. They comply with it in letter, but not in spirit.

Mr. LODGE. Undoubtedly.

Mr. GRAY. I think the law ought to be so made that they would be compelled to engrave the name of the country where it can not be overlooked, on some conspicuous part of the watch.

Mr. LODGE. That would not meet the undervaluation. The specific is the only thing that will correct it.

Mr. GRAY. The Senator does not want a specific larger than the ad valorem.

Mr. LODGE. I do not think on the average it does——

Mr. JONES of Arkansas. The tax in this paragraph is an ad valorem.

Mr. LODGE. The Senator means the parts of watches?

Mr. GRAY. Yes.

Mr. LODGE. I think they need as much as that.

Mr. HOAR. Mr. President, I do not wish to prolong the discussion. My colleague has very clearly and concisely covered the whole ground, but I wish to make just one observation. The precise argument which the Senator from Delaware has just made was made when the protective duty, smaller than this a little, but still a protective duty, was placed upon watches in the tariff which originally placed a duty on watches. "Why are you putting this burden on the American people for these few workmen? Why not let the American boy buy his watch where he is a mind to?" and all those arguments which we have heard on the stump, and here.

Mr. GRAY. I did not say that. I said why punish the American consumer, boy or what not, as the case may be, for the frauds of the Swiss manufacturers? That is what I said.

Mr. HOAR. You can call it punishment or say what it is to be done for, but the substance of it is, "Why do you make the American purchaser pay more for his watches to protect the American workmen against this competition, whether it be fraudulent or genuine?" If it were genuine competition, the argument would be still stronger. That argument was made then, and we proceeded to try the experiment, and the American, getting his protection, brought down the prices of watches in some instances to less than 25 per cent of the old prices, and in some instances clear down so that you can get some very decent timekeepers for $1.50 and $2.50, of silver or pinchbeck cases.

Mr. JONES of Arkansas. Now you want to more than double the tax.

Mr. HOAR. Let me state my proposition, and the Senator can give his answer to it afterwards.

Now, what is the result? That policy, aided by the American ingenuity which was set at work, because the workingmen in the watch establishments are of the very best and of the most intelligent class of American workmen, not only built up the industry here, but reduced the price of watches, in many instances, 75 per cent. But now the foreigners have taken our machinery, the result of our ingenuity and brain, the result of the brain stimulated by the protective policy, and are pressing us hard by these methods. So now our workmen are driven to four days in the week instead of six, as my colleague has said.

I undertake to predict that if you put on the duty which is proposed, and the experiment has a fair trial, the thing will go on; that the American market will be supplied by American workmen; that these poor foreign watches will be in a large measure excluded; that you will have the price of watches still further reduced, so that they will be down to 50 or 60 per cent of what they are now; and I wish to put this expression of opinion on record: This industry, which has so refuted by its past experience all the stock arguments of the free trader, will go on to furnish further and more impressive refutation of the same thing.

Mr. JONES of Arkansas. Will the Senator from Massachusetts allow me to ask him a question in connection with his prediction? Thirty years ago a tariff of 25 per cent was put on watches, which he says resulted in these marvelous developments, and now a tax of 65 per cent is proposed instead of 25 per cent. Now, I ask, will the great successes which will follow the inauguration of this tax, according to his theory, necessitate a tax of, say, 100 or 150 per cent in the next few years to protect the same artisans?

Mr. HOAR. If we should get the price of a watch down to $1 instead of $3, down to $10 instead of $30, the rate with a tariff of 100 per cent would be really half as much as a tariff of 50 per cent is now.

Mr. VEST. Mr. President, there was one fact stated by the senior Senator from Massachusetts which is a fact, that after supplying the American market and exporting the amount which I named here from the comparative statement, these large New England establishments have regular agents abroad, in England particularly, where they sell the product cheaper to the foreigner than they do in the United States. I was not myself at the Chicago Exposition, but I am permitted by my colleague, the Senator from Georgia, who was there, to state that he saw Waltham watches, or watches made by a large manufacturing company in New England, on exhibition, and he was told by the agent, whom he overheard conversing with an Englishman, after the Englishman had left him, that they were selling the identical watches at 20 to 25 per cent cheaper in England than in the United States.

Mr. HOAR. If the Senator will pardon me, that is true in all commerce everywhere. Unless there be some very peculiar conditions, the exporter sells his goods in his foreign trade, if it is a foreign trade where he has competition, cheaper than in his domestic trade. That is true everywhere the world over, because in the first place they send over their surplus stock at the end of the year, if they have made a surplus at a particular time. I suppose the Senator can not point to an article in all commerce, where there is free competition, where if a foreigner in part supplies the market he does not sell the article a little cheaper abroad than at home.

Mr. VEST. If they can afford to do that, if the American manufacturer can supply the home market and then go abroad and sell the same article from 20 to 25 per cent cheaper in competition with foreigners, where is the necessity for the so-called protection?

Mr. HOAR. That would require stating the argument which has been stated twenty times. As the Senator from Montana [Mr. MANTLE] suggests to me, he sells abroad the things he can not sell at home. He sells abroad his surplus, which he has to sell in a particular condition, when the market is overstocked. All those things apply to the foreign trade.

Mr. VEST. It is always overstocked. The export journals show—and I can produce them at any time in this Chamber, as I have before—that in all the different metallic manufactures our productions are exported abroad and sold for less in the foreign markets. They openly avow that. Of course their answer is a surplus. But that simple fact shows that under the tariff system of the United States the American manufacturers are enabled to supply the home market or a portion of it and then they send abroad and sell for less to the foreigner, and sell at a profit.

Mr. HOAR. The foreigner is doing the same thing to us.

Mr. VEST. As a matter of course, but their people are not taxed as it is proposed to tax the American people by this bill.

Mr. HOAR. That is another point.

Mr. VEST. These enormous taxes are nowhere imposed except in the United States, and they are imposed here upon products where, it is said, it is necessary to protect from foreign competition the manufacturing interests of this country. No, no, Mr. President, as a distinguished colleague of ours from Ohio used to say, "That won't do; that won't do."

I confess I was amused at the statement of the junior Senator from Massachusetts, when he said that the foreigners were enabled to cheat the Massachusetts manufacturers by putting in very small letters "Switzerland," and in very large letters "Waltham Manufacturing Company." Mr. President, what intelligent American citizen in Massachusetts or outside of it will believe that statement? That disparages the intellect of the American to such an extent that I will not stand it; and more than that, if a Massachusetts manufacturer can be cheated after that fashion, what in Heaven's name is to become of a Missourian? [Laughter.] They will steal the plugs out of the teeth and then escape the police. Who believes now that the people of New England can be cheated in that fashion? Mr. President, it is an outrage upon the land of wooden nutmegs to say that any such thing can be done.

Mr. LODGE. I did not say they cheated the New England manufacturers. I said they cheated the custom-house and the Missourians who buy the watches.

Mr. VEST. They cheat the custom-house and the Massachusetts manufacturer, because here is a law, enacted in 1890, which provides that no article simulating an American trade-mark shall be permitted to come into this country at all; and more than that, any domestic manufacturer can file his trade-mark in books provided for that purpose, and then if any attempt is made to introduce an article so marked, it is to be excluded. No, no; that will not do.

I assert that this duty, and it is not to be contradicted, is 65 per cent instead of 40 per cent under the proposed amendment, and 25 per cent under the McKinley Act and under the Wilson Act. For the last thirty years that has been the duty, and we have built up an enormous industry, commanding the domestic market and competing successfully abroad and selling the same products at less prices, and yet this duty is now to be increased in this country 40 per cent, and for no other purpose than to enable the American manufacturer to exclude the foreigner entirely and take possession of the market.

Mr. JONES of Arkansas. Mr. President, there is one suggestion I wish to make in connection with the admissions made on the other side. Here is the statement broadly made that the watches are sent abroad and sold for 25 per cent less than they are sold to American citizens. The manufacturers must be able to sell those watches at the prices at which they sell them abroad, or they would not so sell them. If they can afford to make and sell those watches abroad at 25 per cent less than they are sold for here, they are selling in American markets, by aid of laws that are thrown around them, goods for 25 per cent more than they are worth. They are enabled to make the American people take goods at a higher price than they ought to pay, because they can and do sell them abroad at the lower prices.

A statement was made by the senior Senator from Massachusetts that this runs through all manufactures. If that is true——

Mr. HOAR. I did not say that.

Mr. JONES of Arkansas. If that is true, then the general run of manufacturers are selling goods in this country higher here than they ought to be allowed to sell them, because when they sell them abroad they do not sell them for less than they are worth.

Mr. HOAR. I did not make the statement which the Senator from Arkansas puts in my mouth.

Mr. JONES of Arkansas. What statement did the Senator make?

Mr. HOAR. I said it ran through all trade, and that the foreigners do the same thing to this country. I did not say all manufactures.

Mr. JONES of Arkansas. Perhaps I was mistaken in saying "manufactures" instead of "trade."

Mr. HOAR. The Senator was, and it was a very serious mistake.

Mr. JONES of Arkansas. It is a difference between tweedledee and tweedledum. It is the same thing after all.

Mr. HOAR. When I speak of a universal law of all trade, applicable to all nations alike, the Senator undertakes to put in my mouth a phrase limiting it to American manufactures under our protective system, and then when his attention is called to a gross misstatement he says it is the difference between tweedledum and tweedledee.

Mr. JONES of Arkansas. The Senator from Massachusetts——

Mr. HOAR. No; I ought not to speak so earnestly perhaps. I believe the Senator from Arkansas is a fair and candid man and does not wish to misrepresent me. I think the Senator will see that when I said a certain rule of conduct runs through all trade it is not a fair statement of what I said to limit my statement to American manufactures.

Mr. JONES of Arkansas. I did not undertake to limit the Senator's statement. I referred to his statement in general terms. I take the statement as he made it, and I am willing for it to stand. It means, as I believe—every member of the Senate will understand that it means—that the American manufacturers can and do sell their products cheaper abroad than they sell them to our own people, and that the Senator justifies this act. I say that whenever the law allows American manufacturers to sell their goods abroad—and they would not sell them abroad unless they could do it at a profit—whenever that is being done, and we throw laws around them to enable them to sell their goods higher to American people than they can sell them profitably abroad, we are guilty of a gross outrage on the American people.

Mr. HOAR. Does not the Senator see that in the case which has been stated the man does not sell at a profit abroad?

Mr. JONES of Arkansas. Why does he sell there?

Mr. HOAR. Because he has to get rid of his surplus.

Mr. JONES of Arkansas. At a loss?

Mr. LODGE. Yes.

Mr. HOAR. Yes; at a loss.

Mr. JONES of Arkansas. I am slow to believe that shrewd, sharp American manufacturers are going to send drummers abroad to solicit trade at a loss to themselves. They are not quite so liberal.

Mr. HOAR. If the Senator will read Lord Brougham's famous speech on the English relation to the American tariff and manufactures, which has been cited a thousand times in these debates, he will find that the speaker describes that as the precise method of the Englishman. Then, if the capitalist, in addition, possesses capital and influence enough by so disposing of a surplus as to shut up competitors in the foreign country, then he will raise the price and make his gain.

Mr. JONES of Arkansas. The American manufacturers ought not to be allowed to sell their goods to the American people at such a profit as will justify them in selling their goods abroad at a loss.

Mr. MILLS. Mr. President, I remember some years ago being in a watch factory in New England, at Waterbury, the celebrated Waterbury watch manufactory, and going through all the large establishment. The proprietor told me what number of watches were turned out during a day. It was astonishing to me, and at a cost of two or three dollars to the watch. I asked him, "Where do you find a market for all the immense product which you are turning out?" He said to me, "Name a place on the earth—any place—and I will name the place where you will find a Waterbury watch if you go there." He was exporting watches in legitimate trade all over the whole world, making them by machinery, with the human hand doing nothing but assembling the pieces and putting them together. They were splendid watches. He gave me two of them, which I have yet. His market was all over the world, selling in competition with pauper labor.

Here we are told to-day that you can not compete with this pauper labor without protecting our high-priced machinery—high-priced labor, but it is done by machinery—and yet we are told that we are sending all these manufactures all over the whole world in legitimate trade every day of our existence, and competing with the pauper labor in their own market, paying the cost of transportation to their market, handicapped by that amount, but still holding the markets against all the world. We have two sorts of statements. One that we have to protect our own people at home, within our own boundaries, against the competition of pauper labor, and then we take the same product and go out into

the world and compete with the pauper labor and beat them in their own market.

Mr. JONES of Arkansas. We undersell them.

Mr. MILLS. Of course we undersell them, and it is done at a profit. Look at the agricultural implements which we are shipping every year. As has been stated on this floor several times, you can not go to any place on the Continent of Europe where you do not find our sowing machines and reapers, and all the various implements we make in this country. Are we selling them at a loss year by year and still pursuing the business? Look at every department of manufactures. We have been sending a large amount of cotton goods abroad, and increasing it in later years. Are we selling them at a loss? The gentlemen who are carrying on this business certainly do not do that.

There is no necessity for the proposed duty on watches. We can beat the world making watches. We have been beating the world making watches, making them cheaper and making them better than anybody else.

Mr. GEAR. I wish to give the Senator from Arkansas and other Senators a little information about Japanese watches. I hold in my hand the second watch made in the Japanese Empire, which a friend of mine bought in Japan a year ago. This watch is full jeweled, fifteen jewels. It is an Elgin watch. It was made in that country in an establishment which has been recently started, and to-day they are making these watches by the thousand and sending them to the United States. This watch cost in Japan $11 American money. It can be sold at wholesale for a little less than $8; and that watch can not be made in the Elgin factory, of which watches it is a complete duplicate, for less than $17. That is the reason, I imagine, which governed the Finance Committee in proposing the duty on watches. I hope the amendment will prevail.

Mr. JONES of Arkansas. Then our people do not make the best and cheapest watches in the world, as we were assured a while ago they did?

Mr. GEAR. They do not make a watch equal in cheapness to the watch of the heathen "Chinee," if you please. We make as good a watch as is made anywhere in the world, and possibly the best watch.

Mr. VEST. I should like to ask the Senator from Iowa a question.

Mr. GEAR. I shall be glad to answer it if I can.

Mr. VEST. Was not the watch factory established in Japan by Americans and with American capital?

Mr. GEAR. No, sir. It was started in Japan by American mechanics who went there to teach the Japanese how to make the watches.

Mr. VEST. Have not the Elgin Watch Company a large interest in, possibly the entire ownership of, the plant?

Mr. GEAR. I can not answer the question, but I think not.

Mr. VEST. I understand they have.

Mr. GEAR. American mechanics taught the Japanese how to make the watches.

Mr. VEST. They went there from the Elgin Company, and therefore they make a duplicate of the Elgin watch.

Mr. GEAR. Of course it is an entire duplicate, but I do not think the establishment is owned by the Elgin Company. I know, at least I do not think, that the Elgin Company have a dollar or a dime's interest in the factory. I simply exhibit the watch to show that the duty is required if we are to maintain the industry in the United States, and that applies not only in regard to Elgin, but as to Waltham.

Mr. VEST. I want to have the question taken by yeas and nays upon the substitute as amended.

The VICE-PRESIDENT. The Chair will then put the question first upon the amendment proposed to the amendment of the committee.

The amendment to the amendment was agreed to.

The VICE-PRESIDENT. The question now is on agreeing to paragraph 189 as amended.

Mr. VEST. Upon agreeing to the paragraph as amended, I ask for the yeas and nays.

Mr. JONES of Arkansas. The question now is on the adoption of the paragraph, I understand.

Mr. ALLISON. I wish to suggest to the Senator that the House text is retained. We do not have to vote upon the House text, as I understand it.

Mr. JONES of Arkansas. Of course; we have been reading the bill for the purpose of taking a vote on each paragraph.

The VICE-PRESIDENT. The Chair understands the pending question to be on agreeing to paragraph 189 as amended and as read at the desk.

Mr. ALLISON. Very well.

Mr. JONES of Arkansas. That is, on the adoption of the amendment to the paragraph?

The VICE-PRESIDENT. On the adoption of the amendment to the paragraph.

Mr. JONES of Arkansas. The question now is on the entire paragraph?

The VICE-PRESIDENT. The question is on the entire paragraph.

Mr. JONES of Arkansas. As amended?

The VICE-PRESIDENT. As amended.

Mr. JONES of Arkansas. On that we want the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. HARRIS of Kansas (when his name was called). I have a general pair with the Senator from Wyoming [Mr. CLARK]. As he is not present, I withhold my vote.

Mr. MORRILL (when his name was called). I will state now for the day that I am paired with the senior Senator from Tennessee [Mr. HARRIS], and therefore withhold my vote.

Mr. PRITCHARD (when his name was called). I am paired with the junior Senator from South Carolina [Mr. MCLAURIN]. If he were present, I should vote "yea."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER]. By an arrangement, I will transfer my pair, so that the Senator from Washington [Mr. TURNER] will stand paired with my colleague [Mr. CLARK], and the Senator from Kansas [Mr. HARRIS] and myself will vote. I vote "yea."

The roll call was concluded.

Mr. PRITCHARD. I desire to transfer my pair with the Senator from South Carolina [Mr. MCLAURIN] to the Senator from Illinois [Mr. MASON]. I vote "yea."

Mr. VEST. Has the Senator from Minnesota [Mr. NELSON] voted?

The VICE-PRESIDENT. He has not voted.

Mr. VEST. I withhold my vote. I am paired with that Senator. I would vote "nay" and he would vote "yea" if present.

Mr. GEAR. Has the senior Senator from New Jersey [Mr. SMITH] voted?

The VICE-PRESIDENT. He has not voted.

Mr. GEAR. I withhold my vote. I am paired with that Senator. If he were present, he would vote "yea."

Mr. HARRIS of Kansas. Under the arrangement stated by the Senator from Wyoming [Mr. WARREN], I vote "nay."

Mr. MARTIN. On this question I am paired with the Senator from Oregon [Mr. MCBRIDE], and withhold my vote.

Mr. JONES of Arkansas (after having voted in the negative). I am paired with the Senator from Maine [Mr. HALE], but by an agreement with the Senator from Iowa [Mr. GEAR] I transfer my pair to the Senator from New Jersey [Mr. SMITH], and the Senator from Maine [Mr. HALE] and the Senator from New Jersey [Mr. SMITH] will remain paired until otherwise announced. My vote will stand.

Mr. GEAR. I vote "yea."

Mr. WELLINGTON. I desire to inquire whether the junior Senator from North Carolina [Mr. BUTLER] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. WELLINGTON. I am paired with the junior Senator from North Carolina, and therefore withhold my vote.

Mr. MANTLE. I should like to inquire what announcement has been made respecting the pair of the Senator from Utah [Mr CANNON]?

The VICE-PRESIDENT. No announcement has been made.

Mr. MANTLE. I understand that the Senator from Utah [Mr. CANNON] has a general pair with the Senator from Rhode Island [Mr. ALDRICH]. If the Senator were present, in this case he would vote to sustain the committee.

The result was announced—yeas 36, nays 26; as follows:

YEAS—36.

Allison,	Foraker,	Lodge,	Sewell,
Burrows,	Frye,	McMillan,	Shoup,
Carter,	Gallinger,	Mantle,	Spooner,
Chandler,	Gear,	Penrose,	Stewart,
Cullom,	Hanna,	Perkins,	Teller,
Davis,	Hansbrough,	Platt, Conn.	Thurston,
Deboe,	Hawley,	Pritchard,	Warren,
Elkins,	Hoar,	Proctor,	Wetmore,
Fairbanks,	Jones, Nev.	Quay,	Wilson.

NAYS—26.

Allen,	Daniel,	Lindsay,	Rawlins,
Bacon,	Faulkner,	Mallory,	Tillman,
Bate,	Gray,	Mills,	Turpie,
Berry,	Harris, Kans.	Mitchell,	Walthall,
Caffery,	Heitfeld,	Morgan,	White.
Clay,	Jones, Ark.	Pasco,	
Cockrell,	Kenney,	Pettus,	

NOT VOTING—27.

Aldrich,	Gorman,	Martin,	Roach,
Baker,	Hale,	Mason,	Smith,
Butler,	Harris, Tenn.	Morrill,	Turner,
Cannon,	Kyle,	Murphy,	Vest,
Chilton,	McBride,	Nelson,	Wellington,
Clark,	McEnery,	Pettigrew,	Wolcott.
George,	McLaurin,	Platt, N. Y.	

So paragraph 189 as amended was agreed to, as follows:

189. Watch movements, whether imported in cases or not, if having not more than 7 jewels, 35 cents each; if having more than 7 jewels and not more than 11 jewels, 50 cents each; if having more than 11 jewels and not more than 15 jewels, 75 cents each; if having more than 15 jewels and not more than 17 jewels, $1.25 each; if having more than 17 jewels, $3 each, and in addition thereto, on all the foregoing, 25 per cent ad valorem; watch cases and parts of watches, including watch dials, chronometers, box or ship, and parts thereof, clocks and parts thereof, not otherwise provided for in this act, whether separately packed or otherwise, not composed wholly or in chief value of china, porcelain, parian, bisque, or earthenware, 40 per cent ad valorem.

Mr. ALLISON. I propose now that we shall consider the lead paragraphs passed over. The first is paragraph 179, but the senior Senator from Nebraska [Mr. ALLEN] has the floor upon that paragraph. He will be here in a few moments. So I ask that it may be temporarily postponed, and that I may put in one or two small amendments. I ask the Senate to consider paragraph 267, one of the postponed amendments.

The VICE-PRESIDENT. If there is no objection, the Secretary will read paragraph 267.

The Secretary read lines 1 and 2, on page 79, as follows:

267. Pineapples, in barrels and other packages, 6 cents per cubic foot; in bulk, $6 per thousand.

Mr. ALLISON. I am instructed by the committee to move to strike out "six," in line 1, on page 79, and insert "seven;" and also to move to strike out "six," in line 2, and insert "seven."

The VICE-PRESIDENT. The amendment will be stated.

The SECRETARY. In line 1, after the word "packages," strike out "six" and insert "seven;" and in line 2, before the word "dollars," strike out "six" and insert "seven;" so as to make the paragraph read:

267. Pineapples, in barrels and other packages, 7 cents per cubic foot; in bulk, $7 per thousand.

Mr. VEST. Mr. President, I wish to call attention to the fact that here is an increase of 1 cent over the bill as passed by the House, and of 7 cents over the McKinley Act. I would just like to know by what sort of ratiocination and what sort of tariff evolution an article which the Republican party thought ought to be free in 1890 is now put under a duty of 7 cents per cubic foot. In the much-abused Wilson Act the rate was 20 per cent ad valorem. I recollect the debate very well upon that paragraph, and I think the Senator from Rhode Island now absent criticised severely our putting 20 per cent upon an innocent, healthful, tropical fruit which was produced only in one or two localities in the United States. Will the Senator from Iowa kindly inform us what climatic conditions, what sanitary objects, have caused him now to take this article off the free list and put it at 7 cents per cubic foot?

Mr. ALLISON. Well, there are both climatic reasons and sanitary reasons for doing so.

Mr. GALLINGER. And revenue reasons.

Mr. VEST. Very good. Then let us have them.

Mr. ALLISON. One is that pineapples are largely produced in Florida and the semitropical regions of our own country, and I understand they are very healthful food. There is great pressure to make this duty specific, and therefore a specific duty has been provided for instead of an ad valorem rate. It is thought that this will be a reasonable duty to protect that great industry in our country.

Mr. VEST. This is the first time I ever heard the fact that pineapples are raised in Florida stated as a sanitary reason for a duty upon that fruit. I have no doubt it is necessary to the political health of the Republican party, but outside of that I disclaim understanding at all how it can be a sanitary reason.

Pineapples are not largely raised in Florida. I was down there recently. They are raised around in a few localities, but it is by no means a large interest. I wish it were larger. I sympathize with the people of Florida in the misfortunes that have overtaken them, but I do not propose to put a duty upon the consumers of the United States out of all reason—7 cents per cubic foot—because there are a few counties in Florida where pineapples are raised. That is the whole of this matter. The sanitary reason consists simply in the fact that there are certain demands made upon the committee which they are bound to heed.

I shall move to strike out "7 cents" as soon as that amendment is adopted and insert the existing rate of 20 per cent ad volorem.

Mr. BACON. Will the Senator from Iowa permit me to inquire from what source the pressure comes to which he has alluded?

Mr. ALLISON. If the Senator from Georgia wishes specifications, I can not very well give them. I will say, however, that the pressure comes from both sides of this Chamber.

Mr. CAFFERY. Mr. President, it is not my province to support the pauper pineapples of the Tropics against the more robust and healthy food of Florida. I did not know until the Senator from Iowa made the statement that it was necessary to fertilize the Florida pineapples with the tariff bill.

I suppose that to help nature we ought to pile up a foot or two of tariff bills around pineapple bushes in Florida. They might grow that much more profusely. But I thought that those tropical plants had growth and sustenance from the natural elements in the countries where they flourish.

But in connection with pineapples I propose, as it relates to a Southern growth, to introduce and have incorporated in the RECORD a letter written to me on June 26 by Col. Albert B. Shepperson, of New York, a noted authority upon cotton. Colonel Shepperson is the author of Cotton Facts, and has a reputation well deserved and universally acknowledged as perfectly equipped and well informed upon all matters concerning cotton. I introduce his letter to me and ask that it may be incorporated in my remarks as containing most valuable information in regard to cotton and the 20 per cent tax thereon.

Mr. CULLOM. Does the Senator want to have it read?

Mr. CAFFERY. I do not care about having it read.

The VICE-PRESIDENT. In the absence of objection, the letter will be printed in the RECORD.

The letter referred to is as follows:

NEW YORK, *June 26, 1897.*

MY DEAR SIR: On 8th instant a letter from Mr. Wilbur F. Wakeman, of New York, in reference to the imports of raw cotton into this country, was read in the Senate. The letter was intended to convey the impression that foreign cotton was being sold in our markets in competition with American cotton, and in order to show that such competition is increasing it states that, "Until recently the importations have been chiefly of Egyptian cotton, but now 'upland' or staple cotton is also being imported to a considerable extent."

The entire letter is misleading, and its statement that "upland" cotton is being imported is absolutely without the slightest foundation in fact.

I have official and private information to substantiate the assertion that not a bale of foreign cotton similar to our "upland cotton" has been imported into this country, and that no foreign cotton except Egyptian cotton has been used in our cotton mills for over thirty years. The importations of cotton for consumption have been, practically, of no other kind but Egyptian and Peruvian. During the past two years a few bales of Chinese, East Indian, and African cotton have been imported to be used by woolen manufacturers as a cheap substitute for Peruvian cotton, the entire quantity being only about 150 bales. A few bales of other growths have been brought to the United States for transshipment to Europe.

Not only have there been no recent importations of "upland" cotton, as alleged by Mr. Wakeman, but the importations of foreign cotton for the nine months from September 1, 1896, to June 1, 1897, were much less than for the corresponding period of the previous season. For nine months ending June 1 the importations of Egyptian cotton were 54,945 bales, against 63,270 bales for nine months ending June 1, 1896. For nine months ending June 1 the importations of Peruvian cotton were 8,494 bales, against 18,932 bales for nine months ending June 1, 1896. The imports of cotton at San Francisco from Oceanica, etc., for nine months ending June 1 were equal in weight to 635 bales of American cotton, against the equivalent of 930 bales for nine months ending June 1, 1896. All of these figures are from custom-house returns in my possession.

All of the Peruvian cotton imported has been of the kind known as "rough Peruvian," and not a single bale of it has ever found its way into a cotton mill. "Rough Peruvian" is a peculiar kind of cotton having such close resemblance to wool that its sole use is for mixing with wool in the manufacture of underwear, hosiery, and cloths which are all sold to retail buyers as being made entirely of wool. The object of its use is to cheapen the cost of the goods. "Rough Peruvian" cotton does not compete in the least possible degree with any description of American cotton in any market in the world. Its price has no relation whatever to the price of other descriptions of cotton, but is influenced by the price of wool and the supply of "rough Peruvian" cotton.

On page 226 of volume 2 of Report of Senate Committee on Agriculture, February 23, 1895, is a statement over my signature giving somewhat in detail the characteristics of Peruvian and Egyptian cotton and the purposes for which these cottons are used. Egyptian cotton has a long, strong, silky staple, from 1¼ to 1½ inches in length, while the staple of what is called our "upland cotton" ranges from three-fourths to 1 inch, and our "sea-island cotton" from 1½ to 2½ inches. It is especially adapted for sewing thread, fine underwear and hosiery (such as "balbriggan," etc.), and for goods requiring smooth finish and high luster. It gives to fabrics a soft finish, like silk, and this character, together with its luster, makes it desirable for mixing with silk in the manufacture of various kinds of silk goods. For such purposes as I have named it is much better than our "upland cotton" and usually sells for about 2 cents a pound more.

For some of the purposes for which Egyptian cotton is used there is no American cotton which would be suitable. The good grades of our sea-island cotton are so much superior in fineness and strength to the best grades of Egyptian cotton that they sell for from 50 to 100 per cent more. The two growths of cotton differ so greatly in their character and value that there is really no competition between them. This view is fully concurred in by the Southern firm which sells more sea-island cotton than any house in the country. Our upland cotton is not good enough to compete with Egyptian cotton for use in the special purposes for which the latter is imported, and our sea-island cotton is too good and too high priced for the uses in which Egyptian cotton is generally employed.

The cotton of our country which most resembles Egyptian cotton is the fancy-stapled varieties known as "Allen," "Peeler," etc., which are grown to a very limited extent (chiefly in the Mississippi Valley). These cottons have a staple ranging from 1½ to 1¾ inches, but as they are ginned by saw gins, the staple lacks uniformity, and is often cut and damaged by the saws of the gin. They do not possess the high luster and silkiness of the Egyptian, and of course lack the brownish color which makes Egyptian cotton indispensable in "balbriggan" underwear and hosiery which are never dyed nor bleached. All Egyptian cotton is ginned by "roller gins," such as are used here only for our "sea-island cotton," and hence the staple is very regular and uniform. The yield of the varieties such as "Allen," "Peeler," etc., is usually much less per acre than the shorter-stapled kinds in general cultivation.

Unless the staple is sufficiently long and uniform to bring a price high enough to compensate for the smaller yield, the cultivation of these cottons is not profitable. There are no statistics upon the subject, but it is well known that the cultivation of these fancy varieties has diminished materially within the last few years. I do not think, however, that the reduction was caused by the importation of Egyptian cotton, but was due to the fact that because of its larger yield and more ready sale it was found more profitable to grow the shorter-stapled variety in common use. It has been represented that the present low prices for sea-island cotton are due to the importation of Egyptian cotton, but the true cause is the overproduction of sea-island

cotton for the past three seasons. The price of sea-island cotton is controlled by supply and demand, just like all other commodities. Being an article of comparatively limited use, an oversupply causes a much greater actual and relative decline than could possibly occur with upland cotton, for which there is so much larger use.

Our sea-island crop of 1892-93 was 45,418 bales. The crop of 1883-84 was 25,490 bales, and the average of the crops for ten years ending with 1893 was 45,000 bales. The crops since 1893 have been as follows: 1893-94, 61,052 bales; 1894-95, 74,628 bales; 1895-96, 93,045 bales. Of the present crop of 1896-97 there have already been received 101,000 bales, and the crop will be about 105,000 bales. It will be seen that the crops of the past three years amount to 273,000 bales, being an average of 91,000 bales, against an average for the ten years to 1893 of only 45,000 bales. It can not be maintained that Egyptian cotton has supplanted sea island cotton with our spinners, because they took 40,062 bales of sea-island cotton in the year ending August 31, 1896 (and are taking somewhat more this season), against only 11,674 bales in the year ending August 31, 1884, and an average of 21,000 bales for the ten years to 1893.

On page 354 of the Report of Senate Committee on Agriculture, to which I have referred, will be found details of the crops, exports, and American consumption of sea-island cotton for each year since 1874. Our spinners use considerably less than one-half of our crops of sea-island cotton, and the remainder is exported to Europe. I take a deep interest in the prosperity of our cotton growers, but it is my deliberate judgment that a duty upon cotton will not benefit them in the slightest degree, while it will doubtless prove a serious injury to manufacturers in New England and New York by increasing the cost of the Egyptian cotton, which they will have to use for such purposes, as they can provide no substitute.

The cotton which comes here from other countries does not, in my opinion, restrict the sale or affect the price of American cotton in any of our markets.

Only about 30 per cent of the American cotton crop is taken by our spinners. The remainder is exported to Europe, in whose chief markets the price is adjusted by the competition of the surplus cotton received from India, Egypt, Brazil, and other countries. The price is regulated by the varying conditions of present and prospective supply and demand. The fact of our placing a duty on cotton could not have any effect upon European markets except that just to the extent that Egyptian shipments to America might be curtailed the supply available for Europe would be increased. The European price necessarily fixes the price of cotton for the American markets, as it would be utterly impossible for the purchasers of only 30 per cent of the crop to govern the price to be paid by the buyers of the other 70 per cent.

The price of our cotton is not fixed by the views of its owners or their commission merchants, but is regulated by what the European spinners are willing to pay for it, and no one can pretend that the imposition by us of a duty on Egyptian cotton will make our cotton any more valuable to European spinners. Very little Egyptian cotton was imported previous to 1884. The annual importations since then have been as follows, for years ending August 31, viz: 1885, 4,553 bales; 1886, 3,815 bales; 1887, 4,700 bales; 1888, 5,702 bales; 1889, 8,430 bales; 1890, 10,470 bales; 1891, 23,730 bales; 1892, 27,739 bales; 1893, 42,475 bales; 1894, 33,606 bales; 1895, 59,418 bales; 1896, 60,220 bales. To May 31 of the year ending August 31, 1897, the imports have been, as already stated, 54,945 bales. The present weight of Egyptian bales is about 724 pounds net, while Peruvian bales weigh about 175 pounds.

The increase in the use of Egyptian cotton here is due to the fact that many descriptions of goods are now made in this country for which we formerly depended entirely upon European manufacturers.

Instead of being of assistance to the cotton growers, I think a duty upon cotton will prove to be, at least for a time, an injury, inasmuch as it will cause the planting of larger crops of sea-island and fancy-stapled cottons, when the present production of these cottons is now so great that prices are below a remunerative point. To increase the supply without a corresponding increase in the demand must inevitably result in lower prices.

I have the honor to remain,

Very respectfully, your obedient servant,

ALF. B. SHEPPERSON.

Hon. DONELSON CAFFERY,
United States Senate, Washington, D. C.

P. S.—The fact that the Senate had voted on 8th instant to impose a duty of 20 per cent on raw cotton was known in every important market in this country and Europe by the next day, and has had no effect whatever upon the price of "sea-island" or any other description of American cotton. If merchants believed that the effect of the duty would be to enhance the value of any kind of cotton, they would buy so freely as to advance prices before the actual enactment of the law. On May 28 the official quotations of "middling upland" cotton were 7¼ cents in New York and 4½ pence in Liverpool, and to-day's quotations are exactly as on that day. The quotations of South Carolina sea-island cotton in Charleston and of Georgia and Florida sea-island cotton in Savannah to-day are precisely the same as on May 28. My latest Liverpool quotations of sea-island cotton are for 17th instant, and while the prices for Georgia and Florida sea-island cotton were the same as on May 27, the prices for some grades of South Carolina sea-island cotton were a little lower.

Our imports of Egyptian cotton are now used in about the following manner: Thirty-five per cent for balbriggan underwear and hosiery; 35 per cent for fine cotton goods requiring a cotton of fine and strong fiber and absolute freedom from "nits" or other imperfections; 30 per cent for sewing cotton and for fine yarns to be used in "silk-and-cotton," and also "worsted-and-cotton" goods. Also, for some other special purposes to a limited extent.

Egyptian cotton is not used for yarns of finer "counts" than 120. For yarns above 120's, our sea-island cotton has to be used here and in Europe, as Egyptian cotton does not possess the requisite fineness and strength.

A. B. S.

Mr. GRAY. Has the committee amendment been adopted?

Mr. ALLISON. It has not been adopted.

Mr. GRAY. I wish to say a single word. I do not wish to interfere with the adoption of the amendment of the committee.

The amendment was agreed to.

Mr. VEST. I have offered an amendment to the paragraph.

The VICE-PRESIDENT. The amendment of the Senator from Missouri is to strike out "7 cents" and insert "20 per cent ad valorem." The question is on agreeing to that amendment.

Mr. GRAY. Mr. President, this may be considered by the Senator from Iowa and others one of those little amendments of which he spoke, but it is an important one nevertheless. It is a proposed tax on an important food product. It is meant to raise the price of this wholesome and pleasant fruit to the great body of American consumers, and as such I believe it to be indefensible. I do not believe that the people of this country, the toiling masses of this country, will submit cheerfully to the imposition of this tax upon this fruit. They have a right to the bounties of the soil of the country certainly, as a right to the bounties of nature everywhere, without legislative interference, and nothing ought to be interposed between the access of the people to the bounties of the soil by legislative enactment.

This fruit, as has already been said, is a luscious and delightful one, and it is an exceedingly wholesome one. There is no foreign fruit that is more recommended by the medical faculty than the pineapple.

I wish to call attention again, in the few words I have to say, to the fact that you can not attempt to raise the price of one article of American produce without interfering with industries that are not suggested and are not often thought of. There is a very important industry in this country that is as worthy as the growing of pineapples, to wit, the preserving industry. It flourishes in the region from which I come, in that State and the neighboring State; and it will be seriously affected and thousands of persons, literally thousands of persons who are employed in that industry, will feel the pinch of increasing the price of this fruit, which is put up, packed, and distributed all over the country and shipped abroad, if the raw material of that industry is thus enhanced in value by the imposition of this tax.

Again, Mr. President, our commerce in fruit, the shipbuilding industry, the shipowning industry, will be affected by it. There are a large number of comparatively small but quick-running vessels, steam and sail, that are engaged in the fruit commerce. They take out the American produce and they bring back these tropical fruits. All of that is interfered with by the imposition of this tax. I think it is unconscionable that those who have the raising of pineapples, that come to them as a gift of nature, of soil and climate, should demand the levy of this tribute not only upon the great mass of American consumers, but upon kindred industries.

Here is an industry as healthy as any, as I have just said, upon which they wish to levy a tribute and to tax in order that the pineapple, which grows abundantly in a small portion of the country, may be increased in value to the owner of the land. Now, I protest against that in the name of the consumers of this country and for the health of the people, and because it will have effects that are not seen and are not stated here upon an important part of our commerce. We have no right to put the interfering hand of the Government into the business of the people in this fashion and obstruct by this tax the natural conditions which have grown up around this industry.

Not only does the substitution of the specific tax for the ad valorem tax increase the burden by the amount that appears upon the face of the bill, but by making it a matter of measurement and count with this delicate article of fruit, that has to be handled carefully and ought not to be handled more than is absolutely necessary, you place an additional burden that can not be computed in dollars and cents upon the importation of this article. If you have to stop to measure them, or if you have to stop to count them, there is another legislative obstacle placed in the way of the importation of this article that is not computed here in dollars or in cents, but nevertheless makes an increased difficulty to the importer and adds to the cost and difficulty with which the fruit is obtained by the consumer.

Mr. MALLORY. I should like to ask the Senator from Delaware if he knows the equivalent ad valorem duty of 7 cents on pineapples as proposed here?

Mr. GRAY. I did know; I looked at it, but I can not state it just now without a reference to some papers I have.

Mr. MILLS. In the table the equivalent ad valorem of 6 cents is 45 per cent.

Mr. GRAY. I would be obliged to the Senator from Florida if he has any information on this point.

Mr. MALLORY. I have not. I will state that the pineapple industry in Florida has increased very much in the last three or four years, owing to the fact that by the construction of a railroad down the eastern coast of the peninsula of Florida a country adapted to the cultivation of the pineapple has been opened. Most of the pineapples that come to this country from the West Indies are cut from the stalk while green and they arrive here green. There is a vast difference in the quality of a pineapple that is cut green and allowed to ripen off the stalk and one that is taken after it has ripened.

By the completion of this line of road, which runs from St. Augustine down to what is known as Miami, some 300 miles, the country adapted to the cultivation of the pineapple has been placed within easy reach of the market, and the people down there engaged in it are making it a prosperous industry. The islands known as Florida Keys are well adapted to the cultivation of the pineapple. I have not had an opportunity to investigate the matter, but I find here in the hearings, Schedule G, on the subject of pineapples, that the Pineapple Growers' Association of Lake

Worth ask for an immense duty as compared with this. They ask for a duty of 25 cents per cubic foot in barrels or packages, or 2 cents a pound in bulk.

It seems to me that the estimate of 45 per cent ad valorem being equivalent to 6 cents on a cubic foot is a rather large one. A cubic foot of space ought in my judgment to hold at least 25 or 30 pineapples of ordinary sizes. I think if figured out it would be found that 45 per cent is rather a large estimate of the ad valorem duty.

The fact that this duty may impose a burden upon the canners in Baltimore and other sections of the country, as stated by the Senator from Delaware, is probably correct, but at the same time is that not a species of protection?

Mr. GRAY. I did not catch the last remark.

Mr. MALLORY. Is it not a species of protection that the Senator himself is asking for his canners? As I understand the Senator's position, he is contending that there should not be any duty above an ad valorem duty of 20 per cent imposed on pineapples, because it may interfere with the canning industry carried on in Delaware.

Mr. GRAY. I say it will interfere, of course.

Mr. MALLORY. In other words, it is a species of protection that the Senator from Delaware is asking for the canners of Delaware and Maryland at the expense of the pineapple growers of Florida.

Mr. GRAY. Mr. President, if to ask that things which grow out of the soil shall come to the hand of man to tempt his labor and feed his enterprise is a species of protection, then I have misconceived altogether the whole principle and theory of protection and of free trade. All that I ask, and all that any free trader asks, is that the hand of man may not be prevented artificially, if I may use the word—that it may not be prevented by legislation from laying hold of the materials that nature gave us in order that man may employ himself profitably, for his own benefit and for the benefit and the health of mankind. We are put in this world with certain conditions surrounding us, and we ought not to be prevented by legislation or by artificial obstacles from using the labor, the ingenuity, the brain that we are endowed with in order that we may profitably avail ourselves of what nature and climate and soil have done for us.

If to ask exemption from those artificial impediments means protection, then I am a protectionist in that sense, and I would to God that I might envelop this country in just such protection.

Mr. President, my distinguished and honorable friend from Florida has just told the Senate what was very interesting to me, and it was something that I heard with a great deal of pleasure and gratification, that down in his favored State, where sunshine and soil so bless the labor of the husbandman, there has been recently opened up an area for the growth of the pineapple—that luscious, wholesome fruit—which has become profitable and prosperous, to use the Senator's own words, by reason of the fact that it has been brought into communication with the great markets of the country by a recently constructed line of railroad—if I understood him properly—that has brought this product up to our doors and brought the market to the doors of the constituents of the honorable Senator, and that, forsooth, is the pretext for taxing the people for that very article. It would have been better to have left those worthy constituents in their primitive simplicity, without the modern access to market that railroads give, if that access is only to be the ground and the justification for the imposition of a tax upon the American people.

Of what good is a railroad to this great market of the American people? Of what advantage to the consumers of pineapples is it that they are grown on an increased and enlarged area there and in greater abundance and prosperously for the people of the State? What advantage is it, I say, to the great body of the people that this railroad has been built—one of the great blessings of civilization—if you are to neutralize the benefit of the railroad by a tax?

Mr. President, it only recalls that illustration given years and years ago by Bastiat, when he illustrated what custom-houses did, by supposing two great and prosperous cities in the Middle Ages, whose names I have forgotten, separated by a chain of mountains, but both inhabited by an enterprising, industrious, and intelligent population. Across that chain of mountains, with great difficulty and much effort and much toil, they had created a pathway over which commerce found its way, and the interchange of the products of the two countries, separated by soil and climate and differing in natural aptitudes, found its way.

After a while, appreciating what this small commerce did, with increasing wealth and increasing enterprise and great labor and toil, as the result of years of labor a great broad highway was leveled across that mountain chain, and into it poured a commerce that was fructifying and enriching to both communities in tremendous proportions. They all had their jubilees on the opening of this highway, congratulated themselves on their advance in civilization and in the well-being of those communities, when, lo and behold, a new school grew up of what now would be called protectionists, and they placed a custom-house at each end of the highway, and thus neutralized all that so much labor and toil had accomplished by placing a legislative obstacle where before there had been a natural one.

Mr. MALLORY. Before the Senator concludes, as bearing on the question, there being an amendment pending, if I am not mistaken, proposing to put a tariff of 10 per cent on all articles on the free list, I ask him if, from his view, he would be justified in voting for that proposition?

Mr. GRAY. Certainly not.

Mr. MALLORY. I also ask the Senator if he is in favor of a tariff on peaches?

Mr. GRAY. I am not.

Mr. MALLORY. The Senator is opposed to a tariff on peaches?

Mr. GRAY. I am.

Mr. MALLORY. Or a tariff on canned goods?

Mr. GRAY. Or a tariff on canned goods for protection. There is a revenue tariff.

Mr. MALLORY. I will state that I am as much opposed to a protective tariff as the Senator from Delaware; and I do not think I shall vote for this proposition to increase the duty simply because I am inclined to think that it is to a certain extent beyond a revenue tariff. I deem it my duty, however, representing my constituents, to call attention to the situation, and as it has been stated here that there was no considerable amount of pineapples raised in this country, I think it proper to state the fact that not only is there a considerable quantity raised now, but there is every prospect that it will amount to a great industry in the State which I have the honor in part to represent.

Mr. GRAY. If the Senator will allow me, I meant to state, on the amendment that is pending, that the present rate of duty is 20 per cent ad valorem, and that the equivalent ad valorem of the proposed duty is about 55 per cent.

Mr. MALLORY. That is, at 7 cents a cubic foot.

Mr. GRAY. Yes.

Mr. PASCO. Mr. President, as my colleague [Mr. MALLORY] has stated, the culture and growth of the pineapple is a very important and valuable industry in the State of Florida. It has been rapidly developed within the past few years. In the Wilson law, for the first time, this fruit was made the subject of tariff taxation. Then a duty of 20 per cent ad valorem was put upon pineapples, which yielded $66,413.51 of revenue in 1896.

In the text of the bill as it was passed by the House of Representatives, the duty on pineapples in barrels was fixed at 6 cents a cubic foot and in bulk at $6 a thousand, and, as I understand, the amendment the committee proposes would raise it to 7 cents a cubic foot and in bulk to $7 a thousand. I propose to show how this compares with the duty on other fruits, as shown by a table which has been recently prepared by the Indian River and Lake Worth Pineapple Growers' Association, of Florida. According to the rate in the bill, apples are taxed at 75 cents a barrel, and in the bill as it came from the House grapes and peaches are taxed at double the rate on apples—that is, at $1.50 a barrel; while the pineapple rate as fixed in the present bill is equal to 30 cents, or one-fifth of the latter amount. The additional 1 cent per cubic foot added by the Senate amendment will increase the amount on pineapples to 35 cents, and even then it will be less than one-half the rate fixed upon the Northern apple and less than one-third the rate fixed upon grapes and other fruits.

This document presents the case of the pineapple growers of Florida, and gives their reasons for asking for an increased duty. It has been printed for the use of the Senate, and has been in the hands of the committee. They have seen fit to recommend an additional duty on this product, but not as large as was asked for. The proposition offered by the Pineapple Growers' Association was to raise the duty to 15 cents per cubic foot and $10 per thousand. This would put the duty on pineapples upon an equality with the duty upon apples, according to the terms of the present bill.

Mr. President, in my judgment, if this bill is to work equally, if all sections of the Union and all parts of the country are to be treated with equality, as we have been assured, then it seems to me those who framed the bill and those who are supporting it on the other side of the Chamber should have fixed the duties on Northern and Southern fruit upon a basis of equality. We were assured the other day that everything was intended to be treated with the same degree of impartiality and fairness in all parts of the Union; but we find that there are very many exceptions, and this is a striking one.

Take the article of cocoanuts. They are also raised in the same section of country where the pineapple grows. They were put in the Wilson law upon the dutiable list, and here they are transferred to the free list.

So far as I am concerned, Mr. President, I deem that I have done my duty sufficiently in laying these facts before the Senate and in presenting them, as I have done, to the members of the Finance Committee and to others who have influence in framing the bill.

I have thought if this bill is to be framed upon lines of equality, fairness, and impartiality, the fruits raised in our section of the country ought to receive the same amount of duty and be placed upon an equality with fruits raised in the Northern section of the country. It does seem to me that there can be no reason why the apples of the North should have high rates imposed upon them, while the Southern semitropical fruits, raised in our section of the country, are treated in a very different manner.

Mr. ALLISON. What does the Senator from Florida propose?

Mr. PASCO. The desire of this Pineapple Growers' Association, whose members live in the section of my State where these fruits are raised, was to put pineapples exactly upon a level with the Northern apple, at 15 cents per cubic foot. That, according to the comparison to which I have called the attention of the Senate, would put pineapples upon an equality with apples, while grapes have a duty upon them doubly as large. Their proposition was to amend paragraph 267 by substituting 15 cents for 6 cents per cubic foot and $10 for $6 in bulk; so that the paragraph would read:

267. Pineapples, in barrels and other packages, 15 cents per cubic foot; in bulk, $10 per thousand.

A large number of settlers who have gone into that section of Florida and have embarked in this industry are from the North. Many of them are Republicans. A gentleman who represented this industry was for some time in this city whilst the bill was in preparation in the House and whilst it was under consideration by the Senate Finance Committee. He was originally from the North and is a Republican, and he thought when the Republican committee and the Republican House were arranging these dut es, that, although he had gone down into a Southern State and made his home there, he and his people should be treated with the same equality that his friends living in his former State were with reference to the fruits they raise.

These matters are now before the Senate, and were before the Senate Finance Committee, but I am well aware that it is useless for me to make any motion to increase the rate beyond what the committee proposes. The framing of the bill depends entirely upon the Republican committee and upon the Republican side of this Chamber, and the responsibility of increasing the rates rests with them.

A few years ago this matter was deemed of sufficient importance by the State legislature of Florida to pass resolutions in favor of a much higher rate of duty upon pineapples and other semitropical fruits, upon the ground that they are luxuries, and therefore proper subjects for revenue, and they instructed their Senators and Representatives to favor such higher rates, and in carrying out those instructions I do not feel that I am abandoning any political principles which I have heretofore entertained and still entertain.

If the people of my State who are engaged in this industry were free from the burdens of tariff taxation, they would, perhaps, feel able to carry on their business with lower rates of duty; but their feeling is that, whilst all these other burdens are placed upon them, they should be treated with some degree of fairness, and that the benefits, if there are any, from this protective measure should not all be given to people residing in other sections of the country.

This is the situation, Mr. President, and I submit it to the Senate. I believe if the committee had acted with that degree of fairness with which they have toward other industries that the rate of duty in this bill would have been fixed at a higher rate.

I favor the action proposed by the committee increasing the rate from 6 to 7 cents per cubic foot, but do not think it goes far enough. I can not support the amendment of the Senator from Missouri [Mr. VEST].

I ask leave to insert as a part of my remarks the document to which I have referred.

The VICE-PRESIDENT. In the absence of objection, that order will be made.

The document referred to is as follows:

[Senate Document No. 129, Fifty-fifth Congress, first session.]

PINEAPPLES GROWN IN THE UNITED STATES ENTITLED TO A HIGHER DUTY.

Mr. PASCO presented the following statement by the Indian River and Lake Worth Pineapple Growers' Association, incorporated, of the east coast of Florida, of the reasons why pineapples grown in the United States should have a higher duty than that now proposed by the Dingley bill, with figures and information:

The Pineapple Growers' Association of Florida embraces 200 members, and about the same number of nonmembers are also engaged in the growing of this fruit. The association is organized and incorporated under the laws of the State of Florida, and fully officered in accordance with said law. This organization at a recent meeting passed resolutions favoring a specific duty of 20 cents per cubic foot on all pineapples imported into the United States. This would amount to a duty of 1¼ cents apiece on green pineapples.

In the bill as originally reported pineapples were included at 2 cents per pound. This was much higher than asked by the Florida growers and was, as a matter of fact, entirely prohibitory. At the solicitation of the canners of Baltimore, the Committee on Ways and Means in the House saw fit to make a very sweeping reduction in these rates, namely, to $6 per 1,000 in bulk and 6 cents per cubic foot when imported in crates or barrels. This reduction was made without the knowledge of the Florida growers and without affording them an opportunity to be heard or represented before that committee in the House.

The Senate Finance Committee now having under consideration the revision of the so-called Dingley tariff bill, as reported from the House of Representatives, are respectfully asked to consider the following facts in relation to the producer, the importer, the canner, and the American consumer of this fruit.

For the information of the members of your honorable body the following statistical informat on is submitted:

The standard crate contains 2½ cubic feet; the barrel crate contains 5 cubic feet. The average number of fruit in the standard crate is 30; the average number in the barrel crate is 60. Pineapples range in size from 48 to 80 per barrel crate, and the experience of ten years shows that 60 is the average size.

The weight of the fruit in the standard crate of 2½ cubic feet is about 75 pounds, or 150 pounds per barrel crate.

It is not believed by practical growers or importers that the rate per pound is the best way of putting it, the objection being that this compels the weighing of the fruit, which is a slow and destructive process. The better method would seem to be a rate at so much per cubic foot, or number of thousands, when imported in bulk, it being easy to calculate the cubic feet in a vessel or to ascertain the number of thousands contained in a cargo.

The Baltimore canners, when before the Ways and Means Committee in the House, are reported to have represented that Florida pin apples were too large and expensive for canning purposes, and that they range in price from 15 cents to $1 apiece. It is true that occasionally a very large or fine Puerto Rico pineapple will sell at $1. The number of these grown, however, does not amount to one-tenth of 1 per cent of the entire output of the Florida growers. We feel flattered by the high estimate placed upon our fruit by these canners, and only regret that it is not to any extent realized by us. The ordinary red Spanish pineapple, which goes to the Northern, Eastern, and Western markets, nets to the grower not more than 5 cents apiece, or about $3 per barrel crate of 60. The selling price in the market rarely reaches 10 cents apiece, and in a large majority of cases is from 6 to 8 cents apiece.

We do not think that it is a reasonable objection to an advance in the rate of duty that our pineapples are larger, nor is it the occasional price that should fix the standard for the measurement of the entire crop. The Florida growers would be very glad to make contracts with the Baltimore canners at 5 or 6 cents apiece instead of the fabulously high prices that were reported. Further than this, along that line, and as a collateral proposition, we think there should be an increased specific duty on imported canned pineapples, both to protect the Florida canneries, of which there are a few, and also the canneries in Baltimore and elsewhere.

In the revision of the fruit schedule, if your honorable body should favorably consider an increased duty on canned pineapples, it would remove much of the objection of the Baltimore canners and at the same time be an act of justice to the Florida canners. While we do not urge this as an independent proposition, we submit that it is worthy of consideration as being in line with the higher duties imposed on manufactured products. We believe that a specific duty of 40 cents per dozen 2 pound cans would afford protection to our home canners and at the same time produce a revenue for the Treasury.

We desire to call attention to the twofold nature of the bill. In the first instance, it is designed to produce revenue for the Government, and, incidentally, it is also purposed to protect and foster American industries wherever such fostering care is needed. Your honorable body will scarcely ignore the fact that the producers of the raw material are entitled to as much consideration in formulating this tariff schedule as the importer, canner, or manufacturer.

Indeed, we think that more consideration should be given the producers, for the reason that they invest their capital, their toil, devote their time and attention to the original production of the material, without all of which the importer, the canner, and the commission man would not have the opportunity to do business in these products. We submit, further, that the importer or commission man ordinarily invests nothing, handling the material mostly on commission. While we do not deny to the canner the right to secure the raw material at a reasonable figure, we do not think it fair that this material should be so cheap as to offer him protection at the expense of his more unfortunate neighbor.

We ask the attention of your honorable body to the relative cost of production, transportation, and marketing of the Florida crop as compared with Cuba or the Bahamas, from which places the bulk of the foreign pines come. In Florida the items are as follows: Cost of the land, $100 per acre; cost of fertilizers, $40 per acre; cost of labor, $1.25 per day; cost of transportation to market, $1.50 per barrel crate; cost of commission for selling, 10 per cent. In comparison with this the following figures will speak for themselves: In the Bahamas, cost of land, $5 per acre; cost of fertilizers, $15 per acre; cost of labor, 30 cents per day; cost of transportation to market, 50 cents per barrel crate; cost of selling, 5 per cent.

It is also true that in many instances the cost of fertilizing the land in the Bahamas is nothing, and the price of transportation in bulk in foreign vessels is less than the figures just given. Comparing Cuban importations with Florida shipments, a still larger discrepancy is shown in all these items, the cost of fertilization in Cuba being practically nothing and the cost of labor less than in the Bahamas, while the cost of transportation to our great Eastern markets is substantially the same as for the Bahamas. In Florida, therefore, we are handicapped by high land, high labor, heavy cost of fertilizers, and heavy cost of transportation to the markets of the East, North, and West.

The Florida grower does not readily subscribe to the doctrine of reducing our labor to the level of the labor in these tropical countries. We believe that a degraded, poorly paid labor is a detriment and a menace to any country and not in accordance with the genius of American institutions.

We submit, also, that under the increased tariff schedules on manufactured products, of which we are consumers, the expenses of living in tropical America will be largely increased, and that ordinary fairness would dictate such a duty on our products as would not discriminate against us.

Our pineapple growers will be content with such a duty as will put us on a par with the foreign importers of pineapples and enable us to compete with them, all things considered. We believe that the duty should be equal, at least to the difference in transportation between our fields and the markets of this country and the same items from the foreign countries. We are satisfied that the rate of $6 per 1,000 and 6 cents per cubic foot, as now proposed, will not compensate us for these unequal conditions.

Looking at the question from the standpoint of the consumer, we feel certain that a duty of 1 cent apiece on pineapples increases their cost to the consumer to so slight an extent that he will not be found objecting thereto. This will enable us to supply the markets of the country with the most superior pineapple grown in the world in ample abundance to meet the requirements of the trade and at a very moderate cost to the consumer.

The natural increase of the pineapple plantations has been fully 50 per cent per year, and we believe that, under the stimulus of a tariff of $10 per thousand on fruit imported in bulk, and 15 cents per cubic foot when imported in barrels or crates, the increase will be much larger per annum. There are on the east coast of Florida hundreds of thousands of acres of land suitable for

successful pineapple growing. Under the stimulus of the duty asked by us all this land would be developed and the American markets made independent of the growers of foreign pineapples. Assuredly this has been the keynote of American policy for many decades.

Touching the question of our production of this fruit, the affidavit of Mr. E. P. Porcher, general agent of the Indian River and Lake Worth Pineapple Growers' Association, is herewith submitted. This sworn statement will effectually remove the notion that the output from Florida is insignificant, and prove that it is a large quantity, equal to 6,000,000 pineapples, with immense possibilities for expansion:

COCOA, FLA., *January 12, 1897.*

Personally appeared before me E. P. Porcher, general agent of the Indian River and Lake Worth Pineapple Growers' Association, who, upon oath, makes the following statement as to the number of packages of pineapples shipped by the association and through other channels from the east coast section of the State of Florida, commencing with the regular shipping season in May, 1896, and continuing up to the 1st day of January, 1897:

	Packages.
Handled by the association	53,641
Handled by the association, special forwarding	3,600
Shipped direct by growers	5,700
	62,941
Shipped from keys and Biscayne Bay (estimated)	44,000
Total	105,941

This package estimate is based on half crate measuring 10 by 12 by 36 inches. The crop for the coming year is estimated at from 180,000 to 200,000 packages.

E. P. PORCHER, *General Agent.*

Subscribed and sworn to before me the date first above written.
[SEAL.] ALBERT A. TAYLOR,
Notary Public, State of Florida at Large.

Mr. H. E. Hutchinson, a prominent importer of New York, having thirty-two years of experience, makes the statement that before the Cuban war 250,000 barrels of pineapples were imported each year into the American markets, but that the importations for the current year would be somewhat decreased, owing to the war, possibly reaching 150,000 barrel crates. Mr. McCormick, a prominent importer of New York, states that this year 20 cargoes of 80,000 each will be imported from the Bahamas. The delegation of Baltimore canners, when before the Committee on Ways and Means, are reported to have stated that the canners of this country imported 4,000,000 green pineapples from the Bahamas for use in their canneries. It will thus be seen that our markets are glutted with foreign pineapples at the exact time when the fruit from the Florida plantations is coming forward.

The following statistics, taken from the reports of the Treasury Department, are herewith submitted for your earnest consideration:

Year.	Quantity.	Valuation.	Duty.
1896.....barrels..	299,245	$332,069	$66,413
1895.....	Not reported.	314,039	51,564

The valuation being $1.15 per barrel and the duty 22 cents per barrel. This small amount results from the undervaluation possible in the ad valorem system. It affords a reason for the specific duty. By the specific duty as herein proposed at the rates asked for, the revenue for 1896 would have been $217,480 as against $66,413, and this without increasing the price to any appreciable extent.

The Pineapple Growers' Association, through its representative, regrets the necessity of discussing the condition of the people of that State. Your honorable body need scarcely be reminded of the great freeze of two years ago, which prostrated all our industries, and was a severe blow to the energy, the patriotism, the fortitude, and the endurance of the Florida people. The effects of that disaster have not yet been removed, and we submit, as citizens of a common country, that this condition should receive consideration at the hands of those who are intrusted with the vital interests of the people at large and the equalizing of the tariff schedules, so that all alike may experience their benefits and bear their burdens.

With high duties on clothing, hardware, building supplies, and manufactures of every kind of which we are consumers, we think in compensation, therefore, a moderate and stimulating duty should be imposed upon our product in order that fairness and equity might result to our people. The producers of this fruit are fully satisfied that the hasty consideration of this matter in the Committee on Ways and Means has worked an injury upon them. This haste grew, possibly, out of the necessities of the case, but was, in many instances, unfortunate in its results. No time was possible for that careful consideration and readjustment of these fruit schedules which the interests of the producers imperatively demand.

It is the popular impression that your honorable body will proceed with more deliberation, and we trust that, aside from this presentation of our case, we shall be afforded the opportunity to further discuss this matter with the Committee on Finance in your honorable body. It has already been shown that as a revenue producer the duty on pineapples as now incorporated in the schedule is a failure. As a protective measure it certainly does not reach the expectations of all the parties concerned, being only one-tenth of that originally proposed by the Committee on Ways and Means in the House, who at one fell blow reduced it to such a pittance as to be unworthy of the consideration of the public at large and direful in its results to the producers.

In conclusion, your honorable body is respectfully requested to consider the following recommendations: That instead of 5 cents per cubic foot you give 15 cents per cubic foot, which is a trifle over 1 cent apiece on pineapples imported in crates or barrels; that on pineapples imported in bulk you give $10 per thousand instead of $5, which is exactly 1 cent apiece. We would also ask that instead of the present ad valorem duty on canned pineapples you give a specific duty of 40 cents a dozen 2-pound cans, or its equivalent.

This will enable the American canners, both of Baltimore and Florida, to compete with the Nassau and Cuban canners, and at the same time produce revenue for the Government, which is one of the objects of the bill, without materially increasing the cost to the American consumer or doing injury to anyone engaged in this trade.

Respectfully submitted.

C. T. McCARTY,
On behalf of the Indian River and Lake Worth Pineapple Growers' Association.

Comparisons between pineapples and other fruits reduced to same quantities.

SCHEDULE G.—AGRICULTURAL PRODUCTS AND PROVISIONS.

COMPARED WITH FRUITS.

Apples	per barrel..	$0.75	Pineapples	per barrel..	$0.30
Grapes	do....	1.50	Do	do....	.30
Peaches	do....	1.50	Do	do....	.30
Oranges	do....	1.50	Do	do....	.30

Potatoes	do....	⅛	Do	do....	¼
Seeds (upward)	do....	¼	Do	do....	¼

These figures are taken from the Dingley bill, as now in the Senate Finance Committee, reduced to the same equivalent as to weights and qualities.

As to the inequalities of the schedule, they make a conclusive argument. They also justify the fair and moderate requests of the Florida pineapple growers, which is only one-half cent per pound.

Very respectfully submitted.

C. T. McCARTY,
For the Indian River and Lake Worth Pineapple Growers' Association of Florida.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST].

Mr. PASCO. I ask that the amendment may be stated, so that it may be clearly understood.

The VICE-PRESIDENT. The proposed amendment will be stated.

The SECRETARY. On page 79, paragraph 267, line 1, after the word "packages," it is proposed to strike out "7 cents per cubic foot; in bulk, $7 per thousand" and insert "20 per cent ad valorem."

Mr. SPOONER. I call for the yeas and nays.

Mr. PASCO. I do not understand the amendment. I thought it was to substitute "seven" instead of "six."

The VICE-PRESIDENT. That has been agreed to. Two amendments have been agreed to, substituting "seven" in place of "six" in the first line of paragraph 267, and "seven" in place of "six" in the second line. The Senator from Missouri [Mr. VEST] now moves to strike out all after the word "packages" and insert "20 per cent ad valorem."

Mr. VEST. Who called for the yeas and nays?

The VICE-PRESIDENT. The Senator from Wisconsin [Mr. SPOONER].

Mr. SPOONER. I withdraw the call.

The VICE-PRESIDENT. The call is withdrawn. The pending question is on the amendment proposed by the Senator from Missouri [Mr. VEST].

The amendment was rejected.

Mr. ALLISON. I now ask to go back to paragraph 179, in relation to lead ore.

The VICE-PRESIDENT. The paragraph has been heretofore read, and the Chair recognizes the Senator from Nebraska [Mr. ALLEN] as entitled to the floor.

Mr. ALLEN. Mr. President, I am opposed to the proposed change of the Finance Committee to this paragraph because it will have the direct effect of driving many of the smelters of this country into Mexico.

I may be permitted to say that within the last six or seven years something like seven or eight smelters have been built up in Mexico by American capital in consequence of the unfair treatment, as they claim, of tariff taxation. I am informed by those who are in a position to know, and whose testimony I will read in a moment, that smelters in the United States can not afford to pay the tax of a cent and a half a pound upon lead in ore, and that the practical effect of the adoption of this proposed amendment of the committee will be either to close up these smelters or to materially cripple them in the execution of their business.

I want, in this connection, to read, although it is somewhat lengthy, the testimony of Mr. W. H. Alexander, of the Omaha and Grant Smelting Company, before the Committee on Ways and

Means of the House of Representatives on "Schedule C.—Metals and manufactures of." I read from page 407:

SATURDAY, *January 9, 1897.*

Mr. Alexander said:

Mr. Chairman and gentlemen of the committee, I am here to-day in response to your published invitation as the representative of the Omaha and Grant Smelting Company, whose principal smelting and refining works are in Omaha, Nebr., and Denver and Durango, in Colorado. What I shall say concerning tariff matters affecting the interests of this company, and of other great institutions of like character, is the result of thoughtful observation, not only in recent years as an interested party, but as an officer of the Government from 1889 to 1894, when, as surveyor of customs at Omaha, it was my duty to interpret and execute tariff regulations. While making these observations, I have endeavored at all times to consider both sides of disputed questions, and, whether right or wrong, my opinions have been honestly formed.

The act of 1890, commonly known as the McKinley bill, corrected certain items in the then existing schedules relating to lead ores and lead in other ores, which experience had shown to be inequitable, but it contained other and new provisions which, in my own judgment and the judgment of the company which I have the honor to represent, have proved scarcely less objectionable than the ones they were framed to correct. Some of these provisions were embodied in the act of 1894, and are still in force. It is to these particular items, and to the absence from the schedules of another very essential provision, that I desire to call your attention at this time. Paragraph 165 of the so called Wilson bill, relating to lead ores and lead in other ores, is so constructed as to be susceptible of widely differing interpretations, some of which have already resulted in official disagreements and considerable vexatious litigation. As a basis for this discussion, therefore, I beg to submit the following modification of that paragraph, which, it seems to us, will accomplish the full purpose of revenue and be acceptable to all concerned:

"All ores of which lead is a component part shall be dutiable at the rate of three-quarters of 1 cent per pound on the lead contained therein, according to sample and assay at the port of entry: *Provided*, That on ores carrying less than 5 per cent of lead the lead contained therein shall be admitted free. The method of sampling and assaying to be that usually adopted for commercial purposes by public sampling works in the United States."

It will be observed that we have no quarrel with the rate of duty in the existing paragraph, the chief features of the modification being the elimination of the misleading terms "lead ores" and "silver ores," for which elimination there is abundant cause.

I assume at the outset, gentlemen, that Congress desires, so far as may be possible, to deal fairly and justly with all concerned in its proposed revision of the tariff schedules, and that its purpose will be to so frame each provision as to leave the least possible chance for misconstruction. I also assume that when Congress decides to impose a specified duty on crude lead it does not desire to make it possible for customs collectors to so interpret its language as to assess duty upon great quantities of waste material, nor upon other metals associated with the lead which would otherwise be free.

Unfortunately, however, paragraph 165, as it now stands, either permits or requires both of these unjust constructions. This conclusion, with your permission, I will endeavor to substantiate.

The first clause in the paragraph provides that lead ores shall be dutiable at three-fourths of 1 cent per pound. Commercially speaking, any ore containing as much as 5 per cent of lead, provided it carries no other metal more valuable, is known as lead ore. On the other hand, ores carrying 60 or 70 per cent of lead would, under like conditions, be classified as lead ore. Now, for the purpose of illustration, suppose A imports 100 tons of low-grade ores containing 15 per cent of lead. Under paragraph 165 he would be compelled to pay duty on 200,000 pounds of substance, of which 170,000 pounds would be waste, and worse than waste, because of the expense involved in the process of separation. The remaining 30,000 pounds would be compelled to bear the whole burden of duty, amounting to $1,500, equal to 250 per cent ad valorem, or nearly twice as much money as the finished product would sell for in the markets of the East.

Mr. PAYNE. I suppose where there is only 15 per cent of lead there is a large proportion of silver?

Mr. ALEXANDER. Not always.

Now, suppose B imports another hundred tons of ore running 70 per cent lead. He would pay the same amount of duty that A paid, but he would have nearly five times as much lead. It is clearly manifest, so that he who runs may read, that a substance varying so widely in the proportion of its dutiable elements can not, with any sort of justice, be subjected to a single, inflexible rate of duty. Specific duties, to be equitably applied, can only cover the specific and well-defined commodities on which those duties are laid, and should never be permitted to extend to a varying quantity of other and useless material which happens to be associated with them. It is an underlying principle of barter that no man shall give something for nothing, and it should be furthest from the spirit and the letter of a statute to compel a citizen to pay a price and get no equivalent for the outlay. Pig lead is a finished product, and upon this pure and absolute commodity a duty is laid in the present schedule of 1 cent per pound.

An elaborate and costly process is required to separate this pure metal from the crude substances with which it is primarily associated, and in consideration of this required expenditure of labor and money a lower rate of duty is very properly imposed on the metal in crude form. This being the clear and just interpretation of the Government's intent and purpose, there would seem to be no excuse for any sort of provision which can be twisted into authority for the collection of a greater duty on the crude material than is levied on the product when refined. We claim, therefore, to be entirely consistent, and certainly right, in asking for such modification of this particular item as shall provide for the assessment of duty only on the lead contained in ores. Upon this phase of the proposition much more could be said, but having brought the matter before you, we are confident that the equity involved will challenge your careful consideration.

With your permission, gentlemen, I will now take up, very briefly, another and equally important feature of our proposed modification of paragraph 165.

That is paragraph 179 as the bill now stands.

By a peculiar and somewhat strained use of terms, silver-bearing ores in which the value of silver contained therein preponderates are classed as silver ores, though the quantity of silver may be an insignificant number of ounces, while the remaining metals are figured in tons. Ores of this sort are said to contain the lead, which is an exceedingly ridiculous proposition on its face. With equal propriety one might speak of a house being contained in one of its closets. In the case under discussion the injustice of this unique classification is particularly conspicuous. For instance, A imports 100 tons of silver-bearing ore containing 60 tons of lead, nearly 40 tons of waste, and the comparatively insignificant physical item of 4,000 ounces of silver.

This enormous proportion of lead is valued at $2,400. The few ounces of silver, by the same regulation, is valued at $2,600, and, presto, it becomes at once a silver ore, and the importer pays duty only on the 120,000 pounds of lead therein, amounting to $900. B imports another 100 tons of similar ore from the same mine, containing 60 tons of lead, nearly 40 tons of waste, and 3,600 ounces of silver. The lead, as in the previous illustration, is valued at $2,400, while the silver, happening to be 400 ounces less in quantity, is valued at $2,340. Presto, again, and we have lead ore, and duty is assessed and collected on the entire importation of 220,000 pounds. Does it not strike you, gentlemen, as somewhat absurd that a paltry difference of $60 in valuation of the two metals should determine the character of the ore and compel the payment of $900 additional duty on 80,000 pounds of useless substance?

I believe that is all I will read of Mr. Alexander's testimony, although I will ask leave to print the balance as a part of my remarks. That shows conclusively to my mind that there is a great deal of injustice in the administration of a tariff levied upon lead in the ore.

Mr. HOPKINS. That can be corrected by putting the duty both on silver and lead ore?

Mr. ALEXANDER. The paragraph I have the pleasure of presenting this morning is that, instead of saying "lead and silver ore," I want the paragraph so modified as to read, "All ores of which lead is a component part shall be dutiable at the rate of three-quarters of 1 cent per pound on the lead contained therein," etc.

Mr. PAYNE. I see the proviso is this: "*Provided*, That silver ore and all other ores containing lead shall pay a duty of three-fourths of 1 cent per pound on the lead contained therein."

Mr. ALEXANDER. Yes, sir.

Mr. PAYNE. Do you mean to say on that kind of ore they exact three-quarters of a cent on the whole weight of the mass?

Mr. ALEXANDER. If the silver is worth a cent more than the lead in the ore. Now, the lead may be 75 per cent of the whole ore and the silver only a few ounces, but if it is worth more than the whole quantity of lead, why that determines the duty. I think that is an entirely erroneous construction of the law.

Mr. PAYNE. Where the silver is of chief value it comes in free?

Mr. ALEXANDER. Where the silver is of chief value they only collect on the lead in the ore. If the lead in the ore happens to be a little more valuable than the silver, they collect on the whole importation, and there may be 70 per cent of waste material which does not amount to anything.

The CHAIRMAN. That was not the intention of the framers.

Mr. DALZELL. That is not a fair construction under the act.

Mr. HOPKINS. Is not your remedy with the Treasury Department rather than with Congress, a modification of the construction of the statute?

Mr. ALEXANDER. Or the lead contained in the silver ore, I agree to that; but you can see how the method of determining whether or not it is silver ore is unjust, because——

Mr. PAYNE. They interpret that if the silver is of chief value that it is silver ore, and if the lead is of chief value it is lead ore?

Mr. ALEXANDER. Yes, sir; the value determines the weight.

Now as to specific duties. Specific duties can only be laid upon well-defined provisions. You can not make a general application of it; and if you have a duty on ore to-day of 15 per cent and to-morrow 75 per cent, and all classed as the same material, you can see how much better——

Mr. PAYNE. I do not think that was the intention of the law.

Mr. ALEXANDER. I do not think it is the intention of the law.

Mr. HOPKINS. Has the attention of the Treasury Department been called to that construction?

Mr. ALEXANDER. The Treasury Department authorized it. Let me cite a case that comes from one synopsis.

I may cite an actual case in point, in which the collector of customs at St. Louis determined the value of 22,000 pounds of ore to be as follows: Lead, $231.88; silver, $230.42, a difference of only $1.46. This paltry difference of less than $1.50 was held to be the determining factor in the case and duty collected on the whole importation, of which only 30 per cent was a dutiable metal. Had the collector's estimate on lead been $1.47 less, the ore would have been classified as silver ore, and on the difference of a single cent, 70 per cent of the whole importation would have passed the custom-house free.

Appeal was made from the collector's valuation, and the United States General Appraisers discovered that an advisory circular issued by the Department concerning valuations had been construed as mandatory, a course which the appraisers took occasion to condemn, and the entry was ordered to be reliquidated as silver ore containing lead. I have in mind other cases of varying magnitude, but they need not be cited now. I have shown the injustice of two features of the present paragraph, and I can not think that a provision so clearly open to objection, so manifestly inequitable, and so liable to misconstruction and abuse will be permitted to remain in the statutes.

One other item in connection with this paragraph remains to be discussed, and I beg your indulgence for a few moments for that purpose.

The paragraph as it now reads calls for three-fourths of 1 cent per pound on crude lead, and this provision we have no desire to disturb. We believe it to be as equitable an adjustment of that feature of the bill, for all concerned, as is likely to be arrived at. As patriotic citizens, we believe in that measure of protection in the way of tariff which will guarantee to American producers of raw material a reasonable safeguard, without jeopardizing the success and prosperity of other and far greater interests equally entitled to protection. To fix a rate of duty on lead in crude form so high as to make it impossible for American smelters to deal justly with the great producers of other and far more valuable ores, simply for the benefit of a minor interest, would defeat the aim and purpose of true protective principles, and might, with considerable propriety, be termed class legislation.

A duty of three-fourths of 1 cent per pound on lead in ores is equivalent, at average prices, to about 40 per cent ad valorem. This generous discrimination in favor of native lead ought to be sufficient, even if no necessity existed for the importation of foreign ores. But such necessity does exist. I may say in a general way that great quantities of so-called silver-lead and galena ores are absolutely essential to the treatment of dry ores carrying other and more valuable metals. This phase of the question was elaborately argued by able men when the act of 1890 was under consideration, and doubtless again when the Wilson bill was framed. I need not now repeat the arguments then employed, but I may refer to one feature of smelting which has not been touched upon at length, but which is exceedingly important as a factor in this discussion.

Very much has been said concerning the necessity of fluxes, and it has been clearly shown that the ores under discussion are particularly desirable for that purpose. It is true that other substances, under certain conditions, may meet this requirement in part, but for very good reasons neither limestone nor iron fluxes can do more than assist in the smelting of precious metals. It is a fact well known by smelters that bullion can not safely carry more than 400 ounces of gold and silver to the ton. A greater proportion would increase the percentage remaining in slag to such an extent as to necessitate resmelting, which would add very materially to the cost of treatment.

While iron fluxes and limestone go entirely to waste, the greater portion of lead fluxes is retained, and becomes a sort of carrier or collector of the precious metals. An ordinary charge for a furnace might consist of 90 to 95

per cent of other material, to 5 or 10 per cent of lead, but such a proportion would so increase the percentage of valuable metals in the slag as to make the process disastrous. The addition, therefore, of liberal quantities of free melting galena ore, carrying 60 to 70 per cent of lead, would keep the bullion at a proper grade.

There is a sort of affinity between the precious metals and lead, so that its presence in the charge is a pretty sure guaranty that those metals will be carried down into the bullion instead of being left to an unprofitable extent in the slag. I may illustrate this carrying quality by the rain on a window. Drops accumulate on a rainy day until the whole surface is covered by the clinging globules, each too light in itself to move, but by and by a big drop strikes where two or three are staying, and they all start together to zigzag down to the bottom, carrying with them all the weaker drops that lie in the way.

Having shown the necessity for the free use of lead fluxes, it only remains to discuss the matter of supply.

In the year 1892 the Omaha & Grant Company imported into this country from Mexico for use in the Omaha works alone 20,000 tons of lead-bearing ores. In 1893 they imported 21,000 tons, but in 1894 less than 2,000 tons, and since that time none at all. The reason for this remarkable change was two-fold—the high rate of duty imposed by the McKinley bill and the discouraging methods of valuation. The result of these conditions was the building by individuals of this company of extensive smelting works in Mexico which deprived American laborers of that much employment, deprived American railways of large receipts from transportation, and cut off from the revenue a great many thousands of dollars. The reduction of duty by the Wilson bill was something of a relief, for in the meantime great difficulty had been experienced in the purchase of sufficient native ores of similar character to maintain, economically, the great operations of their several plants, and the Mexican ores were being smelted in that country.

Mr. HOPKINS. Do they not get those ores from Idaho and Nevada? That question was raised during the passage of the act of 1890, and as we had some smelters at Aurora, Ill., my attention was called to it.

Mr. ALEXANDER. I remember the circumstance.

Mr. HOPKINS. The opinion I have had is that they have developed mines in Idaho and Nevada, where they got fluxing ores as good as those imported.

Mr. ALEXANDER. Yes, sir; but they do not get them in sufficient quantities. The Cœur d'Alene mines, which are in the northern part of Idaho, use a great deal of that, but for the last two or three years they have had strikes and trouble with the miners which has abridged the production.

Another source of supply was being developed, however, in British Columbia, and American smelters came into sharp competition for those desirable ores. By reference to the 1895 report in the Mineral Industry, we find that while 200,000 tons of lead were produced by American smelters in that year only 150,000 tons came from American ores. I think I state a fact which no well-informed smelter will question when I say that the output of silver-lead ores from American mines has proved to be altogether inadequate for the treatment of so-called dry ores, and that any abridgment of facilities for the importation of foreign silver-lead ores would work an incalculable injury to the whole smelting and mining interests of this country, except the few producers of those particular ores.

Our company imported from British Columbia last year from the Omaha works alone over 5,000 tons of galena ore, and even with this increased supply there were times within the year when it was almost impossible to keep the mixtures up and the furnaces running. Overtures have already been made to this company for the erection of extensive smelting works in British Columbia, but under existing conditions they have not been inclined to accept them.

I may say with considerable confidence, however, that if the conditions of 1892 and 1893 are restored, or a near approximate thereto, the same incentive which took millions of dollars of active American capital into Mexico will take other millions into British Columbia. To handicap the enormous smelting interests of this country, and through them the great producers of precious metals, simply to give an unnecessary protection to a single minor element in our mining industries, would be exceedingly ill advised, if not disastrous. The sharp lesson which a high tariff furnished in connection with Mexican ores is further set forth in the following excerpt from The Mineral Industry, which I ask permission to read. This is in the report for 1894.

"In the Western States, especially in Idaho, the rate of wages and the autocratic rule of miners' unions have interfered so seriously with the working of silver-lead mines that the question has almost reached the point where the existence of the industry is in danger. The steady increase in the output of Missouri and Kansas (nonargentiferous) lead through the lowest markets is a satisfactory demonstration of our ability to compete with any country. Competent experts state that with large, well-designed works Missouri and Kansas can produce with profit down to very near the cost of lead in Spain.

"The heavy decrease of 9,522 tons, or 32.5 per cent, shown in the amount of lead smelted from foreign ores, is the direct result of the short-sighted and mistaken policy of imposing a heavy duty on lead in ores. The result of this has been the establishment of an important smelting industry in Mexico, with American capital, and the heavy importations which should now come to the American smelters from Mexico will not be received, for the industry has become firmly established in that country. This is directly shown by the tables. The lead imported in ore in 1894 was only 19,748 tons, as against 29,270 tons in 1893 and 26,734 tons in 1892.

"On the other hand, the lead imported in foreign bullion for refining increased from 14,149 tons in 1892 to 35,000 tons in 1893 and 40,345 tons in 1894. As the duty on lead in ore was relatively higher than on lead in bullion, a further inducement was offered to Mexican mine owners to do their smelting at home, and the natural result was manifest.

"Nearly all the lead imported in ore and most of that in bullion came to this country from Mexico. Some, however, is imported from Canada, and especially from the Kootenai region, where silver-lead mines are being opened up to a considerable extent."

I beg also to submit another brief excerpt from the same authority for 1895:

"The increase in the quantities of silver especially produced or refined in this country was due largely to the treatment here of base bullion from Mexico. The unwise imposition of a high duty on silver-lead ores some years ago has not only deprived our smelters of a large amount of work which they formerly had, and of a class of ores which were particularly desirable for treatment in connection with our own; it has also built up in Mexico a large and flourishing smelting industry which is now well established and able to hold its own. This is shown in the extraordinary increase in the quantity of bullion obtained by smelting given in the Mexican returns. The greater part of the base bullion made in that country is sent here to be refined, and to this is due the fact that while our own output of silver showed a decrease of 3,515,640 ounces, there was an actual gain of 6,247,485 ounces."

These facts which are now disclosed in connection with Mexican ores, and the transference of great smelting interests from this country to Mexico, are almost sure to be repeated in British Columbia, if an oppressive duty is levied on silver-lead ores.

It is proper to say in this connection that in the production of galena ore in British Columbia, which is the chief source of our present importations, American miners are not pitted against peons, but they are in honorable competition with well-paid, intelligent workmen, chiefly Americans; and the necessity for a prohibitive protective barrier for native mines and miners, which has been urged heretofore, does not in fact exist. For the greater good, therefore, of the greater number, and of the greater interests involved, we respectfully urge your careful consideration of the points I have presented.

LEAD IN BULLION.

In one of the excerpts from The Mineral Industry which I have submitted there is a brief reference to the relative higher duty on lead in ore than on lead in bullion.

The present difference of only one-quarter of a cent per pound between lead in ore and lead in pigs is clearly out of proportion. There is no duty fixed on bullion, or the lead contained therein, and this omission from existing schedules is the important item referred to in the early part of my remarks.

Pig lead and base bullion are entirely distinct commodities, and an elaborate process of separation is necessary to produce the refined product after the ores have been reduced to bullion.

It is our deliberate judgment that if duty on lead in ores is fixed at three-fourths of 1 cent per pound, there should be laid on pig lead a duty of 1¼ cents per pound and on lead in base bullion a duty of 1½ cents per pound.

Under the present tariff act, collectors have been entirely at sea as to the classification of bullion, and as a sort of compromise it has been rated as pig lead. Importers protested vigorously against such classification, and showed to the satisfaction of the United States General Appraisers that in the nature of things they could not be alike. While admitting that base bullion was not pig lead, but a crude metal containing lead, and that duty could only be assessed on the lead so contained, the General Appraisers were unable to find in the tariff schedules a provision under which they could properly rate it, and collectors were instructed to continue the assessment of duty at the pig-lead rate.

It is well understood by smelters of silver-lead ores, in conjunction with other ores carrying precious metals, that base bullion is about half way along from lead in ores to pig lead. It having been officially decided that base bullion is not pig lead, and that the lead contained therein can not be used for commercial purposes until, by a process of melting and refining, it shall have been separated from its associate elements and run into bars or pigs, it is entirely clear that a rate of duty relatively less than that on pig lead and relatively higher than that on lead in ores should be applied.

It also having been decided that duty shall only be assessed on the lead contained in the bullion, the duty of Congress to fix an intermediate rate seems clear. We beg to urge, therefore, that the rates of duty on the three forms of lead imported be fixed as follows: On lead in ores, three-fourths of 1 cent per pound; on lead contained in base bullion, 1¼ cents per pound; and on lead in pigs and bars, 1½ cents per pound. These rates are relatively just, and whatever the initial rate may be, this proportion should be preserved.

We approve the purpose of this committee and of Congress to fix a duty on finished or partly finished products high enough to give ample protection to American labor and to American producers, but we also desire that American capital and American institutions for the conversion of raw material into finished products be also considered. A high duty on crude lead and a relatively low duty on pig lead and bullion would be the most effective means that could be adopted to encourage, if not absolutely force, American smelters to set up works abroad and to injure and make uncertain our American market for finished lead products. Against such adjustment of duties we earnestly and patriotically protest.

This is all I have to say at present, and I thank you, Mr. Chairman and gentlemen of the committee, for your courtesy and patience.

Mr. President, I am not a miner, and I know very little about mining; in fact, I know nothing about it practically, experimentally; but I do know that this country has been compelled to import lead ore and lead within the last few years for consumption in this country, and I do know there is a species of wet or fluxing ore that is necessary to be imported from Mexico, or possibly from the British Possessions, and essential to the use of the smelters in carrying on their business.

If this tax is placed at 1¼ cents on lead in ore, it will have the practical effect of depriving the American smelters of the opportunity to reach the fluxing ores of Mexico and the British Possessions, and compelling them to purchase the fluxing ores in the Rocky Mountain States, providing the Rocky Mountain States have the capacity to produce the ore necessary, and I am told by a reliable authority, an authority upon which I have a right to rely and believe, that these fluxing ores are not produced there in quantities and quality sufficient to carry on this business.

It occurs to me, Mr. President, under these circumstances, that if a tariff is levied sufficient to protect the interests of the Rocky Mountain miner, who is principally interested in this matter, and at the same time permit the smelters to draw their fluxing ores from such source or such sources as they may see fit and as may be most profitable to them, it is all the Committee on Finance can afford to do, so far as taxation is concerned, and that it is all our friends in the Mountain States have a right to demand at the hands of Congress. That gives them a cent a pound on lead in ore as a protective tariff against like ores in the British Possessions and like ores in Mexico.

The firm of which I am speaking, the Omaha and Grant Smelting Works, one of the largest firms in the United States, has been compelled, as a matter of self-preservation, to go into Mexico within the last four or five years and construct two smelters. I am now taking the theory of the protective tariff and applying it as I understand it is to be applied to cases of this kind. In consequence of the tax imposed upon lead in ore, this company has been compelled to take hundreds of thousands of dollars of American capital down to Mexico and construct smelters, there employing Mexican labor to a very great extent, and by that means depriving the American laborer, the Nebraska laborer, of the right to labor in smelters and earn a livelihood.

The natural tendency would be to drive American capital to Mexico or to the British Possessions, where these ores can be
